ADDITIONAL RESOURCES – LOCAL GOVERNMENT FINANCE SETTLEMENT

Briefing Note by Executive Director, Finance & Regulatory

EMERGENCY POWERS – COVID-19

8 April 2020

1 DECISION(S) REQUIRED BY CHIEF EXECUTIVE

- 1.1 I recommend that approval is given for the creation of budgets to reflect additional funding from the Scottish Government in 2020/21 over and above that approved by Council as part of the 2020/21 budget on the 26th February 2020:
 - (a) Capital funding £0.318m for Cycling, Walking and Safer Streets; and

| Investment priority (revenue funding) | £m | Description |
|---|-------|--|
| Emergency reserve to support COVID-19 | 0.500 | To be held in reserve to support the Council's response to the global |
| Investment in H&SC base budget | 1.389 | pandemic Additional funding to address historic pressures and non-delivery |
| Confirmed increase in | 0.150 | of permanent savings Impact of Peebles HS fire |
| insurance premiums Contract management (CGI developments) | 0.050 | Required to deliver significant financial plan savings in 2020/21 |
| Total | 2.089 | |

(b) Revenue funding - £2.089m:

2 BACKGROUND AND PURPOSE

2.1 Following approval of the Council's 2020/21 budget on 26 February 2020, correspondence from Scottish Government was received on 27 February. This letter confirmed that discussions with the Scottish Green Party to secure support for the Scottish Government's Budget, have resulted in a further £95m revenue budget being identified for Scottish Local Authorities in 2020/21. This is in addition to the LGFS received on 6 February 2020. The funding is not ring-fenced and will be added to the core grant as part of the LGFS in 2020/21. It is assumed, until further clarification, that this funding is being provided on a one-off basis in 2020/21.

- 2.2 Further specific capital funding has also been made available for projects that support the Scottish Government's net-zero ambitions. £15m has been provided to support further investment in cycling, walking and safer streets. £25m has been provided to support further investment in energy efficiency through a mix of area based schemes and other existing programmes. This commitment is to be discussed further with Local Government and other delivery partners, as such the distribution methodology is still to be confirmed.
- 2.3 These allocations are subject to Parliamentary approval of the final stages of the Budget Bill and associated Local Government Finance (Scotland) Order 2020.
- 2.4 For Scottish Borders Council the impact of the confirmed capital funding and the revenue funding is shown in table 1 below.

Table 1

| £′m |
|-------|
| 0.318 |
| 2.089 |
| |

- 2.5 The budget approved by Scottish Borders Council on 26 February 2020 now requires to be updated with this additional funding allocation.
- 2.6 The Capital allocation for Cycling, Walking & Safer streets of £0.318m will be added to the project budget already approved within the Capital Plan of £0.189m, giving a total budget of £0.507m in 2020/21.
- 2.7 It is proposed that the additional revenue funding of £2.089m be allocated to service priority areas as reflected in table 2 below.

Table 2

| Investment priority (revenue funding) | £m | Description |
|---|-------|--|
| Emergency reserve to support COVID-19 | 0.500 | To be held in reserve to support the Council's response to the global pandemic |
| Investment in H&SC base budget | 1.389 | Additional funding to address historic pressures and non-delivery of permanent savings |
| Confirmed increase in insurance premiums | 0.150 | Impact of Peebles HS fire |
| Contract management (CGI developments) | 0.050 | Required to deliver significant financial plan savings in 2020/21 |
| Total | 2.089 | |

2.8 The additional allocation to support the H&SC base budget seeks to address the structural deficit in the budget which has arisen due to the failure to deliver planned savings, required by the financial plan, over a number of years, along with increasing demand pressures.

3 IMPLICATIONS

3.1 Financial

There are no additional financial implications associated with this report, its content referring specifically to the revenue and capital budget. The key risks associated with the Council's revenue and capital plans, as a result of COVID 19 impacting on normal business, are significant, and will be monitored and reported on a regular basis within the regular monitoring reports as required by the Council's Financial Regulations.

3.2 **Risk and Mitigations**

There is a risk that the Local Government Finance Settlement could be amended again before Parliamentary approval. Any further funding updates and consequent amendments to the budget will be reported to Council when information becomes available.

3.3 Equalities

Integrated Impact Assessments (IIA) were carried out on all budget proposals approved by Council on 26 February 2020. There are no further equality impacts arising from this specific report.

4 CONSULTATION

- 4.1 The Monitoring Officer/Chief Legal Officer, Service Director HR & Communications and the Chief Officer Audit & Risk have been consulted and their comments incorporated into the report.
- 4.2 The Convener, the Leader of the Administration and the Leader of the Opposition are being consulted and any questions will be responded to by relevant Officers and any comments received will be considered by the Chief Executive in arriving at her decision.

BUDGETARY IMPACT OF COVID 19 - INITIAL FINANCIAL ASSESSMENT

Briefing Note by Executive Director, Finance & Regulatory

EMERGENCY POWERS – COVID-19

24 April 2020

1 DECISION(S) REQUIRED BY CHIEF EXECUTIVE

1.1 It is recommended that the methodology used to determine the financial implications of the COVID-19 response is noted. This information will continue to be refined and developed over the coming weeks to provide as clear a financial position as possible and will provide the basis of a financial return to COSLA to be shared with the Scottish Government.

2 **BACKGROUND AND PURPOSE**

- 2.1 This paper provides an initial high level assessment of the impact of COVID 19 on the Council's 2020/21 revenue budget. As a Category 1 responder the Council's primary responsibilities are working with other Category 1 responders to protect life, especially the vulnerable; and to advise/support businesses and the wider public during this crisis. The emergency situation currently affecting the UK is assessed as having a profound negative effect of the Council's finances, with potential pressures of over £10m already being identified with further significant costs projected.
- 2.2 This initial assessment focuses on the impact in 5 main areas:
 - reductions in income; •
 - additional unplanned expenditure now being incurred as a • consequence of COVID-19;
 - delays in the delivery of savings anticipated by the budget approved • in February 2020;
 - existing Council budget which can be directed to the COVID-19 emergency; and,
 - any service underspends which could be used to mitigate budget • pressures.
- 2.3 The report explains the methodology adopted to capture the financial impact of the pandemic at this early stage in the financial year and the management actions agreed by CMT to minimise these impacts wherever possible.

2.4 **Reductions in income**

Even at this early stage in the financial year the current situation is likely to have a significant impact in three main areas: Council tax, Non-domestic rates and fees and charges income.

2.5 Council Tax

The budget for Council Tax in 2020/21 stands at a net £67.1m excluding Council Tax Reduction Scheme. An ultimate collection rate of 98.8% is budgeted in a normal year with the bad debt provision set at 1.2%. In year collection is normally expected to be 95% with any under recovery of income impacting adversely on the Council's cash flow. Month 1 billing of Council Tax appears to have held up reasonably well with a small negative variation against expected direct debit receipts of only £8k (0.1%). Month 1 is however expected to be a relatively good month for council tax receipts as the COVID-19 lock down only took effect in the last week of March and traditionally people who are annual payers will pay their full Council Tax in April. This is therefore expected to be a high point of monthly collection with people whose income has reduced due to the lock down subsequently acting to delay payment of their Council Tax. Every 1% reduction in tax take will have a £0.67m impact on the Council's budget. Unlike some fees and charges income, it is likely that anticipated Council Tax payments delayed will eventually be received as the Council agrees payment plans with residents experiencing temporary financial issues. If repayment plans are agreed this will limit the impact to a timing and therefore cash flow issue rather than a budget issue.

2.6 Non Domestic Rates

Scottish Government has put in place a £2.2bn package of assistance for businesses to assist during the current crisis with £1.2bn available in the form of business grants and a further £1bn package of rates relief to business adversely affected by the lock down. All businesses with a rateable value of less than £18,000 and qualifying for small business bonus relief and meeting the criteria laid down by Scottish Government are eligible for a grant of £10,000. Businesses in the hospitality, retail and leisure sectors with a rateable value of up to £51,000 per annum are eligible for a £25,000 grant. All retail, leisure and hospitality businesses have had their rates bill cancelled for 2020/21 and government has postponed the proposed 1.6% increase in the rates poundage which was due to take effect for all businesses on April 1.

- 2.7 In terms of the impact on the Borders, Scottish Government has calculated a requirement for overall funding of £39.9m and has paid the Council 80% of this sum up front. Confirmation of the arrangements for the remaining payment of 20% is awaited. As at close of business on Friday 17 April, £10.73m had been paid to 986 businesses. In total the Scottish Government originally estimated 3,600 Borders businesses were eligible for the grant scheme at 17 March 2020. Subsequent expansion of the scheme to include self-catering accommodation and caravan sites, along with a further £220m national funding to assist rate-payers who own multiple properties and the newly self-employed, will however expand the number of businesses who will ultimately benefit from the scheme.
- 2.8 Scottish Government has recognised the impact that the provision of rating relief will have on the Non Domestic Rate income collected from local businesses by the Council and has amended revenue support grant payments (RSG), initially for the first 3 months of the financial year to protect Council cash flow. In the first quarter NDR payments have been reduced by £12.169m with RSG increased by the same amount. It is likely moving forward that the Assessor will see a significant increase in the number of appeals against 2020 rating demands due to the exceptional impact of COVID 19 on business trading income and this situation will require to be carefully monitored.

2.9 Fees and Charges

The Council's budget for 2020/21 includes £27.8m to be delivered by a range of fees and charges. The following narrative outlines the impact on the key elements of fees and changes.

| | Loss of | Cost | Net Income |
|-----------------|-----------|-------------|------------|
| | Income | Reduction | Loss |
| Planning Fee | 443,820 | 0 | 443,820 |
| School Meals | 450,000 | (202,500) | 247,500 |
| Waste Services | 369,549 | 0 | 369,549 |
| SBcContracts | 3,356,250 | (2,801,775) | 554,475 |
| Misc fee income | 500,000 | 0 | 500,000 |
| | 5,119,619 | (3,004,275) | 2,115,344 |

Miscellaneous fee income pressures may include fees & charges such as school lets, nursery fees and social care charges. The cumulative impact from loss of income in these areas could be significant. Work in on-going with Live Borders to determine financial implications for them through loss of income, this will be mitigated by their decision to furlough their staff.

2.10 Additional Expenditure

Additional costs have been incurred by the Council as a result of the COVID-19 emergency response. The Council received £1.1m of assistance from Scottish Government as part of a £50m national hardship fund to deal with the immediate impact of the crisis. The orders placed to date total £0.979m with significant additional costs still forecast. The costs shown below in key categories of spend have been incurred to date and do not represent the full commitment which may be required.

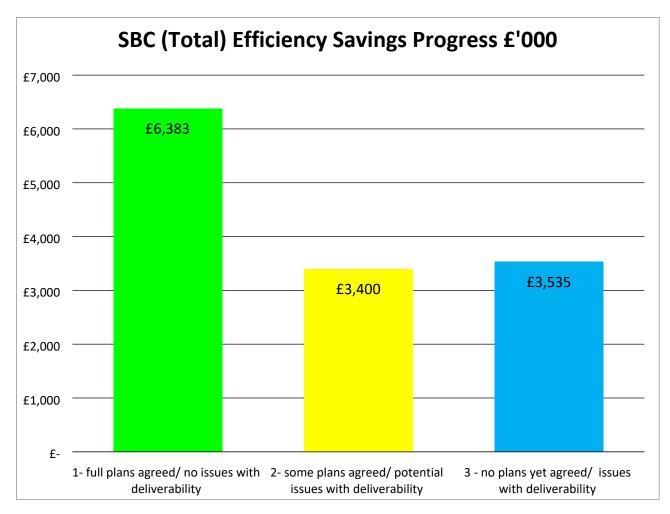

| Category of expenditure | £ |
|---------------------------|---------|
| PPE | 486,413 |
| Catering | 141,126 |
| Cleaning | 248,201 |
| Community Council Support | 63,000 |
| Temporary Mortuary | 38,396 |
| Other Costs | 2,154 |
| Total | 979,290 |

- 2.11 It is assumed care related costs of £42k already incurred along with 13 additional spaces at Whim Hall and the expansion of Deanfield will be funded through the IJB mobilisation plan and have therefore been excluded from the table above.
- 2.12 It should be noted that there is a potential increase in construction project costs as a result of delays in delivery which have yet to materialise but could have a financial impact.

2.13 With regard to supplier payments the Council has agreed to pay Early Years and Transport providers in advance to ensure they can maintain a sound financial position during this period. The Early Years additional costs are being funded through Early Learning & Childcare expansion funding. The transport provider arrangements are designed to protect provider's cash flow in terms of the timing of the payment but have no budget impact for the year. The action taken by the Council is designed to ensure the key providers are able to continue in operation and will be able to resume normal service when required.

2.14 Delays in delivery of financial plan savings

The savings required by the 2020/21 financial plan along with savings brought forward from 2019/20 total £13.363m. An initial assessment has been made of how the COVID-19 emergency response could impact on delivery of these savings in 2020/21. Below is a graph showing that 48% of the savings (£6.383m) have plans in place for delivery with a high degree of confidence that these savings will be delivered in full on time. The remaining 52% (£6.935m) have been assessed as having some risk attached to delivery, with 26% (£3.4m) having some plans agreed but potential for issues with deliverability and 27% (£3.535m) with no plans yet agreed and / or confirmed issues with deliverability due to the COVID-19 response.

2.15 Additional Budget Identified

In recognition that the Council will be required to fund an element of the pressures resulting from the COVID-19 response, the following Council budgets could be directed to these budget pressures:

| Scottish Government funding: | | |
|--|---------|---|
| Hardship fund | (1,100) | SBC share of £50m national funding to support Councils with additional costs and loss of income |
| SBC funding which could be directed to supporting COVID-19 response: | | |
| SBC COVID-19 reserve | (500) | Allocation from SBC share of SG £95m funding from Green Party negotiations |
| Community Fund | (740) | Earmarked balance from 2019/20 into 2020/21 |
| Corporate Transformation growth | (250) | 2020/21 budget growth which could be removed - £250k earmarked bal from 19/20 |
| Total | (2,590) | |

2.16 Opportunities for making savings within existing budgets

It is important to recognise that whilst there are significant financial implications for the Council as a result of the COVID-19 emergency response, there will also be areas of activity within the Council which will naturally reduce during this period resulting in underspends. It is crucial these underspends are captured as early in 2020/21 as possible to allow the budget to be redirected to support additional costs elsewhere in the Council. Examples of where we need to consider redirecting budget are:

| Review all growths included in the 20/21 | Can any growths be removed/reduced in line with reduced |
|---|---|
| Financial Plan | activity? |
| Reductions in service delivery levels | Can budget be removed/redirected within services eg pool cars/travel/materials/agency |
| Impact of delays in delivery of capital programme | Less borrowing required/lower consultants costs |

2.17 Consideration should be given, at this point, to how the Council will return to normal business post the emergency response from a budget perspective. The pressures on the Council's budget will require corporate action to identify budgets which have not been committed during the lockdown period and as such the working assumption should be that services should only plan to commit the remaining proportion of their non-staffing budget which relates to the post lockdown period to the 31st March. The changes to the way in which the Council has been forced to operate following the COVID-19 restrictions with extensive use of digital technology including video conferencing and changes in working practices provides the opportunity to embed these changes moving forward and to deliver significant transformational benefits on a sustained basis.

2.18 Budget Monitoring Arrangements

Financial implications will be reported to CMT through the normal budget monitoring arrangements. The finance team are finalising 2019/20 outturn over the next 2 weeks with the outturn report being presented to CMT on the 20th May 2020 and then being presented to Elected Members through the Emergency Powers process on 9th June 2020.

2.19 COSLA and the Directors of Finance Section have also now agreed a financial pressure template to record the additional costs, lost income and savings not achieved while resources are diverted to tackling COVID-19 emergency. A similar approach has previously been adopted by NHS Boards and it is intended that this template places the recording and reporting of Council costs and pressures on a consistent footing with approach adopted for the NHS to record Health and Social Care costs. By ensuring all costs are recorded, but not duplicated, across both returns

Scottish Government will be provided with a complete picture of the financial impact of COVID-19 on Health and Local Authority services.

- 2.20 Ministers have given the commitment that "reasonable expenditure" incurred by Local Authorities will be funded by the Scottish Government. The intention behind the guidance is therefore to ensure that the costs included by Councils in the template returns for consideration by Ministers will be additional, auditable and as consistent as possible across all 32 Councils.
- 2.21 Each line on the financial pressure template has been reviewed and additional guidance has been included to ensure a consistent approach is followed. It is proposed to use historic information from previous financial years, which has been subject to Audit, and where possible information across the last 3 financial years to establish a trend that is comparable to the current crisis situation can be derived. In this way it is expected that the difference from 'normal' activity to the current period will be identifiable as the direct impact of COVID-19.

2.22 Principles to be followed in recording costs related to COVID-19

- 1. Figures should initially be based on an initial 3 month (12 week) period ending 30 June. If current restrictions are extended by UK or Scottish Government this period will be revisited.
- 2. Only additional costs should be recorded, net of any associated savings or income. The Council's legally approved budget for 2020/21 should be the starting point for evidencing the additional costs incurred. Additional costs in this case may relate to additional expenditure, reduced income, or planned savings not delivered. In compiling the list of cost pressures, councils should not include issues where there were pre-existing budget pressures prior to the COVID-19 crisis, as those are highly unlikely to be funded by the Scottish Government and would only serve to undermine the case for the funding of the COVID-19 direct impacts.
- 3. Costs recorded in the spreadsheet template should be additional to normal activity. They may include new costs incurred as a consequence of COVID 19, or reflect variances to the 2020/21 approved revenue budget for income and expenditure arising from the current emergency.
- 4. All costs included in the spreadsheet should be auditable i.e. be supported by primary source documents such as invoices and overtime claims, or represent a demonstrable material variance to past financial performance in a normal year.
- 5. Where possible, variances should be measured with regard to more than one year for example an expenditure or income trend over the last 3 years.
- 6. The cost variances included in the template should be subject to a formal budget monitoring report to elected members.
- 7. Additional funding already provided by the Scottish Government will be reflected in the summary statements that will be provided to the Scottish Government, so individual council returns should be on a gross impact basis.

2.23 Action required

The following action is required to ensure we have a clarity across the Council on how CMT are approaching the COVID-19 response from a financial perspective:

- Managers must be fully engaged in determining the financial impact of additional costs and loss of income in their services;
- Managers must also identify areas of budget which are underspending due to lower than normal service activity and therefore could be redirected to COVID-10 pressures;
- A communication will be issued to all budget managers asking them to reflect the COVID-19 impact in their monthly forecasts to allow a Council position to be confirmed as part of the routine budget monitoring processes;
- A summary position encompassing the CoSLA national template along with the IJB mobilisation return will be circulated round CMT on a regular basis to ensure full awareness of the financial pressures being experienced and forecast;
- The 2019/20 outturn position along with a monitoring position based on April 2020 will be presented to CMT on the 20th May 2020. This will be reported to Members through the process agreed at the meeting of Scottish Borders Council on the 26th March.

3 IMPLICATIONS

3.1 Financial

There are no additional financial implications associated with this report, its content referring specifically to the impact of COVID revenue budget.

3.2 **Risk and Mitigations**

There is a risk that the financial implications experienced by the Council during the COVID-19 emergency exceed the funding available, causing a financial risk to the Council. This risk is mitigated by robust monitoring processes and regular contact with CoSLA and Directors of Finance colleagues to ensure the Council approach is in line with other Scottish Councils.

3.3 Equalities

There are no equality impacts arising from this report.

4 CONSULTATION

The Convener, the Leader of the Administration and the Leader of the Opposition are being consulted and any questions will be responded to by relevant Officers and any comments received will be considered by the Chief Executive in arriving at her decision.

FINAL REVENUE VIREMENTS AND EARMARKED BALANCES 2019/20

Briefing Note by Executive Director, Finance & Regulatory

EMERGENCY POWERS – COVID-19

8 April 2020

1 DECISION(S) REQUIRED BY CHIEF EXECUTIVE

- **1.1** I recommend that approval is given for
 - (a) the virements in Appendix 1; and
 - (b) the earmarked balances in Appendix 2.

2 BACKGROUND AND PURPOSE

- 2.1 During 2019/20, and most recently at the meeting held on 11 February 2020, the Executive Committee approved a number of revenue budget virements. The original projections on which the February virements were based related to actual spend to 31 December 2019. Since then, further work on projected expenditure and income has identified the requirement to seek approval for final budgetary adjustments.
- 2.2 Virements required fall into two categories:

(a) 2019/20 – Routine Virements (Appendix 1)

This adjustment supplements the virements approved by the Executive Committee during the financial year, including those approved on 11 February 2020, and are detailed in Appendix 1. Final approvals are now sought to reflect:

- i. A reallocation of budgets between Services to reflect latest spending plans;
- ii. Adjustments to Revenue Support Grant for 2019/20 following final confirmation from Scottish Government. This requires the income budgets to be "grossed up" to fund expenditure.

(b) Earmarked Balances (Appendix 2)

These also supplement the earmarked balances approved by the Executive Committee during 2019/20 to date. These virements are detailed in Appendix 2 and earmarking is required:

i. Where projects or initiatives will now be completed in 2020/21;

ii. An increase to the previously approved DSM carry forward projections including Pupil Equity Fund (PEF) funding.

3 IMPLICATIONS

3.1 Financial

There are no additional costs attached to any of the recommendations contained in this Briefing Note.

3.2 **Risk and Mitigations**

The main risk is that after the earmarked balances are carried forward into 2020/21, the Service do not come within budget at year-end; this is mitigated by year-end adjustments which will reduce earmarked balances in relevant Services if required.

3.3 Equalities

It is anticipated there will be no adverse impact due to race, disability, gender, age, sexual orientation or religion/belief arising from the proposals contained in this report.

4 CONSULTATION

- 4.1 Directors and their staff where appropriate have been involved in and agreed the compilation of the final virements.
- 4.2 The Chief Legal Officer (Monitoring Officer), the Chief Officer Audit & Risk, the Service Director HR & Communications and the Clerk to the Council have been consulted and any comments have been reflected in the report.
- 4.3 The Convener, the Leader of the Administration and the Leader of the Opposition are being consulted and any questions will be responded to by relevant Officers and any comments received will be considered by the Chief Executive in arriving at her decision.

ANTI-MONEY LAUNDERING POLICY

Briefing Note by Executive Director Finance & regulatory

EMERGENCY POWERS – COVID-19

13 April 2020

1 DECISION(S) REQUIRED BY CHIEF EXECUTIVE

1.1 I recommend that approval is given for the Council's Anti Money Laundering Policy shown in Appendix 1, which has been prepared fully in accordance with the CIPFA Proceeds of Crime (Anti-Money Laundering) Practical Guidance for Public Service Organisations' (2005) and relevant legislation.

2 BACKGROUND AND PURPOSE

- 2.1 CIPFA (Chartered Institute of Public Finance & Accountancy) produced guidance for public sector organisations in their publication 'Proceeds of Crime (Anti-Money Laundering) Practical Guidance for Public Service Organisations (2005)'. In this guidance, CIPFA recognises that the regulations related to 'relevant business' do not necessarily apply to public service organisations because their treasury management activities are largely service based. However, as the main money laundering offences and obligations apply in law to all organisations and persons in the UK, all public service organisations should "embrace the underlying princiOples behind the money laundering legislation".
- 2.2 The Anti-Money Laundering Policy was previously approved in April 2012; this is an update in line with changes in legislation and changes in the Council structure.
- 2.3 The Anti-Money Laundering Policy, as shown in **Appendix 1**, links into, and has a synergy with, the Council's Corporate Counter Fraud Strategy and its appendices:
 - Counter Fraud Policy Statement
 - Corporate Counter Fraud Response Plan
 - Whistleblowing Policy

3 IMPLICATIONS

3.1 Financial

There are no further financial implications relating to this report. The implications, including financial, from the Council's approach to money laundering activity are explained in detail within Appendix 1.

3.2 Risk & Mitigations

The report is an important element of the overall risk management environment, containing detailed sections on risk management controls, but has no specific risk implications of its own.

3.3 Equalities

It is anticipated that there are no adverse impacts due to race, disability, gender, age, sexual orientation or religion/belief arising from the proposals in this briefing note.

4 CONSULTATION

- 4.1 The Monitoring Officer/Chief Legal Officer, Service Director HR & Communications and the Chief Officer Audit & Risk are being consulted on this report and their comments will be included in the final version.
- 4.2 The Convener, the Leader of the Administration and the Leader of the Opposition are being consulted and any questions will be responded to by relevant Officers and any comments received will be considered by the Chief Executive in arriving at her decision.

7 Ensuring the Policy is Followed:

- Appendix 1: Responsibilities Regarding Making a Disclosure
- Appendix 2: Money Laundering Reporting Form (MLRF)

8 Reviewing the Anti-Money Laundering Strategy

1. Introduction

- 1.1 The Council, as a public body with responsibilities for the stewardship of public money, requires to have in place an agreed policy for the prevention of money laundering. Significant changes have occurred to the statutory framework surrounding money laundering as a result of the following legislation, and as a consequence the council's previous policy has been reviewed and updated:
 - Proceeds of Crime Act (2002)
 - Terrorism Act (2006)
 - Money Laundering, Terrorist Financing and Transfer of Funds (Information on the Payer) Regulations 2017 (as amended 2019).
- 1.2 The UK's Anti-Money Laundering regime is primarily designed with the objective of identifying and combating large scale organised crime. The Proceeds of Crime Act (2002) imposed requirements on those conducting 'relevant business' to have systems in place to: obtain evidence of the identity of their clients, keep records, train staff, and make internal reports. The Money Laundering Regulations (2017) outline the specific requirements for those identified as conducting 'relevant business.'
- 1.3 CIPFA (Chartered Institute of Public Finance & Accountancy) produced guidance for public sector organisations in their publication 'Proceeds of Crime (Anti-Money Laundering) Practical Guidance for Public Service Organisations' (2005).
- 1.4 In this guidance CIPFA recognise that the regulations related to 'relevant business' do not necessarily apply to public service organisations because their treasury management activities are largely service based. However, as the main money laundering offences and obligations apply in law to all organisations and persons in the UK, all public service organisations should "embrace the underlying principles behind the money laundering legislation". The Council is therefore required to establish internal procedures and policies to prevent and detect the use of their services for money laundering activities.
- 1.5 The Policy links into, and has a synergy with, the Council's Corporate Counter Fraud Strategy and its appendices:
 - Counter Fraud Policy Statement
 - Corporate Counter Fraud Response Plan
 - Whistleblowing Policy

2. Scope

2.1 This Policy applies to all employees, including agency staff and locums, and aims to maintain the high standards of conduct by working together to prevent and detect criminal activity through money laundering. It sets out the requirements which must be followed to enable the Council to comply with its legal obligations, and the guidance provided by CIPFA.

SBC Anti Money Laundering Policy – April 2020

3. Definition of Money Laundering

- 3.1 CIPFA defines money laundering as "possessing or in any way dealing with or concealing the proceeds of any crime".
- 3.2 The Proceeds of Crime Act (2002) states that money laundering covers a range of activities and it is technically defined as any act constituting an offence under sections 327 to 329 of the Act, as summarised below:
 - Concealing, disguising, converting, or transferring criminal property, or removing it from the UK (section 327)
 - Entering into, or becoming concerned in, an arrangement which a person knows (or suspects) facilitates the acquisition, retention, use or control of criminal property by or on behalf of another person (section 328)
 - Acquiring, using or possessing criminal property (section 329)
 - An attempt, conspiracy or incitement to commit such an offence
 - Aiding, abetting, counselling or assisting in the procurement of such an offence.
- 3.3 Criminal property is widely defined as property representing a person's benefit from criminal conduct. It includes all proceeds from crime such as property (in the UK or abroad), money, and other assets that could also cover any interest held in land, land rights and/or property.
- 3.4 In court proceedings in order to secure a conviction it is only necessary to prove that the laundered property was criminal property. In other words even if the criminal property was generated as a result of the criminal activity of another person, the individual holding that property can be convicted of money laundering under the Proceeds of Crime Act (2002).
- 3.5 The Terrorism Act (2006) also deals with the laundering of 'terrorist property' i.e. property likely to be used for the purposes of terrorism or property gained as a result of terrorism. In complying with the Act, the Council has a duty to be vigilant against its services being used in such a way that it "facilitates the retention or control by or on behalf of another person of terrorist property".
- 3.6 In addition to the actual offences of money laundering the Proceeds of Crime Act (2002) sets out related offences of failing to report where a person has knowledge, suspicion or reasonable grounds for knowledge or suspicion that money laundering is taking/has taken place. It is a criminal offence to directly, or indirectly, "tip off a suspect", or to do anything that might prejudice an investigation. This may include for example falsifying a document.

3.7 The Court of Appeal has clarified the meaning of "suspicion" in money laundering legislation. The Court stated that suspicion would arise when "there was a possibility which was more than fanciful, that the relevant facts existed".

4. Requirements of Staff and the Council

- 4.1 Individuals can be found to be criminally liable for failing to report moneylaundering activity where it is known or suspected. This could result in serious criminal charges and/or sanctions being imposed on the Council and/or its employees. It is therefore important that policies and procedures exist to establish internal reporting arrangements and ensure compliance with the guidance and the law.
- 4.2 The Council's Code of Conduct is designed to protect individuals when making a disclosure from any fear of victimisation or harassment.
- 4.3 The Council has appointed a nominated officer the Money Laundering Reporting Officer (MLRO). The purpose of this role is to act as a point of contact to receive and investigate reports about suspected and known instances of money laundering activity involving the Council's services. The officer nominated to receive disclosures about money laundering activity within the Council is the **Pension & Investment Manager**. In the absence of the MLRO, please contact the **Financial Services Manager**.
- 4.4 Reports can be made from staff, members of the Council, contractors, the public, the Police, or any other related party or partner. Once a report is received, it is then for the MLRO to investigate where necessary and decide whether there are reasonable grounds for suspicion. Should the MLRO feel it is warranted, a report will be made to the National Crime Agency (NCA) by way of a Suspicious Activity Report (SAR) form, which can be submitted using the secure SAR online system on the NCA website.
- 4.5 Submitting a SAR to NCA is a statutory requirement if there are grounds to do so. If there is no actual knowledge that money laundering is taking place however, or there are no reasonable grounds for suspicion, then the nominated officer (MLRO) does not commit an offence by not making a report to NCA.
- 4.6 Whilst the risk to the Council of contravening the legislation is low, it is very important that all members of staff are familiar with their legal responsibilities. For those staff affiliated to a professional body (e.g. accountants and lawyers) there is also the risk of disciplinary action being taken by the respective body's Disciplinary Committee.

5. Reporting your Suspicions to the MLRO

5.1 It is not possible to provide an exhaustive list of the ways to spot money laundering or state every scenario in which you should be suspicious. It will very much depend on the circumstances.

- 5.2 However, in providing guidance NCA has produced a list of possible 'indicators of suspicion' for money laundering activity:
 - Is the person's behaviour unusual in the circumstances?
 - Has the person refused to supply any form of identification and if so, why?
 - Is the activity unusual in itself?
 - Is the activity unusual for the customer?
 - Do I have other knowledge which leads me to believe the customer or activity is criminal?
 - Do I think the property may be criminal?
- 5.3 In developing this guide the list below provides examples relevant to the Scottish Borders Council activity, in which money laundering could be taking place:
 - Payment of a substantial sum in cash (over £5,000) by a single client in a single transaction or over a short period of time. As a general rule, staff in the Council who collect cash payments are asked to provide the details of any cash transaction over £5,000 to the MLRO so that precautionary checks can be performed.
 - Overpayments or duplicate payments made by a client followed by a refund, or a request for a refund.
 - Purchase of land and buildings re-sold within 3-12 months.
 - Purchase of council assets re-sold within 3 months.

6. The Money Laundering Reporting Procedure

- 6.1 All cases where there are genuine reasons for suspicion will be investigated, and no time should be wasted once you suspect the Council's services may be being used to launder money.
- 6.2 In the first instance (and where possible) you should call the MLRO where you will be free to discuss your concerns in confidence. Where it is deemed necessary, and is requested by the MLRO, this discussion should be followed by your submission of a Money Laundering Reporting Form (MLRF). Where practical this must be submitted the same day as the initial telephone call.
- 6.4 The MLRO will communicate with your line manager/Chief Officer/ Service Director if and when necessary. Having raised concerns, you must not take any further action without the expressed permission of the MLRO, as this may hamper the investigation process. You should also be aware of the need for confidentiality in relation to the suspected and/or known instances of money laundering. You should not do anything that may "tip off" individuals suspected of being involved.
- 6.5 The MLRO has a duty to consider your submission promptly and undertake any investigation as necessary prior to deciding whether to contact NCA or another relevant Law Enforcement Agency (LEA). If a disclosure is made in the form of a request for consent (prior to a prohibited act occurring) the MLRO may need to ask NCA or LEA for consent. The MLRO cannot then

grant consent until receiving this back from NCA unless the 7 working day Notice Period for receiving a reply to a request for consent has expired.

6.6 The MLRO must maintain records of reports received and disclosures made, so that they may be used as evidence in any subsequent investigation by appropriate agencies. The records must be capable of providing an audit trail that identifies the client and the relevant transaction. All such information will be held in a confidential file for a minimum of 5 years. The MLRO will also maintain a confidential log of activities, including details of the checks made on cash transactions over £5,000 – as notified to the MLRO by cashiers and other teams receiving large cash payments.

7. Ensuring the Policy is Followed

- 7.1 The Corporate Fraud Steering Group provides guidance and directs counter fraud activity across the Council. Activity of this group includes raising fraud awareness in an effort to prevent rather than detect fraudulent activity, including money laundering.
- 7.2 Service Directors are responsible for ensuring that their services remain free from fraudulent activity, including the regular completion of fraud risk assessments.
- 7.3 All Service Directors must ensure that these procedures are brought to the attention of all staff.
- 7.4 Awareness training will be provided for those staff in high risk roles, where they are more likely to experience possible signs of money laundering. This will be coordinated by the MLRO and will mainly be done through the use of E Learning modules.
- 7.5 Staff who fail to follow the rules and procedures laid out will be in breach of the Council's rules and could as such be subject to disciplinary procedures, as well as potentially being criminally liable and face prosecution.
 - Appendix 1: Responsibilities Regarding Making a Disclosure
 - Appendix 2: Money Laundering Reporting Form (MLRF)

8. Reviewing the Anti-Money Laundering Strategy

- 8.1 Internal Audit undertake to look at all control frameworks in all planned audits including money laundering by substantive testing of transactions.
- 8.2 The Finance and Regulatory Services department will undertake to review this policy on a yearly basis. Next Review due April 2021.

Responsibilities Regarding Making a Disclosure

Reporting by staff to the Money Laundering Reporting Officer

- 1. Staff members must:
 - (a) Report their suspicions or knowledge of money laundering activity;
 - (b) Retain full documentation about the transaction;
 - (c) Not arouse suspicion that they are concerned;
 - (d) Not tip off any persons involved or suspected to be involved.

Consideration of disclosure by the Money Laundering Reporting Officer

- 2. Upon receipt of a disclosure report, the MLRO must note the date of receipt on his/her section of the report and acknowledge receipt of it. He/she should also advise you of the timescale within which he/she expects to respond to you.
- 3. The MLRO will consider the report and any other available internal information he/she thinks relevant and undertakes any reasonable inquiries he/she thinks appropriate in order to ensure that all available information is taken into account in deciding whether a report to the NCA is required. The MLRO may also need to discuss the report with you.
- 4. Where the MLRO concludes that it is necessary to make a disclosure, he/she must disclose the matter as soon as practicable to the NCA on their standard report form (SAR) and in the prescribed manner. The only exception to this is where it is felt that there is good reason for non disclosure to the NCA. An example of this would be if a lawyer wished to claim legal professional privilege for not disclosing the information. Consideration of disclosures by NCA and Law Enforcement Agencies (LEA).
- 5. Where an internal report is made to the MLRO before a prohibited act (an act of money laundering), and a SAR is made to NCA or another Law Enforcement Agency, the MLRO is not allowed to give consent to the act until they receive consent from NCA that this can go ahead. The exception to this is where the Notice Period for reply has expired. The Notice Period runs for 7 working days beginning the day after the report is received.

2019/20 UNAUDITED CAPITAL OUTTURN

Briefing Note by Executive Director, Finance & Regulatory

EMERGENCY POWERS – COVID-19

20 May 2020

1 DECISION(S) REQUIRED BY CHIEF EXECUTIVE

1.1 I recommend that the Chief Executive notes:-

- (a) the capital outturn position for 2019/20 prior to Statutory Audit;
- (b) the adjustments to funding in Appendix 1;
- (c) the final out-turn position for each block contained within the 2019/20 Capital Plan in Appendix 2;
- (d) the whole project costs detailed in Appendix 4; and
- (e) approves the block allocations for 2020/21 in Appendix 3.

2 BACKGROUND AND PURPOSE

- 2.1 This report provides a statement comparing the final capital outturn for 2019/20 with the final budget for the year and identifies the main reasons for any significant variations.
- 2.2 The final capital outturn statement for 2019/20 is included at Appendix 1 and includes the reasons identified by the Project Managers and Budget Holders for the variances to the final approved budget. This identifies an outturn expenditure of £44.306m which is £7.805m below the final revised budget of £52.11m.
- 2.3 The Council approved the original Capital Financial Plan for 2019/20 on 28 February 2019 and detailed budgetary control reports were presented to the Executive Committee in August and November 2019 and February 2020.
- 2.4 The monitoring reports contained actual expenditure to date, together with the latest budget and projected outturn. The resultant variances were then analysed between in-year variances (i.e. timing issues) and overall project savings or overspends. Comments were provided for material variances. The outturn at 31 March 2020 will adjust the 2020/21 budget with movements carried forward in line with the Financial Regulations.
- 2.5 The table below shows the movements in the resources of the Capital Plan since the last monitoring report to the Executive Committee on 11 February 2020:

| | £000s |
|---|---------|
| Capital Plan 2019/20 as Approved Executive Committee | |
| 11 February 2020 | 50.531 |
| Hawick Flood Protection Scheme grossing up | 2.969 |
| Extra Care Housing adjustment between capital and revenue | (1.390) |
| Revised Capital Plan 2019/20 | 52.110 |

- 2.6 To complete the annual cycle of reporting this report compares the final budget for the year with the final, but as yet unaudited, outturn.
- 2.7 Appendix 1 to this report contains the final outturn statement for the Capital Financial Plan for 2019/20 for each of the services in the Plan with the actual expenditure to 31 March 2020. The latest approved budget includes all approvals made up to and including 31 March 2020.
- 2.8 The final outturn shows a final net variance of £8.361m against the current approved budget as a result of timing movements between financial years and a variance of £0.556m due to expenditure variances. This makes the total net timing movement between 2019/20 and future years £34.131m. As a result of this budget movement between years, the estimated borrowing element of the capital financing for 2019/20 has been reduced. This has a short term revenue benefit for the Council due to the delay of statutory capital repayments through the revenue account and reduced interest payments on external borrowing.
- 2.9 Appendix 2 contains a summary of the final out-turn position for each block contained within the 2019/20 Capital Plan.
- 2.10 Appendix 3 contains a summary of the approved block allocations for 2020/21 adjusted for timing movements from 2019/20.
- 2.11 Appendix 4 contains a list of estimated whole life project costs for those key schemes where the project has not been completed in the financial year 2019/20.
- 2.12 Key highlights from variances in Appendix 1 are:

a) Plant & Vehicle

Budget of ± 0.519 m in 2019/20 has been reduced and allocated back to the Plant & Vehicle fund to reflect actual expenditure in the year.

b) Hawick Flood Protection

Timing movement of £1.112m on Hawick Flood Protection Scheme to reflect delays in the final quarter of 2019/20. The main works contract was awarded to McLaughlin and Harvey and a reprofile of the project budget in light of COVID-19 is being undertaken.

c) Reston Station Contribution

 $\pm 0.6m$ budget has been transferred into 2020/21 to reflect the latest timing of the programme of work.

d) School Estate Block

 ± 1.593 m budget has been transferred into 2020/21 as a result of delays in the final quarter of 2019/20 from both the impact of the Peebles High School fire and COVID-19.

e) Borders Town Centre Regeneration Block

Timing movement of £1.324m to 2020/21 due to delays in the programme which have been supported by an extension in the grant period.

f) **Borders Innovation Park**

Timing movement of £0.677m to 2020/21 due to contract negotiation delays and the impact of COVID-19 restrictions.

2.13 Emergency & Unplanned Scheme

The Emergency & Unplanned budget was fully utilised at the February Executive reporting period.

2.14 A management review of Capital budgets will be undertaken in 2020/21, in light of the 2019/20 outturn position and emerging financial difficulties for the Council associated with COVID 19. The outcome and any impact on budgets and programmes of work will be reflected in the first quarterly monitoring report in 2020/21, based on June 2020 month end position.

3 **IMPLICATIONS**

3.1 **Financial**

There are no costs attached to any of the recommendations contained in this report its content being specifically related to reporting the capital plan outturn as at 31 March 2020.

3.2 **Risk and Mitigations**

There is a small risk that the final outturn may change during the external audit process as part of the annual accounts for 2019/20. The processes for project management and ensuring sound budgetary control is maintained are subject to regular review and discussion with individual project managers and Service Directors. This process ensures that the Council aligns its management of the capital programme as closely as possible with the best practice guidance set out in the Accounts Commission 'Major capital investment in Councils' publication. Each capital project has appropriate risk management and associated risk registers in place, following the Corporate Risk Management Policy and Framework, to ensure that risks are identified and managed to an acceptable level.

3.3 Equalities

It is anticipated there will be no adverse impact due to race, disability, gender, age, sexual orientation or religion/belief arising from the proposals contained in this report.

4 CONSULTATION

The Convener, the Leader of the Administration and the Leader of the Opposition are being consulted and any questions will be responded to by relevant Officers and any comments received will be considered by the Chief Executive in arriving at her decision.

Scottish Borders Council Capital Financial Plan

| | Plant & Vehicle Fund | |
|---------|---|---|
| | Plant & Vehicle Replacement - P&V Fund | Budget to be grossed down to reflect actual purchases in 2019/20 fully funded by the Plant & Vehicle Fund. |
| | Waste Collection Vehicles - Non P&V Fund | |
| | Other Fleet - Electric Vehicles Other Fleet - Electric Vehicles - Infrastructure Waste Collection Vehicles - Non P&V Fund | Timing movement to 2020/21. Timing Movement of £169k for vehicle ordered but not delivered in 2019/20 |
| | Flood & Coastal Protection | |
| | Flood Studies | Hawick Flood Protection Scheme took precedence over some of the smaller studies which the same design consultant was also employed. |
| Ď | General Flood Protection Block | Adverse weather and flood events ceased works on the ground at Romanno Bridge, Denholm and Duns, these have still to be completed. |
| Page 48 | Hawick Flood Protection Selkirk Flood Protection | The income from an external party has not been concluded therefore resulting in an over spend within project. |
| | | |

| | Land and Property Infrastructure | |
|---|--|---|
| | Asset Detterry listing | |
| | Asset Rationalisation | £90k Timing movement to 2020/21 required due to contracts being put on hold for social distancing measures - HQ Reception and |
| | De l'Alte e l'he ser de s | Hub, 2 Bowden Road demolition & Redundant School Building demolitions. |
| | Building Upgrades | £112k Timing movement to 2020/21 required due to resourcing issue. Reallocation of block required as detailed in Appendix 2. |
| | Cleaning Equipment Replacement Block | £42k Timing movement from 2020/21 required due to purchase of additional Scrubber Dryers. |
| | Contaminated Land Block | £34k Timing movement to 2020/21 required. Development of a remedial strategy to the agreement of all parties involved at one of |
| | | the sites still being undertaken. |
| | Energy Efficiency Works | £64k Timing movement to 2020/21 required due to LED lighting projects at Council HQ not being delivered due to contractor |
| | | availability and restricted access to areas. |
| | Health and Safety Works | £21k Timing movement to 2020/21. Reallocation of block required as detailed in Appendix 2. |
| | Play Areas & Outdoor Community Spaces | Timing movement to 2020/21 to enable project completions. |
| | Market Place/High Street Jedburgh | £19k Timing movement from 2020/21 required to cover cost of removal of personal property to comply with Insurance requirements |
| | | for Fire Safety and additional costs associated with removal of gas services to the rear of the property. |
| | Cemetery Land Acquisition | Timing movement to 2020/21. |
| | Road & Transport Infrastructure | |
| | | |
| | A72 Dirtpot Corner - Road Safety Works | Projected underspend within project returned to Emergency and Unplanned. Project now complete. |
| Ū | Cycling Walking & Safer Streets | Small reallocation of block as detailed in appendix 2. |
| ž | Galashiels Developments | Timing movement to 2020/21 for completion of project. |
| | Innerleithen to Walkerburn - Shared Access Route | Project complete return £1k to Emergency & Unplanned |
| Ó | Lighting Asset Management Plan | Timing movement to 2020/21 and reallocation of block as detailed in appendix 2. |
| | Reston Station Contribution | Timing movement to 2020/21. |
| | Roads & Bridges -Inc. RAMP, Winter Damage & Slopes | Timing movement to 2020/21 and reallocation of block as detailed in appendix 2. |
| | Selkirk Town Centre (Streetscape works) | Projected underspend within project returned to Emergency and Unplanned. Project now complete. |
| | Street Lighting Energy Efficiency Project | Timing movement to 2020/21 due delays in procurement process. |
| | Union Chain Bridge | Timing movement sought to 2020/21. |
| | Marka Managamant | |
| | Waste Management | |
| | CRC - Bulky Waste Adjustments | Project complete, underspend been taken to Emergency and Unplanned. |
| | Easter Langlee Cell Provision | Small timing movement to 2020/21 to enable project completion. |
| | Easter Langlee Leachate Management Facility | Small timing movement to 2020/21 to enable project completion. |
| | New Easter Langlee Waste Transfer Station | Small timing movement to 2020/21 to enable project completion. |

2019/20 UNAUDITED REVENUE OUTTURN

Briefing Note by Executive Director, Finance & Regulatory

EMERGENCY POWERS – COVID-19

20 May 2020

1 DECISION(S) REQUIRED BY CHIEF EXECUTIVE

- **1.1 I recommend that the outturn position for 2019/20, prior to Statutory Audit, is noted and that the Chief Executive approves:**
 - (a) the adjustments to previously approved earmarked balances noted in Appendix 1; and
 - (b) the net underspend of £1.538m delivered by the Council being added to the Unallocated General Fund Balance. This balance will be available to support the Council through the COVID-19 pandemic during 2020/21 and can be drawn down when required.

2 BACKGROUND AND PURPOSE

2.1 2019/20 Outturn

This report provides a statement comparing final revenue outturn expenditure and income for 2019/20 with the final approved budget for the year along with explanations for significant variances.

- 2.2 During 2019/20 detailed Revenue Monitoring Reports were reviewed by Corporate Management Team regularly allowing appropriate corporate management action to be taken during the year where required. In line with Financial Regulations quarterly monitoring reports were submitted to the Executive Committee for approval. Where appropriate, approval was sought from the Executive Committee to vary the budgets through budget virement throughout the year.
- 2.3 An unaudited net outturn underspend of £1.538m was achieved in the 2019/20 revenue budget. The £1.538m net underspend (0.58% of final approved budget) was delivered following a number of earmarked balances carried forward with the approval of the Executive Committee during 2019/20. In total, these amount to £8.412m and relate to a number of initiatives across departments and specifically include £1.16m of carry forward for Devolved School Management (DSM including PEF).
- 2.4 The net outturn position has been achieved through a number of service underspends, supported by the discretionary spend restrictions in the final quarter of the year, along with savings from a planned review of loans charges. These underspends were partially offset by further service pressures in Health & Social Care and a funding pressure in Council Tax.

- 2.5 A high level summary of the outturn position in each Council Service is detailed in section 4 of this report. The favourable outturn position reported is subject to the statutory audit process.
- 2.6 It was agreed by CMT at the start of 2019/20 to reduce discretionary spend wherever possible across the Council, this direction was followed up in the final quarter with further restrictions on discretionary spend which meant orders only being authorised for expenditure for which there was a statutory requirement or legal commitment in order to assist the Council's overall financial position. The favourable position at year-end has been greatly assisted by this planned management action.

2.7 Integration Joint Board

2019/20 represents the fourth operational year of the Health & Social Care partnership which has resulted in a fundamentally different way of working with NHS Borders through the Integration Joint Board (IJB). Within integrated Health & Social Care services during 2019/20 additional in-year budget allocations were required to the value of £3.9m to alleviate service pressures of £2.6m as well as £1.3m of unachievable Financial Plan savings. Over the last 3 financial years the Council has invested over £10m of additional in-year budget to the H&SC service along with £11m permanent budget growth allocated in 2018/19, 2019/20 and 2020/21. This area of service continues to present significant risks to the Council and will require further robust management action in 2020/21 to both contain demand pressures within existing budgets and deliver required financial plan savings. This is particularly crucial in light of the extremely challenging operating environment presented by the COVID-19 pandemic. The continued over commitment of resources to support H&SC is impacting upon service budgets in other areas of the Council and indicates the need for a fundamental review of the approach to budgetary control, authorisation of expenditure and the effectiveness of management action within the department to control spend within budget. As noted in the context of the 2018/19 outturn, this position is unsustainable.

2.8 Peebles Fire

In delivering the reported outturn position for 2019/20 the Council has overcome financial challenges from a variety of sources. A significant fire at Peebles High School in December 2019 resulted in an ongoing insurance claim process requiring considerable staffing resource to support the emergency response. There are 3 aspects to the Insurance claim, demolition and site clearance of the fire damaged buildings, costs related to the recovery effort eg provision of temporary classroom units which are on site at Peebles and the costs of permanent rebuilding. The first 2 category claims are capped at $\pounds 1m$, if the additional costs exceed $\pounds 1m$ the Council is liable for any additional costs. The Council's is also liable for the insurance excess of $\pounds 100k$ which will be deducted from the final claim.

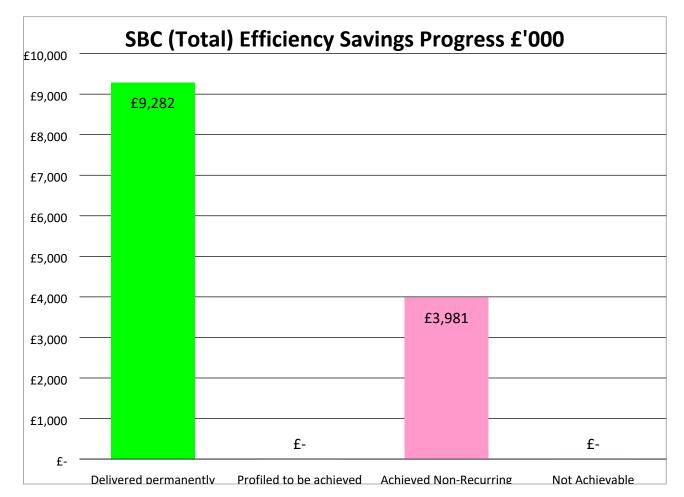

2.9 Storm damage

Adverse weather through Storms Ciara and Dennis in February 2020 resulted in financial pressures of \pounds 200k along with Leachate pressures in Waste Services of \pounds 240k, both of which have been absorbed within the outturn position ensuring that the Council's adverse weather allocated reserve of \pounds 1m can be retained. As these costs are lower than the Bellwin threshold of 0.2% of net Council budget Officers have confirmed with Scottish Government that no Bellwin claim has been pursued.

2.10 Fit for 2024

The Council's Fit for 2024 programme has delivered savings of £0.850m during 2019/20 as per the requirements of the financial plan. Significant planning and review has also taken place to ensure that Fit for 2024 savings which require to be delivered in 2020/21 are as planned as possible. The aim of the programme remains to deliver a Council that is adaptable, efficient and effective, and one ultimately capable of not only meeting the challenges ahead, but of fully optimising outcomes for the citizens and communities for which it is responsible. This programme is designed to deliver savings in a more cross cutting, permanent and sustainable way in the future through a planned series of service reviews. The current COVID-19 pandemic will have a fundamental impact on the way the Council is organised and delivers services going forward with the Fit for 2024 programme instrumental in ensuring the Council builds on all transformational benefits the pandemic presents including digital advancements.

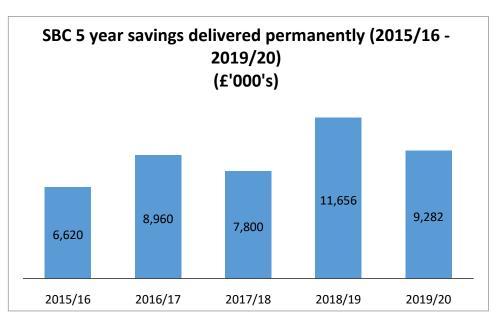

2.11 A summary of the planned delivery of savings agreed within the 2019/20 Financial Plan is outlined in Appendix 2 to this report and is summarised for the Council as a whole below:

2.12 As required by the Financial Plan, savings of £13.263m were successfully delivered during 2019/20. Of these, £9.282m (70%) were delivered permanently. The remaining £3.981m (30%) of savings were achieved on a temporary basis. As part of the 2021/21 financial planning process £1.061m was allocated to H&SC to permanently address previous year savings. The balance of savings being carried forward to be delivered in 2020/21 is therefore £2.92m (22% of the 2019/20 total). Particular emphasis is being placed by CMT on the permanent delivery of these savings during the early

part of 2020/21 or where this is not possible, as a result of the current COVID-19 pandemic, on the identification of alternative options.

2.13 The chart above highlights the continuing scale of savings being delivered within the Council on an ongoing basis with a further £13.263m being delivered in 2019/20, £9.3m permanently. £11.7m of savings were delivered on a permanent basis in 2018/19, £7.8m in 2017/18, £8.96m in 2016/17 and £6.62m in 2015/16. This demonstrates the scale of change undertaken within the Council over the last 5 years with permanent savings delivered over the past 5 years shown in the graph below.

2.14 A high level summary of the outturn position in each Council department is shown below. The detailed outturn statement for the 2019/20 revenue budget is shown in Appendix 1.

2.15 Culture & Sport Favourable £0.001m

The Culture & Sport service have delivered an outturn position with a minor underspend of ± 0.001 m.

2.16 Asset & Infrastructure Favourable £0.490m

Underspends within Roads & Infrastructure (\pounds 746k) due to improved gross profit and improved labour costs in SBcContracts, underspends within Network & Infrastructure, partly through the closure of construction sites related to Covid-19 and Parks & Environment (\pounds 123k) from additional income, reduced transport costs and discretionary spend savings. Offset by pressures within Facilities (\pounds 273k) primarily from a reduction in income within the Catering Service, Waste Management Services (\pounds 56k) from income pressure and costs related to floods in February.

2.17 Economic Development & Corporate Services Favourable £0.140m

A net positive position has been delivered within the Service from managed underspends as a result of the discretionary spend freeze, additional rental income through increased occupancy and staff turnover savings.

2.18 Health & Social Care (H&SC) Adverse £0.825m

Higher than anticipated costs in relation to care provision for Older People as well other locality based care services have been incurred and have resulted in in-year cost saving measures, agreed earlier in the financial year, not being realised. These year-end pressures of £0.825m combined with the transfer of £3.1m budget from other Council services during the year total £3.9m of additional costs over and above the base budget. As noted in the context of the 2018/19 outturn, this position is unsustainable and requires urgent management action.

2.19 Children & Young People Favourable £0.676m

Discretionary spend reductions from across the Directorate as well as the impact of closures as a result of COVID-19 during March have resulted in a net year end underspend. The total DSM carry forward across all Primary and Secondary schools (including Pupil Equity Fund) is £1.16m.

2.20 Customer & Communities Favourable £0.300m

The underspend position has been primarily delivered through discretionary spend savings, grants, project implementation delays and reduced expenditure due to Covid-19.

2.21 Finance, IT & Procurement Favourable £0.522m

Reduced borrowing and favourable interest rates has seen an underspend in Loan Charges (£998k), however a pressure in Information Technology due to the acceleration of specific elements of the IT Model has reduced the overall position.

2.22 Human Resources

Favourable £0.203m

A net positive position has been delivered within the service. The favourable outturn position reflects the impact of the discretionary spend freeze.

2.23 Regulatory Services Favourable £0.354m

A net positive position has been delivered within the Service from additional income and the impact of both recruitment and discretionary spend freezes.

2.24 Funding (including Council Tax) Adverse (£0.328m)

An income pressure within Council Tax of £0.326m due to less income being received than budgeted for accounts for the majority of the year end funding variance. This pressure represents 0.5% of the Council Tax final approved budget of £63.29m.

2.25 COVID-19 review

A management review of all revenue budgets in light of the 2019/20 outturn position and the emerging difficulties in the 2020/21 budget as a result of the COVID-19 pandemic is being carried out and will be reported to CMT and Elected Members as part of the first quarterly financial monitoring reports.

2.26 The net underspend delivered by the Council will be added to the Unallocated General Fund Balance. This balance is available to support the Council through the COVID-19 pandemic during 2020/21 and will be drawn down when required. Any draw down beyond this additional balance will require to be repaid to reserves.

3 IMPLICATIONS

3.1 Financial

There are no costs attached to any of the recommendations contained in this report its content being specifically related to reporting the revenue account outturn as at 31 March 2020.

3.2 **Risk and Mitigations**

The final outturn position reported is subject to the external audit. Additionally, the temporary achievement of £2.92m of planned efficiency savings will require to be addressed on a permanent and recurrent basis in 2020/21.

3.3 Equalities

It is anticipated there will be no adverse impact due to race, disability, gender, age, sexual orientation or religion/belief arising from the proposals contained in this report.

4 CONSULTATION

The Convener, the Leader of the Administration and the Leader of the Opposition are being consulted and any questions will be responded to by relevant Officers and any comments received will be considered by the Chief Executive in arriving at her decision.

The Service had £3.816m of Financial Plan savings to deliver in 2019/20, £2.074 of these have been delivered permanently with £1.742m rolling forward into 2020/21. Plans for delivery of many of these are already in place, it is however expected there will be challenges in terms of delivery of savings in 2020/21 due to the impact of Covid-19.

Regulatory Services have delivered a net positive position of £354k. This position has been achieved through additional income within Passenger Transport, Legal Services, Housing Strategy and Protective Services. In addition the impact of both recruitment and discretionary spend freezes has had a positive impact across the service.

The Service had £653k of Financial Plan savings to deliver in 2019/20, £523k of these have been delivered permanently, with only those relating to planning fee income rolling into 2020/21. The delivery of this additional income permanently in 2020/21 will be impacted by the Covid-19 pandemic.

BALANCES AT 31 MARCH 2020

Briefing Note by Executive Director, Finance & Regulatory

EMERGENCY POWERS – COVID-19

20 May 2020

1 DECISION(S) REQUIRED BY CHIEF EXECUTIVE

1.1 I recommend that the revenue balances as at 31 March 2020 are noted as per Appendices 1 & 2, including movement in the Allocated Reserve since the last reporting period, and the balance in the Capital Fund as per Appendix 3.

2 BACKGROUND AND PURPOSE

- 2.1 This report provides an analysis of the Council's balances as at 31 March 2020.
- 2.2 The Council's General Fund useable reserve (non-earmarked) balance is £7.773m at the end of the financial year. The balance has increased from the recommended level in the Financial Strategy of £6.315m due to an allocation from the 2019/20 revenue underspend. The 2019/20 balances are before a series of technical accounting adjustments, the effect of which are expected to be broadly neutral. Adjustments required as a result of the Statutory Audit process will be reported at the conclusion of the Audit.
- 2.3 The total of all useable balances, excluding developer contributions, at 31 March 2020 is £29.824m compared to £27.799m at 31 March 2019.
- 2.4 Income and expenditure relating to the Council's services are accounted for and financed through the following funds (as required or permitted by statute):
 - a) General Fund
 - b) Corporate Property Repairs & Renewals Fund
 - c) Insurance Fund
 - d) Plant & Vehicles renewals Fund
 - e) Capital Fund
- 2.5 The unaudited balances on these Funds represent the Council's useable reserves which at the 31 March 2020, is as follows:

| | 2019/20 | 2020/21 |
|---|---------|---------|
| BALANCES | £m | £m |
| Earmarked Balances (non DSM) | 6.207 | 7.252 |
| Earmarked Balances (DSM – including Pupil | 1.158 | 1.160 |
| Equity Fund) | | |
| Allocated Balances | 2.572 | 2.994 |
| Revenue (Unallocated Reserve) | 6.315 | 7.773 |
| Corporate Property Repairs & Renewals Fund | 0.287 | 0 |
| Insurance Fund | 1.197 | 1.396 |
| Plant & Vehicles Renewals Fund | 6.843 | 7.608 |
| Capital Fund (exc. Developer Contributions) | 1.876 | 1.641 |
| | 27.799 | 29.824 |

- 2.6 The balances shown above are before a series of technical adjustments which are required to reflect international accounting requirements. These adjustments are expected to be broadly neutral in terms of the final balances and will be confirmed following finalisation of the Council's statutory accounts.
- 2.7 Appendix 1 summarises the projected transactions and resultant balances at 31 March 2020 on the General Fund and Appendix 2 shows the projected non-General Fund balances. The net effect is the useable General Fund balance after earmarked funds, allocated reserves and the unaudited 2019/20 revenue outturn is £7.773m at 31 March 2020.
- 2.8 At the 2019/20 year end General Fund reserves have been adjusted as reflected in the table below to reflect the net 2019/20 year end underspend.

| | Increase / (Draw down) |
|--|------------------------------|
| | £ |
| Opening 2019/20 balance | 6.315m |
| Net 2019/20 revenue underspend | 1.458m |
| Balance at 31 st March 2020 | 7.773m |

- 2.9 The Corporate Financial Risk Register relating to 2019/20 was considered at the Council Meeting on 28 February 2019 and identified potential risks which included failure to control budgets within approved limits, severe weather events, the economic downturn, potential contractual claims and unplanned emergencies. The accumulated financial risk in the Risk Register was assessed to be at £11.643m and the projected useable General Fund balance, at £7.773m, is now sufficient to cover 67% of risks identified at that time. The Financial Risk Register is currently being reviewed for 2020/21 in light of the COVID-19 emergency response with an updated version being presented to Council on the 25th June 2020.
- 2.10 It was reported in the February 2020 monitoring report to the Executive Committee that during 2019/20 allocated balances were increased by £0.548m and £0.030m reserves were released to support the 2019/20 revenue budget. The changes to the Allocated Balances since this last reporting position are shown in the table below and comprise:

- a) a draw down of £0.087m from the Workforce Transformation reserve into the revenue budget for severance agreed in 2019/20;
- b) a draw down of £0.009m from the Municipal Mutual reserve to provide for a 2019/20 invoice payable.

| ALLOCATED BALANCES | 31 st March 2019 £m | Increase during 2019/20 £m | Released during 2019/20 £m | 31 st March 2020 £m |
|---|---|-------------------------------------|-------------------------------------|---|
| IT transformation | 1.030 | 0.108 | (0.030) | 1.108 |
| Municipal Mutual | 0.242 | 0 | (0.009) | 0.233 |
| Adverse Weather (including flood) | 1.000 | 0 | 0 | 1.000 |
| Approved contribution to Energy Efficiency & Change Fund | 0.300 | 0 | 0 | 0.300 |
| Workforce Management | 0 | 0.440 | (0.087) | 0.353 |
| Total | 2.572 | 0.548 | (0.126) | 2.994 |

2.11 Allocated Balances as at the 31 March 2020 are £2.994m as follows:

2.12 Appendix 3 details the balances currently held in the Capital Fund. These balances are temporarily held in the Loans Fund and will attract interest at the end of the financial year. The Fund can only be used for capital purposes or to repay external debt.

3 IMPLICATIONS

3.1 Financial

There are no financial implications beyond those contained in the report and appendices.

3.2 **Risk and Mitigations**

The major risks associated with this report are that the level of projected balances proves to be insufficient. Service budget pressures plus unexpected liabilities are the most likely sources of pressure on reserves. These risks are being managed through regular monitoring of financial activity in all funds of the Council, including regular revenue and capital budgetary control reports to the Executive Committee. In addition the Corporate Financial Risk Register is regularly reviewed by senior Finance staff.

3.3 Equalities

There are no adverse equality issues arising from the report.

4 CONSULTATION

The Convener, the Leader of the Administration and the Leader of the Opposition are being consulted and any questions will be responded to by relevant Officers and any comments received will be considered by the Chief Executive in arriving at her decision. Page 105

DEVELOPMENT PROJECT TO SUPPORT CHILDREN AND YOUNG PEOPLE WITH COMPLEX NEEDS IN THE SCOTTISH BORDERS

Briefing Note by Interim Service Director Children & Young People

EMERGENCY POWERS – COVID-19

28 May 2020

1 DECISION(S) REQUIRED BY CHIEF EXECUTIVE

- **1.1** I recommend that approval is given to:
 - (a) progress a new Development Project in partnership with Aberlour Childcare Trust and Scottish Borders Housing Association to create the Borders' first Residential and Housing Support Facility to support children and young people with complex needs in the Scottish Borders;
 - (b) agree to sell 631sq m of land at Tweedbank at a value of £75,000 to Scottish Borders Housing Association in order to provide a site for the development of a new complex needs residential facility;
 - (c) Commit to purchase complex needs placements for Borders children and young people with a year 1 one estimated cost of £125,000 per place.
 - (d) Note the project requires the Council to purchase a minimum of 4 places per annum for a period of 20 years to provide financial certainty to the scheme as set out in this report.

2 BACKGROUND

- 2.1 Aberlour Child Care Trust is a charity and has a long history of working with Scottish Borders Council providing complex needs respite care for children and young people.
- 2.2 There is a long established strategic objective of providing additional support services within the Borders and wherever possible preventing children being looked after and accommodated out with the Region. This paper developed jointly with Aberlour Childcare Trust and SBHA seeks to assist with meeting this objective, by doing things differently and preventing Borders' children being placed out with the Authority area; and if possible bringing those already in out-of-authority care back closer to their families and communities.

- 2.3 Aberlour is therefore proposing to develop an innovative residential facility that will offer a continuum of care for children and young people (aged 0-18) with complex care needs. This will ensure these individuals are able to stay in the Borders and that the Council will avoid costly external care placements while at the same time providing an option for increased respite which is currently limited by lack of suitable accommodation.
- 2.4 Aberlour will work in partnership with Scottish Borders Housing Association (SBHA). Aberlour is best placed to deliver the ongoing complex needs support service; SBHA has the skills and expertise to build and maintain the facility.
- 2.5 The two partners are working with the Council to site the new service and have identified the requirement for a central Borders location which will maximise access to children across the region and provide the ability to easily sell additional places to other neighbouring local authorities should these spaces be available after Borders needs have been met. The Council has identified the site adjacent to Tweedbank as providing a suitable location which benefits from the connectivity to the Borders Railway.
- 2.6 A suitably sized site has been valued by the Council's Estates team at $\pounds75,000$, and it is proposed that this site be sold to SBHA generating a capital receipt.
- 2.7 The project will directly support the Council's **Fit for 2024** strategy by transforming the way complex needs support is provided for local children and families.
- 2.8 **The Future Challenge:** Some Borders children will require long-term residential care, but the Scottish Borders does not currently have a dedicated complex needs residential facility. Families have said that they want this support to be provided locally in future, to avoid children being placed in care outside the authority area, disconnected from their communities and schools. Families want to stay together, and this project has the potential to deliver that aim.
- 2.9 **Taking advantage of new opportunities:** the partners have come together to collaborate and do things differently. The aim is to improve the support available for children and families where children with complex needs can no longer live at home. The partnership will be open to change; is flexible and creative and seeks to attract the resources required to support families to succeed.
- 2.10 **Delivering the best outcomes for Borders communities:** keeping Borders families together and enabling children with complex needs to grow in their community is at the heart of this project. All partners agree that this is the best outcome we can achieve in terms of quality of life, sustainability of services, and value for money.

3 NEED AND DEMAND

3.1 The Council's Integrated Children's Plan (2017-20) calls for '*new partnerships*' to support children with complex needs; and that '*new approaches are needed*' to support all young people moving into adulthood.

The Children's Complex needs Residential Project will directly meet this need.

- 3.2 The Council currently uses a number of out of authority complex needs residential care placement providers, for example:
 - One provider requires a 187-mile round trip for families/Social Work from central Borders.
 - Another requires a 107-mile round trip for families/Social Work from central Borders.
- 3.3 The current budget for out of authority placements is £5.93m per annum catering for 61 individuals, some of these children are in the type of complex needs placement this paper refers to. The new unit will cater for up to 8 children and young people who have complex needs who may otherwise suffer emotional and psychological distress due to a loss of connection with their families and communities as they cope with changes of residence, school, carers and peers. Both often have a negative impact on health and wellbeing, and often results in adverse impact on the pace of social and educational development and attainment.

4 THE PROJECT

- 4.1 Aberlour will deliver residential support for children and young people with complex physical, learning and emotional needs that combines round the clock care with a broad range of personalised complex needs support provision. An integrated service designed to meet the developmental needs of children and families through to seamless transition into adult life and supported employment or continued learning. It is envisaged that the new home will support those with a variety of needs including: challenging behavior; epilepsy; cerebral palsy; autistic spectrum disorder; complex physical difficulties; emotional and mental health difficulties.
- 4.2 The facility will provide care and support in a homely, welcoming environment, catering for both males and females. Children and young people will be supported with personal and intimate care, routines, communication, health needs and life skills. It will provide a creative therapeutic approach through a wide range of activities both in the facility and linking with local community activities to build resilience and encourage independence.
- 4.3 The facility will also cater for young people with complex needs who are transitioning through care towards independence/adult services. As well as their care provision, we will support these young people to access suitable training and employment opportunities; and help them connect with local community activities.
- 4.4 The residential facility will deliver a range of improved outcomes for the Borders:
 - Children and young people: will have long-term residential and housing support in the Scottish Borders, keeping them close to their families, friends, and communities. Their education and community activities will not be disrupted, contributing to better wellbeing outcomes for children, young people and their families.
 - Families: they will be closer to their children and young people and will have reduced travel time and costs.

- 4.5 The facility will be 8-bedded with a footprint of 500sqm (the indicative land requirement is 631 sqm) that will provide quality living spaces combined with flexibility in service delivery. Initially the home will have 4 children's residential living spaces (0-16 years) and 4 singleton flats for young people (16+) with complex needs, linked by a communal space (see **Appendix 1** indicative building design/layout). The innovative design of the building will allow the configuration to change over time to meet Borders' needs, for example: 6 residential and 2 singleton flats, or 6 residential and 2 respite places.
- 4.6 The physical environment will be designed to be therapeutic, minimising triggers such as noise, light, heat, and over-stimulation, factors which can increase stress levels which manifest themselves in challenging behaviours. The accommodation will ensure that each child and young person has their own bedroom, with en-suite bathrooms.
- 4.7 The partners have identified the Council's site adjacent to Tweedbank as the prime location for the facility. This site is close to the Council's Leader Valley School for children with profound and complex needs based in Earlston, which it is envisaged will be used by the resident children and young people of primary school age. Secondary school age children and young people would attend local schools with enhanced Additional Support provision.

5 TIMESCALES AND RETURN FOR THE COUNCIL

5.1 The dates in the table below - given the current Covid19 pandemic - are an estimate and will be subject to revision in line with National Government guidelines. These dates are also reliant on the Masterplan timescales at the site near Tweedbank.

| Key Milestones | Timescale |
|---|----------------|
| SBC Approval | May 2020 |
| Inclusion within Strategic Housing Investment Plan (SHIP) | June 2020 |
| Procure/Agree Design Team | July 2020 |
| Agree design and Outline Cost Plan | September 2020 |
| Planning Submission | October 2020 |
| Building Warrant Application | April 2021 |
| Planning & Building Warrant Approval | October 2021 |
| Appoint Contractor | March 2022 |

- 5.2 By participating in the project the Council will benefit in the following ways:
 - Up to 8 Borders children and young people with complex needs will be able to continue living in the Borders, close to their families, friends, communities and schools at a projected cost of £1m per annum (assuming all 8 beds were taken up by Scottish Borders Council)
 - The project will deliver a new state of the art complex needs residential care home in the Borders
 - The Council are able to have the future needs of children with complex needs met through the flexible design of the new care facility
 - The ability to replicate the service which will be of national significance (due to its innovation and partnership development approach) to meet local needs, through a dynamic cross-sectoral development partnership

5.3 The Council will further benefit by purchasing places at a lower unit cost than the current range of logal authority placements, the average cost of *Emergency Powers – COVID-19 – 28 May 2020*

which is £96,721 per annum. Individual costs can range from £4,000 for educational support without accommodation, up to £270,000 per residential place. At present, the Council funds 22 places costing over £100,000 per annum in out of authority care and education establishments. There will be further indirect saving from reductions in travel costs for families and reductions in Social Work staff travel time administrating care placements that can be over 100 miles away.

5.4 Purchasing singleton 'transition' flats offers the Council potential savings on costly continuing care placements. Similar to the residential placements, families and Social Workers will greatly reduce costs associated with long travel and complicated administration. The transition flats will also free up residential spaces for new placements providing a continuum of care.

7 IMPLICATIONS

7.1 Financial

(a) Capital Costs

SBHA will design, build and finance the complex needs development project and provide the ongoing maintenance. Capital costs of circa ± 1.1 m including the cost of land valued at $\pm 75,000$ which will be purchased from the Council.

- (b) The arrangement will require a lease arrangement between SBHA and Aberlour. The singleton 'transitional' homes can attract Housing Association Grant (HAG), with a Short Scottish Secure Tenancy (SSST) to be offered to Tenants at a social housing rent and the project will require to be included in the Scottish Housing Investment Plan (SHIP). There would be potential for a nomination agreement to form a schedule as part of the lease for SBC to refer to the transitional homes.
- (c) Discussions with the Council's Housing Strategy Team and the Scottish Government More Homes Division are ongoing to confirm the value of grant this could attract. In the meantime, the costs and savings in this paper assume a nominal value of £80,000 HAG.
- (d) Revenue Costs

Aberlour will deliver the complex needs living support service from the new facility. The Council will be asked to approve purchase of 4 of the 8 beds, with first refusal on the other 4. This will be a long-term purchase guarantee (20 years has been suggested) to provide revenue security for the development. If the Council does not utilise all the beds, then the additional placements will be sold nationally to other local authorities. Demand for quality complex needs care placements is high across Scotland.

(e) There is a financial risk for Aberlour if all the beds are not utilised to a high occupancy rate. However, taking account of the need and demand in the Borders, future predictions that need will continue to grow in the medium to long-term, and Aberlour's experience of managing a number of similar residential and housing support facilities in Fife and the Highlands, the partnership does not anticipate revenue sustainability issues.

- (f) There is a financial risk for SBHA. The model is based on a capital appraisal requiring annual cash-flows over a 30-year period payback period. This is based on assumptions for annual rental increases based on CPI plus 1%. A long-term partnership agreement will mitigate SBHA's risk of the project ending before capital investment is repaid. Flexible design for change of future use will also mitigate this risk and complement the master plan of the area near Tweedbank.
- (g) Aberlour has undertaken an exercise reviewing the anticipated placement costs for the new residential home as compared to the costs the Council currently pay for external residential placements. The indicative revenue saving that the new home could deliver for the Council per week, per child/ young person is approximately £250*.

This could result in the following revenue savings for the Council:

Cumulative indicative Council savings:

1 year @ 4 placements = £55,000 5 years @ 4 placements = £275,000 10 years @ 4 placements = £550,000

If the Council was to use all 8 residential and transition homes, then the indicative savings could be (**):

- 1 year @ 8 placements = £110,000 5 years @ 8 placements = £550,000 10 years @ 8 placements = £1,100,000
- * Based on average SBC residential costs not including 15% overhead costs (Audit Scotland best practice)
- ** Based on the Council reducing existing residential continuing care placements that accommodate 16+ aged young people due to a lack of transition homes.
- h) The costs of placements will be from the exiting Out of Authority placement budget by recycling existing budget when children in external care placements. As such no additional financial resources to support this project are requested and it is hoped that over time that the facility will deliver savings against the costs of external placements elsewhere. The cost savings noted above are indicative based on average costs and in reality will vary depending on the needs of the individual children placed in the unit.

7.2 **Risk & Mitigations**

The report fully describes all the elements of risk that have been identified in relation to this project. However, given the scale of this project, an appropriate governance structure and risk register will be developed. Appropriate consultation with stakeholders will be built into the process. These elements will involve all partners involved in the project to ensure transparency.

7.3 Equalities

An Equalities Impact Assessment has been carried out on this proposal and it is anticipated that there are no adverse equality implications.

8 CONSULTATION

- 8.1 The Executive Director, Finance & Regulatory services, the Chief Legal and Monitoring Officer, and the Chief Officer Audit and Risk have been consulted and any comments received have been incorporated into the final report.
- 8.2 The Convener, the Leader of the Administration and the Leader of the Opposition are being consulted and any questions will be responded to by relevant Officers. Any comments received during the consultation will be considered by the Chief Executive in arriving at her decision.

CONTINUED PARTNERSHIP APPROACH WITH ABERLOUR SUSTAIN TO WORK WITH CHILDREN AND YOUNG PEOPLE ON THE 'EDGE OF CARE' IN THE SCOTTISH BORDERS

Briefing Note by Interim Service Director Children & Young People

EMERGENCY POWERS – COVID-19

12 June 2020

1 DECISION(S) REQUIRED BY CHIEF EXECUTIVE

- **1.1** I recommend that approval is given to:
 - (a) agree the continuation of the partnership work with Aberlour in the Sustain project
 - (b) accept the funding offer from the Robertson Trust to support the Project, and by doing so, commit to the continuation of the Sustain "Edge of Care" service for a further 3 years.

2 BACKGROUND

- 2.1 Aberlour Child Care Trust is a charity and has a long history of working with Scottish Borders Council in the provision of complex needs respite care for children and young people. More recently (2019/20), there was the development of the Sustain project, which is a community-based service that offers a flexible response to preventing children entering the care system (see appendix 1 for evaluation of the Sustain project).
- 2.2 Scottish Borders Council is committed to reducing the number of children who require to be cared for away from their families; however, we recognise that in some situations this will be inevitable for safety / care reasons. This means that we need to develop and innovate our services to focus our attention on intervening as soon as we can, this project is an example of innovation and partnership working at a local level to reduce the need for children / young people to be placed in care.
- 2.3 Regrettably, it is not always possible for children to remain in the family home, in these circumstances we will always focus on keeping children within their family network where possible and safe to do so. This has led to a significant increase in the number of children / young people who are placed in Kinship Care placements (care with extended family members).
- 2.4 Scottish Borders Council and Aberlour identified the need to do things differently, to prevent Borders' children entering care in the first place, and to create the potential to bring those in out-of-authority placements back to their families and communities with enhanced support where possible and appropriate.

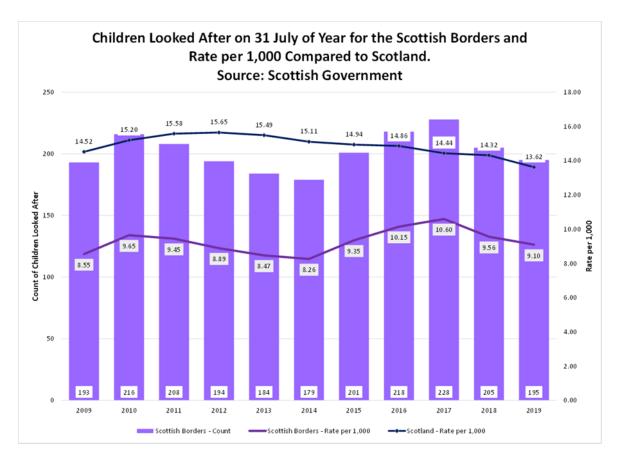

- 2.5 Scottish Borders Council does deliver elements of family support in our communities; however, like many Local Authority services across the country, the significant increase in the level of supervised contact, legally implemented by both Court and Children's Hearings, has significantly reduced the availability of this service.
- 2.6 The Sustain project will directly support the Council's **Fit for 2024** strategy by transforming the way support is provided for local children and families:
 - The Future Challenge: is to avoid children being placed in care (sometimes outside the authority area), disconnected from their communities and schools. We recognise that families want to stay together and this project has demonstrated its contribution by providing flexible support in the community to achieve this.
 - Taking advantage of new opportunities: the Aberlour Sustain workers and Scottish Borders Council Social Work staff, work collaboratively to identify those families most in need of this type of service. The service offers personalised, flexible and responsive support, at times when traditional services do not operate i.e. evenings and weekends. The approach seeks to maximise the potential of family strengths and assets, enabling them access to the required support when and where they need it.
 - Delivering the best outcomes for Borders communities: enabling children and young people to remain with their families is at the heart of this project. Services work collaboratively and flexibly to prevent children being accommodated in the first place. Where possible, the outcome is always to keep children at home when it is safe to do so. We know that the outcomes for children and young people in care are less favourable than those who remain at home.

3 NEED AND DEMAND

3.1 The Council's Children and Families Social Work service continues to deliver a quality service to Borders families. This is in a landscape where the service is funded in the lowest quartile in Scotland per head of population. Despite this, the percentage of the population who are looked after by the Local Authority remains consistently below the national average as illustrated in the following charts:

| | Scottish Borders | | Scotland | |
|------|------------------|----------------|----------|-------------------|
| Year | Count | Rate per 1,000 | Count | Rate per 1,000 |
| 2009 | 193 | 8.55 | 15,287 | 14.52 |
| 2010 | 216 | 9.65 | 15,892 | 15.20 |
| 2011 | 208 | 9.45 | 16,231 | 15.58 |
| 2012 | 194 | 8.89 | 16,248 | 15.65 |
| 2013 | 184 | 8.47 | 16,032 | 15.49 |
| 2014 | 179 | 8.26 | 15,600 | 15.11 |
| 2015 | 201 | 9.35 | 15,404 | 14.94 |
| 2016 | 218 | 10.15 | 15,317 | 14.86 |
| 2017 | 228 | 10.60 | 14,987 | 14.44 |
| 2018 | 205 | 9.56 | 14,736 | 14.32 |
| 2019 | 195 | 9.10 | 14,015 | 13.62 |

Children Looked After on 31 July of Year

- 3.2 The Council's Social Work Assistant workforce (formerly Family Support Service) have historically provided a wider service including flexible support to families in their own homes, reducing the need for children and young people to be accommodated. However, with the significant increase in court / Children's Hearing ordered supervised contact between children / young people and their parents, this service has fundamentally needed to facilitate the legal requirement for the supervised contact, and consequently is no longer able to carry out the early intervention family support that it has in the past.
- 3.3 Notwithstanding the current cessation of face to face supervised contact in Scottish Borders due to Covid-19, the normal weekly level of supervised contact across the Borders is:
 - > 75 supervised contacts per week involving 50 children / young people
 - Actual contact time = 77.5 Hrs
 - > Travel time = 104.5 hrs approx.
 - > TOTAL 182 Hrs per alone
 - Average hours still needing to be covered in Scottish Borders is 47.5 Hrs per week
- 3.4 The Council currently has children and young people in foster care and residential care locally, out of authority foster care and in some circumstances out of authority residential placements. In these cases, a legal decision that the child / young person cannot be cared for in their home environment has been taken. The reasons for this can be varied, however, it is a last resort for these children and young people and is not a decision that is taken lightly.
- 3.5 The current budget for out of authority placements is £5.93m per annum catering for 61 children / young people. The Sustain project allows us to Page 125

respond to the needs of children / young people on the 'edge of care' and as such, plays a vital role in keeping this budget under as much control as possible. Without services like Sustain, there is a real risk that the Council's Children and Families Social Work budget could be overwhelmed quickly.

4 ROBERTSON TRUST AND SUSTAIN BORDERS

- 4.1 The Robertson Trust is also keen to support the strategic partnership between the Council and Aberlour. The Trust want to support the partnership to move towards stronger collaboration and investment in early intervention. To this end, Aberlour has secured an offer of investment from The Robertson Trust in the Borders for the following linked activities:
 - A commitment to support the revenue funding of the Borders Sustain service in 2020/21 (value: £120,000) – this offer is contingent on the understanding that Scottish Borders Council commits to a further three years of funding for Sustain – on the basis of continued delivery of agreed outcomes and savings. This is the Borders new 'edge of care' support service, piloted successfully in 2019/20, that provides intensive support for families to keep their children and young people at home rather than entering a care placement.

5 IMPLICATIONS

5.1 Financial

The proposal is an extension of the Council's commitment to working in partnership with Aberlour. The \pounds 240k annual cost of this service will be funded from the \pounds 120k contribution from the Robertson Trust, an earmarked balance and permanently from within existing budgets.

5.2 Risk & Mitigations

The report fully describes all the elements of risk that have been identified in relation to this project and in particular, it highlights the potential impact of this service not being available i.e. potential increase in the number of children / young people requiring to be cared for out with the family home.

5.3 Equalities

An Equalities Impact Assessment has been carried out on this proposal and it is anticipated that there are no adverse equality implications.

8 CONSULTATION

- 8.1 The Executive Director (Finance & Regulatory), the Monitoring Officer/Chief Legal Officer, and the Chief Officer Audit and Risk have been consulted and any comments received have been incorporated into the final report.
- 8.2 The Convener, the Leader of the Administration and the Leader of the Opposition are being consulted and any questions will be responded to by relevant Officers and any comments received will be considered by the Chief Executive in arriving at her decision.

Evaluation of Sustain Borders

A Report for Aberlour Child Care Trust

December 2019

1. Introduction

This section introduces the study, Aberlour Child Care Trust and the Sustain Borders service, sets out the aims and objectives of the evaluation and describes the research methodology applied.

Aberlour Child Care Trust

Aberlour Child Care Trust (Aberlour) is Scotland's largest children's charity, proving support to more than 7,500 children every year. Aberlour delivers over 40 services, in areas such as family support, children with disabilities, residential care and fostering and early years support.

Aberlour works increasingly with families and children at the 'edge of care', where there is concern about parental capacity to care adequately for children at home, and where there is an immediate risk of children being taken into care.

Sustain Borders

Aberlour has developed a bespoke service for families with children at the edge of care, whose physical, emotional, social or educational needs are at risk of not being met by parents. Currently there are Sustain services operating in Highland (established in 2016) and Perth and Kinross (established in 2018).

Scottish Borders Council (SBC) has funded a pilot Sustain service from October 2018 till March 2020. The service was originally delivered across the two main communities of Hawick and Galashiels, but is now extended across the local authority area. Sustain Borders aims to work with at least 30 children living in edge of care families.

Research objectives

The overarching objective of the evaluation is to evidence the impact of the service to help SBC to make an informed decision about the continuation of the pilot.

The detailed objectives of the evaluation are:

• Assessing whether the service has met its intended outcomes.

- Evidencing the impact of the service on children, young people and families.
- Assessing the impact of the service on Scottish Borders Council and the further service landscape for children and families;
- Assessing the cost savings made by SBC in reduced care placements and reduced need for other services;
- Making recommendations to develop the service in the future.

Research methodology

We have used a mixed methods approach to this evaluation, including:

Desk research

- A review of the project data collected by Aberlour in its Dynamics data management system.
- Sample of anonymised referral documents and pre- and post-engagement forms from parents and young people.

Fieldwork

- In depth interviews with 4 families that have used the service.
- Semi-structured interviews with 6 SBC Social Workers and a survey completed by 4 SBC Social Workers
- Semi-structured interviews with 5 partners and key stakeholders from the health (2), education
 (2) and community (1) sectors
- Face-to-face and telephone interviews with 4 Aberlour management and delivery staff and a focus group with 3 Aberlour delivery staff

2. Sustain Borders Service

This section describes the service in more detail, setting out the background to the service, its aims and objectives, delivery model and approach.

Background to the service

Aberlour developed the Sustain service model to tackle the increasing number of children and young people placed into care due to a lack of suitable and appropriate support for families at the edge of care.

Sustain Borders offers personalised, flexible and responsive support that other services find challenging to provide to families. The approach seeks to maximise the potential of family strengths and assets, getting them access to the required support when and where they need it.

The service is informed by five key principles:

- Consultation and co-production: recognising that children and families need a voice and need to be involved in service design.
- Relationship-based support: understanding and respecting families, and building trust through positive interventions.
- Intensive support: being there when families need support the most such as evenings and weekends.
- Edge of care, not edge of Social Work involvement: supporting those families most in need and those children most at risk of being accommodated.
- Personalised support: not restrained by one approach or evidence-based practice but drawing upon a range of approaches that best meet family need.

Sustain Borders is working in collaboration with SBC offering the service to families involved with SBC Social Work. It follows a multi-agency approach, ensuring that all relevant services are working together to support the whole family.

These families face a wide range of issues such as poor mental health, substance misuse and neglect. They require support that is attachment and trauma-informed, delivered in a personalised and relationship-based way. Aberlour has been delivering services for vulnerable children and families in the Scottish Borders for over 20 years. As of 2018, there were around 230 children and young people being looked after by Scottish Borders Council and up to 40 in costly out of authority placements. Sustain Borders can therefore help SBC to manage budgetary pressures by transferring resources from expensive crisis management to earlier, more preventative interventions.

Before the Sustain Borders pilot programme there was also no established outreach service for families in the Scottish Borders. SBC has funded outreach services for families in the past, one provided in-house and the other delivered by a third sector partner.

Service aims and objectives

The service agreement between Aberlour and SBC states the following objectives for the Sustain Borders:

- 1. To provide intensive personalised and relationship-based whole family support to children and young people (10-18 years) and their parents, carers and siblings to strengthen relationships and prevent family breakdown.
- 2. Children and young people are supported to remain within their own families where possible.
- Children and young people shall be enabled to maintain positive relationships with their Parents/Carers.
- 4. Reducing youth crime and promoting community safety.

Service outcomes

The service aims to achieve a number of outcomes for children and families:

- Reducing the number of children going into care by keeping families together.
- Improving SHANARRI outcomes for children, in particular increased resilience.

- Improved healthy relationships within families and between families and other services.
- Improved school attendance and attainment.
- Reduced barriers to inclusion.

Sustain Borders also targets outcomes for SBC:

- A reduction in care placements leading to cost savings or spending reallocated towards earlier intervention.
- Reduction in the need for Social Work and wider statutory intervention.

Delivery model and approach

The Sustain Borders delivery model is designed to:

- Engage: providing personalised and relationship-based whole family support to parents, carers and their children aged 10 and over.
- Support: offering timely, responsive and safe provision seven days a week, 365 days a year, tailored to family need and circumstances.
- Improve outcomes: demonstrate to SBC successful progress towards intended outcomes for children, families, the Council and communities.

Sustain offers a flexible model built around a staged and planned approach to supporting children and families. The strength of the model lies within the flexible and creative menu of support interventions and evidence-based approaches applied in practice by experienced staff. The five stages are:

- **Referrals:** from SBC gatekeepers, a single point of referral for edge of care families.
- Proactive engagement / action planning: community support practitioners will engage children and families in their own homes, schools and other community venues. An action plan will be produced with children and families, containing agreed actions and outcomes that relate to the Child's Plan.
- Types of interventions: a range of innovative and creative interventions will be used to ensure that families are supported to make the changes that will help them to progress and integrate within their communities.

- Reviews / disengagement: support workers will undertake ongoing assessment of family progress towards outcomes, regularly reviewed using Aberlour's Outcomes Framework.
- Ongoing capacity building: the service will enhance community resources to ensure that they are capable of supporting families beyond Sustain intervention.

Service delivery

Up to November 2019 the Sustain Borders service has received 51 referrals for young people and worked with a further 53 parents/carers and siblings. Of these 16 young people (and 16 parents/carers) are in an early stage of the engagement process so have not been included in the assessment of outcomes to date.

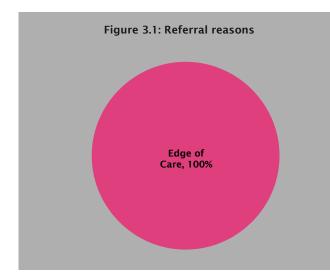

3. Impact on Children and Families

This section of the report reviews and presents evidence of the impact of the Sustain Borders service on children, young people, their parents/carers and siblings.

Reaching families at the edge of care

From the outset it was clear that a key condition for the success of the service is that the right children and young people are referred: children and young people who, without targeted intervention, would be extremely likely to end up in care.

The project data show that all of referrals to the service (100%) are children and young people at the edge of care.

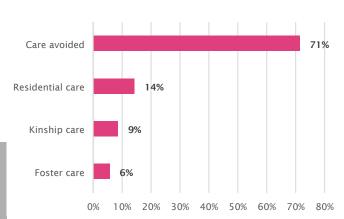

This shows that the referral system and the 'gatekeeper' role of senior SBC officers has worked well. This was confirmed by Social Work staff and stakeholders.

Keeping families together

Sustain Borders has been highly successful in its main ambition of avoiding children and young people being taken into care and keeping families together wherever possible. Figure 3.2 breaks down the outcomes for the children and young people that Sustain Borders has worked with.

Figure 3.2: Final outcome for children and young people

This means that of the 35 children and young people the Sustain Borders service has worked with (and for whom final outcomes could be established) **25 have avoided being taken into care** and are still living at home with their family and are expected to continue doing so.

"I definitely think the adoption would have broken down without them."

"If the objective of Sustain is to stop children going into care then it definitively worked for us."

"[Child] might have even been taken away into care."

Parents

The flexibility and intensity of the Sustain support is a key factor in this success. The service is available 'as and when required', including during evenings and weekends, which allows issues to be dealt with quickly and can help to avoid them developing into a full-blown crisis.

"[Child] would probably have been accommodated if the Sustain worker had not been available over the weekend."

Social Worker

As well as being available at times of crisis Sustain workers can continue providing support when things have settled down and underlying issues can be addressed. Families cited the importance of ongoing support by the same Sustain worker.

Even for the families where the end result was a care placement, the value of the Sustain Borders service was acknowledged by the parents. One parent said that Sustain Borders were able to spend the time explaining processes and helping them to navigate the system.

Sustain also helped this parent to develop coping mechanisms for the challenging behaviour of their child and keeping the relationship going during the care placement.

"I learned to walk away and calm down."

"Without Sustain I might have ended up in jail or [the child] might not even be here"

Parents

Two of the parents and carers highlighted the positive effects Sustain had on their other relationships.

"My wife and I might not be together anymore."

Parent

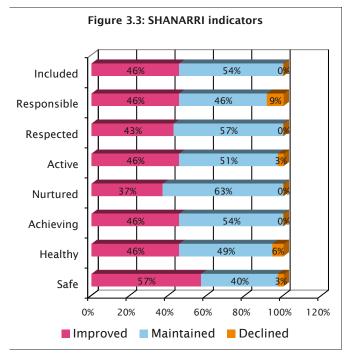

Increased wellbeing (SHANARRI)

The Sustain Borders service works with children, young people and their parents/carers to improve overall wellbeing. The service uses SHANARRI indicators, part of the Scottish Government's Getting It Right for Every Child (GIRFEC) approach, embedded in the Children and Young People (Scotland) Act 2014.

Figure 3.3 shows the extent to which the children and young people have achieved progress towards the SHANARRI indicators.

Sustain Borders uses a 6-point scorecard to determine progress against the SHANARRI indicators at the start and the end of the process, using bespoke visual aids. The scores are established by triangulating the scores of the young person, the parent and the observations of the Sustain and Social Work staff. Overall, figure 3.3 shows good progress across all eight indicators.

It should be noted that not every young person has issues across all eight SHANARRI indicators, most young people had only issues in 2 or 3 areas, these generally are the areas where progress has been made, while their score on the other indicators was maintained. Young people were felt to have regressed in only a very small number of cases.

Building better family relationships

Because the Sustain service provided flexible and intensive support focused on the root causes, relationships between parents and children improved significantly.

"[Child] is now interacting better, is back in school, and the relationship with his mum has improved. This would not have happened without Sustain."

Social Worker

"Things look more positive now, we seem to be doing more together."

Parent

The whole family approach meant that the focus was not solely on the child and many parents started to look at their own behaviour and attitude, and how that affected the child's behaviour.

"I did change the way I was parenting, and some other things helped but Sustain was main reason our placement didn't break down."

"I'm being a more stable parent now."

"I knew I was stressed out but I didn't realise how bad it was. I was doing lots of avoidance and going out as much as possible to avoid being in the house with him. I am now spending much more time looking after the children."

Parents

Some parents mentioned the practical nature of the support, as contrasted to the 'therapeutic' nature of other services available, helped them to deal better with their child on a day-to-day basis. This in turn **improved the relationships between parents/carers and children**.

One educational stakeholder mentioned Sustain buying a CD player for a family, so they could play music when getting ready for school. This made a huge difference on the pupil's behaviour at school and on the peace in the household during the morning rush hour.

"Another positive impact is better school attendance and pupils turning up on time."

Education stakeholder

Living safer lives

The young people referred to Sustain often are involved in anti-social behaviour or criminal activities. Of the 35 cases under review in this evaluation, this was the case for XXX young people.

Sustain worked with these young people to address any underlying issues to their behaviour and divert them from criminal behaviour.

Sustain is flexible in the way it supports young people in changing their behaviours and

environments. For example, one Sustain Community Support Practitioner took a young person to a boxing club, which diminished his antisocial behaviour.

One parent told about their child 'hanging around with the wrong crowd' and getting involved in criminal activities. Through the support provided by Sustain the young person was now in a safe place and has started to build up his life.

"[Child] is safe now and doesn't have the same bad influences on him."

Parent

One Social Worker mentioned four different cases where anti-social and criminal behaviour was a key issue, where Sustain Border's approach to working with the families and schools made a significant difference.

"Targeting home and school life made a real difference."

Social Worker

Developing trust in the system

Families that are referred to Sustain Borders typically have a long history of receiving support from a variety of support providers. Mostly these relationships are time-limited and focused on crisis intervention.

The support provided by Sustain helped families to make sense of the various support options available and better navigate the system. This also included better understanding where services such as Social Work were coming from and what they needed to change to avoid crisis situations and therefore the threat of their child taken into care.

"They [Sustain] are a bridge between all the other services."

"Sometimes the Social Worker would give us a lot of information, Sustain would explain what it meant and what was involved."

"Sustain came in and told us clearly we needed to present a united front – having an external, independent voice helped us."

Parents

As a result of Sustain's work with **children**, **young people and their families they started to rebuild families' trust in the system** and increase their ability to interact with other service providers effectively. This includes Social Work services, but also health services, schools, housing, police and community services.

"Sustain have helped young people to trust again and showed them that teachers and other professionals are trying to help."

"Sustain will be the voice of the young person so they are prepared to have difficult conversations with parents, teachers or anyone else when they have to." Social Workers

4. Impact on the Service Landscape

This section discusses how the Sustain Borders service fits in with other service providers and the impact of the service for other agencies provided support to children, young people and families.

The interim evaluation report provided some initial findings on the extent to which Sustain Borders had complemented and aligned with Social Work and other statutory and third sector support services (at that stage). These broadly positive findings have been further elaborated below, taking into account the additional interviews with stakeholders that have since taken place. These later interviews also have a more complete, longer-term view of the impacts of Sustain Borders and how it fits with existing support services for young people and families.

In general, other service providers continue to express high levels of satisfaction with Sustain Borders, mainly in terms of the amount and quality of support for young people and families in crisis.

Impact on Scottish Borders Council

Social Workers and management felt that Sustain Borders was meeting a clear **need for more and more intensive support** for young people and their families.

"It enhances the value of the Social Work service. There was a gap."

Social Worker

Many welcomed the additional resources that Sustain Borders has been able to bring to complex cases, recognising the fact that Social Workers (and other agencies) had often been working with these families for some time.

Social Workers and management highlighted some of the specific aspects of the Sustain Borders' service as being particularly helpful, such as their ability to provide **immediate**, **intensive**, **personalised support**, and respond as and **when needed** (i.e. out of hours). Others were just glad to have **additional resources** available, particularly having expert support practitioners they could call on to work with families in crisis.

Sustain Borders have been able to take responsibility for the bulk of day-to-day work with young people at the edge of the care and their families, meaning that Social Workers have less direct involvement (while monitoring progress against the young person's care plan). Three of the Social Workers we spoke to felt that this had helped to **reduce pressure**, allowing them to get more involved in other cases. However, given the level of existing pressure on Social Work resources, this would be very unlikely to translate into an overall feeling that workloads were more manageable.

The interim report included a potential concern that partnership working was working better at strategic than operational level. We found no evidence of any structural issues in the subsequent research, outside some initial issues with information sharing or updates and the approach of an individual member of staff.

There was strong support for the idea that a service like Sustain Borders can potentially reduce the need for (and cost of) care placements down the line. Social Workers recognised that Sustain Borders staff had worked hard to **build trust and rapport with the young people**, building their **self-esteem and resilience** but also helping to **get to the root causes** of family breakdown in several difficult cases. Any progress in these cases will reduce the likelihood of problems recurring, or help families to deal with them more effectively if and when they do.

Impact on other service providers

Other service providers tended to agree that Sustain Borders **complemented existing services and** staff had worked well with partner agencies. A number of the health and third sector stakeholders felt that Sustain Borders' had supported their work and **helped them to achieve their own objectives**.

"Other agencies rely on them as part of the team."

Education stakeholder

For example, education stakeholders spoke highly of Sustain Borders staff and their support for young people who had been **refusing to attend school**. In some cases, the young people had been refusing to attend for some time and been subject to interventions and support from different agencies and professionals.

"We were at the point where we had tried everything with these young people, this support could only benefit them."

Education stakeholder

Sustain Borders managed to **build trust and develop the confidence of young people, often in a very short period of time**.

"It has been incredible; they've been able to go in and make a difference within a few weeks."

Education stakeholder

One commented that because Sustain Border has managed to build the trust of young people, they were more likely to appreciate that school staff (and potentially other professionals) were actually trying to help them.

A key element in progress has been Sustain Border's focus on **child-centred care**. As highlighted in the previous chapter, there was evidence that Sustain Borders have communicated with agencies on behalf of the young people, and have been willing to have **difficult conversations** when required. For example, Sustain Borders have encouraged school staff to accept that a school refuser can engage with school life and schoolwork in a more limited (but still structured) way, rather than insisting on full attendance where this might have been contributing to their reluctance to attend.

Health stakeholders also welcomed Sustain Borders, recognising that it is a different kind of service to that normally available in the Borders (or elsewhere?) and that there is a particular need for **intensive, whole family support**. They also felt that Sustain's involvement with young people had helped to improve their attendance at health appointments.

There are also some examples of Sustain Borders involving other third sector providers, where the activities or services they provide would be of value to that young person (examples include Stable Life¹, Children 1st and Quarriers). "We're all part of the jigsaw."

"There's a willingness to do joint work to support the young person."

Third sector stakeholders

Many of those consulted felt that their work with these young people and families would benefit from Sustain Borders supporting them at an earlier stage, before they reached crisis point or the edge of care.

"It has filled some of the gap, but we need more of it."

Social Worker

5. Valuing the Impact of Sustain Borders

This section explores the potential financial implications of the service for the public purse and how the service can help SBC to meet its budget targets.

Like any other public authority, SBC is experiencing increasing budgetary pressures. The Council has published Fit for 2024, a transformational strategy to meet future challenges². Fit for 2024 recognises the need for additional budget savings, even after the 'easy wins' have been captured. This means the Council needs to capitalise on innovative ways of working, including ways of reducing the increasingly unsustainable costs of providing care.

Sustain Borders offers an opportunity to do things in a fundamentally different way, by transforming care for vulnerable children, young people and families and reducing the need for expensive care placements.

Thanks to the strict gatekeeping policy applied by SBC, all families that were referred to the Sustain Borders service were at the edge of care. It was clear and agreed by SBC and Sustain Borders staff that without intervention, these children and young people would be very likely to end up in care.

In the 15 months under review in this evaluation, 25 of the 35 children and young people for whom a final outcome could be stablished³ have avoided being taken into care.

SBC Social Work estimates the average cost of a care placement at $\pounds 155,310^4$, which is in line with the national average ($\pounds 158,800$)⁵. If this were applied to the overall outcomes achieved by Sustain Borders, costs of $\pounds 3.9m$ would have been avoided over the 15-month period.

The cost of the Sustain Borders service over the same 15-month period are £345,000. This means a potential budget saving of over £3.5m.

By continuing to fund Sustain Borders SBC could save around £2.8m per year in direct care placement costs.

The average cost of a care placement does not include time spend and overhead cost of SBC. These are estimated by Audit Scotland at 15%. This means **another £420,000 of resource reallocation per year** could be attributed to the Sustain Borders service.

There is also a cumulative effect, where costs would be saved for every year that a young person is not taken into care. The likely cost avoidance as a result of Sustain Borders is likely to be much higher if the duration of care placements is taken into account, bearing in mind that they can now be extended to 21.

However, the costs of care are not discretionary and do not translate directly into additional resources available to the Council. A care placement is the result of a court decision and the local authority has a statutory duty to provide the placement under the Children (Scotland) Act 1995.

Apart from the avoidance of statutory care cost, there are **a range of other preventative benefits of the Sustain Borders service** to SBC and other statutory organisations that represent a financial value:

- 1. A reduction in time and other resources that SBC and the judicial system others have to spend on preparing court cases regarding care.
- A reallocation of resources for the police and other community safety and criminal justice organisations for the young people turned away from anti-social and criminal behaviour.
 - a. 7.3% of looked after children come into contact with the youth justice system, compared to 3% of all children and young people (NACRO, 2012)⁶.

²

https://www.scotborders.gov.uk/info/20062/strategies_plans_and_policies/923/fit_for_2024

³ The service has worked with 51 children and young people in total, but 16 of these were in an early stage of the process and have not reached any conclusion.

 ⁴ Sustain Borders - update, Aberlour Childcare Trust, October 2019
 ⁵ https://www.audit-

scotland.gov.uk/docs/local/2010/nr_100902_children_residential.pdf

⁶ Looked After Children and Crime, Kristina Moodie, Centre for Youth and Criminal Justice, University of Strathclyde, 2016

- A third of young offenders, and almost a third of the adult prison population, selfidentify as being Care Experienced (SPS, 2016)⁷.
- c. Some practitioners estimate that around 50% of the adult prison population may have care experience (HM Inspector of Prisons for Scotland, 2009)⁸.
- 3. Potential future reduction of cost for mental health services by addressing the underlying issues with children and young people.
 - a. 45% of children and young people aged 5-17 looked after by a local authority had a diagnostic mental health disorder 37% had clinically significant conduct disorders; 12% were assessed as having emotional disorders - anxiety and depression - and 7% were rated as hyperactive⁹.
 - Among 5- to 10-year-olds, the rates of disorders for looked after children compared with those in private households were¹⁰:
 - i. Emotional disorders: 11% compared with 3%.
 - ii. Conduct disorders: 36% compared with 5%.
 - iii. Hyperkinetic disorders: 11% compared with 2%.
 - iv. Any childhood mental disorder: 42% compared with 8%.
 - c. Among 11- to 15-year-olds, the prevalence of mental disorders for children looked after by local authorities compared with children from the private household survey were:
 - i. Emotional disorders: 12% compared with 6%.
 - ii. Conduct disorders: 40% compared with 6%.
 - iii. Hyperkinetic disorders: 7% compared with 1%.
 - iv. Any childhood mental disorder: 49% compared with 11%.
- 4. Potential future reduction of cost for health services due to avoiding care and the reengagement with health services.
 - a. Looked after children appear to have higher rates of particular physical

health conditions for example, dental caries, vision problems and obesity¹¹.

- High rates of health-risk behaviours (for example, smoking and sexual relationships at a younger age) have been identified among the looked after population¹².
- There is evidence that care leavers of all ages are over-represented in suicide¹³ statistics and other early deaths
- d. It is estimated that one of the highest rates of youth smoking exists for care leavers at 67% (ScotPHO, 2009)¹⁴.
- Potential future reduction of future welfare cost due to the avoidance of care and reengagement with education.
 - a. In 2017/18 44% of children in care for the full year and 40% of those who were in care for part of the year left school in S4 or earlier, compared with just 11% of all school leavers¹⁵.
 - b. In 2017/18 12% of school leavers who were in care for the full year and 11% who were in care for part of the year had qualifications 1 or more qualification at SCQF level 6 or better, against 62% of all school leavers¹⁶.
 - c. In 2017/18 76% of children in care for the full year and 69% of children in care for part of the year, were in positive destinations, compared to 93% of all school leavers¹⁷.
 - d. The figures show across all stages, that a lower proportion of Care Experienced children achieved the CfE level relevant to their stage compared with all pupils – especially in writing¹⁸.
 - e. In 2016/17 the rate of exclusions among Care Experienced children was

6. Conclusions

This section draws conclusions from the evaluation findings and provides recommendations on the continuation of the Sustain model in the Scottish Borders.

Conclusions

From the research the following conclusions can be drawn:

Avoiding being taken into care

- 1. The Sustain Borders service is achieving its objectives.
- 2. The Sustain Borders service is reaching the right children, children and families. Due to the strict and well-functioning gatekeeping by SBC all service users were children at the edge of care (100%) and families in crisis.
- 3. Over the first 15 months of the pilot period Sustain Borders has avoided 25 children and young people being taken into care (71%).
- 4. This number of care placements would have required up to £3.9m in care placement costs and another £420k in overheads.
- 5. SBC could achieve a cost saving of up to £2.8m per year by continuing to fund Sustain Borders at the current level of £345,000 per year. This amount is potentially much higher if the likely duration of the placements avoided could be taken into account.
- 6. By avoiding children and young people being taken into care, there is a whole range of potential resource reallocation opportunities for the public purse, including health, mental health, education, welfare and criminal justice.

Impact on children, young people and families

- 7. The children and young people that Sustain Borders have worked with are making excellent progress against the SHANARRI indicators.
- The Sustain approach of delivering flexible, intensive, whole-family support and thus addressing the root causes rather than responding to an immediate crisis situation has a positive impact on family relationships.

- 9. Addressing the root causes of young people's issues helps to reduce anti-social and criminal behaviour.
- 10. With the intensive and flexible support children, young people and families are regaining trust in 'the system' and are reengaging with other services, such as health and education.

Impact on the service landscape

- 11. Sustain Borders clearly fills a gap in the service provision for children, young people and families in the Scottish Borders.
- 12. Sustain Borders can reduce some pressure on SBC Social Work staff, in the sense that they do not have to spend as much time on cases with Sustain Borders involvement, freeing some time for other cases.
- 13. Because the Sustain Borders service addresses the root causes of family issues, the likelihood of them returning to Social Work or other services in the future is reduced.
- 14. Sustain Borders has given the children and young people a voice, and has been able to act as an 'honest broker' between families and other services, such as health providers and schools, in many cases.
- 15. Sustain Borders works in partnership with a range of statutory and third sector organisations and helps these services to achieve their objectives.

MEMBERSHIP OF EDINBURGH AND SOUTH EAST SCOTLAND CITY REGION DEAL OVERSIGHT SUB-COMMITTEE

Briefing Note by Executive Director, Corporate Improvement & Economy

EMERGENCY POWERS – COVID-19

6 July 2020

1 DECISION(S) REQUIRED BY CHIEF EXECUTIVE

1.1 I recommend that approval is given to appoint two Elected Members to the Edinburgh and South East Scotland City Region Deal Elected Members Oversight Sub-Committee.

2 CITY DEAL ELECTED MEMBERS OVERSIGHT SUB-COMMITTEE

- 2.1 At the Edinburgh and South East Scotland City Region (ESESCR) Deal Joint Committee meeting on 3 September 2019 it was agreed that an Elected Members' Oversight Sub-Committee (EMOC) be constituted to provide scrutiny and assistance to the Joint Committee. The Sub-Committee would oversee the preparation of the Regional Growth Framework (RGF), as well as subsequent preparation of the Regional Spatial Strategy (RSS).
- 2.2 The RGF document is currently being developed and will be a matter for the EMOC to examine at an early date. As it will be a critically important statement, and one which will provide direction to the preparation of the subsequent RSS. Whilst the nature of RSS is yet to be defined, work has commenced on developing an interim RSS, which will inform National Planning Framework 4 (NPF4). It will be important to ensure the inclusive nature of the RGF, through genuine regional partnership working not only within the governance structure of the City Region Deal, but also with bodies at national level such as Scottish Enterprise and Transport Scotland, and at regional level including the partnerships for transport (SEStran) and planning (SESplan).
- 2.3 The Oversight Sub-Committee will be a sub-committee of the Joint Committee and consist of 2 elected members from each of the constituent local authorities, together with representatives from the Regional Enterprise Council and the Higher/Further Education Consortium. The proposed terms of reference for the EMOC are set out in Appendix A.
- 2.4 Figure 1 shows the proposed governance structure for the City Region Deal. The "Strategy" section on the left, which will focus on the RGF and RSS, has been incorporated into the structure alongside to the "Delivery" section for City Region Deal projects, as included in the City Region Deal Document, signed in August 2018.

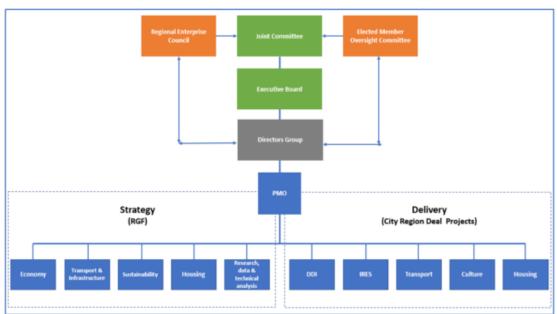

Figure 1: Governance Structure for City Region Deal

2.5 Once partners have appointed their nominees, the sub-committee will meet monthly but may meet more frequently if determined necessary by the Chair or the Sub-Committee.

3 IMPLICATIONS

3.1 Financial

- (a) There will be modest additional costs associated with travel and expenses to attend meetings of the Oversight Sub-Committee but it is likely these will be held remotely for the time being due to the Covid19 outbreak.
- (b) At present, there is no indication that preparation of the RGF and RSS, including the governance arrangements, will require any additional budget contributions from partner Councils and bodies. This assumes that there is existing staff resource within the partner Councils to support the preparation of the RGF and RSS. Scottish Government have provided modest funding (\pounds 5k) to enable initial thinking on the development of Regional Spatial Strategies.
- (c) As the programme for preparation of the RGF and RSS is only at an initial stage this matter of resource requirements will need to be kept under review.

3.2 Risk and Mitigations

- (a) The governance arrangements of the City Region Deal and Borderlands have established risk management processes associated with work programmes.
- (b) The formation of the oversight sub-committee will ensure appropriate political scrutiny of the City Deal process and the development of the RSG and RSS

3.3 Equalities

An Equalities Impact Assessment has been carried out on this study and it is not anticipated there will be any adverse equality implications.

7 CONSULTATION

- 7.1 The Executive Director Finance & Regulatory, the Service Director HR & Communication, the Monitoring/Chief Legal Officer, the Chief Officer Audit and Risk, and the Clerk to the Council have been consulted and any comments received have been incorporated into the final report.
- 7.2 The Convener, the Leader of the Administration and the Leader of the Opposition are being consulted and any questions will be responded to by relevant Officers and any comments received will be considered by the Chief Executive in arriving at her decision.

Author(s)

| Name | Designation and Contact Number |
|------------|--|
| Ian Aikman | Chief Planning & Housing Officer Tel: 01835 826510 |

APPROVED:

| Executive Director: (Finance & Regulatory) | David Robertson | Date: 10 July 20 |)20 |
|---|-------------------|------------------|-----|
| Having consulted - | | | |
| Leader of the Administration: | Cllr Shona Haslam | Date: 6 July 202 | 20 |
| Convener: | Cllr David Parker | Date: 6 July 202 | 20 |
| Leader of the Opposition: | Cllr Stuart Bell | Date: 6 July 202 | 20 |

NOTE: Cllrs Bell and Robson are the two Elected Members on the Sub-Committee, with Cllr Heather Anderson as substitute.

Elected Member Oversight Sub-Committee

1. Membership

Two Members from each constituent Council, one member from the Higher Education/Further Education consortium and up to two members from the Regional Enterprise Council.

2. Convener/Chair

The chair will be appointed by the Joint Committee and should be from the Council in the annual lead role for the City Region Deal.

3. Quorum

The Quorum will be one-third of the membership.

4. Substitutes

Substitutes are permitted from the same local authority.

5. Officers

Officers will attend to support meetings.

6. Remit

The powers and responsibilities of the Elected Member Oversight Sub-Committee cannot extend beyond those of the Edinburgh and South East Scotland City Region Deal Joint Committee. The remit of the Elected Member Oversight Sub-Committee would be:-

- a. To provide oversight of the Regional Growth Framework and Regional Spatial Strategy.
- b. To support and drive a co-ordinated approach to the development of the Regional Growth Framework and Regional Spatial Strategy.
- c. To support and encourage a sustainable approach to managing growth which aligns to local sustainability, energy and low carbon plans and strategies.
- d. To encourage and facilitate a close working partnership with SEStran, SESplan and other relevant organisations.
- e. To provide oversight and consider recommendations from the Regional Housing Board and the Transport Appraisal Board.
- f. To scrutinise the work of the SESplan Officer Board in regard to the Regional Growth Framework.
- g. To advise the City Region Deal Joint Committee in regard to the Regional Growth Framework and Regional Spatial Strategy.

7. Meeting Frequency

The sub-committee will usually meet monthly but may meet more frequently if determined necessary by the Chair or the Sub-Committee.

South East of Scotland Transport Transition Plan

Briefing Note by Executive Director, Corporate Improvement & Economy

EMERGENCY POWERS – COVID-19

6th July 2020

1 DECISION(S) REQUIRED BY CHIEF EXECUTIVE

1.1 I recommend that approval is given to:

- (a) the Council's involvement in the South East of Scotland Transport Transition Group that has been established in response to the letter issued by the Cabinet Secretary for Transport, Infrastructure and Connectivity (attached at Appendix 1); and
- (b) the terms of reference for the operation of the group (attached at Appendix 2).

2 BACKGROUND AND PURPOSE

- 2.1 In a letter dated 22nd May 2020 (Appendix 1) informing all local authorities of the Scottish Government's preparation of a national Transport Transition Plan to address transport issues expected as Covid-19 lockdown easing phases are implemented, the Cabinet Secretary for Transport, Infrastructure and Connectivity acknowledged the particular pressures that will be experienced in the Edinburgh and Glasgow regions.
- 2.2 Accordingly, he asked that Transport Scotland engage directly with the local authorities in those city regions at an operational officer level; thereby providing a basis for the local authorities to collaborate in the preparation and implementation of appropriate measures.
- 2.3 In the Edinburgh City Region, it was considered that the already established City Region Deal Transport Appraisal Board (TAB) comprising officer representatives of the six constituent local authorities, the regional transport partnership (SEStran), and Transport Scotland, would provide the most effective way of addressing these pressures on the regional transport network. In order to ensure sufficient focus the TAB has formed itself into a Regional Transport Transition Group, and has invited officer representatives of Clackmannanshire and Falkirk Councils onto the Group, as they fell within the SEStran grouping of local authorities.
- 2.4 The report seeks approval for the Council's involvement in the group and of its terms of reference as set out in Appendix 2.

South East Scotland Regional Transport Transition Plan Group

- 2.5 The primary terms of reference for the Group are to focus on an increase in travel demand and capacity; and to identify associated regionally specific and cross cutting issues, challenges and opportunities. Resulting from that work will be a co-ordinated programme of prospective measures, including cost estimates, agreed by the Group as recommended for phased implementation. The Group is not a decision making body and is not able to commit any local authority either individually or collectively in terms of policy, implementation of measures, or spending. Any specific roads related measures will still require the agreement of the relevant Council as local roads authority.
- 2.6 Survey work, modelling and analysis is being conducted by Transport Scotland and, together with data held by SEStran and partner Councils, can provide a robust basis upon which to identify priority actions. The full range of possible interventions has yet to be established. In broad terms there will be a need for measures that seek to flatten the peak periods of demand for travel, and those which maximise the supply and attractiveness of public transport as well as the opportunities for safe other modes of travel (walking and cycling) to reduce reliance upon, and discourage increased use of, the private car. By way of a few examples, measures to flatten demand could include encouragement of continued high levels of home working, and the varying of workplace operating hours. Measures to maximise public transport and active travel could include more road space given over to bus lanes on arterial routes, more 'bus gates', and extensions to existing, or temporary additional, park and ride sites.
- 2.7 Engagement with operators of public transport in the region will be essential, and the well-established links to these operators can be readily used to ensure a collectively sound, focused and comprehensive approach. Meetings of the Group are being held on a weekly basis, with one of the first tasks being to agree a project plan of urgently required transport measures and interventions.
- 2.8 It is intended that the full range of measures developed by the Group will be reported to the City Region Deal Joint Committee at its meeting on 7th August 2020 for approval. However, it is important to note that as the sequential phases of the easing of the lockdown are implemented, it is essential that measures are in place to address issues of increasing demand for public transport services which will be operating at reduced capacity; together with the risk of a substantial increase in private car usage. Of particular significance is the need for many measures to be in place prior to the reopening of schools from 11th August, and this has been strongly endorsed by the public transport operators in their ongoing liaison with the Group.
- 2.9 Having regard to this need for urgency, it is expected that each local authority will determine the level of any delegation to its officer representative on the Regional Transport Transition Group, as well as their own internal decision making and reporting procedures.
- 2.10 The provisions of the regional TTP will also be aligned with the principles set out in current and emerging national, regional, and local transport strategies to mitigate the impact of climate change, and to ensure that improvements to the transport system recognise and seek to reduce inequalities in access to employment, education/training, and services.
- 2.11 If the TTP is to be effective in supporting the region's economic recovery from the impact of the Covid-19 restrictions it is essential that operational Page 152

transport measures and interventions are prioritised and implemented quickly. Transport Scotland have advised that, where possible, they should be programmed for implementation over the next few weeks. This will therefore also require an ongoing communications strategy to inform and engage with communities, transport operators, and transport users.

Terms of Reference

- 2.12 A copy of the draft terms of reference prepared by Transport Scotland for the purposes and operation of the TTP Group, and which were considered at the meeting of the Group on 10th June are attached to this report at Appendix 2. They are due for consideration and approval by the City Region Deal Executive Board on 18th June.
- 2.13 The Group is established as a vehicle for providing and sharing information and expertise, developing proposals and making recommendations. It is not a decision-making body and will not be able to commit partners collectively or individually in terms of policy and spending.
- 2.14 It will be for partners to determine the extent of authority to be delegated to their representatives and their own internal decision-making and reporting procedures. In the case of Scottish Borders Council, it is intended that officers will provide input into the group but that decisions on interventions identified within regional TTP that affect the Scottish Borders will be reported to members.

3 IMPLICATIONS

3.1 Financial

- (a) There are no immediate financial implications in approving this report and Officer involvement will be accommodated within existing budgets.
- (b) There is no specifically allocated finance for the preparation or implementation of the TTP, although there are current funding streams within Transport Scotland that could be regarded as potential sources. Councils and partner organisations will also need to consider how best to use existing operational budgets, including the potential pooling of finance.

3.2 Risk & Mitigations

If the TTP fails to address adequately the transport challenges posed by the impacts of the Covid-19 restrictions it will impair the ability of the national, regional and local economies to recover, with a particular impact on our more disadvantaged communities.

3.3 Equalities

In the preparation of the National TTP as well as any contributory regional strategies, regard will need to be had to the statutory requirements of the equalities legislation, as well as such plans being demonstrable in their attention to the needs of those within the protected characteristics categories.

4 CONSULTATION

- 4.1.1The following officers were consulted and their comments incorporated into the report:
 - Graeme Johnstone Lead Officer Transport & Access
 - Gordon Grant Team Leader Transport Services Page 153

• Brian Young – Infrastructure Manager

The Convener, the Leader of the Administration and the Leader of the Opposition are being consulted and any questions will be responded to by relevant Officers and any comments received will be considered by the Chief Executive in arriving at her decision.

Cabinet Secretary for Transport, Infrastructure and Connectivity Michael Matheson MSP

T: 0300 244 4000 E: scottish.ministers@gov.scot

To Council Leaders & Regional Transport Partnership Chairs

22 May 2020

Colleagues,

Transport Transition Plan Engagement

I would like to thank you and your Council for the significant work that you have undertaken during this unprecedented time to keep the local transport networks safe and operational.

During the Scottish Parliament Rural Economy and Connectivity Committee meeting on the 13 May 2020, I outlined our intention to set out how our Transport Transition Plan will support Scotland's people and businesses on our transition out of lockdown. Further detail can be found at <u>https://www.transport.gov.scot/news/cabinet-secretarysets-out-latest-transport-response-to-covid-19-outbreak/</u>. This will be an evolving process and we will engage Local Authorities and Regional Transport Authorities as it develops.

We are drawing together evidence to inform our plan, however one clear and significant challenge is around public transport. During lock down demand for public transport has fallen by between 85 and 90 per cent against 'normal' since 23 March. As we move towards easing lock down measures operators are estimating that capacity will be between 10 and 25 per cent of 'normal' with the level of physical distancing required. There is a risk this will result in increased private car use, leading to congestion, poor air quality and increased transport inequalities, particularly for the 29 per cent of households in Scotland that do not have access to a car.

We continue to take action to stabilise the transport system and prepare for physical distancing. Further details on the action I have taken can be viewed at <u>https://www.transport.gov.scot/coronavirus-covid-19/</u>. A key focus of our on-going work is to ensure that we continue to support a green recovery to deliver our Climate Change commitments and reduce inequalities.

As our national work continues I know you will also be leading your local and regional transport planning responses, in line with your transport responsibilities, which I recognise will be central to the success of the transition. I would encourage you to continue to take a cross boundary approach with your neighbouring authorities where needed.

While we have already been working closely, there will be a continuing need for collaboration to align approaches across our respective transport networks. I therefore intend to include within the Transport Transition Plan a statement on how we continue to engage with local authorities, regional transport partnerships and operators to operationalise the measures across Scotland. I would therefore ask you to consider what Transport Scotland input you may require in relation to your own transition transport planning. Please forward this to Amy Phillips (Amy.Phillips@transport.gov.scot) at Transport Scotland in the first instance.

Our engagement to date has reflected the differing challenges across the country, such as the on-going ferry operation discussions we have held with Island Authorities from start of the crisis. In the short term, Transport Scotland is also looking to engage directly with the local authorities in the Edinburgh and Glasgow city regions at an operational officer level. The urgency and scale of the public transport challenge in these areas requires immediate joined up working to manage the operational interactions between the respective networks for which we are responsible.

We are not seeking to underplay the challenges across rural areas of Scotland, other cities and areas of the country. We value Local Authorities' consideration in this regard, therefore I have asked for a Transport Transition Plan National Advisory Group to be set up with proposed membership to include representatives from COSLA, SOLACE, RTPs, SCOTS and other selected members.

We have held on-going discussions with COSLA, SOLACE, RTPs and SCOTS since the start of the emergency and will continue engagement on the Transport Transition Plan in the coming weeks as outlined above.

We look forward to engaging on our respective plans as we rise to the collective transport challenges as we safely transition out of lockdown to the new normal.

Bot wown

MICHAEL MATHESON

Purpose and Draft Terms of Reference for Transport Transition Plan South East Scotland Region Group

Purpose

 To align approaches and share knowledge of national, regional and local transport planning activity to safely increase capacity across the transport system and manage demand in our journey along Scotland's route map through and out of the crisis. This will include broader considerations relating to equality impacts and consideration of tailoring measures, for example to specific geographies and sectors.

Draft Terms of Reference

2. The Group will:

- a) consider regional, local and national transport as it applies in the travel to work area with a focus on issues within and on approaches to city centres to assist in Transport Scotland's evolving Transport Transition Plan;
- b) focus on increases in travel demand and capacity in line with the second National Transport Strategy sustainable travel hierarchy and interactions between modes as appropriate while considering the four harms set out in COVID-19: A Framework for Decision Making (23 April 2020);
- c) identify regionally specific and cross-cutting issues, challenges and opportunities associated with increasing travel demand and capacity;
- d) collectively engage to address these as and where appropriate;
- e) input consideration of regional equality issues as per due regard to the need to eliminate discrimination and advance equality of opportunity;
- f) input into scenario planning and provide advice on whether proposed scenarios or policy interventions appropriately and effectively reflect the operational requirements of the transport system from the regional perspective;
- g) work together on key transport messaging and communication strategies to support the recovery and build confidence in the public transport system;
- h) offer insight and feedback from those delivering services and measures to input into government decision making;
- i) review and challenge material to support the response produced by Transport Scotland/Scottish Government, sectoral bodies and/or others; and
- j) continue to bring together expertise and data in the monitoring of networks as we transition out of lockdown; and
- k) advise Transport Scotland on the readiness of transport sectors to manage increased demand/service provision as appropriate.
- 3. Confidentiality

As the Group may be asked for its views on proposals that are still in development, and which have not yet been made available to the public, all discussions and material will be confidential.

Papers may be shared with named individuals who are not members of the group with the prior agreement of the co-chairs.

4. Conduct

Members of the group are expected to contribute their expertise as independent members and not to promote the interests of one organisation or sector. Members are asked to challenge assumptions and scenarios and should, likewise, expect to be challenged by other members of the group however this will be done respectfully.

5. Membership

- The City of Edinburgh Council
- Clackmannanshire Council
- East Lothian Council
- Falkirk Council
- Fife Council
- Midlothian Council
- Scottish Borders Council
- West Lothian Council
- SEStran
- Transport Scotland
- Public Transport Operators to be invited as required and agreed with the co-chairs.
- Other representatives can be invited with prior agreement of the co-chairs.

6. Secretariat

The secretariat function will be provided by the Edinburgh and South East Scotland City Region Deal Project Management Office.

Frequency of meetings to be confirmed, however it is anticipated that meetings will initially be held once or twice weekly, with the first taking place on the week commencing 1 June. Shorter, *ad hoc* meetings with selected members could take place more frequently depending on the requirement and speed of decision making that is required.

Frequency, role, remit and need for the group by all partners to be reviewed every two weeks.

The secretariat will aim to provide papers a day in advance but this may not be possible due to the speed at which work is commissioned and the need for quick turnaround.

The names and roles of all of those attending should be submitted to the secretariat in advance to enable a roll call at the start of each meeting and for the record, including any substitutions to agreed representatives.

7. Chairs

It is proposed that Grace Vickers, as Chair of the Edinburgh City Region Deal Transport Appraisal Board, and Alison Irvine, Transport Scotland Co-Chair, noting that these are bespoke and sit alongside, but separate to, the City Region Regional Transport Working and other Transport Groups.
