

Public Document Pack

SCOTTISH BORDERS COUNCIL FRIDAY, 25 SEPTEMBER, 2020

A MEETING of the SCOTTISH BORDERS COUNCIL will be held on FRIDAY, 25 SEPTEMBER, 2020 at 10.00 AM. The Convener has directed that this meeting will be conducted in accordance with Section 43 of the Local Government in Scotland Act 2003 and will be accessed remotely by all Members via MS TEAMS. The meeting will be live streamed to the public and a link will be on the Council website.

J. J. WILKINSON,
Clerk to the Council,
18 September 2020

BUSINESS																		
1.	Convener's Remarks.																	
2.	Apologies for Absence.																	
3.	Order of Business.																	
4.	Declarations of Interest.																	
5.	<p>Minute (Pages 7 - 22)</p> <p>Consider Minute of Scottish Borders Council held on 27 August 2020 for approval and signing by the Convener. (Copy attached.)</p>	2 mins																
6.	<p>Committee Minutes</p> <p>Consider Minutes of the following Committees:-</p> <table style="width: 100%; border: none;"> <tr> <td style="width: 60%;">(a) Local Review Body</td> <td style="text-align: right;">17 August 2020</td> </tr> <tr> <td>(b) Civic Government Licensing</td> <td style="text-align: right;">21 August 2020</td> </tr> <tr> <td>(c) Police, Fire & Rescue and Safer Communities Board</td> <td style="text-align: right;">28 August 2020</td> </tr> <tr> <td>(d) Selkirk Common Good Fund</td> <td style="text-align: right;">2 September 2020</td> </tr> <tr> <td>(e) Duns Common Good Fund</td> <td style="text-align: right;">3 September 2020</td> </tr> <tr> <td>(f) Sustainable Development</td> <td style="text-align: right;">4 September 2020</td> </tr> <tr> <td>(g) Planning & Building Standards</td> <td style="text-align: right;">7 September 2020</td> </tr> <tr> <td>(h) Galashiels Common Good Fund</td> <td style="text-align: right;">10 September 2020</td> </tr> </table> <p>(Please see separate Supplement containing the public Committee Minutes.)</p>	(a) Local Review Body	17 August 2020	(b) Civic Government Licensing	21 August 2020	(c) Police, Fire & Rescue and Safer Communities Board	28 August 2020	(d) Selkirk Common Good Fund	2 September 2020	(e) Duns Common Good Fund	3 September 2020	(f) Sustainable Development	4 September 2020	(g) Planning & Building Standards	7 September 2020	(h) Galashiels Common Good Fund	10 September 2020	5 mins
(a) Local Review Body	17 August 2020																	
(b) Civic Government Licensing	21 August 2020																	
(c) Police, Fire & Rescue and Safer Communities Board	28 August 2020																	
(d) Selkirk Common Good Fund	2 September 2020																	
(e) Duns Common Good Fund	3 September 2020																	
(f) Sustainable Development	4 September 2020																	
(g) Planning & Building Standards	7 September 2020																	
(h) Galashiels Common Good Fund	10 September 2020																	
7.	Scottish Borders Local Police Plan (Pages 23 - 44)	15 mins																

	<p>Consider:-</p> <p>(a) Report by Executive Director, Corporate Improvement and Economy (Copy attached.);</p> <p>(b) Presentation by Divisional Commander, Chief Superintendent John McKenzie; and.</p> <p>(b) Recommendation made by the Police, Fire & Rescue and Safer Communities Board held on 28 August relating to the Local Police Plan. (Copy attached.)</p>	
8.	<p>Making Offices COVID Safe (Pages 45 - 50)</p> <p>Consider joint report by Executive Director, Corporate Improvement & Economy and Service Director HR & Communications. (Copy attached.)</p>	15 mins
9.	<p>Responding to the Climate Emergency (Pages 51 - 66)</p> <p>Consider report by Executive Director, Corporate Improvement & Economy. (Copy attached.)</p>	20 mins
10.	<p>Local Development Plan (Pages 67 - 1962)</p> <p>Consider report by Executive Director, Corporate Improvement & Economy. (Copy attached.)</p>	20 mins
11.	<p>Indicative Regional Spatial Strategies for South of Scotland and South East Scotland (Pages 1963 - 2030)</p> <p>Consider report by Executive Director, Corporate Improvement & Economy. (Copy attached.)</p>	20 mins
12.	<p>Chief Social Work Officer Annual Report (Pages 2031 - 2066)</p> <p>Consider report by Chief Social Work & Public Protection Officer. (Copy attached.)</p>	10 mins
13.	<p>Motion by Councillor Mountford</p> <p>Consider Motion by Councillor Mountford in the following terms:-</p> <p>“Scottish Borders Council:</p> <p>(i) acknowledges the efforts that this Council has made to reduce greenhouse gas emissions and promote renewable energy;</p> <p>(ii) recognises that Councils can play a central role in creating sustainable communities, particularly through the provision of locally generated renewable electricity;</p> <p>(iii) further recognises:</p> <ul style="list-style-type: none"> • that very large financial setup and running costs involved in selling locally generated renewable electricity to local customers result in it being impossible for local renewable electricity generators to do so • that making these financial costs proportionate to the scale of a renewable electricity supplier’s operation would create significant opportunities for Councils to be providers of locally generated renewable electricity directly to local people, businesses and organisations, and • that revenues received by Councils that became local renewable electricity providers could be used to help improve local services and facilities; 	

	<p>(iv) accordingly resolves to support the Local Electricity Bill, currently supported by a cross-party group of 115 MPs, and which, if made law, would make the setup and running costs of selling renewable electricity to local customers proportionate by establishing a Right to Local Supply; and</p> <p>(v) further resolves to:</p> <ul style="list-style-type: none"> • inform the local media of this decision • write to local MPs, asking them to support the Bill, and • write to the organisers of the campaign for the Bill, Power for People, at 8 Delancey Passage, Camden, London NW1 7NN or infor@powerforpeople.org.uk expressing its support. 	
14.	<p>Motion by Councillor Tatler</p> <p>Consider Motion by Councillor Tatler in the following terms:-</p> <p>“Poverty exists in the Scottish Borders and has done for some time. There is evidence that there may be increased levels of poverty as a result of the Covid19 pandemic. Scottish Borders Council through a number of initiatives and programmes continues to provide support and assistance to combat the effects of poverty on individuals and families in our local communities. Much of this work is carried out in partnership with the Scottish Government and a range of Third-Sector organisations.</p> <p>In collaboration with its partners and involving those with “lived” experience of poverty, Scottish Borders Council will develop and implement a comprehensive Anti-Poverty Strategy – building on current work, identifying new areas where support is needed and campaigning for additional resources to tackle poverty. A Short Term Working Group of three Councillors will work with officers, Third Sector representatives and local people to prepare a Draft Anti-Poverty Strategy that will be considered for approval by the Council at its February 2021 meeting.”</p>	5 mins
15.	<p>Motion by Councillor H. Scott</p> <p>Consider Motion by Councillor H. Scott in the following terms:-</p> <p>“That Scottish Borders Council endorses and fully supports Chief Constable Iain Livingston’s announcement of the Police Scotland Assault Pledge, which is a campaign to tackle the increasing number of assaults, violence and abusive behaviour directed towards police officers and police staff, and his commitment to reduce the impact violence has on them, including measures to improve their safety.</p> <p>Ref: https://www.scotland.police.uk/what-s-happening/news/2020/august/chief-constable-s-pledge-to-tackle-assaults-on-police-officers-and-staff/”</p>	5 mins
16.	<p>Scheme of Administration and Appointments to Committees (Pages 2067 - 2134)</p> <p>Consider:-</p> <p>(a) Report by Service Director Customer & Communities on amendments to Scheme to take account of changes to Executive portfolios and Pension Scheme accounts review. (Copy attached.); and</p> <p>(b) Appointments to Committees and other positions:</p> <p>(i) a member of the Administration, not on the Executive Committee, to the Audit & Scrutiny Committee to replace</p>	15 mins

	<p>Councillor Scott Hamilton;</p> <p>(ii) a member of the Administration on the Audit & Scrutiny Committee to replace Councillor Scott Hamilton as Vice-Chair;</p> <p>(iii) a member of the Opposition to the Audit & Scrutiny Committee to replace Councillor Chapman;</p> <p>(iv) a member of the Opposition to the Sustainable Development Committee to replace Councillor Robson;</p> <p>(v) a member on the Planning & Building Standards Committee and Local Review Body to replace Councillor Miers;</p> <p>(vi) a member on the Scottish Borders Living Wage Working Group to replace Councillor Robson; and</p> <p>(vii) to replace Councillor Aitchison with Councillor Tatler as one of the Administration members of the Community Planning Strategic Board.</p>	
17.	Open Questions	15 mins
18.	Any Other Items Previously Circulated	
19.	Any Other Items Which the Convener Decides Are Urgent	
20.	<p>Private Business</p> <p>Before proceeding with the private business, the following motion should be approved:-</p> <p>“That under Section 50A(4) of the Local Government (Scotland) Act 1973 the public be excluded from the meeting for the following items of business on the grounds that they involve the likely disclosure of exempt information as defined in the relevant paragraphs of Part 1 of Schedule 7A to the aforementioned Act.”</p>	
21.	<p>Minute (Pages 2135 - 2138)</p> <p>Consider private Section of Minute of Scottish Borders Council held on 27 August 2020. (Copy attached.)</p>	1 mins
22.	<p>Committee Minutes</p> <p>Consider private Sections of the Minutes of the following Committees:-</p> <p>(a) Civic Government Licensing 21 August 2020 (b) Selkirk Common Good Fund 2 September 2020 (c) Galashiels Common Good Fund 10 September 2020</p> <p>(Please see separate Supplement containing private Committee Minutes.)</p>	1 mins
23.	<p>CGI Contract</p> <p>Consider report by Executive Director, Finance & Regulatory. (Copy to follow.)</p>	20 mins

NOTES

- 1. Timings given above are only indicative and not intended to inhibit Members' discussions.**
- 2. Members are reminded that, if they have a pecuniary or non-pecuniary interest in any item of business coming before the meeting, that interest should be declared prior to commencement of discussion on that item. Such declaration will be recorded in the Minute of the meeting.**

SCOTTISH BORDERS COUNCIL

MINUTE of MEETING of the SCOTTISH BORDERS COUNCIL held remotely by Microsoft Teams on 27 August 2020 at 10.00 a.m.

Present:- Councillors D. Parker (Convener), S. Aitchison, A. Anderson, H. Anderson, J. Brown, S. Bell, K. Chapman, C. Cochrane, G. Edgar, J. A. Fullarton, J. Greenwell, C. Hamilton, S. Hamilton, S. Haslam, E. Jardine, H. Laing, S. Marshall, W. McAteer, T. Miers, D. Moffat, S. Mountford, C. Ramage, N. Richards, E. Robson, M. Rowley, H. Scott, S. Scott, E. Small, R. Tatler, E. Thornton-Nicol, T. Weatherston

Apologies:- Councillors D. Paterson, G. Turnbull.

In Attendance:- Chief Executive, Executive Director (Corporate Improvement & Economy), Executive Director (Finance & Regulatory), Service Director Customer & Communities, Service Director HR & Communications, Service Director Young People, Engagement & Inclusion, Chief Social Work and Public Protection Officer, Chief Operating Officer – Adult Social Work & Social Care, Chief Legal Officer, Clerk to the Council.

1. **CONVENER'S REMARKS**

The Convener reminded Members of the meeting protocols.

**DECISION
NOTED.**

2. **ORDER OF BUSINESS**

The Convener advised of an additional item of business which would be considered in private.

**DECISION
NOTED.**

3. **MINUTES**

The Minutes of the Meetings held on 25 June and 30 July 2020 were considered.

**DECISION
AGREED that the Minutes be approved and signed by the Convener.**

4. **COMMITTEE MINUTES**

The Minutes of the following Committees had been circulated:-

(a)	Local Review Body	25 May 2020
(b)	Local Review Body	1 June 2020
(c)	Pension Fund Committee	22 June 2020
(d)	Pension Fund Board	22 June 2020
(e)	Audit & Scrutiny	23 June 2020
(f)	Hawick Common Good Fund	24 June 2020
(g)	Civic Government Licensing	26 June 2020
(h)	Coldstream Common Good Fund	30 June 2020
(i)	Peebles Common Good Fund	1 July 2020
(j)	Selkirk Common Good Fund	2 July 2020
(k)	Local Review Body	13 July 2020
(l)	Local Review Body	15 July 2020
(m)	Hawick Common Good Fund	17 July 2020

DECISION**APPROVED the Minutes listed above subject to paragraph 4 below.****5. COMMITTEE RECOMMENDATION**

There had been circulated copies of a recommendation from the meeting of the Selkirk Common Good Fund Sub-Committee held on 2 July 2020. This required Council approval as all three Elected Members of the Sub-Committee had declared an interest in the funding application. The recommendation was to award a grant of £2,250 to Selkirk Common Riding Trust, towards the cost of a new platform system at the Victoria Hall, subject to certain conditions.

DECISION**AGREED to approve the recommendation to award a grant of £2,250 to Selkirk Common Riding Trust, towards the cost of a new platform system at the Victoria Hall subject to the following:-**

- (a) that the arrangements and cost of storage of the platform be the responsibility of the Trust; and**
- (b) the work associated with the construction of the platform be carried out in accordance with current guidelines relating to the Covid-19 restrictions.**

6. IN-YEAR BUDGET REVIEW 2020/21

With reference to paragraph 5 of the Minute of 25 June 2020, there had been circulated copies of a report by the Executive Director, Finance & Regulatory, providing an update on the current financial position of the 2020/21 budget and proposing a re-alignment of resources to amend the budget approved by Council on the 26 February 2020 budget in response to the COVID-19 pandemic. The report explained that an in-year budget exercise to review both revenue and capital budgets had been undertaken by the Corporate Management Team (CMT) based on the first quarter (June 2020 month end) position and recommendations to revise these budgets were now submitted for approval. The COVID-19 emergency situation, currently affecting the UK, had caused unprecedented pressure on society and the economy with significant financial challenges that were continuing to change and emerge. The pandemic had caused a major impact on delivery of public services, with the Council having a key role to play in supporting Borders communities, businesses and residents during this time. As well as directly dealing with the impact of the virus and protecting communities, the Council was now re-opening key public services across the region, in line with the Scottish Government's Route Map. In June, an initial assessment of the revenue impact of COVID-19 on the Council's finances projected pressures of £15m excluding any impact on Council Tax at that point. The Corporate Management Team had since undertaken an exercise to re-plan the Council's 2020/21 revenue and capital budgets based on the June 2020 month-end position and this was summarised in Appendix 1 to the report. The analysis of the revenue budget, now including a projected impact on Council Tax, had highlighted estimated revenue budget pressures of £20.449m and available resources of £19.056m from a combination of in-year savings and additional grant support leaving a residual budget pressure, based on current forecasts, of £1.393m. The approach to the review of the capital budget had focussed on assessing the impact of the national "lockdown" of the construction industry and the associated inevitable delays in current and planned programmes of work. The overall impact on the capital plan was that net £26.855m of budget within the Capital Plan had moved as a timing movement to future years with a movement from base budget of £96.953m to a revised plan of £70.098m. This revised plan was based on a review of deliverability of the Plan with revised budgets now representing what project managers were forecasting would be spent and delivered during the remainder of 2020/21. Members congratulated Mr Robertson and his team for their work to date but acknowledged that there were still a number of challenges ahead.

DECISION

AGREED to:-

- (a) approve the revisions to the revenue and capital budgets for 2020/21 as set out in Appendix 1 to the report and note that these would be included as virements within the Executive monitoring report in September;**
- (b) note the ongoing management action being undertaken to aim to bring the revenue budget to a balanced position, if possible, by 31 March 2021;**
- (c) note that any budget shortfall at 31 March 2021 would require to be funded from Reserves; and**
- (d) note that future monitoring reports would be presented to the Executive Committee as part of the revenue and capital monitoring processes.**

7. FIT FOR 2024 - REVIEW OF AREA PARTNERSHIPS

With reference to paragraph 8 of the Minute of 25 June 2020, there had been circulated copies of a report by the Service Director Customer & Communities outlining the next steps in evolving the Area Partnerships and community capacity building arrangements, taking into account the recommendations of the report which was commissioned from the Scottish Community Development Centre (SCDC). It was proposed that the arrangements in each locality were developed at a grass roots level using a bottom-up approach. Therefore the report did not propose how the next steps, to the further development of the Area Partnerships, would take place but supported the empowerment of each Area Partnership to discuss, agree and implement improvement mechanisms for this in each locality. The Council was continuing to respond to the current Covid-19 pandemic and there had been a great deal of learning and experience of working with our communities through the Community Assistance Hubs. This ongoing learning would be taken into account in these next steps and how ongoing arrangements evolve. Members supported the approach being taken and emphasised the need to broaden engagement with Area Partnerships.

DECISION

AGREED:-

- (a) that the findings of the report by the Scottish Community Development Centre would continue to be fed back, via a range of stakeholders, to the wider community for their consideration;**
- (b) to approve the Action Plan outlined in Appendix 1 to the report;**
- (c) to request that each Area Partnership establish, at their next meeting, a mechanism to review the findings and make recommendations for further public consultation within each locality; and**
- (d) to receive a further report from the Service Director Customer & Communities on the outcome and next steps.**

8. COMMUNITY FUND 2019/20 - OUTSTANDING APPLICATIONS

There had been circulated copies of a report by the Service Director Customer & Communities presenting the current position regarding outstanding Community Fund applications carried forward from 2019/20, due to the Covid-19 pandemic, and requesting that authority was delegated to the Service Director Customer & Communities to allow these to progress. The report explained that due to the Covid-19 pandemic, the Community Fund was suspended on 20 March 2020 and staff were deployed to the Community Assistance Hubs (CAH's). As at 20 March 2020, a total of twenty Community Fund Fast Track (under £1.5k) applications had been received which totalled £20.5k. These applications were now

being progressed in line with the Scheme of Delegation under powers delegated to the Service Director for Customer & Communities. There were currently twenty two outstanding Community Fund applications (over £1.5k), which had been received before the suspension, totalling £203,752. Assessments for these were prepared by Officers with decisions normally made at Area Partnerships and a detailed breakdown of these was provided at Appendix 1 to the report. Due to the Covid-19 pandemic, there were no Area Partnership meetings scheduled until November 2020. To avoid further delays it was recommended that authority be delegated to the Service Director Customer & Communities, to approve or decline the outstanding Community Fund applications, subject to the agreement of at least 50% of the Members in the relevant Ward(s). Members agreed this was the best process to deal with these applications.

DECISION

AGREED to delegate authority to the Service Director Customer & Communities to approve the outstanding Community Fund applications from 2019/20 subject to the agreement of at least 50% of the Members in the relevant Wards.

9. REVIEW OF LOCALITY BID FUND, COMMUNITY FUND AND PARTICIPATORY BUDGETING

- 9.1 There had been circulated copies of a report by the Service Director Customer & Communities presenting the analysis and evaluation of versions 1 and 2 of the Localities Bid Fund, Community Fund and participatory budgeting. The analysis and survey feedback of Localities Bid Fund 1 (181 responses) and Localities Bid Fund 2 (135 responses) were detailed in Appendices 1 and 2 to the report. Overall, there was a high level of dissatisfaction within communities and projects regarding the Localities Bid Fund 1 and 2 processes. The report therefore proposed a number of immediate changes to the Community Fund to take effect from 1 September 2020, as well as outlining the next steps for further engagement with communities to develop the Community Fund and participatory budgeting. The Council was continuing to respond to the current Covid-19 pandemic and working with our communities through the Community Assistance Hubs. The learning from this work would be taken into account in these next steps and how ongoing arrangements evolved. There was a lengthy discussion and Councillor H. Scott proposed an amendment to change the application criteria.
- 9.2 The Convener adjourned the meeting to allow officers to agree the wording of the amendment with Councillor Scott. However, following the adjournment there was still some confusion regarding what the amendment was seeking to achieve so the Convener proposed that the matter be deferred until the end of public business to allow any issues to be resolved.

DECISION

AGREED to defer consideration of this item until later in the meeting.

10. ROMANNOBRIDGE FLOOD PROTECTION SCHEME 2020

There had been circulated copies of a report by the Service Director Assets & Infrastructure proposing that the Council approved the recommendation to confirm the proposed Romannobridge Flood Protection Scheme 2020. Authorisation was also sought to allow the Council to commence the construction stages of the project. The report explained that as part of the Scheme approval process it was required to give notice of the Scheme in accordance with paragraph 1 of schedule 2 of the Flood Risk Management (Scotland) 2009 Act. The Notice was first published on 7 February 2020. Any person was entitled to object to the Scheme in accordance with paragraph 3 of schedule 2 of the 2009 Act. The formal 28 day objection period began on the date the Notice was first published and concluded on 6 March 2020. There were no objections to the proposed Scheme therefore the Council had to make a decision to confirm or reject the Scheme in accordance with paragraph 4 (1) of schedule 2 of the 2009 Act. Once the decision had been made, the Council would publish notice of that decision in accordance with the paragraph 10 of the 2009 Act. The Scheme would then become operative 6 weeks after notice was published unless an appeal was

made. Members highlighted that although this was a relatively modest scheme it was welcomed by the residents in the area.

DECISION

AGREED to:-

- (a) confirm the proposed Romannobridge Flood Protection Scheme 2020; and**
- (b) authorise the Service Director Assets & Infrastructure to commence with the construction stages of the project**

11. UNITED KINGDOM (SYRIAN) VULNERABLE PERSONS RESETTLEMENT SCHEME

There had been circulated copies of a report by the Chief Social Work and Public Protection Officer providing an update on the Council's participation in the United Kingdom (Syrian) Resettlement Scheme, and Home Office proposals to continue accepting refugees under a new Resettlement Scheme commencing in 2020/21. The report explained that up to February 2020 the Scottish Borders received 9 Syrian families. It should be noted that this was a long term (60 month) commitment from the date of arrival. After 60 months, an application would be made for settled status. The agreed pro-rata distribution of Syrian refugees (New Scots) arriving under this Scheme had meant that Scottish Borders Council made an original commitment to receive 10 families. It was anticipated that this number would be reached during 2020/21. The availability of suitable housing to match families into was the main challenge and regulated arrivals. Registered Social Landlords had been supportive throughout the process. On 17 June 2019 and again on 20 December 2019, the Home Office wrote to Local Authorities advising that a new Resettlement Scheme was to be established broadening the geographical focus beyond the Middle East and North Africa region. This was followed by a request from COSLA that Councils should state whether they would continue to support the Scheme under the revised arrangements and provide a sense of scale of that commitment. In addition to normal state benefits, the Home Office provided funding for each refugee (£20,520) over the 60 months they were registered on the Scheme. This was to support integration and language development. Costs could vary depending upon the composition of families and their individual needs. The children of refugees born in the United Kingdom did not qualify for this funding. The Home Office had only confirmed that existing funding would be maintained for those refugees entering during the first year of the new Scheme across the 60 months, commencing in 2020/21. While exact numbers were not yet known, it was expected that circa 5,000 refugees would be allocated across the United Kingdom in that initial year. This was in addition to the 20,000 who had entered under the existing Scheme. The basis of recommendation was that an additional 10 families was considered necessary to ensure the Scheme remained economically viable in that there was no additional cost incurred by Scottish Borders Council. Following the Covid-19 restrictions, the Scheme had been temporarily suspended and was expected to resume once travel and associated quarantine controls were lifted. Members welcomed the Council's continued involvement in this Scheme and commented on the success of the project to date.

DECISION

AGREED to:-

- (a) note the progress regarding the original commitment to take 10 families; and**
- (b) continue to engage in the Resettlement Scheme with a view to taking an additional 10 families subject to appropriate Home Office funding and local resourcing.**

MEMBER

Councillor Cochrane left the meeting during consideration of the following item.

12. SPACES FOR PEOPLE FUND SUSTRANS FULLY FUNDED ACTIVE TRAVEL PROGRAMME

There had been circulated copies of a report by the Service Director Assets & Infrastructure proposing, as part of the fully funded Spaces for People programme, the roll out of an experimental trial of 20mph schemes in 80 settlements where the existing speed limit was 30mph. The report explained that the Council had successfully bid for £1,200,000 from the Scottish Government's £30,000,000 Covid-19 related Spaces for People fund which was a, 'temporary infrastructure programme in Scotland which offers funding and support to make it safer for people who choose to walk, cycle or wheel for essential trips and exercise during Covid-19' administered by Sustrans. A number of temporary measures were planned using Temporary Traffic Regulation Orders, such as temporarily reducing speed limits to 40mph on selected national speed limit roads; reviewing a number of town centres to improve cycling opportunities; temporary closure of certain roads; and the most significant measure being the proposal to change all Council adopted 30mph roads to 20mph as a trial for a temporary period of up to 18 months. Officers had identified a total of 80 settlements, as listed in Appendix 1 to the report, with Council adopted roads with existing 30mph speed limits and the proposal was to convert all of these to 20mph for a trial period of up to 18 months. At the time of writing the report this had been with the exception of Trunk Roads as Transport Scotland had been carrying out its own research into the introduction of 20mph schemes on trunk routes. However, it was noted that Transport Scotland had now indicated their willingness to become involved. During the trial period, the Council would invite further comment and feedback from Elected Members, the public, and other partners such as Police Scotland, Borders Buses, Community Councils, Access Groups, etc. To gauge driver compliance with the 20mph pilot it was the intention to appoint Edinburgh Napier University's Transport Research Department to carry out an independent, rigorous, academic evaluation of the pilot scheme, ensuring a consistent and impartial approach to the evaluation. The trial would be rolled out in a systematic manner with an incremental approach to the implementation of traffic calming measures; initially baseline data would be collected and signing erected, followed by post survey data collection and analysis and then, where necessary, the introduction of traffic calming interventions, followed by further surveys and analysis. All surveys and traffic calming would be carried out as part of the pilot and funded by the programme. A further report would be brought back to Council 12 months from the commencement of the pilot with suggestions on which, if any, schemes were to be retained and which to be removed. The remainder of the trial would be used to implement any permanent changes. Ms. Gilhooly, Team Leader – Policy/Road User Management, was present at the meeting and answered Members' questions. Members generally welcomed the proposals but Councillor Bell suggested an amendment to the recommendation.

VOTE

Councillor Edgar, seconded by Councillor Tatler, moved the recommendation as set out in the report.

Councillor Bell, seconded by Councillor H. Anderson, moved as an amendment that the recommendation be reworded to read "agree to implement the fully funded Spaces for People programme, and agrees to the experimental trial of 20mph schemes of signage and appropriate infrastructure in up to 80 settlements; on the understanding that some settlements may specifically benefit from infrastructure over and above signage. Periodic reports to members will be submitted on progress of the programme, in addition to those to the full Council."

Members voted as follows:-

<i>Motion</i>	-	<i>21 votes</i>
<i>Amendment</i>	-	<i>9 votes</i>

The Motion was accordingly carried.

DECISION

DECIDED that, as part of the fully funded Spaces for People programme, the Council implement the experimental trial of 20mph schemes in 80 settlements, as detailed in the report.

ADJOURNMENT

The Convener adjourned the meeting at 1.40 p.m. for lunch and reconvened at 2.10 p.m.

13. UPDATE ON THE PUBLIC PLAY FACILITIES STRATEGY

With reference to paragraph 7 of the Minute of 19 December 2020, there had been circulated copies of a report by the Service Director Assets & Infrastructure setting out the process and outcomes of engagement with Ward Members on proposals for the decommissioning of some play equipment in some play parks within the Scottish Borders as previously agreed. The report explained that the strategic review of Play facilities was integral to the planned future investment in Outdoor Community Spaces including Public Play parks, agreed as part of the 2018/19 Capital Investment Plan and updated within the Capital Investment Plan 2019-20 and 2020/21. The current 2020/21 capital budget included funding of £4.809m into Outdoor Community Spaces over a 10-year period. This investment aimed to unlock community aspirations in this area creating high quality destination play parks, as well as facilities for skating and small wheels, youth shelters and opportunities for people of all ages to take part in physical activity. Investment in these destination play parks had already completed in Galashiels (2018), Harestanes (2019), Selkirk (2016), Hawick (2017), Coldstream (2019) and Kelso (2019), with Peebles currently being procured and expected to be delivered in 2020. This new investment created a financial revenue burden and, in order to ensure a cost neutral impact of the investment to the Council, a programme of decommissioning of aged and underutilised play equipment was required. It was agreed in May 2018 to review the distribution of play equipment provision across play parks in the Borders, to firstly inform decision making around future investment in communities, and secondly, guide the rationalisation of play facilities which were deemed no longer fit for purpose, ensuring a cost neutral impact on established budgets. This review resulted in proposals to decommission equipment in 74 play parks, based on assessment criteria that included location and context, play value (quality) and usage – thereby ensuring cost neutrality and the continuity of maintenance and investment across the remaining play parks. Officers consulted on these proposals at the five Area Partnerships, with a period of public consultation inviting people's comment on the proposals, which ended on 19 August 2019. Two petitions were received opposing these proposals in Kelso and Hawick respectively, which were both heard at the Audit & Scrutiny Committee on 24 October 2019. The Committee decided to recommend to Council the following:

“that Scottish Borders Council re-assesses its original decision made on 31 May 2018 in relation to the capital programme 18/19 and investment in play areas and outdoor community spaces to ‘delegate authority to the Service Director Assets and Infrastructure, after consultation with local Members, the Chief Financial Officer and the Chief Legal Officer, to declare play parks obsolete or those surplus to requirements and arrange for the removal of equipment and disposal, if appropriate. The Service Director should be requested to prepare a fully costed report on options for future and existing play park provision for consideration at the next meeting of Council.”

Following a subsequent Members' Sounding Board meeting to agree a way forward, this was then taken to Scottish Borders Council on 19th December 2019, where it was agreed to;

‘undertake a series of meetings, on a Ward by Ward basis, with all Members of that Ward, with detailed proposals indicating which play equipment is intended to be removed and which will be retained as part of a future programme of planned investment and upgrades’ and ‘following these meetings, the Service Director Assets & Infrastructure brings a further report initially to the Members Sounding Board on the way forward for play parks.’

These meetings had now been held and the recommendations for the 74 play parks, following those discussions with Members were detailed in the report. Councillor McAteer

proposed an amendment to the recommendations on the basis that he felt that there were still a number of issues to resolve before he could agree to the proposed closures in his Ward.

Vote

Councillor Aitchison, seconded by Councillor Edgar, moved approval of the recommendations as set out in the report.

Councillor McAteer, seconded by Councillor Marshall, moved as an amendment that recommendation 2(b) (iii) be reworded to read “that the 2 playparks in the Hawick and Hermitage Ward at Leaburn Drive and Green Terrace be retained.”

Members voted as follows:-

Motion - 25 votes
Amendment - 5 votes

The Motion was accordingly carried.

DECISION

DECIDED:-

- (a) to note the outcome of the Ward meetings requested by the Sounding Board;**
- (b) the following;**
 - (i) 18 play parks, as detailed in the Appendix to the report, would be retained as agreed at the Ward meetings, and would now be opened at the earliest opportunity;**
 - (ii) 54 play parks, as detailed in the Appendix to the report, would be decommissioned as agreed at the Ward meetings; and**
 - (iii) 2 playparks would be decommissioned in the Hawick and Hermitage Ward (Leaburn Drive & Green Terrace) noting that Ward Members were unable to agree to the proposal.**

14. EYEMOUTH PRIMARY SCHOOL – NEXT STAGES

There had been circulated copies of a joint report by the Service Director for Young People Engagement & Inclusion and Service Director Assets and Infrastructure, seeking approval to undertake an options appraisal and detailed feasibility study regarding the replacement of Eyemouth Primary School and Early Learning and Childcare provision as part of the Council’s Learning Estate. The report explained that in April 2019 approval was given to carry out detailed costing and design work for the construction of a new Primary, Early Learning and Childcare (ELC) setting and Community Campus on the site of the former High School in Eyemouth. However, since that date cost pressures regarding delivery of the project had arisen, along with local community opposition to some elements of the proposal. It was therefore proposed to undertake a detailed feasibility of all of the options potentially available to replace the primary school, including the consideration of campus or hybrid models, alongside the option that was currently under development. A further report would be brought to Council once this further community consultation was undertaken. The local Members welcomed this proposal.

DECISION

AGREED:-

- (a) the carrying out a detailed feasibility study to consider the following options:-**

- (i) continue with the planned ELC and Primary School Community Campus on the former Eyemouth High School site;
- (ii) creation of a 3-18 Campus located at the current Eyemouth High School; and
- (iii) creation of a 2 Campus model within Eyemouth comprising ELC, Primary 1-4 and community facilities, as a direct replacement to the current Primary School and a Senior Campus located at the current Eyemouth High School, comprising P5-7 and Secondary pupils.

(b) to note that a further report would be brought back to Council in December 2020.

15. **SEX ENTERTAINMENT VENUES LICENSING**

There had been circulated copies of a report by the Executive Director, Finance and Regulatory, advising and updating Council on changes to legislation which introduced a discretionary licensing scheme for sexual entertainment venues in Scotland and to seek to commence the first part of a possible two-stage public consultation. The outcome of this would inform a decision on whether to adopt a Resolution to licence sexual entertainment venues in the Scottish Borders. The report explained that the Air Weapons and Licensing (Scotland) Act 2015 introduced a discretionary power for Local Authorities in Scotland to decide if they wished to licence sexual entertainment venues (“SEVs”) within their individual areas. If Council decided to licence this activity any person wishing to operate a SEV within the Scottish Borders would require to apply for a licence. If Council did not decide to licence the activity, any person could operate a SEV without any regulation from the Local Authority. If Council considered it should explore the option of licensing SEVs, it must firstly carry out a public consultation on whether it was considered necessary to licence this type of activity. If, following an initial consultation, it was felt that Council should decide to licence it, then it would proceed by adopting a Resolution to do so. It would then need to produce a SEV Policy and a further public consultation would be required on the content of that Policy. Councillor Greenwell and Councillor Thornton-Nicol as Members of the Civic Government Licensing Committee emphasised the importance of having such licensing in place.

DECISION

AGREED to instruct the Executive Director, Finance and Regulatory, to conduct a stage 1 public consultation on whether the Council should resolve to licence SEVs and to thereafter report back to Council on those findings before determining whether to adopt a Resolution.

16. **APPOINTMENTS**

It was noted that appointments were required to the following:-

- (a) Wellbeing and Safety Champion; and
- (b) Tweedbank Community Centre Management Committee.

Councillor Bell, seconded by Councillor H Anderson, moved that Councillor Andy Anderson be appointed as Wellbeing and Safety Champion and that Councillor Parker be appointed to the Tweedbank Community Centre Management Committee. These appointments were unanimously approved.

DECISION

AGREED the following appointments:-

- (a) Wellbeing and Safety Champion – Councillor Andy Anderson

(b) Tweedbank Community Centre Management Committee – Councillor Parker

17. MOTION BY COUNCILLOR HASLAM

Councillor Haslam, seconded by Councillor Edgar, moved the Motion as appended to the agenda in the following terms:-

“That Scottish Borders Council:

- (1) approves the following changes in title and responsibilities of the undernoted level “A” Senior Councillor Roles (in compliance with the Local Governance (Scotland) Act 2004 (Remuneration) Regulations 2007):

	New Position	Responsibilities	Proposed Appointment
a	Wellbeing, Sport and Culture <i>(replaces Culture & Sport)</i>	<ul style="list-style-type: none"> • Partnership working culture and sport • Relationship development • Promotion of sport and cultural heritage nationally • Reducing inequalities and access to culture and sport 	Councillor E. Jardine
b	Enhancing the Built Environment and Natural Heritage <i>(replaces Planning & Environment)</i>	<ul style="list-style-type: none"> • Oversees Local Development Plan • Built environment and natural heritage 	Councillor S. Mountford
c	Community Development and Localities <i>(replaces Neighbourhoods & Locality Services)</i>	<ul style="list-style-type: none"> • Area partnership development and strategy • Community capacity building • Community planning • Community asset transfer and partnership building • Public space maintenance and development • Parks and outdoor spaces 	Councillor R. Tatler
d	Public Protection <i>(replaces Community Safety)</i>	<ul style="list-style-type: none"> • Police, Fire & Rescue services oversight • Youth Justice • Crime prevention • Child/Adult Protection • Safer communities • Community Action Teams 	Councillor G. Turnbull
e	Adult Wellbeing <i>(replaces Adult Social Care)</i>	<ul style="list-style-type: none"> • Adult social care • Health & Social Care integration • SB Cares • Day Services • Homecare • Independent living 	Councillor T. Weatherston

		<ul style="list-style-type: none"> • Developing care fit for the future • Combatting poverty • Tackling homelessness 	
f	Children and Young People	<ul style="list-style-type: none"> • Early years, schools and further education services • Developing our young workforce • Child social work services • Child health and mental health • Statutory inspections • Transition services • CYP equality and diversity promotion 	Councillor C. Hamilton
g	Economic Regeneration and Finance (<i>replaces Finance and Business & Economic Development</i>)	<ul style="list-style-type: none"> • Budget oversight and development • Economic development • Regeneration • Tourism • Inward investment • Strategic housing • Broadband and digital connectivity 	Councillor M. Rowley
h	Transformation and Service Improvement (<i>replaces Transformation & HR</i>)	<ul style="list-style-type: none"> • Transformation programme • Communications • Promoting equalities • Customer services • Improving the Council service delivery and customer engagement 	Councillor S. Hamilton
i	Infrastructure, Travel and Transport (<i>replaces Roads & Infrastructure</i>)	<ul style="list-style-type: none"> • Roads • Strategic planning for roads improvement • Passenger transport • Broadband infrastructure development • Public transport improvement, integration and investment • Winter maintenance • Fleet management • Community recycling 	Councillor G. Edgar
j	Sustainable Development (NEW)	<ul style="list-style-type: none"> • Strategic oversight of sustainable development throughout the Council • Ensure climate change is at the heart of our policy and political thinking • Work across the Executive roles to be a lead in sustainable development • Oversee the delivery of net zero carbon 	Councillor S. Aitchison

		emissions to zero by 2035	
--	--	------------------------------	--

- (2) agrees to the appointment of Members to the above roles (names proposed above);
- (3) agrees that the responsibility for HR rests with the Convener;
- (4) agrees that the Clerk to the Council, in consultation with the Chief Executive, amends the Scheme of Administration accordingly to incorporate these changes;
- (5) notes that the senior allowances paid to the above Councillors are unaffected by these changes to the titles and responsibilities;
- (6) notes that the remaining Councillors detailed in the Scheme of Remuneration are unaffected by these changes.”

Councillor Haslam spoke in support of her Motion. Councillor Bell asked that the role of the Executive Member for Public Protection have the word “oversight” added after “Community Action Team” and this was accepted. The Convener advised that any required amendments to Committee Membership as a result of these changes would be dealt with at the next Council Meeting in September. Councillor Robson, seconded by Councillor Chapman, moved as an amendment that Councillor Miers should retain his current responsibilities until the Local Development Plan work was completed.

Vote

The Convener advised that in terms of Standing Order 43(b) Members were required to email their preference for this appointment to the Clerk to the Council and he adjourned the meeting to allow the vote to be carried out. On return from the adjournment the Convener announced the outcome of the vote as follows:-

*Councillor Mountford - 22 votes
Councillor Miers - 8 votes*

Councillor Mountford was accordingly appointed.

DECISION

DECIDED to approve the Motion by Councillor Haslam as detailed above subject to the addition of the word “oversight” after “Community Action Team” under the role of the Executive Member for Public Protection.

18. MOTION BY COUNCILLOR THORNTON-NICOL

Councillor Thornton-Nicol, seconded by Councillor Edgar, moved the Motion as detailed on the agenda in the following terms:-

“Scottish Borders Council recognises that several areas of the Scottish Borders are being adversely affected by the huge increase in visitors and in uncontrolled overnight camping. The upper Yarrow Valley has been particularly affected with high numbers of overnight campers on The Green, along the shores of St Mary’s Loch and in many parts of the Megget Valley.

Some uncontrolled campers are leaving rubbish and human waste behind, lighting fires which adversely impact on the local environment and ecosystems, parking haphazardly and often dangerously along the roadsides and making a noise late into the night.

The presence of these visitors, without the necessary infrastructure or management approaches in place is having a detrimental impact on the local environment, the local community and local businesses.

Scottish Borders Council commits to continue to work in partnership with the appropriate local Community Councils and Landowners and allocate resources, where practicable and affordable, to help to reduce the negative impact of this huge increase of visitors for the remainder of this year's tourism season.

Recognising that this new pattern is likely to continue in future years, Scottish Borders Council commits to working pro-actively with all local partners, including statutory bodies to put in place and support appropriate long-term measures and approaches to address and manage these issues for future years.

Scottish Borders Council recognises that the Scottish Government has asked people to abide by the Scottish Outdoor Access Code, respect the environment and the destination that they are visiting. However, having the necessary measures and infrastructure in place to manage the huge increase in visitors to the Scottish countryside is vital. SBC calls on the Scottish Government to work in partnership with the rural Local Authorities of Scotland to ensure that this year's challenges offer future benefits and where possible, make resources available to provide financial assistance to put the necessary infrastructure and management arrangements in place."

Councillor Thornton-Nicol spoke in support of her Motion, which was unanimously approved.

DECISION

AGREED to approve the Motion as detailed above.

19. **OPEN QUESTIONS**

No questions had been submitted.

DECISION

NOTED.

20. **REVIEW OF LOCALITY BID FUND, COMMUNITY FUND AND PARTICIPATORY BUDGETING**

With reference to paragraph 8 above consideration of this matter was continued.

Vote

Councillor Haslam, seconded by Councillor Edgar, moved the recommendations as detailed in the report

Councillor H. Scott, seconded by Councillor Aitchison, moved as an amendment that the wording in Recommendation C be replaced with the following:

"Agrees to the changes to the Community Fund highlighted in Section 6 of this report with the following amendments to Para 6.1 sub Para 2 of the report and Appendix 3 to say: include funding for exceptional projects over £30k, capacity building projects, wages, salaries and fees on a short term basis of 1 year and the facilitation of participatory budgeting. Funding can be used for a variety of purposes including the purchase of equipment, small capital works, hire and running costs, maintenance costs. All applications must be community driven, demonstrate sustainability and value for money. These changes to come into effect on 1 September 2020, with a review after one year of operation."

Members voted as follows:-

<i>Motion</i>	-	<i>8 votes</i>
<i>Amendment</i>	-	<i>21 votes</i>

The amendment was accordingly carried.

DECISION

DECIDED:-

- (a) to note the evaluation of versions 1 and 2 of the Localities Bid Fund as detailed in Appendices 1 and 2 and Section 4 of the report;
- (b) to continue to ring fence grants made to Community Councils, Village Halls and Festival Grants within the Community Fund for 2020/21, with payments for Festival Grants only made to cover actual expenditure on public liability and insurance expenditure;
- (c) to the changes to the Community Fund highlighted in Section 6 of the report, and detailed in Appendix 3 as amended above to remove reference to not being a like for like replacement for Council services which had been withdrawn due to efficiencies or Best Value concerns, to come into effect on 1 September 2020, with a review after one year of operation;
- (d) to request that each Area Partnership establish at its next meeting, a mechanism to review the findings of the Scottish Community Development Centre (SCDC) Report on the Community Fund and make recommendations for further public consultation within each locality;
- (e) that proposals were developed for mainstream Participatory Budgeting within core budgets, and that these proposals were considered at part of the wider budget discussions through the financial planning process for 2021/22; and
- (f) to receive a further report from the Service Director Customer & Communities on the outcome of the Area Partnerships findings and the next steps thereafter.

MEMBER

Councillor Marshall left the meeting.

21. PRIVATE BUSINESS

DECISION

AGREED under Section 50A(4) of the Local Government (Scotland) Act 1973 to exclude the public from the meeting during consideration of the business detailed in Appendix I to this Minute on the grounds that it involved the likely disclosure of exempt information as defined in Paragraphs 1, 6, 8 and 9 of Part I of Schedule 7A to the Act.

SUMMARY OF PRIVATE BUSINESS

22. Minute

The private section of the Council Minute of 25 June 2020 was approved.

23. Committee Minutes

The private sections of the Committee Minutes as detailed in paragraph 3 of this Minute were approved.

24. CGI

Members approved a report by the Executive Director, Finance and Regulatory, regarding the strategic partnership with CGI.

Member

Councillor Marshall rejoined the meeting during consideration of the following item.

25. Urgent Business

Under Section 50B(4)(b) of the Local Government (Scotland) Act 1973, the Chairman was of the opinion that the item dealt with in the following paragraphs should be considered at the meeting as a matter of urgency, in view of the need to make an early decision.

26. **Recruitment Process for New Chief Executive**

Members approved a report by the Service Director HR & Communications on the recruitment process for the post of Chief Executive.

27. **Date of Next Meeting**

It was agreed that the next Council meeting currently scheduled for 30 September would now be held on Friday, 25 September 2020.

The meeting concluded at 5.35 p.m.

Scottish Borders Local Police Plan 2020-23**Report by Executive Director, Corporate Improvement and Economy**

SCOTTISH BORDERS COUNCIL**25 September 2020****1 PURPOSE AND SUMMARY**

- 1.1 **The purpose of this report is to gain approval by the Council for the Scottish Borders Local Police Plan 2020-23.**
- 1.2 The Scottish Borders Local Police Plan 2020-23 has been produced by local senior officers from Police Scotland. There is a statutory requirement in terms of section 47 of the Police and Fire Reform (Scotland) Act 2012 for the Local Authority to approve the Local Police Plan.
- 1.3 The Plan links into the outline priorities shaped through engagement by Police Scotland with individuals, communities, and partners across the Scottish Borders local authority area as well as taking cognisance of both national and local strategic analysis. Its key priorities are: protecting the most vulnerable people; reducing violence and antisocial behaviour; reducing acquisitive crime; improving road safety; and tackling serious and organised crime.
- 1.4 The Scottish Borders Local Police Plan 2020-23 was discussed by Scottish Borders Council's Police, Fire & Rescue and Safer Communities Board at its meeting on Friday 28 August 2020. It was agreed to recommend to Council the approval of the Plan. The Plan will provide the basis for the scrutiny on the performance of the operation of the local Police service by the Scottish Borders Police, Fire and Rescue and Safer Communities Board.

2 RECOMMENDATIONS

- 2.1 **It is recommended that the Council agrees the Scottish Borders Local Police Plan 2020-23 as set out in Appendix 1.**

3 Background

- 3.1 The Scottish Borders Local Police Plan 2020-23 sets out the policing priorities and objectives for the Scottish Borders. There is a statutory requirement in terms of section 47 of the Police and Fire Reform (Scotland) Act 2012 for the Council to approve the Local Police Plan.
- 3.2 The Plan will provide the basis for the scrutiny on the performance of the operation of the Police service by the Scottish Borders Police, Fire and Rescue and Safer Communities Board.
- 3.3 The Scottish Borders Local Police Plan 2020-23 aims to outline priorities shaped through engagement with individuals, communities, and partners across the Scottish Borders local authority area as well as taking cognisance of both national and local strategic analysis. This will ensure that the divisional policing team work collectively with the Council and partners to address current and emerging trends with the aim to reduce crime through a preventative and collaborative model of policing. The shared outcomes outlined in the Scottish Borders Community Plan (Local Outcome Improvement Plan - LOIP) are reflected in the document.
- 3.4 The key priorities set out in the Scottish Borders Local Police Plan 2013-14 are:
- Protecting the most vulnerable people.
 - Reducing violence and antisocial behaviour.
 - Reducing acquisitive crime.
 - Improving road safety.
 - Tackling serious and organised crime.
- 3.5 Police Scotland have indicated that the Plan is a 'live document' and it will be subject to review, ensuring the plan is updated to reflect the changing needs of local communities.
- 3.6 The Scottish Borders Local Police Plan 2020-23 was discussed by Scottish Borders Council's Police, Fire & Rescue and Safer Communities Board at its meeting on Friday 28 August 2020. It was agreed to recommend to Council the approval of the Plan.

4 IMPLICATIONS

4.1 Financial

There are no costs to the Council attached to the recommendation contained in this report.

4.2 Risk and Mitigations

There are no direct risks and associated mitigation actions associated with this report. If the Council does not approve the plan then the Police, Fire and Rescue and Safer Communities Board will be unable to undertake its scrutiny function as required under the Police and Fire Reform (Scotland) Act 2012.

4.3 Integrated Impact Assessment

There is a section in the Plan on Equalities, Diversity and Ethics. The priorities contained in this Plan should strengthen equalities and diversity across the Scottish Borders.

4.4 Acting Sustainably

This is a plan from an external organisation.

4.5 **Carbon Management**

This is a plan from an external organisation.

4.6 **Rural Proofing**

The Plan has taken account of the rural context of the Scottish Borders.

4.7 **Changes to Scheme of Administration or Scheme of Delegation**

There will be no changes required to either the Scheme of Administration or the Scheme of Delegation as a result of the proposals set out in this report.

5 **CONSULTATION**

5.1 The Chief Financial Officer, the Monitoring Officer, the Chief Legal Officer, the Chief Officer Audit and Risk, the Service Director HR and the Clerk to the Council have been consulted and any comments received have been incorporated into the final report.

5.2 The Corporate Management Team have been consulted and any comments received have been incorporated into the final report.

Approved by

Executive Director, Corporate Improvement and Economy

Foreword

As Divisional Commander, I am pleased to present the 2020 - 2023 Local Police Plan for the Scottish Borders local authority area of the Lothians & Scottish Borders Policing Division.

The Police and Fire Reform (Scotland) Act 2012 sets out the statutory framework for Police Scotland, with the mission of policing being to improve the safety and well-being of persons, localities and communities in Scotland. The Act recognises that policing alone cannot achieve this objective and places a responsibility on a collaborative approach with communities, key planning partners and the wider voluntary sector to improve safety and wellbeing.

The office of the Chief Constable has responsibility for the policing of Scotland and the setting of national priorities for policing. These are based on our ongoing assessment of threat and risk, and our knowledge and experience of policing in Scotland.

Through the lens of collaboration, the Local Police Plan aims to outline priorities shaped through engagement with individuals, communities, and partners across the Scottish Borders local authority area as well as taking cognisance of both national and local strategic analysis. This ensures that the divisional policing team work collectively to address current and emerging trends with the aim to reduce crime through a preventative and collaborative model of policing.

In pursuit of this aim, the shared outcomes documented within the Scottish Borders Community Plan (Local Outcome Improvement Plan - LOIP), as per the requirement under the terms of the Community Empowerment (Scotland) Act 2015, are reflected in this document and outline our commitment to a collaborative approach with communities, partners and stakeholders.

Police Scotland and by extension the policing team of the Lothians and Scottish Borders is committed to providing the highest possible service to the Scottish Borders by ensuring local teams, supported by national resource, work to meet the locally identified priorities of our communities. This plan covers the period 2020 – 2023, however it remains a 'live document' and will be subject to review, ensuring the plan is updated to reflect the changing needs of local communities.

Chief Superintendent John McKenzie
Divisional Commander

The Scottish Borders Context

The Lothians & Scottish Borders Division serves around 462,080 people over 2,393 square miles, stretching from Blackridge in West Lothian to Newcastleton in the Scottish Borders, as well as many other towns and villages, located across a diverse mix of urban and rural landscapes.

Your Division

- **2,393mi²**
- **4 Local Authorities**
- **462,080 Residents**
- **904 Police Officers**
- **69 Police Staff**
- **35 Special Constables**

The Scottish Borders area is 1,827 square miles and is the 4th most rural area in Scotland with 30% of the population living in settlements of below 500 people.

The Scottish Borders area is 1,827 square miles and 4th, out of the 32 Scottish local authorities, in terms of rural land mass. In 2019 the estimated population of the Scottish Borders was 115,270, placing it 18th out of the 32 Scottish local authorities. In addition 30% of the population live in settlements of below 500 people. The two largest towns of Galashiels and Hawick each have a population of circa 14,000. Persons aged 60 and over make up 30.2 per cent of Scottish Borders.

Local police resources are committed to serving the Scottish Borders. Response and community policing are at the heart of

local policing and are supported by School Link Officers and Youth Community Officers who promote early, effective intervention and prevention within local schools and with partner agencies. A Community Planning Police Officer supports the Scottish Borders Community Planning Partnership.

In addition there are currently two Community Action Teams (CAT) funded by the Scottish Borders Council. These teams identify and target local issues around anti-social behaviour, drug supply and wider youth disorder.

The face of policing in Scotland will respond to the new challenges brought about by changing demographics. An example of this challenge is illustrated through the growth of cyber enabled crime across Scotland including within the Scottish Borders, and the disproportionate impact on vulnerable persons.

It is also recognised that the mission of policing has evolved, resulting in a far wider range of activities undertaken by members of the divisional policing team. This includes the continual growth of incidents relating to missing persons, mental health and concerns associated with vulnerability.

With finite resource, which we continually align to the evolving needs and expectations of our communities, we must work creatively with partners in the spirit engendered by the Community Empowerment (Scotland) Act 2015 to ensure our communities across the Scottish Borders receive the service they need and deserve.

How we identified the Local Police Plan priorities

The Lothians & Scottish Borders Policing Division aims to deliver on its purpose of:

‘Working in partnership for the safety and wellbeing of communities in the Lothians & Scottish Borders’

In pursuit of our purpose, the voice of communities, elected representatives, key planning partners and wider voluntary sector is essential to understand the policing needs of the Scottish Borders.

During November and December 2019, a nationwide public survey on the policing issues concerning people, businesses and other organisations in local communities was undertaken. Results were broken down to local authority areas, which has allowed local communities to influence local policing priorities. These priorities sit within the framework set by Police Scotland’s National Policing Priorities, namely:

- **Protecting vulnerable people:** Supporting people considered vulnerable and working with partners to reduce harm.
- **Tackling crime in the digital age:** Building capacity and capability to address the threat from online and cyber related crime.
- **Working with communities:** Engaging with key stakeholders, public and communities to understand needs, build resilience and deliver a collaborative approach.
- **Support for operational policing:** Delivering change that enables our people to deliver an effective and sustainable service.

As well as the on-line survey, face-to-face engagement was undertaken during our regular cycles of community meetings, including interaction with community councils, elected members, local businesses, local schools, local authorities, statutory and third sector partners. The aim was to ensure a wide-ranging and diverse demographic had the opportunity to engage and represent the voice of the local community.

The Lothians & Scottish Borders received the largest number of public responses of any policing division in Scotland which evidences the strong relationship we have with our communities and the success of the engagement process.

In addition to the public consultation, which identified the needs and priorities of communities across the Scottish Borders, further assessment and analysis has been considered to inform this Local Police Plan.

This included:

- The Joint Strategy for Policing (2020), *Policing for a safe, resilient and protected Scotland*;
- *Annual Police Plan*;
- Lothians & Scottish Borders Strategic Assessment (2020/23);
- Local Outcome Improvement Plans;
- Locality Improvement Plans.

Page 28
It is of note that the concerns raised by communities in the Scottish Borders, were similar in nature to those raised by communities across East Lothian, Midlothian and West Lothian resulting in a consistent set of priorities across the four local authority areas. The Local Police Plan for the Scottish Borders has identified the following five key priorities:

- 1. Protecting the most vulnerable people.**
- 2. Reducing violence & anti-social behaviour.**
- 3. Reducing acquisitive crime.**
- 4. Improving road safety.**
- 5. Tackling serious & organised crime.**

Although consistent priorities have been identified across the four local authorities in the Lothians and Scottish Borders Division, this does not automatically equate to the same policing response and activity being adopted in the Scottish Borders.

Pages 9 to 13 will highlight both the divisional wide and Scottish Borders local activity planned in pursuance of each Local Policing Priority, whilst aligning them to the [Scottish Government Strategic Policing Priorities](#) and [Police Scotland's Strategic Outcomes](#).

The content marked as 'Divisional Activity', shows the consistent action taken across the Lothians and Scottish Borders division whilst the local Scottish Borders section demonstrates bespoke actions relevant to that area. This approach represents localism, whilst promoting both internal and external discussion with regards to how different areas may be tackling similar problems, thus allowing for the sharing of best practice and learning.

It is important to recognise that this plan is a 'living document' and will be amended in line with emerging trends and issues at national, regional and local levels.

Finally, Police Scotland's overarching strategic outcomes are inclusive of your local policing priorities, which describe the difference we aim to make to the lives of people across Scotland.

Your local policing priorities across THE SCOTTISH BORDERS

Our vision
Policing for a safe, protected and resilient Scotland

Our values
Fairness, Integrity, Respect, Human Rights

Our purpose
Working in partnership for the safety and wellbeing of communities in the Lothians & Scottish Borders

Protecting the most vulnerable people

Protect vulnerable people to prevent abuse, neglect & exploitation.
Implement a delivery model supporting a Violence Against Women & Girls Prevention Strategy.
Implement the National Missing Persons Framework for Scotland.
Proactively target domestic abuse offenders.
Develop partnership approaches to improve public confidence to report incidents of harm & abuse.

Reducing violence & anti-social behaviour

Work collaboratively to identify and target violent offenders.
Increase awareness of the impact of violence & antisocial behaviour.
Work in partnerships to reduce alcohol related criminality.
Collaborate to capture the under reporting of violence & explore preventative approaches (i.e. Navigator).
Develop night time economy plans with licensed premises & promote participation in 'Best Bar None'.

Reducing acquisitive crime

Focus on domestic housebreaking.
Raise awareness of current crime trends & prevention tactics.
Tackle emerging acquisitive crime patterns to identify & target prolific offenders.
Work to prevent acquisitive crime.
In partnership, maximise support for victims of acquisitive crime.
Work with Scottish Partnership Against Rural Crime (SPARC).
Use Police Scotland Youth Volunteers to deliver crime prevention information.

Improving road safety

Collaborate on the engineering of the roads through our communities to improve road safety.
Detect offenders who disregard road traffic laws & endanger others.
Support partnership driver education programmes.
Raise awareness of the consequences of speeding, not wearing a seat belt, drink or drug driving & using a mobile phone while driving.

Tackling serious & organised crime

Work to divert people from becoming involved in serious & organised crime & using its products (drugs, counterfeit good etc).
Use social media to raise awareness and educate about human trafficking.
Work to prosecute those involved in serious organised crime, including online, 'cuckooing' & 'county lines'.
Maximise the disruption of serious organised crime groups.
Target the production, cultivation & supply of illegal drugs.

Police Scotland Strategic outcomes

- Threats to public safety and wellbeing are resolved by a proactive and responsive police service
- The needs of local communities are addressed through effective service delivery
- Public, communities and partners are engaged, involved and have confidence in policing
- Our people are supported through a positive working environment, enabling them to serve the public
- Police Scotland is sustainable, adaptable and prepared for future challenges

OFFICIAL

Across **THE LOTHIAN** AND **SCOTTISH BORDERS** we will:

- Protect people considered vulnerable and prevent all forms of abuse, neglect and exploitation including domestic abuse, child sexual abuse and exploitation, rape and sexual crime, human trafficking and online abuse;
- Implement a delivery model supporting a Violence Against Women and Girls Prevention Strategy across the four local authority areas;
- Implement the National Missing Persons Framework for Scotland across the four local authority areas, with a particular focus on maximising the safety of children missing from local authority care;
- Proactively identify and target offenders utilising an intelligence-led approach to prevent offending, including bail checks and execution of warrants relating to violent and domestic abuse offenders;
- Develop partnership approaches, including third party reporting systems, to engage and involve our vulnerable communities to ensure they have the confidence to report incidents of harm and abuse.

In the **SCOTTISH BORDERS**:

- With partners, deliver a space' pilot to provide safety for those in distress, whether through a mental health crisis or intoxication.
- Continue to work with Scottish Borders Alcohol and Drug Partnership to ensure effective and appropriate prescribing practices.
- Deliver, in partnership with the Scottish Government, NHS, SAS, Penumbra and Support in Mind, Distress Brief Intervention (DBI), which provides problem solving contact with an individual in distress.

Across **THE LOTHIAN AND SCOTTISH BORDERS** we will:

- Work collaboratively to identify and target violent offenders, utilising all appropriate tactical options to prevent offending, including pro-active bail checks and executing warrants relating to violent offenders;
- Engage, support and work with partners and community groups to increase awareness regarding the impact of violence and anti-social behaviour;
- Through a partnership approach, understand the relationship between violence and alcohol in both private and domestic environments to ultimately implement plans to reduce alcohol related criminality;
- Collaborate with NHS Lothian and NHS Borders to capture under reporting of violence and explore preventative approaches such as the 'Navigator' programme;
- Work closely with licensed premises to develop night time economy plans and promote participation in 'Best Bar None'.

In the **SCOTTISH BORDERS**:

- Targeted use of the funded Scottish Borders Community Action Teams to hotspot areas, as identified through partnership meetings and analysis of information.
- Support Live Borders in the delivery of 'Borders Blue Zone' with the aim of providing youths with health beneficial and peer engagement activities.
- Work with Scottish Borders Council Anti-Social Behaviour Unit to identify those involved in ASB and work collaboratively to implement preventative measures.

Across **THE LOTHIAN AND SCOTTISH BORDERS** we will:

- Focus on domestic housebreaking and consider appropriate tactical options with regards to prevention, intelligence and enforcement;
- Collaborate with partners, communities and wide-ranging media outlets to raise awareness of current crime trends and effective prevention tactics;
- Enhance intelligence, utilise national specialist resources and work closely with neighbouring police forces to identify emerging acquisitive crime patterns to identify and target prolific offenders;
- Ensure best practice is shared and utilised to prevent and investigate domestic housebreaking, doorstep crime, cyber enabled crime and other acquisitive crime;
- Work in partnership to support victims of domestic housebreaking, doorstep crime, cyber enabled crime and other acquisitive crime;
- Work in partnership with the Scottish Partnership Against Rural Crime (SPARC) to tackle all forms of rural crime;
- Use of Police Scotland Youth Volunteers to deliver crime prevention packs/literature/advice to areas/groups being targeted by those committing acquisitive crime.

In the **SCOTTISH BORDERS**:

- Through the acquisitive crime board, understand and tackle the prevalence of cross-border offenders.
- Promote and increase subscribers to the 'SB Alert System', raise awareness and inform borders residents of ongoing acquisitive crimes.
- In partnership with Scottish Borders Council support vulnerable victims of bogus caller crime through the provision of follow up visits and phone call blockers.

**Community
Plan Theme:**
Our Quality of
Life and Our
Place

Scottish Government strategic police priorities – crime and security; confidence; partnerships.
Police Scotland national policing priorities – protect vulnerable people; working with communities.

Across **THE LOTHIAN** AND **SCOTTISH BORDERS** we will:

- Collaborate with partners on the engineering of the roads through our communities, particularly to identify prominent crash locations and support improvements in road safety;
- Work with communities to detect those who disregard road traffic legislation and endanger the safety of others;
- Support the partnership driver education programmes which raise awareness of associated risks and support good driving behaviour, particularly for young people;
- Raise awareness across our communities of the potentially fatal consequences of speeding, not wearing a seat belt, driving under the influence of drink or drugs and using a mobile phone while driving.

In the **SCOTTISH BORDERS**:

- Work in partnership with the 'Drivewise' programme to improve driving standards in key vulnerable groups.
- Work with partners to assist develop a strategy for severe weather issues, particularly wind, on the A1.
- Through licensing partners, media messaging and enforcement, target disproportionate number of drink-drivers in the Scottish Borders.
- Engage with motorcycle organisations to promote road safety.
- Work with partners including the Scottish Borders Council and Police Scotland Road Policing to implement Operation Close Pass to promote the safe use of shared road space.

Across **THE LOTHIANS AND SCOTTISH BORDERS** we will:

- Work in partnership (schools, colleges, prisons) to divert people/local communities from becoming involved in serious and organised crime and using its products (drugs, counterfeit goods, etc.);
- Work with partners and effectively use social media to educate people about human trafficking, its impacts and how it can manifest in our communities through provision of cheap goods, services and labour;
- Enhance intelligence-led approach to identify, detect and prosecute those involved in serious organised crime, including online, 'cuckooing' and 'county lines';
- Improve information sharing and use of legislation to maximise disruption of serious organised crime groups;
- Target those involved in the production, cultivation and supply of illegal drugs.

In the **SCOTTISH BORDERS**:

- Deliver cuckooing and county lines awareness sessions to partner agencies, to educate, and encourage information sharing.
- Increase intelligence gathering through direct links to neighbouring force's (Cumbria/Northumbria) partnership boards and to target those committing crime in the Scottish Borders.
- Continue to work closely with partner agencies to identify and protect vulnerable and exploited workers from organised crime groups, ensuring all legislative opportunities are explored.

Community Plan Theme:

Our Quality of Life and Our Health, Care and Wellbeing

Performance and Accountability

The Police Scotland Performance Framework links to both local and national police plans, enabling monitoring and measurement of progress on our priorities for policing and strategic outcomes.

Key to delivering excellence in service provision is working collaboratively to support Community Planning Partnerships and upholding the principles of the Community Empowerment (Scotland) Act 2015.

Our Local Police Plan reflects the priorities that local communities, businesses and organisations have told us matter most to them. We will continue to work with our communities and partners to listen to concerns and ensure we respond effectively to emerging issues.

An overview of local and divisional performance against our strategic outcomes and local priorities is provided by the Divisional Commander and the Local Area Commander at the Scottish Borders' Police, Fire & Rescue and Safer Community Board. This quarterly meeting is in terms of Section 45 of the Police and Fire Reform (Scotland) Act 2012.

The Local Area Commander regularly liaises with, and provides updates to, the community and elected representatives at various fora. To complement this Community Policing Officers provide local policing ward updates to community councils and residents' groups.

**Police, Fire &
Rescue and
Safer
Community
Board**

Equality, Diversity and Ethics

Our work is underpinned by our commitment to equality and diversity, both in our dealings with the public we serve and our own staff. We promote the core policing values of human rights, integrity, fairness, and respect within our organisation and the communities we police.

We recognise that effective consent-based policing must reflect the needs and expectations of the individuals and local communities we serve.

Our aim is to ensure that our service is fair, consistent and transparent and that we focus on our key objective of protecting the most vulnerable in our society.

The Code of Ethics for policing in Scotland sets out the standards of behaviour expected of all staff. It encapsulates Police Scotland's core values and statutory obligations under the Police and Fire Reform (Scotland) Act 2012. The Code sets out both what the public can expect from us and what we should expect from each other.

The [Scottish Police Authority \(SPA\) Equality Outcomes \(2017/21\)](#) sets out their commitment to not only comply with equality legislation, but to ensure that the implementation of their equality actions positively contributes to a fairer society through advancing equality and good relations in all that we do.

Dial 999 for an emergency that requires urgent police attention.

For non-emergencies contact the 24-hour non-emergency contact centre on 101.

If you have information about a crime in your area and wish to provide it anonymously, call Crimestoppers charity on 0800 555 111 or visit <https://crimestoppers-uk.org>.

If you have any concerns or issues you wish to discuss, you can contact your local Community Policing Team by phoning 101.

For more detailed information about your local community policing team and other services that Police Scotland provides, please refer to the force website at www.scotland.police.uk

If you would like this information in an alternative format or language, please phone us on 101 to discuss your needs.

Service users who are deaf or have a hearing impairment can contact Police Scotland via Next Generation Text (NGT) on 18001, 101 for non-emergency, or 18000 in an emergency. Further contact details are shown on page 15.

We are here to help.

SCOTTISH BORDERS COUNCIL – 25 SEPTEMBER 2020

STARRED ITEM FROM COMMITTEE MINUTES

POLICE, FIRE & RESCUE AND SAFER COMMUNITIES BOARD – 28 AUGUST 2020

4. PROGRESS REPORTS/UPDATES ON SERVICE MATTERS - POLICE SCOTLAND

4.1 Chief Superintendent McKenzie began his report by referring to the impact of Covid-19 and the changes to the police response service as a result. An approach to non-attendance involving partners had been implemented at the end of March as part of Police Scotland's Contact Assessment Model. This had reduced calls to the front line by 20-25%. The mental health pathway had also been implemented over the past week, redirecting calls to ensure the public received the assistance they required. Chief Superintendent McKenzie further advised that this year's performance figures would not be comparable to previous years, for example the 62% rise in anti-social behaviour related to Covid-19 activity (people not wearing masks, group gatherings). In addition, domestic abuse in March had reduced within the Scottish Borders, which had also been reflected nationally. However, over the last few weeks incidents had risen and were comparable to the number of incidents reported during festive periods. Domestic abuse remained a police priority and perpetrators continued to be pursued, with appropriate support given to domestic abuse victims. Chief Superintendent McKenzie went on to advise that another challenge, during the period, had been inclement weather conditions resulting in damage to the road transport network, particularly the A68. Additional patrols and deployment of mobile camera units supported local communities affected by the diversion. Chief Superintendent McKenzie then referred to the Chief Constable's Pledge which related to criminality perpetrated to emergency service workers. Within Scottish Borders there had been 19 assaults on emergency workers, three of which were against NHS staff. The Pledge had been supported by the Scottish Government and he asked that the Board consider supporting the Pledge. With regard to 101 calls, he acknowledged that there had been on occasions some challenges regarding achieving the 'call answer' timescale, however significant work has been undertaken regarding increasing routes of accessibility such as online reporting. The Covid-19 factor has contributed through public seeking advice and guidance and utilising the 101 route in an effort to secure such guidance. Chief Superintendent McKenzie concluded his report by advising that the consultation on Coldstream Police Station had been delayed and would be undertaken once the Coldstream Community Council had been elected. In response to a questions, Chief Superintendent McKenzie advised that the Pledge had been widely supported with the issue of legislation part of ongoing discussions. With regard to speeding in Greenlaw, he would discuss the matter raised by Councillor Moffat out-with the meeting.

4.2 Chief Inspector Stuart Reid then explained that in Quarter 2019/20, there had been a reduction in crimes of violence, serious assaults, house break-ins, traffic casualties and anti-social behaviour incidents. There had been circulated copies of the Quarter 1 (2020/2021) performance report. The report showed there had been a reduction of 19% in crimes and offences, with reductions in common assault, crimes of dishonesty, road casualties and missing people. There had been rises in incidents of sexual crime, anti-social behaviour (majority Covid-19 incidents), crimes of violence, cruelty to children and serious assaults,

details of which were included within the report. Referring to the work of the Community Action Team (CAT), he advised that parents were now sent a letter highlighting their child's involvement in any anti-social behaviour incidents. The CAT had also carried out road checks, drug searches and issued parking tickets during the period.

4.3 Board members then raised a number of questions which were answered by officers. With regard to the substantial amount of cannabis detected in Hawick, the premises involved were private lets and the offence linked to serious organised crime on a national scale. With regard to anti-social behaviour by motorcycles at Moneynut Forest, near Duns, the issue would be raised with Sergeant Rourke to ensure more patrols visited the area. The speed of motorcyclists on the Kelso to Cornhill route would be reported to the local Roads Policing Team for a prevention plan to be implemented. With regard to vandalism, it was explained that it was caused primarily by youths, with alcohol being a factor. With regard to County lines crime, cuckooing had been prevalent in the Eyemouth area and a number of successful operations had taken place with a recent arrest made the previous week. With regard to the 25% rape detection rate this was as a result of a delay in forensic results because of the pandemic.

4.4 Chief Superintendent McKenzie then discussed The Lothian and Scottish Borders Local Police Plan 2020 – 23 and The Scottish Borders Local Police Plan 2020 – 23. Both Plans were 'live' Plans, copies of which had been circulated for comment. He explained that the Scottish Borders Local Police Plan reflected the local areas' priorities, outlining specific activities, objectives and partnership work to achieve these aims. The five priorities identified within the Scottish Borders were:- Protecting the most vulnerable people; Reducing violence and anti-social behaviour; Reducing acquisitive crime; Improving road safety; and, Tackling serious and organised crime. In response to questions, Chief Superintendent McKenzie explained that Special Police Constables were valuable within local communities. Unfortunately, numbers had depleted over the years with recruitment continuing to be challenging. In terms of organised criminality in relation to wildlife crime, there were a number of areas not included in the Plan, which would be tackled as part of ongoing operational policing.

DECISION

* (a) **AGREED TO RECOMMEND TO COUNCIL approval of the Scottish Borders Local Police Plan 2020 - 2023.**

(b) **AGREED to request the Chair bring a Motion to Council in support of the Pledge.**

MAKING OFFICES COVID SAFE

Joint Report by the Executive Director Corporate Improvement & Economy and the Service Director HR & Communications

SCOTTISH BORDERS COUNCIL

25 September 2020

1 PURPOSE OF THE REPORT

1.1 This paper advises members on plans to:

- Support home-working as the safest way of working for office staff for the foreseeable future and long-term for those who want to formalise the option.
- Create COVID-safe office spaces and associated arrangements to provide an alternative for staff who are unable to sustain homeworking on an ongoing basis and enable staff to use offices as touch-down spaces where this is helpful in undertaking their work.

2. SUMMARY

2.1 Since the start of lockdown in March this year, the vast majority of former office-based staff have worked effectively and productively from home and maintained the provision of services. The support from staff in adapting, readily and suddenly to this way of working has been invaluable and deserves great credit.

2.2 These informal arrangements have been in place, gradually evolving, for a period of 6 months. With the pandemic continuing and the prospect of a second wave developing, it is expected that these arrangements will remain in place for some considerable time.

2.3 In recognising that staff safety is paramount, that sustaining council services is critical, the absence of a vaccine and that staff are keen to know what their working arrangements will be in the medium to long term, the following arrangements are being put in place:

- Home working, wherever possible, will remain be the predominant way of working for all office-based staff for the foreseeable future and so long as COVID-19 is still present. This applies to officers and elected members and

recognises the need for continuing use of offices by some staff e.g. social care using COVID-safe arrangements.

- COVID-safe flexible office space will be made available through the phased reconfiguration of office accommodation at Council Headquarters, Galashiels Paton St. and Hawick Town Hall. Consideration will be given to developing similar touch-down office space in all localities.
- The intention is to provide a blended approach, providing staff with the ability to access flexible office space when there is a requirement be in offices. This blended approach will also apply where the domestic arrangements of staff do not permit effective home working, where internet connectivity or other circumstances mean that it is not always possible to work from home, or where systems and the need to deal with hard copy documentation require staff to access offices.

In making offices COVID-safe the Corporate Management Team's priority remains keeping staff and the wider public safe whilst being able to sustain the Council's services. At the same time the arrangements build on the lessons learned from the Council's experience since March this year and align with Council's Fit for 2024 longer term strategic aims for the office estate.

3. **RECOMMENDATION**

3.1 **Members are asked to note the arrangements for accommodating home working and creating flexible COVID-safe offices.**

3.2 **Members agree that a further report on the Council estate will be brought to the November Council.**

3 BACKGROUND

- 3.1 Since the start of lockdown in March this year, the vast majority of the Council staff who previously predominantly worked in offices, have worked effectively and productively from home and maintained the provision of the Council's services. The support from staff in adapting, readily and suddenly to this way of working has been invaluable and deserves great credit.
- 3.2 These informal arrangements have been in place, supported by enhanced IT functionality, for a period of 6 months. With the pandemic continuing and the prospect of a second wave developing, it is expected that these arrangements will remain in place for the foreseeable future.
- 3.3 Given this, the longer-term arrangements for home working and use of office space is now a particular focus for the Council's Corporate Management Team with staff understandably keen to know how their working arrangements will operate in the medium to long term.

Four themes have been central to the development of these arrangements:

- First and foremost, the safety of staff, members and the public
- Secondly, the lessons learned from the lockdown experience, in particular feedback from staff surveys
- Thirdly the priority that Council services must be sustained
- Fourthly, the long-term strategic aims for office accommodation developed as part of the Fit for 2024 Programme.

Staff Safety

- 3.4 Our priority remains the safety our staff, elected members and the public. Coronavirus is still present and resurgent and, with no effective vaccine yet available, it is likely to be a threat society will need to live with for a considerable time.
- 3.5 This means that working from home – wherever possible – will, predominantly, be the default position for office-based staff for the foreseeable future. This is consistent with Scottish Government advice as the country remains in Phase 3 of the COVID recovery plan. This approach both protects staff and minimises the risk of larger numbers of staff being absent due to contracting COVID-19 which would inevitably result in the Council facing difficulty in maintaining the services it delivers across the Scottish Borders.
- 3.6 It is recognised however that, for some staff, it will be challenging to sustain home working on a longer-term basis for a number of reasons, including domestic space, internet connectivity, the functionality of IT systems or other circumstances. On this basis, arrangements for a blended approach (homeworking and flexible COVID-safe offices) are being made by reconfiguring Headquarters, Galashiels Paton Street and Hawick Town Hall offices to provide flexible, COVID-safe office space.
- 3.7 This reconfiguring involves reducing the number of desks, increasing circulation space and altering kitchens, toilets and meeting space to allow social distancing,

cleaning and disinfecting. Systems and protocols are also being put in place to enable track-and-trace.

Lessons Learned From Lockdown and Staff Surveys

- 3.8 Lockdown has had a profound and far-reaching impact on our lives, affecting how we work and how we access goods and services. The experience from lockdown shows that office-based staff can work – and *are* working – effectively and productively from home. Regular soundings of service managers show that no service is unable to operate as a result of staff not being able to work from an office. New multi-disciplinary/inter-agency teams (Community Assistance Hubs) have been established on a virtual basis to co-ordinate support for people who were shielding or self-isolating.
- 3.9 Two staff surveys, one in April and another in July, showed that the majority of staff (71%) recognised the positive benefits of home working and that they had adapted well (84%) to changed ways of working. Future arrangements need to build on these positive experiences as well as address the concerns of those staff (34%) who have indicated the need for additional support with their home working arrangements. Feedback indicates the need for assistance setting-up more permanent home working arrangements through the provision of appropriate equipment and those who may still need to access a COVID-safe desk in an office.
- 3.10 It is recognised that, in the case of Social Work some staff have been operating in a COVID-safe way with a blended approach to both home working and office use on limited hours over this period. Consideration will be given to continuation of these arrangements as office space is reconfigured.
- 3.11 For those working at home, policies are being redefined which will aim to offer practical support and address issues raised by staff in the surveys such as furniture, IT, insurance, HMRC relief, training and support and Display Screen Equipment (DSE) assessments.

Fit for 2024

- 3.12 One of the themes of fit for 2024 is *making best use of our properties – including reducing the Council estate*. The arrangements in this paper are consistent with our long-term objectives for increased remote working and flexible office accommodation which is consolidated on three core sites (HQ, Paton St. Galashiels and Hawick Town Hall) and supported by flexible touch-down offices in each locality. There are wider implications in respect of the Council's estate and it is recommended that Members agree that a further report on the Council estate will be brought to the November meeting of Council.

4 HOME WORKING & OFFICE ARRANGEMENTS

Recognising the above, the following arrangements will now be offered to staff when COVID-safe office is available – and on a long-term basis following the end of the pandemic:

- While COVID-19 remains active and restrictions are in place, home-working, wherever possible, will be the predominant way of working for all office-based staff, recognising the need for continuing use of offices by some staff using COVID-safe arrangements. Associated policies have been revised and will be put in place over the coming weeks to provide practical support including Display Screen Equipment (DSE), furniture and equipment, technology, insurance, HMRC relief and training and support.
- Covid-safe flexible office space will be made available through the reconfiguration of office accommodation at HQ, Galashiels Paton St. and Hawick Town Hall. Consideration is being given to similar touch-down office space in localities. This will provide a mixed approach with flexible office space when staff need to be in offices or where staff's domestic space, internet connectivity or other circumstances mean that it is not possible to work from home.

5. IMPLICATIONS

5.1 Financial

The cost of the above arrangements will be met from existing budget provisions.

5.2 Risk and Mitigations

- 5.2.1 Informal home working arrangements have been in place since March this year and have been evolving over the last 6 months. There is a risk that, without formalising these arrangements and providing flexible alternative COVID-safe office space, staff will not have the support needed to sustain productive home working in the longer term.
- 5.2.2 Ongoing engagement will be undertaken through line managers and through surveys of staff to ensure that home working arrangements remain effective and to ensure staff wellbeing.
- 5.2.3 Without these arrangements there is a danger of "drift" back to the offices with associated risks of virus transmission.
- 5.2.4 The Council has a duty of care to its employees to ensure that appropriate Display Screen Equipment (DSE) assessments are completed and any associated risks mitigated.
- 5.2.5 This approach both protects staff and minimises the risk of larger numbers of staff being absent due to contracting COVID-19 which would inevitably result in the Council facing difficulty in maintaining the services it delivers across the Scottish Borders.

5.3 Equalities

Policies to support working arrangements and reconfigure office space are designed to ensure they comply fully with the Council equalities duties.

5.4 Acting Sustainably

The arrangement seeks to ensure that offices provision, in future, is on a more sustainable footing.

5.5 Carbon Management

It is anticipated that reducing the need for travel to and from work and the closure/mothballing of offices which are dormant will, at the very least, offset any domestic impact on our overall carbon footprint.

5.6 Rural Proofing

With our office population dispersed across the borders there may be an attendant benefit for shops and businesses in the localities.

5.7 Changes to Scheme of Administration or Scheme of Delegation

There are no changes to be made to either the Scheme of Administration or the Scheme of Delegation as a result of the proposals contained in this report.

6. CONSULTATION

6.1 The Executive Director Finance and Regulatory Services, the Chief Legal Officer and Monitoring officer, the Chief Officer Audit and Risk, Service Director HR & Communications, the Clerk to the Council and Corporate Communications have been consulted and their comments have been incorporated into this report.

RESPONDING TO THE CLIMATE EMERGENCY

Report by Chief Executive

SCOTTISH BORDERS COUNCIL

25 September 2020

1 PURPOSE AND SUMMARY

- 1.1 **The purpose of this report is to set out the Council's strategic direction on the issue of climate change, and to provide a lead to our partners, to businesses, communities and people in the Scottish Borders. The report considers that the Council should declare a Climate Emergency, reflecting its commitment to action on the issue.**
- 1.2 The act of declaration has a vital role to play in building public awareness that we are in a climate emergency situation which places unprecedented demands on all individuals, communities and businesses, as well as public bodies. The report also acknowledges that while a Climate Emergency declaration issued by a council can be a powerful catalyst for action, it must be paired with a clear action plan and an appropriate commitment of resources.
- 1.3 In responding to the climate emergency, there is an urgent need to review how the Scottish Borders can make a step-change in activity to reduce greenhouse gas emissions and prepare for the impacts of climate change. This needs to be done in a way that is positive for the people and the economy of the Scottish Borders and builds on the strengths and assets of the region. This report provides an initial overview of some of the challenges and opportunities for the Scottish Borders as a whole in supporting the national endeavour to end Scotland's contribution to climate change by 2045. It also considers the Council's responsibilities in responding to the climate emergency as an organisation.

2 STATUS OF REPORT

- 2.1 At its meeting of 31 January 2020, the Sustainable Development Committee, chaired by Councillor Aitchison, heard presentations from:
 - Mr Dave Gorman, Director of Social Responsibility and Sustainability at the University of Edinburgh, entitled 'Responding to the Climate Crisis – Urgency, Embedding and Lessons Learned'; and
 - Mr Ian Aikman, the Council's Chief Planning and Housing Officer, called 'Climate Action – Playing #OurPart'.In response, the Committee agreed to recommend to Council that Council considers a report on the climate emergency as soon as possible. This report is presented in response to that recommendation.
- 2.2 An earlier iteration of this report, Responding to the Climate Emergency, was scheduled to be considered by Council at its meeting of 26 March 2020. As a result of the disruption caused by the COVID-19 pandemic, it has not been

possible to bring the report to Council until now. The present report has been updated to reflect the current context, and activity since March 2020.

3 RECOMMENDATIONS

3.1 It is recommended that Council:

(a) Recognises and declares a Climate Emergency; and

(b) Agrees:

- i. as soon as possible, to set a target for achieving a reduction in the Council's carbon emissions, which is at least consistent with the Scottish Government's target of net zero by 2045 and the intermediate targets set out in the Climate Change (Emissions Reduction Targets)(Scotland) Act 2019;**
- ii. to build upon the work we have undertaken to date, and to align our policies to address the Climate Emergency;**
- iii. to set out a clear plan of action to reduce our carbon emissions and other greenhouse gases, such plan to return to Council for consideration before March 2021;**
- iv. to assess the resource requirements placed on the Council by the aforementioned plan of action and to investigate all possible sources of external funding and match funding to support this commitment;**
- v. to work collaboratively with Community Planning Partners, and other stakeholders, including businesses and the public in developing the Scottish Borders' response to the Climate Emergency;**
- vi. that the Sustainable Development Committee oversee development of the plan to be presented to Council before March 2021, and oversee the development and implementation of the plan agreed by Council in responding to the Climate Emergency;**
- vii. that the Sustainable Development Committee develop recommendations on a collaborative and inclusive regional dialogue on climate action to be included in the plan to be considered by Council before March 2021.**

4 THE GLOBAL AND NATIONAL CONTEXT

- 4.1 On 8 October 2018, the Intergovernmental Panel on Climate Change (IPCC) issued a [stark warning](#) that the world must halve CO2 emissions by 2030 if we are to avoid global temperature rises of more than 1.5C. [The Net Zero report by the UK Committee on Climate Change](#) advised that Scotland could achieve net-zero emissions (whereby any remaining emissions are balanced by solutions such as forestry or bioenergy with carbon capture and storage) by 2045. It noted that this would require a substantial increase in effort across all sectors of the economy.
- 4.2 In May 2019, the Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services (IPBES) issued a [report](#) warning about the damage human beings are causing to the planet. The IPBES report shows that the pressures on nature are increasing, and that the loss of species and ecosystems is not only catastrophic for species but also a global and generational threat to human well-being. The Scottish Government's Scottish Biodiversity Strategy sets out the framework for national action to meet the Aichi targets. This is reflected in the Council's Local biodiversity Action Plan and this links to the Council's Biodiversity duty.
- 4.3 The IPCC and IPBES reports highlight that unprecedented transformative change is essential if we are to address the twin challenges of climate change and global biodiversity loss. At the same time, both reports suggest that it is not too late to act, provided that all countries act quickly and decisively to address these fundamental challenges.
- 4.4 Recognising the impact that the global climate emergency will have on every community and every business, Scotland has set ambitious targets as part of its [Climate Change \(Emissions Reduction Targets\)\(Scotland\) Act 2019](#), which received Royal Assent on 31 October 2019. The primary objective of the Act is to raise the ambition of the greenhouse gas emissions reduction targets set out in the Climate Change (Scotland) Act 2009. Part 4 of the Climate Change (Scotland) Act 2009 places duties upon public bodies which require that that a public body 'must, in exercising its functions, act in the way best calculated to contribute to the delivery of emissions reduction targets (known as 'mitigation'), in the way best calculated to help deliver any statutory climate change adaptation programme, and in a way that it considers is most sustainable'.
- 4.5 The 2019 Act builds on the 2009 Act by setting a legally-binding "net-zero" target of all greenhouse gases by 2045 (five years before the UK, as per the recommendation of the UK Committee on Climate Change), with interim targets for reductions of at least 56% by 2020, 75% by 2030, 90% by 2040.
- 4.6 Scotland's [Climate Change Plan](#) sets out a comprehensive view of how all aspects of society across industry, transport, energy, buildings, heating and land use will need to change if we are to reach our vision for growing the economy, improving the wellbeing of the people of Scotland and protecting and enhancing our natural environment. The Scottish Government has committed to updating the Plan in light of the new targets, albeit that the original timeframe of within six months of the Climate Change Act receiving Royal Assent has been delayed by COVID-19.
- 4.7 The Climate Change Act also puts into law the requirements for the transition to a net-zero economy to be "just". Last year the Scottish Government established a [Just Transition Commission](#) to advise on a how to achieve a net-zero economy in a way that is fair for all by following the internationally recognised principles that requires all actors to:

- plan, invest and implement a transition to environmentally and socially sustainable jobs, sectors and economies, building on Scotland’s economic and workforce strengths and potential.
 - create opportunities to develop resource efficient and sustainable economic approaches, which help address inequality and poverty.
 - design and deliver low carbon investment and infrastructure, and make all possible efforts to create decent, fair and high value work, in a way which does not negatively affect the current workforce and overall economy.
- 4.8 Much of the climate emergency response focuses on reducing emissions (mitigation). Due to the complexity of how our atmosphere works, many of these interventions will take decades for the climate benefits to be realised. In the meantime, it is essential that we also concentrate on resilience and adaptation actions to address the ongoing impacts of climate change such as ‘hotter dryer summers, warmer wetter winters and increased flooding’ that we are all starting to experience. [The Second Scottish Climate Adaptation Programme 2019-2024](#) was published in September 2019 and sets out how Scotland will prepare for the challenges of a changing climate.
- 4.9 Achieving net zero by 2045 is an immense challenge that will require structural changes at all levels of society. There are many profound changes that need to happen including how we use our land to reduce carbon while producing food, and protecting and enhancing biodiversity, amongst other benefits; how we decarbonise heat, transport and electricity while maintaining secure, reliable supplies at a fair and affordable cost; and how the transition to a low carbon economy can be positive for society, the economy and the environment.
- 4.10 The COVID-19 pandemic and associated policy response has sharply accelerated demands for a global, national and regional responses which are grounded in wellbeing and sustainability. The recommendations of the Scottish Government commissioned [Advisory Group on Economic Recovery](#) and Scottish Government’s response in its [Economic Implementation Plan](#) have reinforced the need for a paradigm-shift towards a greener, net-zero and wellbeing economy, including prioritisation of sector and local economic plans to deliver a green recovery, where the coincidence of emissions reductions, the development of natural capital and job creation are the strongest achievable.
- 4.11 The Infrastructure Commission’s [Key Findings Report](#) (January 2020) is predicated on the ambition of an inclusive net zero economy, while in July the Just Transition Commission issued ‘[Advice for a Green Recovery](#)’. The latter’s recommendations include:
- Boosting investment in warmer homes
 - Backing buses and supporting the supply chain
 - Helping the rural economy by helping Scotland’s nature
 - Aligning skills development – for young and old – with the net-zero transition.
- 4.12 In responding to the challenge of climate change, the Council has two fundamental responsibilities:
- a) The first responsibility is to deliver a comprehensive reduction of greenhouse gas emissions and climate adaptation across the Council as an organisation. As noted in the Embedding Sustainable Development Report, just as leading private sector organisations have found that there is a strong business case for sustainable development in enhancing profitability and shareholder value, so there is a

corresponding benefit for public sector organisations from sustainable development, with climate action a core objective.

- b) The second responsibility is to provide leadership and to influence climate action across the Scottish Borders region. This recognises that, in spite of the Council's scale as the region's largest public sector body, its direct influence is limited by the fact that it is not accountable or responsible for all that takes place within the region. Notwithstanding, there are two very significant attributes possessed by the Council, which give it a unique influence:

- i. The first of these attributes is its involvement in a spectrum of activity which either directly or indirectly influences the actions of others. This includes planning, transport and procurement. Taking the last item as an example, the Council spends approximately £180M per year on goods and services from third parties, and how it spends that money can shape the decisions and actions of others. The Council's Sustainable Procurement Charter is an important framework for this influence.
- ii. The second attribute is the Council's democratic character. The democratic character of local authorities invests them with a uniquely powerful voice which, by being representative of the local electorate, has particular resonance in influencing the behaviours of others.

In responding to the Climate Emergency, a Scottish Borders Council plan of action will need to address both of these fundamental responsibilities.

5 THE SCOTTISH BORDERS CONTEXT

- 5.1 As an organisation, the Council has undertaken some significant activity to mitigate its carbon emissions. This activity includes –

- Street lighting LED replacement programme (SLEEP)
- Programme for fleet vehicle transition to electric
- Installation of electric vehicle charge points
- Energy efficiency programme across the Council estate
- Support for active travel and access routes/long distance paths
- Implementation of Sustainable Procurement Charter
- Improving recycling rates and reducing landfill as a result of improved recycling and residual waste being treated and turned into a fuel rather than being sent to landfill.

At the same time, it cannot be ignored that the Climate Emergency places a whole different order of demand on the organisation, which the Council must address with increased focus and vigour, recognising that doing so will have a transformative impact upon how it does its business. In developing its response to this challenge, on 29 August 2019, Council formally committed to implementing the UN Sustainable Development Goals as they relate to local government in [the Embedding Sustainable Development report](#). UN SDG 13 specifically commits signatories to 'take urgent action to combat climate change and its impacts'. At the same time, Council established a Sustainable Development Committee, and has since appointed an Executive Member of Sustainable Development to reinforce member leadership and oversight of this vital area.

- 5.2 As a region, the Scottish Borders has some distinct challenges and opportunities in reducing and, ultimately, ceasing its contribution to climate change, and in living with the effects of climate change which it is already too late to pre-empt.

- 5.3 On the one hand, there are significant challenges in decarbonising transport across a large rural area, decarbonising off-grid heating systems without exacerbating fuel poverty, and decarbonising activity in industrial installations and businesses across the region without negatively impacting on employment and productivity.
- 5.4 On the other hand, the Scottish Borders is well placed to capitalise on the country's requirement for bio-energy and carbon sequestration with nature-based solutions such as woodland creation and peatland restoration alongside carbon capture and storage all acting as negative emissions solutions. There is much good work already underway. This includes, for example, the Charlesfield anaerobic digestion plant, biomass installations at farm and estate level, and ongoing energy efficiency upgrades of domestic properties aimed at tackling local fuel poverty and innovation in design and construction being delivered by local Registered Social Landlords. But much more is needed. Business as usual will not put us on the trajectory to reduce emissions and transform our economy. Action will need to be scaled up across the region in order to meet the demands of our present predicament.
- 5.5 We are already experiencing the impacts of climate change with hotter dryer summers, warmer wetter winters, more intense rainfall and more flooding. More frequent extreme weather events such as heatwaves and floods are likely to cause disruption across the region, with substantial increases in the likelihood of coastal flooding in low-lying areas.
- 5.6 Appendix A summarises some of the main opportunities and challenges across key sectors of the economy that would enhance resilience and put the region on a transformative trajectory towards a net-zero economy.
- 5.7 Commitment to sustainable development including climate action has been constrained by a perception that action represents a cost and a restriction on wellbeing. Increasingly, however, contrary to this perception, evidence points to a virtuous circle of benefits from such action. For example, the Paris Agreement will support a worldwide market for low carbon goods and services, as other countries have also committed to reducing their carbon footprint. Analysis by the International Finance Corporation indicates that the Paris Agreement will help open up \$23 trillion worth of opportunities for climate-smart investments in emerging markets between 2016 and 2030. The Agreement will enhance the long term international competitiveness of low carbon business in Scotland by ensuring that more eco-friendly business practices are adopted elsewhere.

Ambitious climate action across key economic systems—energy, cities, food and land use, water and industry—can lead to higher productivity, more resilient economies and greater social inclusion.

Specific opportunities exist in renewable energy technologies; and manufacturing, low-carbon engineering and green finance, development of key technologies such as hydrogen and carbon capture and storage, and the embedding of circular economy principles are all critical opportunities.

It has been shown that companies taking the strongest climate action outperform their peers in stock market value and financial performance, supported by an increasing consumer awareness and demand for ethical products.

- 5.8 The Council is working with its partners in the South of Scotland and Borderlands through:

- a South of Scotland Energy Transition Group, chaired by Jeremy Sainsbury of South of Scotland Enterprise; and
- development of a Borderlands Energy Masterplan as principal objective of the Borderlands Inclusive Growth Deal.

Both initiatives are aimed at optimising:

- the South of Scotland's/Borderlands' contributions to national ambition for net zero carbon; and
- inclusive growth opportunities for our region through encouraging commercial investment and job creation, while also alleviating the impact of high energy prices on low income households.

5.9 Specifically, the Borderlands Energy Masterplan will include data collection, measurement, mapping and modelling across Borderlands at a level which supports the strategic priorities of partners, including regional decarbonisation. The recommendations of this report are framed with a view to the Council's own Climate Action Plan benefitting from this work. Baseline data is expected to be available by the end of March 2021.

6 THE COUNCIL'S #PART

- 6.1 In November 2018, the Councils of two major cities, Bristol and Manchester, passed motions declaring a 'climate emergency' and setting targets aiming to be carbon neutral by 2030 and 2038 respectively. Since then, there has been a wave of Climate Emergency declarations by Councils of all political complexions across the UK including, for example, Preston, Maidstone, Newcastle, Leeds, and Cardiff. The Scottish Government has made a similar declaration, while for UK Government, Michael Gove, Chancellor of the Duchy of Lancaster and the former environment secretary, and Andrea Leadsom, the former business secretary, have both acknowledged the climate emergency and the need for urgent action. By the end of July 2020, over half of the UK's local authorities had declared a climate emergency. Across Scotland, 20 councils have declared a Climate Emergency, including all of our partner councils in the City of Edinburgh and South East Region, in Borderlands (including Carlisle City, Cumbria and Northumberland County Councils) and in the South of Scotland. Meanwhile, Glasgow City Council has unveiled plans to become the first UK city to reduce its greenhouse emissions to net-zero, aiming to reach the target before 2045.
- 6.2 Importantly, the climate situation that this Council and citizens and communities everywhere face is characterised as an 'emergency', not because councils and other public bodies have made declarations, but because the urgency and scale of the climate challenge is a matter of objective and verifiable evidence, demonstrated conclusively in the IPCC Report and other reports.
- 6.3 The Council has an indispensable role to play in responding to that emergency. Like other Councils, this reflects its scale and influence over key areas such as planning, transport and energy. But the Council also has a vital community leadership role described in [the Embedding Sustainable Development report](#), and it has a duty to use that leadership position to influence other agencies, businesses and citizens.
- 6.4 Accordingly, as a matter of leadership and as an example to others, it is proposed that Council should acknowledge the fact of a Climate Emergency expressly. A Climate Emergency declaration issued by a council can be a powerful catalyst for action if paired with a clear action plan.
- 6.5 It is clear that rhetoric and bold headlines will not deliver a step change in combating climate change nor on the ambitious targets which the situation

demands. This must be built on a clear set of actions, which collectively amount to a Scottish Borders Council contribution to responding to climate change, which is, at least, commensurate with national targets, and where practically achievable, exceed those targets.

- 6.6 Plainly, this is not an overnight task. The reality of the Climate Crisis is that it calls for the complete re-orientation of policy and strategy to help support a transition from a fossil fuel local economy to a clean energy one. It means challenging every aspect of how we currently go about our business, and changing how we live, travel, and work.
- 6.7 In fulfilling its role, the Council should seek to:-
- Reduce the Council's carbon emissions in line with national targets, with the aspiration to exceed targets where practical
 - Work in partnership towards delivering a carbon neutral Scottish Borders including moving to a low carbon fleet alongside the promotion of sustainable travel and transport
 - Encourage, where practical, the use of renewable energy generation, carbon sequestration and energy storage
 - Reduce the risks from the changing climate by
 - adapting to the effects of climate change to ensure service delivery,
 - minimising carbon emissions in service delivery,
 - working with partners towards measures, which are sustainable and equitable, to increase preparedness and resilience of people and places.
- 6.8 While the Council's plan for 'responding to the Climate Emergency' will need to be agreed by Full Council, the Sustainable Development Committee has a vital role in overseeing the development and implementation of the plan. As earlier noted, significant activity has been delivered or is already underway (with the Council's Energy Efficiency Programme, in particular, comprising a suite of measures designed to reduce the organisation's carbon footprint). However, the necessity of a step-change to the scale, pace and co-ordination of efforts lies at the heart of this report and it follows that the enhanced oversight and scrutiny afforded by creation of the Sustainable Development Committee is also needed.
- 6.9 A critical element of a plan of action will be to establish the Scottish Border's contribution to a whole-Scotland approach to reducing emissions. At the end of 2019, the Scottish Government issued a consultation on [the role of Public Sector Bodies in tackling climate change](#). The consultation asked how the public sector can raise ambition and deliver joined-up action on climate change. A step change in our approach is needed – but what do we need in order to get there? [In responding](#), the Council acknowledged that, if it and other public bodies are to meet the climate challenge, then councils must set ambitious plans and 'will' the means to deliver on those plans. At the same time, however, guidance is needed on aligning public body functions and roles with delivery of commitments in the Climate Change Plan and Climate Change Acts. Therefore, Scottish Government guidance should clarify and improve understanding of the vertical alignment of public sector bodies with national emissions inventories and emission reduction plans.
- 6.10 Around the world, including in the UK with [Climate Assembly UK](#) and Scottish Government's [Big Climate Conversation](#), there is widespread recognition that the public and communities need to be engaged in shaping climate action. Engagement improves understanding and collective ownership. As the Council develops its own approach to climate action, it should consider how to facilitate a collaborative and inclusive regional dialogue on the Scottish Borders' response to the Climate Emergency. Establishing such a public

dialogue should form a key strand of work for the Sustainable Development Committee in developing a Climate Action Plan.

- 6.11 More broadly, as a region, the Scottish Borders is a significant generator of renewable electricity, and has a potentially significant role in energy crops, and in hydrogen production, as well as in carbon capture and storage. For example, forestry is an important sector in the region which is likely to contribute to Scottish Government's targets for increased woodland cover, set out in the national Climate Change Plan. The forestry sector is worth nearly £1billion to Scotland's GVA. These are striking economic opportunities, which are yet to be fully exploited. The Council must work with partners, notably, South of Scotland Enterprise, and above all, businesses and communities to maximise these opportunities, promoting quality and skilled employment, training, and opportunities for businesses around, for example, local processing, tourism and recreation, as well as garnering the benefits of carbon reduction. The pursuit of opportunities in the 'green energy' sector should be seen as a facet of inclusive economic growth, as well as complementary to sustainable development objectives.
- 6.12 As a land owner and land manager the Council can make a valuable contribution through management of its greenspace. Targeted tree planting (e.g. guided by Surface Water Management Plans) could provide a range of benefits such as storing carbon, reducing surface water run-off and providing a cooling effect to our towns and settlements, thereby building resilience in the local environment and buffering our communities from the impacts of climate change. Creation of ponds, wetlands and management of rivers and burns could also augment local flooding measures and provide a cooling effect. Greenspace management, such as through reduced mowing regimes, can also play a part in minimising emissions.
- 6.13 It is clear that there is much to be done, and that the Council and the region as a whole face an unprecedented series of challenges, as well as some significant opportunities. This report is intended to represent a small step in meeting those challenges and garnering the opportunities by setting a clear direction for the Council and a lead to our partners, to businesses, communities and people in the Scottish Borders on the issue of climate change.

7 IMPLICATIONS

7.1 Financial

While no costs arise directly as a result of this report, it is possible that costs may arise as a result of specific activity recommended to Council in responding to climate change. Equally, it is well-established that whole life cost savings can be made through environmentally responsible actions such as cutting down on waste – for example, reducing wasted electricity through inefficient heating and lighting, or reducing the amount of rubbish taken to landfill. Furthermore, the Scottish Borders' natural 'transition' assets (e.g. wind and physical geography) should mean that the region is well-placed to benefit from the opportunities presented by the developing 'green technologies' market. Any cost or savings implications will be reported, as appropriate, in relation to each area of activity where they arise as a consequence of the pursuit of climate action.

7.2 Risk and Mitigations

There are three key risks and mitigations which require to be considered in light of this report.

a) Risk 1

- i) The first is self-evidently that a failure to respond effectively to the Climate Emergency risks precipitating those very outcomes, which climate action is intended to avert. In a Scottish Borders' context, the developing risks associated with climate change have already begun to manifest themselves in changing weather patterns, and the resulting flooding and storm damage.

Mitigation

- ii) Mitigating the adverse effects of climate change necessitates the Council committing to an effective plan of action to minimise and mitigate the negative impacts of carbon and other greenhouse gases. However, some negative consequences of climate change are already 'built in', so an effective plan of action must also deliver adaptations to meet those consequences of climate change which cannot be reversed. Flood management solutions are a practical example of this activity.

Regular scrutiny of progress will provide further valuable mitigation with the Sustainable Development Committee playing a vital role in oversight and scrutiny.

b) Risk 2

- i) Another risk is reputational. Failing or explicitly declining to declare an emergency in the face of overwhelming evidence would be injurious to the Council's reputation, as well as incompatible with the commitment of the Council to the UN Sustainable Development Goals (SDGs) on 29 August 2019.

Mitigation

- ii) By showing leadership on the Climate Emergency and commitment to effective action on climate, the Council will minimise the risk to its reputation which would flow from a failure to acknowledge or act on the evidence of a Climate Emergency.

c) Risk 3

- i) As a region, the Scottish Borders fails to maximise the inclusive economic growth opportunities offered by its natural resources, such as physical geography (e.g. wind and location).

Mitigation

- ii) By fully embracing the need for action and providing leadership and an example to others, the Council will enhance the prospects of Borders businesses and the wider community being able to garner the advantages of transition to a zero carbon economy, by accessing the region's significant regional renewable energy generation, geographic location to primary urban centres and other transition assets.

7.3 Integrated Impact Assessment

An Equalities Impact Assessment has not been carried out on this proposal, but will be carried out as required in relation to the Council's actions which emerge from the plan to respond to the Climate Emergency.

It should be noted that the recommendations of this report are consistent with the UN SDGs to which the Council committed on 29 August 2019, and are entirely animated by sustainability in seeking to protect the interests of future as well as present generations.

7.4 **Acting Sustainably**

Reduction of carbon emissions is a core objective of sustainable development, specifically, UN SDGs Goal 13 – Climate Action and Goal 7 – Affordable and Clean Energy. The purpose of this report is to embed commitment to climate action into the very fibre of the Council and how it makes its decisions, and delivers services.

7.5 **Carbon Management**

The Council adopted a [Low Carbon Economic Strategy](#) in 2013. More recently, the Energy Efficiency Programme was established to identify, design and implement technical interventions to decarbonise our built estate and reduce our utility cost base. This report seeks to augment these efforts. The Energy Efficiency Programme will continue to examine ways in which we can support the Scottish Government’s carbon aspirations while generating economic benefits to the Scottish Borders.

7.6 **Rural Proofing**

This report does not create a new or amended policy or strategy. It is consistent with the UN SDGs which represent commitments to sustainable development in all contexts, including rural contexts and an equalities based approach based upon responsiveness to needs across the board including in rural settings. If rural impacts emerged as a consequence of recommended actions for the Council in responding to climate change, those impacts together with appropriate mitigations would be reported as appropriate.

7.7 **Changes to Scheme of Administration or Scheme of Delegation**

No changes are required to either the Scheme of Administration or the Scheme of Delegation as a result of the proposals in this report.

8 CONSULTATION

- 8.1 The Executive Director Finance & Regulatory, the Monitoring Officer / Chief Legal Officer, the Chief Officer Audit and Risk, the Service Director HR & Communications, the Clerk to the Council and Corporate Communications have been consulted and any comments received have been incorporated into the final report.
- 8.2 Work is being undertaken with Corporate Communications to develop both internal and external communication plans around the Council’s declaration of a Climate Emergency and associated plan and actions.

Sector	Overview of challenges and opportunities
Power	<p><i>Challenges:</i> As we introduce more renewable energy sources we will need to transition from a hub and spoke model of energy generation and transmission to a distributed generation model. This generates challenges in providing appropriate infrastructure to accommodate this generation and keep the grid balanced as renewable energy generation can be unpredictable and inconsistent. The existing networks will have to be developed to accommodate new demands, such as electric vehicles and localised production of energy to be fed into the existing networks (wind, solar, wave, biomass, hydrogen).</p> <p><i>Opportunities:</i> <i>Renewable Electricity:</i> Support development of the whole renewables industry: wind, wave and tidal energy, solar, hydro, biomass including potential for circular economy such as farm waste to create biofuel. Support the development of grid balancing services including battery storage and an interconnected smart grid to balance generation and consumption. This could provide a stimulus and provide opportunities to develop Big Data and Internet of Things industries.</p> <p><i>Gas Replacement Opportunities:</i> Scottish Gas Networks have a strategic vision to phase out natural gas and move to the incorporation of bio-gas and hydrogen. This is supplemented by major technology companies developing industrial and domestic hydrogen boilers to replace gas units. Hydrogen is an alternative to petrol & diesel motor vehicles. The gas infrastructure is in place within the country to make the change from natural gas to hydrogen. The Scottish Borders has a distribution gas main running through the region and with the wind power in the area could become an area of hydrogen production for Scotland and maximise the sustainability and economic opportunities.</p> <p>The Scottish Borders could be a significant contributor of carbon capture and storage</p>
Transport	<p><i>Challenges:</i> More frequent extreme weather events (such as heatwaves and floods etc) are likely to cause disruption across the transport network. Nature based solutions will complement traditional engineering measures to maintain connectivity.</p> <p>Vehicles - phasing out of internal combustion engine vehicles and increasing use of electric vehicles (EVs). Rapid development and placement of infrastructure such as EV charging points. This is an area, where the Council is making progress.</p> <p>Funding applications for active travel through Sustrans need rural proofing, and the new South of Scotland Enterprise Agency has a key role to play in transport as it does in the other areas listed.</p> <p><i>Opportunities:</i> Effective low carbon transportation. EVs have a key role, and there is a need to increase the charging offer to increase uptake.</p> <p>With the Borders Railway established, there is huge potential embodied within extension of the Borders Railway to Carlisle and an east to west link within the Scottish Borders</p>

	<p>Potential around e-bikes for commuting (will need the right infrastructure). We are a long way behind continental Europe (Denmark, Holland on infrastructure and ambition.)</p> <p>Encourage investment in active travel infrastructure such as paths and off-road routes near to where people live and work</p> <p>Promotion of sustainable 'slow' tourism - in respect of transport, it is also about encouraging visitors to make longer stays, use public transport to and within destinations, promoting hire or electric cars and ebikes and stimulating more visitor experiences based around walking and cycling.</p>
<p>Heating, housing and development</p>	<p><i>Challenges: 80% of Scotlands housing stock for our 2050 population is already in place.</i> Decarbonising Scottish heating will be particularly challenging and will need transformation of our current housing stock, attitudes towards renewable technology and current heating supply. Specific challenges for Scottish Borders relate to off-gas grid. In addition, fuel poverty is very significant consideration.</p> <p>The increasing effects of climate change, including the consequences of more intense rainfall events will put existing and planned built development and infrastructure at risk.</p> <p>Significant risks exist in relation to changed rainfall patterns and sea level rise leading to flooding and coastal erosion enhanced flooding due to sea level rise. If, sea level rises by nearly 1 metre as per pessimistic predictions, between now and 2100, substantial increases in the likelihood of coastal flooding in low-lying areas are likely.</p> <p>Rental housing for short-term lets does not require implementation of new environmental standards.</p> <p><i>Opportunities:</i> Reduction in fuel poverty levels and therefore potentially child poverty levels.</p> <p>Sustainable modern housing. For example, Eildon Housing Association has completed the first of three low-energy Passivhaus homes in the Borders. Designed by John Gilbert Architects the project forms part of a broader pilot programme intended to deliver innovative homes using a variety of different construction methods to compare costs, schedules and tenant feedback. Undertaken in partnership with Scottish Borders Council, the Construction Scotland Innovation Centre and Glasgow School of Art, the completion dovetails with planning consent for a further ten properties at Westruther which are due to begin construction in March for completion by spring 2021.</p> <p>For the region to become a 'demonstrator' of new and innovative technologies and systems with the Borderlands Energy Masterplan offering a UK and Scottish Government supported initiative to maximise the low carbon and economic potential of the region's significant and expanding net energy contribution.</p> <p>Opportunities around management of the Council' Estate including buildings and Greenspace- that could reduce carbon emissions and provide adaptation (e.g. reduced inputs into Greenspace management and greater biodiversity and multiple benefits such as natural flood management (trees and wetlands) and shading and cooling (trees):</p>
<p>Industry</p>	<p><i>Challenges:</i> The transition of Business/Industry to sustainable energy and circular resources is a challenge, particularly when viewed from the perspective of short term investment vs long term savings.</p>

	<p>Ensuring that the transition of Business/Industry is 'just'.</p> <p><i>Opportunities:</i> The Scottish Borders should seek to put itself in the van of low carbon business opportunities. The development of a green business park through the Edinburgh City Deal at Tweedbank, and Borderlands present opportunities to develop this selling point.</p> <p>The Council should seek strategically to co-locate industry within the region, based on balancing the re-use of wasted energy from industrial applications (heating & cooling). The Council will need to engage in a dialogue with Scottish Government around the tools required to effect such a strategy.</p>
Land Use	<p><i>Challenges:</i> Land use is already being affected by climate change and increasingly with 'hotter dryer summers, warmer wetter winters and more flooding'</p> <p>.</p> <p>Uncertainty over shape and size of future rural funding support. Funding has traditionally come through government, and there is a need to look at bringing in carbon funding from private business on top of government funding.</p> <p><i>Opportunities:</i> How land is used has an essential role to play in the transition to a net zero carbon economy as well as building resilience to a changing climate. Promoting nature-based solutions for example through woodland expansion, managing flood risk and peatland restoration. The Scottish Borders was one of two areas to be involved in the Scottish Government's Land Use Pilot Project, providing important learning in this area. The Council is working with Scottish Forestry on a regional strategic woodland creation project to explore opportunities for new woodland through integrated land use and delivery of wider local benefits such as employment, local processing, access & tourism, natural flood management and community involvement learnings from these initiatives need to be utilised. At the same time, the uncertain context for future rural funding, and the establishment of the South of Scotland Enterprise Agency provide an opportunity to promote the Scottish Borders as a developmental region for assessing the potential of different land use approaches.</p> <p>Increasing resilience of coastal and river habitats to manage erosion and coastal flood risk will also be important.</p> <p>The Council has adopted a Local Biodiversity Action Plan with its partners to deliver actions across the region with a focus on Natural Capital and the delivery of ecosystem services including carbon storage in woodlands, peatlands and grasslands. This provides a framework for action to build resilience in our natural environment and contributes to the delivery of the Council's Biodiversity duty.</p> <p>Clear synergies exist between Climate Action and the Food Growing Strategy recently approved by Council. Exploiting this interrelationship will help deliver extended benefits across wellbeing, inclusion, and skills development, as well as sustainability goals, and carbon reduction.</p>
Marine	<p><i>Challenges:</i> Development must be sustainable with caution required in assessing developments for their impacts. Any potential development of these areas undergo significant scrutiny by statutory bodies and the public.</p> <p><i>Opportunities;</i> The production of power from wind, wave and tidal technology has huge potential in Scotland with over 6,000 km of coastline. Less obtrusive technologies like tidal and wave energy generation may be possible in the region.</p>

	<p>Coastal waters off the coast of Berwickshire offers some potential to develop the blue carbon sector. Marine and coastal habitats that are natural stores for carbon. There is some tension however between some marine developments and activities and the protection of environmental assets to meet other objectives, including for biodiversity.</p>
--	---

PROPOSED LOCAL DEVELOPMENT PLAN

Report by Executive Director

SCOTTISH BORDERS COUNCIL

25 September 2020

1 PURPOSE AND SUMMARY

1.1 This report seeks agreement on the Council's Proposed Local Development Plan (LDP) including the responses to matters raised from the consultation on the Main Issues Report.

1.2 The report gives reference to the background and legislative requirements for the preparation of the LDP. It confirms its format and identifies the main component parts. The report includes reference to policy amendments, new site allocations, site removals and other material considerations including background papers which helped guide the preparation of the LDP.

1.3 Following the approval of the Proposed LDP there will be a 12 week period for public representation through an online consultation. Any outstanding objections to the Proposed LDP will be subject to Examination by the Scottish Government Reporters from the Planning and Environmental Appeals Division.

1.4 The LDP was on the agenda to be presented to elected members at the Council meeting in March 2020. However, due to the COVID 19 outbreak and a number of related issues, particularly with regards to how the Plan would be successfully consulted upon given the lockdown and the indefinite postponement of public meetings, it was withdrawn from that meeting.

2 RECOMMENDATIONS

2.1 I recommend that the Council:

- a) Approve the Proposed Local Development Plan (see Appendix A)**
- b) Agree the proposed responses to the outstanding matters from consultation on the Main Issues Report (see Appendix B)**
- c) Agree the recommendations of the site assessment database for all sites considered as part of the Local Development Plan process (see Appendix C)**

- d) Agree to delegate any editing changes of a non-policy nature to the Executive Director, Corporate Improvement and Economy**
- e) Agree to publish the Proposed Local Development Plan for public representation for a period of 12 weeks**
- f) Note the updated Environmental Report on the Proposed Local Development Plan**

3 BACKGROUND

- 3.1 The Town and Country Planning (Scotland) Act 1997 sets out the statutory basis for development planning in Scotland. Detailed aspects of the development planning system are set out in the 2008 regulations. Section 16 of the Act requires all planning authorities to prepare the LDP for their area.
- 3.2 The Government expects a degree of twin tracking in those areas such as the Scottish Borders that are also covered by a Strategic Development Plan (SDP) but stipulate that LDPs should not be submitted to Scottish Ministers until the SDP has been approved. The SDP is the high level strategic plan that sets out a range of strategic planning issues which the LDP must address. The LDP should be consistent with the strategy and policies of the SDP, as well as Scottish Planning Policy more generally.
- 3.3 In terms of the SDP, on 16 May 2019 Scottish Ministers rejected the proposed SDP2. This was primarily on the grounds of the Plan not taking sufficient account of the relationship between land use and transport. Consequently, SDP1 approved in June 2013 and associated Housing Land Supplementary Guidance adopted in October 2014, remains the extant Strategic Development Plan for the South East of Scotland. The Proposed LDP makes reference to this, and that consideration can be given to other referenced supporting documents prepared as part of the SDP2 Examination process, including the Housing Needs and Demands Assessment 2.
- 3.4 With regards to the Main Issues Report (MIR), Scottish Government Circular 6 – Development Planning confirms the requirements for MIR. The MIR must be prepared in advance of the LDP and must identify key issues for public opinion which the LDP should address. The Council, following its meeting on 30 August 2018, agreed the MIR as a basis for public consultation for a period of 12 weeks. In parallel, the Environment Report (ER) was also subject to public consultation under separate legislative process.
- 3.5 Following the printing of the documentation, the MIR and ER were subject to advertisement and consultation which took place between 8 November 2018 and 31 January 2019. As part of the consultation there were a series of 10 drop-in exhibitions and 7 workshops held across the Council area attended by some 250 parties. 330 representations were received during the consultation period from a range of interested parties covering a wide range of subjects. The ER received responses from the three consulting authorities (Historic Environment Scotland, Scottish Environment Protection Agency, Scottish Natural Heritage). On 26 June 2019 summaries of all the representations received to the MIR and ER were presented to the Council.

4 COMMENTARY ON PROPOSED LOCAL DEVELOPMENT PLAN

Response to Consultation Representations on MIR (see Appendix B)

4.1 Appendix B confirms Officer responses and recommendations in respect of all representations received as part of the consultation of the MIR. These recommendations have been taken forward into the preparation of the Proposed LDP.

Proposed LDP content (see Appendix A)

4.2 Chapter 1 - Introduction. This chapter sets out the planning background for the preparation of the Proposed Plan. It sets out the component parts within it and confirms how representations can be submitted as part of the public consultation.

4.3 Chapter 2 – The Changing Context and Meeting the Challenges for the Scottish Borders confirms the current and projected demographics of the Scottish Borders. It confirms the promotion of Health and Wellbeing, coronavirus issues and identifies the requirement to address matters relating to infrastructure, transport and sustainability.

4.4 Chapter 3 - Policy Background. This chapter identifies relevant documents to be referred to in order to help guide the Proposed Plan. This includes reference to Council Corporate objectives.

4.5 Chapter 4 - Vision, Aims and Spatial Strategy. The Vision is taken from the SDP2 which remains relevant and identifies aims which will achieve the Vision. The aims include reference to planning for housing, town centres, rural environment, the built and natural heritage and sustainability and climate change. The Spatial Strategy is taken from the SDP2 and confirms the three strategic development areas of the central, eastern and western parts of the Borders.

4.6 Chapter 5 - Growing our Economy. This chapter confirms economic development actions and priorities across the Scottish Borders which the Proposed LDP addresses through a range of policies and site allocations.

4.7 Chapter 6 - Planning for Housing establishes the need for the LDP to provide a generous supply of housing land. Reference is made to documents which the LDP must take account of in considering housing land provision, including the SDP, Housing Need and Demand Assessment (HNDA2) Strategic Housing Investment Plan, Local Housing Strategy 2020 - 2025 and the Housing Land Audit 2019.

4.8 Chapter 7 - Supporting our Town Centres. The role of town centres is changing in terms of, for example, higher vacancy rates, reduced footfall and competition for online shopping. This chapter sets out a range of ways the LDP can address this, including allowing more flexibility of uses within them.

4.9 Chapter 8 - Delivering Sustainability and Climate Change Agenda. One of the main challenges of the LDP is to further the promotion and transition to a low carbon economy. This chapter includes reference to the Council's newly established Sustainable Development Committee which seeks to ensure a corporate approach to dealing with climate change issues, the Council's Low Carbon Economic Strategy 2023, the Council's Supplementary Guidance on Renewable Energy 2016 (which confirms support for a wide range of typologies within appropriate locations), the Zero Waste Plan and Flood Risk Management Plans.

4.10 Chapter 9 - Local Development Plan Policies and Policy Maps. This policy section of the Proposed LDP categorises all policy matters under the following headings:

- *Placemaking and Design* (PMD): including policies on sustainability, development standards, land allocations and development within and outwith settlements
- *Economic Development* (ED): including policies on business and industrial land, digital connectivity, town centres, regeneration, tourism, renewable energy, agricultural land and minerals
- *Housing Development* (HD): including policies on affordable housing, housing in the countryside, housing land safeguarding, care and nursing homes and housing for particular needs
- *Environmental Promotion and Protection* (EP): including policies on nature conservation, protected species, local biodiversity and geodiversity, landscape protection, countryside around towns, built heritage, greenspace, green networks, woodland, coastline and air quality, water environment and food growing
- *Infrastructure and Standards* (IS): including policies on infrastructure, developer contributions, parking standards, flooding, waste water, SUDS, waste management, hazardous development, contaminated land, radio telecommunications, advertisements

4.11 The main updates to the current policy approach are as follows:

Placemaking and Design –

- Ensuring high quality placemaking and design standards are applied for all developments
- Acknowledge the findings resulting from the Land Use Strategy

Economic development –

- A more simplified business/industrial land hierarchy has been established in Policy ED1-Protection of Business and Industrial Land comprising of 2 categories. High Amenity Business sites should be primarily for Class 4 uses, and all other Business and Industrial sites should be predominantly Classes 4, 5 and 6.

- Policy ED1-Protection of Business and Industrial Land allows more flexibility of uses where appropriate
- Removal of the Core Activity Areas in Hawick and Stow
- Allowing Class 2 uses within the Core Activity Areas of Selkirk, Eyemouth, Jedburgh, Galashiels and Duns
- Removal of Channel Street and Douglas Bridge from the Core Activity Area in Galashiels
- Retaining a higher level of protection of the Core Activity Areas of Peebles, Kelso and Melrose which continue to perform well
- Policy ED7-Business, Tourism and Leisure Development in the Countryside gives more weight to the consideration of the economic benefits of any relevant planning applications for business, tourism and leisure development in the countryside

Housing Development –

- Confirm high quality design standards must be applied for all housing proposals in the countryside
- Confirmation that Policy HD3 – Protection of Residential Amenity is relevant to renewable energy proposals
- Addition of a new policy HD6 – Housing for Particular Needs with regards to, for example, accessible and adapted housing, extra care housing, travelling people

Environmental Promotion and Protection

- Consideration of “enabling development” as part of Policy EP7-Listed Buildings
- A new policy EP17-Food Growing and Community Growing Spaces lays down criteria tests for identifying and promoting opportunities for food growing and community growing spaces
- Inclusion of identification of local biodiversity and geodiversity sites within policy EP3-Local Biodiversity and Geodiversity

Infrastructure and Standards

- New Policy IS18-Cemetery Provision which gives guidance on proposals for new and extension of cemetery provision
- Confirmation that a private access can now serve up to 5 houses

4.12 Chapter 9 also includes Policy Maps. The policy maps identify spatially designated areas and the respective policies they represent.

4.13 The final part of Volume 1 of the Proposed LDP includes appendices which provide detailed information in relation to the preparation of the document:

- Appendix 1: Settlement Appraisal Methodology

- Appendix 2: Meeting the Housing Land Requirement
- Appendix 3: Planning Guidance and Standards
- Appendix 4: Publicity and Consultation
- Appendix 5: Council Owned Sites

4.14 Volume 2 of the Proposed LDP incorporates Chapter 10 which relates to Settlement Profiles and Maps. The settlement profiles and accompanying maps set out proposals for development and safeguarding. The Proposed LDP incorporates proposals inherited from the current adopted LDP and identifies a number of new proposals. This includes a new additional settlement profile for Oxnam.

4.15 The new proposals include the following allocations:

- Business/Industrial land
 - Land South West of Mansefield House, Westruther (BWESR001)
 - Land at Winston Road I, Galashiels (BGALA006)
 - Land at Eshiels (BESHI001)
 - Gala Law II, Hawick (BHAWI003)
 - Land to South of Burnhead, Hawick (BHAWI004)
 - Wooden Linn II, Kelso (BKELS006)
 - Land North West of Deanfield Place, Yetholm (BYETH001)
- Mixed use land
 - Land West of Innerleithen (MINNE003)
- Housing land
 - Land at Eden Road, Gordon (AGORD004)
 - Land North of Mansefield, Grantshouse (AGRAN004)
 - Poultry Farm, Greenlaw (AGREE009)
 - Edgar Road, Westruther (AWESR002)
 - Hillview North (Phase 2), Coldstream (ACOLD014)
 - Land East of West Reston, Reston (AREST005)
 - Land East of Howdenburn Court II, Jedburgh (AJEDB018)
 - Land South of Darnlee, Darnick (ADARN005)
 - Deanfoot Road North, Oxton (OXTO010)
 - Netherbarns, Galashiels (AGALA029)
 - Harmony Hall Gardens, Melrose (AMELR013)
 - Philiphaugh Mill, Selkirk (ASELK040)
 - Burnfoot (Phase 1), Hawick (AHAWI027)
 - Land South of Cemetery, Eddleston (AEDDL010)

- Land South of Chapelhill Farm, Peebles (APEEB056)
- Redevelopment sites
 - Former Town Hall, Eyemouth (REYEM007)
 - Howdenburn Primary School, Jedburgh (RJEDB003)
 - Jedburgh Grammar School, Jedburgh (RJED006)
 - Former Peter Scott Building, Hawick (RHAWI017)
 - Buccleuch Mill, Hawick (RHAWI018)
- Longer Term Site
 - Land at Nether Horsburgh, Cardrona (SCARD002)

Site Removals

4.16 In order to ensure sites are effective, the Proposed LDP removes 5 sites currently allocated within the LDP 2016. These are:

- Housing site at Roundabout Farm, Chesters (RC2B)
- Housing site at Earlston Glebe, Earlston (EEA12B)
- Housing site at Braefoots, Eyemouth (BEY1)
- Housing site at Mueslie Drive, Lilliesleaf (EL16B)
- Redevelopment site at Preston Farm, Preston (zRO16)

Strategic Environmental Assessment

4.17 The LDP process has been subject to environmental appraisal under the terms of the Environmental Assessment (Scotland) Act 2005. An Environmental Report (ER) was prepared alongside the MIR and was subject to public consultation. The Consulting Authorities (Scottish Environment Protection Agency, Historic Environment Scotland and Scottish Natural Heritage) responded to the document at that time. The ER has now been updated to reflect the work undertaken in the preparation of the Proposed LDP.

Other Background and Supporting papers

4.18 The Proposed Plan has been prepared taking account of a wide range of background and supporting papers. Given the size of these documents it is not possible for them all to be included within the Council papers. Normally these would be available for viewing within the Member's library. However, due to current Coronavirus restrictions in entering HQ these can be viewed online on the Council's website on the following link - <https://www.scotborders.gov.uk/ldp2>. The documents included within this link are:

- Monitoring Statement (Review of policy performance, new policy issues)
- Environmental Report

- Action Programme (addresses delivery of identified developments)
- Town Centre Core Activity Area Pilot Scheme
- Western Rural Growth Area: Development Options Study (this consultants study identifies both short and long term options for housing and employment land)
- Full site assessment database for all sites considered as part of the LDP process
- Habitat Regulation Assessment
- Strategic Flood Risk Assessment
- Housing Technical Note
- Conservation Areas Technical Note
- Local Geodiversity Sites Technical Note
- Local Biodiversity Sites Technical Note
- Cemetery Provision Technical Note
- Integrated Impact Assessment/Rural Proofing

Other Matters

4.19 A Feasibility Study for a proposed Scottish Borders National Park commissioned by a local campaign group was submitted to the Council for consideration along with their Position Statement issued in September 2017. As part of the consultation on the MIR a question was posed to seek public opinion on the proposition for a National Park, its possible boundaries and operational model. There were mixed responses to the proposal although there were more offering support and there was a wide range of suggested sites across the Region for the designation. The designation of a National Park is ultimately a matter for Scottish Ministers following an assessment and recommendation by Scottish Natural Heritage. As a position has not yet been decided by the Scottish Ministers the LDP cannot make any formal designations nor policy references at this point in time.

Coronavirus

4.20 One of the main challenges for the LDP to take account of is the impacts of the Coronavirus (Covid 19) pandemic. The virus has dramatically changed the way we live and work and raises a number of uncertainties for the future. The virus will continue to have a substantial negative impact on the UK economy including retailing, business operations, town centres, rates of housebuilding and demand, the desire to travel on public transport and social distancing. Recovery continues to take place as lockdown restrictions are lifted, although the exact long term impacts and timescales are unknown at this stage. Uncertainties will continue into the LDP adoption period and, at this stage, it is difficult to accurately forecast the full implications of the virus and what actions are necessary to mitigate its impacts.

4.21 The planning system has a crucial role to play within and beyond the immediate emergency. A high performing planning system will have a critical role in supporting our future economic and societal recovery. The LDP must address these issues and policies within the LDP allow

contemplation of a range of material considerations at any given period. Consequently implications Covid 19 may be having on, for example, the economy, performance of town centres, business recovery, house building and health and wellbeing will be addressed as part of the decision making process for relevant planning applications.

4.22 The Council has a statutory duty to have a new adopted LDP in place every 5 years. The new LDP was required to be adopted in May 2021. However, due to Covid 19 lockdown restrictions this has delayed significantly the timescale for adoption and the Scottish Government has acknowledged this. They have stated the pandemic is having an impact on the ability of planning authorities to maintain the review cycle of LDPs within the intended timeframes and consequently expect more Plans will extend beyond 5 years. They have stated they are keen to support authorities in adapting to the current circumstances.

5 NEXT STEPS

5.1 The Proposed LDP, once approved by Council, will be printed for circulation. It will require to be formally advertised. The Environmental Report (ER), which has been prepared under the terms of the Environmental Assessment (Scotland) Act 2005, will also require to be advertised under separate legislation. Therefore in order to make the process as straightforward as possible it is proposed to run the two public representation processes in parallel. The Proposed LDP and ER will be made available for a representation period of 12 weeks.

5.2 Alongside the formal adverts documentation will be placed on the Council website and made available for inspection at all public libraries and at Council Contact Centres if current Covid 19 restrictions are lifted to allow their re-opening. There will be consultation with Scottish Government, key statutory agencies, neighbouring authorities, SESplan authorities and Community Councils as well as public organisations and businesses and members of the public who have previously expressed an interest in the LDP process including parties who submitted representations regarding the MIR. A Communications Plan has been put in place to ensure maximum engagement with all external parties.

5.3 Due to Covid 19 and the consequent issues and restrictions regarding public events / meetings / exhibitions the consultation on the LDP cannot be carried out in the normal manner. The consultation will therefore be carried out via online video presentations which can be accessed via the Council's website. All consultation correspondence from the Council, press releases and other means of publicity will confirm how these presentations can be accessed. These presentations will inform interested parties, for example, the background and purpose of the LDP, how the LDP can be viewed and how representations can be submitted. The consultation will follow the guidance within the Communications Plan and will include the following:

- A short Youtube video which explains how the online consultation process will be carried out
- An interactive Story Map which will allow the public to view and understand the proposed LDP in detail. Electronic links will be given

to view the LDP and allow representations to be submitted via the digital platform Citizen Space

- During the consultation a recorded online video will be prepared which can be downloaded. In advance of the video being placed online the public will be asked what specific questions they would wish it to respond to.
- Direct e-mail update briefings to elected members during the consultation
- Community Council e-mail update briefings
- Information details of the online consultation process including via press releases, SB connect, Twitter, Facebook, radio
- Provide offline communications channels to communicate for those audiences who are not as confident or able to use online communications tools
- Throughout the consultation Planning Officers will be available to give requested advice on the process via telephone and e-mail

5.4 A report to Council will be prepared following the representation period that details those representations received. It is envisaged this will be in summer 2021. The report will advise on the appropriate next steps in the process in the light of the representations received. One option will be to take any representations direct to Public Examination for consideration by an independent Reporter. A further option would be to consider modifications to the Plan.

6 IMPLICATIONS

6.1 Financial

There are costs to the Council arising from the printing, notification and advertisement of the Proposed Plan. There is identified budget available to manage these processes.

6.2 Risk and Mitigations

The report proposes that Council agree the recommended responses to the outstanding consultation comments received on the MIR, and to agree the LDP Proposed Plan for public representation. Following the representation period a report will be prepared on any representations received, and this will then be brought to Council for further consideration. Appropriate stakeholder engagement should ensure that all interested parties in the Plan have an opportunity to submit their representations, this will help mitigate against any potential future challenge. No risks have been identified.

6.3 Integrated Impact Assessment

The proposed LDP has been subject to an Integrated Impact Assessment. No significant issues were identified.

6.4 Acting Sustainably

(a) Economic Growth

The proposed LDP identifies and confirms a wide range of economic growth opportunities.

(b) Social Cohesion

The proposals contained within the proposed LDP will help to meet the diverse needs of people in the local communities.

(c) Protection of the Environment

The proposed LDP, including the supporting Strategic Environmental Assessment and Habitat Regulation Assessment has identified all environmental matters to be addressed and mitigated as the sites are developed.

6.5 Carbon Management

There are no impacts on the Council's carbon emissions arising directly from this report.

6.6 Rural Proofing

The proposed LDP has been subject to rural proofing and no significant issues have been identified. It is considered there will be net positive benefits.

6.7 Changes to Scheme of Administration or Scheme of Delegation

There are no changes to be made.

7 CONSULTATION

7.1 The Executive Director Finance & Regulatory, the Monitoring Officer / Chief Legal Officer, the Chief Officer Audit and Risk, the Service Director HR & Communications, the Clerk to the Council and Corporate Communications have been consulted and any comments received have been incorporated into the final report.

7.2 The Corporate Management Team has been consulted and any comments received have been incorporated into the final report.

SCOTTISH BORDERS COUNCIL PROPOSED LOCAL DEVELOPMENT PLAN 2020

FOREWORD

COUNCILLOR SIMON MOUNTFORD

Scottish Borders Council Executive Member
for Enhancing the Built Environment and
Natural Heritage

To be written after examination.

SCOTTISH BORDERS COUNCIL PROPOSED LOCAL DEVELOPMENT PLAN 2020

1. INTRODUCTION

- 1.1 The Development Plan for the Scottish Borders comprises of two component parts. The SESPlan Strategic Development Plan (SDP) and the Local Development Plan (LDP) set out in this document. The SDP covers Edinburgh and the South East of Scotland and provides high level strategic guidance, setting a context which the LDP must address.
- 1.2 This proposed LDP was prepared taking account of the Monitoring Statement 2018 which evaluated the performance of the adopted LDP 2016 and a range of issues which the LDP must address. It also took account of representations received from a wide range of parties as part of the consultation on the Main Issues Report 2018. An Environmental Report and Habitats Regulation Appraisal were prepared alongside the proposed LDP with a purpose to identify, mitigate or remove any perceived significant adverse impacts on the environment.
- 1.3 The proposed LDP has been prepared to guide the future use and development of land within the Scottish Borders. It sets out a series of policies and proposals indicating where development can or should not take place and provides guidance on the future provision of a range of subjects including housing, business and industrial use, transport, infrastructure and recreation. It seeks to deliver sustainability and promote a low carbon economy, promote health and wellbeing, promote economic growth, regenerate town centres and give protection to the built and natural heritage. To further the promotion of the objective to ensure high standards of building design and site layouts, development proposals must adhere to the principles laid out in the Councils Supplementary Planning Guidance on Placemaking and Design 2010. The proposed LDP provides a broad vision for the period up to 2031, with a focus on the period up to 2026.
- 1.4 The proposed LDP consists of a written statement and proposals maps designed to be read in conjunction with each other.

The Proposed Plan is presented in two volumes, as follows:

VOLUME 1

- 1.5 Part one of Volume 1 confirms what the role of the LDP is in relation to planning for the Scottish Borders. It identifies: the changing context and new challenges to be met; policy background; vision, aims and spatial strategy; growing our economy; planning for housing; supporting our town centres and delivering sustainability and climate change agenda.
- 1.6 Part two of Volume 1 sets out a range of policies covering a wide range of subject matters which provide guidance for the processing of planning applications. Each policy has introductory text setting relevant background information for which the proceeding policy will address. Links are also given to other key policies within the Plan which should be cross referenced as well as other policy guidance documents the Council has produced or proposes to produce relevant to the subject matter. The policies are split into the following five categories:
- **Placemaking and Design (PMD)**
 - **Economic Development (ED)**
 - **Housing Development (HD)**
 - **Environmental Promotion and Protection (EP)**
 - **Infrastructure and Standards (IS)**
- 1.7 A series of Policy Maps are provided indicating a range of specific land use allocations and designations.

VOLUME 2

- 1.8 Volume 2 identifies profiles for all settlements across the Scottish Borders. For each settlement introductory text makes reference to Placemaking Considerations and, where possible reference is made to any Preferred Areas for Future Expansion, Key Infrastructure Considerations and any Changing Context for the settlement.
- 1.9 The settlement maps identify a range of land use allocations and designations. This includes a development boundary and where relevant, allocations for a range of uses including for example, housing, mixed use, business and industrial, redevelopment, key greenspaces to be protected, conservation areas and longer term development.
- 1.10 Each development allocation has a list of site requirements which identify matters to be addressed at the planning application stage. Each site allocated with housing potential has an indicative capacity figure suggesting the number of housing units the site could accommodate.

WHERE ARE WE IN THE PROCESS?

- 1.11 The process leading up to the adoption of the LDP is laid down in Figure 1. Following the public consultation on the proposed LDP any unresolved representations will be subject to Examination by Scottish Government appointed Reporters. The conclusions and recommendations of the Reporter will then be taken into account by the Council before the LDP can be adopted, superseding the current adopted LDP 2016.

FIGURE 1: WHERE ARE WE IN THE PROCESS?

HOW TO RESPOND TO THE PROPOSED LOCAL DEVELOPMENT PLAN

- 1.12 The Proposed Plan will be available for comment for a period of 12 weeks. All representations will be reported back to the Council prior to the next stage of the process.
- 1.13 Appropriate text to be added once full consultation procedures are confirmed.
- 1.14 Appropriate text to be added once full consultation procedures are confirmed
- 1.15 When making a representation you must tell us:
- What part of the plan your representation relates to. Please state the policy reference, paragraph number or site reference;
 - Whether or not you want to see a change;
 - What the change is and why.
- 1.16 Representations made to the Proposed Plan should be concise at no more than 2,000 words plus any limited supporting documents. The representation should also fully explain the issue(s) that you want considered at the examination as there is no automatic opportunity to expand on the representation later on in the process.
- 1.17 If you have any questions regarding the Proposed Plan consultation please do not hesitate to contact the Council at the following email address: localplan@scotborders.gov.uk; or alternatively by telephone 0300 100 1800, and ask for a member of the Forward Planning Team.

SCOTTISH BORDERS COUNCIL PROPOSED LOCAL DEVELOPMENT PLAN 2020

2. THE CHANGING CONTEXT AND MEETING THE CHALLENGES FOR THE SCOTTISH BORDERS

- 2.1 In preparing the LDP consideration must be given to the changing context and challenges of a range of planning related matters within the Scottish Borders which must be identified and addressed. SBC works closely with other government bodies and service providers to meet the challenges. The Local Development Plan facilitates policy though it cannot in itself ensure development.

SOCIO DEMOGRAPHICS

- 2.2 The Scottish Borders is the sixth largest Local Authority in Scotland in terms of land mass or area and has a population estimated at 115,270 in 2018. Over two thirds of the area is classed as accessible rural, with just under one third being remote rural. National Records of Scotland project that the population will increase by over 1.3% to 116,777 by 2026.
- 2.3 Table 1 shows population projections between 2014 and 2018. The table highlights that the population below the age of 45 has decreased whilst the population aged over 45 has increased. The marked increase of those aged 65 and older will have a continuing impact on health and social care services.

TABLE 1: POPULATION BY AGE (2014 TO 2018)

AGE GROUP	2014	2018	NET INCREASE/ DECREASE	POPULATION CHANGE (%)
0-15	19,069	19,046	-23	-0.1
16-24	10,447	10,238	-209	-2
25-44	23,246	22,325	-921	-4
45-64	34,948	35,558	610	1.7
65-74	14,762	15,863	1101	7.5
75+	11,568	12,240	672	5.8
TOTAL	114,040	115,270	1230	1.1

Source: National Records of Scotland (NRS)

- 2.4 Table 2 shows population projections between 2018 and 2026. The table forecasts an increasing ageing population with a reduction in the working age population. The 28.6% increase in the number of people aged 75 and older highlights there will be increasing pressure on health, housing and social care services.

TABLE 2: POPULATION BY AGE (2018 TO 2026)

AGE GROUP	2018	2026	NET INCREASE/ DECREASE	POPULATION CHANGE (%)
0-15	19,046	19,190	144	0.8
16-24	10,238	9,565	-673	-6.6
25-44	22,325	22,899	574	2.6
45-64	35,558	32,712	-2846	-8
65-74	15,863	16,672	809	5.1
75+	12,240	15,739	3499	28.6
TOTAL	115,020	116,777	1757	1.5

Source: National Records of Scotland (NRS)

- 2.5 In 2018 there were 54,413 households in the Borders, which is a 0.2% increase from 54,306 households in 2017. The Government projects that by 2026 this will have increased to 56,497, an increase of 3.8%. Based on the population projections additional housing will have to address the needs of the older population and the smaller sized households (1 to 2 people).
- 2.6 The Council monitors housing approvals and completions through the Housing Land Audit on an annual basis. Completion rates in the Scottish Borders have been low since the recession. The low completion rate is reflective of the low activity in the housing market in the Scottish Borders. In recent years a large percentage of completions recorded in the audits were affordable units built by Registered Social Landlords (RSL) and modest developments of houses in the countryside.

CORONAVIRUS

- 2.7 One of the main challenges for the LDP to take account of is the impacts of the Coronavirus (Covid 19) pandemic. The virus has dramatically changed the way we live and work and raises a number of uncertainties for the future. The virus will continue to have a substantial negative impact on the UK economy including retailing, business operations, town centres, rates of housebuilding and demand, the desire to travel on public transport and social distancing. Recovery will take place once all lockdown restrictions are lifted, although the exact long term impacts and timescales are unknown at this stage. Uncertainties will continue into the LDP adoption period and, at this stage, it is difficult to accurately forecast the full implications of the virus and what actions are necessary to mitigate its impacts.
- 2.8 The planning system has a crucial role to play within and beyond the immediate emergency. A high performing planning system will have a critical role in supporting our future economic and societal recovery. The LDP must address these issues and policies within the LDP allow contemplation of a range of material considerations at any given period. Consequently implications Covid 19 may be having on, for example, the economy, performance of town centres, business recovery, house building, health and well-being will be addressed as part of the decision making process for relevant planning applications.

HEALTH AND WELLBEING

- 2.9 The LDP has a role to play in ensuring that our planning of the physical environment is associated with individual health, social and economic gains. For example, a significant increase in homes within an area may have a knock-on effect for primary care provision. The mix of house types and tenures built, their access to green spaces, transport links, schooling and job markets need to be considered in terms of the health of the community. The LDP must continue to promote health and wellbeing by ensuring access to green spaces and recreational areas and providing opportunities for walking and cycling links.
- 2.10 The LDP has been prepared in consultation with a range of bodies including NHS Borders and it is important that communications continue and are strengthened in order that any potential health care issues, for example impacts on local GP practices, can be identified and addressed at an early stage. Decisions regarding health care provision remain a matter for the NHS.
- 2.11 Good transport links must be developed between homes and job markets. There are a number of geographically isolated communities within the Borders which can cause challenges when accessing services. It is important to recognise the role of active travel in developing transport links between areas both within and outwith the Borders. This has important direct health benefits as active transport is seen to be useful in maintaining a healthy weight.
- 2.12 Scottish Planning Policy (SPP) contains a section on 'Specialist Housing Provision and other Specific Needs'. This requires planning authorities to prepare appropriate policies and consider specific site allocations to address any identified shortfalls in the Housing Need and Demand Assessment (HNDA) in respect of 'specialist housing'. This can take many forms including: accessible and adaptable housing, wheelchair/disabled housing and extra care housing.
- 2.13 The Planning (Scotland) Act 2019 requires the planning system to place increasingly greater emphasis on meeting the housing needs of disabled people. A working group, which comprises of Council Officers, is currently considering methods for incorporating the needs of disabled people into Council policy. At present demand is unknown, and therefore a policy cannot be prepared which states a generic required proportion of disability housing provision for all sites without a quantified justification. At present demand is generally met by housing developers and Registered Social Landlords on a case by case basis when the needs of a particular party is raised. This matter will be developed further by the working group and in due course it is likely a Supplementary Planning Guidance on housing for particular needs will be produced.

INFRASTRUCTURE, TRANSPORT AND SUSTAINABILITY

- 2.14 Transport and digital connectivity remain vital to the future development of the Borders. There is a continuing need to upgrade the main road network across the Region and the LDP confirms the main routes where improvements are proposed. The Borders Railway has been successful in providing improved connection to Edinburgh. The Council continues to support the promotion of the Borders Railway extending south to Carlisle as well as an improved rail service for the Berwickshire communities with a rail halt at Reston.
- 2.15 Scottish Borders Council continues to campaign for the reinstatement of the railway line between Tweedbank and Carlisle via Hawick. Most recently funding for a feasibility study to assess the implications of reinstating the railway line has been confirmed as part of the Heads of Terms of Agreement for the Borderlands Inclusive Growth Deal. The Council has unanimously supported a motion to reinstate the railway line on the original route and continues to support that outcome. The Borders Transport Corridors Study is a Transport Scotland funded pre-appraisal report featuring twenty one potential transport options for the Scottish Borders. These options will be considered by the Council including the potential reinstatement of the former railway line from St Boswells to Berwickshire via Kelso.
- 2.16 The Scottish Borders is benefiting from the Digital Scotland Superfast Broadband rollout which was programmed to connect 94.9% of premises to Fibre to the Cabinet Broadband by the end of 2018 (this includes the additional 'Gainshare' funding). The remaining gap in provision which comprises remoter rural areas and premises which suffer from 'long lines' will be addressed by the Scottish Government's R100 programme. It is critical that the region also maximises the provision of Full Fibre Connectivity to Businesses and the wider community. Mobile phone coverage is an important complement to the rollout of Superfast Broadband. Ongoing investments by Mobile Network Operators will result in significant improvements across the Scottish Borders. Efforts are being made to ensure that this coverage will be as comprehensive as possible and that the region will benefit from 5G coverage in the future.
- 2.17 Infrastructure provision is required to enable future development. Scottish Water is committed to the provision of water and waste water facilities to serve development identified in the Plan although in some instances there are some constraints to be resolved. Developers will need to liaise with Scottish Water to discuss issues to be addressed, timescales for implementation and costs involved. Further extension to the national grid will be required to promote the potential for renewable energy production. New housing allocations can put a strain on education provision in some school catchment areas. Given the relatively limited number of houses required within the LDP period for the Scottish Borders as required within the SDP, it is not envisaged this should cause insurmountable issues and the officers continue to liaise with the Education and Lifelong Learning (SBC) regarding these matters.
- 2.18 Delivering sustainable development and ensuring high quality design from all developments via good placemaking principles are key requirements which the LDP supports. The LDP promotes a low carbon future to help achieve climate change route mapping targets set out by the Scottish Government. It promotes economic stability and growth whilst protecting the built and natural intrinsic qualities of the Scottish Borders. There is reference to these objectives and how these can be achieved throughout the LDP. Chapter 8 refers to the delivery of sustainability and the climate change agenda.

SCOTTISH BORDERS COUNCIL PROPOSED LOCAL DEVELOPMENT PLAN 2020

3. POLICY BACKGROUND

NATIONAL PLANNING POLICY

- 3.1 The Council has a statutory duty under the Planning etc (Scotland) Act 2006 to prepare a Local Development Plan. All strategies and policies within the LDP must reflect the requirements of National Planning Framework 3 (NPF3) and Scottish Planning Policy (SPP). NPF3 sets out a vision for development and investment across Scotland. It identifies national development which should be accommodated within LDPs and promotes sustainable economic growth. SPP sets out national planning policies which the planning process must implement for the development and use of land in order to help deliver the objectives of NPF3.
- 3.2 The Scottish Government is currently undertaking a reform of the planning system. This will include the production of National Planning Framework 4 and will also incorporate Scottish Planning Policy (SPP). The Planning Act requires major changes to the planning system including procedures for the preparation of Development Plans. Consequently, this LDP will be the last prepared under the Planning etc (Scotland) Act 2006.

REGIONAL PLANNING POLICY

- 3.3 The LDP must address the requirements of the Strategic Development Plan (SDP) for the area. The SDP is provided by SESPlan of which Scottish Borders Council is a member planning authority along with southern Fife, the City of Edinburgh, Midlothian, West Lothian and East Lothian. The SDP is a statutory planning document which is prepared or updated every 5 years and covers a twenty year period. It communicates strategic level and cross boundary planning policy and applies national policy and guidance for the Scottish Government. It is used to inform the LDPs produced by each of the Member Authorities in the region.

- 3.4 The current SDP was approved in June 2013. However, the proposed SDP which was intended to replace SDP 2013 was rejected by Scottish Ministers on 16th May 2019. The reasons cited were the Ministers were not satisfied that the Plan was informed by an adequate and timely Transport Appraisal and did not take account of the relationship between land use and transport.
- 3.5 Queen's Counsel (QC) opinion was sought by SESPlan authorities as to how this matter should be addressed. QC advice was that, whilst out of date, SDP 2013 remains the approved Strategic Plan and must therefore continue to be referred to. However, QC advice also stated that whilst the proposed SDP was rejected there are elements of the supporting technical papers and documents which helped guide the proposed SDP and incorporate more up to date positions. Consequently these should be considered as material considerations which include the following:
- a) The policies of proposed SESplan2 with the exception of those policies relating to transport infrastructure
 - b) The supporting material prepared in respect of SESplan2
 - c) Housing Need and Demand Assessment
 - d) General Register Office predictions on population growth
 - e) Housing Land Audits
 - f) The material contained within the Reporter's examination report
- 3.6 In terms of c), QC opinion was that the Housing Need and Demand Assessment 2 (HNDA2) which was prepared for SDP2 and which was confirmed as robust and credible by the Scottish Government in a letter from the Centre for Housing Market Analysis dated 27th March 2015 can be taken into account in preparing emerging LDPs. HNDA2 is at present the most up to date and therefore reliable assessment of housing need and demand in the SESplan area.
- 3.7 Consequently where the LDP makes reference to the SDP it will incorporate the approved SDP 2013 with consideration given to the aforesaid documents. It is acknowledged that the Planning (Scotland) Act 2019 will abolish the SESPlan and it may be by the time this LDP is subject to Examination all references to it will require to be removed.
- 3.8 The Spatial Strategy for the Scottish Borders includes Strategic Development Areas (SDA's). Towns within these SDA's should provide the focus for retail, commercial and strategic opportunities. Improved connectivity from Edinburgh to the north and from Newcastle and Carlisle to the south are recognised as being essential for the future economic growth of the area. A range of placemaking and design principles are identified which new developments should adhere to. A strategic green network priority area will connect settlements in the Central Borders with Peebles and Innerleithen in the west. Former railway lines represent a network of redundant track beds which link many of the larger towns. The network offers considerable potential for walking and cycling access to town centres and a range of tourism sites. The Council is currently liaising with Dumfries and Galloway Council with a view to considering cross boundary relationships. This will help inform the preparation of Regional Spatial Strategies.

LOCAL DEVELOPMENT PLANNING POLICY

- 3.9 The LDP requires to set out detailed policy criteria and proposals in order to ensure appropriate development which can inform and guide decisions on planning applications. LDPs must accord with national planning requirements and take account of a wide range of other material considerations. The Development Plan process seeks to ensure the right development takes place in the right place. The Scottish Borders is an attractive place to live and work and the Council must continue to strike the balance between supporting sustainable economic growth and protecting the landscape and environment. The Council places a very strong emphasis on placemaking and design principles when assessing new development proposals.

CORPORATE OBJECTIVES

- 3.10 In November 2017, the Community Planning Partnership (CPP) published its Scottish Borders Community Plan (known as a 'Local Outcomes Improvement Plan' within the Community Empowerment (Scotland) Act 2015, and replaces the Single Outcome Agreement). Within the Community Plan, there are four themes (Economy, Skills and Learning; Health, Care & Well-Being; Quality of Life; Place) and fifteen outcomes spread across the four themes. Key partners within the Borders such as SBC, NHS Borders, Registered Social Landlords, Third Sector and Police are committed to actions that will impact positively on the outcomes in the Community Plan over the next ten years.
- 3.11 Community planning is the process by which Councils and other public bodies work with local communities, businesses and community groups to plan and deliver better services and improve the lives of people who live in Scotland. The Scottish Borders Community Planning Partnership is tasked with taking this forward in the Scottish Borders. With the introduction of the Community Empowerment (Scotland) Act 2015 the Scottish Government has asked each CPP to detail how they plan to tackle their own local challenges and improve outcomes in their area, with a particular focus on reducing inequalities. The Scottish Borders CPP published the Scottish Borders Community Plan in November 2017. This plan is a live document and is updated on an ongoing basis.
- 3.12 The Scottish Borders CPP works together, and with local communities and businesses on tackling the challenges and improving outcomes identified in the Community Plan. A number of the outcomes within the Plan have strong ties with spatial planning, and there is a desire to more closely align the work of community planning with spatial planning. A key theme highlighted in the recent planning review, is the need for community planning and development planning to work closer together, in order to meet the aspirations of local communities.
- 3.13 At a more local level Area Partnerships have been established to take forward the Community Empowerment Act's requirement for Locality Plans. Some inequalities and outcomes are not Borders-wide but much more localised to specific communities. Therefore there is one specific Locality plan for each of the following areas:
- Berwickshire
 - Cheviot
 - Eildon
 - Teviot & Liddesdale
 - Tweeddale

FIGURE 2: LOCALITY AREAS

The outputs from the five Locality Plans are addressed within the LDP where relevant to the planning process.

3.14 In February 2018, aligned to the Community Plan, SBC published its new Corporate Plan (Our Plan for 2018 -2023 and your part in it). The plan makes commitments under four themes; ensuring that we have great, accessible services; independent achieving people; a thriving economy and empowered communities. The commitments made within the Plan's theme include:

- Working with partners to create the best possible environment in which to do business, using the South of Scotland Enterprise Agency, Borderlands and City Deal (including delivering the Borders Innovation Park) to encourage inward investment, growth, diversification, innovation and job creation
- Supporting the case for the extension of the Borders Railway and the rail halt at Reston; and
- Working with partners to increase housing supply (both affordable and private sector) creating a sense of place, community belonging and increasing health and wellbeing.

SCOTTISH BORDERS COUNCIL PROPOSED LOCAL DEVELOPMENT PLAN 2020

4. VISION, AIMS AND SPATIAL STRATEGY

VISION

- 4.1 The Scottish Borders forms part of the Edinburgh City Region and within the proposed Strategic Development Plan the planning vision was set. It is considered this vision is up to date and relevant to the Scottish Borders and will guide the development of the policies and proposals in the Local Development Plan. It states for 2038:

“Sustainable growth has been achieved by carefully managing those assets that provide the most benefits and by making well designed, successful places where people can thrive. More people are able to afford a home in a place near where they work. A series of cross boundary transport projects have made travel by public transport easier and more people are cycling and walking to work. The economy continues to grow and the region remains an outstanding place to live, work and visit. Communities in the region are healthier and there is less inequality and deprivation.”

AIMS

GROWING OUR ECONOMY

- 4.2 The LDP provides opportunities for economic growth and job creation. It is vital there is a sufficient supply of business land across the Scottish Borders. Further land must be allocated in locations where a shortfall is identified and funding and delivery mechanisms must be put in place which will help ensure sites are fully serviced and are readily available for use. Sites allocated for specific uses, particularly those of a strategic nature, should continue to be safeguarded although further flexibility within policy should be allowed, where appropriate, to ensure there are adequate opportunities for businesses seeking to set up. Improvements to the road network and public transport must continue to be supported.

PLANNING FOR HOUSING

- 4.3 The LDP incorporates a generous supply of housing land for a range of users. Although there have been limited annual completion rates for mainstream housing, there has been a significant increase in housebuilding by Registered Social Landlords (RSLs) which has offered greater opportunities for affordable units. Given the limited take up of allocated housing sites, the high land supply within the current adopted LDP and the limited number of new houses required for the Scottish Borders as identified within HNDA2, the LDP promotes an appropriate number of new housing sites to reflect the level of demand.

TOWN CENTRES

- 4.4 The role of town centres is changing particularly within the retail sector, most notably from an increase in online shopping which has reduced footfall within town centres. The LDP must adapt to this change and consider ways in which town centres can be regenerated and uses are promoted and supported which can improve vitality and viability and retain their focus as community and service centres.

RURAL ENVIRONMENT

- 4.5 In remote rural locations improved transport modes and the need for first class digital connectivity must continue to be addressed. Brexit may create some major challenges for rural landowners and the LDP seeks to encourage diversification of the rural economy by supporting appropriate economic development and tourism in the countryside.

BUILT AND NATURAL HERITAGE

- 4.6 The built and natural heritage are major component parts of the attractiveness of the Scottish Borders which must be protected and enhanced. There are a large number of listed buildings, conservation areas, landscape and biodiversity designations and opportunities must continue to be explored to capitalise on these assets in the interests of tourism and economic development. The LDP continues to ensure new development is located and designed in a manner which respects the character, appearance and amenity of the built and natural heritage of the area and that good placemaking and design principles continue to be implemented.

SUSTAINABILITY AND CLIMATE CHANGE

- 4.7 The Council continues to promote and investigate ways to address climate change issues and adaptation in order to seek a low carbon economy. There is a continuing need to reduce travel, greenhouse gas emissions as well as energy consumption and reduce waste arisings, and to support renewable energy opportunities where possible. Heat mapping must be investigated and developed in order to explore opportunities for supply and demand of renewable energy and new buildings must be designed to be resilient to the effects of climate change.
- 4.8 To deliver the vision the main aims are summarised as follows:

COMMUNITIES

- Provide adequate land for mainstream and affordable housing
- Build sustainable communities which are attractive and distinctive
- Create places to live in accordance with good placemaking and design principles
- Encourage better connectivity by transport and improve digital networks

GROWING ECONOMY

- Provide an adequate range of sites and premises for business/industrial uses
- Promote economic development opportunities along the railway corridor
- Promote the regeneration of town centres to make them vibrant and viable focal points within our communities
- Maximise and promote the Scottish Borders tourism potential and build a strong visitor economy
- Ensure the delivery of adequate infrastructure to satisfactorily serve developments

SUSTAINABILITY

- Protect and enhance the built and natural environment
- Promote development of brownfield sites
- Make provision for waste management
- Promote climate change adaptation
- Protect key greenspaces within built up areas
- Encourage better connectivity
- Extend and improve green network opportunities and links

SPATIAL STRATEGY

4.9 The SDP requires strategic growth in the Scottish Borders to be directed to three Strategic Development Areas (SDA's) in Central, Eastern and Western Borders and Figure 3 identifies the Spatial Strategy for the Scottish Borders which includes the SDA's. Towns within these areas should provide the focus for retail, commercial and strategic opportunities. Improved connectivity from Edinburgh to the north and from Newcastle and Carlisle to the south are recognised as being essential for the future economic growth of the area.

FIGURE 3: STRATEGIC DEVELOPMENT PLAN SPATIAL STRATEGY

Reproduced by permission of Ordnance Survey on behalf of HMSO. © Crown copyright and database right 2019. All rights reserved. Ordnance Survey Licence number 100023423.

- 4.10 The Central SDA focuses around the main towns of Galashiels, Melrose, Earlston, Kelso, Jedburgh, Hawick and Selkirk. This area has the largest population within the Scottish Borders and is the primary area for future growth. It is at the centre of the roads transportation network and is also served by the Borders Railway and the Galashiels Transport Interchange. The Central SDA is supported by the Eastern and Western SDA's which perform secondary roles within the spatial strategy.
- 4.11 The Eastern SDA is focused on Duns and Eyemouth. Duns is the main administrative centre for the area and future development potential would be enhanced by the delivery of the railway station at Reston. Eyemouth is located on the extreme eastern edge of the Scottish Borders with an easy access onto the A1. It continues to function as a working fishing port with an important tourism role. This part of the growth area would benefit from the dualling of the A1. The coastal economy at Eyemouth is important to the local area. There has been a change in context at Eyemouth over recent years in that there is now the opportunity for the town to offer a key location for emerging offshore renewable energy projects.
- 4.12 The main part of the Western SDA are the settlements of Peebles, Innerleithen and Walkerburn which are located along the A72. The success of outdoor recreational facilities at Glentress has helped tourism in the area and helps the status of Peebles as a recognised buoyant town centre. Peebles remains an attractive area for prospective house builders partly due to its proximity to Edinburgh. However, potential flood risk and the need for a second bridge over the River Tweed prior to any new housing land allocations being released on the south side of the River Tweed, limit options at this point in time.

SCOTTISH BORDERS COUNCIL PROPOSED LOCAL DEVELOPMENT PLAN 2020

5. GROWING OUR ECONOMY

- 5.1 National planning policy promotes sustainable economic growth and the planning system has a role to play in ensuring the right development in the right place and promoting strong, resilient and inclusive communities. In order to attract businesses and investment, the LDP has a role to play in promoting development which will increase employment opportunities, economic activity and sustainable growth. This includes the Council's continuing support and promotion for improving digital connectivity throughout the Scottish Borders. The Covid 19 will continue to have an impact on the economy and the LDP must ensure there is an emphasis on supporting sustainable economic growth to combat the virus impacts where possible.
- 5.2 The economically active workforce in the Borders numbered 54,000 in 2018, with 41,900 being employees and 10,000 self-employed. The main employment sectors were health and social work, retail, construction, education, agriculture, manufacturing, tourism and public administration. There continues to be a reliance upon traditional rural activities focused upon agriculture, forestry and fishing. All of these industries face continuing challenges to their competitiveness with a consequential impact on the economic viability of the rural area.
- 5.3 Unemployment has declined steadily over the last 8 years in the Scottish Borders by 2.9%, but rose slightly in 2016. Unemployment levels in the Scottish Borders are back to levels seen pre-2008 before the economic downturn. The figures are compared with those for Scotland in Figure 4 below, confirming that the Scottish Borders is performing well in comparison to the national average. Wage levels for Scottish Borders residents are lower than the Scottish average, with the average weekly wage for full-time workers being £527 in 2018, 94% of the Scottish average.

FIGURE 4: UNEMPLOYMENT (2010 TO 2018) (% OF ECONOMICALLY ACTIVE)

Source: NOMIS (Office for National Statistics)

- 5.4 The Council carries out an annual business and industrial land audit of allocated business and industrial sites. The most recent 2018-19 audit confirms there is an adequate supply of business and industrial land in most parts of the Scottish Borders, but there is continued low take-up through development. Distribution of available land is important and there is a recognised need to allocate further business and industrial land within the Peebles area in particular and Galashiels. Furthermore, with the investment in the Borders Railway the provision of high amenity business land in the Central Borders is an essential component to gain maximum economic benefit to the Scottish Borders.
- 5.5 As required by the SDP the LDP identifies, safeguards and delivers a sufficient supply of business and industrial land taking account of market demands and existing infrastructure. Policy ED1: Protection of Business and Industrial Land categorises all allocated and safeguarded sites into one of two categories which identify preferred uses within them. However, these offer some flexibility of uses in certain circumstances, although care must be taken that sites are not diluted by a proliferation of non-business/industrial uses.
- 5.6 One of the main challenges of the LDP was to find new land for business and industrial use in the vicinity of Peebles. There are significant constraints in identifying both business/industrial and housing land in this area. Peebles remains a highly attractive town for prospective development and the LDP has considered options for both short and longer term purposes. Due to the ongoing uncertainty as to when or indeed if a new bridge will be built, any proposals identified to the southern side of the town can only be longer term options. A 4.9 ha site has been identified for business and industrial land at Eshiels.
- 5.7 The Borders Railway 'Maximising the Impact: A Blueprint for the Future' (November 2014) seeks to ensure economic development opportunities are maximised along the railway corridor. The LDP2 must seek to identify and promote these opportunities. A Tweedbank Spatial Framework (November 2017) has been prepared for Tweedbank, including the Tweedbank Expansion site to the north of the railway station (MTWEE002). This site has the capacity to accommodate a range of uses and has excellent development opportunities given its attractive setting, its proximity to the railway station and its location within an area with a proven housing market demand. The

Spatial Framework sets out some initial ideas and is being developed further via Supplementary Planning Guidance. A Masterplan (January 2018) has also been prepared for sites within the centre of Galashiels. This is a useful document outlining a number of potential primarily longer term redevelopment opportunities and options to help regenerate the town centre. The new Great Tapestry of Scotland building in Channel Street is currently under construction and is expected to be open in 2021. It is anticipated this will act as a key catalyst in regenerating the town centre. There is also a need to find further business and industrial land in Galashiels, although land at Tweedbank will offer some opportunities.

- 5.8 A number of regeneration projects are being carried out in towns across the Region including Hawick, Jedburgh, Eyemouth, Selkirk and Galashiels. These comprise of Council and local community led initiatives. Measures include Town Action Plans which incorporate a range of proposals and Conservation Area Regeneration Schemes. In Hawick, for example, some of the key areas of progress include the Hawick Business Growth project with £3.6million of Scottish Government funding; relocation of Business Gateway to Tower Mill; the completion of Hawick Town Centre Marketing Pilot; the Borders Railway Extension Feasibility Scoping Study report; progress on the design and consultation of Hawick Flood Protection Scheme; and a range of Tourism Marketing activity.
- 5.9 In order to help promote and encourage development interest a Simplified Planning Zone at Tweedbank has been approved. In essence this means new proposals within the Business Park can be constructed, subject to satisfying certain development criteria, without the need to submit formal planning applications. Recently approved Supplementary Planning Guidance for the Business Park seeks to safeguard land and buildings for specific business types and to help improve the utilisation of the business and industrial land.
- 5.10 The City Region Deal offers opportunities to fund and deliver infrastructure in more innovative ways in years ahead. The Borderlands Initiative is a national cross border project which SBC will develop in partnership with Dumfries and Galloway, Cumbria, Carlisle and Northumberland. It seeks to deliver improved infrastructure, transport and communication links, economic growth and employment opportunities. The creation of a new South of Scotland Enterprise Agency covering Dumfries and Galloway and the Scottish Borders offers a once in a generation opportunity to increase the level of investment in economic growth, skills and innovation. It is intended that the new Agency will closely align its work with Scottish Enterprise, Skills Development Scotland, Scottish Funding Council and Visit Scotland.
- 5.11 Whilst the outcome and any consequent impacts of Brexit remain uncertain, it is likely that there will be changes to the rural economy and land uses. This may include the need for more farm diversification proposals and likely significant pressures for forestry planting. Consequently, within the decision making process the LDP gives more weight to any economic development benefits for new business, leisure and tourism developments in the countryside.
- 5.12 Carlisle Airport has recently opened for passenger traffic and may provide economic opportunities for the southern parts of the Scottish Borders. In particular, Newcastleton is well located in relation to the airport and consideration requires to be given and developed with regards to potential opportunities this may offer for the local community.

SCOTTISH BORDERS COUNCIL PROPOSED LOCAL DEVELOPMENT PLAN 2020

6. PLANNING FOR HOUSING

BACKGROUND

- 6.1 Scottish Planning Policy (SPP) requires Councils to identify a generous supply of land for housing within all housing market areas, across a range of tenures, maintaining a 5 year supply of effective housing at all times. SPP sets out that Planning Authorities should prepare an annual housing land audit as a tool to critically review and monitor the availability of effective housing land, the progress of sites through the planning process, and housing completions. This is to ensure a generous supply of land for house building is maintained and there is enough effective land for at least 5 years. A site is only considered to be effective, where it can be demonstrated that within 5 years it will be free of constraints, and can be developed for housing. The Covid 19 is likely to have an effect on housebuilding and demand due to the economic impacts of the virus. Longer term housebuilding demand is difficult to forecast. The LDP will seek to encourage and facilitate increased levels of development activity and housing completions, particularly in respect of affordable housing.
- 6.2 Table 3 sets out the housing land requirement for the Scottish Borders for the period (2012/13 to 2030/31). Appendix 2 provides further context to the housing land requirement, contributions to the requirement and the monitoring of the five year effective housing land supply.

TABLE 3: HOUSING LAND REQUIREMENT (2012/13-2030/31)

HOUSING LAND REQUIREMENT	2012/13 TO 2030/31
HLR for Scottish Borders (2012/13 to 2030/31)	7,288

- 6.3 Following Examination of the Scottish Borders LDP 2016 the Reporter identified a housing land shortfall of 916 units, stating that the Council should address this via Supplementary Guidance (SG). The Council has since completed the SG which was agreed by Scottish Ministers in November 2017. Consequently, all sites within the SG are now formally allocated within the LDP and form part of the Councils' established housing land supply.

6.4 The Council produces an annual Housing Land Audit (HLA) in order to monitor the housing completions, established and effective housing land supply. The most recent 2019 HLA (update) recorded 345 completions. The average rate of completions for the past five years was 292 units per annum. Table 4 below shows the historical completion rate between 2014/15 and 2018/19.

TABLE 4: HISTORICAL COMPLETIONS (2014/15 to 2018/19)

AUDIT PERIOD	2014/15	2015/16	2016/17	2017/18	2018/19	Total
Completions	272	373	250	222	345	1,462

Source: Housing Land Audit 2019

- 6.5 The Strategic Housing Investment Plan (SHIP) is the key document for identifying strategic housing projects to assist in delivering the Scottish Government’s affordable housing programme to meet a wider range of housing needs within the community. The four local Registered Social Landlords (RSL) partners who play a key role in delivering affordable housing projects across the Scottish Borders are Eildon Housing Association, Berwickshire Housing Association, Waverley Housing and Scottish Borders Housing Association. The RSLs have a programme of delivery for new affordable housing and the LDP must continue to help allocate and support the delivery of SHIP sites.
- 6.6 The Council’s Local Housing Strategy 2020-2025 identifies a number of issues to be addressed, including availability of further affordable housing, provision of housing for the elderly, the poor accessibility of housing to allow younger people to remain in the Borders and the need for the supply of housing to reflect demand (i.e. the right housing in the right place). There are many synergies between the role and objectives of the Council’s Housing and Planning Services and new departmental restructure will ensure closer working practices which have been of benefit in the process of preparing the LDP.
- 6.7 Whilst the western area has a considerable amount of undeveloped allocated housing land it should be noted that much of this is within Innerleithen and Walkerburn. Historically Peebles has a vibrant market for housing development and the development industry will continue to seek further land in this area to meet demand. However, due to a number of physical and infrastructure constraints further housing site options are limited. Consequently consultants were appointed to prepare a study to identify both potential short and long term housing options and their findings have influenced the housing proposals in Tweeddale within the LDP.
- 6.8 To ensure an adequate and effective housing land supply there is a requirement to ensure that there is a likelihood that sites allocated within the LDP will be developed. For any sites which have been allocated within the LDP for a significant period of time with no development interest from either the landowner or the development industry then the sites were considered for removal. The Council wrote to the owners of a number of such longstanding allocations seeking evidence of the likelihood of future development. As a result, a total of five sites have not been carried forward into the LDP, and the mixed use site (MGREE001) is now a business and industrial allocation.
- 6.9 Sixteen new allocations with an indicative capacity are included within the LDP, comprising of fifteen housing sites and one mixed use site. It should be noted that (AGREE009) was included within the 2019 HLA established housing land supply, as a windfall site. Therefore, the indicative site capacity for 38 units cannot be counted in the new allocations being taken forward, to avoid double counting the site. The new sites provide a total indicative capacity of 567 units. This will provide additional flexibility to the sites being carried over from the previous plan and ensure that the LDP provides a range of sites in terms of size, tenures and density throughout the whole of the Scottish Borders. The LDP also identifies potential longer term sites which could be brought forward if required within the LDP period, subject to addressing any constraints.
- 6.10 The sites included within the Proposed Plan are situated in or around existing settlements. In the longer term it may be that ideas come forward for new ‘stand-alone’ settlements in high demand areas. As a result of the complexity of the work involved in preparing the infrastructure and design of any new settlements and that the housing land requirements are satisfied, there are no new settlements included within the Proposed Plan. However, the Council is open to considered and evidenced proposals of this kind being put forward by developers or landowners so that early consideration can begin.

SCOTTISH BORDERS COUNCIL PROPOSED LOCAL DEVELOPMENT PLAN 2020

7. SUPPORTING OUR TOWN CENTRES

- 7.1 Town centres are a key element of the social and economic fabric of Scotland. SPP encourages the improvement of town centres to create distinctive and successful places which are a focus for a mix of uses including retail, housing, leisure, entertainment, recreational, cultural entertainment and community facilities. The Town Centre First Principle 2014 (produced by the External Advisory Group) asks that the Scottish Government, Local Authorities, the wider public sector, businesses and communities put the health of town centres at the heart of proportionate and best-value decision making, seeking to deliver the best local outcomes regarding investment and de-investment decisions, alignment of policies, targeting of available resources to priority town centre sites, and encouraging vibrancy, equality and diversity. For proposals which attract significant footfall a sequential 'town centre first' approach to site selection remains fundamental.
- 7.2 The LDP acknowledges that town centres make a significant contribution to the SESplan area as centres for employment, services and civic activity and identifies a network of centres. New retail development can act as a catalyst to further investment in addition to creating employment opportunities and associated growth. The LDP supports uses in town centres that generate significant footfall such as retail and commercial, leisure, offices, community, cultural facilities and opportunities for town centre living. Consideration should also be given to the evening and night time economy in town centres.
- 7.3 The Council carries out regular town centre surveys in order to monitor, for example, vacancy rates, footfall and the current uses of premises. These surveys are an important part of the monitoring process and Figures 5 and 6 are examples of outputs from these surveys.

FIGURE 5: RETAIL UNIT VACANCY RATES OF SEVEN LARGEST TOWNS (SUMMER 2009 TO SUMMER 2019)

Source: Retail Survey Report (summer 2019)

FIGURE 6: AVERAGE TOWN CENTRE WEEKLY FOOTFALLS (2007 – 2019)

Source: Town Centre Footfall Surveys (autumn 2019)

7.4 The role of town centres is changing, due to factors such as an increase in online shopping. The decline in the performance of town centres within the Scottish Borders can be seen within Figures 5 & 6, particularly with regards to some towns. The economic downturn has an impact across the country and these trends are not unique to the Scottish Borders. Retail and town centre policies must adapt to changing circumstances. In recent years the LDP has amended the retail policy to adapt to such changes and reduced the size of some designated Core Activity Areas. Although these changes have helped to a degree the LDP has reviewed and amended town centre and Core

Activity Area policy. It is the role of the LDP policies to ensure that our town centres remain a vibrant focus for communities, not just as retail hubs but also as service centres. The Covid 19 pandemic is likely to have an adverse impact on the performance of town centres although, at this stage, there is some uncertainty as to what the extent of this will be. Weight must therefore be given to the need to stimulate economic activity in our town centres within the planning application decision making process.

- 7.5 Policy ED3: Town Centres and Shopping Development within the LDP generally allows a wide range of uses within town centres. However, on ground floor properties within town centres, Policy ED4: Core Activity Areas in Town Centres has a more stringent approach to ensuring uses are key catalysts in increasing footfall and economic activity and in turn prevent the gradual loss of essential town centre activities which are important to the vitality and viability of the town centres. The policy promotes and seeks to safeguard retail uses and supports food and drink outlets and certain office uses which are considered appropriate complementary uses. The policy does however offer a degree of flexibility which can be applied to decision making across the Scottish Borders for any relevant planning application. This allows consideration of, for example, how the particular town centre is performing, cognisance of current vacancy and footfall rates, opportunities for joint shopping trips and the longevity and marketing of the vacant retail unit. If a town centre is performing well there may be little justified need to lose retail premises. However, if there are significant factors which result in town centres underperforming, there may be a case for allowing alternative uses.
- 7.6 Due to the changing role of town centres and the consequent underperformance of some of them, a one year pilot study was put in place in order to monitor its impacts which could be taken forward into the LDP. The main changes implemented by the pilot study related to the core activity areas. In Hawick the core activity area was removed and whilst retaining the core activity area in Galashiels, the study allowed a wider range of uses. With reference to considering the length of the vacancy of premises, for all Borders towns it stated that if premises have been vacant for six months and evidence is submitted which confirms they have been adequately marketed for a substantial period of that time, then that will carry much weight in the decision making process.
- 7.7 With the exception of Hawick and Stow the LDP proposes the retention of the core activity areas whilst allowing a wider range of uses within them. This includes Class 2 Uses. However, within the three town centres which continue to perform consistently well (Peebles, Kelso and Melrose) there is a higher standard of policy test applied to ensure that any Class 2 uses do not dilute the high level performance of these towns in terms of footfall and vacancy rates. The six month vacancy test referred to within the pilot study has been integrated into the policy.

SCOTTISH BORDERS COUNCIL PROPOSED LOCAL DEVELOPMENT PLAN 2020

8. DELIVERING SUSTAINABILITY AND CLIMATE CHANGE AGENDA

- 8.1 National planning policy and guidance promotes and supports renewable energy to facilitate the transition to a low carbon economy. The Climate Change (Scotland) Act 2009 requires all public bodies to contribute to the emissions targets in the Act and to deliver the Government's climate change programme. The need to mitigate the causes of climate change and the need to adapt to its short and long term impacts should be taken into account in all decisions within the planning process. The generation of energy from renewable sources and low carbon technologies can help reduce dependence on fossil fuels and reduce the output of harmful emissions.
- 8.2 The Scottish Government produced the 'Scottish Energy Strategy: the future of energy in Scotland 2017' which sets out new energy targets and continuing support and promotion of maximising climate change ambitions. The Scottish Government's Onshore Wind Policy Statement 2017 gives clear support for the promotion of further renewable energy types including wind farms and it confirms the economic and community benefits wind farms offer. The Climate Change Plan 2018 confirms the level of ambition and implementation of delivery in order to address climate change. Scottish Borders Council has been proactive in supporting a range of renewable energy types. In implementing statutory duties to support both renewable energy and protect the landscape and the environment, the Council seeks a balance between these objectives within the decision making process. The SDP requires LDPs to identify, as appropriate, opportunities to co-locate sources of high heat demand with sources of heat supply and to locate new development where passive solar heating and solar power can be maximised.

- 8.3 National Planning Framework 3 and Scottish Planning Policy (SPP) are supportive of promoting renewable energy and also identify the need to support other key sustainability principles of social, economic and environmental considerations. The SDP confirms the importance of improved connectivity with better walking and cycling networks and promotion of the need to reduce travel and encourage more low carbon transport choices. Developments should be designed so that their use and layout helps reduce the need to travel by car. Developments should include clear and direct links to public transport nodes. These matters will continue to be embedded into LDP policy when assessing new development proposals. The Council will continue to promote key strategic walking, cycling and recreational routes. The draft Borders Transport Study 2018 identifies a series of transport corridor options which will be considered and developed further. The Council is promoting the installation and use of electric vehicle charging points.
- 8.4 The Council is formally committed to embedding sustainable development in its strategies, policies and service delivery and has set up a Sustainable Development Committee. By doing so, the Council will ensure that it has a clear, coherent and overarching ethical framework for its activities, which brings benefits to the organisation and supports its efforts to optimise outcomes. It is proposed that the Council manifests its commitment to sustainable development by pledging to drive and monitor the implementation of the UN Sustainable Development Goals as they relate to local government. Such a commitment recognises the increasing urgency that we live and use resources in ways which does not compromise the quality of life for future generations. Two key areas of benefit were pledged by the Council to deliver the UN Sustainable Development Goals, namely:-
- An overarching ethos bringing clarity, consistency and coherence to the Council’s approach across the full range of its activities
 - Taking a leadership role in relation to sustainable development enabling the Council to maintain and build value organisationally through the efficient and sustainable use of resources, to develop public value in its relationship to citizens and communities, and to manage reputational risk
- 8.5 To support implementation, the Committee’s role will be required to ensure that appropriate practice is adopted and followed in how the Council undertakes the full range of its activities and will report annually to Council on progress. It was recognised that not all the Committee’s targets carried the same relevance in the context of the Council’s responsibilities and the Committee would promote a practical view of this based on good practice.
- 8.6 The Council produced the Scottish Borders Low Carbon Economic Strategy 2023 in 2013, and developed a new Home Energy Efficiency and Affordable Warmth Strategy in 2018, both of which set out a series of strategic aims, initiatives and priority actions. The Local Housing Strategy (2017-22) also has a requirement to consider and address housing’s contribution to Climate Change. The Scottish Government has placed a duty on Councils’ to deliver and implement Heat and Energy Efficiency Plans. The Council will consider further an appropriate approach to ensure delivery of its objectives. The Energy Efficient Scotland (EES) programme seeks to follow the Scottish Government’s promotion of addressing climate change issues and reductions in fuel poverty. In partnership with the Council, Changeworks has set up an EES pathfinder project in Peebles. The project has four separate elements: development of a Local Heat & Energy Efficiency Strategy; taking an area based approach to community engagement; working with the non-domestic sector (through a Peebles High School project and impartial advice to local businesses); and supporting fuel poor households to make homes warmer and cheaper to heat with energy efficiency home improvements such as insulation.

- 8.7 As recommended by the Directorate for Planning and Environmental Appeals following the Examination of the LDP (2016), the Council was required to produce Supplementary Guidance (SG) on Renewable Energy. The SG has since been adopted in July 2018.

Supplementary Guidance on Renewable Energy

Landscape Capacity and Cumulative Impact Study

- 8.8 Wind energy is the main component part of the Renewables SG and the document gives useful and up to date advice on a range of matters to be addressed when determining planning applications for turbines. This includes an updated Ironside Farrar Landscape Capacity and Cumulative Impact Study 2016. Cross boundary strategic wind farm issues will be addressed and explored in consultation with neighbouring authorities as well as identifying opportunities for the repowering of existing wind farm sites. The SG also makes reference to a range of other common energy types. This includes reference to micro-renewables including photovoltaic panels, field scale solar voltaics, biomass, energy from waste, anaerobic digestion, hydro and ground source heat pumps. For each of these energy types, reference is given to useful background information and good planning practice guidance. The SG confirms the Council's continuing support for all renewable energy types within appropriate locations.
- 8.9 The Scottish Government's Zero Waste Plan seeks to make the most efficient use of resources by minimising demand and maximising re-use, recycling and recovery. The SDP states LDP's will support proposals which encourage recycling and recovery of waste where these are in accordance with the Zero Waste Plan and take account of the environmental, transport, economic and amenity factors. The Council will continue to promote waste treatment to meet the targets of the Zero Waste Plan. Opportunities for co-location with other uses which can make use of any recovered heat will be supported. Planning consent has recently been granted to develop a waste transfer station at the Council's site at Easter Langlee in Galashiels.
- 8.10 Flood risk remains a primary issue to be addressed as part of the LDP process. This includes updating policy requirements and ensuring SEPA and the Council's Flood Risk and Coastal Management section are consulted on all sites submitted for consideration for inclusion within the Plan.
- 8.11 In 2016, Local Flood Risk Management Plans (LFRMP) were published and set the duties Local Authorities need to carry out within Flood Risk Management in the 2016-22 cycle. Scottish Borders Council is the Lead Local Authority for the Tweed Local Flood Risk Management Plan and during this period has delivered flood studies for Peebles, Broughton, Innerleithen, Newcastleton and Earlston as well as Surface Water Management Plans for Peebles, Galashiels and Newcastleton. SBC will also deliver the Hawick Flood Protection Scheme, Berwickshire Coast Shoreline Management Plan, Eyemouth Coastal Study, Hawick Natural Flood Management Study, Galashiels Natural Flood Management Study and Hawick Surface Water Management Plans within this cycle. The flood studies will essentially act as pre-scheme preparation and will outline potential mitigation options. The options that are chosen by the Council to take forward as potential mitigation measures will be placed into a national list and prioritised against the Scottish Government's flood scheme criteria.

- 8.12 The Selkirk Flood Protection Scheme was officially opened in 2016 and provides protection to approximately 600 properties. The Hawick Flood Protection Scheme is ongoing and is currently at the detailed design stage with an expected completion date of 2021 / 2022. The Scheme is expected to provide a 1 in 75 year level of protection from the River Teviot within Hawick.
- 8.13 In terms of biodiversity, SPP identifies the need to have regard to the principles for sustainable land use set out in the Land Use Strategy. Paragraph 195 of SPP states expectation that public bodies apply the Principles for Sustainable Land Use, as set out in the Land Use Strategy, when taking significant decisions affecting the use of land.
- 8.14 The Council's policy for woodlands and forestry is contained in the Scottish Borders Woodland Strategy and includes locational guidance to encourage the planting of appropriate trees in the right places. The Scottish Government has set targets for woodland creation to help achieve climate change objectives and ensure ongoing supply to the timber industry and the south of Scotland, including Scottish Borders. This is an important area for this project because of its soils, climate and proximity to markets. The Council is encouraged to consider a strategic approach to ensure that these anticipated, large scale, land use changes balance the needs of business, local communities and the wider environment to maximise the benefit for the people of the Scottish Borders.
- 8.15 A Feasibility Study for a proposed Scottish Borders National Park commissioned by a local campaign group has been submitted to the Council for consideration along with their Position Statement issued in September 2017. As part of the consultation on the Main Issues Report a question was posed to seek public opinion on the proposition for a National Park, its possible boundaries and operational model. There were mixed responses to the proposal although there were more offering support and there was a wide range of suggested sites across the Region for the designation. The designation of a National Park is ultimately a matter for Scottish Ministers following an assessment and recommendation by Scottish Natural Heritage. Whilst the support of the Council for such a proposal would be a material consideration for Scottish Ministers it is unlikely to be the key determining factor in their final decision. The Council will consider this matter further in due course which would involve investigating what would be involved in establishing a designation and considering site options. As a position has not yet been decided by the Council or Scottish Ministers the LDP cannot make any formal designations nor policy references at this point in time.

SCOTTISH BORDERS COUNCIL PROPOSED LOCAL DEVELOPMENT PLAN 2020

9. LOCAL DEVELOPMENT PLAN POLICIES AND POLICY MAPS

SCOTTISH BORDERS COUNCIL PROPOSED LOCAL DEVELOPMENT PLAN 2020

PLACEMAKING AND DESIGN (PMD)

Delivering sustainable development and ensuring high quality design for all developments via good placemaking principles are key themes throughout the LDP. This policy section promotes low carbon technologies and economic growth whilst protecting the built and natural intrinsic qualities of the Scottish Borders.

Good design is at the heart of sustainable communities. The Plan acknowledges that quality design is not just about the aesthetic improvement of the environment, but is as much about improved quality of life, equality of opportunity and economic growth.

Policies PMD1: Sustainability and PMD2: Quality Standards are relevant to all development proposals. Policy PMD1 identifies a series of sustainability principles which underpin all LDP policies. Policy PMD2 promotes high quality design and site layout. It also supports attractive modern and innovative design provided it contributes positively to the surrounding environment. It lays down criteria tests to be applied in terms of sustainability, accessibility, placemaking and design, green space, open space and biodiversity. This policy section includes criteria for proposals within allocations, adjoining development boundaries and for infill development. Particular reference should be made to the Council's SPG on Placemaking and Design in assessing applications.

PLACEMAKING AND DESIGN (PMD)

POLICY PMD1

SUSTAINABILITY

- 1.1 The Climate Change (Emissions Reductions Targets) (Scotland) Act 2019 creates a statutory framework for delivery of greenhouse gas emissions reductions in Scotland. The Act sets out ambitious targets to reduce emissions and the Local Development Plan has a key role to play by helping encourage the reduction of building and transport related emissions, encouraging the use of renewable energy sources and sustainable development.
- 1.2 The Council is committed to embedding sustainable development within its strategies, policies and service delivery. The Council pledges to implement the United Nations Sustainable Development Goals as they relate to local government. This commitment recognises the increasing urgency that we live and use resources in ways which does not compromise the quality of life of future generations.
- 1.3 The aim of this policy is to encourage economically, environmentally and socially sustainable places by enabling development that balances the costs and benefits of a proposal over the longer term. The aim is to achieve the right development in the right place in accordance with Scottish Planning Policy. It is not to allow development at any cost.
- 1.4 All of the policies contained within the Plan should be read against Policy PMD1.

POLICY PMD1: SUSTAINABILITY

In determining planning applications and preparing development briefs, the Council will have regard to the following sustainability principles which underpin all the Plan's policies and which developers will be expected to incorporate into their developments:

- a) the long term sustainable use and management of land
- b) the preservation of air and water quality
- c) the protection of natural resources, landscapes, habitats, and species
- d) the protection of built and cultural resources
- e) the efficient use of energy and resources, particularly non-renewable resources
- f) the minimisation of waste, including waste water and encouragement to its sustainable management
- g) the encouragement of walking, cycling, and public transport in preference to the private car
- h) the minimisation of light pollution
- i) the protection of public health and safety
- j) the support to community services and facilities
- k) the provision of new jobs and support to the local economy
- l) the involvement of the local community in the design, management and improvement of their environment.

PLACEMAKING AND DESIGN (PMD) POLICY PMD2 QUALITY STANDARDS

- 1.1 The aim of the policy is to ensure that all new development, not just housing, is of a high quality and respects the environment in which it is contained. The policy does not aim to restrict good quality modern or innovative design but does aim to ensure that it does not negatively impact on the existing buildings, or surrounding landscape and visual amenity of the area. In some locations, the local environment will be more sensitive to change than in others. The policy aims to help tackle the causes and impacts of climate change, reduce resource use and moderate the impact of development on the environment.
- 1.2 The policy is also aimed at providing guidance to developers in advance of them submitting schemes. The Council is continuing to develop more detailed Supplementary Planning Guidance and a programme of planning briefs for allocated sites is ongoing.
- 1.3 The Scottish Government has signalled its clear intention to raise the quality of new development. Relevant documents include PAN 68 – Design Statements and PAN 77 – Designing Safer Places. Further guidance on good design can be found in Scottish Government Policy Statements ‘Designing Streets’ and ‘Creating Places’. The Government has identified the six qualities of successful places as:
 - Distinctive,
 - Safe and pleasant,
 - Easy to move around,
 - Welcoming,
 - Adaptable and
 - Resource efficient.
- 1.4 Street design underpins the Government’s resolve to move away from a prescriptive standard-based approach to promote innovative design to allow our streets to become safe, vibrant and attractive places. Parking needs to be accommodated by a variety of means to lessen the visual impact. The main focus must be on creating a positive successful sense of place which encourages more people to walk and cycle to local destinations.
- 1.5 It is acknowledged that local authorities, particularly via Building Standards, have a key role in helping to meet the Scottish Government’s future target for nearly carbon zero homes and buildings. In terms of Building Standards, the 2015 edition of Section 6 of the Technical Standards deliver the intended 21% aggregate reduction in carbon emissions on the 2010 standards (A 45%

reduction compared to the 2007 standards). The 2003 Building (Scotland) Act allows Scottish Ministers to regulate for the purpose of furthering the achievement of sustainable development. This is achieved through the Building Regulations whereby sustainability is embedded into the Technical Standards. Mandatory parts of the standards deliver sustainability in a number of areas such as energy efficiency, surface water drainage, sound insulation, durability and protection of buildings, access and water saving measures.

- 1.6 The standards also offer the possibility for developers to go beyond these minimum standards and obtain recognition for achieving higher performance standards in areas such as further reduction of carbon dioxide levels, low and zero carbon technologies, grey water recycling, smart heating controls, building flexibility and adaptability, enhanced sound insulation, recycling facilities and security. Low and zero carbon technologies include renewable energy sources such as solar panels, micro wind, heat pumps, combined heat and power, district heating infrastructure, and equipment such as mechanical ventilation and heat recovery which uses fossil fuels but results in significantly lower carbon dioxide emissions overall.
- 1.7 The Council has produced Supplementary Guidance on Renewable Energy which confirms the Council's support and promotion of a range of renewable energy technologies. The Council have also setup a Sustainable Development Committee which will work to develop ideas for promoting low carbon design and implementing sustainable development throughout the Scottish Borders. This is likely to incorporate requirements for example, on-site electric vehicle charging points.

POLICY PMD2: QUALITY STANDARDS

All new development will be expected to be of high quality in accordance with sustainability principles, designed to fit with Scottish Borders townscapes and to integrate with its landscape surroundings. The standards which will apply to all development are:

SUSTAINABILITY

- a) in terms of layout, orientation, construction and energy supply, the developer has demonstrated that appropriate measures have been taken to maximise the efficient use of energy and resources, including the use of renewable energy and resources and the incorporation of sustainable construction techniques in accordance with Supplementary Planning Guidance. Proposals must demonstrate that the current carbon dioxide emissions reduction target has been met, with at least half of this target met through the use of low or zero carbon technology
- b) it provides digital connectivity and associated infrastructure
- c) it provides for Sustainable Urban Drainage Systems in the context of overall provision of green infrastructure where appropriate and their after-care, accessibility, maintenance and adoption
- d) it encourages minimal water usage for new developments
- e) it provides for appropriate internal and external provision for waste storage and presentation with, in all instances, separate provision for waste and recycling and, depending on the location, separate provision for composting facilities,
- f) it incorporates appropriate hard and soft landscape works, including structural or screen planting where necessary, to help integration with its surroundings and the wider environment and to meet open space requirements. In some cases agreements will be required to ensure that landscape works are undertaken at an early stage of development and that appropriate arrangements are put in place for long term landscape/ open space maintenance
- g) it considers, where appropriate, the long term adaptability of buildings and spaces

PLACEMAKING & DESIGN

- h) it creates developments with a sense of place, based on a clear understanding of the context, designed in sympathy with Scottish Borders architectural styles; this need not exclude appropriate contemporary and/or innovative design
- i) it is of a scale, massing, height and density appropriate to its surroundings and, where an extension or alteration, appropriate to the existing building
- j) it is finished externally in materials, the colours and textures of which complement the highest quality of architecture in the locality and, where an extension or alteration, the existing building
- k) it is compatible with, and respects the character of the surrounding area, neighbouring uses, and neighbouring built form
- l) it can be satisfactorily accommodated within the site
- m) it provides appropriate boundary treatments to ensure attractive edges to the development that will help integration with its surroundings
- n) it incorporates, where appropriate, adequate safety and security measures, in accordance with current guidance on 'designing out crime'

ACCESSIBILITY

- o) street layouts must be designed to properly connect and integrate with existing street patterns and be able to be easily extended in the future where appropriate in order to minimise the need for turning heads and isolated footpaths
- p) it incorporates, where required, access for those with mobility difficulties
- q) it ensures there is no adverse impact on road safety, including but not limited to the site access
- r) it provides for linkages with adjoining built up areas including public transport connections and provision for buses, and new paths and cycleways, linking where possible to the existing path network; Travel Plans will be encouraged to support more sustainable travel patterns
- s) it incorporates adequate access and turning space for vehicles including those used for waste collection purposes
- t) development sites need to be able to promote travel by sustainable travel modes in locations which maximise the extent to which travel demands are met first through walking, then cycling, then public transport and finally through use of private cars

GREEN SPACE, OPEN SPACE & BIODIVERSITY

- u) it provides meaningful open space that wherever possible, links to existing open spaces and that is in accordance with current Council standards in advance of the proposed Supplementary Planning Guidance on Greenspace. In some cases a developer contribution to wider neighbourhood or settlement provision may be appropriate, supported by appropriate arrangements for maintenance
- v) it retains physical or natural features or habitats which are important to the amenity or biodiversity of the area or makes provision for adequate mitigation or replacements

Developers are required to provide design and access statements, design briefs and landscape plans as appropriate.

KEY POLICIES TO WHICH THIS POLICY SHOULD BE CROSS REFERENCED:

This policy is relevant to most policies within the Plan.

THE FOLLOWING APPROVED SUPPLEMENTARY PLANNING GUIDANCE MAY BE RELEVANT TO THIS POLICY:

Biodiversity
Designing out Crime in the Scottish Borders
Developer Contributions
Green Space
Landscape and Development
Placemaking and Design
Privacy and Sunlight Guide
Renewable Energy
Replacement Windows and Doors
Sustainable Urban Drainage
Use of Timber in Sustainable Construction
Waste Management

THE FOLLOWING PROPOSED/UPDATED SUPPLEMENTARY PLANNING GUIDANCE MAY BE RELEVANT TO THIS POLICY:

Biodiversity
Developer Contributions
Greenspace
Landscape and Development

PLACEMAKING AND DESIGN (PMD)

POLICY PMD3

LAND USE ALLOCATIONS

- 1.1 This policy applies to all the allocated land use proposals as shown on each of the settlement maps. The aim of the policy is to ensure that sites allocated in the Local Development Plan are developed for their intended use and that any alternative use is subject to appropriate justification (Appendix 1 sets out the site assessment process and this is further amplified in the Environmental Report). This is important as the housing allocations are needed to meet the Housing Land Requirement as set out in Appendix 2. The identified business and industrial sites are required to meet future demand for business growth within the Scottish Borders. Examples of the types of uses that might be considered to offer significant community benefits and that could justify an exemption could include a health or sporting facility, school or employment use. Within the planning application decision making process weight must be given to any economic benefits which alternative land uses may help to address with regards to any adverse impacts due to Covid 19 and their contribution to stimulating the Borders economy.
- 1.2 Where sites are identified for mixed use, a range of uses will be appropriate. There may be some instances where the Council expects a particular mix of uses and these will be outlined in a Planning Brief and/or the site requirements detailed within the Local Development Plan. Allocated mixed use sites may include uses such as offices, workshops, retail (subject to the sequential test) and community uses. These needs will be assessed on a site by site basis and included within site requirements and relevant Planning Briefs where appropriate.
- 1.3 The Plan also identifies redevelopment opportunities in various settlements which have potential to be developed for a range of uses. The redevelopment sites are those identified through the Local Development Plan process, but are not intended to represent a comprehensive picture of all the potential opportunities. The requirements of developing redevelopment sites (normally brownfield sites) may be guided by Planning Briefs.
- 1.4 All housing allocations within the Local Development Plan have detailed site requirements and/or an approved Planning Brief which sets out the broad vision for the site. The Council is progressing a programme of planning and development briefs which, following consultation and Council approval will become Supplementary Planning Guidance and a material consideration in determining planning applications. In some cases, developers may choose to prepare their own briefs and provided these meet the standards employed in the Council-prepared Briefs, these will normally be acceptable.

POLICY PMD3: LAND USE ALLOCATIONS

Development will be approved in principle for the land uses allocated within each of the settlement profiles and settlement maps.

Development will be in accordance with any Council approved Planning Brief provided it meets the requirements for the site and its acceptability has been confirmed in writing by the Council.

Sites proposed for redevelopment or mixed use may be developed for a variety of uses subject to other Local Development Plan policies. Where there is evidence of demand for specific uses or a specific mix of uses, these may be identified in a Planning Brief and the site requirements detailed within the Local Development Plan.

Within new housing allocations other subsidiary uses may be appropriate provided these can be accommodated in accordance with policy and without adversely affecting the character of the housing area. Planning Briefs and site requirements detailed within the Local Development Plan may set out the range of uses that are appropriate or that will require to be accommodated in specific allocations.

Any other use on allocated sites will be refused unless the developer can demonstrate that:

- a) it is ancillary to the proposed use and in the case of proposed housing development, it still enables the site to be developed in accordance with the indicative capacity shown in the Land Use Proposals table and/or associated planning briefs, or
- b) there is a constraint on the site and no reasonable prospect of its becoming available for the development of the proposed use within the Local Development Plan period, or
- c) the alternative use offers significant community benefits that are considered to outweigh the need to maintain the original proposed use, and
- d) the proposal is otherwise acceptable under the criteria for infill development.

PLACEMAKING AND DESIGN (PMD)

POLICY PMD4

DEVELOPMENT ADJOINING DEVELOPMENT BOUNDARIES

- 1.1 The aim of the policy is to ensure that most development is located within defined Development Boundaries. Any development proposals outwith but adjoining the Development Boundary would have to comply with one or other of the rigorous exceptions criteria contained within this policy. It is considered that development adjoining the Development Boundary should not be seen as an alternative to allocated sites where these are available and therefore, should only be an 'exceptional' occurrence.
- 1.2 The policy recognises that within the lifetime of the Local Development Plan, it is inevitable that unanticipated or windfall developments will arise immediately adjoining the Development Boundary and that on occasion these might be acceptable provided they are in line with the Plan's other policies. Examples of developments offering significant community benefits might be a school, community or health centre. In the case of a village, there might be community support for housing development that could help provide a population to support local services.
- 1.3 For clarification, any development for affordable housing must meet the requirements of Policy HD1, namely, there must be evidence that the proposed development meets an identified housing need for the settlement and that it will provide housing defined as affordable under the Council's Supplementary Planning Guidance on Affordable Housing. Proposals for single houses should be assessed against the criteria contained within Policy HD2.
- 1.4 This policy is supported by Scottish Planning Policy (SPP) which states Local Development Plans should make provision for most new urban development to take place within, or in planned extensions to, existing settlements.

POLICY PMD4: DEVELOPMENT ADJOINING DEVELOPMENT BOUNDARIES

Where Development Boundaries are defined on settlement maps, they indicate the extent to which towns and villages should be allowed to expand during the Local Development Plan period. Development should be contained within the Development Boundary and proposals for new development adjoining this boundary, and not on allocated sites identified on the settlement maps, will normally be refused.

Exceptional approvals may be granted provided strong reasons can be given:

- a) it is a job-generating development in the countryside that has an economic justification under Policy ED7, OR
- b) it is an affordable housing development that can be justified in terms of Policy HD1, OR
- c) there is a shortfall identified by Scottish Borders Council through the housing land audit with regard to the provision of an effective 5 year housing land supply, OR
- d) it is a development that it is considered would offer significant community benefits that outweigh the need to protect the Development Boundary.

AND the development of the site:

- a) represents a logical extension of the built-up area, and
- b) is of an appropriate scale in relation to the size of the settlement, and
- c) does not prejudice the character, visual cohesion or natural built up edge of the settlement, and
- d) does not cause a significant adverse effect on the landscape setting of the settlement or the natural heritage of the surrounding area, and
- e) is capable of achieving a satisfactory access.

The decision on whether to grant exceptional approvals will take account of:

- a) any indicators regarding restrictions on, or encouragement of, development in the longer term that may be set out in the Settlement Profile;
- b) the cumulative effect of any other developments outwith the Development Boundary within the current Local Development Plan period;
- c) the infrastructure and service capacity of the settlement.

PLACEMAKING AND DESIGN (PMD) POLICY PMD5 INFILL DEVELOPMENT

- 1.1 The purpose of the policy is to be generally supportive to suitable infill development provided it meets certain criteria. Such development should be judged on a case by case basis and the policy is intended to ensure careful assessment is carried out. The policy applies to all areas within the Development Boundary, not just areas where the predominant use is residential. It may apply to areas of mixed use, town centres or areas of established business and industrial use, or utilities and their landholdings which, due to changes to technology and new practices may become surplus to requirements.
- 1.2 Policy HD3 (Protection of Residential Amenity) will be applicable for development on garden ground or 'backland' proposals, development on gap sites and redevelopment of brownfield sites to safeguard the amenity of residential areas.
- 1.3 In the case of a gap site, a proposal should be tested against a range of policies including the key policies identified to be cross referenced as listed.
- 1.4 The policy complies with Scottish Planning Policy (SPP) which acknowledges the contribution of infill development to the housing land supply but provides for its careful control, particularly within residential areas. SPP also supports the principle that settlements must be able to absorb and sustain the individual and cumulative effects of infill development and care must be taken to ensure that no over-development takes place.

POLICY PMD5: INFILL DEVELOPMENT

Development on non-allocated, infill or windfall, sites, including the re-use of buildings within Development Boundaries as shown on settlement maps will be approved where the following criteria are satisfied:

- a) where relevant, it does not conflict with the established land use of the area; and
- b) it does not detract from the character and amenity of the surrounding area; and
- c) the individual and cumulative effects of the development can be sustained by the social and economic infrastructure and it does not lead to over-development or 'town and village cramming'; and
- d) it respects the scale, form, design, materials and density in context of its surroundings; and
- e) adequate access and servicing can be achieved, particularly taking account of water and drainage and schools capacity; and
- f) it does not result in any significant loss of daylight, sunlight or privacy to adjoining properties as a result of overshadowing or overlooking.

All applications will be considered against the Council's Supplementary Planning Guidance on Placemaking and Design. Developers are required to provide Design Statements as appropriate.

In cases of any part intrusion into the open countryside, other policies will apply including Policy PMD4 – Development adjoining Development Boundaries, Policies ED7, HD2, Environmental Promotion and Protection policies.

SCOTTISH BORDERS COUNCIL PROPOSED LOCAL DEVELOPMENT PLAN 2020

ECONOMIC DEVELOPMENT (ED)

National planning policy promotes sustainable economic growth and this policy section confirms the role the LDP has in ensuring the right development in the right place, and promoting strong, resilient and inclusive communities. In order to attract businesses and investment the policies promote development which will increase employment opportunities, economic activity and sustainable growth. This includes the Council's continuing support and promotion of improving digital connectivity throughout the Scottish Borders.

This policy section seeks to ensure the identification, safeguarding and delivery of a sufficient supply of business and industrial land taking account of market demands and existing infrastructure. As required by the Blueprint for the Border Railway opportunities are promoted along the railway corridor. Support is given to a wide range of renewable energy proposals within appropriate locations and criteria tests are laid down for considering a wide range of development types within rural areas.

Retailing patterns continue to fluctuate and the role of town centres is changing. Policies seek to regenerate town centres allowing more flexibility of uses where appropriate. This section supports the 'Town Centre First Principle' which seeks to ensure the health of town centres is at the heart of decision making. For proposals which attract significant footfall a sequential town centre first approach to site selection remains fundamental.

Within the planning application decision making process weight must be given to any adverse economic impacts due to Covid 19 and the need to stimulate the Borders economy.

ECONOMIC DEVELOPMENT (ED)

POLICY ED1

PROTECTION OF BUSINESS AND INDUSTRIAL LAND

- 1.1 The aim of the policy is to ensure that adequate supplies of business and industrial land are retained for business and industrial use and are not diluted by a proliferation of other uses. The policy recognises the financial difficulty in bringing forward new business and industrial land in a rural area such as the Borders where, in the provision of business land, there is a market failure situation. For clarity, Class 4 covers offices, light industry and research and development, Class 5 is general industrial and Class 6 is storage and distribution.
- 1.2 The policy has split all allocated sites into two categories. The first category relates to High Amenity Business Sites and seeks to protect these rigorously for Class 4 Use. The second category relates to Business and Industrial Sites where Use Classes 4, 5 and 6 would be permitted. Both categories are identified in Table 1 which confirms which category each allocated site falls within. The policy recognises that there may be circumstances whereby ancillary uses could be supported within both categories if it enhances the quality of the estate as an employment location and is specifically intended to support and provide services for those working there. Examples of this would be a crèche/day nursery, trade counters and small scale convenience shops.
- 1.3 In the case of Business and Industrial site allocations, as well as the aforesaid ancillary uses, uses other than Class 4, 5 and 6 may be considered if certain tests are met. Proposals other than Class 4, 5 and 6 would require to be assessed to establish first and foremost if suitable alternative sites are available. 'Marketable' is defined in Scottish Government guidance and means that the site is ready for development.
- 1.4 Consultation with the Council's Economic Development Service, Scottish Enterprise (SE) and the South of Scotland Economic Partnership (SoSEP) will often be necessary to assist decision making by providing evidence on matters such as demand, business cases and land availability. In order to support existing town and village centres, mainstream retailing is not considered to be an appropriate use on industrial estates other than those uses set out in paragraph 1.2 above. Within the planning application decision making process weight must be given to any adverse economic impacts due to Covid 19 and the need to stimulate the Borders economy.

Town Yetholm		Land North West of Deanfield Place (BYETH001)	

POLICY ED1: PROTECTION OF BUSINESS AND INDUSTRIAL LAND

The Council aims to maintain a supply of business and industrial land allocations in the Scottish Borders (see Table 1). There is a presumption in favour of the retention of industrial and business use on High Amenity Business and Business and Industrial sites.

1. HIGH AMENITY BUSINESS SITES

The Council rigorously protects high amenity business sites for Class 4. Other high quality complementary commercial activity may be acceptable as well as non-industrial business / employment generating uses if it can be demonstrated that it enhances the quality of the high amenity business sites as an employment location, and provides a specific service for those businesses operating on the wider business site.

2. BUSINESS AND INDUSTRIAL SITES

Development for uses other than Classes 4, 5 and 6 on business and industrial sites in the locations identified in Table 1 will generally be refused. Uses other than Class 4, 5 or 6 can be considered if they are ancillary/complementary uses to the business and industrial site. Employment generating uses other than Class 4, 5 and 6 can only be considered where no suitable alternative site(s) are available and the following criteria can be satisfied:

- a) The loss of business and industrial land does not prejudice the existing and predicted long term requirements for industrial and business land in the locality, and
- b) The alternative land use is considered to complement the business/industrial land allocation and offer significant benefits to the surrounding area and community that outweigh the need to retain the site in business and industrial use, or
- c) There is a constraint on the site whereby there is no reasonable prospect of it becoming marketable for business and industrial development in the future, or
- d) The predominant land uses have changed owing to previous exceptions to policy such that a more mixed use land pattern is now considered acceptable by the Council.

In the case of both high amenity business sites and business and industrial sites development must:

- a) respect the character and amenity of the surrounding area, and be landscaped accordingly, and
- b) be compatible with neighbouring business and industrial uses.

Shops and outright retail activities which are not considered to be complementary nor ancillary uses to the estate will not be allowed on High Amenity and/or Business and Industrial sites. For the purposes of this policy, retailing associated with existing businesses, linked directly to the existing use of the unit (e.g. manufacture; wholesale) should comprise no more than 10% of the total floor area. Vehicle sales may be allowed on Business and Industrial Sites if a satisfactory case is submitted.

ECONOMIC DEVELOPMENT (ED)

POLICY ED2

EMPLOYMENT USES OUTWITH BUSINESS AND INDUSTRIAL LAND

- 1.1 The aim of the policy is to ensure that within development boundaries of settlements, business and industrial uses (Use Classes 4, 5 and 6) are generally restricted to business and industrial sites identified under policies ED1 and PMD3, land use allocations for mixed uses or redevelopment opportunities identified under policy. This is to assist in protecting residential amenity and to retain town centres for more appropriate uses such as shopping, leisure and professional services.

POLICY ED2: EMPLOYMENT USES OUTWITH BUSINESS AND INDUSTRIAL LAND

Within the defined development boundary there will be a general presumption against business and industrial uses outwith business and industrial, mixed use or redevelopment sites (Policies ED1 and PMD3). Any proposal for business and industrial development outwith development boundaries will be required to:

- a) justify the need for that location, and
- b) demonstrate significant economic and/or employment benefit, and
- c) demonstrate that it can co-exist satisfactorily with adjoining uses.

KEY POLICIES TO WHICH THIS POLICY SHOULD BE CROSS REFERENCED:

Policy PMD3 Land Use Allocations

ECONOMIC DEVELOPMENT (ED)

POLICY ED3

TOWN CENTRES AND SHOPPING DEVELOPMENT

- 1.1 This policy aims to guide new shopping development to town and village centres and encourage an appropriate mix of uses within these centres. This will help protect and enhance the vitality and viability of these centres, particularly those town centres identified within the Local Development Plan Settlement Maps.
- 1.2 Scottish Planning Policy (SPP) sets out national policy for town centres and requires that decision making is guided by a network of centres which will, depending on circumstances, include town centres, commercial centres and other local centres and may take the form of a hierarchy. The Strategic Development Plan does not identify any Strategic Town Centres within the Scottish Borders. The 'Town Centre First Principle' asks that the Scottish Government, local authorities, the wider public sector, businesses and communities put the health of town centres at the heart of decision making, seeking to deliver the best local outcomes regarding investment decisions, alignment of policies, targeting of available resources to priority town centre sites, and encouraging vibrancy, equality and diversity. For proposals which attract significant footfall a sequential 'Town Centre First' approach to site selection remains fundamental.
- 1.3 There are some small scale, edge of town or out of town, retail clusters in the Borders but no commercial centres of the size and importance to justify inclusion in the hierarchy. Development will be directed to the identified Town Centres in preference to edge of centre locations which, in turn, will be preferred to out of centre locations. However, in out of centre locations preference will be given to a retail cluster or park if the assessment of a retail development proposal points towards the cluster or park being a commercial centre. This takes appropriate account of the preferred order of locations set out in the sequential approach within SPP. Decision making will be guided by the role in the network of centres, whether the centre is a regeneration priority and by the results of any vitality and viability studies. Development proposals will also be assessed against any relevant Development Briefs.
- 1.4 The role of the town centre is changing mainly due to increasing internet shopping and competition from out of centre floorspace combined with reduced expenditure growth rates. These are making the economics of delivering successful town centres increasingly challenging. Within the planning application decision making process weight must also be given to any adverse economic impacts on the performance of town centres due to Covid 19 and the need to stimulate the Borders economy. Several town centres in the Scottish Borders have experienced major change in the composition and structure of their retail markets in recent years, partly due to strategically significant major retail developments. The Council's Town Centre Footfall Survey found the average weekly footfall across eight surveyed settlements (Duns, Galashiels, Hawick, Jedburgh, Kelso, Melrose, Peebles and Selkirk) between 2007 and 2019 to have fallen by 28%. It should be noted that some town centres (eg: Kelso, Melrose and Peebles) are performing significantly better than others. Footfall increased by 12% in 2015 however the general trend shows a decline in the Scottish Borders. The average retail vacancy rate in the Scottish Borders is 12% (June 2019) which matches the national trend.

- 1.5 It is important that planning policy recognises the changing role of town centres and reflects that they are community and service centres as well as retail locations. As well as class 1 shop uses, appropriate development could include financial, professional and other services (class 2), food and drink (class 3), offices (class 4) and commercial leisure and entertainment (including cinemas and theatres), residential, particularly flats above ground floor level, healthcare, education and tourism related uses. The preferred order of locations set out in the sequential approach will be applied to proposals for a range of uses which generate significant footfall, as well as retail, commercial and leisure uses.
- 1.6 Proposals for retail related development within rural areas should be assessed not only against this policy, but also against policies IS1 (Public Infrastructure and Local Service Provision) and ED7 (Business, Tourism and Leisure Development in the Countryside).

Figure ED3a
Policy ED3

Former Hawick Core Activity Area

© Crown Copyright and database right 2020.
All rights reserved. Ordnance Survey Licence number 100023423.

POLICY ED3: TOWN CENTRES AND SHOPPING DEVELOPMENT

To protect town centres, town centre locations will be preferred to edge-of-centre locations which, in turn, will be preferred to out-of-centre locations. An out-of-centre location will only be considered where there is no suitable site available in a town centre or edge-of-centre location.

For the avoidance of doubt, the Council will apply the preferred order of locations set out above to appropriate uses generating significant footfall, including community and cultural facilities, offices, libraries, and education and healthcare facilities as well as retail and commercial leisure uses. It will also ensure that different uses are developed in the most appropriate locations.

TOWN CENTRES:

The Council will seek to develop and enhance the role of town centres. A network of centres and growth of the retail sector will be supported by directing shopping development to the following town centres: Duns, Eyemouth, Galashiels, Hawick, Innerleithen, Jedburgh, Kelso, Melrose, Peebles and Selkirk.

The Council will support a wide range of uses appropriate to a town centre. Proposals for shopping development and other town centre developments will generally be approved within defined town centres provided that the character, vitality, viability, and mixed use nature of the town centre will be maintained and enhanced.

Town centre enhancement, including the provision of new retail facilities and complementary non-retail uses, will be encouraged in centres both within the hierarchy and other centres which:

- a) are Council priorities for area regeneration because of special economic difficulties and/or population decline,
- b) are subject to significant retail spending leakage,
- c) play an important role in areas planned for substantial development under the development strategy.

The Council will encourage the use of town centres during the evening provided residential amenity is protected.

Any proposed development which would create an unacceptable adverse impact on the town centre will be refused.

Within Hawick, proposals for residential development on the ground floor of the former Core Activity Area will only be supported in exceptional circumstances taking cognisance of matters such as length of vacancy and opportunities for gaining access to the premises above. The former Core Activity Area for Hawick can be viewed in Figure ED3a.

OUT OF TOWN CENTRE DEVELOPMENT:

The Council will have regard to the following considerations, where relevant, in assessing applications for out of centre development, including retail proposals:

- a) the individual or cumulative impact of the proposed development on the vitality and viability of existing town centres,
- b) the availability of a suitable town centre or edge of centre site,
- c) the ability of the proposal to meet deficiencies in shopping provision which cannot be met in town centre or edge of centre locations,
- d) the impact of the proposal on travel patterns and car usage,
- e) the accessibility of the site by a choice of means of transport,
- f) the preference for commercial centres in the preferred order of locations, including appropriate retail clusters and parks, over other out of centre locations,
- g) the extent to which a proposal would constitute appropriate small scale shopping provision designed to serve the needs of local rural communities,
- h) the location of the proposal. Sites will be located within existing settlements and, within them preference will be given to applications on vacant or derelict sites, or on sites deemed to be surplus to requirements.

ECONOMIC DEVELOPMENT (ED)

POLICY ED4

CORE ACTIVITY AREAS IN TOWN CENTRES

- 1.1 Policy ED3 Town Centres and Shopping Development generally allows a wide range of uses within town centres in the Scottish Borders. However, on ground floor properties within the central part of town centres Policy ED4 identifies Core Activity Areas. The aim of these Areas is to encourage public activity within the central parts of these town centres. These Areas ensure a range of commercial uses to encourage development which increases footfall in town centres and in turn prevents the gradual loss of essential town centre activities in locations where this is regarded as important to the vitality and viability of the centre. Within the planning application decision making process weight must be given to any adverse economic impacts on the performance of core activity areas due to Covid 19 and the need to stimulate the Borders economy.
- 1.2 Policy ED4 and the settlements it relates to were reviewed as part of the preparation of the LDP. Policy ED4 previously related to ten towns which all had designated Core Activity Areas. However, within these towns there was a very wide range of performance levels which can be seen via reference to for example, vacancy rates, length of vacancies, levels of footfall and town centre health checks. Cognisance was also taken of the Council's one year Town Centre Core Activity Area Pilot Study. The aim of this Study was to examine ways to revitalise and reinvigorate town centres. The Study removed the Core Activity Area for Hawick, allowed a wider range of uses in Galashiels, gave more flexibility to uses when premises have been vacant for six months and gave guidance on what is meant by a 'significant positive contribution' to the core retail function as referred to within Policy ED4.
- 1.3 Policy ED4 confirms the Core Activity Areas for Hawick and Stow have been removed and that Class 2 uses are now supported in Duns, Eyemouth, Galashiels, Jedburgh and Selkirk. The Galashiels Core Activity Area has been reduced in size to include only Bank Street and part of Market Street. Channel Street and Douglas Bridge have been removed from this designation. As the Core Activity Areas for Kelso, Melrose and Peebles continue to perform at a high level, there was no requirement to add more flexibility of uses which in turn may have a longer term adverse impact of the town centre's performance due to their limited footfall, vitality and viability. It is considered that further flexibility is likely to dilute the performance of these three towns.
- 1.4 In terms of Kelso, Melrose and Peebles, proposed changes from Class 1 to Class 2 uses could only be supported in exceptional circumstances where the proposal contributes positively to the core activity of the area and will be assessed against the following:
- How the proposed use would contribute to joint shopping trips,
 - Footfall contribution,
 - Current vacancy and footfall rates,
 - Length of vacancy,
 - Ability to retain active shop frontage,
 - Community benefit.

- 1.5 With regards to the length of vacancy test as referred to paragraph 1.4, criteria tests from the Town Centre Core Activity Area Pilot Study have been carried forward into Policy ED4. Within Kelso, Melrose and Peebles, premises which have been vacant for at least six months require the following marketing information to be submitted to support any proposal for Class 2 use:
- adequate marketing of the property in its existing use class must have taken place for a substantial period of the six months (ie: no less than five months),
 - premises must have been advertised by at least one property agent who deals in commercial property,
 - details of the nature of the marketing, including for example, details of publications used, distribution area of the publications and press advertisement,
 - submission of property selling details which should include property/site, address, size, location, description, services, planning/current, reference to potential uses, terms, leasehold rent or freehold sale price, viewing arrangements,
 - details of all expressions of interest and all offers received, including rental interest, with explanations as to why such offers were not accepted. In circumstances where the premises are currently occupied, the assessment should indicate clearly why the occupier wishes to vacate the premises,
 - independent valuation confirming the selling or lease price was reasonable (this is to ensure instances where no third party interest was lost due to unrealistic overpricing).
- 1.6 Reference to the term '*significant positive contribution*' to the core retail function as stated within Policy ED4 relates to proposals within the Core Activity Areas of Kelso, Melrose and Peebles. It requires consideration of the following:
- the economic benefits of the proposals, including consideration of the general positive contribution to the economic or social vitality of the town centre,
 - the footfall it is likely to generate,
 - how active the frontage is in terms of how it can help improve the public perception of successful town centres in terms of safety, comfort, sociability and liveliness.
- 1.7 Decision making will be guided by research or studies on vitality and viability by the Council or developers.

POLICY ED4: CORE ACTIVITY AREAS IN TOWN CENTRES

To provide flexibility and maintain vitality and viability in the retail core of the town centre. Core Activity Areas have been identified in Duns, Eyemouth, Galashiels, Jedburgh, Kelso Melrose, Peebles and Selkirk.

Use classes 1, 2 and 3 are seen as appropriate uses within these ground floor Core Activity Areas.

However, changes from Class 1 to Class 2 uses in Kelso, Melrose and Peebles will only be allowed in exceptional circumstances where a proposal makes a significant positive contribution to the core retail function and satisfactory marketing information is submitted in relation to premises which have been vacant for a minimum of six months.

Community and cultural facilities could be supported in exceptional circumstances. Residential development on the ground floor of Core Activity Areas will generally be resisted and could only be supported in exceptional circumstances taking account matters such as town centre performance and the need for more flexibility of uses, economic likelihood of premises being retained as a commercial use and opportunities to gain access to upper floors.

In order to encourage interest, vibrancy and vitality to the Core Activity Area, applications must demonstrate the provision of active frontages.

ECONOMIC DEVELOPMENT (ED) POLICY ED5 REGENERATION

- 1.1 In line with national policy, the Council is progressing a place based approach to town centre regeneration. The Council has developed a Scottish Borders Town Centre Regeneration Action Plan, which focuses on prioritising regeneration in those towns, which have key economic, social and environmental challenges. The Council has been working with business and community groups with individual towns to develop specific town or locality place based economic regeneration plans.
- 1.2 The Local Development Plan allocates redevelopment opportunities across the Borders, although these allocations are not exhaustive. The aim of this policy is to encourage redevelopment of such allocations for a variety of uses including housing, employment or retailing which will support the opportunity of bringing such land back into productive use and to enhance the surrounding environment. This policy also relates to non-allocated brownfield sites.
- 1.3 The Council has also been proactive in stimulating direct investment for town centre regeneration with a range of economic and business initiatives. These include support for physical redevelopment such as Townscape Heritage Initiatives, Conservation Area Regeneration Schemes and related traffic management/ public realm schemes. Redevelopment has also included regeneration of key sites within towns such as the town centre site in Galashiels for the Great Tapestry of Scotland and the redevelopment of the former Armstrong's store in Hawick. Support has also focused on wider business development activity, events and marketing support to stimulate footfall and spend in town centres.
- 1.4 It is anticipated that the new South of Scotland Enterprise Agency, which will become operational in April 2020, will continue this place based approach to drive the local economy of the Scottish Borders and the South of Scotland with the aim of enhancing the area to be more attractive to businesses, investors, visitors and residents.

POLICY ED5: REGENERATION

Development on allocated and non-allocated brownfield sites will be approved in all cases where the following criteria are satisfied:

- a) where relevant, it does not conflict with the established land use of the area; and
- b) it does not detract from the character and amenity of the surrounding area; and
- c) the individual and cumulative effects of the development can be sustained by the social and economic infrastructure and it does not lead to over-development or 'town and village cramming'; and
- d) it respects the scale, form, design, materials and density in context of its surroundings; and
- e) adequate access and servicing can be achieved, particularly taking account of water and drainage and schools capacity; and
- f) it does not result in any significant loss of daylight, sunlight or privacy to adjoining properties as a result of overshadowing or overlooking.

All applications will be considered against the Council's Supplementary Planning Guidance on Placemaking and Design. Developers are required to provide Design Statements as appropriate.

Policy HD3 Protection of Residential Amenity
Policy EP3 Local Biodiversity and Geodiversity
Policy EP11 Protection of Greenspace
Policy IS4 Transport Development and Infrastructure
Policy IS5 Protection of Access Routes
Environmental Promotion and Protection policies EP7-EP10

In cases of any part intrusion into the open countryside, other policies will apply including policies PMD4, ED7, HD2 and Environmental Promotion and Protection (EP) policies.

ECONOMIC DEVELOPMENT (ED)

POLICY ED6

DIGITAL CONNECTIVITY

- 1.1 Advanced digital connectivity infrastructure and enhanced mobile network coverage are essential to an area as large and dispersed as the Scottish Borders to help achieve economic productivity and growth. It can also help to reduce the need to travel, particularly business travel and therefore contributes to a reduction in CO2 emissions and meeting climate change targets.
- 1.2 The Scottish Government is committed to delivering world class, future-proofed digital infrastructure across the whole of Scotland with a commitment to investing £600m to extend superfast broadband access to 100% of premises across Scotland by the end of 2021. The Scottish Government believes that world class standards today require speeds of between 100Mbps and 1Gbps. Fibre solutions are believed to provide the backbone of a future proofed infrastructure capable of accommodating future demand at increasing speeds, for decades to come.
- 1.3 As at the end of September 2017, 82.7% of premises in the Scottish Borders had been connected to fibre enabled cabinets or exchanges. More than 130 new superfast broadband cabinets and exchange upgrades had been delivered, connecting over 31,800 premises in the Scottish Borders.
- 1.4 The aim of the policy is to encourage and improve digital connectivity in the Scottish Borders.

POLICY ED6: DIGITAL CONNECTIVITY

The Council will support proposals which lead to the expansion and improvement of the electronic communications network in the Borders, provided it can be achieved without any unacceptable detrimental impact on the natural and built environment. This includes delivery of core infrastructure for telecommunications, broadband and other future digital infrastructure.

Placemaking and Design

THE FOLLOWING PROPOSED/UPDATED SUPPLEMENTARY PLANNING GUIDANCE MAY BE RELEVANT TO THIS POLICY:

Placemaking and Design

ECONOMIC DEVELOPMENT (ED)

POLICY ED7

BUSINESS, TOURISM AND LEISURE DEVELOPMENT IN THE COUNTRYSIDE

- 1.1 The Scottish Borders is a very distinctive place which is largely rural in character with considerable natural and cultural heritage. The Council however considers that opportunities exist at appropriate locations outwith settlements where economic activity and diversification can take place. This may include development linked to tourism and farm diversification which can not only protect but also enhance the Scottish Borders natural and cultural heritage. In addition, the Scottish Government acknowledges that one of the core values of the planning service is to play a key role in facilitating sustainable economic growth, particularly the creation of new jobs and the strengthening of economic capacity and resilience within communities.
- 1.2 The aim of the policy is to allow for appropriate employment generating development in the countryside whilst protecting the environment and to ensure that business, tourism, and leisure related developments are appropriate to their location. This policy will be applied to any applications that involve economic diversification in rural areas, for example diversification of agricultural land. Any diversification must involve land uses that are complementary to or appropriate for the area.
- 1.3 Developments that involve both business/industrial and housing uses will be assessed against this policy and Policy HD2: Housing in the Countryside. Proposals for housing development will not be treated as farm diversification and will be assessed under the Policy HD2: Housing in the Countryside. Furthermore, where the proposal is for a guest house or a bed and breakfast, that proposal will also be assessed against Policy HD2.
- 1.4 The policy recognises that some tourism related developments may not be able to be easily accommodated within settlements and may be satisfactorily located in certain countryside locations subject to compliance with environmental policies. Decision making will be guided by reference to the VisitScotland Tourism Development Plan as well as the Scottish Borders Tourism Strategy and Action Plan, which require all tourism developments to be of high quality, sustainable and customer focussed. The Council will also take into consideration where appropriate advice from VisitScotland. Other current strategies or any others which are produced within the Plan period that are relevant will also apply.
- 1.5 The policy also relates to farm diversification as well as timber processing facilities. Forests rarely serve only a single purpose and at their best provide a combination of benefits such as timber production, opportunities for recreation, enhancement of the landscape and the creation of new habitats. The Council recognises both the importance of forestry as a long-term land use, and the need to balance the economic value of forestry with a need to protect the environment. Forestry may provide an appropriate form of farm diversification, particularly in the uplands, and can often be a suitable form of land cover for land restoration, for example, quarries or waste

disposal sites. The Forestry Commission's 'The UK Forestry Standard' (2017), provides a series of guidelines, and outlines the context for forestry in the UK. The document also sets out the Government's approach to sustainable forest management, defines standards and requirements, as well as a basis for regulation and monitoring. The Scottish Borders Woodland Strategy, and its associated Technical Note are also relevant.

- 1.6 In relation to any proposal that may come forward for a new timber processing facility, where possible, the Council will seek that the new development be accessible to the strategic road and rail network, with preference given to the line of the former Waverley Railway, and the Kielder Branch line.

POLICY ED7: BUSINESS, TOURISM AND LEISURE DEVELOPMENT IN THE COUNTRYSIDE

Proposals for business, tourism or leisure development in the countryside that assist in strengthening communities and retaining young people in rural areas will be approved and rural diversification initiatives including farm buildings will be encouraged provided that:

- a) the development is to be used directly for agricultural, horticultural or forestry operations, or for uses which by their nature are appropriate to the rural character of the area; or
- b) the development is to be used directly for leisure, recreation or tourism appropriate to a countryside location and, where relevant, it is in accordance with the Scottish Borders Tourism Strategy and Action Plan;
- c) the development is to be used for other business or employment generating uses, provided that the Council is satisfied that there is an economic and/or operational need for the particular location, and that it cannot reasonably be accommodated within the Development Boundary of a settlement;
- d) where a new building is proposed, the developer will be required to provide evidence that no appropriate existing building or brownfield site is available, and where conversion of an existing building of architectural merit is proposed, evidence that the building is capable of conversion without substantial demolition and rebuilding.

In addition the following criteria will also apply:

- a) the development must respect the amenity and character of the surrounding area,
- b) the development must have no significant adverse impact on nearby uses, particularly housing,
- c) the impact of the expansion or intensification of uses, where the use and scale of development are appropriate to the rural character of the area,
- d) the development meets all other siting, and design criteria in accordance with Policy PMD2, and
- e) the development must take account of accessibility considerations in accordance with Policy IS4.

Where a proposal comes forward for the creation of a new business including that of a tourism proposal, particular weight will be given to the economic business case and its potential to create employment and rural prosperity. A business plan including a marketing strategy that supports the proposal and that is relevant to the locality will be required to be submitted as part of the application process.

ECONOMIC DEVELOPMENT (ED)

POLICY ED8

CARAVAN AND CAMPING SITES

- 1.1 The Scottish Borders is an attractive part of Scotland and has been traditionally known as the gateway to Scotland. It has successfully been attracting increasing numbers of tourists from both the rest of the United Kingdom as well as overseas and this is confirmed within the Scottish Borders Tourism Strategy and Action Plan. In relation to caravan and camping sites the Tourism Strategy and Action Plan also highlights the growing demand for holiday homes as well as the continued growth in demand for static caravans.
- 1.2 Therefore the purpose of this policy is to support new caravan and camping facilities for genuine holiday/tourism use in locations that are environmentally acceptable and that fit with wider tourism, economic and regeneration objectives. Decision making will be guided where appropriate by advice from VisitScotland. Caravan and camping sites are an important part of the network of visitor accommodation options but they can be visually intrusive in countryside or coastal locations. Within or close to towns caravan and camping sites can complement regeneration. This policy seeks to ensure that high standards of placemaking and design must be applied to caravan proposals.
- 1.3 This policy will apply to units that meet the criteria of a caravan under the Caravan Sites and Control of Development Act 1960, and supplemented by section 13 of the Caravan Sites Act 1968, i.e. a caravan is defined as any structure designed or adopted for human habitation which is capable of being moved from one place to another (whether by being towed or by being transported on a motor vehicle or trailer).
- 1.4 It should be noted that in some cases, some caravans as defined by the above Act have been referred to as lodges; therefore any application for a proposal that meets the above definition will be assessed against this policy. However, for proposed lodges that do not fall within the above definition, those proposals will be assessed against Local Development Plan Policy ED7 Business, Tourism and Leisure Development in the Countryside.
- 1.5 In relation to this policy, it also aims to protect existing caravan and camping sites with a tourism function from development which would be considered to have a significant and sustained adverse impact on tourism. Currently within the Scottish Borders the main caravanning and camping sites are:

Blackadder Holiday Park, Greenlaw	Scoutscroft Holiday Centre, Coldingham
Tweedside Caravan Park, Innerleithen	Kirkfield Caravan Park, Yetholm
Chesterfield Caravan Site, Cockburnspath	Carfraemill Chalet and Caravan Park, Lauder
Angecroft Caravan Park, Ettrick Valley	Lilliardsedge Holiday Park and Golf Course
Crosslaw Caravan Park, Coldingham	Crossburn Caravan Park, Peebles
Gibson Park Caravan Club Site, Melrose	Riverside Caravan Park, Hawick
Eyemouth Holiday Park	Lauder Camping and Caravanning Club Site, Oxton
Honey Cottage Caravan Park, Ettrick Valley	Springwood Caravan Park, Kelso
High View Caravan Park, Coldingham	Rosetta Camping and Caravanning Resort, Peebles
Jedburgh Camping and Caravanning Club Site	Victoria Park Camping and Caravanning Site, Selkirk
Pease Bay Holiday Home Park, Cockburnspath	Thirlestane Castle Camping and Caravanning Park, Lauder
Jedwater Caravan Park, Jedburgh	

POLICY ED8: CARAVAN AND CAMPING SITES

(A) NEW AND EXTENDED CARAVAN AND CAMPING SITES

The Council will support proposals for new or extended caravan and camping sites for genuine holiday purposes in locations that can support the local economy and the regeneration of towns, and are in accordance with the Scottish Borders Tourism Strategy and Action Plan. Developments on appropriate sites in proximity of settlements that can help support local shops and services will be favoured over isolated countryside locations.

All proposals must meet the following criteria:

- a) must be of the highest quality and in keeping with their local environment and should not cause unacceptable environmental impacts;
- b) must be acceptable in terms of impact on infrastructure; and
- c) must be in locations free of flood risk.

Where a proposal comes forward for the creation of a new or extended site, a business plan that supports the proposal and that is relevant to the locality will be required to be submitted as part of the application process.

(B) EXISTING CARAVAN AND CAMPING SITES

The Council will protect existing caravan and camping sites where their loss is likely to have a significant and sustained adverse impact on tourism.

Proposals that result in the loss of an existing caravan or camping site may be supported where:

- a) it can be adequately demonstrated that the existing tourism facility is financially unviable, and
- b) it can be adequately demonstrated that all reasonable attempts have been made to sell the site as a 'viable concern', and
- c) it can be adequately demonstrated that the loss of the tourism function will not have an adverse impact on the tourist character of the area,
- d) the site sits within the settlement and is enclosed by neighbouring development,
- e) the site could not reasonably be returned to agricultural, forestry or recreational use; and
- f) where relevant, it does not conflict with the established land use of the area; and
- g) it does not detract from the character and amenity of the surrounding area; and
- h) the individual and cumulative effects of the development can be sustained by the social and economic infrastructure and it does not lead to over-development or 'town and village cramming'; and
- i) it respects the scale, form, design, materials and density of its surroundings; and
- j) adequate access and servicing can be achieved, particularly taking account of water and drainage and schools capacity.

ECONOMIC DEVELOPMENT (ED)

POLICY ED9

RENEWABLE ENERGY DEVELOPMENT

- 1.1 National planning policy and guidance promotes and supports renewable energy to facilitate the transition to a low carbon economy. The Climate Change (Scotland) Act 2009 requires all public bodies to contribute to the emissions targets in the Act and to deliver the Government's climate change programme. The need to mitigate the causes of climate change and the need to adapt to its short and long term impacts should be taken into account in all decisions within the planning process. Burning fossil fuels is a major contributor to greenhouse gas emissions and reducing their use and increasing the proportion of power generated from renewable energy sources is supported by the Government as a vital part of reducing these emissions. The generation of renewable energy also supports the transformational change to creating a low carbon economy and helps to increase sustainable economic growth.
- 1.2 Scottish Borders Council has been proactive in supporting a diverse range of renewable energy types. This includes the development of onshore wind farms and turbines, combined heat and power, biomass, energy from waste facilities and maximising the reuse of surplus heat micro scale photovoltaic/solar panels. It includes provision for 'micro generation', the production of heat or electricity by individual households or small groups of households. In implementing statutory duties to support both renewable energy and protect the landscape and the environment, the Council seeks a balance between these objectives within the decision making process. This is a more challenging balance particularly with regards wind farms proposals. Factors such as the scale of the proposal and its potential impact on the surrounding area will be taken into account. In all cases, particular attention will be paid to the need for sensitive siting and design, including the consideration of reasonable alternatives by the developer.
- 1.3 The Council promotes and supports its Low Carbon Economic Strategy which develops a series of key themes and objectives suggesting priority actions which will lead to a resilient, lower carbon future for the area. The Council supports the development of heat networks and the effective use of renewables, and will develop further work on heat mapping. A Sustainable Development Committee has been set up within the Council to ensure a corporate approach is taken to embedding sustainable development within its strategies, policies and service delivery.
- 1.4 The aim of policy ED9 is to support renewable energy, to guide development to appropriate locations, and to advise on the factors to be taken into account in considering proposals. The policy takes account of Government requirements which emphasise the role of local authorities and the planning system in meeting national renewable energy targets. These targets include: 100% of electricity demand to be generated from renewables by 2020; 11% of non-electrical heat demand from renewables by 2020; 12% reduction in the amount of energy consumed annually by 2020; and an all renewable energy target of 50% by 2030.

- 1.5 Policy ED9 was initially prepared following extensive scrutiny by Reporters at the Examination of the LDP 2016 and it is considered it remains robust and makes reference to relevant matters to be considered to guide planning applications. Policy ED9 has therefore been taken forward into this Plan subject to reference updates.
- 1.6 Planning applications for wind turbines can be contentious, and there are very strong and differing opinions on them. The Council has followed national advice in determining applications by supporting turbines in locations considered appropriate, and refusing them in locations considered inappropriate. In order to increase operational efficiency some wind turbines are now proposed at much greater heights and the Council has already received applications within the Region for turbines 200m in height. It is expected more of these proposals will be submitted. These applications must be carefully scrutinised as well as assessing any impacts from any required lighting.
- 1.7 As recommended by the Directorate for Planning and Environmental Appeals following the Examination of the LDP 2016, the Council was required to produce Supplementary Guidance (SG) on Renewable Energy. The SG was prepared and ultimately cleared by Scottish Ministers in July 2018. The SG confirms the requirements of National Planning Framework 3, Scottish Planning Policy (SPP), Strategic Development Plan 2013, LDP 2016 and makes reference to other documents from a wide range of sources which are considered relevant guidance for any interested parties to refer to.
- 1.8 In terms of wind energy, the SG sets out a spatial framework as required by SPP identifying areas where wind farms will not be acceptable, areas of significant protection and areas with potential for wind farm development. The SG incorporates an update of the Ironside Farrar Landscape Capacity and Cumulative Impact study in November 2018. The study investigated the capacity of each of the Scottish Borders Landscape Character Areas to accommodate turbines taking cognisance of matters such as landform, approved turbines to date, impact on key receptors, the identification of opportunities and constraints and any cumulative impact issues. The SG also expands upon and gives useful guidance with regards to a number of Development Management considerations identified within both policy ED9 of the LDP and SPP.
- 1.9 Although wind energy is the main component part of the SG, reference is also given to a range of other types of renewable energy which are considered the most common and emerging types where useful guidance could be given. These other renewable energy types include micro-renewables including photovoltaic panels, field scale solar voltaics, biomass, energy from waste, anaerobic digestion, hydro and ground source heat pumps. For each of these energy types, reference is given to useful background information and good planning practice guidance. The SG supersedes the Council's SPG's on Wind Energy 2011 and Renewable Energy 2007.
- 1.10 The Council prepared Supplementary Planning Guidance in December 2013, entitled Landscape and Visual Guidance for Single and Groups of 2 or 3 Wind Turbines in Berwickshire. This was prepared in response to the high number of planning applications being submitted in Berwickshire for these types of turbines. It set out detailed advice on the siting of development, and will be taken into account in the consideration of planning applications, along with any landscape and visual impact assessment for a proposal, and other relevant landscape, visual and cumulative impact guidance. There has been a considerable drop in these application types but the existing SPG remains useful to help guide such proposals, and so there are consequently no plans to update this guidance in the near future.
- 1.11 It is acknowledged that the renewable energy field is constantly evolving, with existing technologies developing and new technologies coming forward. It is considered that policy ED9 and the SG on Renewable Energy 2018 form a sound basis for determining a range of renewable energy applications. Furthermore the Ironside Farrar Study 2016 also helps guide proposals for wind energy including those for repowering.

POLICY ED9: RENEWABLE ENERGY DEVELOPMENT

RENEWABLE ENERGY DEVELOPMENT

The Council will support proposals for both large scale and community scale renewable energy development including commercial wind farms, single or limited scale wind turbines, biomass, hydropower, biofuel technology, and solar power where they can be accommodated without unacceptable significant adverse impacts or effects, giving due regard to relevant environmental, community and cumulative impact considerations.

The assessment of applications for renewable energy developments will be based on the principles set out in Scottish Planning Policy (2014), in particular, for onshore wind developments, the terms of Table 1: Spatial Frameworks. Renewable energy developments, including wind energy proposals, will be approved provided that there are no relevant unacceptable significant adverse impacts or effects that cannot be satisfactorily mitigated. If there are judged to be relevant significant adverse impacts or effects that cannot be satisfactorily mitigated, the development will only be approved if the Council is satisfied that the wider economic, environmental and other benefits of the proposal outweigh the potential damage arising from it.

SUPPLEMENTARY GUIDANCE

The Council's SG on Renewable Energy 2018 sets out the detailed policy considerations against which all proposals for wind energy and other forms of renewable energy will be assessed, based on those considerations set out at paragraph 169 of Scottish Planning Policy 2014 (SPP). The SG confirms the onshore spatial framework as required by SPP, identifying areas where wind farms will not be acceptable, areas of significant protection, areas with potential for wind farm development, and indicates the minimum scale of onshore wind development that the framework applies to.

CONSIDERATION OF WIND ENERGY PROPOSALS

The assessment of wind energy proposals will include the following considerations:

- the onshore spatial framework which identifies those areas that are likely to be most appropriate for onshore wind turbines;
- landscape and visual impacts, to include effects on wild land, and taking into account the report on Landscape Capacity and Cumulative Impact (November 2018) as an initial reference point, the landscape and visual impact assessment for a proposal (which should demonstrate that it can be satisfactorily accommodated in the landscape, and should properly address the issues raised in the 2018 report), and other relevant landscape, visual and cumulative impact guidance, for example that produced by Scottish Natural Heritage;
- all cumulative impacts, including cumulative landscape and visual impact, recognising that in some areas the cumulative impact of existing and consented development may limit the capacity for further development;
- impacts on communities and individual dwellings (including visual impact, residential amenity, noise and shadow flicker);
- impacts on carbon rich soils (using the carbon calculator), public access, the historic environment (including scheduled monuments and listed buildings, and their settings), tourism and recreation, aviation and defence interests and seismological recording, telecommunications and broadcasting installations, and adjacent trunk roads and road traffic;
- effects on the natural heritage (including birds), and hydrology, the water environment and flood risk;
- opportunities for energy storage;
- net economic impact, including local and community socio-economic benefits such as employment, associated business and supply chain opportunities;
- consequences of lighting in terms of visual or amenity impacts;

- the scale of contribution to renewable energy generation targets, and the effect on greenhouse emissions;
- the need for conditions relating to the decommissioning of developments, including ancillary infrastructure, and site restoration; and
- the need for a robust planning obligation to ensure that operators achieve site restoration.

Developers must demonstrate that they have considered options for minimising the operational impact of wind turbine proposals, including ancillary development such as tracks.

CONSIDERATION OF OTHER RENEWABLE ENERGY DEVELOPMENTS

Small scale or domestic renewable energy developments including community schemes, single turbines and micro-scale photovoltaic/solar panels will be encouraged where they can be satisfactorily accommodated into their surroundings in accordance with the protection of residential amenity and the historic and natural environment.

Renewable technologies that require a countryside location such as the development of bio fuels, short crop rotation coppice, biomass or small scale hydro-power will be assessed against the relevant environmental protection and promotion policies, and other relevant policies in the local development plan.

Waste to energy schemes involving human, farm and domestic waste will be assessed against Policy IS10 Waste Management Facilities.

ECONOMIC DEVELOPMENT (ED)

POLICY ED10

PROTECTION OF PRIME QUALITY AGRICULTURAL LAND AND CARBON RICH SOILS

- 1.1 Paragraph 80 of Scottish Planning Policy (SPP) states that development on prime quality agricultural land, or land of lesser quality that is locally important, should not be permitted except for a limited number of specified circumstances. Prime quality agricultural land is a valuable and finite resource which needs to be retained for farming and food production. In allocating sites for development, the Council has aimed to avoid such land. Carbon rich soils, such as peat, are an important carbon store and its use and extraction can contribute to climate change. Paragraph 205 of SPP states that where peat and other carbon rich soils are present applicants should assess the likely effects of development on carbon rich soil emissions. Where peatland is drained or disturbed there is a liable release of carbon dioxide into the atmosphere. The policy seeks to prevent the permanent loss of prime quality agricultural land and carbon rich soils. In order to take proper account of the terms of SPP, proposals for renewable energy developments, including proposals for wind energy development, will be required to accord with the objectives and requirements of policy ED9 rather than meet the requirements of this policy.
- 1.2 Certain developments of a temporary nature may be acceptable if adequate provision can be made for restoration of the soil once the development is removed. However, as it may take many years to restore the agricultural land to its former quality, this should not be encouraged. Prime quality land is defined as classes 1, 2 and 3.1 of the Macaulay Institute Land Classification for Agriculture system.
- 1.3 Figure ED10a identifies the core resources of agricultural land and carbon rich soils. Proposals should avoid areas of deepest peat and minimising impacts on soils and mitigation measures should be addressed. A peat (or soil) survey should be provided where required to demonstrate that the areas of highest quality soil or deepest peat have been avoided. In addition a soil or peat management plan may be requested when required to demonstrate that any unnecessary disturbance, degradation or erosion has been minimised, which includes proposed mitigation measures. Reference should be made to SEPA's Development Plan Guidance Notes (Soils).

POLICY ED10: PROTECTION OF PRIME QUALITY AGRICULTURAL LAND AND CARBON RICH SOILS

Development, except proposals for renewable energy development, which results in the permanent loss of prime quality agricultural land or significant carbon rich soil reserves, particularly peat, will not be permitted unless:

- a) the site is otherwise allocated within this local plan
- b) the development meets an established need and no other site is available
- c) the development is small scale and related to a rural business.

Proposals for renewable energy development, including proposals for wind energy development, will be permitted if they accord with the objectives and requirements of Policy ED9 on renewable energy development.

KEY POLICIES TO WHICH THIS POLICY SHOULD BE CROSS REFERENCED:

Policy PMD2 Quality Standards
Policy PMD4 Development adjoining Development Boundaries
Policy ED9 Renewable Energy Development
Policy HD2 Housing in the Countryside

ECONOMIC DEVELOPMENT (ED)

POLICY ED11

SAFEGUARDING OF MINERAL DEPOSITS

- 1.1 Scottish Planning Policy confirms the important contribution minerals make to the economy, providing materials for construction, energy supply and other uses, and supporting employment. Consequently the Local Plan should safeguard mineral resources and facilitate their responsible use. The aim of Policy ED11 is to ensure that minerals are not unnecessarily sterilised through inappropriate development. The policy criteria relates to land both within and outwith the Scottish Borders.

POLICY ED11: SAFEGUARDING OF MINERAL DEPOSITS

The council will not grant planning permission for development which will sterilise reserves of economically significant mineral deposits unless:

- a) extraction of the mineral is likely to be environmentally and socially unacceptable, or
- b) there is an overriding need for development, and prior extraction of the mineral cannot reasonably be undertaken.

ECONOMIC DEVELOPMENT (ED) POLICY ED12 MINERAL AND COAL EXTRACTION

- 1.1 Whilst there is a need to safeguard mineral resources Scottish Planning Policy states that consideration must also be given to minimising the impacts of extraction on local communities, the environment and the built and natural heritage. Consequently a balance must be struck between these needs. The aim of policy ED12 is to ensure that mineral working is carried out with minimal adverse impact on the environment and with appropriate restoration measures following extraction. Figure ED12a should be referred to which identifies areas of search, although future Supplementary Planning Guidance on Minerals is proposed to refine this information. The broad areas of search for coal are in the north west and south west of the region. The policy criteria relates to land both within and outwith the Scottish Borders.

Figure ED12a
Areas of Search for Minerals

Contains information from Historic Scotland, SEPA, SNH. © Crown Copyright and database right 2019. All rights reserved. Ordnance Survey Licence number 100023423.

POLICY ED12: MINERAL AND COAL EXTRACTION

Mineral and coal extraction will not be permitted where:

- a) It may affect areas designated or proposed for designation under European Directives (Special Areas of Conservation and Special Protection Areas) or Ramsar sites, except in the most exceptional circumstances and where it can be demonstrated conclusively that:
 - The proposed development will have no adverse effect on site integrity in terms of habitats and species, or
 - There is an overriding national interest in allowing mineral extraction to take place, and no reasonable alternative exists.
- b) It may affect National Nature Reserves, Sites of Special Scientific Interest or other environmental designations of national importance unless it can be demonstrated that:
 - The underlying objectives and overall integrity of the designated area will not be compromised, or
 - Any significant adverse effects on the environmental qualities for which the site has been designated are clearly outweighed by the national benefits that could accrue from mineral extraction.
- c) It may affect areas of regional or Local Nature Conservation interest as defined in this Plan and the following other protected areas, namely Conservation Areas, Scheduled Monuments, Historic Gardens and Designated Landscapes, significant archaeological sites and where relevant, their settings, prime quality agricultural land, Special Landscape Areas, National Scenic Areas, peatland and water supply catchment areas, unless it can be demonstrated that:
 - There is no materially damaging impact, or
 - There is a public interest to be gained from mining which outweighs the underlying reasons for designating the site or area.
- d) It is within 500m of a local settlement or proposals will adversely affect residential and other sensitive property or other activities within that community or areas of locally important landscape character unless it can be demonstrated that there are other mitigating circumstances, that the specific circumstances of a proposal indicate the figure should be varied, or that a significant public interest is to be gained from mining which outweighs this safeguarding.
- e) It is likely to damage the local economy in terms of tourism, leisure or recreation to an unacceptable extent.
- f) The roads are unsuitable as mineral haulage routes by virtue of their design and construction, the nature of other usage and the relationship of residential and other sensitive property to the road.
- g) It results in adverse effects which, when combined with the effects of other existing, consented and currently proposed nearby workings, would have a significantly adverse cumulative impact on the environment or local communities.

Where the Council is minded to permit development appropriate mitigating measures will be sought to enable a satisfactory development to proceed, and to set out proposals for restoration and aftercare including the preferred financial guarantee option.

There will be a presumption against peat extraction and other development likely to have an adverse effect on peatland and/or carbon rich soils within class 1 and 2 peatland areas.

SCOTTISH BORDERS COUNCIL PROPOSED LOCAL DEVELOPMENT PLAN 2020

HOUSING DEVELOPMENT (HD)

Policy HD1 relates to affordable housing provision and seeks to ensure new housing development proposals provide an appropriate range and choice of affordable units as well as mainstream market housing. A new policy relates specifically to Housing for Particular Needs.

The Council is required to maintain an effective 5 year housing land supply at all times which is monitored via the annual Housing Land Audit. Where a shortfall is identified within a particular housing market area within the period of the Plan, new developments will be directed to longer term safeguarded areas identified in settlement profiles which will be assessed against relevant LDP policies. Full impacts on house building and take up due to Covid 19 are difficult to accurately predict at this point in time.

This section also lays down policy tests for determining planning applications for housing in the countryside, striking the balance between supporting proposals in rural areas where appropriate whilst also safeguarding the attractive Scottish Borders landscape. This section also lays down criteria tests to be addressed for proposals for residential care and nursing homes. Policy HD3 seeks to ensure the protection of existing and proposed residential amenity when new development proposals are submitted.

HOUSING DEVELOPMENT (HD)

POLICY HD1

AFFORDABLE HOUSING DELIVERY

- 1.1 The aim of this policy is to ensure that new housing development provides an appropriate range and choice of 'affordable' units as well as mainstream market housing. The provision of affordable housing is a material consideration in the planning system, and the Development Plan is recognised as an appropriate vehicle through which it may be facilitated by Planning Authorities.
- 1.2 'Affordable' housing is broadly defined as housing of a reasonable quality that is affordable to people on modest incomes. Scottish Planning Policy (SPP) sets out that affordable housing can be provided in many forms including: social rented accommodation, mid-market rented accommodation, shared ownership housing, shared equity housing, housing sold at a discount and low cost housing without subsidy.
- 1.3 SPP requires Local Authorities to identify a generous supply of land for each housing market area, to meet the housing land requirement across all tenures, maintaining a 5 year effective housing land supply at all times. The housing supply targets (affordable and market) and the housing land requirement were informed by the Housing Need and Demand Assessment 2 (HNDA), which was considered to be 'robust and credible' by the Scottish Government in March 2015.
- 1.4 There are various Council documents which continue to support and facilitate the delivery of affordable housing within the Scottish Borders. The Local Housing Strategy (LHS) sets out the affordable housing supply target and provides the strategic direction to tackle affordable housing need and demand, whilst informing the future investment in housing and related services. The Strategic Housing Investment Plan (SHIP) sets out the key strategic housing investment priorities for affordable housing over a five year period. This policy continues to support the delivery of affordable housing sites throughout the Scottish Borders.
- 1.5 The requirement set by this policy, and the means of meeting it, will vary between settlements and between sites. Negotiation on a site by site basis at the time of an application will determine the precise requirements relating to any specific development proposal. Ongoing research as part of the local housing needs assessment has identified, and will continue to identify, areas where there is a demonstrated need for affordable housing.
- 1.6 In some places the market provides some or all of the affordable housing needed, while in other places it will be necessary to make housing available at a cost below market value to meet an identified need. A more detailed definition is given in the Supplementary Planning Guidance (SPG) on Affordable Housing.
- 1.7 Decision making will be guided by the Council's SPG on Affordable Housing although, in accordance with SPP, the level of contribution within a market site will generally be no more than 25% of the total number of houses. The percentage may be varied depending on the site characteristics or the information available on local need. The SPG sets out the threshold requirement for on-site affordable housing and commuted sum contributions.

POLICY HD1: AFFORDABLE HOUSING DELIVERY

The Council will require the provision of a proportion of land for affordable housing, currently set at 25%, both on allocated and windfall sites. The final scale of such affordable housing will be assessed against:

- a) local housing needs
- b) the location and size of the site, and
- c) the availability of other such housing in the locality.

Developers may be required to make contributions through:

- a) the provision of a proportion of the site for affordable housing in the form of land or built units, or
- b) the provision of additional land elsewhere to accommodate the required number of affordable housing units, or
- c) the provision of commuted payments.

The Supplementary Planning Guidance on Affordable Housing expands upon the above policy. An agreed mechanism will be required to secure the delivery of affordable housing and any commuted payments shall be secured by Section 69 or 75 Legal Agreements.

HOUSING DEVELOPMENT (HD)

POLICY HD2

HOUSING IN THE COUNTRYSIDE

- 1.1 The Council aims to encourage a sustainable pattern of development focused on defined settlements in accordance with the need to support existing services and facilities and to promote sustainable travel patterns. An exception to this general approach is the Housing in the Countryside policy, which aims to encourage high quality sustainable housing development in appropriate locations within the countryside as a means of sustaining the rural economy and communities. High quality design is a requirement for all rural development proposals. This is relevant whether they are an addition to existing building groups, conversions, restorations, replacement housing or isolated housing with a location essential for business needs.
- 1.2 The policy sets out criteria against which proposals for housing in the countryside will be assessed. In doing this the policy will protect the environment from inappropriate and sporadic new housing development whilst still being able to support rural communities. All proposals must demonstrate high quality design that is responsive to its landscape context.
- 1.3 Parts a) and b) of the policy set out criteria in respect of proposed housing within an existing building group or dispersed building group in the Southern Housing Market Area. In both these instances detailed evidence on the relationship of the proposed new housing to the building group or dispersed building group should accompany the planning application. The provisions regarding dispersed building groups within this policy have been formulated in response to concerns over rural sustainability in the Southern Housing Market Area. It should be noted that in the context of building groups, it may be the case that some building groups are considered to be complete and are therefore unable to accommodate additional development.
- 1.4 The policy also supports appropriate conversions, restorations and replacement of housing within the countryside as a means of retaining a building whose character contributes to its rural setting, and for acknowledging an existing residential presence in such locations. However, the policy restricts isolated new housing in the countryside unless it can be satisfactorily substantiated by an economic justification under part f) of the policy. For such housing proposals with a location essential for business needs, an accompanying business case/justification will be required, which demonstrates the economic requirement for a house at that location.
- 1.5 Proposals for affordable housing in the countryside will only be supported if it meets the criteria tests contained within policies PMD4 and HD1. The Supplementary Planning Guidance on Affordable Housing provides more detailed information on this.

- 1.6 Any housing proposals which fall within the Countryside Around Towns (CAT) area, will also be assessed against Policy EP6. In such instances the CAT policy will carry greater weight. This will be the case except where a proposal is put forward to build within the confines of an existing building group as opposed to extending at or beyond its edges. Such proposals must be able to demonstrate that the high quality environment will be maintained. In this situation the proposal could be permissible under the CAT policy but will still have to meet the requirements of Policy HD2. Where a replacement house is proposed within the CAT area, this may be acceptable subject to meeting the criteria contained within Policy HD2(E) - Replacement Dwellings.
- 1.7 The Council will review its policy guidance on housing in the countryside by producing revised Supplementary Planning Guidance (SPG). The SPG will provide further clarity and expansion on the definitions contained within the policy criteria below.

POLICY HD2: HOUSING IN THE COUNTRYSIDE

The Council wishes to promote appropriate rural housing development:

- a) in village locations in preference to the open countryside where permission will only be granted in special circumstances on appropriate sites,
- b) associated with existing building groups where this does not adversely affect their character or that of the surrounding area, and
- c) in dispersed communities in the Southern Borders Housing Market Area.

As well as the above general principles, high quality design in all developments is critical, along with the requirement for suitable vehicular access. This will be guided by Supplementary Planning Guidance (SPG) on New Housing in the Borders Countryside and on Placemaking and Design.

(A) BUILDING GROUPS

Housing of up to a total of two additional dwellings or a 30% increase of the existing building group, whichever is the greater, may be approved provided that:

- a) the Council is satisfied that the site is well related to an existing group of at least three houses currently in residential use, provided that the group has scope for expansion and is not already considered complete,
- b) the cumulative impact of new development on the character of the building group, and on the landscape and amenity of the surrounding area will be taken into account when determining new applications. Additional development within a building group will be refused if, in conjunction with other developments in the area, it will cause unacceptable adverse impacts,
- c) any consents for new build granted under this part of this policy should not exceed two dwellings or a 30% increase in addition to the group during the Plan period. No further development above this threshold will be permitted.

In addition, where a proposal for new development is to be supported, the proposal should be appropriate in scale, siting, design, access, and materials, and should be sympathetic to the character of the building group.

The calculations on building group size are based on the existing number of housing units within the group as at the start of the Local Development Plan period. This will include those units under construction or nearing completion at that point.

(B) DISPERSED BUILDING GROUPS

In the Southern Housing Market area there are few building groups comprising three houses or more, and a more dispersed pattern is the norm. In this area a lower threshold may be appropriate, particularly where this would result in tangible community, economic or environmental benefits. In these cases the existence of a sense of place will be the primary consideration.

Housing of up to two additional dwellings associated with dispersed building groups that meet the above criteria may be approved provided that:

- a) the Council is satisfied that the site lies within a recognised dispersed community in the Southern Borders housing market area,
- b) any consents for new build granted under this part of this policy should not exceed two dwellings in addition to the group during the Plan period. No further development above this threshold will be permitted,
- c) the design of housing will be subject to the same considerations as other types of housing in the countryside proposals.

(C) CONVERSIONS OF BUILDINGS TO A HOUSE

Development that is a change of use of a building to a house may be acceptable provided that:

- a) the Council is satisfied that the building has architectural or historic merit, is capable of conversion and is physically suited for residential use,
- b) the building stands substantially intact (normally at least to wallhead height) and the existing structure requires no significant demolition. A structural survey will be required where in the opinion of the Council it appears that the building may not be capable of conversion, and
- c) the conversion and any proposed extension or alteration is in keeping with the scale and architectural character of the existing building.

(D) RESTORATION OF HOUSES

The restoration of a derelict or former house may also be acceptable provided that there is substantial physical evidence of a house remaining, which can be supported by documentary evidence. In addition:

- a) the siting and design reflects and respects the historical building pattern and the character of the landscape setting,
- b) any proposed extension or alteration should be in keeping with the scale, form and architectural character of the existing or original building, and
- c) significant alterations to the original character will only be considered where it can be demonstrated that these provide environmental benefits such as a positive contribution to the landscape and/or a more sustainable and energy efficient design.

(E) REPLACEMENT DWELLINGS

The proposed replacement of an existing house may be acceptable provided that:

- a) the house being replaced is currently occupied or capable of occupation,
- b) the siting and design of the new building reflects and respects the historical building pattern and the character of the landscape setting,
- c) the proposal is in keeping with the existing/original building in terms of its scales, extent, form and architectural character,
- d) significant alterations to the original character of the house will only be considered where it can be demonstrated that these provide environmental benefits such as a positive contribution to the landscape and /or a more sustainable and energy efficient design.

(F) ECONOMIC REQUIREMENT

Any dwelling with a location essential for business needs may be acceptable if the Council is satisfied that:

- a) the housing development is a direct operational requirement of an agricultural, horticultural, forestry or other enterprise which is itself appropriate to that location, and it is for a worker predominantly employed in the enterprise and the presence of that worker on-site is essential to the efficient operation of the enterprise. Such development could include businesses that would cause disturbance or loss of amenity if located within an existing settlement, or
- b) it is for use of a person last employed in an agricultural, horticultural, forestry or other enterprise which is itself appropriate to that location, and also employed on the unit that is the subject of the application, and the development will release another house for continued use by an agricultural, horticultural, forestry or other enterprise which is itself appropriate to that location, and
- c) the housing development would help support a business that results in a clear social or environmental benefit to the area, including the retention or provision of employment or the provision of affordable or local needs housing, and
- d) no appropriate site exists within a building group, and
- e) there is no suitable existing house or other building capable of conversion for the required residential use.

Where a house is proposed with a location essential for business needs, an accompanying business case/justification will be required, which demonstrates the economic requirement for a house at that location.

In ALL instances in considering proposals relative to each of the policy sections above, there shall be compliance with the Council's Supplementary Planning Guidance relating to Housing in the Countryside where it meets the terms of this policy and development must not negatively impact on landscape and existing communities. The cumulative effect of applications under this policy will be taken into account when determining impact.

HOUSING DEVELOPMENT (HD)

POLICY HD3

PROTECTION OF RESIDENTIAL AMENITY

- 1.1 The aim of the policy is to protect the amenity of both existing established residential areas and proposed new housing developments. The policy applies to areas where the predominant use is residential; such areas are not identified on the Settlement Maps given that the predominant use of an area can change over time. The policy will be applicable for alterations and extensions, development on garden ground or 'backland', redevelopment of brownfield sites and development on gap sites. It applies to all forms of development and is also applicable in rural situations. This policy also applies to applications for renewable energy developments.
- 1.2 The Scottish Government's Scottish Planning Policy (SPP) states the need for high quality layout in housing developments in order to protect residential amenity.
- 1.3 Reference should also be made to the Council's Householder Developments Supplementary Planning Guidance in relation to privacy, sunlight and amenity.

POLICY HD3: PROTECTION OF RESIDENTIAL AMENITY

Development that is judged to have an adverse impact on the amenity of existing or proposed residential areas will not be permitted. To protect the amenity and character of these areas, any developments will be assessed against:

- a) the principle of the development, including where relevant, any open space that would be lost; and
- b) the details of the development itself particularly in terms of:
 - (i) the scale, form and type of development in terms of its fit within a residential area,
 - (ii) the impact of the proposed development on the existing and surrounding properties particularly in terms of overlooking, loss of privacy and sunlighting provisions. These considerations apply especially in relation to garden ground or 'backland' development,
 - (iii) the generation of traffic or noise,
 - (iv) the level of visual impact.

HOUSING DEVELOPMENT (HD)

POLICY HD4

FURTHER HOUSING LAND SAFEGUARDING

- 1.1 This policy is intended to assist the Council to maintain the five year effective housing land supply at all times, while safeguarding particularly sensitive areas from development. The housing land audit process will be used to monitor the need for any additional land release. Where a shortfall is identified within the Local Development Plan area, new development will be directed to the longer term safeguarded areas identified in relation to settlements. These safeguarded areas are shown on the Settlement Profiles in Volume 2. Any proposals that come forward in these areas will be assessed against the policies in the approved Development Plans.

POLICY HD4: FURTHER HOUSING LAND SAFEGUARDING

The areas indicated in the Settlement Profiles for longer term expansion and protection shall be safeguarded accordingly. Any proposals coming forward for housing development within these longer term expansion areas in advance of the identification of a shortfall in the effective housing land supply will be treated as premature.

KEY POLICIES TO WHICH THIS POLICY SHOULD BE CROSS REFERENCED:

Policy PMD4 Development adjoining Development Boundaries
Policy ED7 Business, Tourism and Leisure Development in the Countryside
Policy HD1 Affordable Housing Delivery
policy HD6 Housing for Particular Needs
Policy IS2 Developer Contributions

HOUSING DEVELOPMENT (HD)

POLICY HD5

CARE AND NURSING HOMES

- 1.1 Scottish Planning Policy requires local authorities to consider the need for specialist provision, that includes care and nursing homes. The Scottish Borders has an aging population and consequently will have a supportive role in ensuring adequate provision is delivered.
- 1.2 The aim of the policy is to ensure that applications for residential care and nursing homes take account of the identified local need for such facilities. With the current demographics of the Scottish Borders and its growing proportion of older people, it is considered that the demand for care and nursing homes is likely to grow. As these facilities are often run as a private business, the local economy can therefore take advantage of the benefits arising from such opportunities. This policy will also apply where housing with care is being proposed.
- 1.3 In respect to new proposals, like other housing developments preference will be given to sites located within settlements with good access to local services and facilities. It is also important to recognise the need for the new home to be located within the community it serves, and not to be isolated from it. Whilst good access to all modes of transport including public transport is paramount, it will also be necessary to ensure that appropriate parking provision is available for the needs of the occupants, staff, and visitors.
- 1.4 Access to useable amenity space for occupants and their visitors should be incorporated into all new developments.

POLICY HD5: CARE AND NURSING HOMES

Proposals for new or extended residential care or nursing homes or other supported accommodation provision will be supported where this meets an identified local need as defined by agreed joint strategies and commissioning plans by the Council and NHS Borders.

Any new residential care or nursing home proposal will be required to meet the following criteria:

- a) be well located to allow good access to a range of local services and facilities and is accessible by a range of transport modes including public transport,
- b) have appropriate parking provision available that meets the needs of residents, visitors and staff,
- c) provide good quality amenity space available for the enjoyment of residents and their visitors,
- d) be appropriate to its setting in terms of landscape, visual and residential amenity impacts, and provides an attractive environment for prospective residents.

Planning for Particular Needs Housing

HOUSING DEVELOPMENT (HD)

POLICY HD6

HOUSING FOR PARTICULAR NEEDS

- 1.1 The aim of this policy is to ensure the provision of housing for particular needs throughout the Scottish Borders. Housing for particular needs can take many forms including for example: accessible and adapted housing; wheelchair/disabled housing; supported accommodation; extra care housing; student accommodation and gypsy/travellers and travelling showpeople. A working group including Council officials has been set up to consider methods for incorporating the needs of the disabled into Council policy. The findings of the group will be taken forward and it is envisaged that Supplementary Planning Guidance (SPG) on housing for particular needs will be produced in due course.
- 1.2 Scottish Planning Policy (SPP) requires Local Authorities to identify a generous supply of land for each housing market area, to meet the housing land requirement across all tenures, maintaining a five year effective housing land supply at all times. The housing land requirement was informed by the Housing Need and Demand Assessment 2 (HNDA), which was considered to be 'robust and credible' by the Scottish Government in March 2015.
- 1.3 The HNDA considered the need for specialist housing provision and there are various Council documents which continue to support and facilitate the delivery of housing for particular needs throughout the Scottish Borders. The Local Housing Strategy (LHS) sets out the vision and priorities for the future of housing and all housing related services across the Scottish Borders, considering all tenures and types of accommodation. The Strategic Housing Investment Plan (SHIP) sets out the key strategic housing investment priorities for affordable housing over a five year period. The SHIP includes proposals for the following particular needs housing: extra care and amenity housing. The Council has produced a number of strategies, which are underpinned by the LHS priorities, these include the Integrated Strategic Plan for Older People's Housing Care and Support and the Housing Needs and Aspirations of Young People Study.
- 1.4 The Council will continue to support proposals for particular housing needs, which may be identified within the HNDA, LHS or any other studies undertaken by the Council or its community partners. Decision making will be guided by local housing needs, which are set out within the HNDA and underpinned within the LHS priorities.

POLICY HD6: HOUSING FOR PARTICULAR NEEDS

The Council will support proposals for particular needs housing (including affordable housing) and accommodation, where there is an identified local housing need set out within the Housing Need and Demand Assessment, Local Housing Strategy or any other studies undertaken by the Council or its community partners.

Such proposals should be located to allow good access to a range of local services and facilities, be integrated with the local community and accessible by a range of transport modes, as well as appropriate in terms of visual impact and setting, including for prospective residents.

SCOTTISH BORDERS COUNCIL PROPOSED LOCAL DEVELOPMENT PLAN 2020

ENVIRONMENTAL PROMOTION AND PROTECTION (EP)

The Scottish Borders is an attractive place to live and work and this puts a clear responsibility on the Council to maintain the intrinsic qualities of the area whilst seeking the balance of promoting the economic stability and growth essential to the future viability of the area. It is essential to ensure the right development occurs in the right place, and conversely, that development does not take place in the wrong place.

This policy section places an emphasis on placemaking and design in relation to new development. It confirms the various landscape, natural environment and nature conservation designations within the Scottish Borders and lays down a range of criteria tests to be applied to ensure their protection and/or any potential appropriate mitigation measures.

There are forty three Conservation Areas and over four thousand Listed Buildings within the Region and appropriate policy tests must ensure that any proposals preserve or enhance the special architectural or historic character and appearance of these built environment designations.

ENVIRONMENTAL PROMOTION AND PROTECTION (EP) POLICY EP1 INTERNATIONAL NATURE CONSERVATION SITES AND PROTECTED SPECIES

- 1.1 The aim of this policy is to give designated or proposed Natura sites, Ramsar sites and sites where there is the likely presence of European Protected Species (EPS) protection from potentially adverse development.
- 1.2 The Natura 2000 network comprises Special Areas of Conservation (SAC) and Special Protection Areas (SPA), which represent the very best of Scotland's nature and are internationally important for threatened habitats and species. SAC protect special habitats and/or species and are designated under the Habitats Directive. SPA protect birds and are designated under the Birds Directive. The network includes both terrestrial and marine protected species.
- 1.3 Ramsar sites (also designated as SSSI) are classified under the Convention on Wetlands of International Importance. Most Ramsar sites are linked to the Natura network either as SAC or SPA.
- 1.4 Where a proposal could have a 'likely significant effect' on a Natura site, an 'appropriate assessment' will be required, to demonstrate that the proposal will not adversely affect the integrity of the site. This is known as a Habitats Regulation Appraisal (HRA).
- 1.5 The Habitats Regulations 1994 (as amended in Scotland) provide the protection given to European protected species of animals and plants. If there is evidence to suggest that an EPS is present on site or may be affected by a proposed development, their presence must be established and any likely impact upon the species will be fully considered prior to the determination of the planning application.
- 1.6 The SAC and SPA are shown on the Policy Maps. Further information on internationally protected species can be found in the Supplementary Planning Guidance (SPG) for Biodiversity and the Local Biodiversity Action Plan.

POLICY EP1: INTERNATIONAL NATURE CONSERVATION SITES AND PROTECTED SPECIES

Development proposals which will have a likely significant effect on a designated or proposed Natura site, which includes all Ramsar sites, are only permissible where an appropriate assessment has demonstrated that it will not adversely affect the integrity of the site.

Where proposals could adversely affect the integrity of the site, they will only be permissible where:

- a) there are no alternative solutions, or
- b) there are imperative reasons of overriding public interest including those of a social or economic nature; and
- c) compensatory measures are provided to ensure that the overall coherence of the Natura network is protected.

Where a development proposal is sited where there is the likely presence of European Protected Species (EPS), the Planning Authority must be satisfied that:

- a) there is no satisfactory alternative, and
- b) the development is required for preserving public health or public safety or for other imperative reasons of overriding public interest including those of a social or economic nature and beneficial consequences of primary importance to the environment, and
- c) the development is not detrimental to the maintenance of the population of a EPS at a favourable conservation status in its natural range.

ENVIRONMENTAL PROMOTION AND PROTECTION (EP) POLICY EP2 NATIONAL NATURE CONSERVATION SITES AND PROTECTED SPECIES

- 1.1 The aim of the policy is to protect nationally important nature conservation sites and protected species. The Wildlife and Countryside Act 1981 as amended by the Nature Conservation (Scotland) Act 2004, Wildlife and Natural Environment (Scotland) Act 2011 and the Protection of Badgers Act 1992 as amended, sets out the protection afforded to wild animals and plants in Scotland. The precautionary principle will be used in identifying potentially adverse effects of development proposals.
- 1.2 Nationally important sites are legally protected by their designations as Sites of Special Scientific Interest (SSSI) for their floral, faunal, geological and geomorphological interests, and as National Nature Reserves (NNR) for the conservation of habitats and species. There are ninety five SSSI and one NNR in the Scottish Borders. Where development is permitted under the exception criteria below, mitigation measures of an appropriate nature to compensate for damage will be required, and may be located either on or off site.
- 1.3 The SSSI and NNR sites are shown on the Policy Maps. Further information on nationally protected species can be found in the Supplementary Planning Guidance (SPG) for Biodiversity and the Local Biodiversity Action Plan. The Biodiversity SPG states that the Council will ensure nationally important species are given full consideration in the assessment of development proposals which may affect them. In addition the Council will not normally grant consent for any development which would have a significant adverse effect upon habitats supporting such species.

POLICY EP2: NATIONAL NATURE CONSERVATION SITES AND PROTECTED SPECIES

Development proposals which are likely to have a significant adverse effect, either directly or indirectly, on a Site of Special Scientific Interest (SSSI), National Nature Reserve (NNR) or habitat directly supporting a nationally important species will not be permitted unless:

- a) the development will not adversely affect the integrity of the site, and
- b) the development offers substantial benefits of national importance, including those of a social or economic nature, that clearly outweigh the national nature conservation value of the site.

The developer will be required to detail mitigation, either on or off site, of any damage that may be caused by development permissible under the exception criteria.

ENVIRONMENTAL PROMOTION AND PROTECTION (EP) POLICY EP3 LOCAL BIODIVERSITY AND GEODIVERSITY

- 1.1 Local Biodiversity Sites (LBS) and Local Geodiversity Sites (LGS) are identified within this Plan as non-statutory designations. Collectively these are referred to as Local Nature Conservation Sites.
- 1.2 One purpose of this policy is to safeguard and enhance local biodiversity. It also contributes to the Council's statutory duty to further the conservation of biodiversity in the Scottish Borders, under Part 1 of the Nature Conservation (Scotland) Act 2004. The approach seeks to encourage developers to consider biodiversity at the outset of a proposal. The Supplementary Planning Guidance (SPG) for Biodiversity provides detailed guidance on the protection and enhancement of biodiversity, while the Local Biodiversity Action Plan (LBAP) sets out the Council's aims for conserving and enhancing biodiversity in the area.
- 1.3 The Scottish Borders countryside and some urban areas play an important role in the conservation of widely dispersed species with national protection. However some areas, designated as Local Biodiversity Sites and detailed in the SPG for Biodiversity, are more critical to the conservation of species and are therefore subject to protection under this policy. There are also priority species and habitats that do not have statutory protection but are of national importance or occur in regionally important populations within the Scottish Borders, these features are classified as Borders Notable Species and Borders Habitats of Conservation Concern. The LBS are shown within the Technical Note: Local Biodiversity Sites.
- 1.4 Decision making will be guided by the LBAP, SPG for Biodiversity, British Standard 42020: 2013 Biodiversity, planning/development briefs, expert advice from relevant environmental agencies and information from the Local Environmental Record Centre (LERC). Any biological site survey undertaken by developers will be deposited with the Council's Ecology Officer and in the LERC. The Council will adopt an integrated ecosystems approach to ensure sustainable use of land, water and living resources, in accordance with good practice, the Land Use Strategy and Scottish Biodiversity Strategy.
- 1.5 The other purpose of the policy is also to safeguard Local Geodiversity Sites which contain geological and/or geomorphological features of interest. LGS have value for one or more of the following reasons; scientific, historical, educational and/or aesthetic value. Furthermore, each of the sites are considered to be of regional importance for the Scottish Borders. The LGS are shown within the Technical Note: Local Geodiversity Sites. The Council will produce Supplementary Planning Guidance on Local Biodiversity Sites and Local Geodiversity Sites.

POLICY EP3: LOCAL BIODIVERSITY AND GEODIVERSITY

Details of these sites are set out within the Technical Notes: Local Biodiversity Sites and Local Geodiversity Sites.

Development that would have an unacceptable adverse effect on Borders Notable Species and Habitats of Conservation Concern will be refused unless it can be demonstrated that the public benefits of the development clearly outweigh the value of the habitat for biodiversity conservation.

Any development that could impact on local biodiversity through impacts on habitats and species should:

- a) aim to avoid fragmentation or isolation of habitats; and
- b) be sited and designed to minimise adverse impacts on the biodiversity of the site, including its environmental quality, ecological status and viability; and
- c) compensate to ensure no net loss of biodiversity through use of biodiversity offsets and ensure net gain as appropriate; and
- d) aim to enhance the biodiversity value of the site, through use of an ecosystems approach, with the aim of creation or restoration of habitats and wildlife corridors and provision for their long-term management and maintenance.

Development that would adversely affect the interest of a local geodiversity site will only be permitted where:

- a) the objectives and integrity of the designation will not be compromised; or
- b) the damage is outweighed by the social, economic or environmental benefits gained from the development; and
- c) suitable mitigation will be secured.

ENVIRONMENTAL PROMOTION AND PROTECTION (EP) POLICY EP4 NATIONAL SCENIC AREAS

- 1.1 The aim of the policy is to protect and enhance the scenic qualities of the National Scenic Areas (NSA) within the Scottish Borders by influencing the nature of development both within and outwith the sites where the development affects the setting and context of the NSA within the wider landscape.
- 1.2 The designation of NSAs was based on the richness of diverse combinations of landscape elements and spectacular or visually dramatic landscapes. There are two NSA located within the Scottish Borders; Eildon and Leaderfoot and Upper Tweeddale.
- 1.3 Where development proposals may potentially impact upon an NSA, developers will be required to carry out detailed assessments involving the identification of the scenic qualities of the NSA, the contribution the application site currently makes to the NSA and the way in which the proposed development will maintain or enhance the qualities of the NSA. In particular, the scale, siting and design of any development proposed should be appropriate to its location, with a high standard of associated landscaping.
- 1.4 The boundaries of the NSAs are shown on the Policy Maps in Volume 1. Further information on the landscape qualities for which the NSAs are designated is available from Scottish Natural Heritage's 'The Special Qualities of the National Scenic Areas'.

POLICY EP4: NATIONAL SCENIC AREAS

Development that may affect National Scenic Areas (NSAs) will only be permitted where:

- a) the objectives of the designation and the overall integrity of the NSA and its surrounds will not be compromised, or
- b) any significant adverse effects on the qualities, for which the site or its surrounds have been designated are clearly outweighed by social or economic benefits of national importance.

ENVIRONMENTAL PROMOTION AND PROTECTION (EP) POLICY EP5 SPECIAL LANDSCAPE AREAS

- 1.1 Local landscape designations are a valued approach to protecting and guiding change in areas of particular landscape importance in Scotland. The aim of the policy is to ensure that local areas of identified landscape quality, known as Special Landscape Areas (SLA) are afforded adequate protection against inappropriate development and that potential maintenance and enhancement of the SLA is provided for. The local landscape designations in the Borders were recently reviewed as part of the previous Local Development Plan process.
- 1.2 As a local designation, the protection is less stringent than needs to be the case for National Scenic Areas. Development that complies with other countryside policies and is in line with the Council's commitment to high quality design and siting may be able to be satisfactorily accommodated in the landscape.
- 1.3 Decision making will be guided by the Supplementary Planning Guidance (SPG) on Local Landscape Designations. This was informed by both Scottish Borders Landscape Character Assessment 1998 (now updated and included in the newly published SNH Scottish Landscape Character Types Digital Map and Descriptions 2019) and 'Guidance on Local Landscape Designations' as produced by Historic Environment Scotland and Scottish Natural Heritage.
- 1.4 The SPG identifies nine SLAs within the Scottish Borders, these are identified on the Policy Maps. For each of the SLAs the SPG provides a statement of importance and management recommendations. These measures are designed to help improve the conservation and management of the SLAs, and they should be reference in any development proposal.

POLICY EP5: SPECIAL LANDSCAPE AREAS

In assessing proposals for development that may affect Special Landscape Areas, the Council will seek to safeguard landscape quality and will have particular regard to the landscape impact of the proposed development, including the visual impact. Proposals that have a significant adverse impact will only be permitted where the landscape impact is clearly outweighed by social or economic benefits of national or local importance.

ENVIRONMENTAL PROMOTION AND PROTECTION (EP) POLICY EP6 COUNTRYSIDE AROUND TOWNS

- 1.1 The aim of this policy is to ensure that the identified Countryside Around Towns (CAT) area (Figure EP6a) and the high quality living environment it provides is protected and enhanced. The policy aims to prevent piecemeal development that detracts from the area's outstanding biodiversity, landscape, historical and recreational context. The policy will also help to prevent the coalescence of individual towns and villages within the area, thereby retaining their individual identity.
- 1.2 There is also an enhancement element of the policy which requires proposals to consider the maintenance and improvement of the high quality environment, for example through improvements to landscaping, planting or recreational access.
- 1.3 When a proposal is assessed under the CAT policy and Policy HD2: Housing in the Countryside Policy, it is the CAT policy that will carry greater weight. This will be the case except for where a proposal is put forward to build within the confines of an existing building group as opposed to extending outwith it, where it can be shown the high quality environment will be maintained. In this situation the proposal could be permissible under the CAT policy but will still have to meet the requirements of the Housing in the Countryside Policy.
- 1.4 Further detail on Policy EP6 can be found in the CAT Supplementary Planning Guidance and the current designated area is shown on Figure EP6a. The CAT area is partially located on land that is designated as a National Scenic Area as well as land that is designated as a Special Landscape Area. As a result the special qualities for which these designations are made should be taken into consideration in any relevant proposal.

POLICY EP6: COUNTRYSIDE AROUND TOWNS

Within the area defined as Countryside Around Towns, proposals will only be considered for approval if they meet the following considerations:

- a) there is an essential requirement for a rural location and the use is appropriate to a countryside setting e.g. agricultural, horticultural, forestry, countryside recreation, nature conservation, landscape renewal, community facilities, or
- b) it involves the rehabilitation, conversion, limited extension or an appropriate change of use of an existing traditional building of character, or,
- c) in the case of new build housing it must be located within the confines of an existing building group as opposed to extending outwith it and it must be shown that the high quality environment will be maintained. The definition of a building group is stated within Policy HD2 Housing in the Countryside, or
- d) it enhances the existing landscape, trees, woodland, natural & man-made heritage, access and recreational facilities, or
- e) subject to satisfactory design and setting, it has a proven national or strategic need and no alternative is suitable.

ENVIRONMENTAL PROMOTION AND PROTECTION (EP) POLICY EP7 LISTED BUILDINGS

- 1.1 The aim of the policy is to protect Listed Buildings from works that would spoil their historic and architectural interest. In turn this will protect a major asset that contributes significantly towards the character and amenity of the Scottish Borders and represents a valuable resource for recreational, tourism and educational purposes. “Listed Buildings” may include structures as well as buildings.
- 1.2 Listed Buildings are most vulnerable when they are unoccupied and, consequently, encouragement will be given to appropriate development that would both provide occupancy and protect and enhance the character of the building. The fact that a building has been unoccupied for a period is not a justification for unsympathetic alteration.
- 1.3 The restoration of some of the Scottish Borders Listed Buildings has been undertaken through the use of enabling development. Scottish Planning Policy supports this principle where it can be the only means of retaining a Listed Building. The Council encourages early discussion in advance of submitting a potential application for enabling development, to avoid unnecessary expenditure in drawing up schemes that are unlikely to be viable. The impact of the development will require to be precisely defined at the outset, normally through the granting of a full planning application rather than planning permission in principle. It will be a requirement that the Listed Building is repaired to an agreed standard as early as possible in the course of the enabling development, ideally at the outset and if not, certainly before the completion or occupation of the new development.
- 1.4 Decisions on proposals for any alterations or demolition of a Listed Building will be made in accordance with the advice contained within the Historic Environment Policy for Scotland, and within the Managing Change in the Historic Environment guidance note series and in consultation with the appropriate heritage bodies.
- 1.5 Design Statements are a tool by which the design principles and design concepts of proposals may be illustrated and allow for the proper assessment of proposals. Brief statements are useful even for minor developments. The Design Statement should demonstrate an understanding of the significance of the asset.

POLICY EP7: LISTED BUILDINGS

The Council will support development proposals that conserve, protect, and enhance the character, integrity and setting of Listed Buildings.

Enabling development may be acceptable where it is clearly shown to be the only means of retaining a Listed Building and securing its long term future. Any development should be the minimum necessary to achieve these aims. The applicant will be required to demonstrate that the economic, environmental and social benefits of the proposed development would justify the enabling development.

Internal or external alterations and extensions to Listed Buildings, or new developments within their curtilage, must meet the following criteria:

- a) be of the highest quality,
- b) respect the original structure in terms of setting, scale, design and materials, whilst not inhibiting contemporary and/or innovative design;
- c) maintain, and should preferably enhance, the special architectural or historic quality of the building;
- d) demonstrate an understanding of the building's significance.

All applications for Listed Building Consent or applications affecting the setting of Listed Buildings are required to be supported by Design Statements.

New development that adversely affects the setting of a Listed Building will not be permitted.

The demolition of a Listed Building will not be permitted unless there are overriding environmental, economic, social or practical reasons. It must be satisfactorily demonstrated that every effort has been made to continue the present use or to find a suitable new use.

THE FOLLOWING PROPOSED/UPDATED SUPPLEMENTARY PLANNING GUIDANCE MAY BE RELEVANT TO THIS POLICY:

Historic Environment

ENVIRONMENTAL PROMOTION AND PROTECTION (EP) POLICY EP8 HISTORIC ENVIRONMENT ASSETS AND SCHEDULED MONUMENTS

- 1.1 The aim of the policy is to give historic environment assets strong protection from any potentially damaging development. These assets include designated and undesignated archaeology, undesignated structures, battlefields, historic landscapes and natural features of cultural significance (see figure EP8a). Historic Environment assets represent a fragile irreplaceable part of the Scottish Borders heritage and environment. In addition to their inherent historic and cultural value, they are important sources for education, recreation, and tourism. The historic environment is intrinsically tied to the Borders' landscape, sense of place and identities.
- 1.2 Scottish Borders Council maintains an up to date Historic Environment Record (HER) database. This includes over 20,000 known historic environment assets of which only a small number are designated. When mapped, these assets cover approximately 2% of the total Council land area. The HER is continually updated as new discoveries are made. The entire Borders' landscape has been impacted by human interventions over thousands of years. In this way it is accepted that the historic environment and natural environment are intimately linked. Historic Environment specialists will examine development proposals for impacts on historic environment assets, their setting and their contextual relationships with historic and natural sites and features.
- 1.3 When determining development proposals the Council will seek to have designated and undesignated historic environment assets preserved in situ and within an appropriate setting. If this is determined to be unachievable, the policy allows for a full assessment of the significance of any historic environment asset to establish the likely impact of the development on them and provide appropriate mitigation. Any investigation must be carried out in accordance with the Council's requirements with regard to the scale of investigations, method of studying evidence and reporting of results. This will be proportionate to the cultural significance, actual or perceived, to the historic environment assets and their contexts that will be affected. Cultural significance is determined with regard to national guidance, national and regional research frameworks, assessment of the HER and specialist knowledge. In order to assess proposals affecting nationally designated Scheduled Monuments and Battlefields, the views of Historic Environment Scotland will be sought as appropriate.
- 1.4 Where development is approved which would affect known or suspected historic environment assets or their context, the Council will require that such development is carried out in accordance with an approved scheme of works designed to mitigate, offset or enhance the impact of development. The level and nature of this scheme of work will be proportionate to the development and its potential impact.
- 1.5 Where there is reasonable evidence of the existence of archaeological remains, but their nature and extent are unknown, the Council may require an Archaeological Investigation to provide clarification of the potential impact of development before or after a planning decision is reached. Further detailed investigation or in situ protection may be required depending on results.

1.6 Where archaeological investigation, preservation, and recording are required to be carried out, the Council will require implementation of a Written Scheme of Investigation (WSI) outlining an approved scheme of works. The scheme will ensure that a complete record is made of any remains which would otherwise be impacted by the development. Such a scheme might include some or all of the following:

- a) the preservation of remains in situ and in an appropriate setting,
- b) surface or geophysical survey,
- c) historic building recording,
- d) archaeological watching brief,
- e) archaeological excavation,
- f) study of the excavated evidence and publication of the results,
- g) an approved programme of public engagement where appropriate.
- h) an approved scheme of offset mitigation or enhancement

Typically WSI's are produced by contractors working to the standards of the Chartered Institute for Archaeologists. Where significant archaeological or historic sites or features are detected, the Council may require further investigation including post-excavation analysis, publication and promotion through an approved Post-Excavation Research Design (PERD).

1.7 The preferred solution will be influenced by the cultural significance of assets in national, regional or local terms per criteria set out in the Historic Environment Policy for Scotland and Historic Environment Circular 1.

1.8 Setting is considered to be important to the way in which historic assets are understood, appreciated, and experienced both inwards and outwards. Further information and advice on 'setting' can be found in Historic Environment Scotland's Managing Change in the Historic Environment Guidance Note on Setting.

1.9 In certain circumstances the Council may require a Design Statement. Design Statements are a tool by which the design principles and design concepts of proposals may be illustrated and allow for the proper assessment of proposals. The Design Statement should demonstrate an understanding of the significance of the asset, likely development impacts and how the benefits of development clearly outweigh the asset's cultural, social and historic value. Brief statements may be useful even for minor developments.

Figure EP8a
Policy EP8

Scheduled Monuments Historic Battlefields

-  Historic Battlefields
-  Scheduled Monuments

This figure does not show undesignated assets.

POLICY EP8: HISTORIC ENVIRONMENT ASSETS AND SCHEDULED MONUMENTS

(A) NATIONAL ARCHAEOLOGICAL SITES

Development proposals which would destroy or adversely affect the appearance, fabric or setting of Scheduled Monuments or other nationally important assets will not be permitted unless:

- a) the development offers substantial benefits, including those of a social or economic nature, that clearly outweigh the national value of the site, and
- b) there are no reasonable alternative means of meeting the development need.

(B) BATTLEFIELDS

The Council may support development proposals within a battlefield or its setting on the Inventory of Historic Battlefields Register, or a regionally significant battlefield, that seek to protect, conserve, and/or enhance the landscape characteristics or important features of the battlefield and/or its setting. Proposals will be assessed according to their sensitivity to the battlefield. Direct or indirect impacts to a battlefield may require appropriate mitigation approved by the Council.

(C) REGIONAL OR LOCAL HISTORIC ENVIRONMENT ASSETS

Development proposals which will adversely affect an archaeological asset of regional or local significance or their setting will only be permitted if it can be demonstrated that the benefits of the proposal will clearly outweigh the heritage value of the asset.

In all of the above cases, where development proposals impact on a Scheduled Monument, other nationally important assets, or any other archaeological or historical asset, developers may be required to implement detailed investigations, publication and/or public engagement per approved scheme of works.

Any proposal that will adversely affect a historic environment asset or its appropriate setting must include a mitigation strategy acceptable to the Council.

Historic Environment Circular 1

THE FOLLOWING PROPOSED/UPDATED SUPPLEMENTARY PLANNING GUIDANCE MAY BE RELEVANT TO THIS POLICY:

Historic Environment

ENVIRONMENTAL PROMOTION AND PROTECTION (EP) POLICY EP9 CONSERVATION AREAS

- 1.1 The aim of the policy is to preserve or enhance the character or appearance of Conservation Areas. Conservation Areas make a unique and irreplaceable contribution towards the character and quality of the Scottish Borders, and as such must be protected from inappropriate development. The policy aims to subject applications for demolition to scrutiny such that in cases where the building is of merit, demolition should be the last resort and only considered after all the alternatives have been evaluated, regardless of the quality of the replacement. The current use of the building will be considered and efforts made to seek alternative uses. In cases where the value of the building is limited, re-use may be of less importance and replacements of suitable quality may do more to enhance the Conservation Area.
- 1.2 The legislation defines Conservation Areas as “areas of special architectural or historical interest, the character or appearance of which it is desirable to preserve or enhance” (Listed Buildings and Conservation Areas) (Scotland) Act 1997. Conservation Areas have evolved over many years and in some instances innovative or contemporary architecture can be appropriate.
- 1.3 “Development” includes alterations to existing property. The Town and Country Planning (General Permitted Development) (Scotland) Amendment Order 2011 states that “Any improvement, addition or other alteration to the external appearance of a dwellinghouse ...” is not permitted development within a Conservation Area. This therefore requires applications for planning permission for works such as replacement windows and doors.
- 1.4 The relevant national guidance is Scottish Planning Policy, Historic Environment Policy for Scotland and Managing Change in the Historic Environment guidance note series which aim to conserve the historic environment. PAN 68 “Design Statements” and PAN 71 “Conservation Area Management” are also relevant.
- 1.5 The boundaries of all Conservation Areas are shown on the Proposals Maps for the relevant settlements. A review of the Conservation Areas has recently been undertaken and that review included the designation of a further three Conservation Areas. There are currently 43 Conservation Areas designated within the Scottish Borders. These were formally designated on 5 March 2012. The boundaries of the Conservation Areas have been developed in line with the technical background note. Decision making will be guided by the Conservation Area Statements that are set out within the Conservation Area Statement Technical Note and Supplementary Planning Guidance will be produced in order to facilitate the management of the historic environment.
- 1.6 Following consultation on the Main Issues Report, it was agreed that the Newcastleton Prime Frontage/Core Area designation as contained within the Supplementary Planning Guidance on Replacement Windows and Doors would be removed. As a result of this decision, all applications in relation to replacement windows and doors within the Newcastleton Conservation Area will be

assessed against the “Elsewhere in Conservation Areas” element of the policy contained within the Supplementary Planning Guidance on Replacement Windows and Doors.

- 1.7 Decisions on proposals affecting a Conservation Area will be made in accordance with the policy and advice contained within the Historic Environment Policy for Scotland, and within the Managing Change in the Historic Environment guidance note series and in consultation with the appropriate heritage bodies.
- 1.8 Design Statements are a tool by which the design principles and design concepts of proposals may be illustrated and allow for the proper assessment of proposals. Brief statements are useful even for minor developments.

POLICY EP9: CONSERVATION AREAS

The Council will support development proposals within or adjacent to a Conservation Area which are located and designed to preserve or enhance the special architectural or historic character and appearance of the Conservation Area. This should accord with the scale, proportions, alignment, density, materials, and boundary treatment of nearby buildings, open spaces, vistas, gardens and landscapes.

The Council may require applications for full, as opposed to Planning Permission in Principle Consent.

Conservation Area Consent, which is required for the demolition of an unlisted building within a Conservation Area, will only be considered in the context of appropriate proposals for redevelopment and will only be permitted where:

- a) the building is incapable of reasonably beneficial use by virtue of its location, physical form or state of disrepair, and
- b) the structural condition of the building is such that it cannot be adapted to accommodate alterations or extensions without material loss to its character, and
- c) the proposal will preserve or enhance the Conservation Area, either individually or as part of the townscape.

In cases a) to c) above, demolition will not be permitted to proceed until acceptable alternative treatment of the site has been approved and a contract for the replacement building or for an alternative means of treating the cleared site has been agreed.

Design Statements will be required for all applications for alterations, extensions, or for demolition and replacement which should explain and illustrate the design principles and design concepts of the proposals.

ENVIRONMENTAL PROMOTION AND PROTECTION (EP) POLICY EP10 GARDENS AND DESIGNED LANDSCAPES

- 1.1 The aim of the policy is to protect the character of Gardens and Designed Landscapes from development that would adversely affect their special character. At the same time, the policy recognises that development can sometimes be accommodated within or adjacent to these areas provided it is carefully sited and sensitively designed. Gardens and Designed Landscapes are a historically important element of the Scottish Borders landscape. In addition they may also provide landscape settings for important buildings, be architecturally or artistically important in themselves, and/or have horticultural, silvicultural and ecological value.
- 1.2 Planning authorities are encouraged to take measures to safeguard and enhance sites included in the Inventory of Gardens and Designed Landscapes, and also other important gardens and designed landscapes. The Council recognises the significant contribution that designed landscapes make to the landscape quality and attractiveness of the Scottish Borders. Within the Scottish Borders there are gardens and designed landscapes that are included in the Inventory of Gardens and Designed Landscapes that are of national importance, and those that are identified within the Borders Designed Landscape Survey (Peter McGowan study). It should be noted that the latter document includes sites of national, regional and local importance.
- 1.3 In respect to the Borders Designed Landscape Survey, it should be noted that Annex 4 provides a useful policy context. It also provides guidance on management and restoration of these sites, and part 4 of the Annex sets out design principles and common issues that provide essential direction for any planning application within or adjacent to a garden and designed landscape.
- 1.4 It is appreciated that there is a difference between the relative importance of sites that are on the National Inventory of Designed Landscapes in Scotland and those identified only within the Borders Designed Landscape Survey. Those contained within the Inventory will be subject to a greater degree of protection. The Council are also required to consult Historic Environment Scotland on any proposed development which may affect a historic garden or designed landscape as identified in the Inventory of Gardens and Designed Landscapes, and the effect of proposed development on a Garden or Designed Landscape is a material consideration in the determination of a planning application.
- 1.5 Setting is considered to be important to the way in which historic structures or places are understood, appreciated, and experienced. Further information and advice on 'setting' can be found in the Managing Change in the Historic Environment Guidance Note on Setting.
- 1.6 Design Statements are a tool by which the design principles and design concepts of proposals may be illustrated and allow for the proper assessment of proposals. Brief statements are useful even for minor developments.

POLICY EP10: GARDENS AND DESIGNED LANDSCAPES

The Council will support development that safeguards or enhances the landscape features, character or setting of:

- a) sites listed in the Inventory of Gardens and Designed Landscapes, or
- b) sites included in historic gardens and designed landscapes records.

All development should be carefully sited, be of the highest standards of design using appropriate finishing materials and planting, and be informed by and respectful of the historic landscape structure. Proposals that will result in an unacceptable adverse impact will be refused.

All applications affecting a Garden or Designed Landscape will be required to be supported by a Design Statement.

Historic Environment Policy for Scotland

Managing Change in the Historic Environment guidance note series

ENVIRONMENTAL PROMOTION AND PROTECTION (EP) POLICY EP11 PROTECTION OF GREENSPACE

- 1.1 The aim of the policy is to give protection to a wide range of defined types of greenspace (also known as open space) within settlements and to prevent their piecemeal loss to development. The policy also aims to protect and safeguard the most important spaces within settlements. The greenspaces covered by this policy are based on the typology contained in the Scottish Government's Planning Advice Note (PAN) 65.
- 1.2 The Local Development Plan (LDP) identifies Key Greenspaces within Development Boundaries. The spaces identified within the Plan are those spaces which are considered to be of greatest value to the community and are therefore worthy of protection. It is intended that within Key Greenspaces only proposals that will enhance the space will be supported by the Council.
- 1.3 Whilst the Local Development Plan identifies Key Greenspaces within settlements, the policy acknowledges that there are other greenspaces also within settlements. This policy also extends protection to those other greenspaces. The policy also aims to ensure that where development is proposed, the loss is justified and that compensatory provisions are made.
- 1.4 It is accepted that the role of greenspaces may change over time to meet the needs of a community, such as where a play area was once a primary requirement for a community that requirement may have changed to a park/garden or even an allotment. Whilst this policy does allow for such changes to occur, it is important to ensure that where a greenspace contributes significantly to the placemaking of a settlement, any alterations to that space must not detract from the character and amenity of the settlement.
- 1.5 It is noted that the Council are currently reviewing their public play facilities in terms of future investment and removal of obsolete play areas where they are no longer fit for purpose. This programme of investment in play facilities aims to improve wellbeing and enhance activity levels for all ages with a beneficial impact on the health of the population. Currently the quantity of play provision in the Scottish Borders is high per head of population, but the quality is very low (compared to national benchmarking), this results in diminishing the wider benefits of these facilities to communities. This new investment programme will address the challenge of balancing quantity against quality, ensuring optimal provision of play facilities across the network. In addition it also seeks to redress the balance between quantity and quality, through rationalising the estate and targeting resources to those areas of higher impact. As a consequence of this new investment programme, there will be changes to the hierarchy and role of greenspaces and particularly the play areas within many of the settlements in the Scottish Borders.
- 1.6 As a result of the Community Empowerment (Scotland) Act 2015 every local authority are required to prepare a food growing strategy for its area to identify land that could be used to grow food and describe how provision for community growing can be increased. It is therefore likely that

within the lifetime of the Plan, new or repurposed greenspaces will be identified for the purpose of food growing. Although these spaces may not be currently identified within this Plan as Key Greenspaces, those new or repurposed greenspaces that are located within settlements will too receive protection under this policy. A new policy has been prepared in the LDP, policy EP17 Food Growing and Community Growing Spaces.

- 1.7 The Council has produced a Supplementary Planning Guidance (SPG) on Green Space. The SPG will continue to provide guidance to those preparing planning applications for one or more dwellings as to what the Council may require in order to mitigate the impact of residential developments on greenspace and outdoor sport and recreation provision. Furthermore the Council have also approved a Facilities and Pitches Strategy 2011, which will be used to assess future provision of accessible high quality and financially sustainable facilities for sport and physical activity in the Scottish Borders, as well as being a key driver to partnerships and external funding providers.

POLICY EP11: PROTECTION OF GREENSPACE

(A) KEY GREENSPACES

Key Greenspaces as identified on Proposal Maps will be protected from development that will result in their loss. Development that protects and enhances the quality of Key Greenspaces will be supported.

(B) OTHER GREENSPACES

Greenspace within the Development Boundary of settlements will be protected from development where this can be justified by reference to any of the following:

- a) the environmental, social or economic value of the greenspace;
- b) the role that the greenspace plays in defining the landscape and townscape structure and identity of the settlement;
- c) the function that the greenspace serves.

In both cases development that would result in the loss of greenspace, including outdoor sports facilities, will only be permitted if it can be satisfactorily demonstrated that, based on consultation with user groups and advice from relevant agencies:

- d) there is social, economic and community justification for the loss of the open space; or
- e) the need for the development is judged to outweigh the need to retain the open space; and
- f) where appropriate, comparable open space or enhancement of existing open space may be provided and/or paid for by the developer at an alternative location within or immediately adjacent to the settlement where this will provide adequate and acceptable replacement for the open space lost as a result of the development. In some cases, recreational provision in the form of indoor sports facilities may be a suitable alternative provided it is equally accessible and is judged to compensate fully for the loss of the open space resource.

Development that would result in the loss of functional open space where a quantifiable demand can be demonstrated must in addition be justified by reference to:

- g) the levels of existing provision and predicted requirements for the settlement;
- h) the extent to which current or predicted future demand can be met on a reduced area.

ENVIRONMENTAL PROMOTION AND PROTECTION (EP) POLICY EP12 GREEN NETWORKS

- 1.1 Green Networks consist of a network of greenspaces (including green infrastructure) and green corridors through, within and around settlements, linking open spaces within settlements to the wider countryside. (see Figure EP12a). They can assist in enhancing the biodiversity, quality of life, and sense of place of an area.
- 1.2 The aim of the policy is to promote and support developments that enhance Green Networks. The policy also aims to protect existing Green Networks and avoid where possible their fragmentation. It is recognised however, that while the Local Development Plan (LDP) identifies a series of green networks, it should also be noted that there are numerous other local green networks throughout the Scottish Borders which are also covered by this policy.
- 1.3 In line with Planning Advice Note 65: Planning and Open Space, the LDP identifies those green networks that contribute to the development framework. Therefore the networks identified within the LDP focus primarily on the Strategic Development Areas as set out in the SESplan and the 11 main population centres/settlements within the Borders. The LDP identifies three different types of green networks, Strategic, Key and a further one based on the former railway routes (refer to Policy Maps).
- 1.4 The Strategic Green Network identified connects the Central Borders Strategic Development Area (SDA) to the Western Borders SDA. It focuses on an area which is made up of various components that attract and encourage participation from the greatest number of people.
- 1.5 The series of Key Green Networks identified within the LDP are in and around the towns of Duns, Eyemouth, Hawick, Jedburgh, Kelso and Lauder. These identified networks also complement the development strategy set out within the SESplan.
- 1.6 Former railway lines in the Scottish Borders represent a network of over 125 miles of former trackbed which links many of the larger towns, as well as neighbouring local authorities (both in the north of the Scottish Borders and in the south), and as such offers considerable potential for alternative uses in the promotion of connectivity. The LDP seeks to safeguard these routes of the former railway lines as they have the potential to be used for walking, cycling and recreation and have the potential to assist in reducing car use in line with the Transport Strategy.
- 1.7 The Green Networks identified within the LDP assist in supporting sustainable economic growth, tourism, recreation, the creation of an environment that promotes a healthier-living lifestyle, and the protection and enhancement of biodiversity, and has the potential to improve the quality of the water environment, promote flood protection, and reduce pollution.

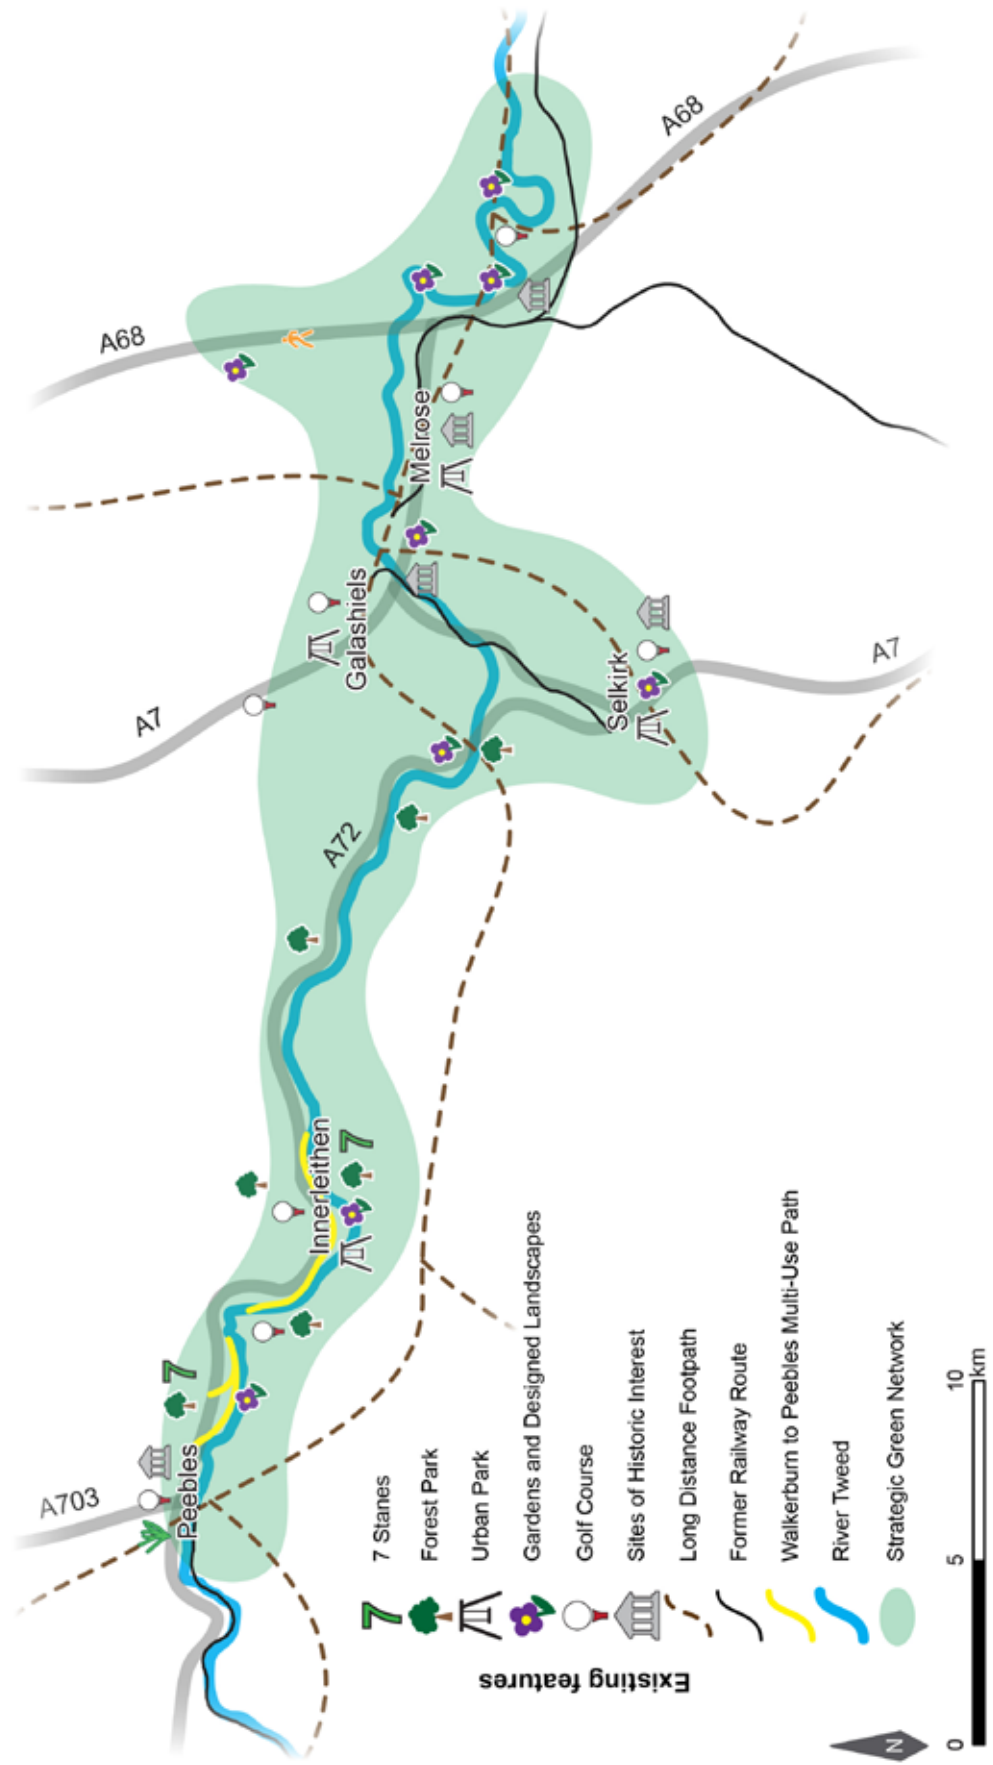

- 1.8 Elements that form a Green Network set out within the LDP can range from a few to many. These can include footpaths or cycle routes be they for sustainable travel/active travel and recreation, either within towns or linking towns; quality natural heritage; areas of woodland; main rivers and water quality, landscape designations as well as gardens and designed landscapes.
- 1.9 The Council will also consider the preparation of Supplementary Planning Guidance on Green Networks.

Improvements

- Eddleston River Restoration Project
- Completion of Earliston to Leaderfoot Multi-Use Path

POLICY EP12: GREEN NETWORKS

The Council will support proposals that protect, promote and enhance the Greenspace Network.

Where a proposal comes forward that will result in a negative impact on the natural heritage, greenspace, landscape, recreation or other element of a Green Network, appropriate mitigation will be required.

Where infrastructure projects or other developments are required that cross a Green Network, such developments must take account of the coherence of the Network. In doing this, measures which allow access across roads for wildlife, or access for outdoor recreation will be required.

ENVIRONMENTAL PROMOTION AND PROTECTION (EP) POLICY EP13 TREES, WOODLANDS AND HEDGEROWS

- 1.1 The aim of the policy is to give protection to the woodland resource and in turn, to the character and amenity of settlements and the countryside, maintain habitats and provide an important recreational asset. The policy seeks to protect and enhance the whole resource, not only individual trees that might be protected by a Tree Preservation Order; safeguarded by a condition on a planning permission; or located within a Conservation Area. The woodland resource refers to the maintenance and management of trees, ancient woodlands and pastures, and hedgerows.
- 1.2 The policy encourages developers to take account of the existing woodland resource at the outset of their development schemes, and provides for the protection of the resource during construction. Decision making will be informed by the Scottish Borders Woodland Strategy, expert advice from external agencies, the existing condition of the woodland resource and British Standard 5837: Trees in Relation to Construction. Supplementary Planning Guidance (SPG) on Trees and Development outlines the Council's requirements when considering applications which could affect trees.
- 1.3 As part of the Woodland Strategy, the Council is currently taking part in a Regional Strategic Woodland Creation pilot project. The aim of the pilot project is to develop a new approach to forestry that seeks better integration of new woodland with farming and other land uses to maximise the benefits. This may inform decision making in due course.

POLICY EP13: TREES, WOODLANDS AND HEDGEROWS

The Council will refuse development that would cause the loss of or serious damage to the woodland resource unless the public benefits of the development clearly outweigh the loss of landscape, ecological, recreational, historical or shelter value.

Any development that may impact on the woodland resource should:

- a) aim to minimise adverse impacts on the biodiversity value of the woodland resource, including its environmental quality, ecological status and viability; and
- b) where there is an unavoidable loss of the woodland resource, ensure appropriate replacement planting, where possible, within the area of the Scottish Borders; and
- c) adhere to any planning agreement sought to enhance the woodland resource.

ENVIRONMENTAL PROMOTION AND PROTECTION (EP) POLICY EP14 COASTLINE

- 1.1 The aim of the policy is to ensure the Scottish Borders coastline, in particular the 'undeveloped coast' outwith the respective coastal settlement boundaries, is afforded adequate protection from inappropriate development. The coastline is important not just from an environmental point of view but because of its value as a tourism asset.
- 1.2 Scottish Planning Policy states that Planning Authorities should consider identifying coastal areas likely to be suitable or unsuitable for development, including priority regeneration and enhancement areas, and any relevant constraints, such as erosion or flood risk.
- 1.3 It is considered that proposals for development, including regeneration, can be met by the coastal settlements and that it is not necessary to identify other areas suitable or unsuitable for development. Proposals for development outwith a development boundary will be tested by appropriate Local Development Plan policy.
- 1.4 The Scottish Borders coastline is designated for its nature and landscape value, as identified on the Policy Map, and any development would have to adhere to the relevant policies associated with these designations. This includes appropriate assessment where required to demonstrate no adverse effect on the integrity of Natura sites.
- 1.5 Local Authorities and the Marine Planning Partnerships (MPP) are encouraged to work together to ensure planning coherence across the land-sea interface. It is important that this extends beyond the jurisdictional overlap of the intertidal zone, as activities far inland can have implications for marine health. Prior to the establishment of the Forth & Tay Marine Planning Partnership, Scottish Borders Council will work to ensure coherence with the National Marine Plan (NMP). The NMP is a statutory plan with policies relevant to all public authorities, including those whose responsibilities are primarily land-based. Early engagement between applicants, the Council and other appropriate authorities is essential to ensure the co-ordination of any necessary environmental assessments in accordance with Circular 1/2015: Relationship between the Statutory Land Use Planning System and Marine Planning and Licensing.

POLICY EP14: COASTLINE

Development proposals at a coastal location will only be permitted where:

- a) the proposal is located within the Burnmouth, Eyemouth and St Abbs development boundary; or
- b) the proposal is appropriate under Local Development Plan policies; or
- c) the development requires a coastal location; and
- d) the benefits of the proposal clearly outweigh any damage to the landscape character or to the nature conservation value of the site as assessed under other relevant Local Development Plan policies.

ENVIRONMENTAL PROMOTION AND PROTECTION (EP) POLICY EP15 DEVELOPMENT AFFECTING THE WATER ENVIRONMENT

- 1.1 The policy is aimed at ensuring that development does not adversely affect any of the complex components that comprise the water environment, for example, rivers, lochs, groundwater, wetland, coastal waters and estuaries. Under the Water Environment (Controlled Activities) (Scotland) Regulations 2011, any activity which may affect Scotland's water environment must be authorised.
- 1.2 The Council aims to protect and improve the quality of the water environment and requires developers to consider how their proposals might generate potentially adverse impacts and to build in measures that will minimise any such impacts and enhance and restore the water environment. Development proposals likely to have a significant effect on the River Tweed Special Area of Conservation will be subject to appropriate assessment, as set out in Policy EP1: International Nature Conservation Sites and Protected Species. The basis of the Council's approach will be the sustainable management objectives set out to improve the River Tweed in the Solway Tweed River Basin Management Plan and to the Eye Water set out in the Forth Area Management Plan. The Council will also liaise with its partner organisations particularly in regard to the River Tweed Special Area of Conservation.
- 1.3 The policy refers to the natural and physical characteristics of the water environment; the natural characteristics are biodiversity or landscape features, whilst the physical characteristics include the water quality and morphology.
- 1.4 Opportunities to enhance and restore the water environment in support of biodiversity are set out in the Supplementary Planning Guidance for Biodiversity.

POLICY EP15: DEVELOPMENT AFFECTING THE WATER ENVIRONMENT

Development proposals that seek to bring improvement to the quality of the water environment will be supported. Where a proposal would result in a significant adverse effect on the water environment through impact on its natural or physical characteristics, or its use for recreation or existing river engineering works, it will be refused. Decision making will be guided by an assessment of:

- a) pollution of surface or underground water, including water supply catchment areas, as a result of the nature of any surface or waste water discharge or leachate, including from the disturbance of contaminated land;
- b) flood risk within the site or the wider river catchment;
- c) proposals for river engineering works that may be required for fisheries management, flood defence or erosion control;
- d) compliance with current best practice on Sustainable Urban Drainage (SUDS) including avoidance of flooding, pollution, extensive canalisation and culverting of watercourses.

ENVIRONMENTAL PROMOTION AND PROTECTION (EP) POLICY EP16 AIR QUALITY

- 1.1 The purpose of this policy is to protect air quality and in doing so complement other policies to protect land and water. This in turn will help to fulfil the Council's environmental commitments and its contribution to addressing climate change. The Scottish Borders has no areas where air quality is an issue and the Council is keen to maintain this standard.
- 1.2 The policy applies not just to business and industrial development that may involve emissions but to other land uses that, through the generation of traffic, for example, could result in deterioration of local air quality. It applies to visible pollutants and to invisible gases such as CO₂ which have been linked to climate change.
- 1.3 The Scottish Government's national strategy 'Cleaner Air for Scotland – The Road to a Healthier Future' (CAFS) is a national cross government strategy that aims to bring together the major policy areas relevant to air quality within one overarching framework. To help the Scottish Government in their aims; the planning system has an important role in ensuring that both carbon emissions and air quality impacts from proposed developments are reasonably mitigated.
- 1.4 Future communities, workplaces, recreation and retail facilities throughout the Scottish Borders should have access to sustainable transport options and provision for electric vehicle charging. It is important that any new development and associated road traffic does not have significant adverse impact on air quality either through the exacerbation of existing air quality problems or the introduction of new sources of pollution where they would impact on sensitive receptors. Where possible, the Council has sought to minimise any potential impacts by allocating sites near to local services, although due to the geographic nature of the Scottish Borders, it is acknowledged there will always be reliance on car usage. New development will also support the change to a low carbon economy by ensuring it does not have a detrimental effect on air quality by encouraging renewable energy options and low emission technologies within the design.
- 1.5 The Council acknowledges that when considered in isolation, a single development is unlikely to have a significant impact on local air quality and may not trigger the need for an Air Quality Assessment. However, when it is considered alongside other developments in and around the area that may also increase traffic, the cumulative impact on some routes is likely to be more significant and could result in a breach of an air quality standard.

POLICY EP16: AIR QUALITY

Development proposals that, individually or cumulatively, could adversely affect the quality of air in a locality to a level that could potentially harm human health and wellbeing or the integrity of the natural environment, must be accompanied by provisions that the Council is satisfied will minimise such impacts to an acceptable degree. Where it is considered appropriate the Council may request that an Air Quality Assessment is undertaken to assist determination of an application.

KEY POLICIES TO WHICH THIS POLICY SHOULD BE CROSS REFERENCED:

Policy PMD4 Development adjoining Development Boundaries

Policy IS10 Waste Management Facilities
Policy IS11 Hazardous Developments
Policy IS13 Contaminated and Unstable Land

The relevant government guidance is Air Quality and Land Use Planning (2004) and Planning Advice Note 51: Planning and Environmental Protection (Revised 2006).

ENVIRONMENTAL PROMOTION AND PROTECTION (EP) POLICY EP17 FOOD GROWING AND COMMUNITY GROWING SPACES

- 1.1 National Planning Framework 3 recognises that land for food production within towns and cities is becoming increasingly important. Scottish Planning Policy states that planning authorities should protect, enhance and promote green infrastructure, including open space and green networks, as an integral component of successful placemaking. The legislative framework relating to allotments, set out in the part 9 of the Community Empowerment (Scotland) Act 2015, has relatively recently come into force. It confirms commitment to community growing and to increasing the accessibility of land for those who wish to grow their own food or to learn and share experience with local groups. Corresponding Scottish Government advice in November 2018 stated Local Development Plans are key to helping implementation. Reference is also given that planning authorities may seek development contributions to help deliver this provision.
- 1.2 The Community Empowerment (Scotland) Act of 2015 also requires Councils to prepare a Food Growing Strategy to identify suitable land that may be used as allotment sites, identifying other areas of land that could be used for community growing, and describe how the authority will improve provision of land for food growing purposes. The Council's Food Growing Strategy will be developed through consultation with stakeholders, partner organisations and communities. It will also identify suitable opportunities for food growing and community growing. The suitability of potential food growing and community growing areas would include the consideration of matters such as access to water, suitable soil type, shade and impacts on neighbouring land uses.
- 1.3 Food growing and community growing spaces refer to land that could be used for allotment sites or land identified for communities to grow vegetables, fruit, herbs or flowers. The Council aspires to increase the provision of allotments or other land for community growing. It is also recognised that community growing can have long lasting benefits to communities and individuals in terms of health, education and social inclusion.
- 1.4 The Council seeks to encourage food growing, community growing opportunities and to make food growing more accessible. The policy supports different forms of community food growing, improving access to land for food growing purposes and supports more people to gain the opportunity to grow their own food. In instances where there is a known local demand development contributions will be considered in order to ensure either on site or off site provision. Demand will be guided by the Council's Food Growing Strategy.
- 1.5 At this stage as there is no definitive information on the demand for food growing and community growing spaces the LDP cannot therefore incorporate any definitive land use allocations for these uses. Policy EP17 seeks to set out criteria tests to identify and protect land for such uses when sites are identified and this will be guided by the Food Growing Strategy.

POLICY EP17: FOOD GROWING AND COMMUNITY GROWING SPACES

The Council will support development that safeguards and enhances the quality of an existing food growing area. Development that results in the loss of any food growing area, where no satisfactory alternative location has been identified, will not be supported.

The Council will support development for new or extended food growing areas that meet community needs, provided the following requirements are met:

- a) the site is of an appropriate size to accommodate the identified demand
- b) the site has satisfactory access and off-street parking and provision
- c) incorporation of screen planting where appropriate
- d) any onsite buildings and perimeter fencing to be of appropriate materials and sympathetic to the surroundings
- e) the development must have no significant adverse impacts on nearby land uses.

SCOTTISH BORDERS COUNCIL PROPOSED LOCAL DEVELOPMENT PLAN 2020

INFRASTRUCTURE AND STANDARDS (IS)

Planning applications can raise a number of issues which must be fully addressed in order that development proposals can be supported. It is vital that planning policies and consultation procedures are put in place to ensure these matters are identified and are satisfactorily resolved.

This policy section covers a wide range of requirements and standards which applications must address where relevant. It confirms, for example, road adoption standards, parking provision, infrastructure requirements and contamination issues to be addressed. Flood risk is a major constraint to be considered and the LDP has been prepared and consulted upon with relevant bodies to ensure no new development will be at flood risk or that flood risk is increased elsewhere. The LDP confirms a series of Flood Protection Schemes and studies the Council will implement.

Developer contributions are required in order to ensure the satisfactory delivery of proposals and policy seeks to ensure, as far as practicable, that the burden of additional infrastructure and/or services that are related to the development is absorbed by the landowner and developer as opposed to the Council or other service providers.

INFRASTRUCTURE AND STANDARDS (IS)

POLICY IS1

PUBLIC INFRASTRUCTURE AND LOCAL SERVICE PROVISION

- 1.1 The aim of the policy is to prevent any development that would adversely affect future public infrastructure and local service provision. It also seeks to prevent the loss of public infrastructure, facilities or local services. These could include post offices, filling stations, public or village halls, public houses and hotels, and rural shops etc. The policy is aimed at retaining and enhancing the sustainability and viability of the area's communities. Within the planning application decision making process weight must be given to any adverse economic impacts on rural services caused by Covid 19.

POLICY IS1: PUBLIC INFRASTRUCTURE AND LOCAL SERVICE PROVISION

The Council will encourage the retention of and improvements to public infrastructure and local services.

1. Development that might prejudice the future provision of those infrastructure and service improvements identified on the Proposals Maps will not be permitted.
2. Proposals that result in the loss of an existing public facility or local service may be supported if:
 - a) it can be adequately demonstrated that the existing facility or service is financially unviable, and
 - b) it can be demonstrated that all reasonable attempts have been made to sell the facility or service as a "viable concern", and
 - c) it can adequately be demonstrated that the loss of the facility or service will not have an adverse impact on the settlement, and
 - d) the proposal will offer significant wider public and community benefits, and
 - e) the proposal does not detract from the character and amenity of the surrounding area

Greenspace

Green Networks

INFRASTRUCTURE AND STANDARDS (IS)

POLICY IS2

DEVELOPER CONTRIBUTIONS

- 1.1 The purpose of the policy is to provide guidance on how the Council intends to comply with the provisions of Circular 3/2012 on the use of Section 75 Planning Agreements. The policy also provides for the use of Section 69 or where appropriate, other legal agreements. In turn this will help ensure that the quality of services and facilities is not compromised by new development. The policy aims to ensure, as far as practicable, that the burden of additional infrastructure and/or services that are related to the development is absorbed by the landowner and developer as opposed to the Council or other service providers.
- 1.2 Contributions towards affordable housing provision are detailed in Policy HD1: Affordable Housing. Contributions related to the Borders Railway are the subject of special provisions set out in Policy IS3: Developer Contributions related to the Borders Railway. Where a legal agreement is necessary, the preference for using an agreement under other legislation, for example the Local Government (Scotland) Act 1973 and the Roads (Scotland) Act 1984 will be considered. A planning obligation will only be required where it is necessary to restrict or regulate the development or use of land.
- 1.3 Each application will be assessed to determine the appropriate level of contribution guided by: the requirements identified in the Council's Supplementary Planning Guidance (SPG) on Development Contributions; Planning or Development Briefs; outputs from community or agency liaison; information in settlement profiles; other research and studies such as transport assessments; the cumulative impact of development in a locality; and provisions of Circular 3/2012 in respect of the relationship of the contribution in scale and kind to the development. Contributions will generally be required at the time that they become necessary to ensure timely provision of the improvement in question. Where appropriate, the Council will consider the economic viability of a proposed development, including possible payment options, such as staged or phased payments. It will also pursue a pragmatic approach, taking account of the importance in securing necessary developments, and exceptional development costs that may arise. Contributions are intended to address impacts resulting from new development proposals, not existing deficiencies. Affordable housing proposals are predominantly exempt from developer contribution requirements and other policy exemptions are detailed in the associated SPG.
- 1.4 Developer contributions may assist in overcoming obstacles to the granting of planning permission through the compensation for, reduction, or elimination of, negative impacts, for example the provision of open space, education facilities or broadband infrastructure. In some instances, the cumulative effect of a number of developments will require to be considered, and in such cases contributions may be sought and held by the Council until such time as sufficient funds are available to allow the relevant work to proceed.
- 1.5 As part of its proper forward planning for public services in the region, the Council has brought forward the construction of new schools in some locations; where this has been necessary, such decisions are guided by and predicated upon projected housing development in the locality which the new school will need to accommodate. The Council is only able to do so by borrowing

funds in the expectation that contributions would enable the Council to recoup the cost of these developments, just as it would were the contributions to be collected in advance of construction of a new school. Where such borrowing remains to be repaid, the Council will seek contributions for education to recoup the cost of the new school provision.

- 1.6 The range of infrastructure and services to which the policy applies and the level of costs to be sought will be periodically reviewed to reflect ongoing needs and priorities of the Council and other organisations responsible for delivering public services.

POLICY IS2: DEVELOPER CONTRIBUTIONS

Where a site is otherwise acceptable in terms of planning policy, but cannot proceed due to deficiencies in infrastructure and services or to environmental impacts, any or all of which will be created or exacerbated as a result of the development, the Council will require developers to make a full or partial contribution towards the cost of addressing such deficiencies. Contributions will also be required towards the provision of new schools where increased capacity has already been provided to accommodate future housing projections and where borrowing remains to be repaid.

Contributions may be required for one or more of the following:

- a) treatment of surface or foul waste water in accordance with the Plan's policies on preferred methods (including Sustainable Urban Drainage System maintenance);
- b) provision of schools, school extensions or associated facilities, all in accordance with current educational capacity estimates and schedule of contributions contained in the Development Contributions Supplementary Planning Guidance, or where the Council has forward funded new schools or school extensions to accommodate future housing projects, contributions will be sought until such time as the Council's borrowing is repaid in full, all in accordance with the schedule of contributions;
- c) on-site and off-site transport infrastructure including new roads or road improvements, Safer Routes to School, road safety measures, public car parking, cycle-ways, bridges and associated studies and other access routes, subsidy to public transport operators; all in accordance with the relevant standards and the provisions of any Travel Plan;
- d) leisure, sport, recreation, play areas and community facilities, either on-site or off-site;
- e) landscape, open space, allotment provision, food growing spaces, trees and woodlands, including costs of future management and maintenance;
- f) protection, enhancement and promotion of environmental assets either on-site or off-site, having regard to the Local Biodiversity Action Plan and the Council's Supplementary Planning Guidance on Biodiversity, including compensation for any losses and/or alternative provision;
- g) provision of other facilities and equipment for the satisfactory completion of the development that may include: measures to minimise the risk of crime; provision for the storage, collection and recycling of waste, including communal facilities; provision of street furniture and digital connectivity with associated infrastructure;
- h) flood protection schemes, where the site would benefit from its implementation.

Where appropriate, the Council will consider the economic viability of a proposed development, including possible payment options, such as staged or phased payments. If an applicant can satisfactorily demonstrate to the Council on a confidential 'open book' basis that the strict application of policy would render an otherwise commercially viable project commercially unviable, then contributions may, where appropriate, be negotiated and varied.

Supplementary Planning Guidance on Development Contributions will be reviewed periodically to reflect the ongoing needs and priorities of the Council and will expand upon the development contributions sought. The appropriateness of the development contributions to proposals will be considered through the planning application process.

INFRASTRUCTURE AND STANDARDS (IS)

POLICY IS3

DEVELOPER CONTRIBUTIONS RELATED TO THE BORDERS RAILWAY

- 1.1 The aim of this policy is to seek developer contributions towards the cost of reinstating the Waverley Railway Line in postcode sectors where new housing development is considered to benefit from, or be enhanced by, the rail link. Figure IS3a shows the extent of the area. The policy will assist with the provision of funding towards the reconstruction of the railway, which will provide considerable social, economic and environmental benefits to the area in addition to stimulating residential development.
- 1.2 The authority to require developer contributions in these special circumstances is set out in Sections 39 and 40 of the Waverley Railway (Scotland) Act 2006. It is acknowledged that this policy represents a change in the way Section 75 legal agreements are ordinarily applied, this being necessary to reflect the specific provisions stipulated in the Act.
- 1.3 The Act provides for a rail link between Edinburgh and the Central Borders. The postcode sectors affected by this policy are therefore concentrated in the central, northern and southern housing market areas. The postcodes affected and level of contribution sought will be in accordance with the council's decisions of 5 October 2004 and 17 October 2006, or from any subsequent Council decision during the local development plan period. In the longer term, the Council's aspiration is to extend the reconstruction of this rail link through to Carlisle. The anticipated safeguarded route is shown on the Policy Map.

POLICY IS3: DEVELOPER CONTRIBUTIONS RELATED TO THE BORDERS RAILWAY

In accordance with the provisions of the Waverley Railway (Scotland) Act 2006, the Council will seek developer contributions towards the cost of providing the Borders Railway from any developments that may be considered to benefit from, or be enhanced by, the re-instatement of the rail link.

Development Contributions

THE FOLLOWING PROPOSED/UPDATED SUPPLEMENTARY PLANNING GUIDANCE MAY BE RELEVANT TO THIS POLICY:

Development Contributions

INFRASTRUCTURE AND STANDARDS (IS)

POLICY IS4

TRANSPORT DEVELOPMENT AND INFRASTRUCTURE

- 1.1 Transport policies seek to promote the most sustainable means of travel, giving priority to walking and cycling for local journeys, and to public transport in preference to travel by car, where feasible. As well as being a positive move to tackle climate change, this approach benefits local environmental quality, personal health and mobility and helps those without access to a car. New developments should also consider a range of sustainable travel initiatives. The Council will support and promote the development of a network of electric vehicle charging stations by requiring provision to be considered as an integral part of any new development or redevelopment proposals (refer to Appendix 3).
- 1.2 It is intended that the Council will produce Supplementary Planning Guidance (SPG) through the period of the LDP to establish further requirements for sustainable transport. The SPG is likely to cover a range of subjects taking on board the findings of the Council's 'Sustainable Development Committee'. This will include reference to the requirement for infrastructure to provide electric car charging points, either through electrical connections adjacent to/ within private driveways, or through infrastructure for the installation of charging points within communal car parking areas. It is envisaged this will include parking facilities within commercial developments which should include the provision of charging stations.
- 1.3 The spatial strategy is underpinned by a transportation network which requires improvements to roads and railways in order to support and enable future development as well as improve connectivity across the Borders and in particular between the identified key growth areas. A key element of this is the major investment that provided the Borders Railway between the Central Borders and Edinburgh. This has created a climate for investment in the Central Borders, which needs to be complemented by improvements to the road and active travel networks.
- 1.4 In the longer term, the Council has aspirations to see the reopening of the Borders Railway southwards to Carlisle and a bypass around Selkirk on the A7. In the Eastern Borders, it also supports the construction of a new station on the East Coast Main Line at Reston and has a further aspiration to upgrade the A1 Trunk Road to full dual carriageway status on the Scottish side of the border. The UK and Scottish Governments have indicated that funding may be available through the Borderlands proposal to undertake feasibility work on the plans for an extension to Borders Rail from Tweedbank to Carlisle and the Scottish Government has indicated that a new station at Reston in Berwickshire will be provided in the current control period (2019-2024). However, it must be noted that Transport Scotland currently has no proposals to deliver an A7 bypass for Selkirk, as indicated in the Selkirk settlement map, or to upgrade the A1 to full dual carriageway status.
- 1.5 Disused railways have the potential to be used as active travel networks for walking, cycling and horse riding and this issue is explored further within the Green Networks policy.

POLICY IS4: TRANSPORT DEVELOPMENT AND INFRASTRUCTURE

The Council supports the following schemes to provide new and improved transport infrastructure:

- a) extension of Borders Railway from Tweedbank through Hawick to Carlisle;
- b) improvements to key road routes – A68, A7 (including Selkirk bypass), A72, A697, A698, A699, A703, A701, A702 and A6105;
- c) complete dualling of the A1 trunk road on the Scottish side of the border;
- d) a new rail station facility at Reston on the East Coast Main Line railway;
- e) supplement/replace Lowood Bridge.

Development that could prejudice the delivery of these schemes will not be permitted. Planned routes and locations to be safeguarded are shown on the Proposal Maps.

The Council will support proposals for transport infrastructure that:

- a) promote sustainable travel;
- b) facilitate the development of allocated sites in ways which promote sustainable travel;
- c) enable the sustainable movement of goods, particularly by rail;
- d) have no unacceptable adverse impact on the natural and built environment;
- e) have no unacceptable adverse impact on the occupiers of adjacent land by virtue of noise, smell and noise pollution.

Proposals that generate significant travel demand will be required to provide the following criteria:

- a) Transport Assessments and Travel Plans
- b) Developer contributions where appropriate

INFRASTRUCTURE AND STANDARDS (IS)

POLICY IS5

PROTECTION OF ACCESS ROUTES

- 1.1 The Council wishes to encourage walking and cycling as modes of travel and to help improve people's health and wellbeing. It therefore seeks to protect and keep open any route with access rights.
- 1.2 The aim of the policy is to protect all existing access routes in accordance with the Land Reform (Scotland) Act 2003 and the Countryside (Scotland) Act 1967. Together these Acts place a duty on local authorities to assert, protect and keep open and free from obstruction, any route, waterway or other means whereby access rights may reasonably be exercised including most open land and rights of way. The policy also seeks to protect recreational use of water from inappropriate development.
- 1.3 The Council's Core Paths Plan identifies routes which are of significant value to tourism and to local residents and which provide reasonable access for walking and cycling throughout the area.
- 1.4 Developers should integrate existing access routes into their site layouts and designs to ensure that public access remains as attractive and convenient as it was prior to the development.
- 1.5 Development briefs, prepared by the Council to guide the development of allocated sites, will incorporate requirements for the retention of access routes and the creation of improved linkages to maximise opportunities for walking and cycling.

POLICY IS5: PROTECTION OF ACCESS ROUTES

Development that would have an adverse impact upon an access route available to the public will not be permitted unless a suitable diversion or appropriate alternative route, as agreed by the Council, can be provided by the developer.

KEY POLICIES TO WHICH THIS POLICY SHOULD BE CROSS REFERENCED:

Policy PMD2 Quality Standards

INFRASTRUCTURE AND STANDARDS (IS)

POLICY IS6

ROAD ADOPTION STANDARDS

- 1.1 Transport Scotland is responsible for the adoption of trunk roads and the Council is responsible for the adoption of non-trunk roads. To achieve appropriate road adoption standards in new development for non-trunk roads, the Council requires roads and footpaths to be built to an appropriate standard which enables them to be adopted and maintained by the Council. The standards that apply are set out in Appendix 3. The same standards will apply to the extension of the existing road and footpath infrastructure and off-site links.
- 1.2 The Council considers that cyclepaths and footpaths are key components of the transport network and essential to facilitate sustainable travel. It will therefore also adopt these components provided they are constructed to the agreed standards.
- 1.3 The engineering standard of new roads in residential areas may be relaxed where this can be shown to improve functionality or residential amenity through the use of more informal and innovative street layouts, provided it does not compromise road safety.

POLICY IS6: ROAD ADOPTION STANDARDS

On non-trunk roads, new roads, footpaths and cycleways within developments must be designed and constructed in accordance with the Council's adopted standards to secure Road Construction Consent, with the exception of development which can be served by a private access.

Placemaking and Design

THE FOLLOWING PROPOSED/UPDATED SUPPLEMENTARY PLANNING GUIDANCE MAY BE RELEVANT TO THIS POLICY:

Placemaking and Design

INFRASTRUCTURE AND STANDARDS (IS)

POLICY IS7

PARKING PROVISION AND STANDARDS

- 1.1 This policy wishes to ensure that development proposals make suitable provision for car and cycle parking. The provision of car parking needs to be appropriate to the circumstances and the Council's parking standards are explained in Appendix 3.

POLICY IS7: PARKING PROVISION AND STANDARDS

Development proposals should provide for car and cycle parking in accordance with approved standards.

Relaxation of technical standards may be considered where appropriate due to the nature and location of the development, dependent on levels of non-car accessibility, and/or if positive amenity gains can be demonstrated that do not compromise road safety.

In town centres where there appear to be parking difficulties, the Council will consider the desirability of seeking additional public parking provision, in the context of policies to promote the use of sustainable travel modes.

THE FOLLOWING PROPOSED/UPDATED SUPPLEMENTARY PLANNING GUIDANCE MAY BE RELEVANT TO THIS POLICY:

Placemaking and Design

INFRASTRUCTURE AND STANDARDS (IS)

POLICY IS8

FLOODING

- 1.1 This policy is intended to discourage development from taking place in areas which are, or may become, subject to flood risk. Where some level of risk may be acceptable, it also provides for development to be designed such as to minimise it. The policy provides guidance to developers on the information that will be required in support of a development proposal which may be at risk of flooding.
- 1.2 Scottish Planning Policy (SPP) sets out the full Risk Framework. Planning Advice Note 69: Planning and Building Standards Advice on Flooding contains further relevant information and advice. SEPA's Policy 41 SEPA – Planning Authority Protocol Development at Risk of Flooding: Advice and Consultation contains principles which will be followed by SEPA and planning authorities regarding advice and consultation on flood risk issues.
- 1.3 The technical requirements of a Flood Risk Assessment (FRA) can range from the provision of detailed topographical information to demonstrate the relative level of the development site in relation to the river, sea, canal or other hazard, to technically detailed hydrological and one or two dimensional hydraulic modelling to investigate the risk to the development or its impact elsewhere. SEPA's Technical Flood Risk Guidance for Stakeholders (Version 10) should be referred to for further information.
- 1.4 The Council's Strategic Flood Risk Assessment (SFRA) provides a strategic overview of flood risk in the Scottish Borders and supports the identification of the areas most suitable for development and areas that should be safeguarded for sustainable flood management. Scottish Borders Council were the lead Local Authority in publishing the Tweed Local Flood Risk Management Plan in 2016 and data within is taken into account when future development plans are prepared and when the SFRA is updated. The Solway and Forth Estuary LFRMP also contain areas within the Scottish Borders boundary.
- 1.5 The implementation of flood protection schemes runs within flood risk management's six-year cycles, the present cycle being 2016-2022. Scottish Borders Council has a statutory obligation to deliver all the actions detailed within the Local Flood Risk Management Plans published in 2016. This includes the delivery of Hawick Flood Protection Scheme and five flood studies: Peebles, Innerleithen & Broughton; Earlston and Newcastleton. The development of these studies feeds into the next cycle and the potential implementation of future flood protection schemes. The main source of flood risk in the Borders is from rivers and surface water flooding after intense rainfall. There is also a risk of Coastal flooding.
- 1.6 The Council has a desire to move towards more sustainable solutions within the implementation of flood protection schemes. The Council co-ordinate with key stakeholders to ensure the most sustainable mitigation methods are taken forward and contribute to research and demonstration projects that seek to establish the effectiveness of natural flood management measures.

POLICY IS8: FLOODING

At all times, avoidance will be the first principle of managing flood risk. In general terms, new development should therefore be located in areas free from significant flood risk. Development will not be permitted if it would be at significant risk of flooding from any source or would materially increase the probability of flooding elsewhere. The ability of functional flood plains to convey and store floodwater should be protected, and development should be located away from them.

Within certain defined risk categories, particularly where the risk is greater than 0.5% annual flooding probability or 1 in 200 year flood risk, some forms of development will generally not be acceptable. These include:

- a) development comprising essential civil infrastructure such as hospitals, fire stations, emergency depots, schools, care homes, ground-based electrical and telecommunications equipment unless subject to an appropriate long term flood risk management strategy;
- b) additional built development in undeveloped and sparsely developed areas.

Other forms of development will be subject to an assessment of the risk and mitigation measures.

Developers will be required to provide, including if necessary at planning permission in principle stage:

- a) a competent flood risk assessment, including all sources of flooding, and taking account of climate change, using the most up to date guidance; and
- b) a report of the measures that are proposed to mitigate the flood risk.

The information used to assess the acceptability of development will include:

- a) information and advice from consultation with the Council's Flood Risk and Coastal Management Team and the Scottish Environment Protection Agency;
- b) flood risk maps provided by the Scottish Environment Protection Agency and/or developed by Scottish Borders Council which indicate the extent of the flood plain;
- c) historical records and flood studies/assessments held by the Council and other agencies;
- d) the Scottish Environment Protection Agency's Land Use Vulnerability Guidance.

KEY POLICIES TO WHICH THIS POLICY SHOULD BE CROSS REFERENCED:

Policy EP11 Protection of Greenspace
Policy EP12 Green Networks
Policy EP15 Development affecting the Water Environment
Policy IS9 Waste Water Treatment Standards and Sustainable Urban Drainage
Other Environmental Promotion and Protection and Infrastructure and Standards policies

THE FOLLOWING PROPOSED/UPDATED SUPPLEMENTARY PLANNING GUIDANCE MAY BE RELEVANT TO THIS POLICY:

Sustainability and Climate Change

INFRASTRUCTURE AND STANDARDS (IS)

POLICY IS9

WASTE WATER TREATMENT STANDARDS AND SUSTAINABLE URBAN DRAINAGE

- 1.1 In terms of waste water treatment, the aim of the policy is to achieve satisfactory disposal of sewage and to maintain and improve standards of public health. It establishes the Council's hierarchy of preference for dealing with waste water associated with new development. It emphasises that private septic tanks are regarded as a last resort and not encouraged. The policy establishes the Council's commitment to sustainable solutions in dealing with waste water associated with new development in accordance with the Urban Waste Water Treatment Directive.
- 1.2 Alternatives to sewer connection may involve pumping arrangements with storage to allow discharge to the foul sewer at off peak times or prior treatment of effluent before discharging to the foul sewer. Solutions involving stand alone treatment plants will require a Business Case to be made to Scottish Water. Scottish Environment Protection Agency (SEPA) have made it clear that it is opposed to proposals which involve private discharges of treated sewage effluent in a sewered area. Consultation with SEPA and Scottish Water will be required to assist decision making.
- 1.3 In terms of Sustainable Urban Drainage the aim of the policy is to address the pollution and flooding problems that stem from the direct discharge of surface water into watercourses. Sustainable drainage reduces the amount of flooding and diffuses pollution, improves environmental quality and protects the ecological and amenity value of watercourses. Sustainable Urban Drainage Systems (SUDS) are a legal requirement for developments (other than single dwellings) draining to the water environment. SUDS are SEPA and the Council's preferred solution for the drainage of surface water run-off in all proposed developments including the potential use within blue and green networks. It is recommended that the requirement for all new developments to manage surface water through the use of SUDS also includes the use of SUDS at the construction phase, this is to ensure the risk of pollution to the water environment during construction is minimised.
- 1.4 Developers should take the land requirement implications of SUDS into account in their consideration of the initial layout and design. Developers should also take into consideration the multiple benefits provided by an improved groundwater environment through SUDS, such as blue and green infrastructure, habitat benefits and sustainable placemaking.
- 1.5 The Council have produced Supplementary Planning Guidance in relation to SUDS which sets out good practice procedures for the design of SUDS. The SPG highlights that the disposal of surface water requires early consideration in the development process and provides guidance on the measures and opportunities available to developers to integrate sustainable surface water management into the developments.
- 1.6 In due course Scottish Water will produce their own Adoptable Standards for SUDS which allow schemes to be adopted in future. Guidance on Scottish Water's vesting standards and responsibilities is outlined within Sewers for Scotland v4.0. The Scottish Government's Planning Advice Note PAN 61 sets out the provisions for drainage strategies.

POLICY IS9: WASTE WATER TREATMENT STANDARDS AND SUSTAINABLE URBAN DRAINAGE

WASTE WATER TREATMENT STANDARDS

The Council's preferred method of dealing with waste water associated with new development will be, in order of priority:

- a) direct connection to the public sewerage system, including pumping if necessary, or failing that:
- b) negotiating developer contributions with Scottish Water to upgrade the existing sewerage network and/or increasing capacity at the waste water treatment works, or failing that:
- c) agreement with Scottish Water and SEPA where required to provide permanent or temporary alternatives to sewer connection including the possibility of stand alone treatment plants until sewer capacity becomes available, or, failing that:
- d) for development in the countryside i.e. not within or immediately adjacent to publicly seweraged areas, the use of private sewerage treatment may be acceptable, providing it can be demonstrated that this can be delivered without any negative impacts to public health, the environment or the quality of watercourses or groundwater.

In settlements served by the public foul sewer, permission for an individual private sewage treatment system will normally be refused unless exceptional circumstances prevail and the conditions in criteria (d) above can be satisfied,

Development will be refused if:

- a) it will result in a proliferation of individual septic tanks or other private water treatment infrastructure within settlements,
- b) it will overload existing mains infrastructure or it is impractical for the developer to provide for new infrastructure.

SUSTAINABLE URBAN DRAINAGE

Surface water management for new development, for both greenfield and brownfield sites, must comply with current best practice on sustainable urban drainage systems to the satisfaction of the Council, SEPA (where required), Scottish Water, Scottish Natural Heritage and other interested parties where required. Development will be refused unless surface water treatment is dealt with in a sustainable manner that avoids flooding, pollution, extensive canalisation and culverting of watercourses. A drainage strategy should be submitted with planning applications to include treatment and flood attenuation measures and details for the long term maintenance of any necessary features.

KEY POLICIES TO WHICH THIS POLICY SHOULD BE CROSS REFERENCED:

Policy PMD2 Quality Standards for New Development

Policy EP2 National Nature Conservation Sites and Protected Species
Policy EP15 Development Affecting the Water Environment
Policy IS8 Flooding

THE FOLLOWING APPROVED SUPPLEMENTARY PLANNING GUIDANCE MAY BE RELEVANT TO THIS POLICY:

Sustainable Urban Drainage

INFRASTRUCTURE AND STANDARDS (IS)

POLICY IS10

WASTE MANAGEMENT FACILITIES

- 1.1 Scotland's Zero Waste Plan (ZWP) sets out the Scottish Government's vision for a zero waste society. This describes a Scotland where all waste is seen as a resource; with a 70% recycling target, and no more than 5% being sent to landfill, by 2025. In 2012, the Waste (Scotland) Regulations were passed by Scottish Parliament which make provision for food waste collections, separate recycling collections and a ban on landfilling biodegradable waste from 2021. The existing Easter Langlee Landfill Site will be capped and waste will be transferred outwith the Borders. This will remain the case unless waste treatment facilities are developed in the area. Until such a time that the Scottish Borders can develop its own treatment facilities, there will be more need for waste to be transported outwith the area.
- 1.2 Achieving zero waste will make a positive contribution to climate change and renewable energy targets as more waste is prevented, less waste is sent to landfill, and more resources are reused, recycled and recovered.

Prevent Reduce Re-use Recover Dispose	The aim is to deal with waste as high up the waste hierarchy as possible, with a strong emphasis on preventing and reducing waste.
--	--

- 1.3 The Scottish Government has set out its ambitions to reduce waste and use resources more efficiently in Scotland (2016), delivering economic and environmental benefits within 'Making Things Last: a circular economy strategy for Scotland'. This principle is fundamental to all of the "loops" of the circular economy, focusing on preventing food waste and waste arising from construction and demolition.
- 1.4 The Local Development Plan has a role in making sure that new development provides for the collection of waste and in enabling the provision of facilities for the sustainable recovery and treatment of waste.
- 1.5 Scottish Planning Policy (SPP) indicates that regard should be had to the annual update of required capacity for source segregated recyclables and unsorted waste, mindful of the need to achieve the all-Scotland operational capacity, and it includes a reference to the 10 year rolling landfill capacity required. It also indicates that the planning system should support the provision of a network of infrastructure to allow Scotland's waste and secondary resources to be managed in one of the nearest appropriate installations, by means of the most appropriate methods and technologies.

- 1.6 Furthermore, SPP explains: that while a significant shortfall of waste management infrastructure exists, emphasis should be placed on need over proximity; that the achievement of a sustainable strategy may involve waste crossing planning boundaries; that, as the national network of installations becomes more fully developed, there will be scope for giving greater weight to proximity; and that the national capacity figure for source segregated recyclables and unsorted waste is not a cap and can represent an opportunity for economic growth.
- 1.7 All proposals for waste management facilities should show how they contribute towards delivering both the national annual waste management capacity required and an adequate and integrated network of waste management facilities.
- 1.8 The Council envisages the main site for waste treatment in the Borders to be Easter Langlee at Galashiels, which will be safeguarded for this purpose. Other waste facilities include waste transfer stations and community recycling facilities.
- 1.9 Any applications for energy from waste facilities shall be located where there are opportunities to connect with heat/power grids and users.
- 1.10 The following hierarchy in Table 1 is a breakdown of the strategic significance of the Council's waste facilities as sites for sustainable waste management (see Figure IS10a).

POLICY IS10: WASTE MANAGEMENT FACILITIES

The Council will support the provision of waste facilities within the hierarchy set out in Table 1. Proposals that would prejudice the operation of these waste facilities will not normally be supported.

Applications for waste facilities that deliver the Council's waste plan will be approved, provided that any impacts on local communities and the environment have been properly addressed and are within acceptable limits as demonstrated by appropriate supporting information. The following matters will be taken into account:

- (a) noise, odour and litter
- (b) harm to biodiversity and landscape
- (c) harm to archaeology and built heritage
- (d) traffic generation and vehicle movements
- (e) accessibility to major roads and rail routes
- (f) reuse of derelict and brownfield land
- (g) pollution and contamination of water, air and soils
- (h) landscaping and site boundary treatment
- (i) site restoration and after use.

Where appropriate, and in addition to the above matters, the assessment of a proposal will take into account the contribution it makes towards delivering both the national annual waste management capacity required to meet the targets set out in the Zero Waste Plan, and an integrated and adequate network of waste management facilities.

THE FOLLOWING APPROVED SUPPLEMENTARY PLANNING GUIDANCE IS RELEVANT TO THIS POLICY:

Waste Management

INFRASTRUCTURE AND STANDARDS (IS) POLICY IS11 HAZARDOUS DEVELOPMENTS

- 1.1 The aim of the policy is to ensure that the public and the environment are adequately protected from development that would cause pollution, be a nuisance or lead to a hazard. The potentially hazardous impact could be through the nature of the development itself or through the location of the development relative to an existing facility or installation, such as an agricultural unit, pipeline or powerline.
- 1.2 The relevant legislation is the Planning (Hazardous Substances) (Scotland) Act 1997 and the Town and Country Planning (Hazardous Substances) (Scotland) Regulations 2015. The technical specification of hazardous substances is contained in the Town and Country Planning (Control of Major Accident Hazards) (Scotland) Regulations 2009.

POLICY IS11: HAZARDOUS DEVELOPMENTS

Proposals for hazardous developments as defined under the relevant legislation will be subject to strict controls on siting to maintain appropriate separation from residential areas and areas frequented by the public, major transport routes and areas of national heritage importance.

Development will be refused if, guided by the advice of the Health and Safety Executive and other consultees as appropriate:

- a) the proposal would cause unacceptable levels of pollution or public nuisance or result in an unacceptable hazard to the public or the environment, or
- b) the proposal is located in close proximity to existing facilities or infrastructure that would result in the development causing unacceptable levels of pollution or nuisance or result in an unacceptable hazard to the public or the environment.

KEY POLICIES TO WHICH THIS POLICY SHOULD BE CROSS REFERENCED:

Policy IS12 Development within Exclusion Zones
Environmental Promotion and Protection and Housing Development policies.

INFRASTRUCTURE AND STANDARDS (IS)

POLICY IS12

DEVELOPMENT WITHIN EXCLUSION ZONES

- 1.1 The purpose of the policy is to ensure that developments proposed within the 'exclusion' zones of certain hazardous structures are subject to careful scrutiny to protect the public and the environment. These 'exclusion' zones relate to the major natural gas and ethylene pipelines and to civil aviation navigation beacons. Certain developments are 'notifiable' under the legislation owing to the processes or materials used. There are currently three known notifiable installations in the Borders and numerous pipelines, each of which have a defined consultation zone.
- 1.2 The relevant legislation is the Planning (Hazardous Substances) (Scotland) Act 1997 and the Town and Country Planning (Hazardous Substances) (Scotland) Regulations 2015. The technical specification of hazardous substances is contained in the Town and Country Planning (Control of Major Accident Hazards) (Scotland) Regulations 2009.
- 1.3 The Health and Safety Executive (HSE) has defined consultation zones around each hazardous installation and pipeline which is been created using an established methodology to define the consultation zones. Should any proposed development fall within the specified consultation distances from the hazardous installations or pipelines, the relevant bodies including the owner or operator must be consulted with regard to the proposal.
- 1.4 All consultation zones could be subject to change during the lifetime of the Local Development Plan. Similarly, the types and scale of development proposals within consultation zones that will require to be referred to the HSE are set out in detailed guidance published by them, which could also be subject to review during the Plan period. Applicants should therefore confirm the up-to-date position with HSE.

POLICY IS12: DEVELOPMENT WITHIN EXCLUSION ZONES

All proposals for development which are within the exclusion zones of a pipeline or civil aviation navigation beacon or within the vicinity of any notifiable installation or of any new hazardous development or notifiable installation that may arise during the lifetime of the Local Development Plan, will be refused if it is judged to result in unacceptable levels of pollution, nuisance or result in an unacceptable hazard to the public or the environment. The decision making will be guided by expert advice from the appropriate operator/owner and the Health and Safety Executive.

KEY POLICIES TO WHICH THIS POLICY SHOULD BE CROSS REFERENCED:

Policy IS11 Hazardous Developments
Environmental Promotion and Protection policies

INFRASTRUCTURE AND STANDARDS (IS)

POLICY IS13

CONTAMINATED AND UNSTABLE LAND

- 1.1 The aim of this policy is to allow for development on land where contamination is known or suspected but in a manner that ensures the redevelopment of such sites is made possible without unacceptable risks to human health and the wider environment. It should be noted, Scottish Natural Heritage (SNH) only require to be consulted by developers preparing their assessments where there are potential impacts on sites designated for their natural heritage value. Other appropriate public bodies may also be consulted and this will be determined on a case by case basis.
- 1.2 A legacy of industrial activity such as that seen in Scotland may result in land contamination. Within the Scottish Borders examples of contaminative activities include (but are not limited to); gasworking, landfilling, textile manufacturing, and, electronics manufacturing. However, land contamination can also occur from relatively smaller scale processes such as agricultural operations, sawmilling, metal working, and fuel storage.
- 1.3 Land can be contaminated by a variety of substances that pose immediate or long-term risks to human health and the wider environment. Such contaminants may escape from the site to cause air, land, surface water or groundwater pollution, and in some cases may damage buildings and underground services, or contaminate the food chain.
- 1.4 Guidance in terms of Part IIA of the Environmental Protection Act 1990 and PAN 33 - Development of Contaminated Land (2000) highlights that where the presence of contamination is known or suspected it is the planning authority's role to ensure that land is made suitable for any new use, as planning permission is given for that new use.
- 1.5 In ensuring a site is 'suitable for use' the developer will be required to undertake, to the satisfaction of the council, an assessment of all potential risks from contamination, on the basis of the proposed future use and circumstances of the site. Where such assessments identify it as necessary to avoid risks to human health and the wider environment the developer shall remediate the land before the new use commences. Relevant agencies will be consulted in relation to potential environmental risks. In some instances Scottish Environment Protection Agency will be consulted in relation to any impact on the water environment.
- 1.6 The policy also covers development on unstable land arising from mining activities, which affects part of the Scottish Borders.

POLICY IS13: CONTAMINATED AND UNSTABLE LAND

Where development is proposed on land that is contaminated, suspected of contamination, or unstable the developer will be required to:

- (a) carry out, in full consultation with, and to the satisfaction of Scottish Borders Council, appropriate phased site investigations and risk assessments; and
- (b) where necessary, and to the satisfaction of Scottish Borders Council design, implement, and validate appropriate remedial or mitigation measures to render the site suitable for its proposed use.

Policy PMD5 Infill Development

Policy EP15 Development Affecting the Water Environment

Some of the Plan's Environmental Promotion and Protection policies may also be relevant.

THE FOLLOWING APPROVED SUPPLEMENTARY PLANNING GUIDANCE MAY BE RELEVANT TO THIS POLICY:

Contaminated Land Inspection Strategy

INFRASTRUCTURE AND STANDARDS (IS)

POLICY IS14

CREMATORIUM PROVISION

- 1.1 Existing crematoria are located at Melrose and Houndwood. Further proposals to meet a need elsewhere in the Scottish Borders should be highly accessible, provide a suitable setting and be well served by hospitality services, such as hotels. The impact on the landscape and biodiversity must be within acceptable limits.

POLICY IS14: CREMATORIUM PROVISION

The Council will consider applications for crematoria to meet community needs, provided the following requirements are met:

- a) a design statement is prepared setting out the appropriate design and layout of buildings and car parking to achieve minimal and acceptable impact on landscape surroundings and biodiversity
- b) a calm and reflective setting for the crematorium
- c) suitable access with proximity to a main road
- d) located in reasonable proximity to hospitality facilities.

Policy EP15 Air Quality
Policy IS4 Transport Development and Infrastructure
Policy IS7 Parking Provision and Standards

INFRASTRUCTURE AND STANDARDS (IS)

POLICY IS15

RADIO TELECOMMUNICATIONS

- 1.1 The aim of the policy is to reflect the Council's wish to support the expansion and diversification of the telecommunications industry but in ways which minimise its visual and environmental impact. The policy recognises the social and economic benefits of improved telecommunications infrastructure but wishes to ensure that developers have considered the options for siting and design and justify their preferred solution. Decision making will be guided by advice from environmental agencies where appropriate.
- 1.2 Health and safety considerations are clearly of concern to communities but are not matters for the planning system. The Government sets out a number of measures to protect public health including guidance on emissions and exclusion zones.
- 1.3 There is a presumption in favour of developments that extend radio telecommunications facilities provided that this can be achieved without adverse impacts on the environment.

POLICY IS15: RADIO TELECOMMUNICATIONS

Development involving telecommunications masts, antennas, power lines and associated structures required for installation including buildings, access and site security will be assessed against siting and design considerations.

- a) Telecommunications equipment should be positioned and designed sensitively to avoid unacceptable effects on the natural and built environments, including areas of landscape importance and areas of ecological interest
- (b) Developers must demonstrate that they have considered options for minimising the impact of the development including:
 - (i) the scale and type of equipment used (which should be the smallest suitable, commensurate with technological requirements),
 - (ii) the potential for mast or site sharing,
 - (iii) the measures for concealment or disguise through appropriate siting, design, landscaping, materials and colours,
 - (iv) the timing and method of construction,
 - (v) the arrangement for access during construction and operation which takes account of the impact on adjoining users and/or wildlife habitats,
 - (vi) the potential for siting on existing buildings or structures
- (c) Where mast or site sharing is shown to be impractical, the developer must demonstrate that there is no alternative location which will satisfy the system's operational requirements, and/or that siting apparatus on existing buildings or structures would cause greater harm to the appearance of the area than that which is proposed. Developers should also address the cumulative effects of a proposal in combination with existing equipment in the area.

KEY POLICIES TO WHICH THIS POLICY SHOULD BE CROSS REFERENCED:

Policy PMD5 Infill Development
Policy ED1 Protection of Business and Industrial Land
Environmental Promotion and Protection policies (EP).

INFRASTRUCTURE AND STANDARDS (IS)

POLICY IS16

ADVERTISEMENTS

- 1.1 The aim of the policy is to ensure that advertisements/signs do not adversely affect local character, amenity, or safety either within the countryside or in built-up areas. Within a commercial street advertisements and signs can add information, colour, and interest whilst in the countryside they can encourage accessibility to businesses, facilities and attractions. However, cumulatively they can result in a premises or an area appearing untidy and cluttered. The policy reflects the need to ensure a higher quality of design and materials for Listed Buildings and Conservation Areas, reflecting the property or area's character and appearance.
- 1.2 The relevant government guidance is contained in Circular 10/1984 and Circular 27/1995 Tourist Signposting. Reference should also be made to the Supplementary Planning Guidance relating to Shop Fronts and Shop Signs, Tourist Signposting Policy July 2003 (Factsheet appended May 2007) (Amended May 2010), as well as A Guide to Signposting for Tourism Businesses (Visit Scotland). It should also be noted that where advertisements are on or visible from a trunk road, there is a requirement to consult Transport Scotland regarding advice and the criteria to be met for approval.

POLICY IS16: ADVERTISEMENTS

Applications for advertisements/signs will be assessed against the Council's published supplementary guidance. This guidance is concerned with amenity and safety considerations. A higher standard of design will be required on Listed Buildings and in Conservation Areas. All proposals will be assessed against the following criteria:

- a) advertisements/signs must not represent a threat to road safety or other hazard to the public;
- b) advertisements/signs must be related to the location at which they are displayed and must be in keeping with the character of the building to which they are attached and/or the area in which they are located in terms of positioning, scale, design or materials;
- c) excessive or badly arranged advertisements/signs which cause unsightly clutter will not be permitted.

In addition to the above criteria and outwith settlements, roadside advertisements in the countryside will only be permitted if:

- d) a statutory road sign has been considered as a first option,
- e) the sign is primarily directional, and does not advertise particular products or facilities,
- f) the premises to be signed are not clearly visible from a major road and cannot already be reasonably identified by means of an existing directional sign advising of the place name of the locality within which it is located, and

g) not more than one sign is proposed at the nearest junction of the public road and the access road to the premises. In the case of two or more neighbouring premises, a series of individual signs will not be permitted, and composite signs will be encouraged as an alternative, where appropriate.

THE FOLLOWING APPROVED SUPPLEMENTARY PLANNING GUIDANCE MAY BE RELEVANT TO THIS POLICY:

Shop Fronts and Shop Signs

INFRASTRUCTURE AND STANDARDS (IS)

POLICY IS17

EDUCATION SAFEGUARDING

- 1.1 The purpose of the policy is to support existing educational facilities by controlling alternative uses. It is aimed at facilities considered to be fundamental to the wellbeing of Borders communities and to the economy of the region. It is therefore most likely to be used to safeguard further or higher education facilities and currently only applies to the Heriot-Watt University Campus at Netherdale, Galashiels.

POLICY IS17: EDUCATION SAFEGUARDING

Within areas identified for educational uses judged to be of strategic importance, consent will only be granted for those uses that would facilitate or improve educational facilities within the Scottish Borders.

KEY POLICIES TO WHICH THIS POLICY SHOULD BE CROSS REFERENCED:

Policy PMD5 Infill Development
Policy HD3 Protection of Residential Amenity
Policy EP1 International Nature Conservation Sites and Protected Species

INFRASTRUCTURE AND STANDARDS (IS)

POLICY IS18

CEMETERY PROVISION

- 1.1 Cemeteries represent an important cultural and social component of the structure of our society. The aim of this policy is to give protection to existing cemeteries and to prevent their loss to development. In addition the policy also aims to support the development of new cemeteries, as well as the expansion of existing cemeteries where it can be demonstrated that there is a need for the use, and that the use can be supported at the proposed site.
- 1.2 Cemeteries also take on a wider role as important greenspaces for towns and villages. The policy therefore seeks proposals for new cemeteries or extensions to existing cemeteries to incorporate into their design natural features that are beneficial to visitors for their aesthetic properties, and to biodiversity for their role in wider green networks.
- 1.3 The Scottish Environment Protection Agency (SEPA) aims to protect and improve Scotland's environment in a number of ways, and their responsibilities includes regulating activities that may pollute water. Therefore, in the search for any new or extended cemetery proposal for human burial, the developer should ensure that full consideration is given to SEPA's 'Environmental Policy 19: Groundwater protection policy for Scotland', and SEPA's 'Guidance on Assessing the Impacts of Cemeteries on Groundwater' and any other subsequent policy and guidance.
- 1.4 It is accepted that in most instances that there will be little opportunity to find land for a new cemetery within the Development Boundary, for that reason the identification of an appropriate site outwith a settlement is likely to be seen as acceptable.
- 1.5 A Design Statement (incorporating a landscape plan) will be required for all applications that relate to a new cemetery proposal. The design statement will need to set out the appropriate design and layout of buildings and car parking to achieve minimal and acceptable impact on landscape surroundings and biodiversity. New or enhanced landscaping on the site must also be included.

POLICY IS18: CEMETERY PROVISION

The Council will support development that safeguards and enhances the quality of an existing cemetery. Development that results in the loss of any cemetery will not be supported.

The Council will support applications for new or extended cemeteries that meet community needs, provided the following requirements are met:

- a) the site has the capacity to accommodate the cemetery and any accessory uses appropriate
- b) satisfactory access, off-street parking and internal traffic circulation
- c) incorporation, protection and expansion of natural heritage features such as tree planting and landscaping, with encouragement for the use of native species, to complement the plot plan, existing contours and the surrounding area
- d) use of high quality materials to reflect the importance of the site
- e) relates sympathetically to the landscape of which it is a part
- f) located in reasonable proximity to hospitality facilities
- g) adherence to Scottish Environment Protection Agency's policy and guidance
- h) consideration of archaeology.

SCOTTISH BORDERS COUNCIL PROPOSED LOCAL DEVELOPMENT PLAN 2020

APPENDIX 1

SETTLEMENT APPRAISAL METHODOLOGY

This Appendix sets out the methodology for assessing sites being carried forward from previous Local Plans and the proposed sites for inclusion within the Local Development Plan (LDP). Part A sets out the methodology for the sites carried forward from the Adopted Local Plan 2008, Part B sets out the methodology for the sites carried forward from the Local Plan Amendment, Local Development Plan and those included within the LDP and Part C sets out the sites which were included as part of the Housing SG.

PART A: SITES CARRIED FORWARD FROM ADOPTED LOCAL PLAN 2008

The settlement appraisal methodology followed a number of stages to ensure consistency of application.

These stages were:

- i. Settlement constraints
- ii. Specific constraints
- iii. Settlement specific issues
- iv. Settlement characteristics
- v. Individual site assessment
- vi. Settlement framework and design briefs

STAGE I (Settlement constraints): Covers parameters such as elevation, slope, geology, flooding and land already developed, and can be carried out by desk top study, using GIS and information available from a variety of sources. This stage is almost entirely based on objective data and excludes large areas of land from the later stages of the settlement appraisal process because of excessive height, slope etc - the fundamental constraints of physical geography. It identifies those parts of the hinterland around a settlement that have the physical capability to support development and enables the potential development capacity of selected areas (e.g Central Borders) to be tested.

STAGE II (Specific constraints): Eliminates further potentially unsuitable sites through the consideration of further, less absolute, criteria such as contamination, service wayleaves, prime quality agricultural land, woodland, landscape or biodiversity value, designated sites (for example Sites of Special Scientific Interest). The completion of this stage identifies the developable land that has both the physical capability to support development and is free of important 'man-made' constraints and designations. Further areas that are least suited to development are eliminated at this stage.

STAGE III (Settlement specific issues): Is based on other suitability factors including potential to address development need. These factors include land supply, current planning applications and proximity to proposed rail transport network. These three stages can all be undertaken as an overlay sieve mapping exercise through the use of GIS. The output from these three stages is an Ordnance Survey map of the town or village with the relative constraints identified and a number of 'areas of search' highlighted. Plans of these 'areas of search' are then produced together with the relevant constraint information to enable on-site investigation to be carried out.

STAGE IV (Settlement characteristics): Is a combination of desk-top and on-site investigation. The first element consists of compiling settlement data on such topics as population, housing, housing need, accessibility, road infrastructure, public transport, infrastructure, services etc. The second, on-site, element is concerned with subjects such as landscape issues, water courses, ecological and biodiversity factors, opportunities for environmental improvement, townscape character, aspect, viewpoints etc. The purpose of this stage is to establish the interrelationship between the site and its context within the settlement and immediate hinterland as well as providing guidance as to the development potential/capacity for any given area of land. The resultant checklist provides an easy reference point for settlement information and a means of effectively managing information from a number of disparate sources.

STAGE V (Individual site assessment): Is the detailed site examination and the identification of site characteristics and development capacity. Site specific parameters on topography, built form characteristics, adjoining land uses, landscape features, constraints, important views, buildings and their setting, access, accessibility, an indicative site capacity and ownership are recorded in a similar way to the settlement characteristic checklist.

STAGE VI (Settlement framework and design briefs): The final result of this stage was a series of sites mapped with important features and identifying the issues to be considered in preparing a development proposal. If the results of this stage mean sites being eliminated or reduced because of site specific issues, then further sites which meet the 'next best fit' criteria can be brought forward for assessment.

It was considered that the inclusion of environmental criteria at every stage of the site selection process allowed for the evaluation of options and assessment of sites in accordance with the provisions of the Environmental Assessment of Plans and Programmes (Scotland) Regulations 2004.

PART B: SITES CARRIED FORWARD FROM PREVIOUS PLANS (LPA, LDP, LDP2)

The methodology for assessing proposed sites for allocation within the Local Plan Amendment (LPA) was agreed internally within the Plans and Research team with advice from other key experts from the Environment and Infrastructure department and discussion with SEPA, SNH and Historic Scotland during the SEA Scoping Report consultation. This same appraisal process was used during the Local Development Plan (LDP) process and the current Local Development Plan 2 (LDP2) process. The settlement appraisal involved:

- Establishing site assessment criteria with input from the whole team
- Building an access database to store site assessment findings
- Creating a Geographical Information Systems (GIS) project to screen environmental constraints
- Establishing a procedure for consulting internal experts regarding, for example, roads, biodiversity, archaeology, conservation, footpaths, landscape and development management
- Producing detailed site requirements for each allocation to mitigate any environmental impacts and ensure good design principles were established.

Each site was visited and photographs were taken to assist with the desk top analysis. The site was plotted on GIS to assist with the desk top analysis of constraints. A GIS project was set up to correlate with the site assessment criteria as described below so that officers could analyse any constraints and opportunities on the site. This information was then input into the site assessment database.

The site assessment was broken down into five main sections: Initial Assessment (including site details, background information and other spatial constraints checklist), Accessibility and Sustainability, Local Impact and Integration, Landscape Capacity, Planning and Infrastructure Issues and Overall Assessment. Sites were assessed as Acceptable, Doubtful or Unacceptable in the database.

- **Initial Assessment:** Identified constraints that prevented any development from taking place, including flooding and international/national conservation designations. It also took account of whether the site was consistent in terms of location with the Structure Plan/Strategic Development Plan. If a site was identified as having a significant constraint upon it, or not of a size capable of being developed for 5 units or over, then the site was assessed as unacceptable for allocation.
- **Accessibility and Sustainability:** Analysed issues regarding access to services, public transport and employment, as well as site orientation and impact on biodiversity. If a site was deemed poor in terms of access to services or potentially having a major impact on biodiversity, it was likely to be assessed as unacceptable in terms of accessibility and sustainability.
- **Local Impact and Integration:** Analysed issues such as historical context, archaeology, recreational facilities and the connectivity of the site to the actual settlement. If a site had a Scheduled Monument, listed building or poor connectivity to the settlement, then the site would probably be assessed as unacceptable or doubtful in terms of local impact and integration.
- **Landscape Capacity:** Analysed issues concerning landscape designations both national and local, height and slope as well as features within the actual site. If a site was in the National Scenic Area, or was over 200m or had more than a 12 degree slope, then the site would probably be assessed as

- unacceptable or doubtful in terms of landscape capacity.
- **Planning and Infrastructure Issues:** Analysed issues about planning requirements. For instance, constraints regarding road access, water and sewerage, footpaths, education and contamination were assessed. If a site was deemed to have poor access, then the site would probably be assessed as unacceptable or doubtful in terms of planning and infrastructure.
- **Overall Assessment:** Drew all this information together and made a final assessment based on the identified constraints. If there were possible mitigations or solutions to these constraints, the site would be assessed as acceptable or doubtful. These were then brought forward for internal consultation with Countryside and Heritage, Roads, Education, Housing, Environmental Health, Economic Development and Development Management. If a site was assessed as unacceptable by the Planning Officer responsible for the area, then it was not taken forward for further research.

Sites internally consulted on were provided with additional information regarding: biodiversity, archaeology, landscape, footpath access, heritage and design, road access, contaminated land, affordable housing and education capacity. Scottish Water also provided further information regarding water and sewerage capacity. The site assessment was then updated to reflect these comments and adjusted in terms of the assessment. Acceptable sites were then provided with detailed site requirements based on the opportunities and constraints identified and provided as options in the Consultative Draft of the Local Plan Amendment.

SITE COMPARISON EXERCISE

The site comparison exercise is the second step of the site assessment process described above and was undertaken for the Local Plan Amendment and Local Development Plan.

PART C: SITES CARRIED FORWARD FROM THE HOUSING SUPPLEMENTARY GUIDANCE

The Housing Supplementary Guidance (SG) was produced as part of the Local Development Plan, further to the LDP Examination, in response to a housing shortfall.

The site assessment process for the Housing SG was undertaken in two stages, which are outlined below.

STAGE 1: An initial RAG (red, amber & green) site assessment was undertaken. All sites were assessed against 14 criteria within a matrix table. It should be noted that the criteria was in line with the policies contained within the LDP and Policy 7: Maintaining a Five Year Housing Land Supply, as contained within SESPlan. An assessment was undertaken for each of the sites against the criteria contained within the stage 1 matrix, and this resulted in the following conclusions;

- **Green:** It was considered that the site met the criteria satisfactorily
- **Amber:** The site requires further investigation/consultation or mitigation and/or potential constraints were identified within/adjacent to the site
- **Red:** The site was not considered to meet the criteria

Once each of the criteria had been assessed, an overall conclusion was drawn for each site, this included an overall RAG outcome. The stage 1 assessment conclusions for the red RAG sites was recorded within the site assessment database.

STAGE 2: Following on from the stage 1 RAG assessment, a stage 2 assessment was undertaken for all the remaining sites (green and amber). This included a detailed site assessment and consultation with internal and external consultees. The methodology for this site assessment was the same as outlined within Part B above.

SCOTTISH BORDERS COUNCIL
PROPOSED LOCAL DEVELOPMENT PLAN 2020

APPENDIX 2

MEETING THE HOUSING
LAND REQUIREMENT

1. INTRODUCTION

- 1.1 This appendix provides the background context to the housing land requirement and provisions within the Local Development Plan 2 (LDP). It sets out the allocations brought forward within the LDP and those being removed. It also provides the current position in terms of monitoring the effective housing land supply. The Technical Note on Housing, expands upon this in more detail.
- 1.2 Part A of this appendix sets out the housing land requirement for the Scottish Borders and the contributions to meet the SESPlan target, while Part B covers the monitoring of the 5 year effective housing land supply.
- 1.3 In City Regions, the Strategic Development Plan (SDP) should identify the housing land requirement (HLR) for the Plan area and indicate where land should be allocated in the LDP to meet requirements up to Year 12 beyond the predicted year of plan approval and an indication of the possible scale and location of housing land up to Year 20. LDP's should allocate a range of sites which are effective or capable of becoming effective to meet the HLR up to Year 10 from the predicated year of adoption, ensuring a minimum of 5 years effective land supply at all times. However, on the 16th May 2019 Scottish Ministers rejected the proposed SDP, albeit for reasons other than the housing requirement.
- 1.4 Scottish Planning Policy (SPP) confirms that Housing Need & Demand Assessments (HNDA) provide the evidence base for defining the housing supply target (HST). The SESPlan HNDA covers each of the six Local Authority areas within the SESPlan area, including the Scottish Borders. SESPlan prepared HNDA2 in accordance with detailed guidance from the Scottish Government, and this was considered 'robust and credible' by the Scottish Government in March 2015. It is recognised that the HNDA is a technical modelling exercise which provides a range of estimate-based scenarios.
- 1.5 Identifying new land to be allocated for housing remains one of the most challenging and contentious parts of the LDP process. The process for the identification of potential sites has included a call for sites, detailed site assessment and consultation on all sites submitted for consideration. The MIR proposed a number of preferred and alternative housing and mixed use options with indicative capacities.

PART A: HOUSING LAND WITHIN THE LDP

2. BACKGROUND CONTEXT

- 2.1 The MIR was prepared based upon the HLR's set out within the SESPlan Proposed Plan, which was informed by the HNDA2. This was in accordance with the SESPlan Housing Background Paper (October 2016) which set out the background, process and justification for the HST's and HLR's within the Proposed SESPlan.
- 2.2 SPP states that where the Scottish Government is satisfied that the HNDA is robust and credible, the approach used will not normally be considered further at a Development Plan Examination. HNDA2 prepared for SDP2 was confirmed as 'robust and credible' by the Scottish Government and can be taken into account in the preparation of emerging LDP's. HNDA2 is at present the most up to date and therefore reliable evidence of the housing need and demand within the SESPlan area.

3. HOUSING SUPPLY TARGET & HOUSING LAND REQUIREMENT

3.1 As outlined above, the HST and HLR are informed by the HNDA2. The figures included within LDP2 are taken from the Proposed SESPlan and Housing Background Paper (2016). The base date for the housing figures is 2012. Table 1 sets out the HST's, while Table 2 sets out the HLR, which includes a 10% margin of generosity. However, to ensure that the LDP delivers a Plan which covers ten years from adoption, the LDP must set out an overall requirement up to 2030/31. The figures for this additional year were taken from Table 9.3 of the SESPlan Housing Background Paper and 10% generosity has been added. Table 3 contains the combined HLR for the period (2012/13 to 2030/31). This will ensure that the HLR accounts for ten years post the adoption of LDP2. It should be noted that the HST is broken down into affordable and market units.

TABLE 1: HOUSING SUPPLY TARGETS (2012/13 – 2029/30)

Authority	AFFORDABLE		MARKET		COMBINED HOUSING SUPPLY TARGET	
	Annual Average	Period Total	Annual Average	Period Total	Annual Average	Period Total
Scottish Borders	128	(128*18) 2,304	220	(220*18) 3,960	348	(348*18) 6,264

Source: SESPlan Housing Background Paper (2016)

TABLE 2: HOUSING LAND REQUIREMENT (2012/13 TO 2029/30)

Authority	COMBINED HOUSING LAND REQUIREMENT	
	Annual Average	Period Total
Scottish Borders	383	(383*18) 6,894

Source: SESPlan Housing Background Paper (2016)

TABLE 3: HOUSING LAND REQUIREMENT (2012/13 TO 2030/31)

HOUSING LAND REQUIREMENT	2012/13 TO 2030/31
HLR for Scottish Borders (2012/13 to 2029/30)	6,894
Additional HLR for 2030/31* *The additional year is taken from the Housing Background Paper, table 9.3, with an additional 10% generosity added	394
Total	7,288

Source: SESPlan Housing Background Paper (2016)

4. HOUSING LAND SUPPLY CONTRIBUTIONS TO MEET THE HOUSING LAND REQUIREMENT

- 4.1 The most significant part of the provisions to meet the housing land requirement, have been identified through Local Plan allocations, planning permissions and through estimates for future windfall approvals.
- 4.2 The baseline position takes account of the 2019 Housing Land Audit (HLA). Table 4 shows the updated housing land supply broken down into; effective, potentially effective, post year 7 and constrained units. It should be noted that the additional sites brought forward as part of the Housing SG are included within the 2019 HLA and form part of the established housing land supply.

TABLE 4: ESTABLISHED HOUSING LAND SUPPLY (2019 HLA)

HLA SUPPLY CATEGORY	NUMBER OF UNITS
Effective (Years 1-5)	3,679
Potentially Effective (Years 6 & 7)	1,945
Post Year 7	2,249
Constrained	1,303
Total	9,176

Source: Housing Land Audit (2019)

- 4.3 The approach used by the Council to undertake the HLA is in accordance with PAN 2/2010 which states under the marketability criteria, that the test to identify if a site is effective is whether 'the site, or a relevant part of it, can be developed in the period under consideration'. The Council considers a site to be effective if there is a reasonable prospect that it could be developed within the 5 year period.
- 4.4 The contributions by Scottish Borders to meet the HLR outlined above, are set out in Table 5 below, based on the 2019 HLA. Table 5 shows the potential contribution to the requirement, which includes the existing established housing land supply (HLA 2019) and windfall assumption for years (2019/20 to 2030/31).

TABLE 5: CONTRIBUTIONS TO THE REQUIREMENT (2012/13 TO 2030/31)

	2019/20 TO 2023/24	2024/25 to 2030/31	ADDITIONAL POTENTIAL	Total
Housing Land Supply (2019)				
Effective (Years 1-5)	3,679	n/a	n/a	3,679
Potentially Effective (Years 6 & 7) and (Post Year 7)	n/a	4,194	n/a	4,194
Constrained	n/a	n/a	1,303	1,303
Windfall Assumption	(146*5) 730	(98*7) 686	n/a	1,416
Total Potential	4,409	4,880	1,303	10,592

Source: Housing Land Audit (2019)

- 4.5 In addition, the housing land requirement has already been subject to housing completions for the period 2012/13 to 2018/19, which totals 2,056 units. However, this is reduced by anticipated future demolitions between 2019/20 and 2030/31. The demolition assumption is based on 20 units per annum, which totals 240 units between 2019/20 and 2030/31. This is outlined in Table 6 below.

TABLE 6: COMPLETIONS AND DEMOLITIONS

	2012/13 TO 2018/19	2019/20 to 2030/31
Completions (2012/13 to 2018/19)	2,056	N/A
Loss of supply due to demolitions (2019/20 to 2030/31)	N/A	-240

- 4.6 Table 7 outlines the total contributions to the housing land requirement, which takes account of the following; established housing land supply (2019 HLA), windfall assumption, completions, assumed demolitions and allocations added/removed from LDP2. The table demonstrates that the total contributions to the housing land requirement is 12,867 units. Sections 5 & 6 go into more detail in respect of units being removed and added from LDP2.

TABLE 7: CONTRIBUTIONS TO THE HOUSING LAND REQUIREMENT

CONTRIBUTIONS TO THE REQUIREMENT	2012/13 TO 2030/31
Potential Supply (HLA 2019)*	10,592
Completions (2012/13 to 2018/19)	2,056
Demolitions (2019/20 to 2030/31)	-240
Units being removed from LDP2	-108
Units being added to LDP2	567
Total	12,867

*Note this also includes windfall assumption (2019/20 to 2030/31), see Table 5 above.

- 4.7 Table 8 below compares the housing land requirement against the total contributions, as set out above. The table shows that the contributions meet the housing land requirement of 7,288 units and that the LDP2 provides additional flexibility overall.

TABLE 8: HOUSING LAND REQUIREMENT V CONTRIBUTIONS

REQUIREMENT V CONTRIBUTIONS	
Housing Land Requirement (2012/13 to 2030/31)	7,288
Contributions to the Requirement	12,867
Total Surplus	+5,579

WINDFALL SITES

- 4.8 In addition to the allocated housing sites throughout the Plan period, some of the demand for new housing will be met through windfall sites. Windfall sites are sites which have not been identified for housing through the Plan preparation process. They are generally small, infill sites, although large windfall sites can occasionally come forward. The number of completions on windfall sites is shown below in Table 9. It should be noted that windfall development makes a substantial contribution to the housing land supply within the Borders area, given its rural character and the relatively low level of development activity on larger sites. Over the past 5 years the average number of completions on windfall sites was 99 units. Of the total completions since 2015 between 76 and 121 units have been on windfall sites. It is anticipated that 1,416 units will be developed on windfall sites in the Scottish Borders during 2019/20 and 2030/31.

TABLE 9: WINDFALL COMPLETIONS (2015 TO 2019 HLA)

	2015	2016	2017	2018	2019	5 YEAR AVERAGE
Total number of completions	272	373	250	222	345	292
Number of completions on windfall sites	101	76	121	84	115	99
% of completions from windfall sites	37%	20%	48%	38%	33%	35%

COMPLETIONS

- 4.9 Table 10 shows the number of completions in the Scottish Borders from the 2015 to 2019 HLA period. The total number of completions in the past five years has peaked at 373 in 2016, with completions lower in the following two years. The lower level of completions across the Borders since the recession is a result of stalled sites, lack of developer and mortgage finance. The completion rate rose as part of the 2019 HLA, however it should be noted that a large number of these completions were for affordable units. Overall, the average rate of completions over the previous five years was 292 units.

TABLE 10: COMPLETIONS (2015 TO 2019 HLA)

	2015	2016	2017	2018	2019	5 YEAR AVERAGE
Total number of completions	272	373	250	222	345	292

5. NEW ALLOCATIONS WITHIN THE PLAN

5.1 The LDP2 includes a number of new allocations for housing and mixed use, which have indicative site capacities. Table 11 outlines the additional sites included within the LDP2. All of the sites are allocated for housing, with the exception of one mixed use allocation in Innerleithen. The new sites provide additional flexibility within the LDP and have been through a detailed site assessment process. The table outlines that 567 additional units are being brought forward as part of the LDP2.

TABLE 11: NEW SITES ALLOCATED IN THE LOCAL DEVELOPMENT PLAN

SETTLEMENT	SITE CODE	SITE NAME	PROPOSED USE	INDICATIVE SITE CAPACITY
Coldstream	ACOLD014	Hillview North (Phase 2)	Housing	100
Darnick	ADARN005	Land South of Darnlee	Housing	10
Eddleston	AEDDL010	Land South of Cemetery	Housing	30
Galashiels	AGALA029	Netherbarns	Housing	45
Gordon	AGORD004	Land at Eden Road	Housing	25
Grantshouse	AGRAN004	Land North of Mansefield	Housing	8
Greenlaw	AGREE009	Poultry Farm	Housing	38*
Hawick	AHAWI027	Burnfoot (Phase 1)	Housing	60
Innerleithen	MINNE003	Land West of Innerleithen	Mixed Use	50
Jedburgh	AJEDB018	Land East of Howdenburn Court II	Housing	20
Melrose	AMELR013	Harmony Hall Gardens	Housing	5
Oxton	AOXT0010	Deanfoot Road North	Housing	30
Peebles	APEEB056	Land South of Chapelhill Farm	Housing	150
Reston	AREST005	Land East of West Reston	Housing	5
Selkirk	ASELK040	Philiphaugh Mill	Housing	19
Westruther	AWESR002	Edgar Road	Housing	10
TOTAL				567*

*AGREE009 cannot be counted in the total additional units above. The units are already included within the 2019 HLA as a windfall approval.

5.2 It should be noted that the housing allocation (AGREE009) has planning consent for housing. The site is included within the 2019 HLA established housing land supply, as a windfall development for 38 units. Therefore, the indicative site capacity for (AGREE009) cannot be counted as part of the new allocations being taken forward within the LDP, to avoid double counting.

6. REMOVAL OF SITES WITHIN THE PLAN

- 6.1 There are six sites being removed from the LDP, totalling 108 units. Table 12 outlines the housing, mixed use and redevelopment allocations which have been removed and are not being carried forward into the Plan. It should be noted that the allocation (MGREE001) is being taken forward as a business and industrial allocation within the Plan.

TABLE 12: SITES TO BE REMOVED FROM LDP2

SETTLEMENT	PROPOSED USE	SITE REFERENCE	SITE NAME	INDICATIVE SITE CAPACITY
Chesters	Housing	RC2B	Roundabout Farm	5
Earlston	Housing	EEA12B	Earlston Glebe	25
Eyemouth	Housing	BEY1	Barefoots	20
Greenlaw	Mixed Use	MGREE001	South of Edinburgh Road	6
Lilliesleaf	Housing	EL16B	Mueslie Drive	7
Preston	Redevelopment	zR016	Preston Farm	45
TOTAL				108

7. FLEXIBILITY

- 7.1 There is the potential for further flexibility through the allocation of redevelopment and mixed use sites, which do not have an indicative site capacity.
- 7.2 Additional sites are identified within the LDP for potential longer term housing and mixed use development. However, these allocations do not include an indicative site capacity and for the reasons set out within this appendix, are not considered necessary as a contribution towards housing land supply during the period of this Plan. Within this LDP, there is an additional longer term mixed use site identified at Cardrona.
- 7.3 The Housing Technical Note contains the background context to the distribution of housing throughout the Scottish Borders.

PART B: MONITORING THE EFFECTIVE SUPPLY

8. MONITORING THE FIVE YEAR EFFECTIVE HOUSING LAND SUPPLY

- 8.1 Scottish Planning Policy (SPP) sets out national policy in relation to enabling the delivery of new homes. SPP requires Councils to identify a generous supply of land for housing within all housing market areas, across a range of tenures, maintaining a 5 year supply of effective housing land at all times. Planning Authorities are required to prepare an annual housing land audit as a tool to critically review and monitor the availability of effective housing land, the progress of sites through the planning process and housing completions. This is to ensure that a generous supply of land for house building is maintained and there is always enough effective land for at least 5 years.
- 8.2 Effectiveness in relation to the Plan and to the 5 year effective supply can be described as follows;
- In relation to development planning the requirement is that over the plan period there should be a 5 year effective land supply. This would allow currently constrained sites to be brought into the effective supply over the period subject to meeting the effectiveness criteria.
 - In relation to maintaining the 5 year effective supply, this relies upon an annual monitor through the housing land audit to ensure that the 5 year supply is maintained. The requirement is that a site is considered effective where it can be demonstrated that it will be free of constraints within 5 years, and can be developed for housing.
- 8.3 The continued availability of land to meet prospective demand is monitored on an annual basis by the Council's Housing Land Audit (HLA). Likely actual demand is illustrated by the performance of the development industry over the previous 5 year period as required by SPP (particularly where there is a substantial land supply of available land). This is measured by actual completions and is the most appropriate measure of market performance. Therefore, there is a clear distinction between providing land to meet the theoretical requirement, and ensuring the presence of a 5 year effective supply to meet prospective market demand.
- 8.4 The outputs from the 2019 HLA are set out in Table 13 below for the Scottish Borders and for its constituent HMA's.

TABLE 13: SCOTTISH BORDERS HOUSING LAND AUDIT 2019

HMA	ESTABLISHED SUPPLY	CONSTRAINED SUPPLY	EFFECTIVE SUPPLY (YRS 1-5)	POTENTIALLY EFFECTIVE SUPPLY (YRS 6-7)	POST YEAR 7 SUPPLY	COMPLETIONS
Berwickshire	2,120	177	955	458	530	67
Central	5,617	1,096	2,046	1,188	1,287	208
Northern	1,326	30	608	262	426	66
Southern	113	0	70	37	6	4
TOTAL	9,176	1,303	3,679	1,945	2,249	345

- 8.5 In recent years since the recession, completions have been low within the Scottish Borders. Table 14 set out the market performance over the past five years; the average rate of completions during this period is 292 units per annum.

TABLE 14: 5 YEAR HOUSING COMPLETIONS

HMA	2015	2016	2017	2018	2019	TOTAL
Berwickshire	55	89	31	64	67	306
Central	143	162	169	98	208	780
Northern	71	120	44	59	66	360
Southern	3	2	6	1	4	16
TOTAL	272	373	250	222	345	1,462

SCOTTISH BORDERS COUNCIL PROPOSED LOCAL DEVELOPMENT PLAN 2020

APPENDIX 3

PLANNING GUIDANCE AND STANDARDS

SUPPLEMENTARY GUIDANCE AND SUPPLEMENTARY PLANNING GUIDANCE

This section of the Proposed Plan sets out the Council's proposals for preparing Supplementary Planning Guidance (SPG) and Planning Briefs within the Local Development Plan (LDP) period, it also makes reference to existing SPGs, Supplementary Guidance (SG) and Planning Briefs. Due a reduction in staff resources and competing workloads, regrettably some of the proposed SPGs and Planning Briefs to be carried out as stated within the adopted LDP 2016 have not been possible. Consequently the proposals detailed within this section of the Proposed LDP are considered priorities which can be realistically achieved. These documents, once approved, will become considerations in the determination of planning applications.

PROPOSED/ UPDATED SUPPLEMENTARY PLANNING GUIDANCE

- Affordable Housing
- Biodiversity
- Countryside Around Towns
- Dark Skies*
- Development Contributions (subject to periodic update)
- Green Networks
- Greenspace
- Historic Environment
- Landscape and Development
- Local Biodiversity Sites
- Local Geodiversity Sites
- Minerals
- New Housing in the Borders Countryside
- Placemaking and Design (inc. privacy and sunlight and alterations and extensions for Householders)
- Planning for Particular Needs Housing
- Sustainability and Climate Change
- Trees and Development
- Tweedbank Vision for Growth and Sustainability, A Community for the Future (Lowood)

* Communities in the southern part of the region are pursuing a Dark Skies Project. When a Dark Sky area is identified and designated the Council would then get involved via the preparation of a Supplementary Planning Guidance. In essence this would confirm the extent of the area designated, what the designation would mean in practice from a planning policy perspective and what consequent controls would be laid down.

CRITERIA FOR PRIORITISING SUPPLEMENTARY PLANNING GUIDANCE

The updating of existing guidance and the formulation of new Supplementary Planning Guidance will be prioritised using the following criteria:

- Requirement to assist development control decision-making
- Adequacy of existing policy framework
- Date of existing guidance
- Resources required – specialist staff and other Departmental priorities
- Speed of preparation
- Political pressure
- Government guidance

The guidance listed above will be reviewed and updated over the Local Development Plan period. Any such reviews will be the subject of consultation, with reference to Councillors, Community Councils, relevant interest groups and the public.

PLANNING BRIEFS

The preparation of Planning Briefs for substantial land allocations is proposed to assist development of key sites brought forward in the Local Development Plan. Briefs indicate how sites are to be laid out, including arrangements for access, and provide guidance on any special considerations with regard to design and environmental constraints. They also provide an indication as to whether developer contributions will be required for the development. Contributions may be requested towards the provision, improvement and maintenance of infrastructure, services and facilities in the Scottish Borders in accordance with Policy IS2. Further detail on developer contributions can be found in the Council's Supplementary Planning Guidance on Development Contributions, Planning Briefs and in the individual settlement profiles within the Local Development Plan.

It is intended that Planning Briefs will be prepared for the following sites:

HOUSING SITES

SETTLEMENT	SITE CODE	SITE NAME
Coldstream	ACOLD011/ ACOLD014	Hillview North (Phases 1 and 2)
Darnick	ADARN005	Land South of Darnlee
Hawick	AHAWI027	Burnfoot (Phase 1)
Innerleithen	AINNE004	Kirklands/ Willowbank II
Kelso	AKELS026	Nethershot (Phase 2)
Peebles	APEEB056	Land South of Chapelhill Farm
Peebles	APEEB044	Rosetta Road (Should the planning consent not be implemented)
Walkerburn	TW200/ AWALK005	Caberston Farm Land/ Caberston Farm Land II

BUSINESS AND INDUSTRIAL SITES

SETTLEMENT	SITE CODE	SITE NAME
Coldstream	BCOLD001	Lennel Mount North
Earlston	BEARL002	Townhead
Hawick	BHAWI001/ BHAWI002/ BHAWI004	North West Burnfoot, Gala Law North and Land to South of Burnhead
Newtown St Boswells	BNEWT001	Tweed Horizons Expansion

MIXED USE SITES

SETTLEMENT	SITE CODE	SITE NAME
Innerleithen	MINNE003	Land West of Innerleithen

REDEVELOPMENT SITES

SETTLEMENT	SITE CODE	SITE NAME
Walkerburn	zR200	Caberston Farm/ Old Mill Site

LONGER TERM SITES

SETTLEMENT	SITE CODE	SITE NAME
Kelso	SKELS005	Hendersyde
Kelso	SKELS024	Nethershot

MASTERPLANS

The Proposed Plan identifies a number of allocated and longer term sites, where a site requirement requests that a Masterplan is undertaken. These are outlined in the table below:

SETTLEMENT	SITE CODE	SITE NAME	
Cardrona	SCARD002	Land at Nether Horsburgh	Longer Term Mixed Use
Duns	SDUNS001	South of Earlsmeadow	Longer Term Mixed Use
Earlston	AEARL010 / AEARL011 / SEARL006	East Turfford / Georgefield Site / Georgefield East	Housing & Longer Term Mixed Use
Galashiels	SGALA005 / SGALA016	Hollybush Valley	Longer Term Mixed Use
Galashiels	AGALA029	Netherbarns	Housing
Greenlaw	SGREE003	Halliburton Road	Longer Term Housing
Innerleithen	SINNE001	Kirklands II	Longer Term Housing
Newtown St Boswells	ANEWT005	Newtown Expansion Area	Housing
Peebles	SPEEB003 / SPEEB004 / SPEEB005	South West of Whitehaugh / North West of Hogbridge / Peebles East (South of the River)	Longer Term Housing and Mixed Use
Reston	N/A	Overall Masterplan for Reston	N/A

APPENDIX A: SUPPLEMENTARY PLANNING GUIDANCE AND PLANNING BRIEFS

The following supplementary planning guidance is available to assist in determining planning applications as a complement to Local Plan policies and national policy and guidance.

EXISTING SUPPLEMENTARY PLANNING GUIDANCE (SPG)

TITLE	APPROVED
Sustainable Urban Drainage Systems	At Consultation
Landscape Capacity and Cumulative Impact Study	2016
Landscape and Visual Guidance on Single and small Groups of Wind Turbines in Berwickshire	2015
Replacement Windows and Doors	2015
Development Contributions	2013
Local Landscape Designations	2012
Scottish Borders Woodland Strategy	2005
Scottish Borders Woodland Strategy Technical Note	2012
Shop Fronts and Shop Signage	2011
Affordable Housing	2011
Countryside Around Towns	2011
Placemaking and Design	2010
Green Space	2009
Use of Timber in Sustainable Construction	2009
New Housing in the Borders Countryside	2008
Landscape and Development	2008
Trees and Development	2008
Designing out Crime in the Scottish Borders	2007
Smoking Shelters and Awnings	2006
Privacy and Sunlight Guide	2006
Biodiversity	2005
Visibility Mapping for Windfarm Development	2003
Contaminated Land Inspection Strategy	2001
Local Biodiversity Action Plan: Biodiversity in the Scottish Borders	2001
Snack Bar Operation	-

EXISTING SUPPLEMENTARY GUIDANCE (SG)

The existing Supplementary Guidance detailed below will be carried forward into the new LDP as Supplementary Planning Guidance.

TITLE	APPROVED
Renewable Energy	2018
Local Biodiversity Action Plan (Draft)	2018
Central Borders Business Park SG/SPZ	2017
Housing (sites are now formal allocations within the Local Development Plan)	2017
Planning Brief – East Maxton, Maxton	2016
Planning Brief – Hendersyde, Kelso	2016
Glentress Masterplan	2016
Waste Management	2015

EXISTING PLANNING BRIEFS

The existing briefs will also be a material consideration in determining planning applications and will guide consideration of any conditions or agreements. The following briefs in the form of Supplementary Planning Guidance/ Supplementary Guidance have been prepared, where sites have been developed, these have been removed from the list:

- Auction Mart Site, Newtown St Boswells
- Berrywell East, Duns
- Bogangreen, Coldingham
- Borders College, Galashiels
- Buckholm Corner, Galashiels
- Burgh Yard, Galashiels
- Burnside, Eddleston
- Caerlee Mill, Innerleithen
- Clovenfords West, Clovenfords
- Commercial Road, Hawick (Development Framework)
- Crotchetknowe, Galashiels
- Crumhaughill, Hawick
- Denholm Hall Farm East, Denholm
- Duns Primary School, Duns
- Earlston High School, Earlston
- Easter Langlee, Galashiels
- East Maxton, Maxton
- Ettrick (Hopehouse)
- Forest Hill, Galashiels
- Former Eyemouth High School, Eyemouth
- Former Royal Hotel, Stow
- Gala Law, Hawick
- Gunsgreenhill, Eyemouth
- Hendersyde, Kelso
- Howden Drive, Jedburgh
- Kirklands, Innerleithen
- Langton Edge, Duns
- Lochend and Annefield, Jedburgh
- Lyall Terrance II, Burnmouth
- Main Street, Eccles
- Marchmont Road Greenlaw
- Netherdale Industrial Estate, Galashiels
- Newtown St Boswells (Development Framework)
- Queen Mary Site, Jedburgh
- Renwick Gardens and West Renwick Gardens, Morebattle
- Reston Auction Mart, Reston
- Sergeants Park II, Newtown St Boswells
- South Fountainhall, Fountainhall
- Stirches, Hawick
- Stirling Street Redevelopment, Galashiels
- Summerfield 1 & 2, Hawick
- The Croft, Melrose
- The Steadings Acredale Farm, Eyemouth
- Todlaw Playing Field, Duns
- Wallacenick, Kelso
- West Eildon, Eildon
- West Gavinton, Gavinton
- West of St Dunstons, Lilliesleaf
- West Paddock, Coldstream
- Whitlaw Road Industrial Estate Extension, Lauder
- Wildcat Gate South, Jedburgh

STANDARDS

PLAY SPACE

Play, both structured and informal, is a vital element for the rounded development of all children. If appropriately accommodated, quality play areas can facilitate learning, problem solving and social skill development within the fundamental premise of being both safe and fun. Investment in well planned and maintained play provision supports the key foundations of healthy lifestyles as well as the intellectual and social development of future generations of Scottish Borders residents.

The Council fully recognises the critical importance that well equipped and maintained facilities in the right locations have to fulfil these responsibilities. Specific guidance on play areas are included in the SPG on Green Space.

There is an expectation by the Council that the cost of any play provision will be met by the developer, whether that is on-site or by way of developer contributions.

TRANSPORTATION STANDARDS

The transportation standards listed below reflect the requirements at the time of publication.

Scottish Planning Policy (SPP) and PAN 75 promote the integration of land use and planning to assist in reducing the need to travel and to create favourable conditions for greater use of sustainable transport modes.

The Scottish Government publication 'Designing Streets' is a Policy Statement for street design in Scotland, the content of which is a material consideration in determining planning applications and appeals. Street design must consider place and people before the movement of vehicles and should meet the six qualities of successful places i.e. Distinctive, Safe & Pleasant, Easy to move around, Welcoming, Adaptable, and Resource efficient. Good street design should derive from an intelligent response to location rather than a rigid application of standards irrespective of local context. The SCOTS 'National Roads Development Guide' acts as a technical support for 'Designing Streets'. It is important to discuss the precise details of any proposal with the Roads Planning Service as part of the normal pre-app procedure prior to lodging a planning application. For development affecting a trunk road the proposal should be discussed at an early stage with Transport Scotland regarding standards and procedures. In general, the standards set out in the 'Design Manual for Roads and Bridges' will apply for proposals affecting trunk roads (and other principal roads) outwith settlement boundaries.

STREET LAYOUT

Street layouts should not be conceived in isolation, but as an element in the overall design of the development. 'Designing Streets' is again the policy document against which street layouts will be assessed. Innovative design to create a distinctive sense of place is encouraged as are layouts which are pedestrian and cyclist friendly. An informal system of well-connected permeable streets with natural traffic calming built in (e.g. building orientation and presence) will be the expectation for development proposals. Buildings should relate positively to the street on which they are situated. Parking should not dominate the street scene, but instead be designed sensitively as integral to other elements of the development. The Council 'Placemaking & Design SPG' highlights the strategic importance of well-designed places and sets out key placemaking objectives.

PARKING PROVISION

Scottish Planning Policy (SPP) defines maximum car parking standards for retail and business developments. It also stipulates minimum parking standards for disabled people. The Council generally supports The SEStran Parking Standards, other than for housing, which sets common standards for the partnership area that aim to provide cross regional consistency. The table that follows gives guidance on the provision of parking which the Council currently expects to be provided for all new housing development or redevelopment schemes.

General Housing	2 residents parking spaces per dwelling unit + 0.25 visitor parking spaces per dwelling unit (garages not included).
Communal Parking	1.5 to 1.75 parking spaces per dwelling unit
Town Centre Redevelopment	1 to 1.25 parking spaces per dwelling unit

Parking provision levels may be exceeded or reduced dependant on: the location, the availability of public car parking in the vicinity, non-car accessibility levels, physical constraints, and impacts on the wider road network.

It should be noted that over the lifetime of the Local Development Plan the standards may be subject to review and change.

CYCLE PARKING

Indicative cycle parking standards are given in Table 8.2 of 'Cycling by Design' (Transport Scotland 2010). For flatted developments, secure covered cycle storage provision will be expected.

TRANSPORT ASSESSMENTS AND TRAVEL PLANS FOR DEVELOPMENT SITES

Most development will have an impact on transport. Given the link between land use and transport the likely impact needs to be identified and addressed as early as possible in the planning process. Depending on the scale of development a simple Transport Statement (TS) may be all that is required while a comprehensive Transport Assessment (TA) accompanied by a supporting Travel Plan may be required for more significant travel generating development. A TA aims to provide information on how a proposed development is likely to function in transport terms with an emphasis on sustainable travel patterns. In 2012, Transport Scotland published a 'Transport Assessments Guidance' for development proposals including indicative threshold levels for the requirement for a TA to be undertaken. As a guide for housing proposals, the Council is likely to request a TS for developments consisting of 20 to 49 dwelling units and a TA for developments in excess of 49 units. Depending on site circumstances and local constraints, the Council may seek a TS or TA below these thresholds. The developer will be expected to pay for or contribute towards the cost of identified off-site roadwork required as a result of their development and/or the cumulative impact of overall development. Development which impacts on a trunk road may have different requirements for assessment of transport and developers should contact Transport Scotland for further advice.

LOCAL TRANSPORT STRATEGY

The Scottish Borders Council Local Access and Transport Strategy (LATS) was published in 2008 and is a key document for the Scottish Borders, providing a focus for transport issues throughout the Local Authority area and beyond, whilst detailing key projects and longer term aspirations. A Main Issues Report (MIR) to update the LATS was produced and consulted on in 2015 however following the public consultation period the updated LATS has not been finalised.

PRIVATE ACCESSES

A private access can serve a maximum of 5 dwelling units. This does not apply to: units consented to prior to 31 October 1984 (enactment of the 1984 Roads Scotland Act), units consented to with economic justification, or to the conversion of farm steading buildings. Other conversions will be considered on a case by case basis, depending on the consequences for the public road network.

ELECTRIC VEHICLE CHARGING POINTS

New residential development should include infrastructure to provide electric car charging points, either through electrical connections adjacent to/ within private driveways, or through infrastructure for the installation of charging points within communal car parking areas. All parking facilities within commercial developments should include the provision of charging stations for electric vehicles. It is intended that the Council will produce Supplementary Planning Guidance through the period of the LDP to establish requirements for sustainable transport. The SPG is likely to cover a range of subjects taking on board the findings of the Council's 'Sustainable Development Committee'.

SCOTTISH BORDERS COUNCIL PROPOSED LOCAL DEVELOPMENT PLAN 2020

APPENDIX 4 PUBLICITY AND CONSULTATION

SCOTTISH BORDERS LOCAL DEVELOPMENT PLAN 2 PARTICIPATION STATEMENT

1. INTRODUCTION

The Planning etc. (Scotland) Act 2006 requires local planning authorities to prepare a Local Development Plan (LDP) for their area. The LDP is one of two statutory plans which make up the Development Plan. The Scottish Borders is a part of one of the City Regions in Scotland - the Edinburgh and South East Scotland Strategic Development Plan Authority (SESplan) which is required to prepare a Strategic Development Plan.

The LDP2 will replace the current LDP that was adopted in 2016, and will continue to set out a detailed level of planning through policies and proposals to guide development within the Scottish Borders.

This document sets out how people have had the opportunity to contribute to the future development of the Scottish Borders as it relates to the LDP 2.

This Participation Statement has continually evolved through the LDP2 Process in order to capture the work that has taken place to date as well as setting out the activities to take place through the following stages. This edition of the report is being published as part of the Proposed Plan stage of the LDP.

2. COMMUNITY INVOLVEMENT IN THE LOCAL DEVELOPMENT PLAN PROCESS

WHO ARE THE CONSULTEES?

Any public consultation in relation to the LDP process seeks to involve as wide a range of parties as practical. This includes: the public sector, private sector, community groups, voluntary sector organisations and the general public.

Statutory Development Plan Consultees are consultees that the planning authority must consult with, these include: Transport Scotland, Scottish Water, Scottish Environment Protection Agency (SEPA), Scottish Natural Heritage (SNH), Historic Environment Scotland (HES), SEStran and Community Councils.

3. ENGAGEMENT ON THE PREPARATION OF THE MAIN ISSUES REPORT

The purpose of this stage of community engagement is to educate and inform stakeholders about the new LDP as well as to gauge community opinion in the course of preparing the Main Issues Report (MIR), in addition to seeking dialogue and inviting representations following the publication of the MIR. This engagement was focused on the issues under discussion and on the relevant audiences.

PLACE STANDARD TOOL WORKSHOPS

To enhance the quality of the community engagement undertaken, the Plans and Research Team of the Council worked closely with the Council's Localities Team. In doing so, they, other sections of the Council and the Community Planning Partners were able to work together and benefit from the use of the Place Standard Tool. The Place Standard Tool has been developed in partnership by Scottish Government Architecture & Place, NHS Health Scotland and Architecture & Design Scotland.

PLACE STANDARD TOOL WORKSHOPS

A series of nine drop-in workshops were organised, these commenced at 3pm and finished at 8:30pm. The workshops allowed attendees to complete the Place Standard Tool, a number of stalls were also present including one on the Local Development Plan Review. The Place Standard tool was also available to complete online.

DATE	SETTLEMENT	VENUE
22/02/2017	Newcastleton	Village Hall
27/02/2017	Eyemouth	Hippodrome
28/02/2017	Duns	Council Chamber
01/03/2017	Hawick	Town Hall
07/03/2017	Kelso	Tait Hall
08/03/2017	Peebles	Burgh Hall
09/03/2017	Selkirk	Victoria Hall
13/03/2017	Jedburgh	Town Hall
16/03/2017	Galashiels	Transport Interchange

Short and long versions of the survey were available and in total over 230 responses were received.

CONTACT WITH THE CHILDREN AND YOUNG PEOPLE

The Council are supporting a four-year partnership with PAS (Planning Aid Scotland) for the Bridging Gaps project. The project is the first of its kind in the UK and aims to equip young people with the skills and tools of how to engage with planning. The official launch of the project took place 7 March 2017 at Galashiels Academy.

REVIEW OF EXISTING ALLOCATIONS

Officers undertook a review of all existing allocations contained within the Local Development Plan 2016. The review of the existing sites was to ensure that sites that are to be carried forward into the next Local Development Plan are deliverable. If there are sites which have been in the Plan for a lengthy period of time with no realistic likelihood of them being developed then the Council must consider removing them from the Plan and replacing them with sites which are more likely to be developed. As part of that process a number of letters were sent out to landowners.

REVIEW OF ALLOCATIONS LETTERS SENT

A total of 23 letters were sent out to landowners in April 2017. Responses were received from the majority of the land owners, of which one landowner actively expressed a desire to have their site removed from the Plan.

A further eight letters were then sent to landowners who had not replied to the original letters sent in June 2017.

In lead up to the Main Issues Report, Officers made a decision on each of the respective sites as to whether they would be carried forward in to Local Development Plan 2.

PRESS RELEASE

A press release was issued announcing the commencement of the review of the Local Development Plan and informing interested parties that a 'call for sites' would be undertaken.

PRESS RELEASE ISSUED

The press release was issued on 19 June 2017. The release was placed on the Council's website and as well as being forwarded to local TV, newspaper and radio contacts amongst a number of other contacts.

NEW WEBPAGE CREATED

The Council in the preparation of the MIR created a new webpage for Local Development Plan 2 (LDP2). The webpage provided contact details for the Forward Planning Team and where further information may be sought.

WEBPAGE CREATED

The webpage has been compiled and updated as further information is being made available.
<https://www.scotborders.gov.uk/ldp2>

CALL FOR SITES LETTERS AND EMAILS

The Plans and Research team hold a large database of contacts which is continually updated and who received a letter or email informing them of the Call for Sites.

CONSULTATION LETTERS AND EMAILS SENT

Letters and emails were sent out on the 26 June 2017 notifying contacts of the Call for Sites. The closing date for the Call for Sites was 7 August 2017.

LOCALITIES MEETINGS

The Lead Officer of the Plans and Research team attended each of the Locality Committees to inform their members and the public of the current position of the review of the Local Development Plan, as well as the upcoming Pre-MIR Engagement Events.

DATE	VENUE
30/08/2017	Tweeddale Localities Committee
07/09/2017	Berwickshire Localities Committee
13/09/2017	Cheviot Localities Committee
14/09/2017	Eildon Localities Committee
19/09/2017	Teviot & Liddesdale Localities Committee

PRE – MIR ENGAGEMENT EVENTS

A series of pre-MIR engagement events were organised, these events included a number of drop-ins and workshops. The drop-ins were specifically designed to educate and inform stakeholders about the new LDP, as well as to gauge opinion. The workshops primarily focused on gauging opinion on the issues raised through the use of the place standard tool earlier in the process.

The drop-in sessions ran from 2 – 5pm and the workshops from 6 – 8pm with exception to the Newtown St Boswell workshop which was held from 2 – 4pm to allow for stakeholders and agencies to contribute to the process.

The drop-in sessions were supported by three planning officers and the workshops were facilitated by three planning officers.

DATE	SETTLEMENT	VENUE
21/09/2017	Eyemouth	Eyemouth Community Centre
26/09/2017	Kelso	Kelso Town Hall
27/09/2017	Galashiels	Tesco Foyer (Drop-in) Transport Interchange (Workshop)
28/09/2017	Peebles	Burgh Hall
03/10/2017	Hawick	Heritage Hub
05/10/2017	Duns	Duns Council Chamber
10/10/2017	Selkirk	Pop-up Shop, 1 Tower Street (Drop-in) Community Connections, Back Row (Workshop)
12/10/2017	Newtown St Boswells	Council HQ – Chamber (Workshop only)

ATTENDEE NUMBERS

The numbers of attendees at each of the drop-in and workshop events are set out below:

SETTLEMENT DROP-IN	WORKSHOP
Eyemouth Drop-in - 10	Eyemouth Workshop – 9 (including 5 reps from 4 Community Councils)
Kelso Drop-in - 7	Kelso Workshop – 3 (including 1 rep from 1 Community Council)
Galashiels Drop-in - 36	Galashiels Workshop – 13 (including 3 reps from 1 Community Council, and 2 Scottish Youth Parliament Members).
Peebles Drop-in - 15	Peebles Workshop – 11 (including 2 reps from 1 community council, 2 from Peebles Community Development Trust, and 1 rep from Peebles Civic Society).
Hawick Drop-in - 4	Hawick Workshop – 6 (including 3 reps from 1 community council).
Duns Drop-in - 9	Duns Workshop – 13 (including 9 reps from 7 Community Councils).
Selkirk Drop-in - 14	Selkirk Workshop – No attendees booked or arrived at venue, so event did not take place.
	Newtown St Boswells Workshop - 9

In addition to the organised and advertised events above, a special meeting was attended by Council Officers at West Linton on 11 October 2017. This was primarily due to concerns raised by local residents and businesses as well as local Councillors to the shortage of available employment land within the settlement and immediate area. In excess of 50 people were in attendance at the meeting.

A further meeting was also requested by Ayton Community Council for the 7 November 2017. (This request was made at an earlier workshop event). The Lead Planning Officer and a representative from the Roads Planning Team attended the Community Council meeting. The meeting primarily focused on an up-coming planning application. Approximately 25 people were in attendance during the discussion.

STALL AT BUSINESS GATEWAY BUSINESS CONFERENCE

An officer of the Plans and Research team manned a stall at the Business Gateway Business Conference at Springwood Park, Kelso on 26 October 2017. Copies of the Questionnaires were also available for distribution.

ATTENDEE NUMBERS

Approximately 10 people visited to the stall.

PRESS RELEASE

A press release was issued announcing the series of drop-in and workshops events in advance of the Pre-MIR Engagement Events.

PRESS RELEASE ISSUED

The press release was issued on 13 Sept 2017. The release was placed on the Council's website and as well as being forwarded to local TV, newspaper and radio contacts amongst a number of other contacts.

EMAIL SENT TO SBC STAFF

A communications email was sent to all Council staff on email informing them of the drop-in and workshop sessions on the Local Development Plan.

EMAIL SENT

The email was sent to all Council staff on email on the 6 October 2017 providing them with a link to where they could find out more information on the Pre-MIR Engagement Events.

POSTERS

Posters were produced and emailed to community councils for their local notice boards, and printed versions were sent to libraries and contact centres for display. Posters were also distributed to Councillors and various Council Officers for posting around their communities.

POSTERS DISTRIBUTED

Posters were distributed in advance of the Pre-MIR Engagement Events.

QUESTIONNAIRES & PLACE STANDARD TOOL

Questionnaires and the Place Standard Tool were distributed at the Pre-MIR Engagement Events for completion and return.

PLACE STANDARD TOOL RESPONSES	
Berwickshire Localities Committee	10
Cheviot Localities Committee	9
Eildon Localities Committee	25
Teviot & Liddesdale Localities Committee	31
Tweeddale Localities Committee	14

4. ENGAGEMENT ON THE MAIN ISSUES REPORT

The Main Issues Report (MIR) identifies the key areas of change that need to be addressed in the Proposed Plan. This document was subject to public consultation. It is intended that representations received during the consultation period would provide the planning authority with important views from the public and stakeholders and will assist in the preparation of the proposed plan.

WEBSITE

The Main Issues Report (MIR) is available to view on the Council's website at the following link www.scotborders.gov.uk/ldp2mir. The website contains information on the MIR consultation, what the MIR does, link to the online consultation, background documents, Interim Environment Report and Privacy Notices. The MIR was available in PDF format on the website, however if anyone requested to view a paper copy, these were made available in all libraries and contact centres.

A short link was produced and included within the letters, emails, website, Facebook notifications and posters. This enabled the public to view the consultation document and any associated background documents, including the SEA. The website is regularly updated with the progress of the MIR.

An events page was also created on the Council's website and the link was included in the Facebook notifications. The events page outlined the dates, locations and times for the drop in and workshop sessions. It also contained a link to the consultation on Citizen Space.

PAPER COPIES OF THE MAIN ISSUES REPORT AVAILABLE TO VIEW IN LIBRARIES AND COUNCIL OFFICES

A hard copy of the MIR was sent to all libraries and contact centres for public display and comment. This allowed those who prefer to view a paper copy to do so at nearby locations, without the need to travel to Council Headquarters.

ADVANCE NOTIFICATION OF MIR CONSULTATION EVENTS (COUNCILLORS AND COMMUNITY COUNCIL'S)

Emails were sent to all Community Council's and Councillors on the 26th October 2018, in advance of the Press Release, Newspaper Adverts and Letters/Emails. The email outlined the community consultation events. This provided additional time before the press release, adverts and letters/emails, for the details to be circulated within the communities.

CITIZEN SPACE (CONSULTATION ON MIR)

The consultation was made available for comment using Citizen Space at the following link www.scotborders.gov.uk/ldp2mir.

The online consultation was in the format of an electronic survey, setting out the questions contained within the Main Issues Report. Respondents could answer as many or as few questions as they wished. All the community events were also contained within the Citizen Space consultation.

There were 172 responses received via the Citizen Space consultation.

QUESTIONNAIRE (CONSULTATION ON MIR)

It is acknowledged that not everyone will have access to a computer. Therefore, a hard copy version of the MIR questions was produced for such instances.

CONSULTATION LETTERS AND EMAILS

As part of the MIR consultation, letters and emails were sent out to the following; Community Councils, Councillors, equality groups, libraries and contact centres, Government Agencies, Local Authorities, Registered Social Landlords, Local/National Developers, MP's and MSP's, members of the public on the Local Development Plan mailing list, contributors to the 'Call for Sites' process, known landowners of any sites included within the MIR, known landowners of any sites proposed for removal and known landowner of any site subject to the 'Site Review'. This ensured people were kept informed about the MIR process and how they could get involved.

Along with the consultation letters and emails, an invitation form was attached. The form outlined the workshop events and requested that anyone wishing to attend, inform the Council. This allowed the team to plan for how many people may be in attendance for each of the workshops.

FORMAL ADVERT

As required by the Town and Country Planning (Development Planning) (Scotland) Regulations 2008, the planning authority placed a formal advert in 5 local newspapers advising the public of the MIR consultation. The advert set out where and when the MIR could be viewed, a brief description of the content and purpose of the document, details of how further information may be obtained, details of the drop-in sessions/ workshop locations, dates and times, a statement of how representations can be made, and how, to whom and by when they should be made.

Adverts were placed in the following newspapers; Berwickshire News, Hawick Paper, Peeblesshire News, Southern Reporter and the Borders Telegraph, between the 8th and 14th November 2018.

PRESS RELEASE IN ADVANCE OF CONSULTATION PERIOD

A press release was issued on Monday 29th October, which announced the production and consultation period for the MIR. The press release was placed on the Council's website as well as being forwarded to local TV, newspaper and radio contacts amongst a number of other contacts.

PRESENTATION ON MAIN ISSUES REPORT

Prior to the formal MIR consultation, two presentations were arranged internally within Scottish Borders Council. The first presentation was on the 14th August to internal colleagues within Scottish Borders Council, many of whom had been involved in the consultation process in the production of the MIR. This allowed everyone to be well informed prior to the MIR consultation commencing.

The second presentation was on the 15th August to all Elected Members at Scottish Borders Council. This presentation informed Elected Members as to the contents of the MIR and ensured that they were well informed and kept up to date, prior to the start of the consultation.

SERIES OF MAIN ISSUES REPORT DROP-IN SESSIONS AND WORKSHOPS

A series of Main Issues Report afternoon drop-in sessions and evening workshops took place in the Borders main towns allowing for the public and other interested parties to find out more about the Main Issues Report.

SERIES OF MAIN ISSUES REPORT DROP-IN SESSIONS AND WORKSHOPS UNDERTAKEN:

Main Issues Report exhibitions were arranged at:

DATE	SETTLEMENT	TIME
13 Nov	Newcastleton Village Hall	2-6pm (drop in session)
15 Nov	Sainsbury's Kelso	2-5pm (drop in session)
15 Nov	Kelso Town Hall	6-8pm (workshop)
19 Nov	1 Tower Street, Selkirk	2-5.30pm (drop in session)
21 Nov	Co-op Eyemouth	2-5pm (drop in session)
21 Nov	Eyemouth Community Centre	6-8pm (workshop)
26 Nov	Burgh Hall, Peebles	2-5pm (drop in session)
26 Nov	Burgh Hall, Peebles	6-8pm (workshop)
27 Nov	Council Chambers, Duns	2-5pm (drop in session)
27 Nov	Council Chambers, Duns	6-8pm (workshop)
28 Nov	Village Centre, West Linton	2-6pm (drop in session)
29 Nov	Tesco, Galashiels	2-5pm (drop in session)
29 Nov	Galashiels Transport Interchange	6-8pm (workshop)
12 Dec	Council Chamber, Newtown St Boswells	6-8pm (workshop)
13 Dec	Morrisons, Hawick	2-5pm (drop in session)
13 Dec	Heritage Hub, Hawick	6-8pm (workshop)

A series of nine drop down banners were produced for the drop-in and workshop sessions. The banners contained key information and outlined the main issues. The purpose was to get the public interested and interacted with the MIR.

As part of the evening workshop sessions, a presentation was undertaken outlining the main issues and proposals within that area. This provided a basis for further more in depth discussions and more focused questions after the presentations. Some of the workshops had a slightly different format depending on the number of attendees and points of interest raised.

The attendance varied throughout the venues and is outlined below. It should be noted that in a few instances some people did not sign the sheet, when it was particularly busy, more so in the case of the Peebles drop in and evening workshop.

VENUE	ATTENDANCE
Newcastleton Village Hall (Drop In)	22
Sainsbury's, Kelso (Drop In)	25
Kelso Town Hall (Workshop)	4
Selkirk (Drop In)	13
Co-op, Eyemouth (Drop In)	14
Eyemouth Community Centre (Workshop)	7
Burgh Hall, Peebles (Drop In)	54
Burgh Hall, Peebles (Workshop)	46
Council Chambers, Duns (Drop In)	4
Council Chambers, Duns (Workshop)	0
Village Centre, West Linton (Drop In)	16
Tesco, Galashiels (Drop In)	24
Galashiels Transport Interchange (Workshop)	9
Council Chamber, Newtown St Boswells (Workshop)	7
Morrisons, Hawick (Drop In)	11
Heritage Hub, Hawick (Workshop)	3

SOCIAL MEDIA PLAN

A social media plan was produced for the Facebook and twitter notifications, which were sent throughout the duration of the consultation process. This included Facebook notifications, outlining each of the community engagement events at the start of the MIR consultation process and again just before each of the engagement events. This ensured that the public were well informed about the details of the drop in sessions and workshops throughout the Scottish Borders.

SANDWICH BOARD POSTERS

As part of the drop in sessions a sandwich board was displayed outside or close to the venue. The purpose was to attract members of the public and those passing to come into the consultation event.

POSTER

A poster was produced setting out the event details, including the drop-in and workshop sessions, dates, locations and times. The poster was circulated to all Community Councils and it was requested that the poster be displayed within the community. This provided an additional means of communication and advertising the engagement events.

POST CARDS

As part of the MIR consultation process, post card leaflets were produced and handed out at the drop in and workshop sessions. These contained details of how people could take part in the consultation and contact details.

CONSULTATION RESPONSES

A total of 330 consultation responses were received in response to the Main Issues Report public consultation. (It should be noted that this number includes those responses received via Citizen Space).

5. ENGAGEMENT ON THE PROPOSED PLAN

On production of the Proposed Plan there is a further (six week minimum) period of final objection. Neighbours significantly affected by the proposed Local Development Plan and those who have made previous representations will be notified directly by the planning authority to ensure they are aware of the proposals.

WEBSITE

The Council in production of the Proposed Plan will provide information on the LDP page of the Council's website and links to where the Proposed Plan can be viewed online.

The webpage will also provide contact details for the Plans and Research Team where further information may be sought.

CONSULTATION LETTERS AND EMAILS

All those included within the Plans and Research database will receive a letter or email informing them of the publication of the Proposed Plan and where copies can be obtained or viewed for example at libraries, online or in the Planning Department.

All community councils, Scottish Government, agencies, local councillors and MSPs and MPs covering the Scottish Borders will receive a copy of the Proposed Plan.

NEIGHBOUR NOTIFICATION

As a statutory obligation at this stage of the Plan Process, Neighbour Notification Letters will be sent out to those who are neighbours of potential employment, housing, or regeneration sites.

Neighbour notification letters will be sent out to those who hold a property next to land being proposed for development. This is a mandatory requirement for councils at the Proposed Plan stage. NB: Only those within a 20m radius of the perimeter of these sites will receive notification. Another set of letters will also be sent out to residential institutions such as sheltered accommodation and student accommodation.

FORMAL ADVERT

As required by the Town and Country Planning (Development Planning) (Scotland) Regulations 2008, the planning authority placed a formal notice in one or more local newspapers advising the public of the production of and Representation Period of the Proposed Local Development Plan. The advert set out where and when the Proposed Plan could be viewed; a brief description of the content and purpose of the document; details of how further information may be obtained; and a statement that representations may be made, and how, to whom and by when they should be made.

PRESS RELEASE AND AWARENESS-RAISING PUBLICITY

A press release will be issued announcing the production of the Proposed Plan and a period of representations. In addition, it is intended that the Council will undertake other awareness-raising publicity at this stage of the Local Development Plan Process.

PAPER COPIES OF THE PROPOSED PLAN AVAILABLE TO VIEW IN LIBRARIES AND COUNCIL OFFICES

Paper copies of the Proposed Plan will be placed in all libraries and Council Offices. This will allow for those who prefer to view a paper copy of the document to do so at a nearby location without the necessity to travel to Council Headquarters.

TRANSLATION OF KEY DOCUMENTS

On request, the Council will make translations of key documents into the main community languages.

6. DEVELOPMENT PLAN EXAMINATION

Where objections/unresolved issues to the proposed plan have not been withdrawn or resolved, an independent Development Plan Examination will be held by the Scottish Government's Directorate for Planning and Environmental Appeals (DPEA). The arrangements for the Examination will be made by the DPEA.

7. FOLLOWING THE LOCAL DEVELOPMENT PLAN EXAMINATION

On receipt of the Local Development Plan Examination Reporters' Recommendations, the Council will:

- make the recommended modifications
- publish the proposed modified plan
- advertise intention to adopt
- notify interested parties the Local Development Plan has been published and can be viewed
- send (a) copy of the modifications to Ministers and (b) statement regarding any modifications not accepted; (c) the proposed plan as modified.

8. COURT OF SESSION CHALLENGE

The final stage of the process if acted on by an aggrieved party is the provision in the Planning etc. (Scotland) Act 2006 to challenge the Scottish Ministers' decision to direct the planning authority to adopt the Plan.

The aggrieved person can apply to have the Court of Session quash the plan within 6 weeks of the date of the first notice of adoption of the Plan. If it can be shown that it was not within the powers of the Act to do so, or that the applicants' interests have been substantially prejudiced by failure to comply with any requirement of the Act, the court has then the powers under the Act to quash the Plan.

SCOTTISH BORDERS COUNCIL PROPOSED LOCAL DEVELOPMENT PLAN 2020

APPENDIX 5 COUNCIL OWNED SITES

The table below lists land in the ownership of Scottish Borders Council which is affected by policies and proposals for development in the Plan, as required by Section 15 (3) of Part 2 Planning etc (Scotland) Act 2006.

10. SETTLEMENT PROFILES AND MAPS	233
----------------------------------	-----

SCOTTISH BORDERS COUNCIL PROPOSED LOCAL DEVELOPMENT PLAN 2020

10. SETTLEMENT PROFILES AND MAPS

- 10.1 Volume 2 of the Proposed Local Development Plan (LDP) identifies profiles for all settlements across the Scottish Borders. At the beginning of each settlement profile symbols confirm the estimated population (taken from the 2011 census), Housing Market Area (HMA) and Locality Area which the settlement falls within.
- 10.2 The HMA references confirm which area each settlement falls within. This helps identify where more housing land requires to be allocated taking account of market interest, housing land supply and take up.
- 10.3 A series of five Area Partnerships have been set up across the Region. These have produced Locality Plans which build on the Council's Community Plan. The Locality Plans set out priorities for improving their respective areas over the next 5 years, the actions to be carried out and the commitment to work in partnership and use shared resources in the most effective way to reduce inequality. The findings of the Locality Plans are highlighted where relevant within the LDP.
- 10.4 The introductory text makes reference to placemaking considerations and where possible reference is made to any preferred areas for future expansion, key infrastructure considerations and any changing context for the development of the settlement.
- 10.5 The settlement maps identify a range of land use allocations and designations. This includes a development boundary and where relevant they identify sites for a range of uses including; housing, mixed use, business and industrial, key greenspaces to be protected, redevelopment opportunities, conservation areas and sites for longer term development. The longer term proposals are not formal allocations and may be considered for inclusion in a future Plan subject to more detailed masterplanning work. Some may be considered for bringing forward in the event of accelerated housing land development during the Plan period resulting in a housing land supply shortfall. This would be on the condition that any identified infrastructure constraint could be satisfactorily resolved.

- 10.6 Site requirements are listed for each development allocation which identify matters to be addressed at the planning application stage. Each site allocated for housing has an indicative capacity figure suggesting the number of housing units the site could accommodate. This broad figure takes account of matters such as the site area of the allocation and the densities of existing surrounding housing. However, planning applications can be submitted for schemes which, for example, may incorporate smaller units which in turn can increase the number of units on the site. This in itself does not necessarily mean the proposal could not be supported so long as other key considerations are addressed. For example, consideration must be given to the design quality of the proposal and ensuring infrastructure can accommodate any proposed extra units. Consequently the site capacity stated is indicative only and should not be taken as a definitive maximum number of units a site could accommodate.
- 10.7 For allocated mixed use sites there is a need to ensure that the proposed uses are delivered and therefore in the case of sites which include, for example, a business use element, an area of land is specifically identified for this use and cross referenced within the listed site requirements. In order to ensure the identified mixed uses are delivered, this would be addressed via the Development Contributions policy, for example, infrastructure provision.
- 10.8 In some instances site requirements identify landscaping on the maps which will be a requirement for the satisfactory implementation of the development use. These landscape areas are of an indicative scale only and will be confirmed once specific details of the proposal are submitted at the planning application stage.
- 10.9 The development of sites requires to address infrastructure issues. This can be a process with changing circumstances as infrastructure can be upgraded or reach capacity over a period of time and therefore text within the settlement profiles can be out of date within the Plan period.
- 10.10 In terms of water and drainage infrastructure, it is recommended that any potential developer contacts Scottish Water and SEPA at an early stage to ascertain any capacity issues or upgrades to be carried out in order to satisfactorily develop the site. This would include, for example matters relating to foul water disposal.
- 10.11 There may be a development contribution required to ensure that any additional burden of existing services is addressed. This could relate to a range of subjects including primary and secondary school provision. The Supplementary Planning Guidance on Developer Contributions is updated annually and can be viewed on the Council's website.

SETTLEMENT PROFILE

ALLANTON

HOUSING MARKET AREA
Berwickshire

LOCALITY
Berwickshire

POPULATION
114

PLACEMAKING CONSIDERATIONS

Allanton is located above the riverbanks of the Blackadder Water and Whiteadder Water which meet just north of the village. The character of Allanton is largely defined by the fact that it developed as an estate village of Blackadder House; splay fronted lodges display the old entrance and the village has developed around them in a linear fashion along the road.

The Conservation Area has distinctive characteristics and their retention is important when considering alterations. The uniformity resulting from use of local whin and sandstone for buildings and boundary walls, and natural slate for roofs is important.

PREFERRED AREAS FOR FUTURE EXPANSION

Development to the north and west is constrained by flood risk and the River Tweed Special Area of Conservation. Other potential constraints for village expansion are the surrounding prime agricultural land, the belt of ancient woodland to the west and the lack of services within the village.

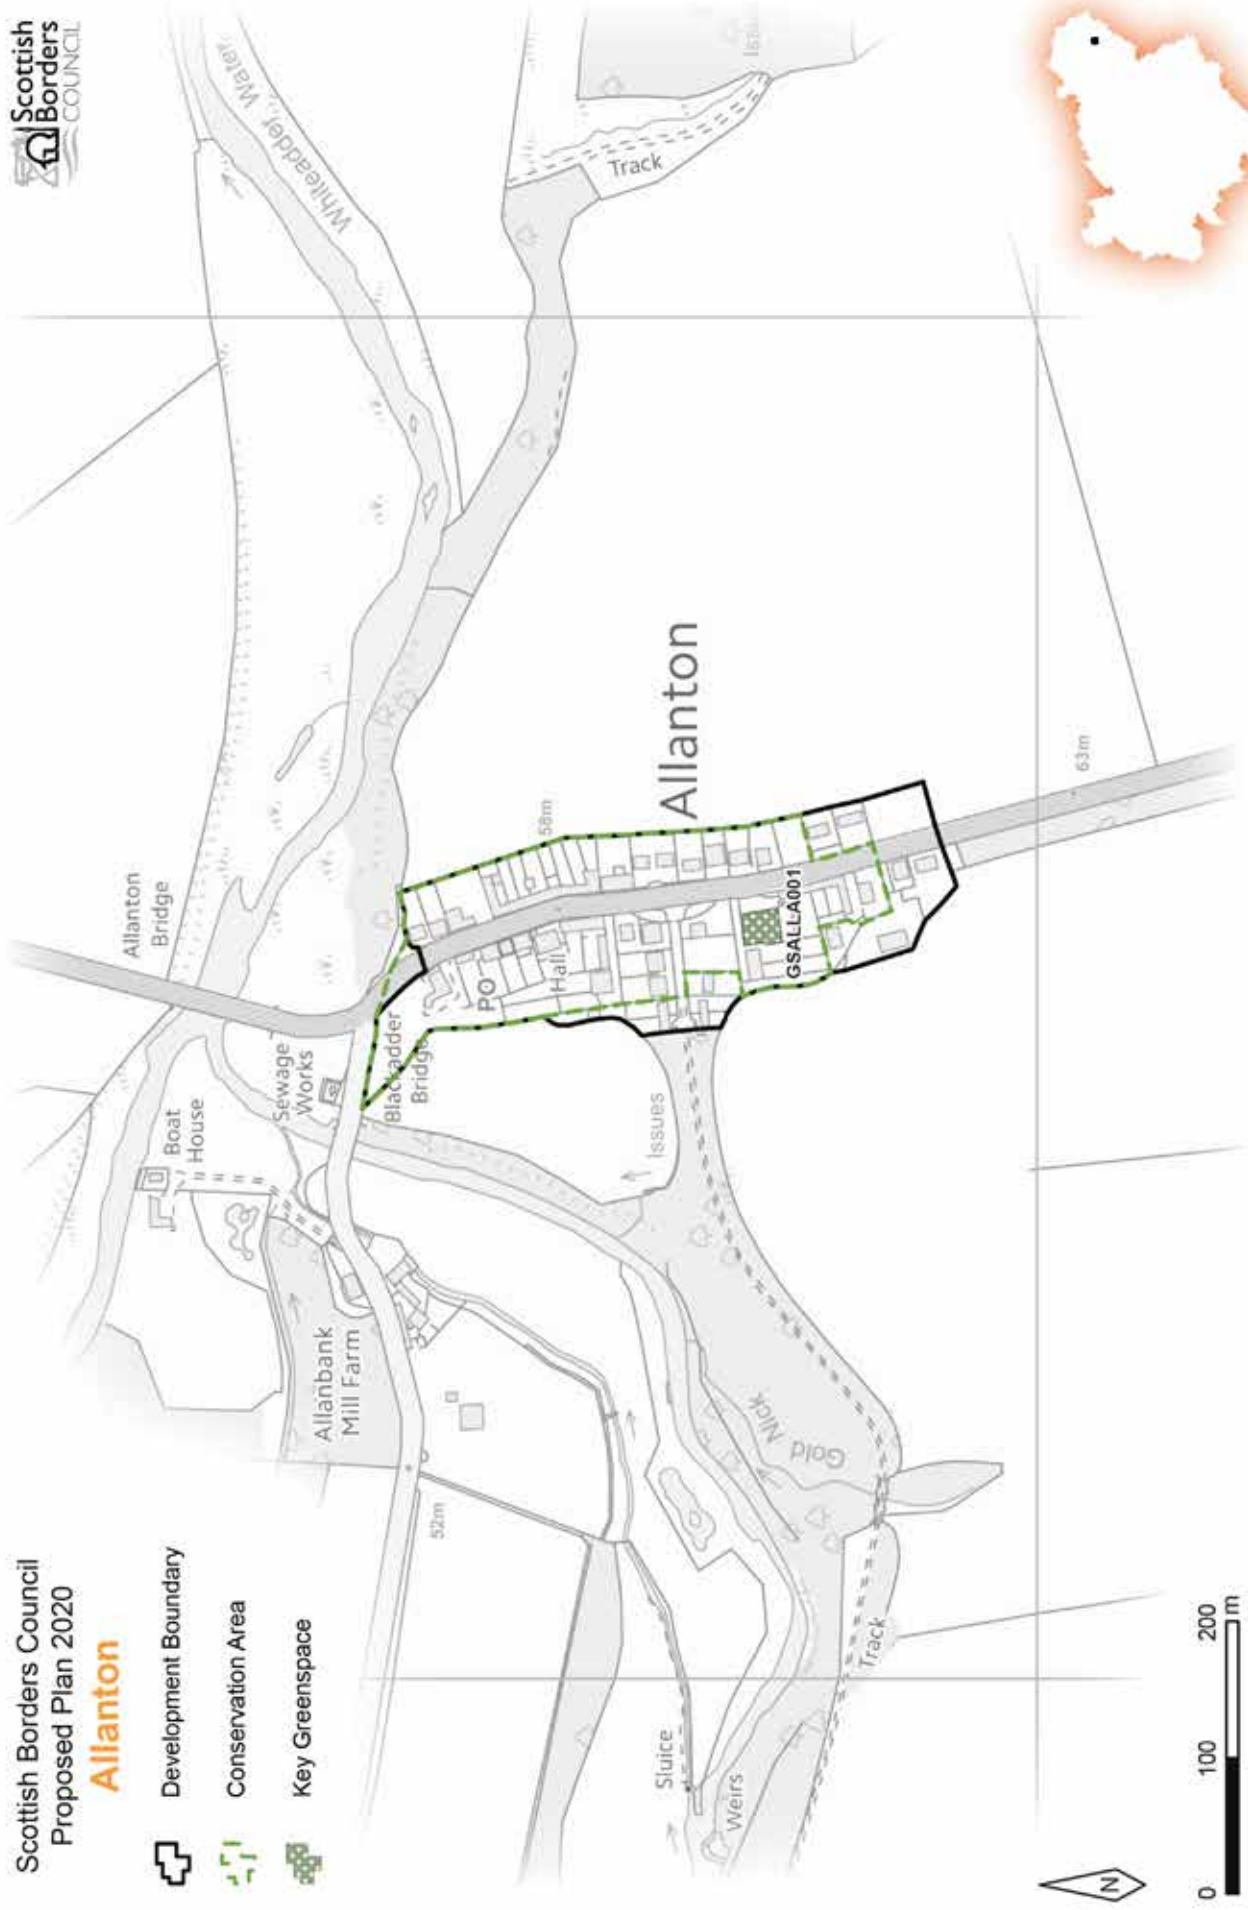

DEVELOPMENT AND SAFEGUARDING PROPOSALS

SETTLEMENT PROFILE

ANCRUM

HOUSING MARKET AREA
Central

LOCALITY
Cheviot

POPULATION
448

PLACEMAKING CONSIDERATIONS

Ancrum is contained by a bend of the Ale Water - part of the River Tweed Special Area of Conservation and a wildlife site of international importance - from which its name is derived. The Teviot Valleys Special Landscape Area surrounds the boundaries of the village. The historic core of Ancrum is characterised by its triangular centre set around a raised tree-lined village green. This part of the village is designated as a Conservation Area, and includes a group of caves on the south bank of the river. These may have been used as early as the middle of the 16th century.

The properties surrounding the historic green are mainly one and a half or two storeys in height. Of particular note are the 16th century Market Cross (a Scheduled Monument), the War Memorial, the Cross Keys Public Bar and the Parish Church. Most properties are constructed of traditional materials - predominantly sandstone, whinstone and harling walls, and slate roofs. Architectural detailing includes continuous cills at upper floors, sash and case windows, and stone cills, jambs and lintels around window and door openings. New development or alterations should respect the individual buildings and Conservation Area and designs should take account of traditional features.

Development outside the Conservation Area is mainly of semi-detached rendered houses, with the most recent expansion taking place at Myrescroft on the southern edge of the village.

The village green is identified as a key greenspace along with ground adjacent to the Church.

PREFERRED AREAS FOR FUTURE EXPANSION

The preferred areas for future expansion beyond the period of this Local Development Plan will be to the south west of Ancrum. Development to the north, north-west and east of the settlement will be resisted. The suggested area is indicative only, and will require further detailed assessment during the next Local Development Plan review.

SETTLEMENT PROFILE

ASHKIRK

HOUSING MARKET AREA
Central

LOCALITY
Eildon

POPULATION
139

PLACEMAKING CONSIDERATIONS

Ashkirk comprises two clusters of buildings separated by open farmland; one beside the A7 and the other around the church, including the mansion houses of the Woll and Ashkirk House. Separation between the two parts of the settlement is important to maintain their distinct identities. The Ale Water, which lies to the south of the settlement, is part of the River Tweed Special Area of Conservation, a wildlife site of international importance. The character of Ashkirk is established by its setting in the wooded upland fringe valley of the Ale Water.

There is one area, at the Church, identified as key greenspace.

There are some opportunities for small scale infill development within the development boundary.

KEY INFRASTRUCTURE CONSIDERATIONS

Development at risk of flooding from the Ale Water will be resisted.

DEVELOPMENT AND SAFEGUARDING PROPOSALS

SITE REFERENCE	SITE NAME	SITE SIZE (HA)	SITE CAPACITY
EA200	Cransfield	2.0	12
Site Requirements			
<ul style="list-style-type: none"> • Vehicular access from the minor road to the south of the site with the requirement for visibility improvements • Pedestrian link to be provided from site to village • Structural landscaping along the northern and western perimeter • Retain hedge along road frontage where possible and enhance landscape through planting of small trees • The design and layout of the new buildings should also take advantage of the southerly aspect of the site to make best use of the microclimate to reduce energy usage. 			

KEY GREENSPACE

SITE REFERENCE	SITE NAME	SITE SIZE (HA)
GSASHK001	Ashkirk Church	0.7

SETTLEMENT PROFILE

AYTON

HOUSING MARKET AREA
Berwickshire

LOCALITY
Berwickshire

POPULATION
535

PLACEMAKING CONSIDERATIONS

The setting of Ayton is characterised by its position within the lower Eye Water coastal valley, with the river running from the south west of the settlement. The designed landscape of Ayton Castle is a significant influence on the urban fabric. The Castle is not directly evident from the town however the planting associated with the designed landscape can be seen on its eastern edge. Ayton has developed westwards, away from the grounds of the Castle, along the High Street, and modern housing development has been built off this road and along Beanburn.

The Ayton Conservation Area is made up of historic properties on the High Street, Beanburn, Tower Road and part of The Crofts. A range of different building types can be found including detached villa style properties and properties built in rows. Any alterations or new development within the Conservation Area should seek to respect individual buildings and the wider character.

There are three housing allocations within Ayton, the most recent allocation (AAYT0004) was brought forward as part of the Housing SG.

PREFERRED AREAS FOR FUTURE EXPANSION

Ayton Castle Garden and Designed Landscape will be protected from development which constrains building to the east of Ayton. The preferred location for future development is to the north west of the settlement on the south side of the B6355. Ayton is surrounded by prime agricultural land.

DEVELOPMENT AND SAFEGUARDING PROPOSALS

HOUSING

SITE REFERENCE	SITE NAME	SITE SIZE (HA)	INDICATIVE SITE CAPACITY
AAYT0003	Lawfield	1.3	20
Site Requirements			
<ul style="list-style-type: none"> • Vehicular access from housing allocation AY1A to the south east • Provide a pedestrian/cycle link to Lawfield Drive/Primary School • Leave the possibility for future road links to land to the north west • Structure planting/landscaping should be provided to the north and west, to reinforce the settlement boundary and safeguard the amenity of adjacent houses • The long term maintenance of landscaped areas must be addressed • Archaeological evaluation and mitigation required as the site is in an archaeologically sensitive area • Evaluation and mitigation of moderate biodiversity interest, including hedgerows, breeding birds and grassland, required. The existing hedgerows should be conserved and extended • Site design should utilise the south facing aspect for energy efficiency • A flood risk assessment is required to inform the site layout, design and mitigation. 			
AY1A	Beanburn	1.5	24
Site Requirements			
<ul style="list-style-type: none"> • Vehicular access to be taken from Beanburn, extending the existing access • Provide a pedestrian/cycle link to the Primary School • Evaluation and mitigation of moderate biodiversity interest, including hedgerows, breeding birds and grassland, required. The existing hedgerows should be conserved and extended, particularly at the south western boundary • Site design should utilise the south facing aspect for energy efficiency • Respect the residential amenity of properties already on the site. 			
AAYT0004	Land North of High Street	0.7	6
Site Requirements			
<ul style="list-style-type: none"> • The adjacent watercourse should be taken into consideration in the detailed design of the site • Protection of boundary features (hedgerows and trees) where possible • Assessment of ecology impacts and provision of mitigation, as appropriate • Hedgerow and tree planting is required along the north and west boundaries, to reinforce the settlement edge • The long term maintenance of landscaped areas must be addressed • Archaeology evaluation/mitigation is required • Potential contamination on the site should be investigated and mitigated • Respect the amenity of existing neighbouring properties.

SETTLEMENT PROFILE

BIRGHAM

HOUSING MARKET AREA
Berwickshire

LOCALITY
Berwickshire

POPULATION
285

PLACEMAKING CONSIDERATIONS

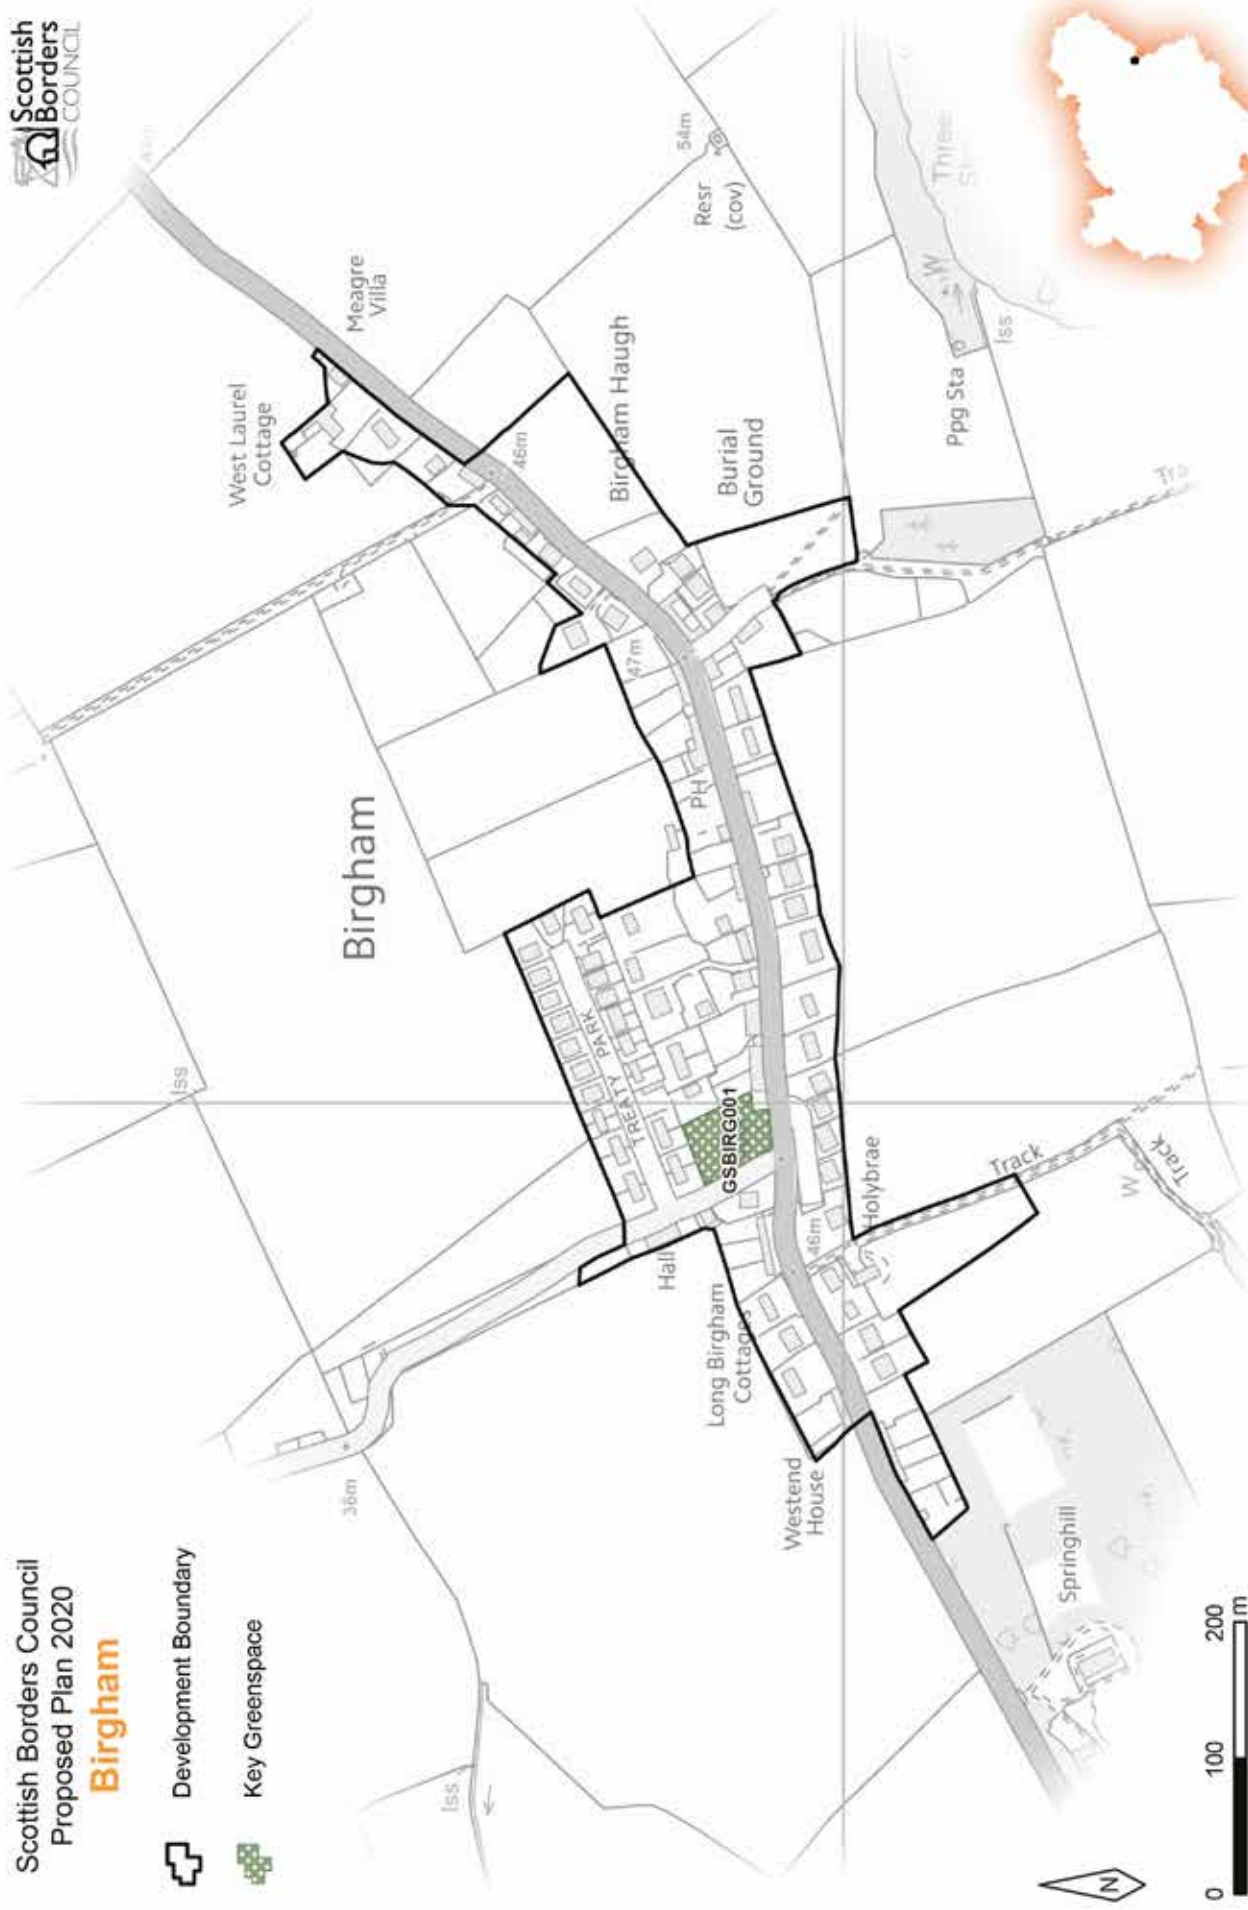

Birgham is situated within the lowlands associated with the River Tweed which flows to the south of the settlement. The village follows a largely linear form along the A698, with modern housing built at Treaty Park to the north. There has been recent housing development to the east of the village, including on the previously allocated site (ABIRG003). This site has consequently been removed from the Plan. The land surrounding Birgham is relatively flat, characterised by arable and pastoral fields, while the land slopes down to the River Tweed.

DEVELOPMENT AND SAFEGUARDING PROPOSALS

SETTLEMENT PROFILE

BLYTH BRIDGE

HOUSING MARKET AREA
Northern

LOCALITY
Tweeddale

POPULATION
145

PLACEMAKING CONSIDERATIONS

The village has expanded significantly over the past thirty years or so with the majority of properties in the village being built within that period. The original village was based around the Kirk and the Mill next to the river crossing and to the north at Blyth Farm. New development has filled in between these two areas. The most attractive feature of the village is the area around the category 'B' listed Old Mill.

The village lies at the bridging point of the Tarth Water, is south west facing, and is open to views particularly when approaching from the south west. Blyth Bridge lies on the lower slopes of the Drochill Hill range to the east and in the valley that this creates with the lower lying hill ranges on the east and north around Blyth Moor. To the south lies the Lochurd Hills beyond Kirkurd.

The area of open space to the east of the A701 provides an important setting to the village and will be protected from development.

The play park has been identified as a Key Greenspace within the Plan and will receive protection under Policy EP11 Protection of Greenspace.

PREFERRED AREAS FOR FUTURE EXPANSION

It is considered that the village is not suited to large scale development.

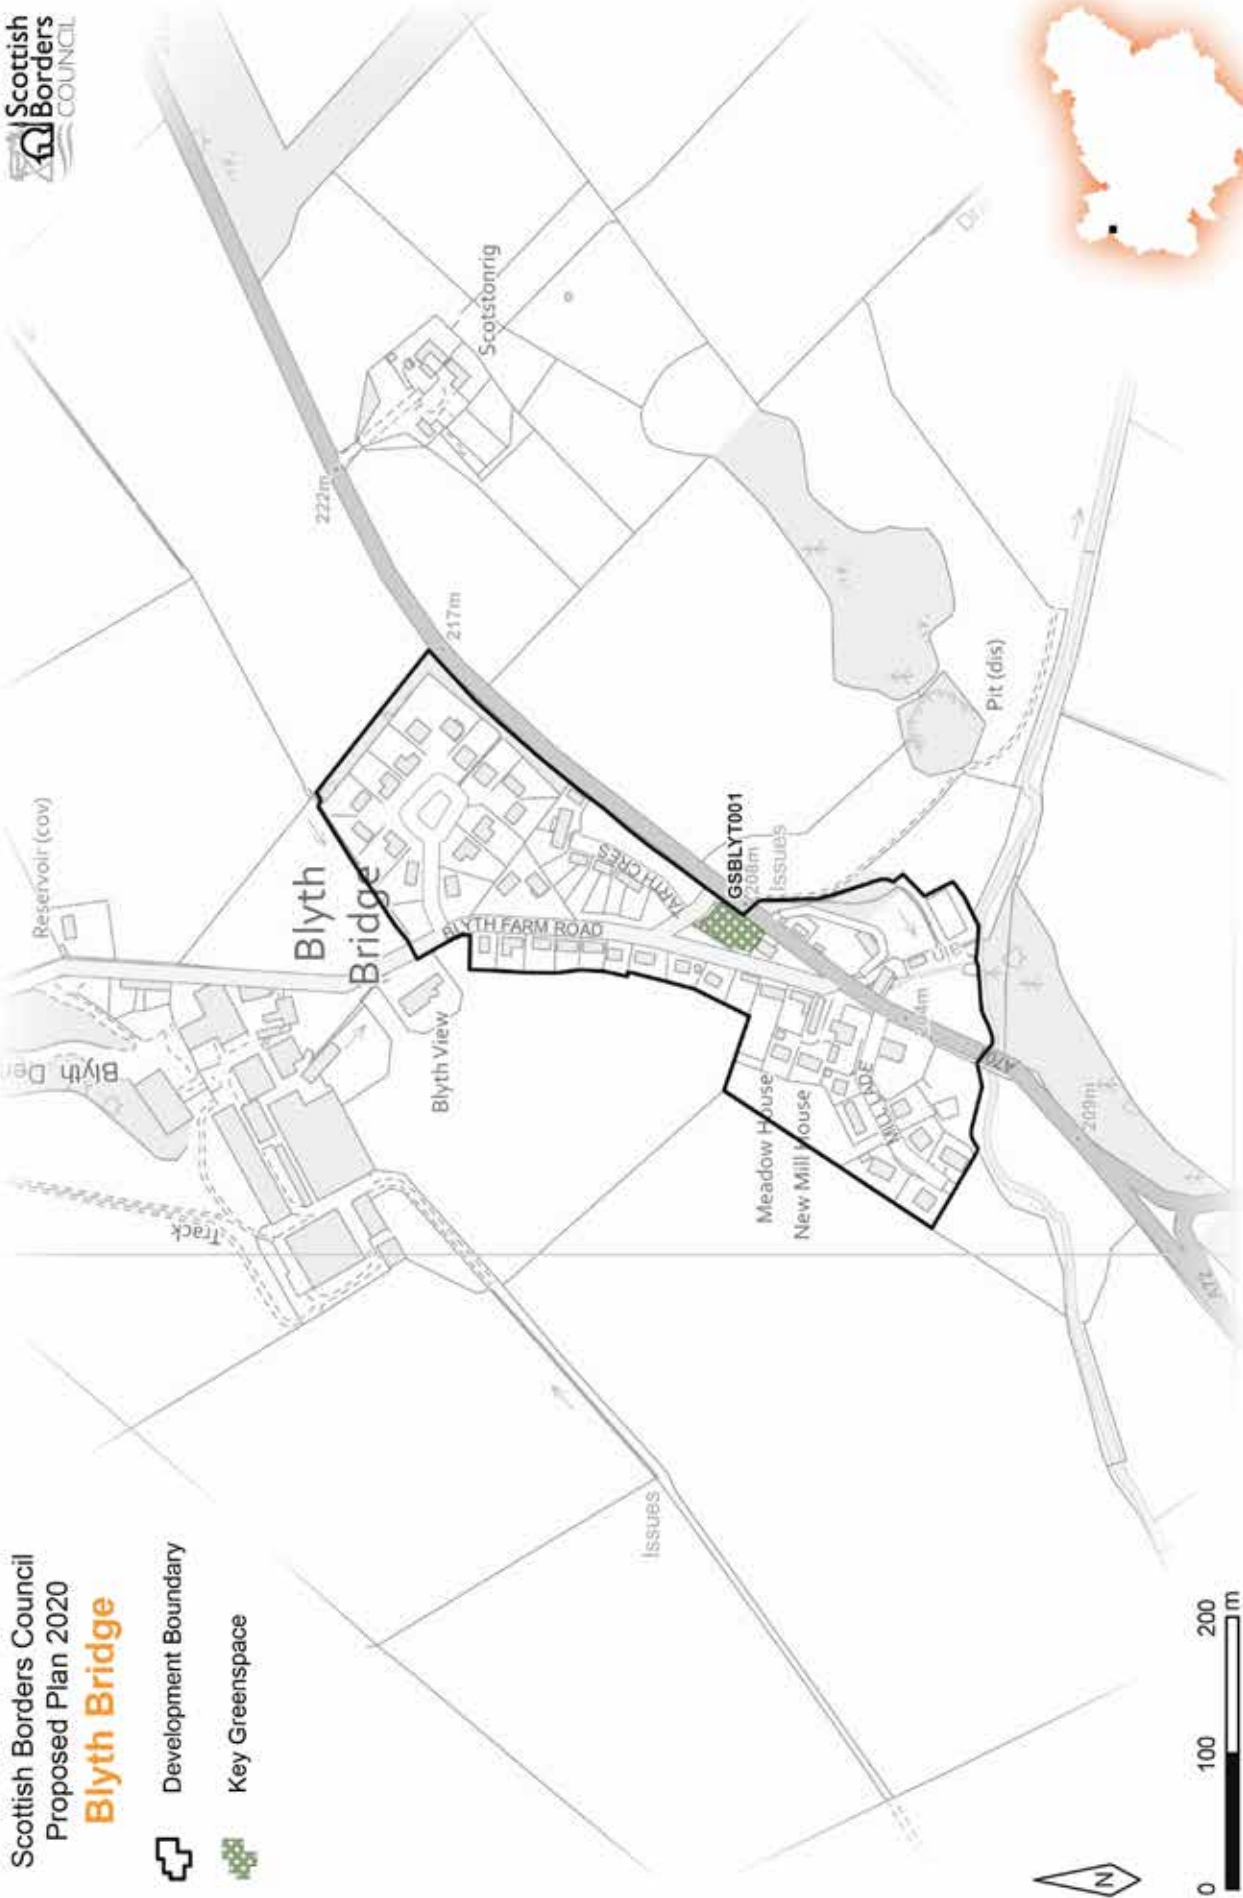

DEVELOPMENT AND SAFEGUARDING PROPOSALS

KEY GREENSPACE

SITE REFERENCE	SITE NAME	SITE SIZE (HA)
GSBLYT001	Play Area	0.1

Blyth Bridge

-  Development Boundary
-  Key Greenspace

SETTLEMENT PROFILE

BONCHESTER BRIDGE

HOUSING MARKET AREA
Central

LOCALITY
Teviot and Liddesdale

POPULATION
207

PLACEMAKING CONSIDERATIONS

The Teviot Valleys Special Landscape Area is located to the north and east of the village.

The settlement developed around the bridge crossing of the Rule Water, close to its confluence with Hob's Burn - a minor tributary from the west. It is here that the older, mainly stone buildings are found. The main expansion in recent years has taken place at the southern end of the village at Forest Road. The settlement contains a public house.

KEY INFRASTRUCTURE CONSIDERATIONS

This settlement is identified within the Council's Local Flood Risk Management Plans as being at risk of flooding. Any development proposals should therefore be subject to early consultation with the Council's Flood and Coastal Management Officer, and SEPA, having regard to SEPA's Indicative River and Coastal Flood Map (Scotland) and any other relevant flood risk information. A flood risk assessment may be required and may influence the scale and layout of any development at a particular location.

DEVELOPMENT AND SAFEGUARDING PROPOSALS

ABONC003	Site opposite Memorial Hall	1.2	8
Site Requirements			
<ul style="list-style-type: none"> Exclude steep slopes to west from developable area and plant with trees to create woodland landscape No development shall take place on the functional flood plain (small area in north west corner of site) or above existing culverts A flood risk assessment is required to inform the site layout, design and mitigation. 			

SETTLEMENT PROFILE

BOWDEN

HOUSING MARKET AREA
Central

LOCALITY
Eildon

POPULATION
294

PLACEMAKING CONSIDERATIONS

The character of Bowden stems much from its physical context - a village set around its Green. The main focus of the Conservation Area is the distinct layout centred on the aforesaid Green, single to two-storey properties, near continuous rows and high quality materials and architectural detailing. The Conservation Area of Bowden includes almost all the village, Bowden Kirk, the Mill and the Manse.

Bowden is also located in a sensitive landscape setting and is included in the Eildon and Leaderfoot National Scenic Area.

The village Green is identified as a key greenspace.

PREFERRED AREAS FOR FUTURE EXPANSION

Given the sensitivity of the character and setting of Bowden, there is limited scope for future expansion.

DEVELOPMENT AND SAFEGUARDING PROPOSALS

KEY GREENSPACE

SITE REFERENCE	SITE NAME	SITE SIZE (HA)
GSBOWD001	The Green	0.1

SETTLEMENT PROFILE

BROUGHTON

HOUSING MARKET AREA
Northern

LOCALITY
Tweeddale

POPULATION
323

PLACEMAKING CONSIDERATIONS

Broughton lies on the wide valley floor at the point where the Biggar Water and the Broughton Burn converge before issuing to the Tweed. The valley is framed by Trahenna Hill to the north east, Goseland Hill to the west and Whitslade Hill to the south. The north part of the village lies on lower lying slopes of Langlawhill. The village sits within the Upper Tweed National Scenic Area. The Borders Landscape Assessment describes the area as an “Upland Valley with Pastoral Floor” characterised by flat valley bottom pastures, strongly enclosed by steep valley side merging with heather and forest covered uplands.

The village lies on the A701 principal road and this provides the village with a direct route north to Edinburgh and south to Moffat. There are two separate parts to Broughton. The older part is known as ‘The Village’, constitutes a double line of cottages, mostly in local stone, on either side of the Moffat to Edinburgh road. The more recent part of Broughton lies to the south of the original village where the Broughton Burn joins the Biggar Water, heading towards Calzeat. Within ‘The Village’ where the properties are built tight to the back of the footpath and adjoin each other the settlement feels enclosed; whilst to the south of the settlement the properties tend to be set back from the footpath and are generally detached or semi-detached. It is also the south of the settlement that particularly benefits of the views of the surrounding landscape.

The Plan provides two housing allocations; both are located to the north east of the village. They are Dreva Road and Springwell Brae. Additionally, there is planning permission for a housing development on the western side of Dreva Road opposite the two housing allocations and the existing housing at Springwell Brae. The site extends up to the development boundary to the south of Elmsfield. The Plan also safeguards an established business and industrial site – Former Station Yard.

The playing fields to the north of the primary school provide an important recreational area for the community and will be protected.

KEY INFRASTRUCTURE CONSIDERATIONS

This settlement is identified within the Council’s Local Flood Risk Management Plans as being at risk of flooding. Any development proposals should therefore be subject to early consultation with the Council’s Flood and Coastal Management Officer, and SEPA, having regard to SEPA’s Indicative River and Coastal Flood Map (Scotland) and any other relevant flood risk information. A flood risk assessment may be required and may influence the scale and layout of any development at a particular location.

PREFERRED AREAS FOR FUTURE EXPANSION

The preferred areas for future expansion beyond this Local Development Plan will be the area to the West of the A701 at Corstane adjoining the Biggar Road. The area for future growth indicated in this profile will require detailed assessment during the next appropriate Local Development Plan Review.

SETTLEMENT PROFILE

BURNMOUTH

HOUSING MARKET AREA
Berwickshire

LOCALITY
Berwickshire

POPULATION
265

PLACEMAKING CONSIDERATIONS

Burnmouth is made up of a series of dispersed coastal settlements located on the rugged North Sea cliffs, with Partanhall, Lower Burnmouth, Cowdrait and Ross, all at sea level, and Upper Burnmouth located between the A1 and the east coast railway line. The settlement is originally based on the historic harbour set at the foot of a dramatic incline and the listed converted railway station house is located within the upper level. Other significant Listed Buildings include the post-war Council housing at the shore.

The coastline on which Burnmouth sits is part of the Berwickshire and North Northumberland Coast Special Area of Conservation and is also designated as part of the Berwickshire Coast Special Landscape Area. Any development in Burnmouth, particularly at the shore line, will need to take cognisance of the Local Development Plan (LDP) policies associated with these designations.

Burnmouth has one housing allocation located to the west of the settlement, which remains undeveloped.

PREFERRED AREAS FOR FUTURE EXPANSION

The future growth of Burnmouth is constrained for a number of reasons including, potential impact upon the character and setting of the village, existing settlement pattern, surrounding prime agricultural land and the lack of services.

SETTLEMENT PROFILE

CARDRONA

HOUSING MARKET AREA
Northern

LOCALITY
Tweeddale

POPULATION
883

PLACEMAKING CONSIDERATIONS

Cardrona is unique in the Scottish Borders in that it was a master planned new village. The village lies within the River Tweed valley and straddles both sides of the river. The village lies to the southern side of the valley and benefits from a high degree of visual enclosure from the A72. The valley is formed by the Lee Pen, Kirk Law and Lee Burn Head along the northern side of the river and Wallace Hill to the south.

Cardrona is a new village and is based around the two farms at Cardrona Mains and Horsbrugh Castle on the south and north side of the River Tweed. The village was developed as part of a tourism project comprising a hotel, golf course and village.

The village has been developed around a central village green, and is well connected with a footpath network that links the settlement through to the countryside. A landscape framework plan was developed as part of the master plan for the settlement, to take advantage of the existing plantations of coniferous woodland planted along the northern boundary of the site and that which had self-seeded along the route of the former railway line. Additional planting has been put in along the golf course that surrounds the village and also along the southern boundary to the B7062.

The Village Green is an important amenity area within the centre of the village and will therefore be protected from development.

Located outside the settlement, and set within the Tweed Valley Forest Park is Glentress. The Glentress Forest is a hub for many activities that attracts locals and visitors alike.

The Plan provides one mixed use allocation to the north west of the village. This site is identified for a mix of uses including commercial and employment.

PREFERRED AREAS FOR FUTURE EXPANSION

Once the allocated sites are fully developed the preferred area for future expansion beyond the period of this Local Development Plan will be the area at Nether Horsburgh (SCARD002).

The Nether Horsburgh longer term mixed use area will be required to be subject to further assessment as part of the next Local Development Plan Review, and will require a Masterplan to ensure a coherent and holistic approach.

DEVELOPMENT AND SAFEGUARDING PROPOSALS

MIXED USE

SITE REFERENCE	SITE NAME	SITE SIZE (HA)	INDICATIVE SITE CAPACITY
MCARD006	North of Horsbrugh Bridge	1.9	25
Site Requirements <ul style="list-style-type: none"> The site should provide for a mix of uses including commercial and employment. To ensure a holistic approach to the overall site, the Council will require a single application to cover the entire site and its proposed development A Flood Risk Assessment will be required to inform the development of the site Provision of structure planting will be required to enhance, enclose and shelter the site Mitigation measures are required to prevent any impact on the River Tweed Special Area of Conservation/Sites of Special Scientific Interest In advance of the development being occupied, connection of waste water (foul) drainage to the public sewer will be required. 			

POTENTIAL LONGER TERM MIXED USE (SUBJECT TO REVIEW)

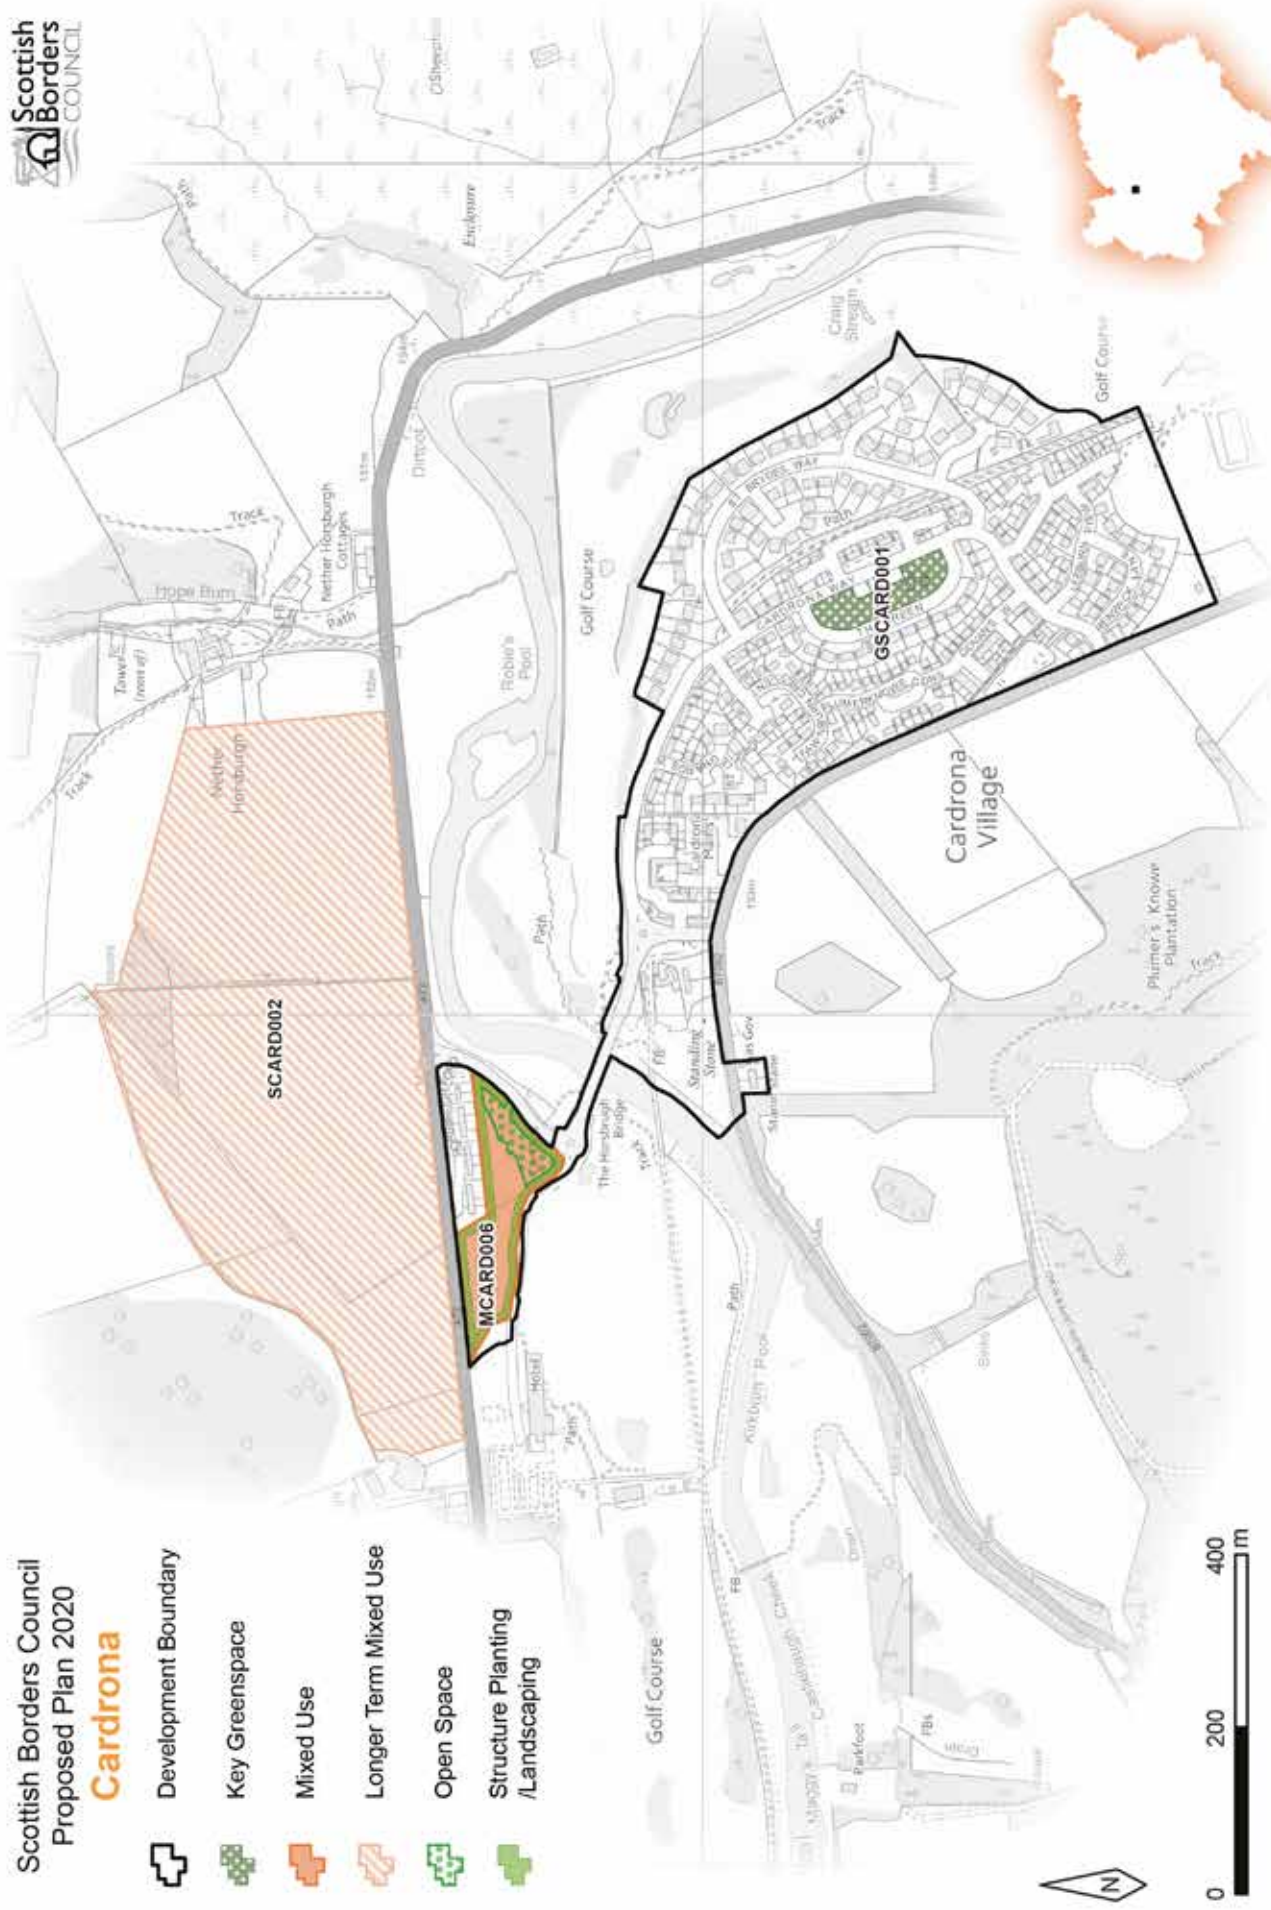

SITE REFERENCE	SITE NAME	SITE SIZE (HA)	INDICATIVE SITE CAPACITY
SCARD002	Land at Nether Horsburgh	23.8	TBC
Site Requirements <ul style="list-style-type: none"> Flood Risk Assessment required, to assess the risk from the small watercourses which flow through and adjacent to the site, as well as the River Tweed. The small watercourses running through/ alongside the development should be safeguarded and enhanced as part of any development Maintenance buffer strip of at least 6 metres must be provided between the watercourse and built development. Additional water quality buffer strips may be recommended Early engagement with Scottish Water to ascertain whether a Drainage Impact Assessment or Water Impact Assessment is required The use of SUDS at the construction phase in order that the risk of pollution during construction to the water environment is minimised Foul drainage should be connected to the Scottish Water foul network at Cardrona sewage treatment works (the site is outwith the currently sewered area) A masterplan to be prepared Transport Assessment is required for any development Consideration to re-routing part of the A72 through the site Protect existing boundary features, where possible Assessment of ecology impacts and provision of mitigation, as appropriate Mitigation to ensure no significant effect on the River Tweed Special Area of Conservation/Sites of Special Scientific Interest Detailed planting scheme required The long term maintenance of landscaped areas must be addressed The design and layout of the proposed development will require to take into account any potential for setting impacts on the Nether Horsburgh Castle Scheduled Monument Archaeology investigation/mitigation required The site must accommodate an element of business land and a potential new primary school.

SETTLEMENT PROFILE

CARLOPS

HOUSING MARKET AREA
Northern

LOCALITY
Tweeddale

POPULATION
156

PLACEMAKING CONSIDERATIONS

Carlops lies to the east of the Pentland Hills on the North Esk. The settlement Carlops was founded in 1784, when Robert Brown the Laird of Newhall established a cotton weaving industry laying out rows of weavers' cottages on either side of the main Edinburgh-Biggarr Road. A significant feature of the Village is the remains of the former quarry, in other locations it would be seen as unsightly but here it is attractive in an unusual way.

Carlops is a linear village that possesses a distinct identity and virtually the entire village sits within the Conservation Area. The openness of the field to the front of Carlops Mains contrasts with the height of the former quarry and gives a sense of enclosure. The most important part of the Conservation Area is the rows of original cottages that have been little altered and are single storey with porches. Elsewhere in the settlement some properties rise to two storeys such as the Allan Ramsey Hotel and Carlops Mains. While the majority of properties front onto the A702, most of the cottages have some form of garden ground to the front. Beige sandstone, slate and harling are frequently used throughout. The majority of the cottages have simple vertical boarded doors. Details such as dry stone boundary walls, skews, stepped quoins, rybats and margins are features that are notable within Carlops and should be preserved.

The Plan does not propose any development proposals. The Village is subject to a high degree of protection, due to the high concentration of Listed properties and the extensive Conservation Area.

The greenspace to the front of Ramsay Cottages provides an attractive amenity space for the village and will therefore be protected.

DEVELOPMENT AND SAFEGUARDING PROPOSALS

KEY GREENSPACE

SITE REFERENCE	SITE NAME	SITE SIZE (HA)
GSCARL001	Carlops Verge	0.03

SETTLEMENT PROFILE

CHESTERS

HOUSING MARKET AREA
Central

LOCALITY
Teviot and Liddesdale

POPULATION
156

PLACEMAKING CONSIDERATIONS

The village is centred at the crossroads where the A6088 road is met by minor roads from Camptown and Jedburgh. A war memorial is located at the crossroads. The village has developed in a linear form, mainly eastwards along Chesters Brae (the Camptown road). The existing trees and hedges around the village add to its rural character. The area around the ruined churchyard, site of the former tower and former school is particularly attractive.

The village has a southerly aspect and sits in an agricultural upland landscape with impressive views of the Cheviot Hills to the south. The land slopes to the south towards Jed Water. The Teviot Valleys Special Landscape Area is located to the north of the settlement.

The cemetery is identified as a key greenspace.

The absence of local services, the topography of the settlement and its location outside the Strategic Development Area means that it does not lend itself to significant levels of development. An allocated housing site at Roundabout Farm has been removed from the Plan.

SETTLEMENT PROFILE

CHIRNSIDE

HOUSING MARKET AREA
Berwickshire

LOCALITY
Berwickshire

POPULATION
1,459

PLACEMAKING CONSIDERATIONS

Chirnside overlooks the Merse to the south and the Whiteadder Water flows from the north west down to the south east. The Parish Church is located to the south along the Kirkgate which heads northwards up-slope, with the buildings tight to the roadside. Main Street runs east to west at the upper side of the settlement. There has been large scale housing to the south west of the settlement and more recently housing along The Glebe.

Chirnside currently has housing, mixed use and business and industrial allocations which are not yet developed. The mixed use site (MCHIR001) provides the opportunity for new housing and a retail site close to the centre of the village which would support and enhance the current services available.

PREFERRED AREAS FOR PROPOSED EXPANSION

Future development will not be considered to the south of the A6015. A potential constraint is the prime agricultural land surrounding Chirnside.

DEVELOPMENT AND SAFEGUARDING PROPOSALS

HOUSING

SETTLEMENT PROFILE

CLINTMAINS

HOUSING MARKET AREA
 Central

LOCALITY
 Cheviot

POPULATION
 N/A

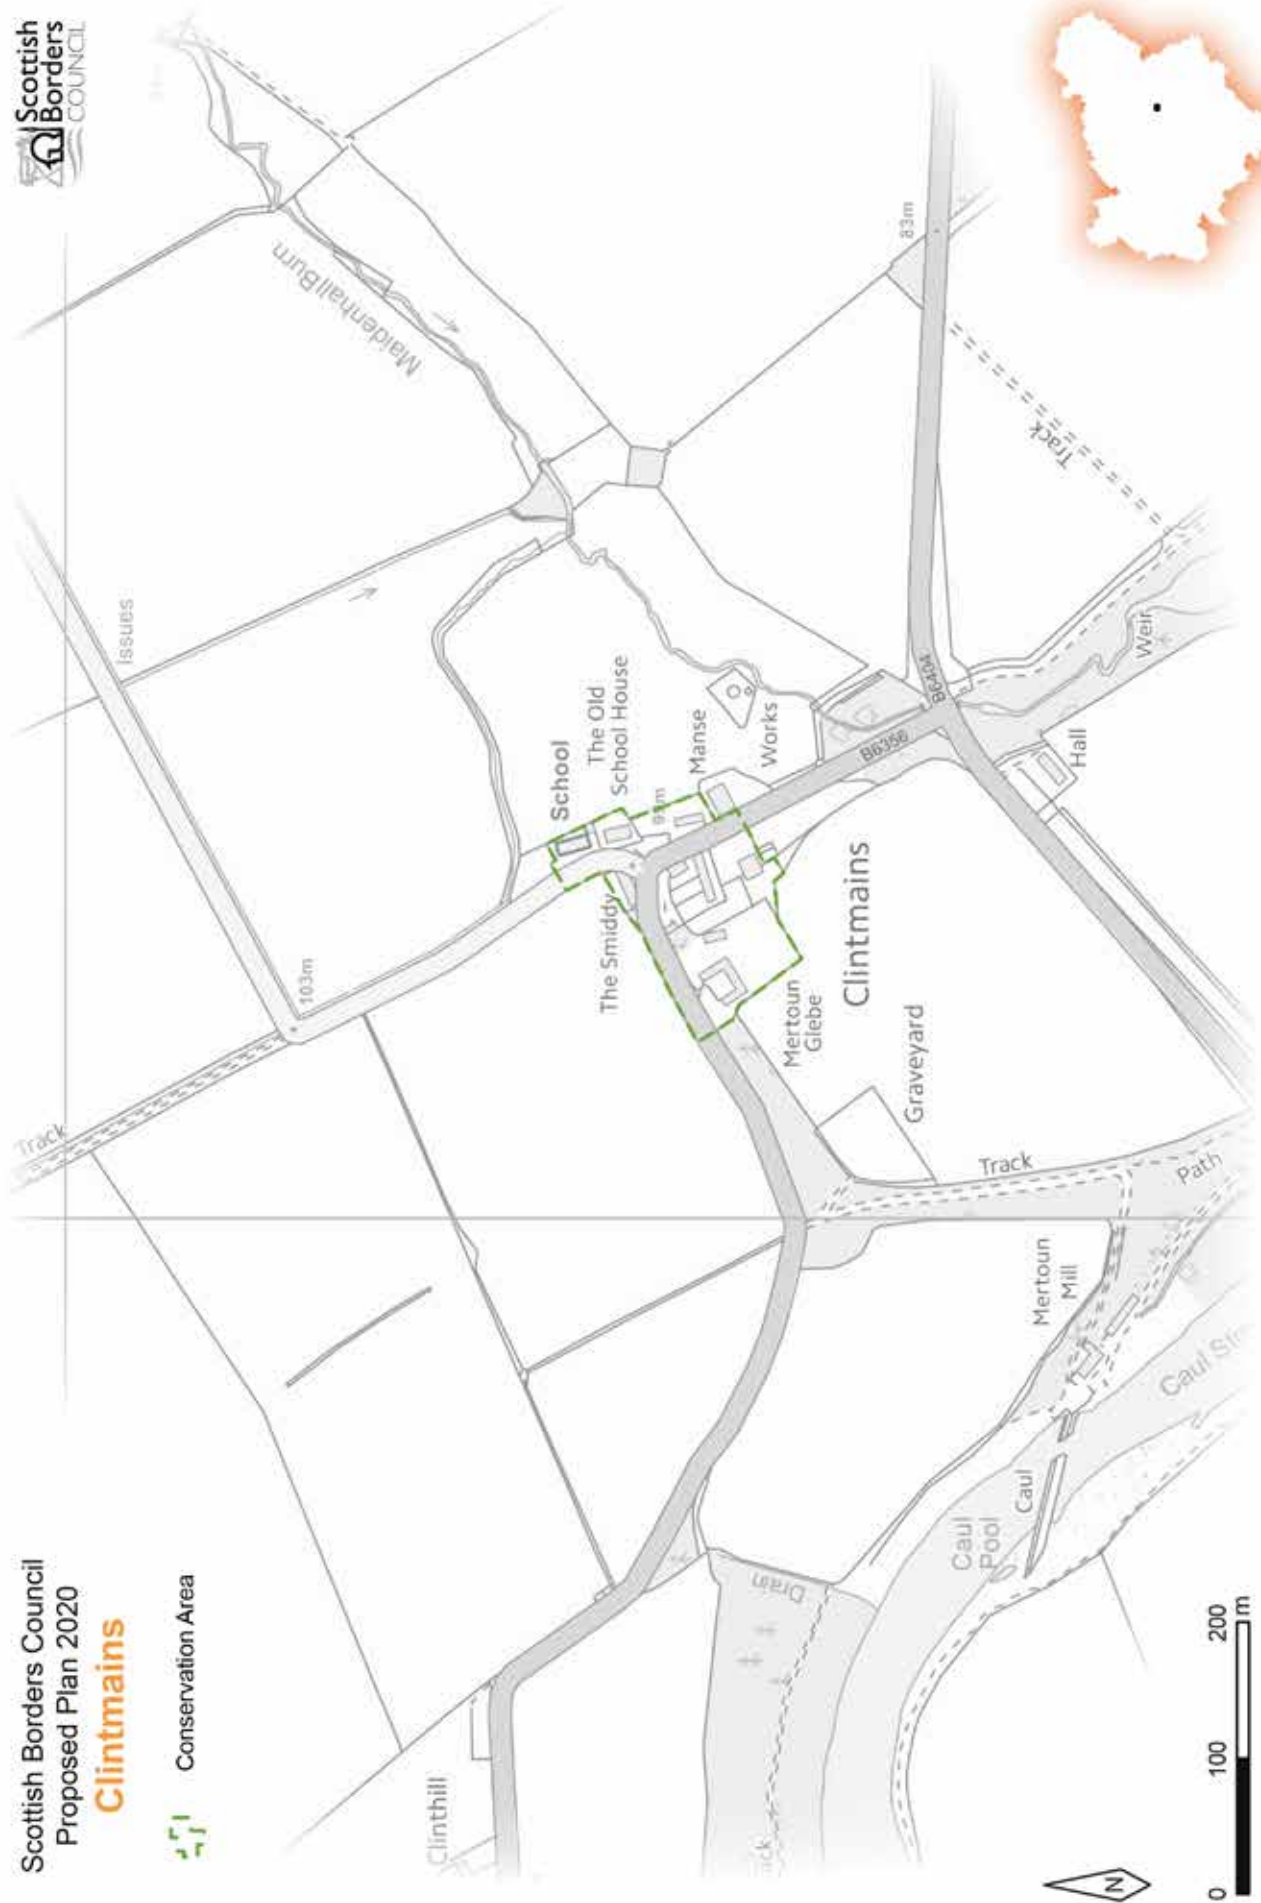

PLACEMAKING CONSIDERATIONS

The Conservation Area of Clintmains covers the majority of the village. Its name stems from “the farm by the lake”. The village was originally built for the workers of Mertoun Estate – the property of the Duke of Sutherland.

A well-preserved village, Clintmains’ original estate layout is still intact with the Green providing a significant contribution to the amenity of the village. Properties range from single to two storeys in height. Building materials that are found within the Conservation Area are sandstone, harl and slate. Whinstone can also be found in parts. It is notable that within Clintmains, properties that have been harled tend to have sandstone margins around their openings, while those that are finished with stonework are complete with sandstone quoins and rybats. These details along with other architectural details such as sash and case windows (of various patterns), transom lights or integral door lights, all contribute significantly to the character and appearance of the Conservation Area.

SETTLEMENT PROFILE

CLOVENFORDS

HOUSING MARKET AREA
Central

LOCALITY
Tweeddale

POPULATION
562

PLACEMAKING CONSIDERATIONS

The settlement sits on undulating grasslands and is surrounded by rolling hills. The original settlement was clustered around the Clovenfords Hotel beside a bridging point over the Caddon Water.

The settlement is on the strategic public transport network. It has regular bus services between Edinburgh, Galashiels and Melrose. The settlement is within a ten minute drive time from the railway stations at Galashiels and Stow.

A Special Area of Conservation follows the Caddon Water through the western parts of the village; this requires special consideration in terms of development. The area around the Caddon Water is also under risk of flooding.

The Plan provides a housing allocation to the south of the village at Caddonhaugh and further west at Clovenfords West. There is one area, at Meigle Row, identified as a key greenspace.

PREFERRED AREAS FOR FUTURE EXPANSION

Once the allocated sites are fully developed the preferred areas for future expansion beyond the period of this Local Development Plan will be the area to the north east of the settlement and also to the south of the recently developed housing at Meigle. The areas suggested for future growth are indicative only and will require further detailed assessment during the next review of the Local Development Plan.

DEVELOPMENT AND SAFEGUARDING PROPOSALS

SETTLEMENT PROFILE

COCKBURNSPATH

HOUSING MARKET AREA
Berwickshire

LOCALITY
Berwickshire

POPULATION
434

PLACEMAKING CONSIDERATIONS

Cockburnspath overlooks the North Sea and the Berwickshire Coast Special Landscape Area. The settlement has grown outward to the south-west from the market square and the old 'Mercat' cross. The village has developed on a south-west facing slope and as a result development off Hoprig Road, which winds through the village, is on different levels. In the last 20 years the settlement has expanded gradually northwards with a modern housing development at Toll View/Lady Hall.

The Conservation Area covers the historic core of the settlement and there are many distinctive townscape characteristics that provide a sense of place. Properties range from single storey outbuildings that line the east side of the Kirkyard, to storey and a half, and two storeys around The Square. The use of building materials, such as sandstone, harling, pantiles and slate, and architectural details such as transom lights, sash and case windows, and bay windows all add to the character. Any new development must aim to positively contribute to the Conservation Area.

Cockburnspath has two housing allocations which have yet to be developed.

PREFERRED AREAS FOR FUTURE EXPANSION

Once the allocated sites are developed the preferred area for expansion would be between the development boundary and Pathhead House to the north. Development into open fields to the west and over the road to the east should be avoided to maintain the settlement form. This land is also designated as prime agricultural land. Expansion to the south would be impractical due to the operational mineral working and the topography. In addition, the restrictive road network within the village would adversely affect the potential for further development land in the immediate surrounds.

SETTLEMENT PROFILE

COLDINGHAM

HOUSING MARKET AREA
Berwickshire

LOCALITY
Berwickshire

POPULATION
563

PLACEMAKING CONSIDERATIONS

Coldingham takes in an attractive rolling landscape with narrow and deeply incised stream valleys. The settlement lies along the Berwickshire coastline, which is designated as a Special Landscape Area and covers the rocky coastline of the Borders. The Priory forms a significant element of the settlement along with the narrow winding streets and the burns that flow from west to east.

An important characteristic of Coldingham is the rise and fall, and twists and turns of the narrow streets and lanes of the Conservation Area. Properties range from single, one and a half, and two storeys in height. Many of the properties are built hard to the footpath but on the whole they tend to follow the streetscape. The use of building materials are important; sandstone, harling, pantiles and slate all help form the character. Architectural details such as transom lights, sash and case windows, margins and rybats also add to the sense of place. Any new development must aim to positively contribute to the existing character of the Conservation Area. The Priory is a Scheduled Monument and is located to the east of Coldingham.

There are two housing allocations within Coldingham which are yet to be developed.

PROPOSED AREAS FOR FUTURE EXPANSION

The preferred area for future expansion is the area to the west of Coldingham, on the north side of School Road. The road network would constrain development to the south of the town and development in other directions would be resisted due to the adverse impact on the character and setting of the village. A potential constraint is the surrounding prime agricultural land.

SETTLEMENT PROFILE

COLDSTREAM

HOUSING MARKET AREA
Berwickshire

LOCALITY
Berwickshire

POPULATION
1,946

PLACEMAKING CONSIDERATIONS

Coldstream is located at the Border on the banks of the River Tweed. It is an important 'gateway' into the Borders. The Conservation Area encompasses much of the historic core, including High Street, Market Street and Duns Road. The High Street changes in level along its length. The shops are centred along the High Street and not the Market Square as would be seen in most other market towns. The buildings within the Conservation Area are predominantly two or three storey and building materials vary including; sandstone, harling, slate and brick chimneys. Architectural elements such as rybats, margins, quoins, skews and transom lights are notable. Any development must aim to respect the Conservation Area and take account of these important features.

Coldstream has developed northwards from the historic core, through housing and industrial estates. There has been recent housing development to the north west of Coldstream, while road infrastructure has been put in place within the allocated business and industrial site (BCOLD001) to the north east. This provides an opportunity for businesses to locate within Coldstream. The fringes are identified for further housing and business and industrial development.

The River Tweed Special Area of Conservation wraps around the settlement boundary to the south and east, while 'The Hirsell' Garden and Designed Landscape lies to the west of Coldstream. These contribute to the character and setting of the settlement.

There are five housing allocations, one business and industrial allocation and two redevelopment allocations. The housing allocation (ACOLD011) was brought forward as part of the Housing SG, while the most recent housing allocation (ACOLD014) has been brought forward as part of the current LDP.

KEY INFRASTRUCTURE CONSIDERATIONS

This settlement is identified within the Council's Local Flood Risk Management Plans as being at risk of flooding. Any development proposals should therefore be subject to early consultation with the Council's Flood and Coastal Management Officer and SEPA, having regard to SEPA's Indicative River and Coastal Flood Maps (Scotland) and any other relevant flood risk information. A flood risk assessment may be required and may influence the scale and layout of any development at a particular location.

PREFERRED AREAS FOR FUTURE EXPANSION

The future expansion of Coldstream is constrained for the following reasons; 'The Hirsell' Garden and Designed Landscape sits to the west and the River Tweed floodplain lies to the south. The River Tweed provides a settlement edge to the east of Coldstream and there is a strong woodland tree belt along the south western edge, which contributes to providing a settlement edge on the southern side of Kelso Road. The River Tweed is designated as a Special Area of Conservation and any development proposals which could affect the designated site, would have to adhere to the requirements of LDP Policy EP1. The preferred area for expansion remains to the north of Coldstream and there is one longer term housing allocation identified for potential future development.

SETTLEMENT PROFILE

CRAILING

HOUSING MARKET AREA
Central

LOCALITY
Cheviot

POPULATION
101

PLACEMAKING CONSIDERATIONS

Crailling is situated on the A698 Jedburgh to Kelso Road, to the east of the Oxnam Water in the Teviot valley. The topography around Crailling is undulating with steeper ground to the south east; to the north the settlement enjoys open views out towards the Teviot valley.

Crailling has developed at a crossing point of the Oxnam Water adjacent to the parklands of Crailling House. Although originally focused on the river and bridge it is now dominated by the A698.

The Plan provides a housing allocation to the east of the settlement at Crailling Toll.

PREFERRED AREAS FOR FUTURE EXPANSION

Once the allocated site is developed, the preferred area for future expansion beyond the period of this Local Development Plan will be the area to the east of the existing housing allocation at Crailling Toll. The areas suggested for future growth are indicative only and will require detailed assessment during the next review of the Local Development Plan.

DEVELOPMENT AND SAFEGUARDING PROPOSALS

HOUSING

SITE REFERENCE	SITE NAME	SITE SIZE (HA)	INDICATIVE SITE CAPACITY
ACRAI001	Crailing Toll	0.5	5
Site Requirements			
<ul style="list-style-type: none"> • Structure planting required on the north eastern and eastern boundary to provide setting for development and to reinforce the settlement edge. A management scheme for planting will be required • Scale and style of development needs to be carefully considered paying heed to the size and scale of the existing settlement • Location of the culvert needs to be considered in the layout of the site in respect of the potential for flooding along with any potential for culvert removal and channel restoration • Mitigation measures are required to prevent any impact on the River Tweed Special Area of Conservation • Assessment of the requirement for archaeological evaluation along with associated mitigation measures is required • Protected species interests have been recorded in the area and further assessment on nature conservation will be required • There should be no direct access onto the A698. 			

SETTLEMENT PROFILE

DARNICK

HOUSING MARKET AREA
Central

LOCALITY
Eildon

POPULATION
397

PLACEMAKING CONSIDERATIONS

The Darnick Conservation Area incorporates the historic core of the settlement which is organic in nature. Its buildings are arranged in informal groups providing constantly changing views to the Eildon Hills.

A strong impact has been formed by a number of buildings within the Conservation Area fronting directly onto the main street, as well as the use of traditional building materials and high standard of architectural detail.

The village is located within a sensitive landscape setting and is included in the Eildon and Leaderfoot National Scenic Area.

The distinct character and setting of Darnick is recognised. As indicated in Figure EP6a, Policy EP6 (Countryside Around Towns) seeks to protect the areas between Darnick and Melrose, and Darnick and Tweedbank from development in the longer term primarily to avoid coalescence of the settlements, thereby retaining individual character.

Two formerly allocated sites within the village at Broomilees Road and Chiefswood Road are now complete and have been removed from the Plan.

There is one area, Darnick Community Woodland, identified as a key greenspace.

The Plan provides a housing allocation within the western edge of the village.

PREFERRED AREAS FOR FUTURE EXPANSION

With regard to Darnick's proximity to the railway station at Tweedbank and its prime location within the central housing market area, the settlement will be the subject of continued development pressure. There is potential in the longer term to expand the village to the west of Darnlee. Any sites for future expansion will require further detailed assessment during the next Local Development Plan review.

DEVELOPMENT AND SAFEGUARDING PROPOSALS

HOUSING

SITE REFERENCE	SITE NAME	SITE SIZE (HA)	INDICATIVE SITE CAPACITY
ADARN005	Land South of Darnlee	0.8	10

Site Requirements

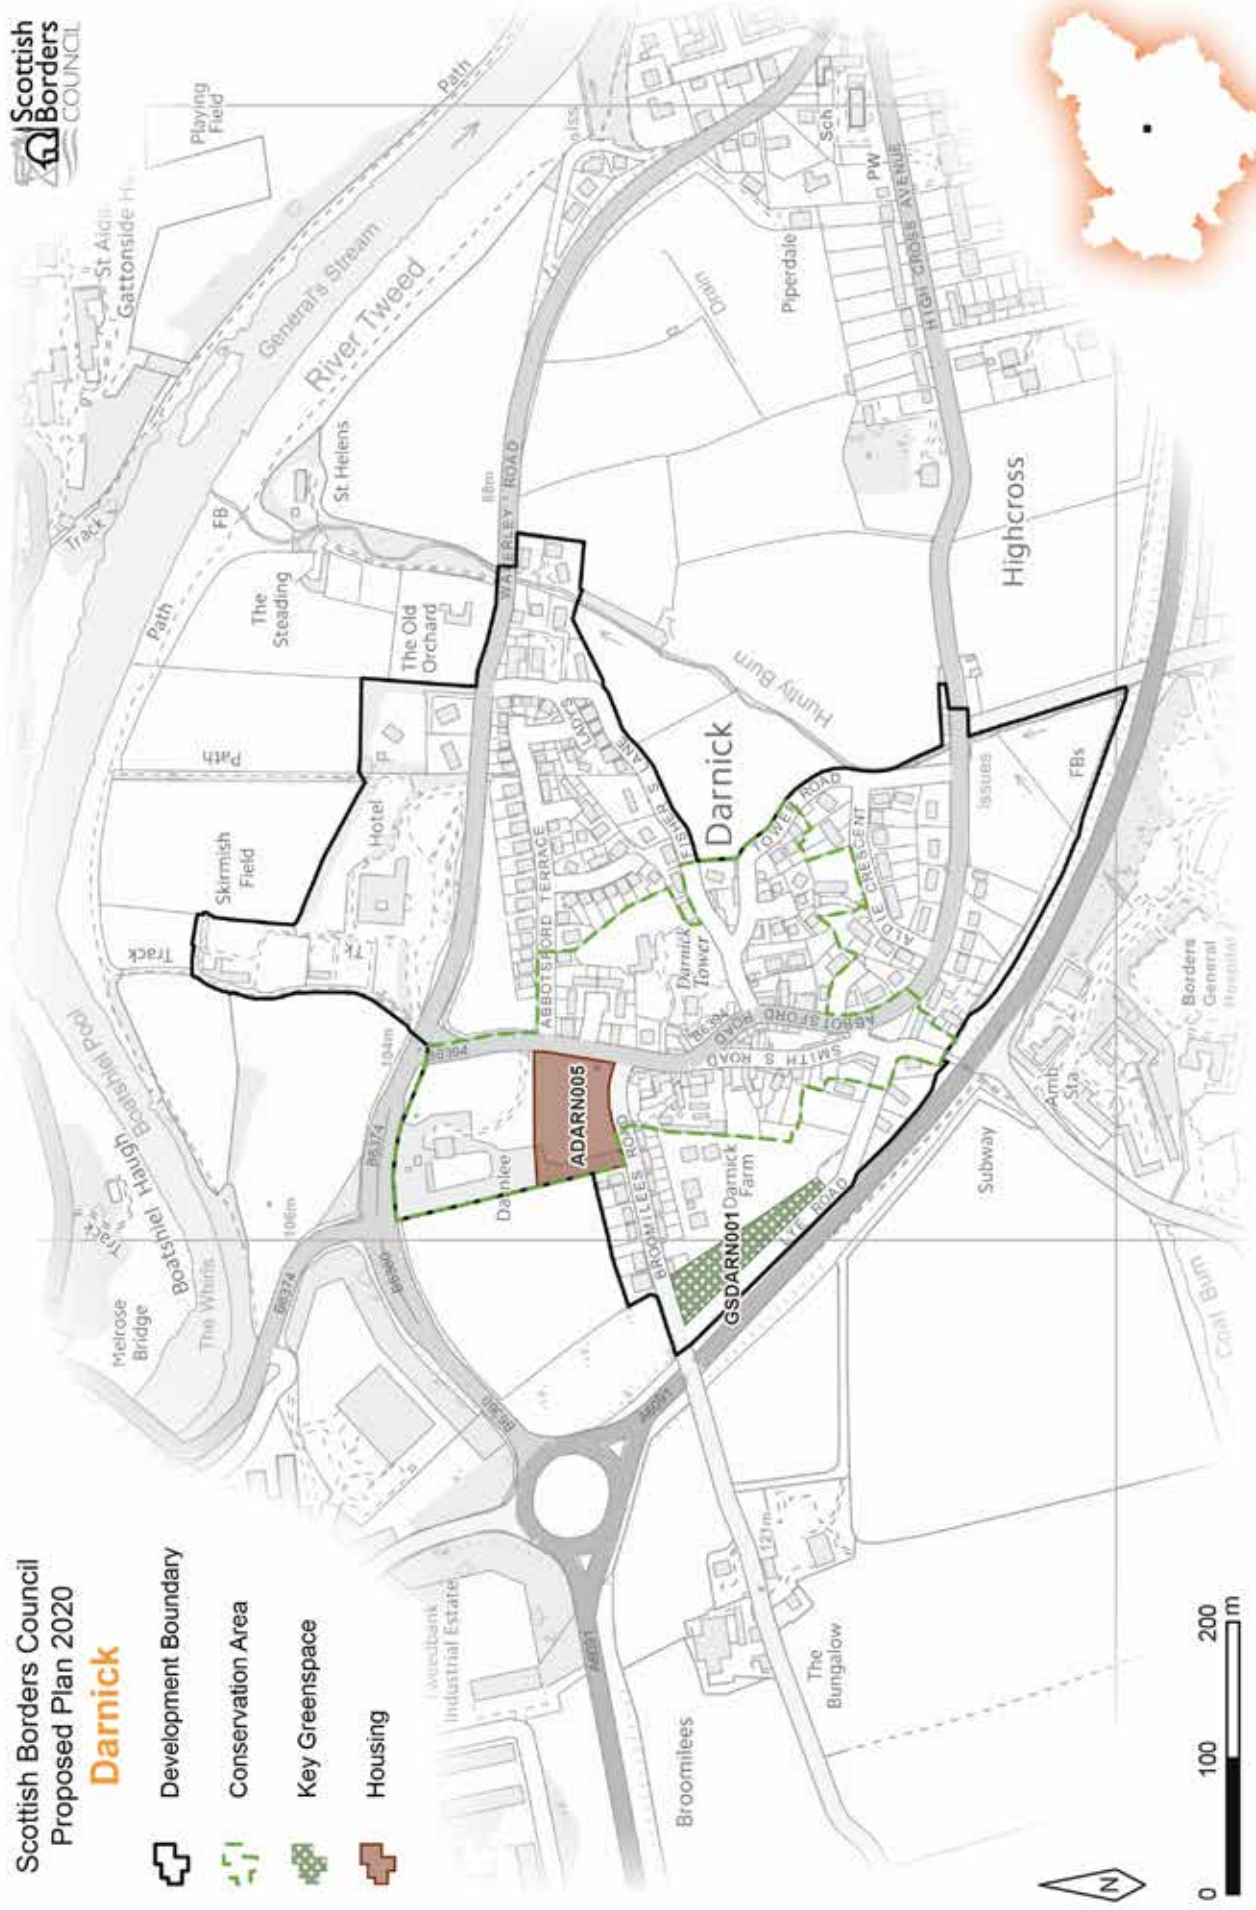

- A planning brief to be prepared to include the principles of 'Designing Streets'
- A tree survey to be undertaken of existing trees within the site to determine the ancient or veteran character of the trees. Retain and protect the existing boundary features and trees, where possible
- Satisfactory boundary treatment to be provided
- Assessment of ecology impacts and provision of mitigation, as appropriate
- The special qualities and setting of the historic battlefield (Inventory Battlefield of Darnick) must be safeguarded, mitigation is likely
- The setting of the listed building 'Darnlee' and the character of the Darnick Conservation Area must be safeguarded
- High standard of design will be required in light of the location of the site within the Eildon and Leaderfoot Hills National Scenic Area and the Conservation Area
- Integration required with Broomilees Road with dwellings relating to both the parkland and the street
- As well as vehicular access off the main street, a secondary access off Broomilees Road is an option subject to suitable road improvement work. Further discussions on vehicular access arrangements are required. Displacement main road parking (to achieve satisfactory access) to be accommodated within the site. A Transport Statement will be required
- Early engagement required with Scottish Water. The site has water environment considerations. Drainage Impact Assessment required

SETTLEMENT PROFILE

DENHOLM

HOUSING MARKET AREA
Central

LOCALITY
Teviot and Liddesdale

POPULATION
653

PLACEMAKING CONSIDERATIONS

The character of Denholm is established by its layout of largely two storey sandstone buildings around a large central green. The village is set within the landscape of the lowland valley of the Lower Teviot. The River Teviot, to the north, is part of the River Tweed Special Area of Conservation, a wildlife site of international importance. Denholm Dean, the wooded valley of the Dean Burn, forms a natural edge to the west of the village. The village is surrounded by the Teviot Valleys Special Landscape Area.

Denholm Conservation Area includes the central Green area, together with a smaller Green at Kirkside, part of Cannongate and the former Denholm Mill that is now in residential use. The village is distinctive in that it represents a planned village based on the decanting of stocking weaving work from Hawick. The properties around the Green are on a simple rectangular plan with gable ends and eaves to the roadside. Most buildings are constructed in continuous rows but there are a few examples of detached cottages.

Traditional building materials prevail throughout the Conservation Area, architectural detailing includes sash and case windows, stone cills, jambs and lintels around window and door openings. It is all of these elements that give Denholm its distinct appearance that should be conserved. Any proposed alterations to individual buildings or any new development should seek to respect the individual buildings and the wider Conservation Area. There are seven listed properties within the Conservation Area of which the Westgate Hall is Category 'A'.

A number of shops and two pubs/hotels are located in the village centre. Denholm Primary School is situated on the western edge of the village.

The village Green is identified as a key greenspace.

PREFERRED AREAS FOR FUTURE EXPANSION

The preferred area for future expansion beyond the period of this Local Plan will be the south-eastern edge of the village. Expansion will be dependant upon suitable access and landscaping. Development to the north-west of the settlement will be resisted where it will have a significant effect on the River Tweed Special Area of Conservation site. Development to the west of the settlement will also be resisted as it would cross the natural boundary of the Denholm Dean. The suggested area is indicative only, and will require further detailed assessment during the next Local Development Plan review.

GSDENH001	Denholm Green	1.2

SETTLEMENT PROFILE

DOLPHINTON

HOUSING MARKET AREA
Northern

LOCALITY
Tweeddale

POPULATION
180

PLACEMAKING CONSIDERATIONS

The character of Dolphinton (within the Scottish Borders Council area) has been established particularly by its layout and setting – it is set between Kippit Hill and Sandy Hill and consists of two parts separated by the A702 trunk road. The Garvald Burn runs to the south west of the village. Dolphinton was once served by two railways – the Caledonian Railway and the North British Railway. The dismantled railway runs through the settlement.

The Plan provides a single housing allocation for residential development which will bring a brownfield site back into use. The allocation is located to the eastern edge of that part of the village on the west side of the A702.

PREFERRED AREAS FOR FUTURE EXPANSION

Once the allocated site is fully developed the preferred area for future expansion beyond the period of this Local Development Plan will be to the area north of the current housing allocation.

The area identified for longer term development will be subject to further assessment and review as part of the next Local Development Plan Review.

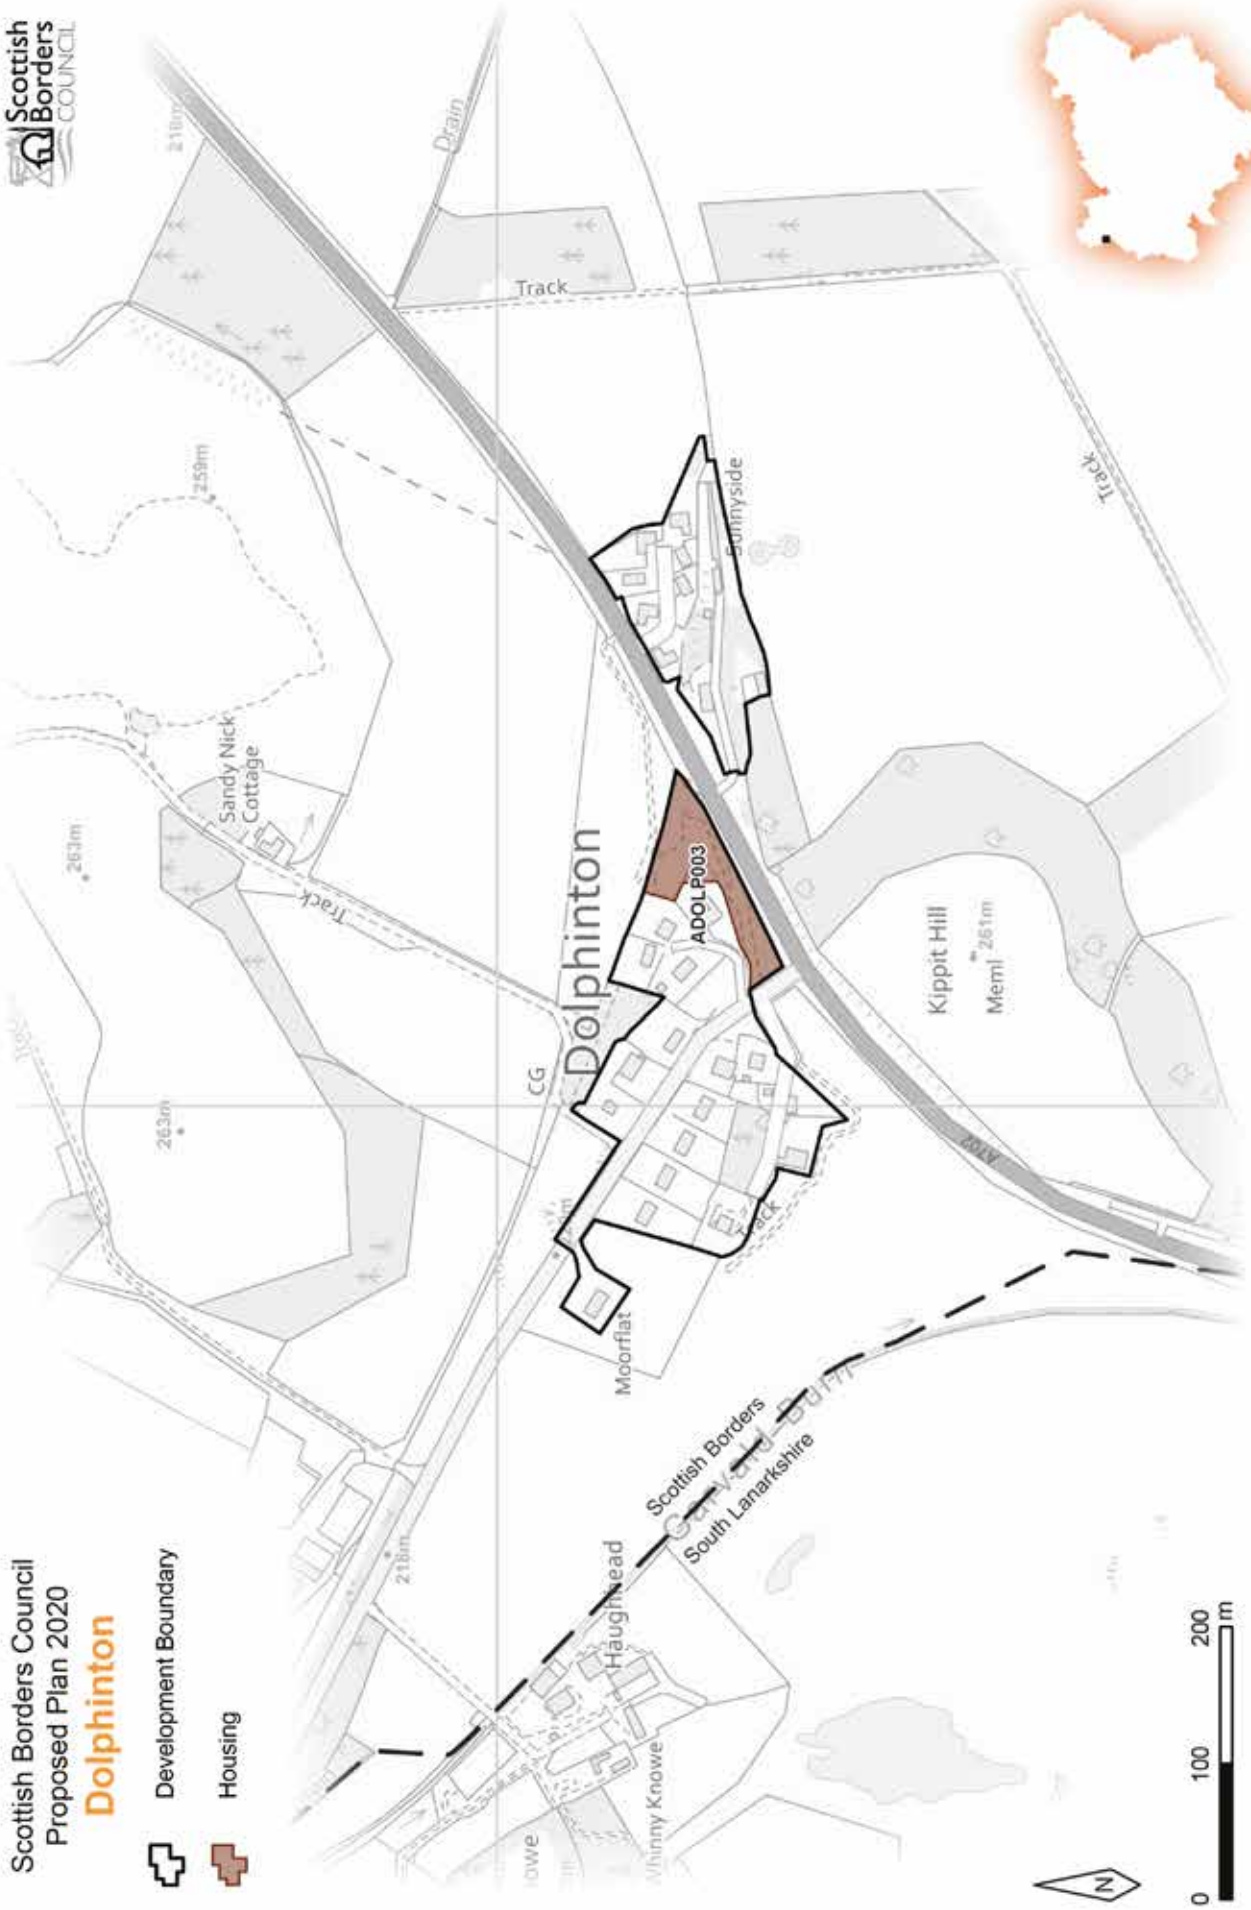

DEVELOPMENT AND SAFEGUARDING PROPOSALS

HOUSING

SITE REFERENCE	SITE NAME	SITE SIZE (HA)	INDICATIVE SITE CAPACITY
ADOLP003	South of Sandy Hill	0.5	5
Site Requirements			
<ul style="list-style-type: none"> Existing landscaping on site to be retained. Landscape enhancement to the south and south east boundaries of the site adjacent to the A702 will be required. Buffer areas for new and existing landscaping will be required. The long term maintenance of landscaped areas must be addressed The site coincides with the former site of Dolphinton station. Further assessment of archaeology will be required and mitigation put in place Vehicular access to be achieved off the minor road to the south west of the site and the development to be designed so that there is no adverse effect on the safety of the nearby junction between the minor road and the A702 Provision of amenity access to the countryside for pedestrians and cyclists Potential contamination on site to be investigated and mitigated.

SETTLEMENT PROFILE

DRYBURGH

HOUSING MARKET AREA
 Central

LOCALITY
 Cheviot/Eildon

POPULATION
 N/A

PLACEMAKING CONSIDERATIONS

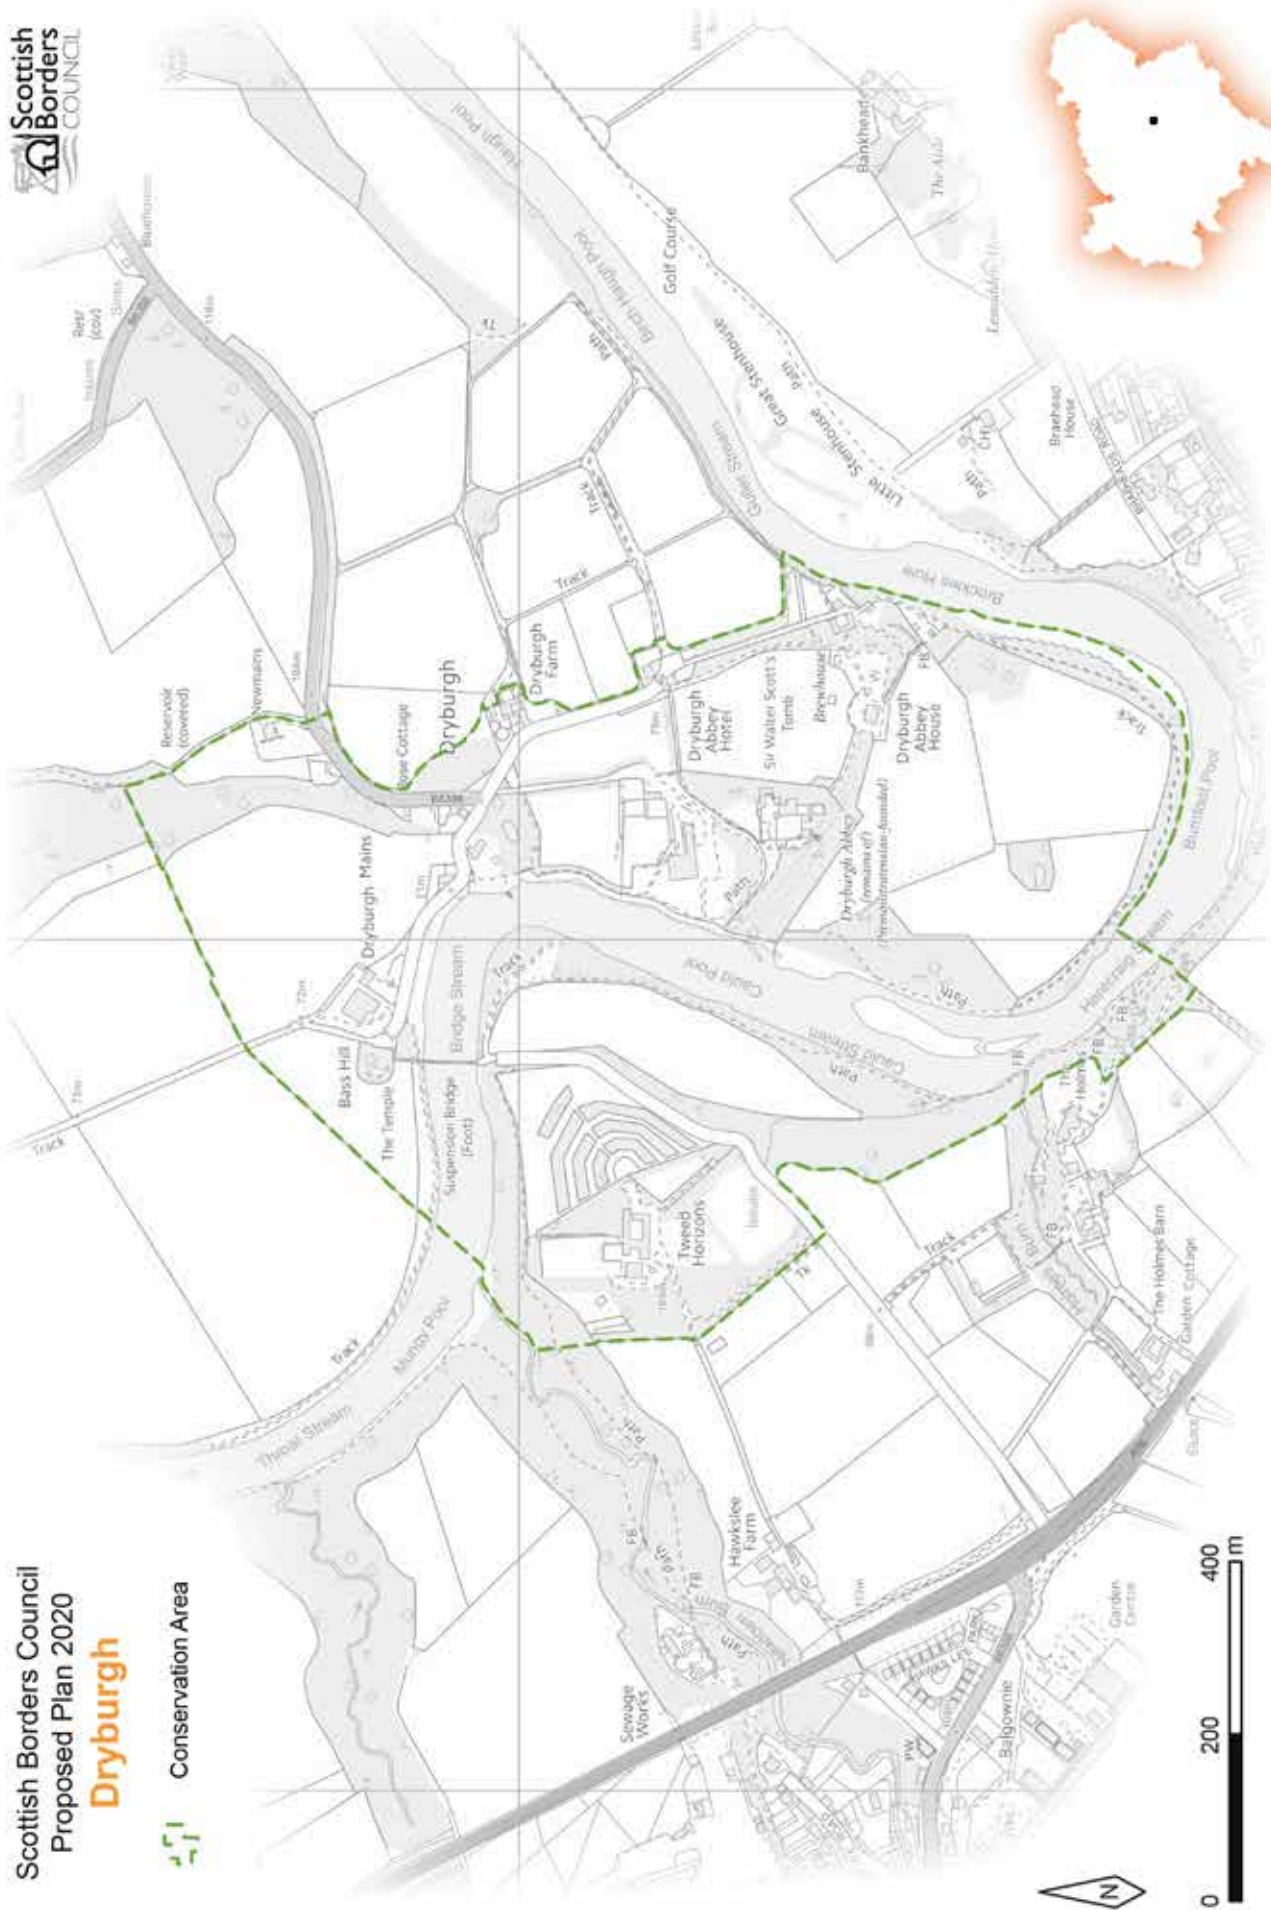

The Conservation Area of Dryburgh is located in the crook of the River Tweed beneath the Eildon Hills.

The Dryburgh Conservation Area is unique in the Borders in that it is a rural area that has many different types of buildings. These buildings range significantly from the modest agricultural buildings at Dryburgh Mains to the grandeur of the Dryburgh Abbey Hotel and the Abbey. The relationship of the buildings and the spaces between them contribute significantly to both the character and appearance of the Conservation Area. While the properties themselves range from single storey to two and a half storeys in height for residential buildings, the hotel rises to a significant three and a half storeys. Building materials include slate, harl and sandstone in varying colours. Details such as boundary walls with coping, crowsteps, stepped quoins, rybats and margins are features notable in Dryburgh and should be preserved.

DEVELOPMENT AND SAFEGUARDING PROPOSALS

BUSINESS AND INDUSTRIAL

Site BNEWT001 (Tweed Horizons Expansion) extends into the Dryburgh Conservation Area; refer to Newtown St Boswells Settlement Profile and Map.

SETTLEMENT PROFILE

DUNS

HOUSING MARKET AREA
Berwickshire

LOCALITY
Berwickshire

POPULATION
2,753

PLACEMAKING CONSIDERATIONS

Duns Castle and Law lies to the north of the settlement whilst the southern edge sits on the Merse lowland. 'Duns Castle' Garden and Designed Landscape is located to the north, which contributes to the character and setting of the town. A mire (bog) runs east to west across the town and an area of wetland lies to the south of the redevelopment allocation (RDUNS002). The town radiates from the medieval church, Market Square and Cross, with older buildings evident between the entrance to the Castle grounds and the Parish Church. The shops are located around the Squares and along South Street and North Street. In recent years there has been substantial housing development to the east of Duns, as well as Station Drive to the south.

The Conservation Area in Duns contains distinctive characteristics that can only be found in the town. It is concentrated to the north east, with the majority of properties focused around the squares in the town centre and along Newtown Street. A variety of building styles are present adding to the uniqueness of the place and on the whole they follow the streetscape. The use of building materials such as sandstone, harling, slate, and architectural details such as transom lights, sash and case windows, and crow steps, contribute to the sense of place. Any development must aim to positively contribute to the character of the Conservation Area.

There are five housing allocations, one business and industrial allocation and two redevelopment allocations within Duns. The infrastructure has been put in place within the allocated business and industrial site (zEL8) to the south east. This provides an opportunity for businesses to locate within Duns.

There is a Core Activity Area identified within Duns which runs along the north side of Market Square, then round to the corner with Murray Street. The Core Activity Area represents the core area for public activity in Duns and also represents an important part of the town.

CHANGING CONTEXT

In recent years Duns Primary School has re-located into the former Berwickshire High School building, situated on the north of Langtongate. This has ensured the retention and re-use of a prominent Category B Listed Building situated within the town. The former Duns Primary School and surrounding land is allocated as a redevelopment opportunity (RDUNS002).

The Jim Clark Motorsport Museum situated on Newtown Street has undergone a significant investment and refurbishment in recent years, with the opening of a new museum. This will help contribute to the economy of Duns and the wider surrounding area, as well as attracting visitors to the Scottish Borders.

PREFERRED AREAS FOR FUTURE GROWTH

The preferred area for future growth is to the south of Duns, with land for potential longer term mixed use development identified at South of Earlsmeadow (SDUNS001). This area is indicative only and would require further investigation and a Masterplan to ensure a coherent and holistic approach.

The future expansion of Duns is constrained in other directions for a number of reasons. The 'Duns Castle' Garden and Designed Landscape provides an effective boundary along the northern edge of the town, due to the steep slope. The area to the south and south east is constrained by the distance to the town centre and the open rural character of the landscape, while land to the east is constrained due to the rolling nature of the farmland and its role in providing a containing edge to the settlement. Coalescence is a concern for any development to the west and the land is within the foreground of views of Duns Castle policies. Once the housing allocation at Langton Edge is developed, further expansion will be resisted in this area to prevent ribbon development at greater distances from the town centre. Another consideration to future growth is the surrounding prime agricultural land.

There is an existing business and industrial allocation (zEL8) which will provide for current demand, however there is the potential for further expansion along the dismantled railway line in the future.

There is interest and potential for a modest scale retail outlet within central Berwickshire and Duns is the preferred area for search. No site has specifically been identified in Duns, but any such proposal must be subject to a sequential test and a case to be submitted giving reference to any perceived impacts upon the existing Duns town centre.

SETTLEMENT PROFILE

EARLSTON

HOUSING MARKET AREA
Central

LOCALITY
Eildon

POPULATION
1,779

PLACEMAKING CONSIDERATIONS

Earlston is set in the upland fringe valley of the Lower Leader. It is located to the east of the Leader Water and north of the Turfford Burn and there is a flood risk associated with both of these watercourses. The triangular green, High Street and church are all focal points. The Leader Water, to the south west, is part of the River Tweed Special Area of Conservation, a wildlife site of international importance.

Earlston High School has been relocated to the east of the town, the school incorporates the local library and is also available for community use out of school hours. Following the relocation of the High School, the land at the former High School site has been allocated as a housing site.

The Plan also provides two further housing sites, one business and industrial site and three business and industrial safeguarded sites as well as two redevelopment opportunities.

Within Earlston, three key greenspaces, including the Rugby Ground have been identified for protection due to the recreational opportunities these offer to the community.

CHANGING CONTEXT

Due to a lack of developer interest and activity, a long standing allocated housing site to the east of the Health Centre at Earlston Glebe has been removed from the Plan. However, the site remains within the Earlston development boundary which could allow future development of the site.

KEY INFRASTRUCTURE CONSIDERATIONS

This settlement is identified within the Council's Local Flood Risk Management Plans as being at risk of flooding. Any development proposals should therefore be subject to early consultation with the Council's Flood and Coastal Management Officer, and SEPA, having regard to SEPA's Indicative River and Coastal Flood Map (Scotland) and any other relevant flood risk information. A flood risk assessment may be required and may influence the scale and layout of any development at a particular location.

PREFERRED AREAS FOR FUTURE EXPANSION

Once the allocated sites are fully developed the preferred area for future expansion beyond the period of this Plan will be the area to the east of the settlement at Georgefield East (SEARL006). This longer term mixed use site will be subject to further assessment as part of the next Local Development Plan review, and will require a Masterplan to ensure a coherent and holistic approach.

DEVELOPMENT AND SAFEGUARDING PROPOSALS

HOUSING

SITE REFERENCE	SITE NAME	SITE SIZE (HA)	INDICATIVE SITE CAPACITY
AEARL002	Surplus land at Earlston High School	4.3	60
Site Requirements			
<ul style="list-style-type: none"> • Refer to approved Planning Brief • Vehicular access to be shared with the Primary School from the north east of the site • A flood risk assessment will be required due to potential flood risk to the south east of the site • Potential contamination from the former gas works on the site to be investigated and mitigated • Conservation and enhancement considerations to be given to the Turfford Burn which is part of the River Tweed Special Area of Conservation. Mitigation of any potential impacts on biodiversity • Retention of pedestrian/cycle link in the north west of the site to South Croft Park and in the north east of the site between the primary school and the playing field • Creation of a countryside footpath along the Turfford Burn • Creation of woodland buffer along western boundary of site to separate residential uses from the existing industrial uses to the west. A management scheme for planting is also required • Creation of an area of amenity open space in the eastern part of the site • Archaeological features on-site should be evaluated and mitigation measures carried out where necessary. This includes the former gasworks site and stone tool finds listed on the sites and monuments record. 			
AEARL010	East Turfford	4.6	40
Site Requirements			
<ul style="list-style-type: none"> • A coherent Masterplan to be produced covering the whole area of Georgefield, including this site, AEARL011 and the longer term mixed use site SEARL006 • Vehicular access from the new road to the high school and potential for a secondary access direct onto the A6105 further to the east • A flood risk assessment will be required due to possible flooding in the southern part of the site. The flood risk area should be landscaped as wetland with tree planting and recreational open space. This should serve as a central focal point between AEARL010 and AEARL011 • Conserve and enhance the nature conservation interest of the Turfford Burn to the south of the site which is part of the River Tweed Special Area of Conservation and on the open space in the south of the site. Mitigation of any impact on biodiversity • Management of the existing tree belt to the north which screens the site from the A6105 • Creation of a woodland buffer along the western boundary to contain it and screen it from the access road to the school. A management scheme for planting is also required • Retention of footpaths through the east of the site. 			

AEARL011	Georgefield Site	7.7	120
Site Requirements			
<ul style="list-style-type: none"> • A coherent Masterplan to be produced covering the whole area of Georgefield, including this site, AEARL010 and the longer term mixed use site SEARL006 • Creation of vehicular access from the A6105 connected into the site via AEARL010. It should be noted that part of the rectangular field between the site and the high school is needed for access purposes. The intervening land should be considered for development as it forms a key link between the various development sites • Evaluate and mitigate the archaeological features on the site including a feature called the Boon Black Dyke • A flood risk assessment will be required due to possible flooding in the northern part of the site. The flood risk area should be landscaped as wetland with tree planting and recreational open space. This should serve as a central focal point between AEARL010 and AEARL011 • Conserve and enhance the nature conservation interest of the Turfford Burn to the south of the site which is part of the River Tweed Special Area of Conservation and on the open space in the south of the site. Mitigation of any impact on biodiversity • Creation of a footpath through the open space connecting up with the existing pedestrian network and providing access over the burn. This should also provide safe pedestrian access to the school • The existing woodland within the site should be maintained and enhanced. A management scheme for planting is required.

A transportation assessment will be required The longer term mixed use area is appropriate for housing, employment, community uses and open space The natural heritage interest of the Turfford Burn, part of the River Tweed Special Area of Conservation, should be conserved and enhanced Flood risk assessment will be required for the areas at flood risk along the Turfford Burn The layout and design of development should create a visually contained settlement expansion with its own identity New wetland areas for Sustainable Urban Drainage System (SUDS) should be created, including the north east, north west and centre of Georgefield East Retention and management of existing woodland, including woodland along burns and shelter belts Woodland structure planting to provide a setting and shelter for potential development, create a settlement edge, provide a wooded edge to watercourses and add variety to existing woodland. Planting should screen development from the roads to the north. A management scheme for planting is also required The archaeological sites on the sites and monuments record should be investigated and appropriate mitigation measures carried out. A crop mark in the south east should be excluded from development The provision of a pathway link from the longer term mixed use area to Earlston High School to the west and adjacent countryside paths.

SETTLEMENT PROFILE

ECCLES

HOUSING MARKET AREA
Berwickshire

LOCALITY
Berwickshire

POPULATION
126

PLACEMAKING CONSIDERATIONS

Eccles lies on the Tweed lowlands and is surrounded by fields reflecting the prime agricultural land found in the area. The Parish Church has had a major role in placing the settlement on the map, although there has been little outward growth.

Eccles does not have a Conservation Area, although there are seven Listed Buildings within the settlement boundary. The south west corner of the Churchyard contains the remains of the St Mary's Convent which is a Scheduled Monument, and there may be further archaeological interest in the surrounds of the site. Therefore, any development which might affect the site would need to adhere to the requirements of the LDP Policy EP8.

There are two housing allocations within Eccles both of which are yet to be developed.

SETTLEMENT PROFILE

ECKFORD

HOUSING MARKET AREA
Central

LOCALITY
Cheviot

POPULATION
154

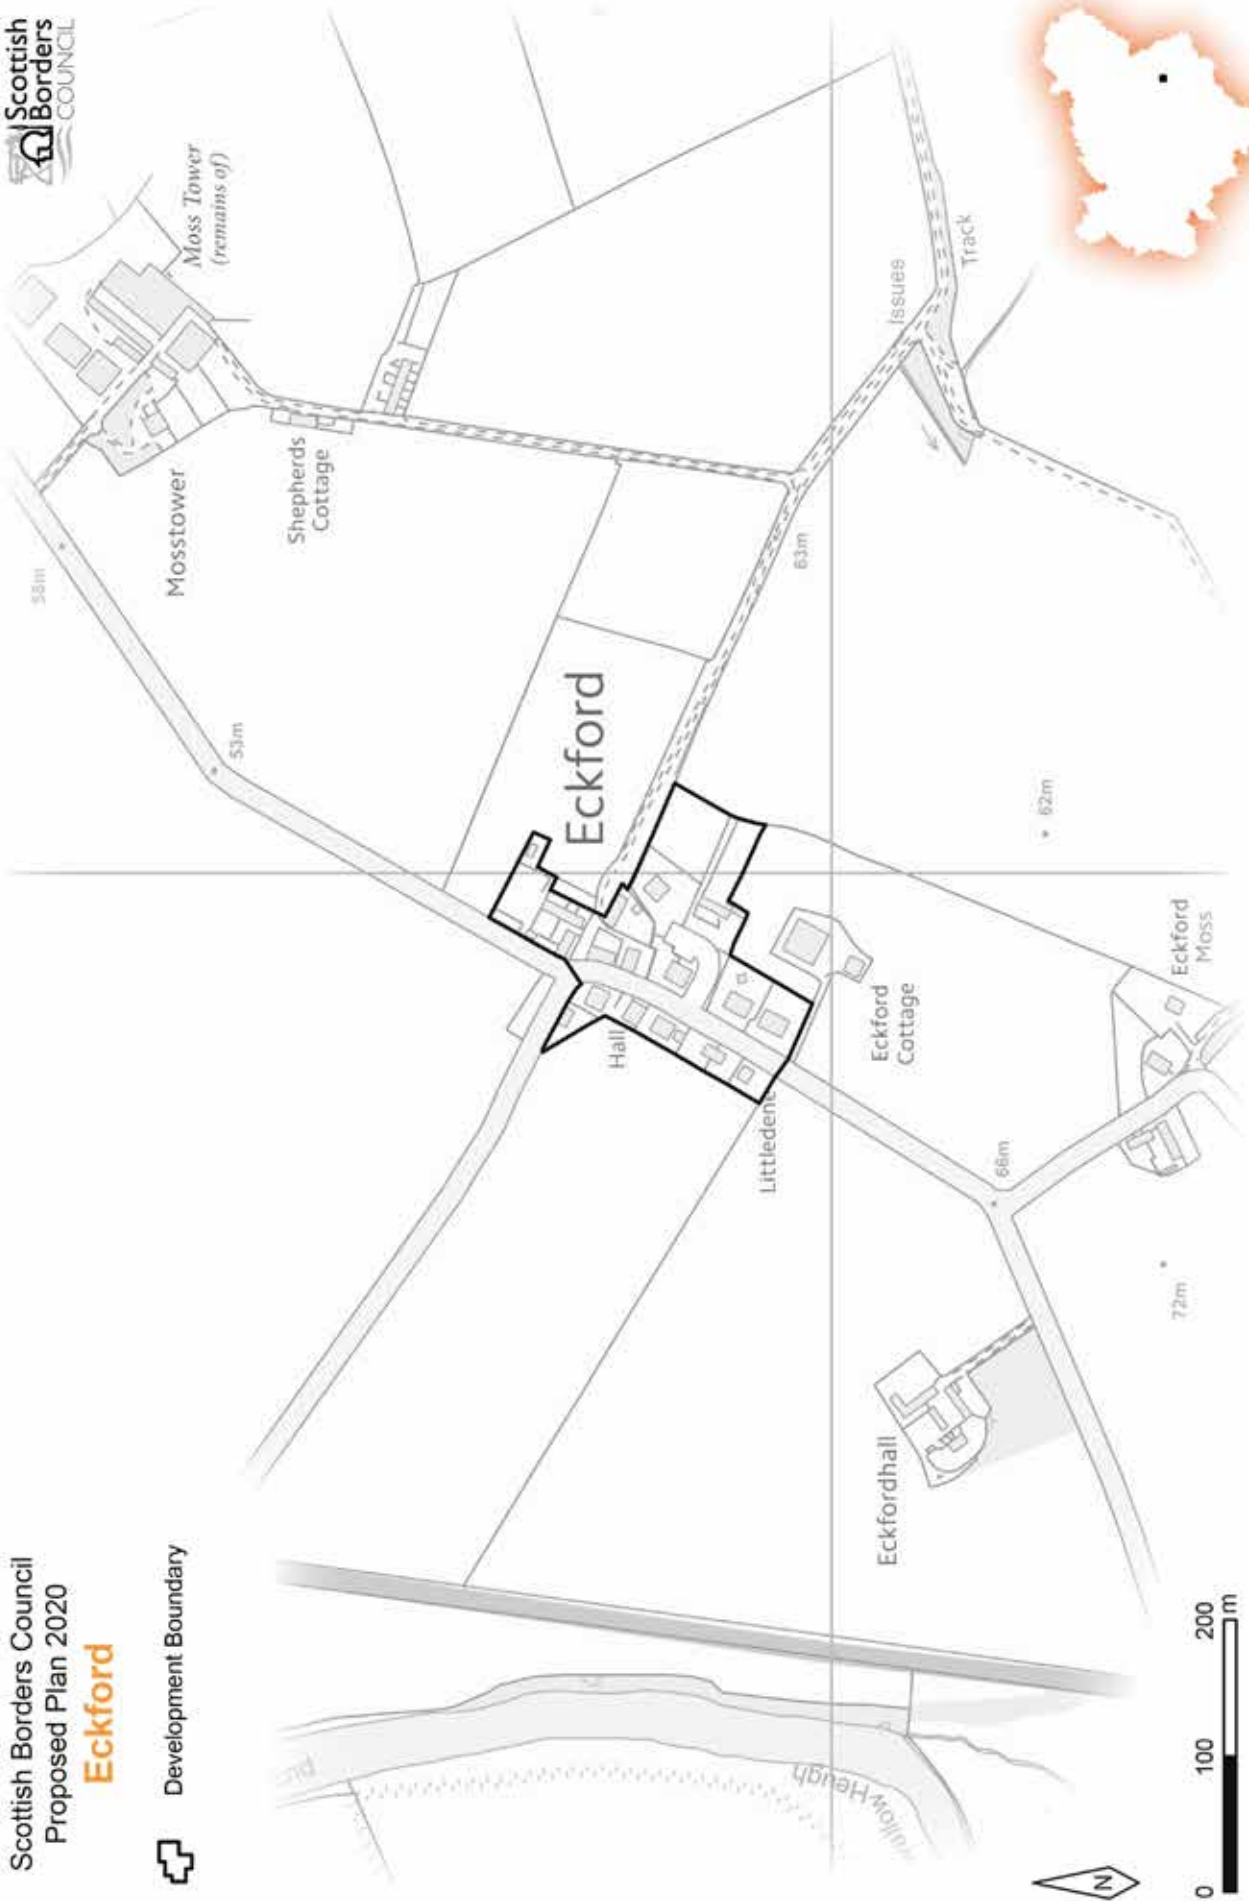

PLACEMAKING CONSIDERATIONS

Eckford is situated at an intersection of minor roads to the east of the A698 Hawick to Kelso road and to the south west of the B6401 Morebattle road in an area of river valley and lowland landscape types. The village is located on a slight rise on the otherwise flat river plain of the Teviot.

The original core of the settlement has been built around the cross roads however over the years the village has developed a linear form along the two roads running through it. There is a mix of housing styles within Eckford with original Victorian properties in the centre, inter-war housing and more modern development recently developed at Hillview.

There is no land allocated within Eckford within this Local Development Plan period.

SETTLEMENT PROFILE

EDDLESTON

HOUSING MARKET AREA
Northern

LOCALITY
Tweeddale

POPULATION
322

PLACEMAKING CONSIDERATIONS

The character of Eddleston is established particularly by its setting as it lies west of the Moorfoot Hills and sits on a wide upland flood plain. In the village east of the A72, the village slopes up while the historic part of the village lies on flat land. Eddleston benefits from many views both within and outwith the settlement.

The Eddleston Conservation Area has two distinct focal points – Station Road and the area around the Horseshoe Inn. The village was founded about 1785 as a single street of whinstone cottages and is terminated by Station House to the north.

Eddleston village is set where the Eddleston Water meets the Longcote Burn and the Dean Burn. It is a result of these waterways that Eddleston has the three bridges crossing them – the two within the Conservation Area being humped back. All buildings relate to the landline and tend to rise and fall with the topography while the properties along Station Road front directly onto the street. Along Station Road small single storey cottage style properties are the norm, though some properties rise to two storeys elsewhere. Prominent buildings consist of the Parish Church on the hill and the Horseshoe Inn with its uniquely 'horseshoe' shaped windows reflecting its previous use as a smiddy.

Features that are evident throughout the Conservation Area and which form the character of the place are the use of building materials like whin and sandstone (predominately beige coloured though a few examples of red), harling and exposed rafter feet. Architectural details such as gabled porch entrances, bay windows, margins or stepped rybats and sash and case windows can be frequently seen. It is all of these elements that give Eddleston its distinct appearance that should be conserved.

The Plan provides one new housing site to the south west of Eddleston beside the cemetery. The Plan identifies two greenspace areas for protection within Eddleston, the Elibank Park and the Bellfield Crescent park area.

KEY INFRASTRUCTURE CONSIDERATIONS

This settlement is identified within the Council's Local Flood Risk Management Plans as being at risk of flooding. Any development proposals should therefore be subject to early consultation with the Council's Flood and Coastal Management Officer, and SEPA, having regard to SEPA's Indicative River and Coastal Flood Map (Scotland) and any other relevant flood risk information. A flood risk assessment may be required and may influence the scale and layout of any development at a particular location.

SETTLEMENT PROFILE

EDNAM

HOUSING MARKET AREA
Central

LOCALITY
Cheviot

POPULATION
157

PLACEMAKING CONSIDERATIONS

Ednam is located along the B6461 Kelso to Duns road and lies to the north of the Eden Water. There has been recent small scale housing development towards the north eastern end of the village at Eden Park.

The Plan provides one housing allocation to the west of the village at West Mill. The Plan also identifies the Playing Field at Ednam Primary School as a key greenspace for protection.

PREFERRED AREAS FOR FUTURE EXPANSION

The longer term areas for future expansion beyond this Local Development Plan period will be to the north and to the east of the village. The areas for longer term development are indicative only and will require further detailed assessment.

SETTLEMENT PROFILE

EILDON

HOUSING MARKET AREA
Central

LOCALITY
Eildon

POPULATION
97

PLACEMAKING CONSIDERATIONS

The character of Eildon is established by an irregular cluster of cottages and houses. There is no Conservation Area in Eildon. The quality of the countryside around Eildon is recognised by its designation as a National Scenic Area. The village has one allocated site on the north western side of the settlement.

PREFERRED AREAS FOR FUTURE EXPANSION

Due to the sensitive landscape setting of the village, further development will be resisted. Development to the south should be resisted to prevent the coalescence of Eildon with Newtown St Boswells. Development to the west of Eildon should be resisted because the road forms a clear boundary and beyond that there are open fields that form the foothills of the Eildon Hills.

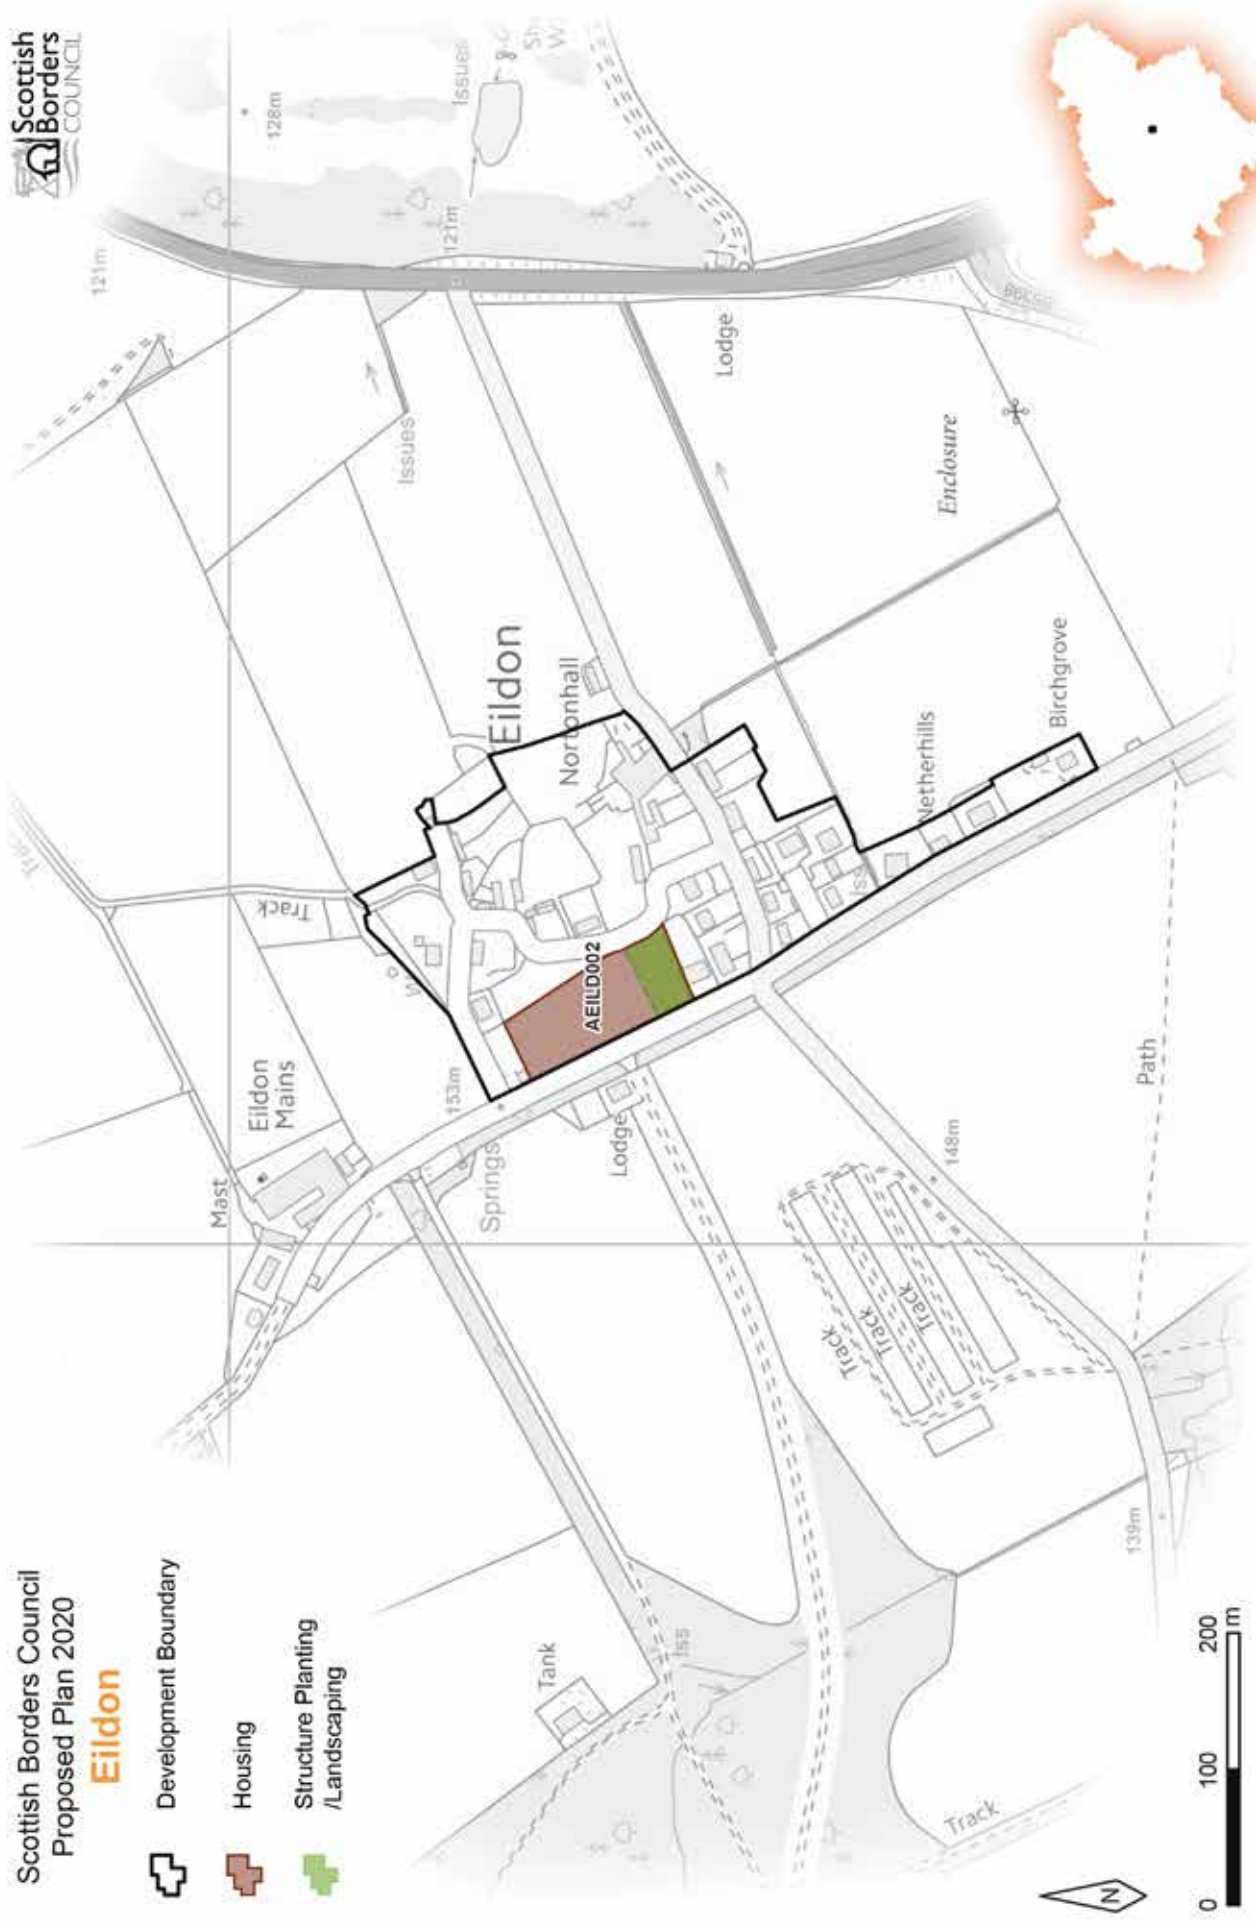

DEVELOPMENT AND SAFEGUARDING PROPOSALS

SETTLEMENT PROFILE

ESHIELS

HOUSING MARKET AREA
Northern

LOCALITY
Tweeddale

POPULATION
N/A

PLACEMAKING CONSIDERATIONS

Eshiels is located in the heart of the Tweed Valley Special Landscape Area. The character of Eshiels has been established particularly by its layout and setting – it is located where the lower slopes of Cardie Hill and Falla Brae slope down to meet the River Tweed.

Located nearby, and set within the Tweed Valley Forest Park is Glentress. The Glentress Forest is a hub for many activities that attracts locals and visitors alike. To the western edge of the settlement is the category 'B' Listed (former gasworks) railway buildings, which now house the Council's recycling centre. To the east of the Eshiels sits the remains of two Roman camps and which are designated a scheduled monument.

CHANGING CONTEXT

Due to the shortage of available business and industrial land within the central Tweeddale area, it has been necessary to identify land for a new Business and Industrial site at Eshiels. Eshiels was identified as the most preferable location following extensive consultation and the consideration of other options. The allocation is located to the north of the A72.

KEY INFRASTRUCTURE CONSIDERATIONS

With the new allocation for business and industrial land, there is a requirement for a new vehicular access to be created from the A72 into the site.

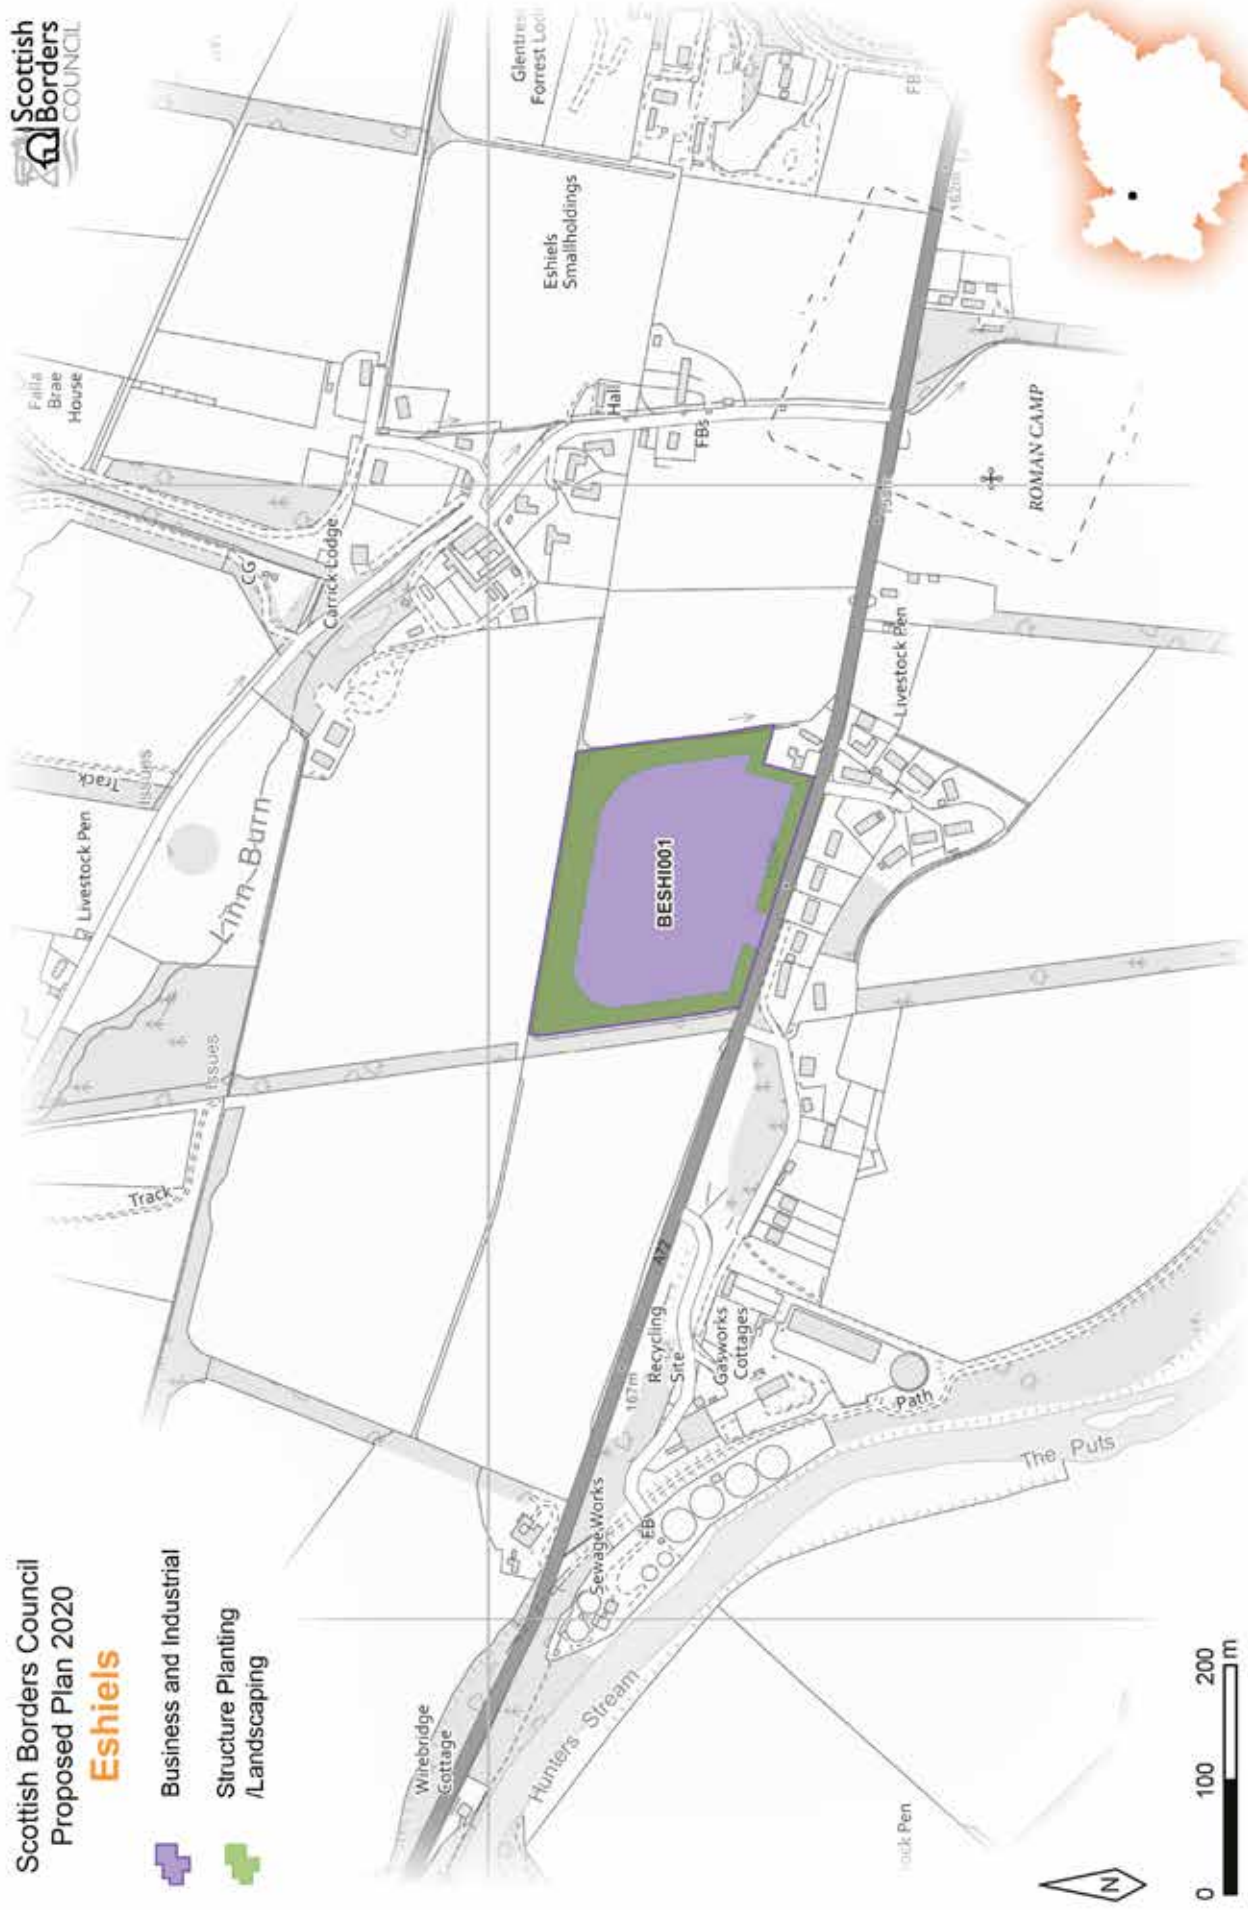

DEVELOPMENT AND SAFEGUARDING PROPOSALS

BUSINESS AND INDUSTRIAL

SITE REFERENCE	SITE NAME	SITE SIZE (HA)	INDICATIVE SITE CAPACITY
BESHI001	Land at Eshiels	4.9	N/A
Site Requirements			
<ul style="list-style-type: none"> • This is a business and industrial site as defined in Policy ED1 • Flood Risk Assessment required, to assess the risk from the Linn Burn and any small watercourse which flows through and adjacent to the site. The watercourse which runs through the site should be protected and enhanced as part of any development. The River Tweed may also require consideration. Consideration will need to be given to bridge and culvert structures within and adjacent to the site which may exacerbate flood risk • A maintenance buffer strip of at least 6 metres must be provided between the watercourse and any built development. Additional water quality buffer strips may also be required • It appears that there may be a culverted watercourse at the southern end of the site, therefore a feasibility study will be required to investigate the potential for channel restoration • There is no public foul sewer within the vicinity. Explore the opportunity to provide satisfactory sewerage provision • Protect and enhance the existing boundary features, where possible. Buffer areas for new and existing landscaping will be required • Planting, landscaping and shelterbelt required, to provide mitigation from the impacts of development from sensitive receptors and to help integrate the site into the wider setting • The long term maintenance of landscaped areas must be addressed • Assessment of ecology impacts and provision of mitigation, as appropriate • Mitigation to ensure no significant effect on River Tweed Special Area of Conservation / Sites of Special Scientific Interest • The setting of Eshiels Roman Camp to be considered in the design and layout of the site • Archaeology investigation, cultural heritage statement and appropriate mitigation thereafter • Consideration of consistency of materials in the design of the site to assist in ensuring an overall cohesive development • New junction onto the A72 would be required • Transport Assessment/Statement will be required for any development • Drainage Impact Assessment and Water Impact Assessment are required in respect of Waste Water Treatment Works and Water Treatment Works • Potential contamination to be addressed.

SETTLEMENT PROFILE

ETTRICK (HOPEHOUSE)

HOUSING MARKET AREA
Southern

LOCALITY
Eildon

POPULATION
83

PLACEMAKING CONSIDERATIONS

There are a number of building groups located within the Ettrick Valley along the B709, including Ettrick, Hopehouse, Tushielaw and Crosslee. Although there is no longer a local school or public house within the area, the presence of a church and village hall make the aforesaid building groups suitable for small housing allocations. Maintaining a viable population to support the retention of local facilities in this remote area is desirable.

The largest cluster of buildings in this settlement group is at Hopehouse, which straddles Hopehouse Burn, a tributary of the Ettrick Water. Hopehouse consists of a prominent steading called Wardlaw that is to the north of the B709, together with a number of small cottages and detached houses. A small caravan park occupies land between the building group and Ettrick Water to the south-east.

The settlement has a southerly aspect and sits in an attractive upland landscape with impressive views of the surrounding high hills.

The development proposals at Hopehouse envisage the construction of around fifteen new dwellings.

KEY INFRASTRUCTURE CONSIDERATIONS

This settlement is identified within the Council's Local Flood Risk Management Plans as being at risk of flooding. Any development proposals should therefore be subject to early consultation with the Council's Flood and Coastal Management Officer, and SEPA, having regard to SEPA's Indicative River and Coastal Flood Map (Scotland) and any other relevant flood risk information. A flood risk assessment may be required and may influence the scale and layout of any development at a particular location.

SETTLEMENT PROFILE

ETTRICKBRIDGE

HOUSING MARKET AREA
Central

LOCALITY
Eildon

POPULATION
167

PLACEMAKING CONSIDERATIONS

The character of Ettrickbridge is established by its main street from the church to the hall and its rural setting. Local facilities include a public house and primary school.

The Ettrick Water, immediately to the south, is part of the River Tweed Special Area of Conservation, a wildlife site of international importance.

There is one area, Kirkhope Sports Club, identified as a key greenspace. The existing cemetery is located to the north of the village.

Development to the south of the settlement will be resisted when it exacerbates flood risk or impacts on the international nature conservation value of the Ettrick Water. Small scale expansion of the village over more recent years has taken place off Woodend Road on the north-eastern edge of the village.

PREFERRED AREAS FOR FUTURE EXPANSION

The preferred area for future expansion beyond the period of this Local Development Plan will be to the north of the settlement, but is dependent upon improved road access. This will require further detailed assessment during the next Local Development Plan review.

SETTLEMENT PROFILE

EYEMOUTH

HOUSING MARKET AREA
Berwickshire

LOCALITY
Berwickshire

POPULATION
3,681

PLACEMAKING CONSIDERATIONS

Eyemouth sits on the Berwickshire coastline, which is designated as a Special Landscape Area (SLA) and covers the rocky coastline of the Borders. Any proposal for development that may affect the SLA will need to take cognisance of the requirements of Policy EP5. Eyemouth has considerable scenic attraction with its coastal location and dramatic headlands. The harbour lies at the mouth of the Eye Water which separates the town from the area of Gungreen. With Gungreen House as a backdrop, the harbour is a picturesque quarter of the traditional fishing village.

The town has grown outward from the harbour and the mouth of the Eye Water, away from the High Street and Church Street. Eyemouth town centre runs along the High Street into Church Street and spreads into the pedestrianised wynds and squares off Chapel Street and George Street. Modern housing has spread over to the Gungreen side of the harbour but is mainly located on the western side of the town. There has been recent housing development at Acredale to the north west of Eyemouth.

Eyemouth attracts a number of tourists and there is a relatively strong retail presence, with a number of independent retailers still trading. The Northburn Caravan Park is located to the north west of Eyemouth and continues to play an important role in Eyemouth's economy.

The Conservation Area of Eyemouth includes the town centre, harbour and a series of old fortifications dotted along the coastline. A number of important features contribute to the character of the Conservation Area. The Town's harbour is essential to the character of the place and it is inextricably linked to the traditional layout of Harbour Road. The coast brings an additional element to the townscape quality along coastal walk and Marine Parade. The Burgh Chambers, Gungreen House, Paxton Terrace and Armitage Street are all good examples of traditional architecture. There are a range of property types evident, from single storey to three and a half storeys. Development must aim to contribute to the existing character of the Conservation Area and to individual buildings.

The Berwickshire and North Northumberland Coast Special Area of Conservation (SAC) is located around the coast of Eyemouth and any proposal which could impact upon this designation will have to meet the requirements of Policy EP1. There are also two SSSI sites, Berwickshire Coast and Burnmouth Coast, which are protected by Policy EP2. The coastal economy at Eyemouth is important to the local area. There has been a change in context at Eyemouth over recent years in that there is now the opportunity for the town to offer a key location for emerging offshore renewable energy projects.

There are four housing allocations, two business and industrial allocations, one mixed use allocation and four redevelopment allocations within Eyemouth. The redevelopment allocation (REYEM007) has been brought forward as part of the current LDP. Roads infrastructure has been put in place within the allocated business and industrial sites (BEYEM001 and zEL6) to the south east. This provides an opportunity for businesses to locate within Eyemouth. The housing allocation (BEY1) at Barefoots which adjoined the Caravan Park has been removed from the Plan, at the request of the landowner.

A Core Activity Area is identified within Eyemouth which covers a block of the High street to the corner with Chapel Street and part of the block opposite to the corner with Renton Terrace. The Core Activity Area represents the core area for public activity in Eyemouth.

CHANGING CONTEXT

The Northburn Caravan Park has expanded in recent years, with additional pitches to the north west of Eyemouth. This continues to contribute towards the economy of not only Eyemouth but the wider area.

PREFERRED AREAS FOR FUTURE EXPANSION

The roads on either side of the Harbour area are at risk of coastal and fluvial flooding. The Netherbyres Gardens and Designed Landscape is located to the south of the settlement boundary and development is constrained here to protect the status and historic character of the area, as well as the contribution to the fine setting of the town along its western edge. Future development is constrained to the south east by the elevation, exposure on the open slopes and by the role that the ridges make in containing and providing a robust edge to the settlement. Land is constrained to the south west by the steep gradients and high visibility of the landform, while land to the west is constrained by the exposure and visual impact of development, which would breach the ridges and skyline. Areas to the south and west of the A1107 are therefore likely to be protected from development. A potential constraint to the future growth of Eyemouth is the surrounding prime agricultural land.

KEY INFRASTRUCTURE CONSIDERATIONS

This settlement is identified within the Council’s Local Flood Risk Management Plans as being at risk of flooding. Any development proposals should therefore be subject to early consultation with the Council’s Flood and Coastal Management Officer and SEPA, having regard to SEPA’s Indicative River and Coastal Flood Map (Scotland) and any other relevant flood risk information. A flood risk assessment may be required and may influence the scale and layout of any development at a particular location.

PLACEMAKING CONSIDERATIONS

Foulden has a stunning setting, lying in an area of sloping arable lowland where the Tweed Valley meets the Northumberland Plain. Foulden is in two parts with the western part characterised by a row of cottages and a war memorial on the north side of the A6105. The eastern part lies on the southern side of the A6105 and is characterised by housing development. The Ha-Ha to the west was created to maximise the views.

The Conservation Area of Foulden includes the single linear built form of the original settlement. Properties tend to be single storey or a storey and a half and mostly front onto the raised pavement. Traditional building materials such as slate, terracotta tiles, sand and whin stone and architectural detailing such as gable brick dormers, skews and quoins prevail. The collective contribution of the built form helps create the character of the Conservation Area. Any development must aim to respect the character of the wider area and the individual buildings.

PREFERRED AREAS FOR FUTURE EXPANSION

The preferred area for any long-term development is the area south of Kerrigan Way dependent on providing suitable road access, consideration of the Ancient Woodland Inventory and investigation of flood risk. Development to the north and south of the settlement will be resisted, particularly at the Conservation Area. The surrounding area is prime agricultural land.

PLACEMAKING CONSIDERATIONS

Fountainhall is of primarily a residential character and has been developed in a linear form running north-west to south-east. Set within the Pastoral Upland Valley of the Gala Water, Fountainhall has many significant views both within and outwith the settlement. The majority of the properties with the exception of those recently built, are constructed of traditional materials such as stone and slate which provides Fountainhall with considerable character.

The Plan identifies the playing field to the south west of the settlement for protection as an important recreational facility for the community.

The Plan provides one housing allocation to the south west of the village.

SETTLEMENT PROFILE

GALASHIELS

HOUSING MARKET AREA
Central

LOCALITY
Eildon

POPULATION
12,982

PLACEMAKING CONSIDERATIONS

Galashiels is in the heart of the Borders and is recognised as a key principal town in providing services, employment and retail offers to a wide catchment area. The town is home to a number of public agencies as well as a part of Heriot-Watt University. An inner relief road has been developed in recent years to ease traffic congestion and flow and the reopening of the Borders Railway, with its key stop at the newly formed Transport Interchange, has brought opportunities to develop the town with the redevelopment of redundant buildings and the creation of jobs. The arrival of visitors at the Transport Interchange should continue to increase vibrancy and footfall in the town centre.

There has been significant growth and change in recent years and the town has been successful in attracting both housing developers and major retailers. There are a number of redevelopment opportunities as well as edge of settlement housing developments. However the topography of the town together with road capacity constraints poses significant challenges for future growth.

The character of Galashiels is mainly established by its town centre and its setting in the steep sided river valley of the Gala Water. The town centre is on the valley floor and is characterised by narrow streets, dating from the nineteenth century, punctuated by public buildings such as the Council Offices and nineteenth century churches.

The River Tweed, to the east, and the Gala Water are part of the River Tweed Special Area of Conservation, a wildlife site of international importance.

The Galashiels Conservation Area includes Bank Street, High Street, Overhaugh Street, Bridge Street and Channel Street along with a number of linking streets. The majority of the main streets run along the valley bed, northwest to southeast. The most important visual focal points are the Bank Street Gardens and around the Cornmill Square.

Galashiels is the main shopping centre in the Scottish Borders, aided by recent retail developments. The Core Activity Area has been reduced in order to promote opportunities for complementary uses within the town centre.

The Plan takes forward one additional new housing site at Netherbarns, with an indicative capacity of forty five dwellinghouses.

Galashiels has six primary schools at Balmoral, Burgh, Glendinning, Langlee, St Peter's and St Margaret's RC. With the exception of Langlee, all schools have been assessed as being in poor condition with accommodation that is not flexible enough to deliver the requirements of a 21st Century curriculum. Analysis of school catchments and rolls has also shown that some have high occupancy

levels while others are below capacity. Across all settings a high proportion of pupils attend schools which are not their catchment school. The Council is currently investigating the potential for co-location and sharing opportunities across the town's primary estate. The Council has also agreed to replace the existing high school and plans for this are progressing for a new secondary campus which is expected to be located on the site currently occupied by Galashiels Academy.

The Galashiels Flood Protection Scheme was completed in 2014 and protects the town from flooding from the Gala Water. Works were undertaken at the Wilderhaugh/Plumtree area to protect the town centre to a 1 in 75 return period level of protection. Significant works were also undertaken at Netherdale adjacent to the watercourse to protect the area to a 1 in 200 plus climate change level of protection. This work has provided increased protection to 140 properties and significantly reduced the flood risk throughout the town. The Flood Prevention Scheme was taken forward under the Flood Prevention (Scotland) Act 1961.

Easter Langlee has operated as a key waste management site for the whole of the Scottish Borders since the 1970s, with landfill and waste management operations. A new waste transfer station has recently become operational at the site, diverting the majority of collected domestic and commercial waste away from landfill. This replaces the landfill operation which will be capped.

There are ten areas, including Bank Street Gardens, Gala Park, Victoria Park and sports fields and allotments, identified as key greenspaces.

CHANGING CONTEXT

As part of the Borders Railway Blueprint Programme, a Masterplan was developed for Galashiels in 2018, to show the key areas for opportunity and development in the town. The Masterplan sets out a medium to long term strategy for the community with the recognition of spaces for commercial, retail, residential and community facilities as well as townscape improvements. The proposals set out within the Masterplan would be considered through the Local Development Plan policies relating to infill development primarily and elements of the masterplan will be developed further. The new Tapestry building in Channel Street is currently under construction and is expected to be open in Spring 2021. It will be a key catalyst in regenerating the town centre.

KEY INFRASTRUCTURE CONSIDERATIONS

This settlement is identified within the Council's Local Flood Risk Management Plans as being at risk of flooding. Any development proposals should therefore be subject to early consultation with the Council's Flood and Coastal Management Officer, and SEPA, having regard to SEPA's Indicative River and Coastal Flood Map (Scotland) and any other relevant flood risk information. A flood risk assessment may be required and may influence the scale and layout of any development at a particular location.

PREFERRED AREAS FOR FUTURE EXPANSION

The Plan identifies land at Hollybush Valley, to the south west of the settlement, for potential longer term mixed use development. This area will be subject to further assessment and review as part of the next Local Development Plan review, and will require a Masterplan to ensure a coherent and holistic approach.

The option of a bypass for Galashiels maybe investigated in the future, both to alleviate traffic congestion in the centre of the town and to enable future development.

The area at Easter Langlee Mains is currently not appropriate for longer term development, but can be reconsidered in future Local Development Plan reviews depending on the development of waste disposal and recycling related facilities in the surrounding area and the requirement to upgrade the Langlee access road.

Development on the hills and woodlands north of the Development Boundary from Ladhope Crescent to Broom Drive will be resisted if it will impact on the setting of the town.

SETTLEMENT PROFILE

GATTONSIDE

HOUSING MARKET AREA
Central

LOCALITY
Eildon

POPULATION
461

PLACEMAKING CONSIDERATIONS

Gattonside benefits from an attractive setting in the Tweed Valley. It is viewed from many points across the valley; particularly prominent are the fields and land to the north side of the main road. The tree lined avenue around the southern edge of the village and down towards the footbridge to Melrose adds much to its setting as do the open fields between the village and the Tweed.

The Conservation Area of Gattonside takes in much of the settlement. Narrow winding streets and paths all contribute to the distinctive spatial identity of Gattonside. Properties tend to be one and a half to two storeys in height but there are also a few single storey properties within the Conservation Area.

Traditional building materials prevail within the Conservation Area and architectural details contribute to the sense of place. It is recommended that any alterations or new development within the Conservation Area should contribute to the retention of its character.

The quality of the countryside around Gattonside is recognised by its inclusion in the Eildon and Leaderfoot National Scenic Area.

The Plan includes a large site for residential development at St. Aidans and a smaller residential site east of Montgomerie Terrace. Further development sites will not be promoted during the plan period as the sensitive character and setting of Gattonside must be protected from overdevelopment.

There are two areas of key greenspace identified in the village, at The Triangle and the School Wynd.

SETTLEMENT PROFILE

GAVINTON

HOUSING MARKET AREA
Berwickshire

LOCALITY
Berwickshire

POPULATION
189

PLACEMAKING CONSIDERATIONS

Gavinton is an estate village intentionally set out around its Green in the 18th Century. Sited on a relatively flat area of land, the village benefits from attractive views, particularly of the surrounding gently rolling land, with large arable and pasture fields.

The Conservation Area is laid out in two short terrace rows and is centred on the rectangular green, surrounded by single and two-storey properties. Building materials that prevail are sandstone, harling and slate. The architectural details include sash and case windows, transom lights and rybats. These elements of the built fabric help form the character of the Conservation Area. Any new development or alterations must therefore aim to respect the individual buildings, the wider layout of the Conservation Area and take account of the features listed.

There is a large housing allocation in Gavinton on the western side which was added as part of the Local Plan Examination. This site has yet to be developed.

PREFERRED AREAS FOR FUTURE EXPANSION

The preferred area for longer term development is the area to the north of the settlement. The area to the south of the settlement should be protected from further development. The area surrounding Gavinton is prime agricultural land.

SETTLEMENT PROFILE

GORDON

HOUSING MARKET AREA
Berwickshire

LOCALITY
Berwickshire

POPULATION
454

PLACEMAKING CONSIDERATIONS

Gordon is a 19th Century village that was formed along the Main Street and Station Road that crosses it. Sited on a relatively flat area of land, Gordon benefits from attractive views within and out of the settlement. The surrounding landscape is gently sloping with large arable and pasture fields.

There are two housing allocations in Gordon, the most recent (AGORD004) has been brought forward as part of the current Plan.

PREFERRED AREAS FOR FUTURE EXPANSION

Development to the north of the settlement will be resisted beyond the existing settlement boundary. A potential constraint to the expansion of Gordon is the surrounding prime agricultural land.

SETTLEMENT PROFILE

GRANTSHOUSE

HOUSING MARKET AREA
Berwickshire

LOCALITY
Berwickshire

POPULATION
129

PLACEMAKING CONSIDERATIONS

The settlement pattern of Grantshouse reflects the valley landform, and was mainly developed in a linear form with a small group of buildings along one side of the A1. Grantshouse is predominantly of a residential character and benefits from the many attractive open fields that give it a countryside setting.

A housing allocation has been brought forward as part of the current Local Development Plan (AGRAN004), located to the north east of the village.

PREFERRED AREAS FOR FUTURE EXPANSION

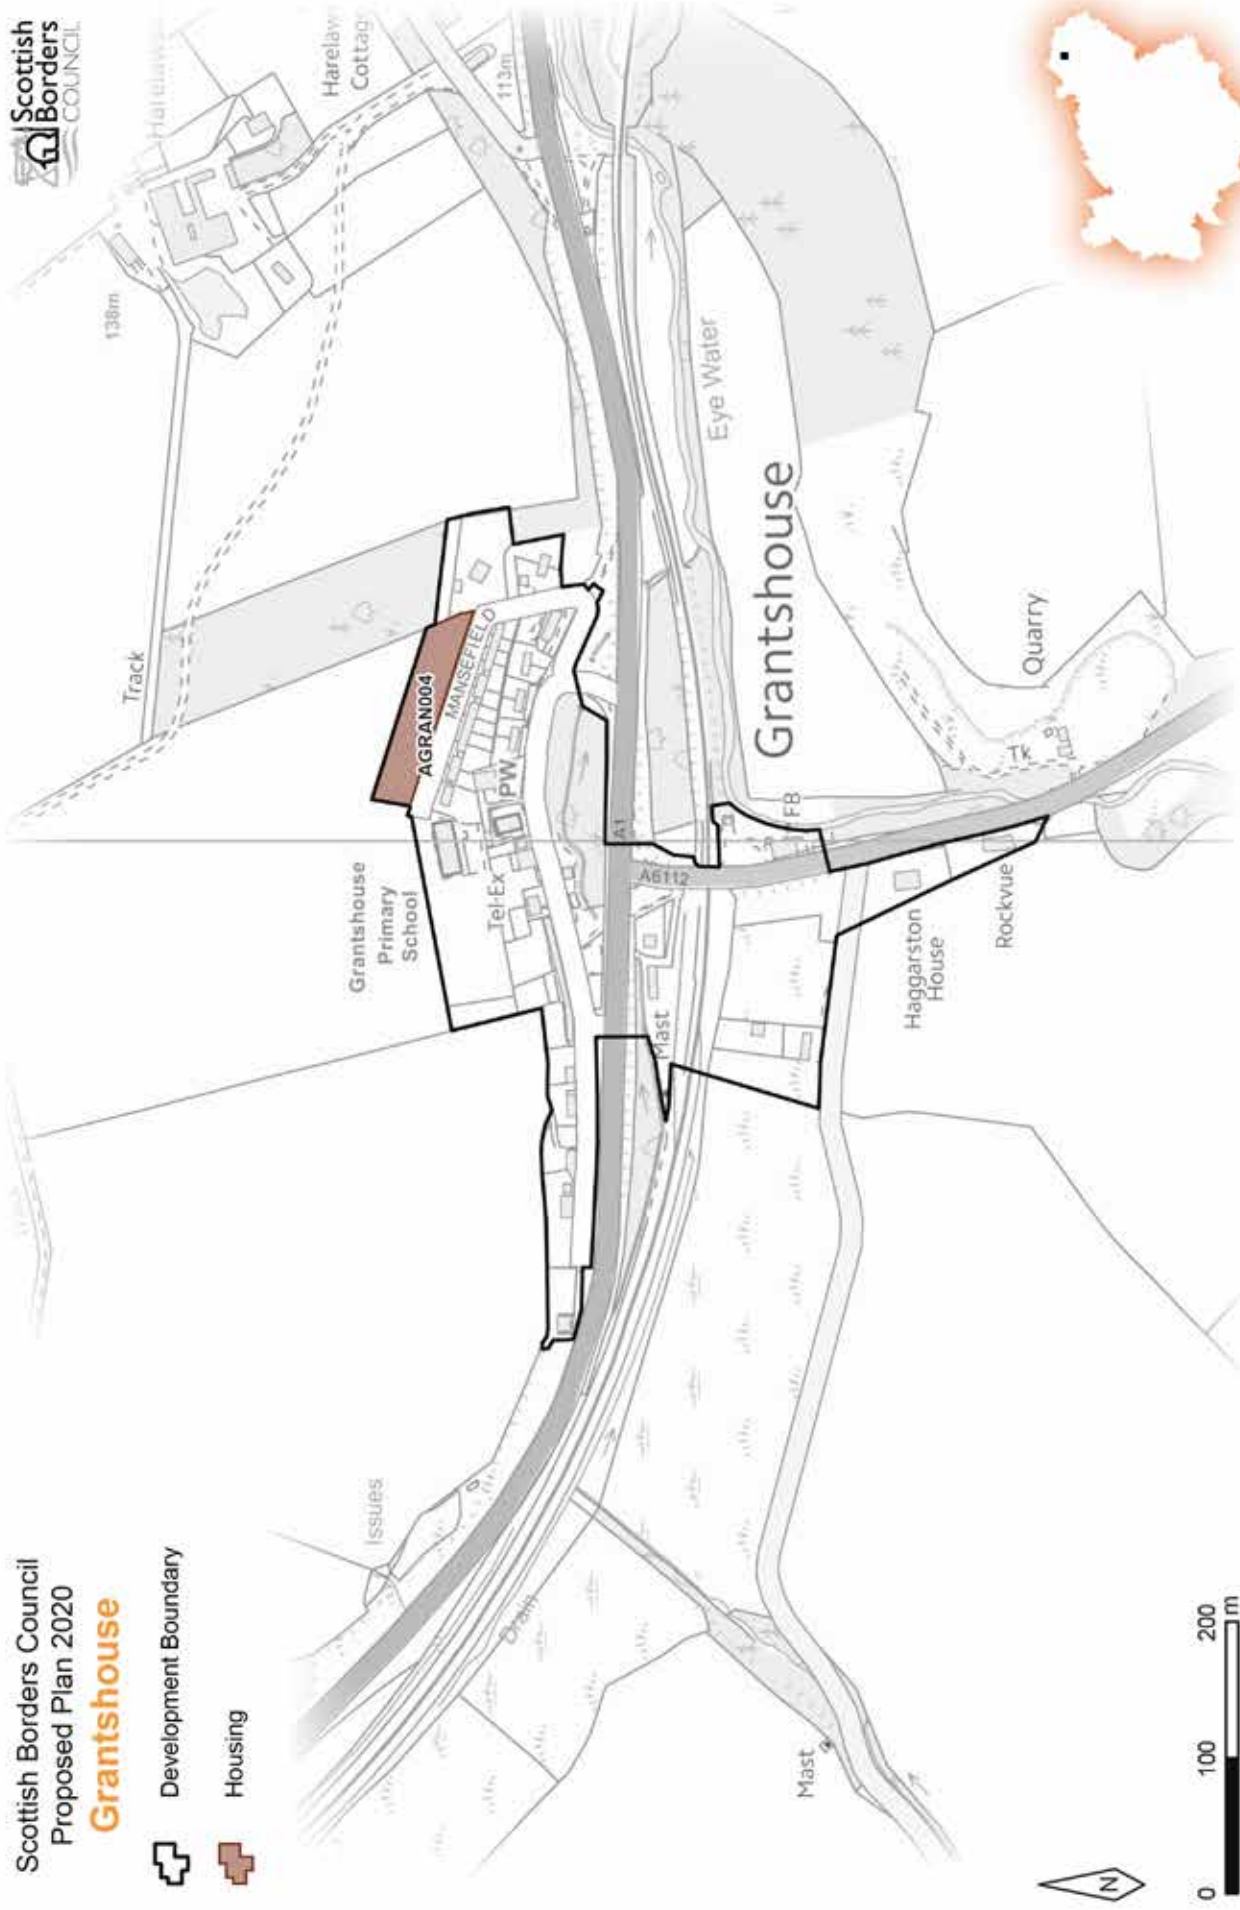

Development to the south will be resisted as this would severely compromise pedestrian safety, due to the proximity of the A1. Other potential constraints to the expansion of the village include the surrounding prime agricultural land and an area of flood risk to the south.

HOUSING

SETTLEMENT PROFILE

GREENLAW

HOUSING MARKET AREA
Berwickshire

LOCALITY
Berwickshire

POPULATION
653

PLACEMAKING CONSIDERATIONS

Greenlaw is located in the hills at the edge of the Lammermuirs with the Blackadder Water running through the town. The settlement originally developed along the High Street, however there have been subsequent developments along Duns Road to the north, marked by post-war Council housing, businesses and a caravan park. There has been further residential development along Wester Row to the south west and Marchmont Road to the east.

The Conservation Area is concentrated along the High Street and around The Square. The majority of properties along the High Street are built to the footpath which contributes to the character of Greenlaw. Properties are generally built in short rows and there is a range of storey level and styles. Building materials such as sandstone, slate and pantiles; and architectural details such as transom lights, sash and case windows and pilasters contribute significantly to the character of the area. Any new development must aim to positively contribute to the character of the Conservation Area.

The Greenlaw former Town Hall is a Category A Listed Building and sits on the corner with Duns Road and The Square, within the key greenspace 'The Green'. The building has seen significant investment in recent years and undergone restoration. The building contributes to the character and appearance of the Conservation Area and the wider settlement.

There are a number of housing allocations within Greenlaw, which are yet to be developed. An additional housing allocation has been brought forward as part of the current Plan (AGREE009), located on a brownfield site to the east of Greenlaw. A former mixed use allocation has also been brought forward as a business and industrial allocation (BGREE005), which will provide opportunities for businesses to locate within Greenlaw.

KEY INFRASTRUCTURE CONSIDERATIONS

This settlement is identified within the Council's Flood Contingency Plan as being at risk of flooding. Any development proposals should therefore be subject to early consultation with the Council's Flood and Coastal Management Officer, and SEPA, having regard to the Indicative River and Coastal Flood Map (Scotland). A flood risk assessment may be required and may influence the scale and layout of any development at a particular location.

PREFERRED AREAS FOR FUTURE EXPANSION

The area at Halliburton Road (SGREE003) is the preferred area for potential longer term development. The area will be subject to further assessment, and will require a future Masterplan to ensure a coherent and holistic approach. A potential constraint to future development to the south, particularly surrounding Greenlaw Mill Farm, is at flood risk.

DEVELOPMENT AND SAFEGUARDING PROPOSALS

HOUSING

SETTLEMENT PROFILE

HAWICK

HOUSING MARKET AREA
Central

LOCALITY
Teviot & Liddesdale

POPULATION
14,353

PLACEMAKING CONSIDERATIONS

Hawick is centred on the River Teviot around its confluence with the Slitrig Water. Both these rivers are part of the River Tweed Special Area of Conservation, a wildlife site of international importance. They are important focal points, especially when viewed from the bridges, including the James Thomson footbridge, and public open spaces, including Wilton Lodge Park. The Teviot Valleys Special Landscape Area is located to the east of the settlement.

Hawick's history can be traced back to the 12th century, and the town grew significantly with the arrival of the industrial revolution, in particular the expansion of the knitwear and textile industries and the introduction of the railway.

The town centre is a Conservation Area which includes all the High Street and the historic core around Drumlanrig Square to the south. Properties along the High Street date mainly from the Victorian era and include a range of architectural styles dominated by the impressive Scots baronial Town Hall. The Conservation Area has retained many of its distinctive characteristics, with the High Street having a strong urban feel. There is still evidence of the medieval pattern of burgage plots or 'rigs' here. A number of textile mills are still in existence, including the Category 'A' listed Tower Mill – one of three 'A' Listed Buildings in the Conservation Area. There are also 130 more Listed Buildings of lesser designation.

In the Hawick Conservation Area there is a variety of building types, styles and periods, reflecting the history, diversity and development of the town. Buildings are chiefly of stone with slate roofs and contain a range of interesting architectural details. All these elements contribute to the distinctiveness of the Conservation Area and should be respected when development or alterations are proposed.

Hawick has experienced significant economic decline largely as a result of the contraction of the local textile industry. With its rural location, commuting to other work areas is more challenging, limiting alternative employment opportunities. The town remains in need of regeneration and there have been recent positive developments in this respect. A £3.6 million funding boost was announced in the Summer of 2017, which supported a business incubator centre, at the former Armstrong's building on Oliver Place/Teviot Crescent, the development of four industrial units at Galalaw Industrial Estate (now completed) and the upgrading of existing business facilities in Hawick's Tower Mill. These investments built upon the Hawick Action Plan which is structured around three key themes; making Hawick a 'Great Place for Working and Investing'; a 'Great Place for Living and Learning'; and a 'Great Destination to Visit'. Two recent projects in the town, with the expansion of the Borders College Campus and investment to redevelop key buildings in the town centre, have been brought in by the South of Scotland Economic Partnership. These projects have and will contribute to the overall regeneration of the town.

A total of eleven redevelopment sites are identified in this plan to encourage the re-use of previously developed land. These are mainly former mill sites, but also include the former Cottage Hospital – a Category B Listed Building in need of a new use.

Hawick is an important centre within the Central Borders Strategic Development Area and has a wide range of housing and business/industrial opportunities to enable growth to take place, including the strategic business and industrial site at Galalaw on the northern edge of the town. An additional area of land has been allocated for housing at Burnfoot, adjacent to Galalaw. In recent years, new retail units have been developed on the north side of the River Teviot on Commercial Road, so the town centre boundary has been extended accordingly.

A Flood Protection Scheme, approved in December 2017, is currently being implemented in the town, this will deliver protection from a 1 in 75 flood event to over 900 residential and commercial properties at risk along the River Teviot and Slitrig Water. The works are scheduled for completion in late 2022.

There are a total of fifteen key greenspaces identified in the town, including the Volunteer Park, Wilton Lodge Park and various allotment sites. Wilton Lodge Park in the town has had recent improvements as part of a £3.64 million regeneration project funded by the Heritage Lottery Fund and Scottish Borders Council which has seen new facilities provided including a playpark and extra footbridge over the River Teviot and a café. Improvements have also been made to footpaths, lighting and signage in the park which has just been awarded Green Flag Status, a gold standard for outdoor spaces. This is a hugely successful investment in a facility which will attract visitors to the town.

CHANGING CONTEXT

In April 2019, the Council received approval for a bid for funding for a Conservation Area Regeneration Scheme (CARS) for the town by Historic Environment Scotland (HES). This investment will help to conserve and enhance historic town centre buildings, address issues with key priority properties and encourage general repairs to others. This is a welcome investment for the Conservation Area of the town which has seen some deterioration in recent years.

The Council remains supportive to see the southern extension of the Borders Railway to Hawick and Carlisle in accordance with SESplan policy. The indicative line of the railway, which is largely coincident with the disused railway line, is therefore protected from development. The UK and Scottish Governments have indicated that funding may be available through the Borderlands proposal to undertake feasibility work on the plans for an extension to Borders Rail from Tweedbank to Carlisle.

In light of the changing role of town centres the core activity area has been removed, which consequently allows a wider range of uses within the town centre.

KEY INFRASTRUCTURE CONSIDERATIONS

This settlement is identified within the Council's Local Flood Risk Management Plans as being at risk of flooding. Any development proposals should therefore be subject to early consultation with the Council's Flood and Coastal Management Officer, and SEPA, having regard to SEPA's Indicative River and Coastal Flood Map (Scotland) and any other relevant flood risk information. A flood risk assessment may be required and may influence the scale and layout of any development at a particular location.

PREFERRED AREAS FOR FUTURE EXPANSION

Development to the south of the settlement will be resisted if it will exacerbate road congestion in the Loan.

SETTLEMENT PROFILE

HEITON

HOUSING MARKET AREA
Central

LOCALITY
Cheviot

POPULATION
122

PLACEMAKING CONSIDERATIONS

Heiton is a linear settlement formed along the A698, the main road from Kelso to Hawick. There is a wide mix of house types within Heiton, including traditional terraced housing to the north of the village and larger detached units with some back-land development in the southern part.

The Plan identifies two housing sites within Heiton along the eastern side of the Main Street at both the north and south of the village. The Plan also identifies one greenspace for protection at Heiton Recreational Park.

SETTLEMENT PROFILE

HERIOT STATION

HOUSING MARKET AREA
Northern

LOCALITY
Eildon

POPULATION
148

PLACEMAKING CONSIDERATIONS

Heriot Station is located in the valley of the Gala Water, and is associated with a series of small building groups in the lower end of the valley of the Heriot Water.

The settlement is set within the pastoral upland valley of the Gala Water. Services such as the school and church are located further up the valley of the Heriot Water to the west.

The character of Heriot Station is established by single sided development along Heriot Way facing south down the valley of the Gala Water, with a cluster of residential areas to the rear. Properties are generally single to a storey and a half in height; those that front onto Heriot Way are generally of traditional character, detached and constructed of traditional materials such as harl and slate. A few semi detached properties however, do exist within the settlement.

The Plan identifies the play area as an area of greenspace to be protected.

PREFERRED AREAS FOR FUTURE EXPANSION

The Plan does not provide any housing allocations or areas for longer term development in Heriot Station.

SETTLEMENT PROFILE

HUTTON

HOUSING MARKET AREA
Berwickshire

LOCALITY
Berwickshire

POPULATION
126

PLACEMAKING CONSIDERATIONS

Hutton is located on the lowlands associated with the River Tweed. The settlement is flat and surrounded by arable fields, which are designated as prime agricultural land.

There is one housing allocation within Hutton which is yet to be developed and a protected greenspace immediately to the north of the housing allocation.

DEVELOPMENT AND SAFEGUARDING PROPOSALS

SETTLEMENT PROFILE

INNERLEITHEN

HOUSING MARKET AREA
Northern

LOCALITY
Tweeddale

POPULATION
3,031

PLACEMAKING CONSIDERATIONS

Innerleithen sits on a significant bend in the River Tweed at a point where the valley floor opens out into wide haughland, and the majority of the built up area of the town lies on this haughland. The entrances into the town are generally quite pleasing and there is a good integration with the adjoining landscape to the north due to the mature landscape framework. The River Tweed and the flood plain dominate the southern side of the village.

The town developed in the late 18th century on the development of the textile industry and the publication in the early 19th century of Sir Walter Scott's St Ronan's Wells, which extolled the restorative qualities of the spring waters. At this time the High Street was developed but it was not until the end of that century that the major expansion of the settlement occurred extending behind the High Street to the south and to the south east beyond the Leithen Water. Another major expansion also occurred after the 2nd World War with a major public housing scheme in the east towards the former Pirn House.

The character of Innerleithen owes much to the Leithen Water that runs through the town to the Tweed. A lade to the west of the river supplied several woollen mills (one of them was the first in the Borders, established in 1788), a sawmill and Smail's Printing Works (now run by the National Trust for Scotland). Innerleithen was an ideal location for the woollen industry. Its fast flowing river offered waterpower to the mills and wool was produced in the surrounding pastoral countryside. The development of the woollen industry did not begin as a gradual process, but on a large scale with the building of Brodie's Mill.

The Conservation Area of Innerleithen includes much of the High Street, Leithen Road, and part of Traquair Road, Waverley Road, Horsbrugh Street, and Pirn Road. The majority of properties within the Conservation Area are 19th century and residential and follow a fairly general pattern. Architecturally they are quite plain as individual units but rely for their interest and integrity on their proportioning, detailing and uniformity as a group of buildings. Snecked whin stone, sandstone, harling, stone quoins, and slate are the main building materials. Most properties have timber sash and case windows and solid timber doors, and dormers. They are characteristically of a small scale either single, one and a half or two storeys in height.

The main central area focuses on the High Street, with a diverse range of services and facilities to serve the local community including a bank and a post office. The town benefits from a supermarket which is situated just outwith the town centre along the Peebles Road. The town centre itself is considered to be one of the healthier town centres within the Scottish Borders with generally a low vacancy rate.

The Plan provides three housing allocations, two of which are located to the north of the settlement off Leithen Road, and the third is off the Peebles Road. Two Business and Industrial sites are identified off Traquair Road, of which site zEL200 (Traquair Road) is safeguarded. As part of the Housing SG the mixed use site MINNE001 (Caerlee Mill) was allocated and MINNE003, located on the western edge of the settlement, has been brought forward within this Plan. Both of these mixed use sites will require an element of business and industrial land.

The Plan identifies two greenspace areas for protection within Innerleithen, the Innerleithen Recreation Ground and the outdoor space at St Ronan's Primary School. These spaces provide the village community with important recreation opportunities.

KEY INFRASTRUCTURE CONSIDERATIONS

This settlement is identified within the Council's Local Flood Risk Management Plans as being at risk of flooding. Any development proposals should therefore be subject to early consultation with the Council's Flood and Coastal Management Officer, and SEPA, having regard to SEPA's Indicative River and Coastal Flood Map (Scotland) and any other relevant flood risk information. A flood risk assessment may be required and may influence the scale and layout of any development at a particular location.

PREFERRED AREAS FOR FUTURE EXPANSION

Once the allocated sites are fully developed the preferred area for future expansion beyond the period of this Local Development Plan will be the area at Kirklands/Willowbank (SINNE001). This site will be subject to further assessment and review as part of any future Local Development Plan and will require a Masterplan to ensure a coherent and holistic approach.

DEVELOPMENT AND SAFEGUARDING PROPOSALS

SETTLEMENT PROFILE

JEDBURGH

HOUSING MARKET AREA
Central

LOCALITY
Cheviot

POPULATION
4,030

PLACEMAKING CONSIDERATIONS

The historic settlement of Jedburgh was built either side of the Jed Water which runs on a north-south axis, and is framed by Lanton Hill (280 metres) and Black Law (338 metres) to the west and south west and by lower more undulating hills to the east.

The Conservation Area of Jedburgh includes much of the historic core of the town including the Abbey and the Castle Gaol. Similar to Edinburgh Old Town in its layout, Jedburgh has a long street that rises terminating with the castle at the highest point. The High Street is characterised by a mix of commercial, residential and social facilities, the central area is focused around where the Mercat Cross once sat with roads leading off in various directions.

Properties within the Conservation Area are built in rows with some detached properties particularly along Friarsgate. Ranging from two to three and a half storeys in height, properties vary in styles. Although the elements highlighted above are important and contribute greatly to the character of Jedburgh they do not do so in isolation. Building materials and architectural details are also just as important. Sandstone, some whinstone, harling, and slate all help to form the character. Architectural details such as sash and case windows (though there are some unfortunate uPVC replacements), rybats, margins, detailed door heads above some entrances and in some instances pilasters all add to the sense of place. Any new development must therefore aim to contribute to the existing character of the Conservation Area.

The views within the valley floor are more limited by the topography and vegetation of the settlement. Nevertheless, the views from the south to the Abbey are particularly important and require protection. From the higher parts of Jedburgh there are more extensive views over the town to the east and west.

Jedburgh has a healthy housing land supply of allocated sites and only one new housing site has been added to the Plan making a total of nine allocated housing sites within the town. A business and industrial site at Wildcat Wood, six safeguarded business and industrial sites and four redevelopment opportunities have also been identified.

Several greenspaces within Jedburgh are protected due to their value within the community these include Jedforest Bandstand, Allerley Well Park and Howden Park.

CHANGING CONTEXT

Jedburgh has also benefited from a Conservation Area Regeneration Scheme which focuses on a range of heritage and conservation based regeneration projects within the town. This will support the repair of traditional buildings within the town centre and enhance the Jedburgh Conservation Area.

A new Intergenerational Community Campus has been developed at Hartrigge Park. This replaces Jedburgh Grammar, Howdenburn and Parkside Primary Schools within the town. The new campus also provides a variety of community facilities for the residents of Jedburgh.

KEY INFRASTRUCTURE CONSIDERATIONS

Development land in Jedburgh is severely restricted by the topography and road network. Once the allocated sites have been developed, without serious investment in the road network, there is no identifiable preferred area of expansion for Jedburgh.

This settlement is also identified within the Council's Local Flood Risk Management Plans as being at risk of flooding. Any development proposals should therefore be subject to early consultation with the Council's Flood and Coastal Management Officer, and SEPA, having regard to SEPA's Indicative River and Coastal Flood Map (Scotland) and any other relevant flood risk information. A flood risk assessment may be required and may influence the scale and layout of any development at a particular location.

PREFERRED AREAS FOR FUTURE EXPANSION

As previously stated, future areas of expansion within Jedburgh will be looked at in more detail in subsequent plans. Serious considerations must be made regarding the road network and where best to locate future development which impacts least on the character and setting of Jedburgh. Under the present circumstances, any development outwith the allocated sites proposed during this local development plan period will be resisted. There may be potential in the long term future for development to the north if the road network issues can be resolved. However, further development on Sharplaw Road will be resisted due to the severe road network restrictions.

SETTLEMENT PROFILE

KELSO

HOUSING MARKET AREA
Central

LOCALITY
Cheviot

POPULATION
6,859

PLACEMAKING CONSIDERATIONS

The character of Kelso is established from its setting along an attractive meander in the River Tweed. It takes considerable benefit of its open riverside with many walkways alongside. Within the centre, the Square forms a significant part of the character of the Market Town. Within the town centre a one-way Traffic Management Scheme has been established to provide safer and more accessible routes for pedestrians and less vehicular congestion whilst aiming to retain, and indeed enhance, the character of the historic main square and surrounding street surfaces.

Residents and visitors of Kelso enjoy many scenic views that look out and into the settlement. From the south the historic Kelso Abbey can be seen. The River Tweed separates the town in a north-south divide and therefore allows for many attractive views, the most attractive being from the west on the A699 route past Floors Castle. The views from other approaches to the town are less dramatic and are shortened by the topography and landscape features that exist in the area.

The town lies within the Tweed Lowlands Regional Landscape Area and the River Tweed is designated as a Site of Special Scientific Interest and Special Area of Conservation reflecting its importance to the biodiversity of the Borders. The Floors Castle estate which lies to the west of the town is listed within the Inventory of Gardens and Designed Landscapes.

The Conservation Area of Kelso includes the historic core of the town, including the ruins of the 12th century Abbey, the 18th century Market Square and the Kelso Bridge, as well as the surrounding 19th century buildings and the main approaches into the town. Built in 1800, Kelso Bridge was the first bridge in the world to have elliptical arches.

The Kelso Conservation Area retains many of the distinctive townscape characteristics that can only be found in this Roxburghshire market town. Main streets within the Town run in a radial pattern and centre on the Market Square. This Square is the largest formal square in Scotland and is still complete with setts. Around the Market Square, buildings are made-up of a rich assortment of commercial properties while a large part of Roxburgh Street is residential. A variety of different building styles and types are present throughout the Conservation Area and these all add to the uniqueness of the place. Both Shedden Park and the Abbey provide a significant contribution not only to the amenity of the Town but also to its attractiveness. Architectural details such as the traditional shop fronts, the classical proportions and details like the frieze, cornices and other highly ornamental carved stonework, sash and case windows, panel doors, and brick chimney stacks all add greatly to the Conservation Area. Any new development must therefore aim to contribute to the existing character of the Conservation Area.

The Plan identifies nine housing allocations, three business and industrial sites; two safeguarded business and industrial sites, as well as two redevelopment opportunities.

Kelso is also an important employment hub within the Scottish Borders; a new site has been identified south east of the existing Pinnaclehill Industrial Estate. Part A of the site at Wooden Linn II (5ha) has been allocated as a high amenity business site and Part B (12ha) is a business and industrial site as defined in Policy ED1. Policy ED1 provides rigorous protection of high amenity business sites which are protected for Class 4 use. Sites at Wooden Linn and the Extension to Pinnaclehill Industrial Estate are allocated within the Plan for business and industrial land which allows for the development of Class 4, 5 and 6 uses. Allocated sites at Pinnaclehill Industrial Estate and Spylaw Road/ Station Road have also been safeguarded for these uses.

Within Kelso, several greenspaces have been identified for protection within the Plan due to their high amenity and community value; these include Shedden Park, Kelso Rugby Club and Mayfield Riverside Walk.

CHANGING CONTEXT

There have been two new schools recently built in Kelso, a new High School along Angraflat Road and a replacement Primary School at Broomlands. The former Kelso High School site has been allocated as a redevelopment opportunity and a Development Guidance Brief has been produced for the site.

Kelso has also benefitted from a Townscape Heritage Initiative (THI) which regenerated the historic centre of Kelso and upgraded the streetscape throughout the town centre. Whilst it is fully acknowledged that the role of town centres are changing Kelso town centre is continuing to perform very well in terms of low vacancy rates and high footfall in comparison with other town centres in the Scottish Borders.

Kelso Town Centre is performing well and as such it is considered that the town's Core Activity Area should remain unchanged however the town centre performance will continue to be monitored as part of the Council's Retail Survey.

KEY INFRASTRUCTURE CONSIDERATIONS

This settlement is identified within the Council's Local Flood Risk Management Plans as being at risk of flooding. Any development proposals should therefore be subject to early consultation with the Council's Flood and Coastal Management Officer, and SEPA, having regard to SEPA's Indicative River and Coastal Flood Map (Scotland) and any other relevant flood risk information. A flood risk assessment may be required and may influence the scale and layout of any development at a particular location.

PREFERRED AREAS FOR FUTURE EXPANSION

The areas of Longer Term Development on the settlement map are indicative only and will require further detailed assessment as part of the next Local Development Plan Review. The preferred areas are, the area to the north west of Kelso (SKELS004) and there is also potential for further longer term development in the area to the north east of Kelso at Hendersyde North Lodge (SKELS005). Any development to the east of Broomlands and west of Wallacenick will be resisted.

SETTLEMENT PROFILE

LANTON

HOUSING MARKET AREA
Central

LOCALITY
Cheviot

POPULATION
128

PLACEMAKING CONSIDERATIONS

Lanton is situated on the northern slopes of the Lanton Hill and is surrounded by the Teviot Valleys Special Landscape Area. The village was originally formed in two main groupings, the first around Lanton Tower, the former Inn and smithy to the South West; and the second around the former school and Lanton Farm in the north east. The remainder of the village comprises detached houses and bungalows set in well landscaped gardens, including several mature trees that contribute significantly to the landscape quality of the settlement.

The most recent development has been small scale infill at the north eastern end of the village. The absence of local services and public transport means that significant levels of development should not be encouraged. Development beyond the plan period should be kept to a minimum and be limited to small scale infill. Development which would negatively impact on the character and setting of the village will be resisted.

There is one area, Lanton Community Garden, identified as key greenspace.

-  Key Greenspace

SETTLEMENT PROFILE

LAUDER

HOUSING MARKET AREA
Northern

LOCALITY
Eildon

POPULATION
1,699

PLACEMAKING CONSIDERATIONS

The settlement is located in the upland valley of the Upper Leader. The Leader Water to the east, is part of the River Tweed Special Area of Conservation, a wildlife site of international importance. The character of Lauder is established by its wide High Street and countryside setting. The focal points of the town are the Town Hall and Parish Church. Thirlestane Castle and its Garden and Designed Landscape to the east are important tourist attractions and contribute to the setting of the settlement.

Lauder Conservation Area includes all of the central part of the settlement and is one of the best preserved examples of an historic burgh in Scotland. Despite the expansion of the town in the 19th and 20th centuries, Lauder has retained its historic street pattern of a main street with back lanes to the east and west and this defines the extent of the Conservation Area. Only limited development within the historic core has taken place and this has respected the original character. The majority of traditional buildings are two storey though there are many single, storey and a half, and two and a half storeys. Buildings line both sides of the High Street, including a number of gable end houses. Historic building materials range from whin and sand stone, harling, slate and brick chimneys. The high boundary walls, in particular those along Castle Wynd, are an important feature within Lauder and the Conservation Area and these should be retained.

The Town Hall is the major visual focal point within the town and dominates the town centre by both its physical height and isolated position at the end of the Market Place. It is also mainly along the Market Place where a diverse range of services and facilities to serve the local community can be found including a post office. The town also benefits from a supermarket which is situated near the northern edge of the settlement along the Edinburgh Road. The town itself is considered to be one of the healthier towns within the Scottish Borders with generally a low retail vacancy rate.

The Plan identifies the Old Castleriggs Recreational Ground for protection; this space provides the village community with important recreation opportunities.

The Plan also provides two housing allocations one at Wyndhead and a further at West Allanbank. A redevelopment opportunity is also identified at the Burnmill site. Furthermore the Plan identifies two business and industrial sites to the north of the settlement.

PREFERRED AREAS FOR FUTURE EXPANSION

It is recognised that Lauder has been subject to significant development in recent years. The Local Development Plan does not identify any areas for longer term development in Lauder for residential development. There may be limited opportunities for expansion to the west beyond the period of this Local Development Plan. However, should further land for business use be required, it is envisaged that this will take place within the north/north west of the settlement.

Development to the east of the settlement in the Thirlestane Castle Garden and Designed Landscape will be resisted if it would adversely affect it.

SETTLEMENT PROFILE

LILLIESLEAF

HOUSING MARKET AREA
Central

LOCALITY
Eildon

POPULATION
347

PLACEMAKING CONSIDERATIONS

The village sits on a low ridge within the wooded upland fringe valley of the Ale Water with the rolling farmland of the Minto Hills to the south. The Ale Water, to the north, is part of the River Tweed Special Area of Conservation, a wildlife site of international importance.

Lilliesleaf is characterised by its linear layout either side of the Main Street (B6359). The isolated village church is a distinctive feature, set amongst fields to the east. The buildings along Main Street are mainly stone or rendered, one and half or two storey. Local facilities include a primary school, church, coffee shop and two public houses.

The most recent development in Lilliesleaf is taking place at St Dunstan at the western end of the village. Further expansion is planned at this end of the village through the allocated site West of St Dunstan. A former housing allocation within the centre of the village adjacent to Muselie Drive has been removed as this site has recently been taken over by the Community in order to form a village green. This will create a positive focal point and facility within the centre of the village.

One area of key greenspace is identified on the Main Street as well as the aforesaid newly formed village green within the centre of the village.

PREFERRED AREAS FOR FUTURE EXPANSION

Beyond the plan period, development will be limited to small scale expansion and infill. Development to the north of the settlement will be resisted if it impacts on the landscape setting of the settlement or has a significant effect on the natural heritage interest of the Ale Water. Future expansion is indicative only and will require further detailed assessment during the next Local Development Plan Review.

SETTLEMENT PROFILE

LONGFORMACUS

HOUSING MARKET AREA
Berwickshire

LOCALITY
Berwickshire

POPULATION
192

PLACEMAKING CONSIDERATIONS

Longformacus is a small village located on upland fringe moorland in the shadow of the Lammermuir Hills. The Dye Water runs through the village with the majority of properties located on the northern side, generally on Duns Road or Gifford Road. There are examples of traditional row housing, with a variety of elevations and architectural features evident.

The Dye Water is identified as being at risk of flooding and is also designated as part of the River Tweed Special Area of Conservation. Any development proposed would need to be in line with the relevant LDP policy. There are pockets of trees surrounding the settlement which are protected by a Tree Preservation Order. The land to the south east is identified as prime agricultural land.

SETTLEMENT PROFILE

MAXTON

HOUSING MARKET AREA
Central

LOCALITY
Cheviot

POPULATION
113

PLACEMAKING CONSIDERATIONS

The character of Maxton is established by its predominantly linear layout and the focal point of the church, to the north-west. The settlement is set within the lowland valley of the Lower Tweed. The River Tweed, to the north, is part of the River Tweed Special Area of Conservation (SAC), a wildlife site of international importance.

The Plan allocates two housing sites within Maxton, one at Meadowbank and another to the east of the settlement.

The Village Green is an important amenity area within the centre of the village and continues to be safeguarded from development.

PREFERRED AREAS FOR FUTURE EXPANSION

The preferred areas for future expansion beyond the period of this Local Development Plan will be to the east. Development to the north and north-west of the settlement will be resisted where it has a significant effect on the River Tweed international wildlife site or impacts on the setting of the church.

SETTLEMENT PROFILE

MELROSE

HOUSING MARKET AREA
Central

LOCALITY
Eildon

POPULATION
2,010

PLACEMAKING CONSIDERATIONS

Melrose is of key importance as a tourist centre and is located in an area of scenic beauty. The town is located within the Eildon and Leaderfoot National Scenic Area.

The Conservation Area of Melrose incorporates the historic core of the settlement, including the world-renowned Melrose Abbey and retains many of the historic features that provide the town with its distinctive identity. Melrose is an unplanned settlement with an organic nature, though many of the properties around the Abbey have been set out in an ordered fashion. The centre of Melrose is closely packed and intimate, while the periphery appears more sprawling and open.

Whilst individual elements of the built fabric may not appear significant, collectively their contribution to the Conservation Area is considerable. Any new development or alterations should seek to respect individual buildings and the wider Conservation Area by taking account of these important features.

Melrose has an attractive and vibrant town centre with impressive built heritage centred around Market Square. The town centre one-way system and associated townscape works have successfully contributed towards the appearance of the town, traffic movements and parking provision. The town centre is identified as a Core Activity Area.

There are five areas, south of the Abbey and around Gibson Park and the Greenyards, identified as key greenspaces.

The Plan provides a modest housing allocation at Harmony Hall Gardens as well as the longer standing housing allocations at Dingleton and The Croft.

The distinct character and setting of Melrose is recognised. The areas between Melrose, Darnick, Newstead and Gattonside are protected from development under policy EP6 Countryside Around Towns, primarily to avoid coalescence of the settlements, thereby retaining individual character. No further development in this area is anticipated.

KEY INFRASTRUCTURE CONSIDERATIONS

This settlement is identified within the Council's Local Flood Risk Management Plans as being at risk of flooding. Any development proposals should therefore be subject to early consultation with the Council's Flood and Coastal Management Officer, and SEPA, having regard to SEPA's Indicative River and Coastal Flood Map (Scotland) and any other relevant flood risk information. A flood risk assessment may be required and may influence the scale and layout of any development at a particular location.

PREFERRED AREAS FOR FUTURE EXPANSION

There has been significant recent development at Dingleton Hospital and owing to the sensitivity of the location, it has not been possible to define preferred areas for future expansion beyond the period of this Local Development Plan.

SETTLEMENT PROFILE

MIDLEM

HOUSING MARKET AREA
Central

LOCALITY
Eildon

POPULATION
166

PLACEMAKING CONSIDERATIONS

The character of Midlem stems from its historical and physical context. Dating back to the 12th century, Midlem was originally a centre for linen manufacture. The houses follow the medieval rig (burgage plot) layout, centred around a central village green, which is a Conservation Area. Traditional building materials prevail, with the use of sandstone often with whinstone mixed in, harling, and slate. Many of the buildings are whitewashed, giving the village a consistent appearance, which adds to its visual appeal. There are two Listed Buildings within the Conservation Area. Any new development must strongly reflect the layout and architectural character of the village.

Midlem is on a south-east facing slope, and is mainly surrounded by permanent pasture with arable land on the lower slopes. Within and around the village are individual and grouped broadleaved trees, which make a positive contribution to the appearance of the village.

The Village Green is identified as a key greenspace.

PREFERRED AREAS FOR FUTURE EXPANSION

The absence of local services, the topography of the settlement and its high conservation value mean that Midlem does not lend itself to significant levels of new development. Any development will be limited to small scale infill which must maintain the character and setting of the Conservation Area.

SETTLEMENT PROFILE

MINTO

HOUSING MARKET AREA
Central

LOCALITY
Teviot and Liddesdale

POPULATION
92

PLACEMAKING CONSIDERATIONS

The village occupies an elevated ridge overlooking the River Teviot and commands good views along the river corridor and along the Dean Burn. To the south is Ruberslaw hill which, at 424m, is the most dominant feature in the landscape. The village lies just to the south of the Minto Hills and is surrounded by the Teviot Valleys Special Landscape Area.

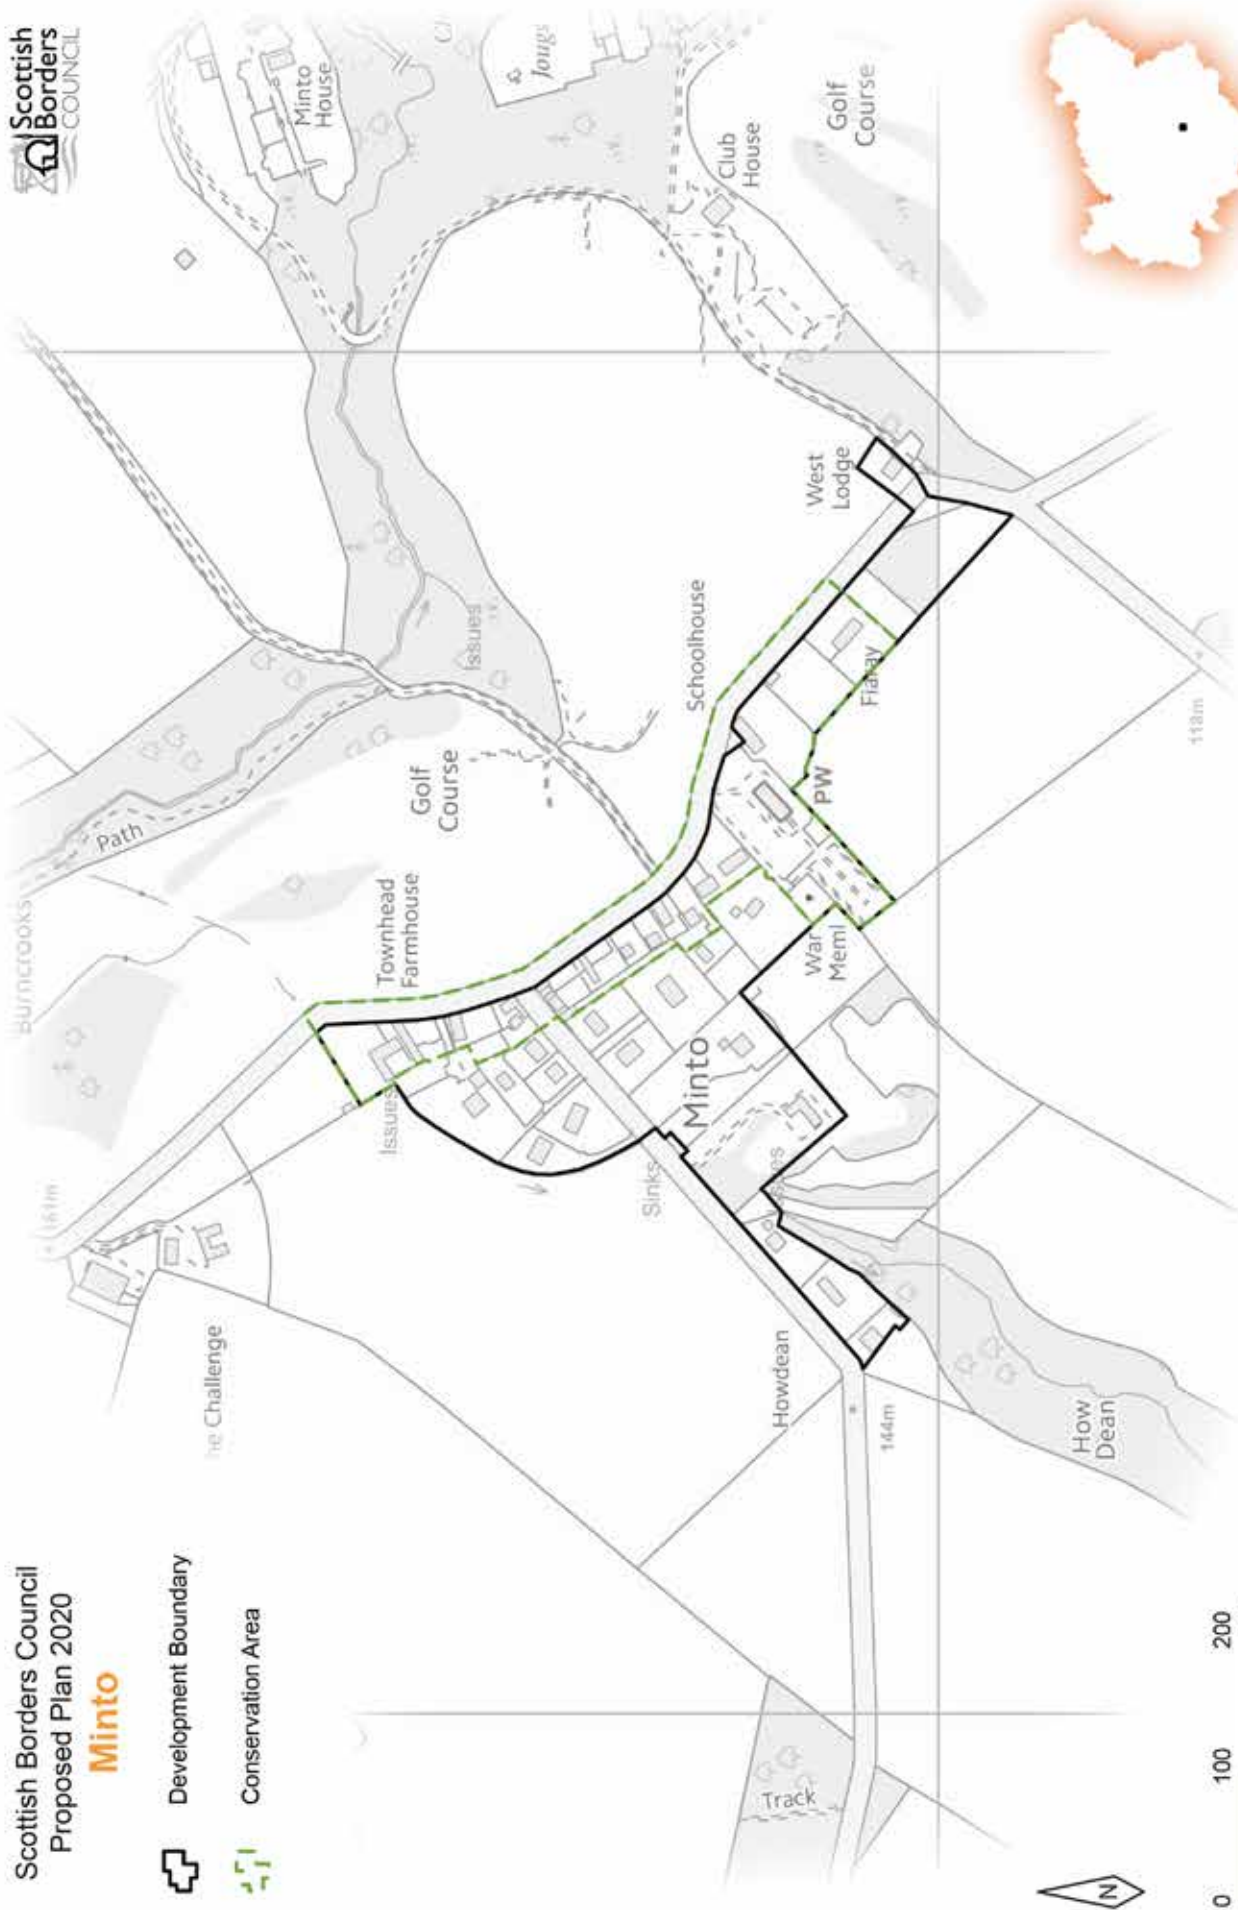

Minto Conservation Area covers the entire historic part of the village, which was laid out by the Earl of Minto. The village developed in a linear form with rows of cottages, a church and a school along the west side of the street. Land to the east is occupied by Minto golf course giving the village a formal landscaped setting with large numbers of mature trees lining the roadside.

Traditional building materials prevail (slate, sandstone and harling) together with a range of architectural details, which contribute to the character of the Conservation Area. There are two Listed Buildings within the Conservation Area.

The absence of local services, the topography of the settlement and its high conservation value mean that Minto does not lend itself to significant levels of new development. Any development will be limited to small scale infill which must maintain the character and setting of the Conservation Area.

Minto

-  Development Boundary
-  Conservation Area

SETTLEMENT PROFILE

MOREBATTLE

HOUSING MARKET AREA
Central

LOCALITY
Cheviot

POPULATION
395

PLACEMAKING CONSIDERATIONS

The historic settlement of Morebattle appears to have developed from the Parish Church, with the Main Street and Teapot Street being the oldest parts. Distinct in its layout the village was originally formed with a wide street and pavement with mature trees lined either side.

Morebattle is an attractive picturesque settlement, which has many significant features that contribute greatly to the character of the Conservation Area. The Conservation Area boundary extends to cover much of the village including the Main Street, Teapot Street, Mansfield Road and part of the road leading to Heughhead.

Although primarily a residential settlement other significant properties include the Parish Church and the Primary School. Morebattle benefits from many views within and out of the settlement. The surrounding landscape is gently rolling with large arable and occasional pasture fields.

The Plan provides two housing allocations; both are located to the west of the village at Renwick Gardens and West Renwick Gardens. The Plan also includes a business and industrial allocation to the east of Croft Industrial Park and safeguards an established business and industrial site which adjoins it.

The playing field to the north of the Primary School provides an important recreational area for the community and will be protected.

PREFERRED AREAS FOR FUTURE EXPANSION

Once the allocated sites are fully developed the preferred area for future expansion beyond the period of this Plan will be the area to the south west of the settlement. The area to the east of Mansfield Avenue and south of the Main Street should be protected from development.

SETTLEMENT PROFILE

NETHER BLAINSLIE

HOUSING MARKET AREA
Northern

LOCALITY
Eildon

POPULATION
114

PLACEMAKING CONSIDERATIONS

The character of Nether Blainslie is established by the irregular cluster of cottages and houses located south of the village hall. It is associated with nearby small building groups such as Upper Blainslie and New Blainslie. The settlement is situated within the undulating grassland of East Gala.

The centre of Nether Blainslie is formed by a series of close-knit cottages, built hard to the road edge and stepped into the landscape. Generally traditional local materials dominate such as slate, harl, sandstone and whin. Properties range in height from single to two storey.

To the south of the village recent housing development has taken place at The Croft. Here the housing is in the form of single to a storey and a half detached properties.

PREFERRED AREAS FOR FUTURE EXPANSION

The Plan does not provide any housing allocations or areas for longer term development for Nether Blainslie but rather any new development will be limited infill opportunities.

SETTLEMENT PROFILE

NEWCASTLETON

HOUSING MARKET AREA
Southern

LOCALITY
Teviot and Liddesdale

POPULATION
768

PLACEMAKING CONSIDERATIONS

Newcastleton is relatively distant from the other settlements in the Scottish Borders and has links with England, particularly Carlisle. Its relative remoteness means that the community is concerned about its relationship to the wider regional land use and development strategies and this is a factor which must be carefully considered in its future planning.

The Council wishes to see the extension of the Borders Railway southwards from Galashiels to Carlisle. The indicative line is protected in the Local Development Plan and follows the line of the disused railway along the western edge of Newcastleton. Safeguarding of the route needs to be taken into account when development is proposed in the vicinity.

The unique character of Newcastleton is established by its formal street layout with a central square and two secondary squares. It is considered to be the best example of a late 18th century planned village in the Borders and the majority of the settlement is designated as a Conservation Area. Newcastleton has a distinct grid iron layout and displays distinct building styles and architectural details. The designs for any new development should seek to respect the character of individual buildings and the wider Conservation Area.

The village's conservation status should be preserved due to its unique layout. However, due to previous inappropriate replacement windows which have diluted the traditional design quality of some properties, the core frontage area has been removed from the centre of the village. In essence this means there would be a less stringent standard of design of replacement windows in that area.

As the main settlement in the southern Borders it has a short term housing allocation as well as a mixed use allocation to meet local development needs. Landscaping is indicated and would need to be incorporated into any development of the mixed use site.

Three areas of key greenspace are identified in Newcastleton at Union Street, Douglas Square and the Polysport Playing Field.

KEY INFRASTRUCTURE CONSIDERATIONS

This settlement is identified within the Solway Local Flood Risk Management Plan as being at risk of flooding. Any development proposals should therefore be subject to early consultation with the Council's Flood and Coastal Management Officer, and SEPA, having regard to SEPA's Indicative River and Coastal Flood Map (Scotland) and any other relevant flood risk information. A flood risk

assessment may be required and may influence the scale and layout of any development at a particular location. In 2019, a flood study was completed within Newcastleton, assessing the village's flood risk and highlighting mitigation options that may be taken forward to the prioritisation phase, to potentially gain funding for a Flood Protection Scheme within the 2022-28 flood risk management cycle.

PREFERRED AREAS FOR FUTURE EXPANSION

The preferred area for future expansion beyond the period of this Local Development Plan will be to the south of the settlement. Expansion in this direction will be dependant upon flood risk assessment. Development to the north of the settlement will be resisted where there is an adverse effect on the Liddel Water. The suggested area is indicative only, and will require further detailed assessment during the next Local Development Plan Review.

SETTLEMENT PROFILE

NEWSTEAD

HOUSING MARKET AREA
Central

LOCALITY
Eildon

POPULATION
297

PLACEMAKING CONSIDERATIONS

Newstead is located within the Eildon and Leaderfoot National Scenic Area.

The original village has developed fundamentally in a linear form along either side of the Main Street. Properties range from single to two storeys in height. Most of the village centre properties are in groups of two with a number of detached properties. Some of the older properties have been built hard to the Main Street with no footpaths.

The Newstead Conservation Area incorporates almost all of the settlement. Lying on land steeply rising from the south banks of the River Tweed, the village of Newstead is reportedly the oldest village in Scotland. It is recommended that any alterations or new development within the Conservation Area should have regard to traditional building material and detailing to contribute to the retention of the settlements character.

The distinct character and setting of Newstead is recognised. Policy EP6 (Countryside Around Towns) seeks to protect the area between Newstead and Melrose from development in the longer term, primarily to avoid coalescence of the settlements, thereby retaining individual character.

One site, within the eastern boundary of the village, is allocated for residential development. There is one area, south of the Orchard, identified as a key greenspace.

PREFERRED AREAS FOR FUTURE EXPANSION

The settlement of Newstead experiences pressure for further development but due to its sensitive location it has not been possible to identify any land for development. The proximity of Newstead to the railway station at Tweedbank places additional pressure on the village for development. Therefore it is important that the areas of open space within the settlement and the area surrounding the Trimontium Fort should be protected from future development. The fields to the east of the Development Boundary should also be protected from future development, these are considered to form part of the character of the village.

GSNEWS001	Community Playing Field	1.0

SETTLEMENT PROFILE

NEWTOWN ST BOSWELLS

HOUSING MARKET AREA
Central

LOCALITY
Eildon

POPULATION
1,182

PLACEMAKING CONSIDERATIONS

The settlement of Newtown St Boswells is dominated by views of the Eildon Hills. The village centre is clustered around the B6398 at Old Station Court and Tweedside Road. Other features of interest include the Auction Mart with its octagonal ring building, the former school and the nineteenth century terraces.

The semi natural/plantation wood along the Bowden Burn is included in Scotland's Semi-Natural Woodland Inventory (SSNWI). The River Tweed lies to the east, but tributaries – Sprouston Burn and Newtown Burn (further west known as Bowden Burn) – flow through Newtown St. Boswells itself and east of the main built up area, they both have SSSI status. The area to the north of the settlement, from Sprouston Burn to the junction of Earlston Road and the A68, is part of a National Scenic Area and is highly visible from the A68 trunk road and the attractive settlement of Eildon.

Newtown St Boswells is located within the heart of the Borders and is the Council's administrative centre. It has excellent road connections, is convenient for the Borders Railway and has good quality developable land in its vicinity. The planned expansion of the village is allocated as site ANEWT005 in the Plan.

It is expected that, aside from any future expansion, there will be a growth in pressure to develop within Newtown St Boswells. In addition to the expansion area, one housing site is allocated along Melrose Road along the former Bogle Burn road to Melrose.

The allocated redevelopment sites provide mixed use opportunities which will encourage regeneration of the village centre. There is community support to redevelop and regenerate Newtown St Boswells and it is hoped that these aspirations can be met through the redevelopment sites and the future expansion. The Council has developed a Development Framework to support and provide guidance for the redevelopment of the village centre.

Where possible, the relocation to more suitable sites of various existing uses in the village that generate heavy goods vehicles and other commercial vehicle movements will be supported, in the interests of road safety, local amenity and regeneration.

There are two areas, near the primary school, identified as key greenspaces.

PREFERRED AREAS FOR FUTURE EXPANSION

Areas to north and east of the A68 are considered to be unsuitable for residential expansion. If planned expansion does not take place, the preferred area for the longer term development of Newtown St Boswells is to the west. This would allow a more sensitive edge to be created to Newtown St Boswells. Although this land is within the Special Landscape Area, and further investigations must be carried out, the impact of development at this location would be significantly lower than to the north or east of the settlement.

The separation between the two communities of Newtown St Boswells and Eildon must be retained and further development along Earlston Road and Melrose Road will be resisted.

SETTLEMENT PROFILE

NISBET

HOUSING MARKET AREA
Central

LOCALITY
Cheviot

POPULATION
140

PLACEMAKING CONSIDERATIONS

The estate village of Nisbet lies south-east of the Peniel Heugh which dominates the views from the south and also provides a dramatic backdrop for the village. While Nisbet was built for the workers of its two farms, it was arranged around two informal spaces – the Mill Pond and the burial ground to the west.

The settlement is situated within the Tweed Lowlands Regional Landscape Area within the River Valley Landscape that is described as 'Lowland Valley with Farmland'. Nisbet benefits from a number of established tree belts particularly around East Nisbet House and within small clusters in the village. It is these mature trees that provide a high degree of enclosure for the village and greatly enhances its character.

The Conservation Area of Nisbet includes most of the village. As an estate village, Nisbet has remained virtually unaltered since it was developed in the 19th century. The village was built for the workers of two farms – East Nisbet and West Nisbet. There are only two properties within the village that are independent of each of the farms and therefore are considered to be part of Nisbet and not East or West Nisbet – these properties are the School House and the Smiddy House.

The Plan does not identify any allocations within Nisbet. There has been recent housing development within the settlement at West Nisbet Farm, to the south of the village.

The Play Area within Nisbet is an important amenity area within the centre of the village and is therefore protected.

SETTLEMENT PROFILE

OXNAM

HOUSING MARKET AREA
Central

LOCALITY
Cheviot

POPULATION
196

PLACEMAKING CONSIDERATIONS

The Oxnam development boundary is a new addition to this Local Development Plan. The inclusion of a development boundary was proposed by the Oxnam Water Community Council primarily to control and guide future development proposals within the village.

Oxnam has a dispersed radial pattern with no central core or village centre. The village has developed along the two main roads through the village, the Oxnam Green road and the unclassified road north to Oxnam Kirk. More recent development has expanded the village to the east towards Oxnam Kirk and towards Oxnam Green to the south-west.

A key feature within the village is Oxnam Kirk, the present Kirk was built in 1738 on the site of a medieval kirk dating from before 1153 and was enlarged to form a T-plan in 1874. The building is a characteristic Scottish 18th-century kirk with plain glass and white-washed walls and is located to the north-east of the settlement.

The Oxnam Water runs through the village then onwards to the River Teviot at Crailing. In certain areas, the Oxnam development boundary is contiguous with the boundary of the River Tweed Special Area of Conservation and therefore any forthcoming development proposals would require a Habitats Regulation Appraisal.

Although the Plan does not identify any allocated sites within Oxnam, there are a number of small scale infill opportunities within the development boundary to accommodate future development.

There is one area, Oxnam Green identified as a key greenspace. The Green is a prominent open space within the central part of the village and has some amenity and visual value, it will therefore be protected.

SETTLEMENT PROFILE

OXTON

HOUSING MARKET AREA
Northern

LOCALITY
Eildon

POPULATION
351

PLACEMAKING CONSIDERATIONS

The character of Oxton is established by its clustered form and countryside setting. It is situated in the upland valley of the Upper Leader. The Leader Water to the east is part of the River Tweed Special Area of Conservation, a wildlife site of international importance.

The centre of the village of Oxton is focused on the crossroads where The Loan, Station Road, Main Street, and the unclassified road that leads to the A68 all meet. Along Station Road on the north side, a stone wall separates the village from the fields to the fore of Justice Hall, which in themselves form an attractive outlook for the village. The village sits above the A68 with pleasant views outwards to the surrounding countryside and especially towards Addinston Hill.

Traditional properties within the village tend mainly to be terraced, built to the back of the footpath and step into the landscape. Two storey properties dominate on Station Road whilst on The Loan and the Main Street a mixture of single to two storeys exist. Sandstone, whin, harl and slate are the main building materials that feature within the centre of the village.

The Plan identifies the Heriot Field Play Park for protection as greenspace and provides a new housing allocation to the south east of the village.

PREFERRED AREAS FOR FUTURE EXPANSION

Development to the north of the settlement will be resisted where it would have significant effect on the international nature conservation value of the Leader Water or impact on the countryside setting of the settlement as viewed from the A68 trunk road. However, there may be potential for infill development to occur to the west of the C83 (Annfield Road) within the Development Boundary during the lifetime of the Local Development Plan.

SETTLEMENT PROFILE

PAXTON

HOUSING MARKET AREA
Berwickshire

LOCALITY
Berwickshire

POPULATION
292

PLACEMAKING CONSIDERATIONS

Paxton is located on the Merse in the lowlands associated with the River Tweed. The village is surrounded by arable fields which are designated as prime quality agricultural land. Paxton is predominantly residential and has expanded with the development of detached properties.

The Whiteadder Water lies to the east of Paxton and forms part of the River Tweed Special Area of Conservation. An Ancient Woodland Inventory sits to the east of the settlement, along the banks of the Whiteadder Water. No land for development is allocated within this Local Development Plan.

SETTLEMENT PROFILE

PEEBLES

HOUSING MARKET AREA
Northern

LOCALITY
Tweeddale

POPULATION
8,376

PLACEMAKING CONSIDERATIONS

Peebles benefits from a dramatic setting at the convergence of the River Tweed and the Eddleston Water. The settlement is framed between high hills on all sides and has extensive views both into and out of the settlement. The settlement and its hinterland are of high amenity value with mature woodland and spacious parkland. There are attractive views of the town on particularly the south, eastern and western approaches and views out to the south to the adjoining hill ranges beyond Cademuir. The town has a strong landscape framework as already highlighted above; the northern portion of the town nestles into the slopes of Venlaw Hill and onto the flatter land to the west of the Eddleston Water towards Jedderfield. The southern portion of Peebles over the Tweed lies within the flatter haughland of the river valley and on the lower slopes of the Cademuir Hill.

The Conservation Area covers a large part of Peebles, including the entire town centre. The town centre takes in parts of both the Old Town and the New Town including the High Street with its rich assortment of commercial properties and churches. The Old Town is, as its name suggests the oldest part of Peebles and includes St Andrews Church Tower and cemetery. Many of the properties in the Biggiesknowe area and in the north side are one and two storey cottages of a vernacular design. In the south side of the Old Town properties tend to be tenements and commercial premises, with an urban character.

The three churches within the New Town dominate the skyline at both ends of the town centre. The Old Parish Church with its crown steeple sits high, on the site of the castle, at the west end. The tall steeple of the Leckie Memorial Church and the lesser steeple of the Eastgate Church terminate the east end of the centre. The Leckie Memorial Church also dominates the Tweed Green. Within the New Town the rig pattern is still evident. Behind the facades of both sides of the High Street and the west part of Eastgate the narrow passages have been built-up and lead to internal courts that serve a large number of small premises. Of particular interest is Parliament Square, at the west end of the south side of the High Street, which is said to have been a site of a meeting of the Scottish Parliament in 1346.

Within Peebles there are also a considerable number of residential properties on either side of the River Tweed. The older housing to the north consists mainly of terraces, semi-detached and villa style properties that were built in the 19th century. Along the south side of the Tweed, to the east and to the south, 19th century villas and mansion style properties are found; outwith those areas are more modern developments with the most recent area for the towns development taking place at Whitehaugh off the B7062. It is evident that within Peebles there is a wide range of building types, styles and periods. These all reflect the history, diversity and development of the town.

Throughout Peebles and particularly along the water courses of the River Tweed and Eddleston Water there are substantial areas of green open space. Tweed Green and Ninian's Haugh are the most significant areas but there are others.

The Plan provides four housing allocations, two safeguarded business and industrial sites, one business and industrial site located at South Parks, as well as two mixed use sites at Rosetta Road and at March Street Mill; there are also three redevelopment sites located at Dovecot Road, George Street and Tweedbridge Court.

The Plan also identifies a number of key greenspaces within the settlement; these spaces provide the Peebles community with many important recreation opportunities.

KEY INFRASTRUCTURE CONSIDERATIONS

This settlement is identified within the Council's Local Flood Risk Management Plans as being at risk of flooding. Any development proposals should therefore be subject to early consultation with the Council's Flood and Coastal Management Officer, and SEPA, having regard to SEPA's Indicative River and Coastal Flood Map (Scotland) and any other relevant flood risk information. A flood risk assessment may be required and may influence the scale and layout of any development at a particular location.

Without a second Tweed crossing in the town, to reduce traffic flow on the existing bridge and take intrusive traffic away from the town centre, the addition of development traffic to the network will have congestion and environmental issues for the High Street, as well as capacity issues for Tweed Bridge, and this could compromise road safety. The most recent traffic count on behalf of the Council for Tweed Bridge was undertaken in November 2018 and through this it was demonstrated that the bridge is getting close to capacity. It is the Council's opinion that Tweed Bridge does not have the capacity to serve any new development in the town, over and above the sites allocated in the Plan, with the exception of small infill proposals and other low traffic generating proposals which will be considered on a case by case basis. Longer term development in the town will be required to contribute towards a second river crossing based on projected costs. At this point in time there is no definitive date as to when the new bridge might be constructed and a feasibility study must be prepared in advance. In this interim period development sites need to contribute towards improving traffic management in and around the town centre and/or towards the funding of transport appraisal work for the town.

PREFERRED AREAS FOR FUTURE EXPANSION

Once the allocated sites are fully developed the preferred area for future expansion beyond the period of this Local Development Plan will be to the south east of Peebles.

The sites identified for longer term development will be subject to further assessment and review as part of the next Local Development Plan review, and will require a Masterplan to ensure a coherent and holistic approach.

SETTLEMENT PROFILE

PRESTON

HOUSING MARKET AREA
Berwickshire

LOCALITY
Berwickshire

POPULATION
183

PLACEMAKING CONSIDERATIONS

Preston is located on the rolling lowlands at the edge of the Lammermuirs and benefits from many attractive views within and out of the settlement. Preston takes a linear form along the A6112 and has experienced limited growth. The majority of properties are constructed of traditional materials such as stone and slate. The cottages are an example of traditional row housing, with various architectural features, set back from the road.

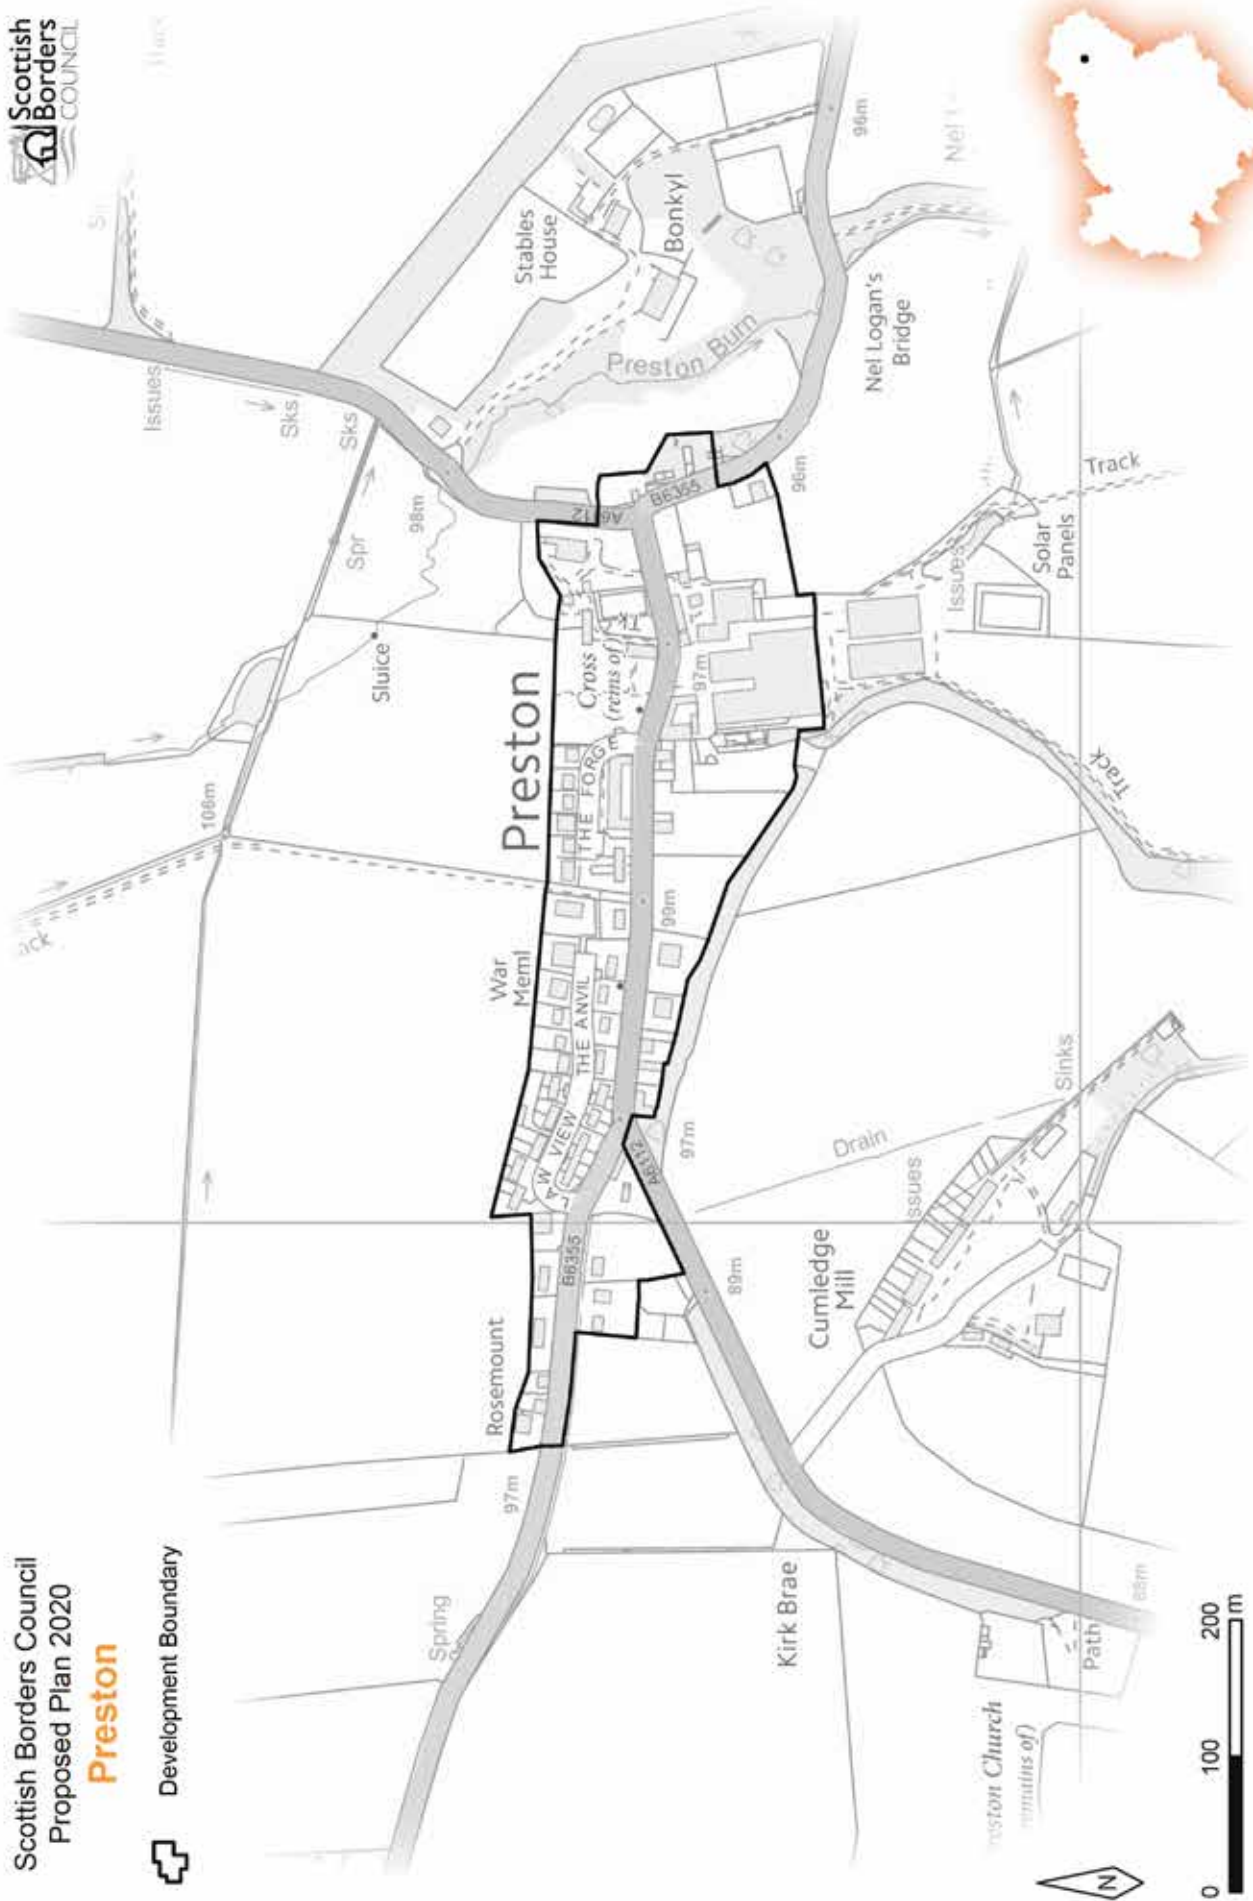

Due to a lack of development interest a longstanding redevelopment site (zR016) at Preston Farm has been removed from the Plan, as it is not considered that the site contributes to the effective housing land supply. However, the site remains within the development boundary and could therefore be developed at a future date under the infill planning policy.

PREFERRED AREAS FOR FUTURE EXPANSION

Any future development to the west of Preston will be resisted. Potential constraints to the expansion of the village are flood risk to the south west and surrounding prime agricultural land.

Preston

 Development Boundary

SETTLEMENT PROFILE

REDPATH

HOUSING MARKET AREA
Central

LOCALITY
Eildon

POPULATION
87

PLACEMAKING CONSIDERATIONS

The character of Redpath is established by its linear layout and its countryside setting. It is located on the edge of lowland hills around Black Hill, the pastoral upland fringe valley of the Lower Leader and the upland fringe valley with settlements of the River Tweed. The quality of this countryside is recognised by its inclusion within a National Scenic Area. Other distinct features are an ancient oak tree near the village hall, and the rows of cottages. The Leader Water, to the west, is part of the River Tweed Special Area of Conservation, a wildlife site of international importance.

The Conservation Area of Redpath incorporates most of the village and part of its surroundings. Redpath developed in a linear form between two farms, one located at the east and the other at the west of the village. Many of the small cottages within the centre of Redpath were once the homes of weavers where looms were spun.

The Redpath Conservation Area has a distinct appearance and setting, it is located on the south facing slopes above a wooded dean connected to the Leader Water. A track running along part of the village allows access to the rear of some of the properties. The layout of Redpath is one of the most important features of the Conservation Area; it is recommended that new development should respect this characteristic. Another distinct feature is the rows of cottages on either side of the road that lead into the centre of the village. Traditional building materials prevail, whin and sand stone, harl and slate are all to be found within the Redpath Conservation Area. Architectural details such as sash and case windows and margins feature greatly. Stone boundary walls also appear of which some are dry. While these collective details form the character of the Redpath Conservation Area they should all be protected and any alterations or new build should seek to respect the individual buildings and the wider Conservation Area.

Redpath

-  Development Boundary
-  Conservation Area

SETTLEMENT PROFILE

RESTON

HOUSING MARKET AREA
Berwickshire

LOCALITY
Berwickshire

POPULATION
442

PLACEMAKING CONSIDERATIONS

Reston lies to the south of the A1 and follows a linear form running east to west. The settlement sits within the rolling landscape associated with the Eye Water, which flows to the north. The area surrounding Reston is made up of arable and pasture fields.

Reston was formerly a stop on the East Coast Main Line and the line runs through the village. The settlement is predominantly residential in character with traditional row housing evident along Main Street, while there is more modern housing towards the eastern and western edges.

There are four housing allocations and one mixed use allocation within Reston, all of which are yet to be developed. A longer term housing allocation was brought forward and included as part of the Housing SG (AREST004). The housing allocation (AREST005) has been brought forward as part of the current LDP, which lies adjacent to the existing allocation (BR5).

The former Auction Mart occupies a large site to the south of Main Street and is allocated for mixed use development. An area of land is allocated for future transportation (zRS3), for the re-instatement of Reston Station along the East Coast Main Line. There is an adopted development brief for the Reston Auction Mart, which covers the Auction Mart site, housing to the south and the transportation allocation.

As a result of the forthcoming railway station within the village, it is likely that there will be subsequent development interest which in turn will create some future opportunities for development within the village. Given these changes it is considered an overall masterplan should be prepared which gives consideration to addressing potential issues, opportunities, constraints and identifies appropriate land uses.

KEY INFRASTRUCTURE CONSIDERATIONS

The provision of a new station facility at Reston has been agreed by the Scottish Government and will be provided in the current control period (2019-2024).

PREFERRED AREAS FOR FUTURE EXPANSION

There is likely to be longer term demand for housing in Reston, particularly when the railway station is re-instated. An area for potential longer term housing is allocated (SREST001) to the south of the Auction Mart site. The development brief for the Reston Auction Mart provides guidance on the mixed use allocation, as well as the housing to the south of Reston and the land allocated for transportation. The preferred option for future growth remains within this longer term housing site to the south. Development in other directions will be resisted. Potential constraints to the future growth of Reston is the flood risk to the north and the surrounding prime agricultural land.

SETTLEMENT PROFILE

ROBERTON

HOUSING MARKET AREA
Southern

LOCALITY
Teviot and Liddesdale

POPULATION
105

PLACEMAKING CONSIDERATIONS

The settlement is set above the Borthwick Water, a tributary of the River Teviot. It lies at the confluence of Borthwick Water with Glen Burn that runs off Watch Knowe – the hill to the north. It is clearly visible in the landscape from Easter Park Hill with mature trees and ancient woodland providing shelter and an attractive setting.

Roberton is made up of a number of detached houses focused around the B711 that runs through the village and a minor road that follows Roberton Cleuch. A church and village hall serve the wider community and provide a central focus in the area. There is no longer a school in the village.

Relatively recent expansion has taken place at the east end of the settlement, where four detached houses have been erected. Further small scale expansion is planned on the west side of the settlement, close to the church and village hall. Landscaping is indicated and would need to be incorporated into any development of the sites.

SETTLEMENT PROFILE

ROMANNOBRIDGE

HOUSING MARKET AREA
Northern

LOCALITY
Tweeddale

POPULATION
220

PLACEMAKING CONSIDERATIONS

The village is subdivided into two distinct parts. The southern portion of Romannobridge contains the original village focused around the Romanno Inn and the crossing point of the Lyne Water. This attractive compact group of buildings was later extended to the south west along the western side of the Edinburgh to Moffat road either side of the primary school.

The northern portion of the settlement developed in more recent years between Woodlands House, the cemetery, and Romanno House Farm. Development has been along either side of the A701 and more recently the cul-de-sac development at Halmyre Loan.

The Lyne Water which flows alongside and through part of the settlement is designated a Special Area of Conservation. The southern and original part of the settlement also contains a number of listed buildings which include the Old Bridge over the Lyne Water.

 Development Boundary

SETTLEMENT PROFILE

ROXBURGH

HOUSING MARKET AREA
Central

LOCALITY
Cheviot

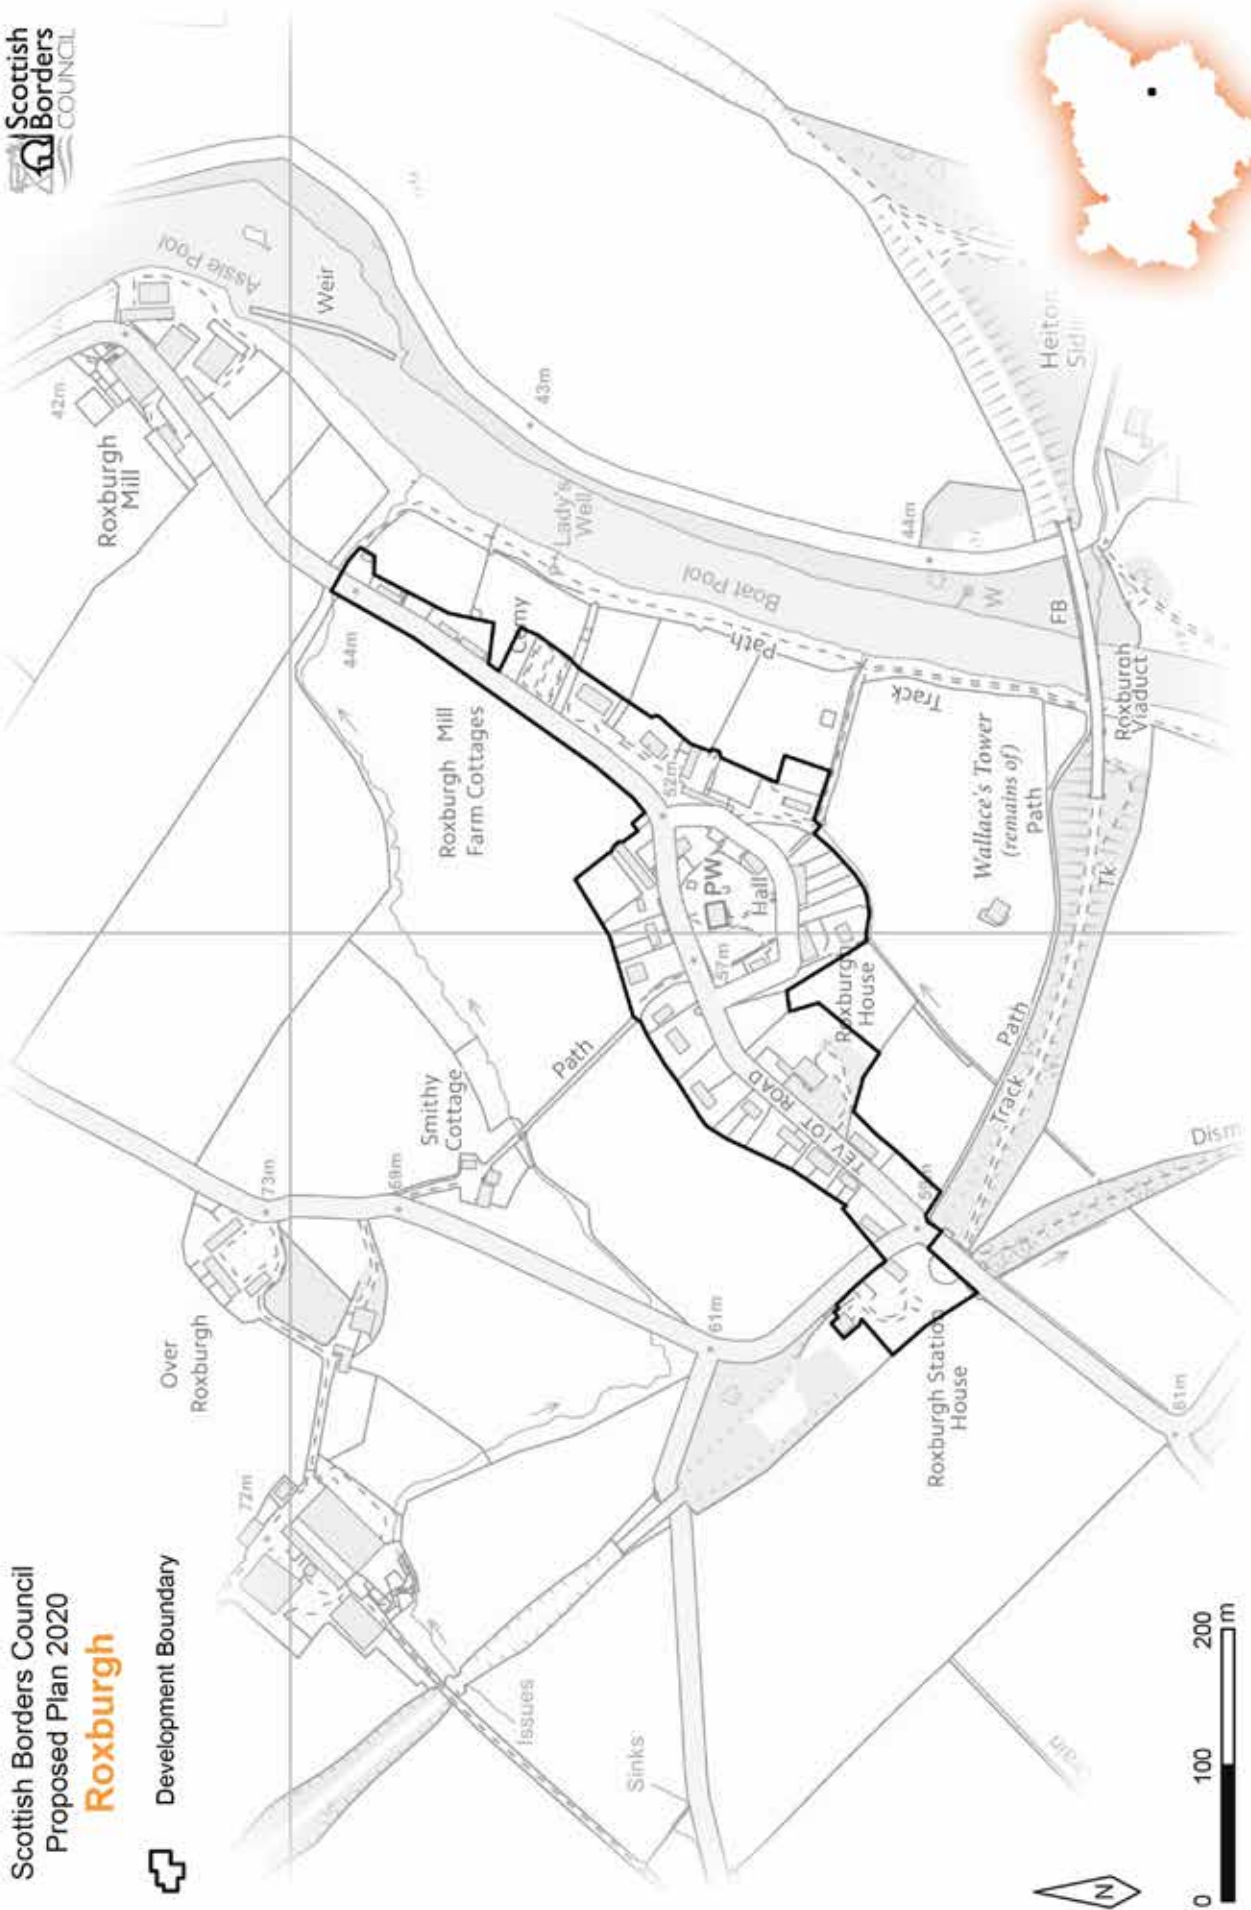

POPULATION
142

PLACEMAKING CONSIDERATIONS

Roxburgh sits on the banks of the River Teviot, four miles south-west of Kelso. The village has developed around the Parish Church, with more recent development expanding the village to the south-east. The settlement has a strong sense of enclosure due to the topography of the area which is reinforced by the old railway embankments, viaduct and River Teviot.

SETTLEMENT PROFILE

SELKIRK

HOUSING MARKET AREA
Central

LOCALITY
Eildon

POPULATION
5,784

PLACEMAKING CONSIDERATIONS

The character of Selkirk is mainly established by its historic hilltop town centre and its countryside setting. The town is located in the valley of the Ettrick Water and on the rolling hills to the east of the river. The surrounding countryside is part of the designated Eildon and Leaderfoot Special Landscape Area. The Riverside area of the town, adjacent to the Ettrick Water, contains a number of Victorian mill buildings of architectural and historical interest. The Ettrick Water, which passes through the town, is part of the River Tweed Special Area of Conservation, a wildlife site of international importance. The Haining Garden and Designed Landscape lies to the south of the development boundary.

The Conservation Area of Selkirk includes the historic core of the town, including the ruins of the 18th century church where for centuries a church stood, the Market Place and Halliwell's Museum, as well as the many plaques, monuments and statues around the town. Selkirk was until the 19th Century only a small settlement when it then expanded extensively due to the introduction of the woollen mills.

A variety of different building styles and types are present throughout the Conservation Area and these all add to the uniqueness of the place. Both the statues and the monuments as well as the larger detailed properties, such as the Sheriff Court, all provide a significant contribution not only to the amenity of the town but also to its attractiveness. Many of the properties are built hard to the footpath but on the whole they all tend to follow the streetscape. The use of building materials and architectural details are important to form the character. Any new development must therefore aim to contribute to the existing character of the Conservation Area.

A Conservation Area Regeneration Scheme (CARS) was completed at the end of 2018. This was a partnership project developed with the local community and funded by Historic Environment Scotland and Scottish Borders Council which aimed to regenerate the medieval core of the Selkirk Conservation Area through the provision of grant funding to eligible properties for external fabric repairs using traditional materials and skills. Regeneration has continued in the town with the recent completion of a new development on the long term derelict former Coop building immediately adjacent to the Victoria Halls, improvements to town shopfronts and the successful Selkirk Business Improvement Districts Scheme (BIDS). These have all contributed sensitively to an enhanced physical environment.

The Riverside area of the town, which is a priority for employment related development, has seen the redevelopment of redundant buildings in recent years. Flood risk had been a significant constraint to growth within this area. This has, however, now been addressed through the completion of the Selkirk Flood Protection Scheme early in 2017. The Scheme provides protection to around 600 homes and businesses from major flood events including properties badly affected by flooding in 2003 and 2004

in the Riverside, Bannerfield and Philiphaugh areas of the town. The Scheme was the first major flood protection scheme with an environmental statement to be approved under the Flood Risk Management (Scotland) Act 2009, at a cost of £31.4million. Areas of land which form part of the Scheme are safeguarded from any physical development under the Flood Protection Scheme itself.

The Plan includes four redevelopment sites within Selkirk. In the western extremity of the Riverside area, a mixed use site is allocated to take account of the variety of uses within close proximity. The remainder of the Riverside area is safeguarded for business and industrial purposes. The Plan also includes the Core Activity Area protection in central Selkirk.

There are ten areas, including Victoria Park, Pringle Park, sports fields and more informal spaces, identified as key greenspaces.

KEY INFRASTRUCTURE CONSIDERATIONS

The road capacity within the centre of the town poses particular difficulties for traffic movement and parking. The line of the proposed Selkirk bypass is protected by Policy IS4 – Transport Development and Infrastructure. This would provide the opportunity to further improve the town centre environment, enhance road linkages within the Central Borders and speed up journey times from Hawick northwards. Whilst the bypass is safeguarded, there is currently no Scottish Government commitment and further studies would be required to identify the exact line and establish community and environmental impacts. If the bypass is built in the future, there are areas adjacent to it which could be identified for potential longer term development.

This settlement is identified within the Council's Local Flood Risk Management Plans as being at risk of flooding. Any development proposals should therefore be subject to early consultation with the Council's Flood and Coastal Management Officer, and SEPA, having regard to SEPA's Indicative River and Coastal Flood Map (Scotland) and any other relevant flood risk information. A flood risk assessment may be required and may influence the scale and layout of any development at a particular location.

PREFERRED AREAS FOR FUTURE EXPANSION

An area to the north of the bypass line could be a potential business park in the longer term. Areas at the southern end of the bypass could also be further investigated for potential longer term mixed use development. These areas will be subject to further assessment as part of the next Local Development Plan review and will require a Masterplan to ensure a coherent and holistic approach. Until this is progressed, the uncertainty is a significant constraint to the planning of long term development in Selkirk.

Land to the west of Philiphaugh Farm, currently outwith the development boundary, is also considered to have potential for Longer Term Mixed Use development. Part of this land has been identified as an opportunity for development in the Development and Landscape Capacity Study. The area will be subject to further assessment as part of the next Local Development Plan review and will also require a Masterplan to ensure a coherent and holistic approach.

DEVELOPMENT AND SAFEGUARDING PROPOSALS

SETTLEMENT PROFILE

SKIRLING

HOUSING MARKET AREA
Northern

LOCALITY
Tweeddale

POPULATION
194

PLACEMAKING CONSIDERATIONS

The village sits at around 220m above sea level, elevated from the flood plain of the Biggar Water in a narrow upland valley below Gallow Law. This valley contains a tributary to the Spittal Burn which meets the Candy Burn at Skirling Mill to the west of the village. The predominant surrounding land use is agriculture.

The village of Skirling is linear in shape and originally comprised five small farms on the valley floor next to Skirling Burn. It consists of two distinct parts; the village green and war memorial to the east and the three farm steadings of Galafot, Galalaw and Burnside to the west.

Skirling has a distinct identity and benefits from Conservation Area status which extends beyond the Development Boundary. The importance of the water source to the development of the village can be seen in the pattern of building back from the road and above the level of the burn. This is reflected in both the northern and southern parts of the village. One of the most important properties of the Conservation Area is Skirling House, built by Lord Carmichael and designed in 1905 by Ramsay Traquair. Constructed around an existing farmhouse this property has a pleasant appearance, with a weather-boarded upper floor along with some attractive wrought iron work by Thomas Hadden of Edinburgh. The Arts and Crafts movement is evident throughout Skirling House – beautiful ornate wrought ironwork and decorative carvings.

Within the settlement, properties tend to range from single to two storeys in height. Traditional building materials prevail with ochre and red coloured sandstone, harl and slate. The houses also have a number of architectural details - sash and case windows, skews, rybats, margins and quoins.

SETTLEMENT PROFILE

SMAILHOLM

HOUSING MARKET AREA
Central

LOCALITY
Cheviot

POPULATION
119

PLACEMAKING CONSIDERATIONS

The character of Smailholm has been established particularly by its layout and setting - a small hill-top settlement that originally consisted of three detached parts: East Third, West Third and Overtown. Little remains of Overtown today, while the East Third and West Third are now the main foci. The village centre (East Third) is compact and attractive and is largely devoid of traffic allowing for a very quiet rural quality with little activity on the street.

Smailholm Conservation Area has a distinct identity. The importance of the category 'B' listed Church and graveyard to the layout of Smailholm is evident through its central positioning of it within the village. Properties tend to range from single to two storeys in height with chimneys mainly being situated at the gable-ends. Traditional building materials prevail, whinstone mixed with ochre coloured sandstone, harl, slate, and in some instances pantiles are all to be found within the Conservation Area. Architectural details such as sash and case windows, skews, rybats, margins and quoins also feature greatly. Stone boundary walls appear often and contribute significantly to the character of the place.

Within Smailholm, the Plan identifies two key greenspaces, the Play Area and the Memorial Green which are to be protected due to their community value.

PREFERRED AREAS FOR FUTURE EXPANSION

Given the sensitivity of the character and setting of Smailholm it has not been possible to identify an area for longer term expansion at this stage. The division of the village into two separate parts is a relatively distinctive feature. The area to the south of East Third should be protected from development.

SETTLEMENT PROFILE

SPROUSTON

HOUSING MARKET AREA
Central

LOCALITY
Cheviot

POPULATION
191

PLACEMAKING CONSIDERATIONS

Sprouston is situated within the lowlands associated with the River Tweed, which flows to the north of the settlement. There are fields surrounding Sprouston, which benefit from being Prime Agricultural Land.

The B6350 runs through Sprouston and the settlement has developed from the crossroads in the centre with recent development along Dean Road. Within the settlement there is a Primary School, Church and Village Hall.

The Plan allocates two housing sites within Sprouston at Church Field and Teasel Bank. Sprouston Village Green is an important amenity area within the centre of the village and will therefore be protected from development.

KEY INFRASTRUCTURE CONSIDERATIONS

This settlement is identified within the Council's Local Flood Risk Management Plans as being at risk of flooding. Any development proposals should therefore be subject to early consultation with the Council's Flood and Coastal Management Officer, and SEPA, having regard to SEPA's Indicative River and Coastal Flood Map (Scotland) and any other relevant flood risk information. A flood risk assessment may be required and may influence the scale and layout of any development at a particular location.

PREFERRED AREAS FOR FUTURE EXPANSION

It is envisaged that future demand for housing in Sprouston will be met through current allocations and there is no requirement beyond the period of this plan for future expansion. Development to the West of Sprouston, aside from any potential Primary School expansion or car park for the Village Hall, will be resisted.

SETTLEMENT PROFILE

ST ABBS

HOUSING MARKET AREA
Berwickshire

LOCALITY
Berwickshire

POPULATION
147

PLACEMAKING CONSIDERATIONS

St Abbs gains its character primarily from being a coastal fishing village perched on the north-east coast of the Borders. It benefits from views over the harbour and the wider North Sea. Further inland, the settlement's surroundings are dominated by arable and pastoral fields. The settlement and hinterland are of particular high amenity value, with mature woodland to the north-west around Northfield House.

The Conservation Area covers the majority of the village and Northfield House. The harbour and coastal location are important features as they are essential to the character of the place. Properties range from single, storey and a half, and two storeys in height; built hard to the footpath and following the streetscape. Building materials such as sandstone, pantiles and slate, and architectural details like transom lights, sash and case windows and margins, add to the sense of place. Any alterations or new development must therefore aim to contribute to the existing character of the Conservation Area.

PREFERRED AREAS FOR FUTURE EXPANSION

Any expansion of the village would have a significant impact on the capacity of the existing road network in Coldingham. In addition, St Abbs is located adjacent to the Berwickshire and North Northumberland Coast Special Area of Conservation, St Abbs Head to Fast Castle Special Protection Area and the Berwickshire Coast Site of Special Scientific Interest. The coastline and inland surrounds of St Abbs are also designated as a Special Landscape Area (Berwickshire Coast). Any proposed development would need to adhere to the relevant policy requirements associated with these designations.

SETTLEMENT PROFILE

ST BOSWELLS

HOUSING MARKET AREA
Central

LOCALITY
Cheviot

POPULATION
1,494

PLACEMAKING CONSIDERATIONS

St Boswells is an attractive village with much of its character gained from the large green along Main Street. The Green and the Cricket Ground provide an interesting and attractive entrance to the village against the backdrop of the Eildon Hills.

The St Boswells Conservation Area has a distinct layout and is centred on the large green with its tree-lined approach into the centre of the village. There is a wide range of property within the Conservation Area: mainly two or two and a half storeys in height, including terraces, semi-detached and detached. Three large detached properties sited on the ridge of land on the north boundary have good views both into the village and over the River Tweed. Detached properties tend to be sited back from the main road and those built in rows are mainly built hard to the street with few exceptions.

As the layout of St Boswells is one of the most important features of the Conservation Area, it is recommended that new development should respect this characteristic. Building materials that prevail throughout the Conservation Area are red and cream sandstone, harling, slate as well as whinstone, though mainly in the construction of boundary walls. Architectural details include sash and case windows, dormers (a few of which have corbelled details), fanlights, transom lights, margins and rybats. While these individual elements of the built fabric may not appear significant, their collective contribution to the Conservation Area is considerable. Any new development or alterations should therefore aim to respect the individual building and the wider Conservation Area and take account of these important features.

Although the Charlesfield Industrial Estate is located outwith the Development Boundary of St Boswells, it plays an important role within the settlement. The Plan also identifies an extension to the east of the existing Industrial Estate.

The Plan also identifies four key greenspaces within St Boswells which provide recreational opportunities for the community and therefore are to be protected.

KEY INFRASTRUCTURE CONSIDERATIONS

An issue which is of particular concern within St Boswells is that of transport. As a result of increased through traffic, resident's on-street parking and shop traffic including deliveries, the Main Street through the settlement and its junction onto the A68 can become very congested particularly at peak times. These are issues that will require continued assessment.

St Boswells and the surrounding area is covered by the Countryside Around Towns policy. The policy seeks to protect the settlement from coalescence and thereby retaining the individual identity of St Boswells as well as protecting and enhancing the local area.

STICHILL

HOUSING MARKET AREA
Central

LOCALITY
Cheviot

POPULATION
203

PLACEMAKING CONSIDERATIONS

Stichill is situated in an elevated position with views to the south over Eden Water and the Tweed Valley towards the Cheviot Hills. Development within the settlement is focused along Ednam Road and the B6364, Kelso to Greenlaw Road, which runs through the village.

The Plan identifies one greenspace for protection within Stichill at the Village Hall Play Area.

PREFERRED AREAS FOR FUTURE EXPANSION

Although there are no formal housing allocations within the Stichill, there are a number of small scale infill opportunities within the development boundary to accommodate future development.

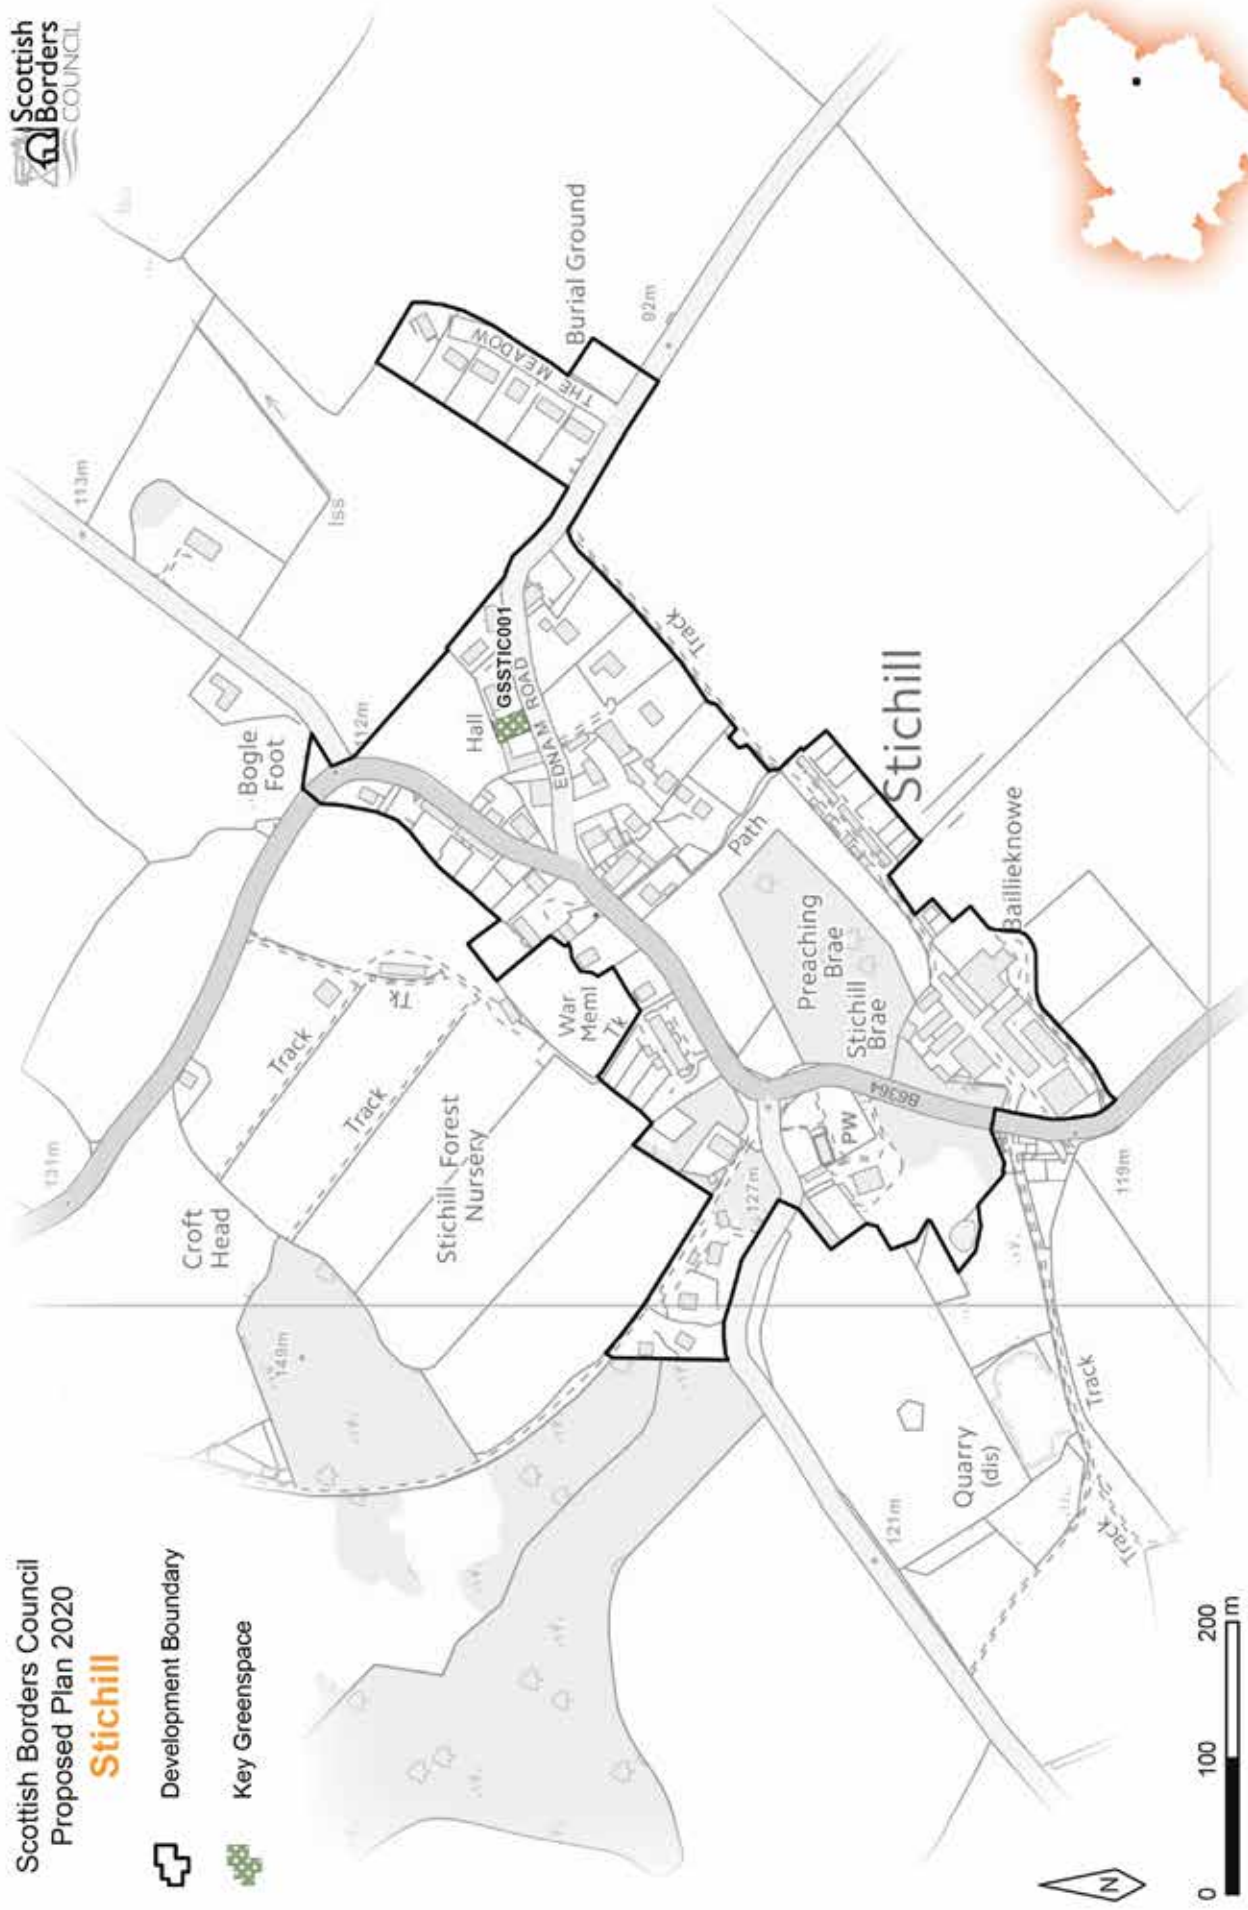

DEVELOPMENT AND SAFEGUARDING PROPOSALS

SETTLEMENT PROFILE

STOW

HOUSING MARKET AREA
Northern

LOCALITY
Eildon

POPULATION
718

PLACEMAKING CONSIDERATIONS

The village is located in the pastoral upland valley of the Gala Water. Its character is influenced by the nearby divided moorland of the Moorfoot Plateau and the plateau grassland of the Lauder Common. It sits along the river valley of the Gala Water and is framed between Stagehall Hill to the west and Torsonce Hill, Sell Moor and Craigend Hill in the east. The Gala Water, which meanders along the valley floor within the settlement, has a large area of flood plain to both eastern and western banks. This flood plain is a dominant feature of the village. The village itself lies predominately on the eastern side of the river.

The Conservation Area for Stow takes in much of the centre of the original settlement and includes the Subscription Bridge and the Church of St Mary of Wedale. The settlement is centred around the remains of the Old Parish Church and the remains of the Bishop of St Andrew's manor house that is also known as the 'palace'; and in addition to those properties also retains many of the historic properties that are only found in such a distinctive place.

The settlement of Stow is built-up of a range of different styles and types of properties. These range from the small, single storey cottage type, modern detached two storey to the grand baronial Town Hall. At the centre of Stow is the Pennywhiggam Burn which flows through the settlement (east/west) and is bounded by ash trees and provides a green space. Traditional building materials within the settlement vary from whin and sandstone, slate and harl; and architectural elements like rybats, margins and transom lights are also notable throughout Stow.

The Plan identifies the Stow Playing Field as a key greenspace as it provides the Stow community with many important recreation opportunities.

The Plan provides one housing allocation to the north of the village along Craigend Road, and another to the south at Stagehall II. A mixed use site is also provided within the centre of the village on the former Royal Hotel site.

CHANGING CONTEXT

Given its small scale the Core Activity Area previously identified for Stow has been removed from this Plan.

KEY INFRASTRUCTURE CONSIDERATIONS

This settlement is identified within the Council’s Local Flood Risk Management Plans as being at risk of flooding. Any development proposals should therefore be subject to early consultation with the Council’s Flood and Coastal Management Officer, and SEPA, having regard to SEPA’s Indicative River and Coastal Flood Map (Scotland) and any other relevant flood risk information. A flood risk assessment may be required and may influence the scale and layout of any development at a particular location.

PREFERRED AREAS FOR FUTURE EXPANSION

Once the allocated sites are fully developed the preferred area for future expansion beyond the period of this Local Development Plan will be an area north east of Stow at Craigend and two areas at Lugate, south west of Stow. These sites are considered to have potential for longer term mixed use development. The Craigend site was identified as an opportunity for development and the Lugate sites were identified as an opportunity for a new settlement in the Development and Landscape Capacity Study. The Railway Station provides good accessibility by public transport to these potential longer term development areas. The Craigend site would require a new or improved access to the A7 and the Lugate sites would require a new access onto the A7. Moreover longer term employment land to meet general business needs would be beneficial in these areas. These areas will be subject to further assessment as part of the next Local Development Plan Review and will require a Masterplan to ensure a coherent and holistic approach.

SETTLEMENT PROFILE

SWINTON

HOUSING MARKET AREA
Berwickshire

LOCALITY
Berwickshire

POPULATION
277

PLACEMAKING CONSIDERATIONS

Swinton is located on the lowlands associated with the River Tweed contained within rolling arable and pasture fields. The settlement was re-designed in the 18th Century and laid out with a village green and Market Cross. There has been limited expansion east and west but the layout remains largely intact. Swinton is primarily residential, although some services are located at the eastern end.

The Conservation Area comprises mainly of the planned estate village centring on the village green. There is a distinct layout placed along a single terrace row with only a few detached properties. The majority of properties are constructed of traditional materials such as sandstone and slate, or they are harled. Architectural detailing such as timber bargeboards, continuous cills on upper floors, sash and case windows, and transom lights appear frequently. These built fabric elements help form the character of the Conservation Area. Any new development or alterations must aim to respect the importance of the layout and built fabric features.

The area to the north west of the settlement is subject to a Tree Preservation Order and the surrounding area is prime agricultural land.

There is one housing allocation and one mixed allocation within Swinton. The mixed use site includes the requirement for the provision of community facilities.

SETTLEMENT PROFILE

TRAQUAIR

HOUSING MARKET AREA
Northern

LOCALITY
Tweeddale

POPULATION
120

PLACEMAKING CONSIDERATIONS

The village lies on the lower and western slopes of Plora Rig and Damhead. It faces west and is situated within the Quair Water valley floor, which opens out to the north towards Innerleithen. The views out of the village are generally of lower undulating hills with the exception of to the north towards Lee Pen and Kirnie Law.

Traquair has a small scale rural appearance, the area is characterised by groupings of modest traditionally constructed houses separated by agricultural fields and commercial woodland planting on the higher ground.

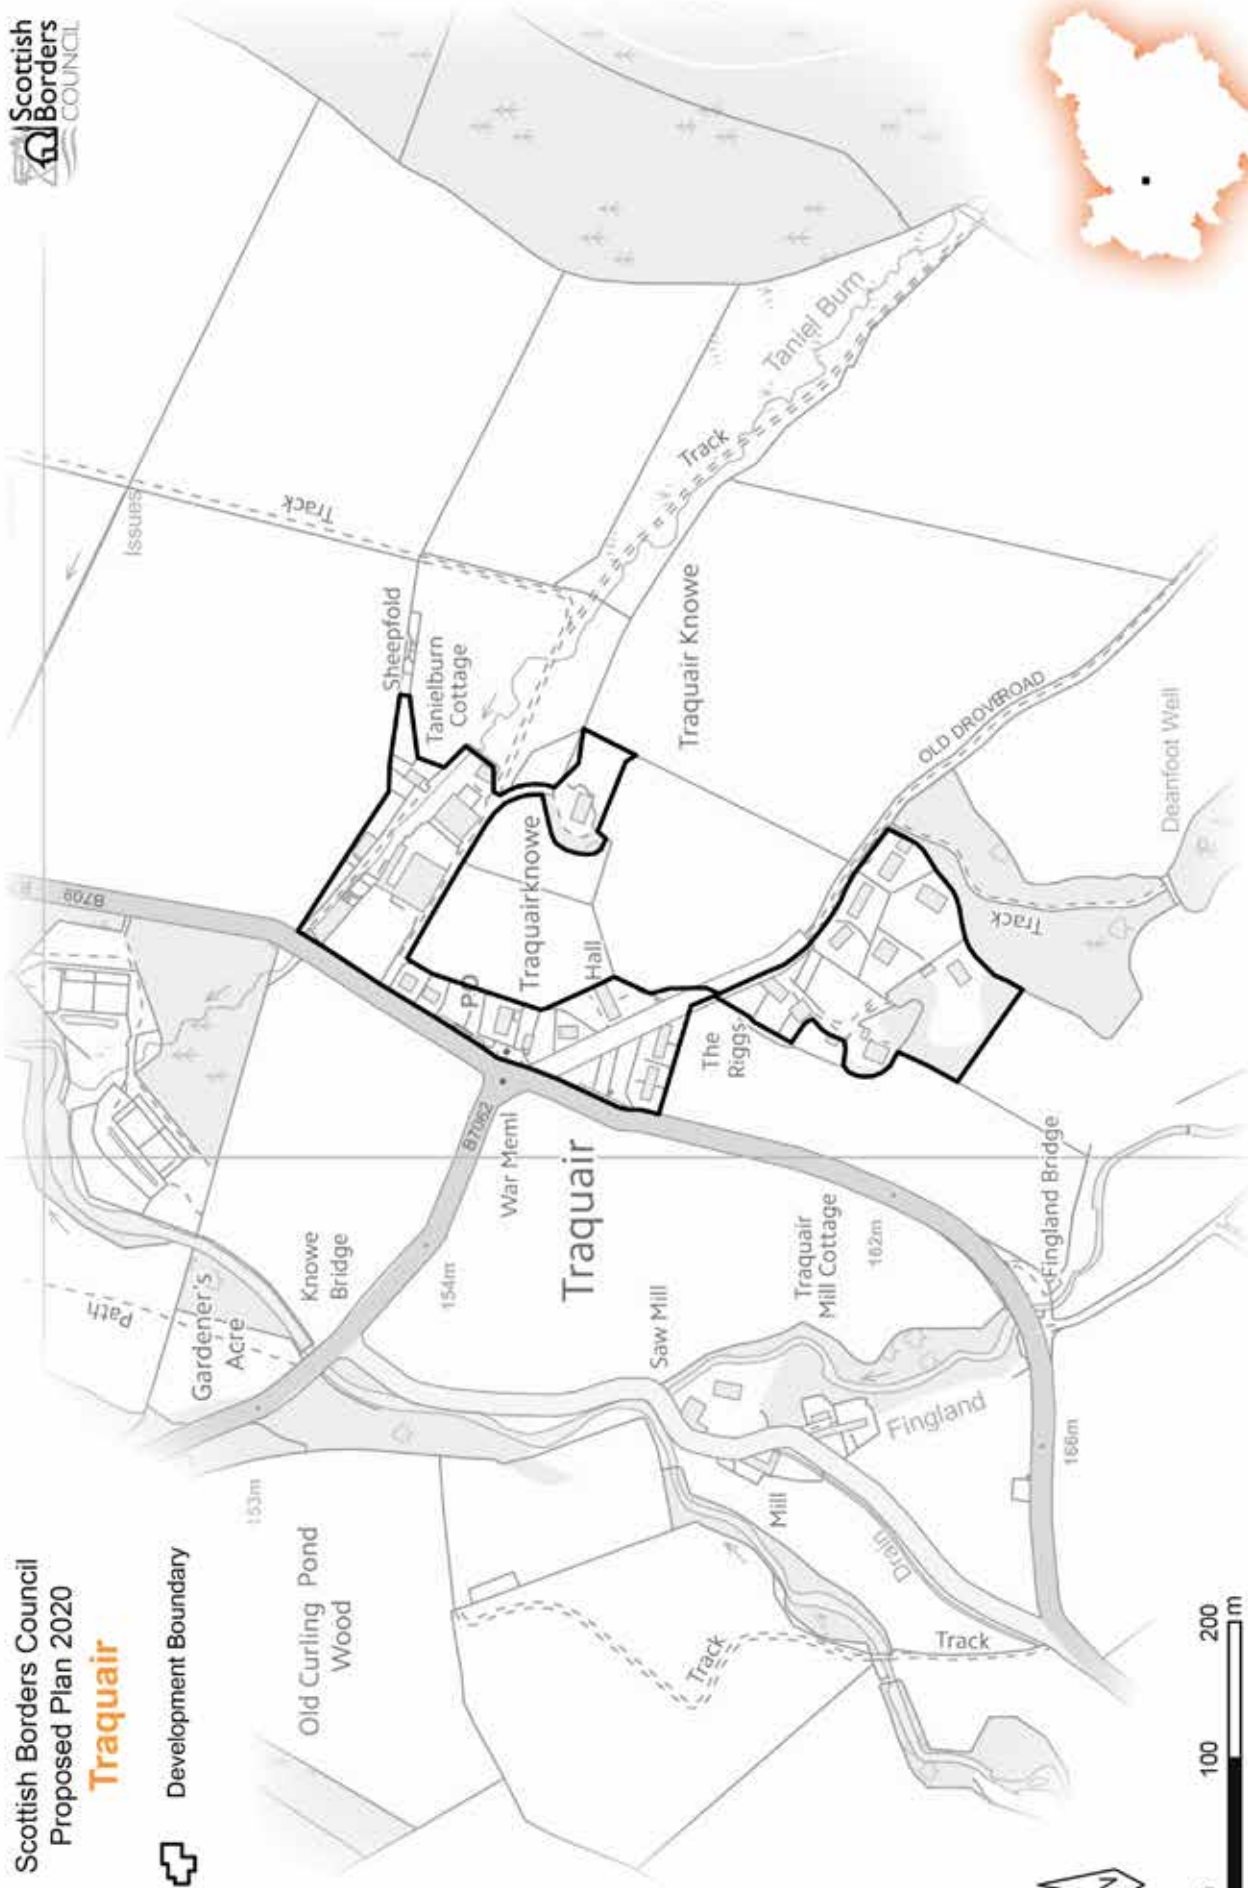

Traquair is situated in close proximity to the Quair Water and Fingland Burn both of which are designated Special Areas of Conservation.

PREFERRED AREAS FOR FUTURE EXPANSION

The Plan does not propose to allocate any sites at Traquair. It is considered that the village is not suited to large scale development.

Traquair

Development Boundary

SETTLEMENT PROFILE

TWEEDBANK

HOUSING MARKET AREA
 Central

LOCALITY
 Eildon

POPULATION
 2,101

PLACEMAKING CONSIDERATIONS

The character of Tweedbank is established by its layout and countryside setting. Its layout is made up of clusters of development along Tweedbank Drive. It is situated in the upland fringe valley with settlements opposite the confluence of the River Tweed and the Gala Water.

To the east of the settlement boundary is the Eildon and Leaderfoot National Scenic Area. The River Tweed Special Area of Conservation, a wildlife site of international importance, is north of the settlement. South of the settlement is the Tweed, Ettrick and Yarrow Confluences Special Landscape Area.

Tweedbank was planned as a new village in the 1970s and has become a successful and thriving community with a relatively recent large residential development opposite Gun Knowe Loch.

Policy EP6 (Countryside Around Towns) seeks to protect the area between Darnick and Tweedbank from development in the longer term, primarily to avoid coalescence of the settlements, thereby retaining individual character.

The railway terminal for the Borders Railway is located at Tweedbank and the village is therefore seen as an appropriate location for growth. The Blueprint for the Borders Railway seeks to ensure economic development opportunities are maximised along the railway corridor. This Plan seeks to promote these opportunities. The allocated site for mixed use development at Lowood (MTWEE002) provides an opportunity for a range of uses with excellent development opportunities given its attractive setting, its proximity to the railway station and its location within an area with an established housing market demand. A Masterplan, produced in 2017, sets out some initial ideas which will be developed further through Supplementary Planning Guidance.

The Central Borders Innovation Park is one of the most successful business and industrial areas in the Scottish Borders. It is well located in terms of roads and footway access and is ideally placed to capitalise on the opportunities brought by the Borders Railway.

The sites have a good internal roads layout and are serviced. The industrial estate is, however, suffering from an ageing and increasingly substandard building stock and the size and layout of both the buildings and external yard areas are not consistent with modern development requirements. There are therefore significant opportunities in Tweedbank to try to create a high quality business and industrial estate which capitalises on the railway terminal and provides a supply of industrial and business land for the central Borders within the period of this Local Development Plan.

In order to help promote and encourage development interest in business and industrial development a Simplified Planning Zone (SPZ) has been approved for the Central Borders Business Park. In essence this means new development proposals within the Business Park can be implemented, subject to satisfying certain development criteria, without the need to submit formal planning applications. Recently approved Supplementary Planning Guidance aims to ensure safeguarding of land and buildings for business types and seeks to improve the utilisation of the business land.

There are two areas, at Tweedbank Park and the playing fields, identified as key greenspaces.

DEVELOPMENT AND SAFEGUARDING PROPOSALS

BUSINESS AND INDUSTRIAL SAFEGUARDING

SITE REFERENCE	SITE NAME	SITE SIZE (HA)	INDICATIVE SITE CAPACITY
zEL59	North of Tweedbank Drive	6.3	N/A
Site Requirements

A minimum of 2.3ha of high amenity business land to be provided in line with Policy ED1: Protection of Business and Industrial Land • Development must be high quality and sustainable • A comprehensive Transport Appraisal to be undertaken. There will need to be at least two vehicular access points into the site. The appraisal, proportionate to the nature and scale of the allocations, and the trunk road network in the area, would be required to determine any potential cumulative impact of the sites, and would identify appropriate and deliverable mitigation measures on the network including on the A6091, A68 and potentially the A7 • Appropriate internal and external connectivity as well as the creation of effective pedestrian/cycle connectivity with both Tweedbank and Galashiels • Site access must take cognisance of the possible extension of the Borders Railway and of the potential for a replacement Lowood Bridge • A Flood Risk Assessment is required as the site is at risk from a 1:200 year flood event from fluvial and surface water flooding. The FRA would require to assess the flood risk from the River Tweed and the developer to demonstrate how the risk from surface water would be mitigated. Consideration will need to be given to bridge and culvert structures within and adjacent to the site. The possibility of de-culverting should be investigated • Mitigation required to ensure no significant adverse effects on integrity of River Tweed Special Area of Conservation • Mature woodland and parkland trees and buffer area to River Tweed SAC/SSSI to be safeguarded • There is a significant tree and woodland structure on the estate. Tree survey to BS5837 to be undertaken to inform potential areas of development • Some archaeological investigation may be necessary before or during development • The wall that defines much of the southern boundary to be retained as much as possible • Potential need for Environmental Impact Assessment • Potential contamination to be investigated and mitigated • An extension to the Primary School would potentially be required • A full Drainage Impact Assessment would be required. There is currently no capacity at the Waste Water Treatment Works to accommodate development. An upgrade would be required, the developer would need to meet the 5 growth criteria • Contact with Scottish Water in respect of water treatment works local network issues • Potential for on-site play provision • Existing path network to be safeguarded and potentially extended • Incorporation of affordable housing as set out in the Local Development Plan • Assessment of ecology impacts and provision of mitigation, as appropriate • The design and layout of the site should consider co-location issues in relation to odour from Easter Langlee Landfill (PPC) and Waste Management Licence exempt composting site at Pavilion Farm.

SETTLEMENT PROFILE

WALKERBURN

HOUSING MARKET AREA
Northern

LOCALITY
Tweeddale

POPULATION
782

PLACEMAKING CONSIDERATIONS

The village sits with a steep side river valley on the lower south facing slopes of Cairn Hill and Kirna Law. The land falls towards the River Tweed and then rises again steeply to the south towards Elibank Law and Plora Rig. The village of Walkerburn grew up around the Ballantyne's Mill, built in 1854, however prior to that the only trace of habitation in this area was Caberston farmhouse and steading.

The village lies within the Central Southern Uplands Regional Landscape Area and is described as Upland Valley with Woodland. There are significant habitat networks in and around the Walker Burn, the forestry plantations on adjoining hillsides and the Tweed and open haughland. The River Tweed runs along the southern edge of the village and the land along this edge is susceptible to flooding. There is also the Walker Burn, which may give rise to localised flooding. The River Tweed to the south of the village is a Site of Special Scientific Interest (SSSI) and Special Area of Conservation (SAC).

Focused within the centre of the settlement there is a high concentration of listed buildings including the attractive Caberston Steading. With a basic linear form, the village runs along the route of the A72 and much of the established settlement takes the form of a range of split level houses and cottages along the roadside. To the west of the village is a group of later semi-detached stone built cottages which would have been built as the village prospered at Caberston Avenue whilst to the east of the village on the north side of the main road are large houses built for the Mill owner which sit within well-established mature garden grounds. The later development has generally been to the east of the village at Tweedholm, which runs parallel to the main road.

The Plan provides two housing allocations to the north of the settlement at Caberston Farm. A redevelopment opportunity is also allocated in the centre of the village taking in part of the Caberston Farm and Old Mill Site. Three areas of greenspace are also identified for protection.

KEY INFRASTRUCTURE CONSIDERATIONS

This settlement is identified within the Council's Local Flood Risk Management Plans as being at risk of flooding. Any development proposals should therefore be subject to early consultation with the Council's Flood and Coastal Management Officer, and SEPA, having regard to SEPA's Indicative River and Coastal Flood Map (Scotland) and any other relevant flood risk information. A flood risk assessment may be required and may influence the scale and layout of any development at a particular location.

SETTLEMENT PROFILE

WEST LINTON

HOUSING MARKET AREA
Northern

LOCALITY
Tweeddale

POPULATION
1,547

PLACEMAKING CONSIDERATIONS

The character of West Linton is established particularly by its setting as it lies at the foot of the Pentland Hills Special Landscape Area where it clusters around the valley and gorge of the Lyne Water. The Lyne Water designated a Special Area of Conservation runs through the settlement. The Lyne Dale Ancient Woodland also sits within the settlement to the northwest off Medwyn Road. The settlement benefits particularly from long views to the south across the level fields.

The original settlement of which much of it is a Conservation Area includes a considerable part of the historic settlement and the tree-lined approach along Station Road. The narrow winding streets and paths that run through the village provide a distinctive spatial identity. Raemartin Square especially forms a break out space along the narrow Main Street. Both the Upper and the Lower Green offer a significant amount of green space along the Lyne Water of which glimpses can be seen from the Main Street.

Properties tend to be one and a half, to two storeys in height. Some gable-fronted properties can be found such as the former bank on the Main Street. Larger detached and semi-detached properties can also be found to the periphery of the settlement. While traditional building materials prevail within the Conservation Area such as sandstone, harling, slate and even lime-wash (though now painted over) so too do many of the architectural details – sash and case windows, timber doors, margins and rybats, and transom lights. Other details that are also common are exposed rafter feet, stone boundary walls and corner protectors.

The village of West Linton benefits from a diverse range of services and facilities to serve the local community including a chemist and a post office. The settlement also benefits from a supermarket which is situated within the centre of the settlement along the Main Street. West Linton is considered to be one of the healthier settlements within the Scottish Borders with a low vacancy rate of commercial properties.

The Plan identifies a number of greenspaces within the settlement including the Lower Green and the Upper Green; these spaces provide the West Linton community with many important recreation opportunities.

The Plan provides a single housing allocation at School Brae, and a Business and Industrial site at Deanfoot Road.

SETTLEMENT PROFILE

WESTRUTHER

HOUSING MARKET AREA
Berwickshire

LOCALITY
Berwickshire

POPULATION
153

PLACEMAKING CONSIDERATIONS

Westruther is a small village located in the shadow of the Lammermuir Hills, set within rolling arable and pastoral fields. The settlement is primarily residential with traditional row housing evident and modern housing at Kirkpark in recent years.

There are two housing allocations in Westruther, the most recent (AWESR002) has been brought forward as part of the current LDP. A business and industrial allocation (BWESR001) has also been brought forward, located to the north east of the village.

PREFERRED AREAS FOR FUTURE EXPANSION

Once the allocated sites are developed the preferred area for future expansion is to the north of the current allocation (AWESR002) beyond Edgar Road.

DEVELOPMENT AND SAFEGUARDING PROPOSALS

HOUSING

SITE REFERENCE	SITE NAME	SITE SIZE (HA)	INDICATIVE SITE CAPACITY
AWESR005	East of Kirkpark	0.6	5
Site Requirements			
<ul style="list-style-type: none"> • Vehicular and pedestrian access from the B6456 • Pedestrian/cycle access required from the village through the Kirkpark development • Retention of trees on western boundary of site • Ecological survey of woodland and appropriate mitigation • Further assessment of the creation of a village green/open space • Additional boundary screen planting on south-eastern edge. 			

AWESR002	Edgar Road	0.4	10
Site Requirements			
<ul style="list-style-type: none"> • Flood Risk Assessment required, to assess the risk from the small watercourse adjacent to the site • Assessment of ecology impacts and provision of mitigation, where appropriate • Protect and enhance the existing boundary features, where possible. This includes the mature beech tree and mature hedge along the western boundary • Appropriate landscaping/planting to be incorporated within the development and the long term maintenance of the landscaped areas must be addressed • Archaeology evaluation/mitigation may be required • Transport Statement is required for any development • Potential access from Edgar Road and/or from the minor road to the west • Opportunity to enhance turning, parking and pedestrian connectivity along Edgar Road • Early engagement with Scottish Water regarding the WWTW and WTW. 			

BUSINESS AND INDUSTRIAL LAND

BWESR001	Land South West of Mansefield House	0.8	N/A
Site Requirements			
<ul style="list-style-type: none"> • This is a business and industrial site as defined in Policy ED1 • A feasibility study, including a Flood Risk Assessment will be required to assess the potential for channel restoration and the risk from the small watercourse which is adjacent to the site • Archaeology evaluation/mitigation is required • Early engagement with Scottish Water, in respect of the WWTW and WTW • Transport Statement is required for any development • Protect boundary features, where possible • Appropriate landscaping/planting to be incorporated within the development and the long term maintenance of the landscaped areas must be addressed • Potential contamination on the site to be investigated and mitigated, where required • Assessment of ecology impacts and provision of mitigation, as appropriate.

SETTLEMENT PROFILE

WHITSOME

HOUSING MARKET AREA
Berwickshire

LOCALITY
Berwickshire

POPULATION
98

PLACEMAKING CONSIDERATIONS

Whitsome is a settlement of linear form that follows an east to west direction and commands significant views over the Merse and the Cheviots to the south. A variety of property types are evident in the village, from traditional row cottages to more modern detached houses. An allocation is safeguarded for business and industrial land to the east.

PREFERRED AREAS FOR FUTURE EXPANSION

Future development to the west of the village is restricted due to poor road access. Another constraint is the surrounding area is designated as prime agricultural land.

SETTLEMENT PROFILE

YARROWFORD

HOUSING MARKET AREA
Southern

LOCALITY
Eildon

POPULATION
243

PLACEMAKING CONSIDERATIONS

The settlement is situated in the upland valley of the Yarrow and is bound to the west by the Hangingshaw Garden and Designed Landscape. The Yarrow Water is part of the River Tweed Special Area of Conservation, a wildlife site of international importance. The Tweed, Ettrick and Yarrow Confluences Special Landscape Area surrounds the boundaries of the settlement.

The character of Yarrowford is established by its countryside setting and two clusters of development, one to the south of Broadmeadows House and the other at Minchmoor Road.

There is one area, to the north of Minchmoor Road, identified as a key greenspace.

PREFERRED AREAS FOR FUTURE EXPANSION

No additional areas for future growth have been identified in this Local Development Plan given difficulties of access, landscape issues and flooding.

Development adjacent to the Gruntly Burn or Yarrow Water will be resisted where there is a flood risk. Development to the west will be resisted where it would adversely affect the Hangingshaw Garden and Designed Landscape. Development to the east will be resisted where it will have a significant adverse impact on the Tweed, Ettrick and Yarrow Confluences Special Landscape Area.

DEVELOPMENT AND SAFEGUARDING PROPOSALS

SETTLEMENT PROFILE

YETHOLM

HOUSING MARKET AREA
Central

LOCALITY
Cheviot

POPULATION
546

PLACEMAKING CONSIDERATIONS

The settlement of Yetholm has a defined and special character not only because it is made up of two distinct parts, Kirk Yetholm and Town Yetholm but also because of its setting. The Haugh and the course of the Bowmont Water that separates Town Yetholm from Kirk Yetholm play a key role in connecting the two parts together.

The Conservation Area of Yetholm has many special characteristics that are not found in many other locations even outwith the Borders. The most important features of the Yetholm Conservation Area are its historic layout with both Town Yetholm and Kirk Yetholm with their own green, along with its attractive rural setting. Properties are mainly two storeys in height though one and a half storey properties do exist in Kirk Yetholm. As the layout of Yetholm is one of the most important features of the Conservation Area, it is recommended that new development should respect this characteristic. Buildings of feature include the Parish Church, Blunty's Mill, and the Old Border Inn all in Kirk Yetholm; and in Town Yetholm the War Memorial and the Wauchope Monument and the listed "Thatched Cottage" on the High Street.

Yetholm benefits from many views within and out of the settlement. The surrounding landscape is gently rolling and around the settlement itself there are few tree belts of significant size. The most important of the tree belts frame the eastern and western edges of the Haugh Land.

The Plan provides two housing allocations; both are located in Town Yetholm at Deanfield Court and Morebattle Road.

Within the Yetholm area there is a need for business and industrial land for small-scale businesses located in the local area. To meet this need a site has been identified for business and industrial use to the west of the settlement along the B6352.

The identified key greenspaces within Yetholm provide an important recreational area for the community and will therefore be protected.

KEY INFRASTRUCTURE CONSIDERATIONS

Town Yetholm is identified within the Council's Local Flood Risk Management Plans as being at risk of flooding. Any development proposals should therefore be subject to early consultation with the Council's Flood and Coastal Management Officer, and SEPA, having regard to SEPA's Indicative River and Coastal Flood Map (Scotland) and any other relevant flood risk information. A flood risk assessment may be required and may influence the scale and layout of any development at a particular location.

PREFERRED AREAS FOR FUTURE EXPANSION

There are no areas for longer term expansion in Yetholm. Development within the Haugh between Town and Kirk Yetholm will be resisted.

DEVELOPMENT AND SAFEGUARDING PROPOSALS

HOUSING

SITE REFERENCE	SITE NAME	SITE SIZE (HA)	INDICATIVE SITE CAPACITY
RY1B	Deanfield Court	0.6	7
Site Requirements			
<ul style="list-style-type: none"> • Vehicular access is to be taken from Deanfield Court which would require to be widened in parts, this should be discussed further with the Council's Roads Planning Team • A vehicular link to be incorporated within the site to link the adjoining business and industrial site BYETH001 • Existing trees are to be retained along the northern site boundary to protect the residential amenity of Yetholm Hall • Screening may be required along part of the south-eastern site boundary to screen the site from existing commercial uses along Deanfield Court. A management scheme for planting is also required • A pedestrian linkage to the village centre would be required • Existing stone wall along the eastern boundary to be retained if possible to maintain a defined settlement edge • Archaeology interests have been recorded in the surrounding area and archaeological assessment including archaeological evaluation along with associated mitigation measures is required. 			
RY4B	Morebattle Road	1.2	18
Site Requirements			
<ul style="list-style-type: none"> • Vehicular access is to be taken from Woodbank Road • Structure planting is required to the southern and western site boundaries to provide setting for the development and to reinforce the settlement edge. QUESTION 1

Do you agree with the main aims of the LDP2? Do you have any alternative or additional aims?

QUESTION 1

Do you agree with the main aims of the LDP2? Do you have any alternative or additional aims?

Main Issue	Sub Issue	Summary of Main Issues Raised	Proposed Response to Main Issues Raised	Recommendation
Vision, Aims and Spatial Strategy: Question 1	Agree with Vision, Aims and Spatial Strategy of LDP2	The contributors support the main aims of LDP2 (25, 43, 78, 82, 101, 119, 126, 149,153, 171, 174, 179, 181, 183, 187, 190, 192, 210, 214, 215, 225, 228, 230, 236, 253, 255, 259, 263, 274, 280, 283, 291, 293, 296, 299, 301, 312)	Support noted.	No action required
		<p>I support the following aims :</p> <p>Para 3.3 it is stated that 'it is not anticipated the LDP2 will require a significant number of new houses'.</p> <p>Para 3.5 states 'the LPD must seek to encourage diversification of the rural economy by supporting appropriate economic development and tourism in the countryside'</p> <p>Para 3.6 states 'the built and natural heritage are major component parts of the attractiveness of the Scottish Borders which must be protected and enhanced.' and 'LDP2 must continue to ensure new development is located and designed in a manner which respects the character, appearance and amenity of the area'</p> <p>Para 3.7 states 'The council must continue to promote and investigate ways to address climate change issues....There is a continuing need to reduce travel, greenhouse gas emissions as well as energy consumption.</p> <p>3.8 summary includes 'Promote economic development opportunities along the railway corridor' and 'Maximise and promote the Scottish Borders tourism potential and build strong visitors economy' 'Protect and enhance the built and</p>	Support noted for the listed text.	No action required

		<p>natural environment'. (90)</p> <p>Agree with the proposed strategy encouraging strategic growth within the three Rural growth Areas and in particular the Western Borders / Peebles. (111, 114)</p> <p>SEPA note and welcome that sustainability and climate change are key elements of the vision and that the Council is promoting sustainable development which addresses the issues of climate change adaption is being investigated as part of the SBC's transition to a low carbon economy. SEPA are also supportive of the specific reference to developing heat mapping within the vision for LDP2 as an opportunity, as part of the transition to a low carbon economy and the development of buildings and property which will be resilient to the impacts of climate change. (119)</p> <p>With regard to the Spatial Strategy, SEPA welcome the identification of the potential flood risk and need for a second bridge requirement in Peebles, prior to the release of any further housing land on the south side of the River Tweed. The identification of environmental constraints on high demand areas such as this helps with the transparency and consistency of LDPs for both the public and stakeholders. (119)</p> <p>SEPA support the inclusion of making adequate provision for waste management as one of the Local Development Plan aims, and the positive approach taken towards waste management as stated in paragraph 3.8 of page 16 that "<i>The provision of land to deal with waste is also a role</i></p>	<p>Agreement noted.</p> <p>Support noted.</p> <p>Support noted.</p> <p>Support noted.</p>	<p>No action required</p> <p>No action required</p> <p>No action required</p> <p>No action required</p>
--	--	---	---	---

		<p><i>for the Plan. Where this involves facilities for recycling or waste reduction, then this in turn will also help to reduce dependence on landfill sites". SEPA also support the aim for Easter Langlee in Galashiels (Para 3.19, page 17) to improve recycling beyond the existing levels and the opportunity to create the provision of district heating in nearby areas. (119)</i></p> <p>Yes, completely agree. Especially on the requirement for improved transport links and digital connectivity in the more rural areas. These are essential for existing businesses to flourish and for new businesses to start up. (165)</p> <p>In principle I agree with most of the outlines. (168)</p> <p>Broadly support aims. (178)</p> <p>We support the Council's ambitions for delivering sustainable development and a low-carbon future. The protection of "natural intrinsic qualities" should place emphasis on natural, indigenous habitats and species (ie, not commercial conifer plantations or introduced, non-native plant and animal species, even when these are perceived to be part of the natural biodiversity or have some nominal aesthetic value to some people). We support the ambitions for an extension of the Borders railway to Carlisle and the provision of a new station at Reston to service the east-coast line. Rail travel can make a major contribution to the low-carbon economy by providing an alternative to road travel and reducing the number of vehicles. (182)</p> <p>Sustainability and climate change – We agree with</p>	<p>Support noted.</p> <p>Comments noted.</p> <p>Comments noted. The Council will continue to promote a mix of qualities including consideration of natural, indigenous habitats and species.</p> <p>The Land Use Strategy is</p>	<p>No action required</p> <p>No action required</p> <p>No action required</p> <p>No action required</p>
--	--	--	--	---

		<p>the provisions listed here. In Annex 3, in relation to policy PMD1 Sustainability it is suggested that the Council considers the integration of the Land Use Strategy with the planning system; this should also be listed in this section to ensure that there are connections between this aim and the suggested change to policy PMD1. (199)</p> <p>We are broadly supportive of the aims described in the LDP2MIR, and in particular 'promoting development of Brown Field sites', a subject which is particularly relevant in the context of the Vacant and Derelict Land Taskforce which is being led by SEPA and the Scottish Land Commission. Transforming Vacant and Derelict Land. There is nearly 12,000 hectares of vacant and derelict land in Scotland which is the equivalent to over 9,000 football pitches. It is estimated that a third of us live within 500 metres of a derelict site. In some of Scotland's cities this figure is much higher, reaching 61% in Glasgow. The Scottish Land Commission and the Scottish Environment Protection Agency (SEPA) are working together in an innovative partnership to transform how vacant and derelict land is dealt with. Supporting local authorities to rejuvenate vacant and derelict land brings about long term regeneration and renewal – unlocking growth, reviving communities, increasing community empowerment, reducing inequalities and inspiring local pride and activities. The Land Commission and SEPA have signed a Sustainable Growth Agreement and will use this agreement to focus on the delivery of our shared vision for transforming our approach to vacant and derelict land in Scotland. We are also supportive of the planning authority's aims of 'Protecting the</p>	<p>referenced in policy ED3. It is considered this is a more appropriate policy for it to be referenced. It remains a pilot project and it is not considered it can be included within policy PMD1 which is a primarily policy which all proposals should be judged against.</p> <p>Support noted.</p>	<p>No action required</p>
--	--	--	--	---------------------------

		<p>Natural Environment', and Encouraging Tourism and a better visitor economy. We think Policy EP7, respecting Listed Buildings should also be a priority. (212)</p> <p>Broadly agree and it is my opinion that extending the Borders Railway through to Carlisle in tandem with the definition of a National Park for the Scottish Borders would contribute significantly towards achieving aims such as economic growth, tourism, natural heritage and definition of land designated for housing. (262)</p> <p>Agree with aims. Additional priority should be given to capacity and quality of school and medical facilities. (273)</p> <p>Agree - however there should be proposals made regarding the requisite infrastructure improvements. (282)</p> <p>We agree wholeheartedly with the main aims you describe. And have no alternative proposal to put forward. (290)</p> <p>Network Rail supports the vision of the MIR in achieving sustainable growth, and its objectives for communities, the economy and sustainability. The rail network can make a key contribution to achieving the objective of creating a sustainable</p>	<p>Comments noted.</p> <p>Support noted. The LDP2 process will continue to consult SBC Education and the NHS on development proposals.</p> <p>Whilst infrastructure issues and requirements are frequently referred to within the LDP an aim has been added making further specific reference to infrastructure requirements.</p> <p>Support noted.</p> <p>Support noted and the Council agrees with the specific points the author has referred to.</p>	<p>No action required</p> <p>No action required. The process will continue to consult SBC Education and the NHS on development proposals</p> <p>A further aim has been added making reference to infrastructure considerations</p> <p>No action required</p> <p>No action required</p>
--	--	--	--	--

		<p>place which is attractive to live, work and do business in. The importance of the railway to sustainable development and of railway stations to urban regeneration is gaining wider understanding. It is welcomed that the Council recognises the links between connectivity and these placemaking principles, and for the support for economic development opportunities along the railway corridor. Opportunities for housing development and town centre regeneration along the rail corridor and in the settlements with improved public transport links is likewise supported. The importance of the existing and potential rail infrastructure is particularly important given the ageing nature of the population in the Scottish Borders which is forecast over the Plan period. For development plan objectives relying on sustainable transport and improved rail connections to be realised, Network Rail must rely on Plan policy and guidance which ensures the impacts of proposals on rail infrastructure are clearly assessed and that delivery, including funding, responsibilities are clear. The spatial strategy identified in the MIR is likewise supported with the majority of growth within the Central Borders Rural Growth Area which is served by the Borders Railway. This provides a focus for development in the most sustainable locations capitalising on the improved public transport links both within and beyond the Scottish Borders area.</p> <p>(294)</p> <p>Scottish Water supports the Council's vision, aims and spatial strategy. We will continue to work closely with the Council to ensure we continue to maintain a high level of service to our existing and future customers whilst protecting our assets. We</p>	<p>Support noted and the Council welcomes and agrees with the specific points stated. The Council always encourages potential developers to contact Scottish</p>	<p>No action required</p>
--	--	--	--	---------------------------

		<p>will ensure that we align our investment where it is required as we progress through to LDP2 and beyond. Scottish Water is fully committed to working with communities whilst we deliver the investment required to reduce any potential impact. We will provide the necessary capacity at our works to support economic growth and deliver this in the most sustainable way possible. We broadly support the Main Issues Report and our views on each of the questions within our remit, is given below. Scottish Water acknowledges that some of our treatment works have limited capacity. We would encourage developers to engage with us early to ensure we can target specific strategic investment where it is needed at the right time. Where there are existing Scottish Water assets, within a proposed site, again, we would encourage early engagement to ensure these assets are protected to ensure we maintain services to our customers. (323)</p>	<p>Water at an early stage to address any potential issues to be addressed. The Council has specific periodic meetings with Scottish Water which are most useful to discuss current issues and forthcoming developments.</p>	
Vision, Aims and Spatial Strategy: Question 1	Disagree with Vision, Aims and Spatial Strategy of LDP2	<p>The contributors disagree with the main aims of the LDP2 (95, 158, 170, 175, 184,193, 194, 268, 204)</p> <p>Paragraph 3.8 of the MIR Summary states objectives to ' Promote economic development opportunities along the railway corridor'. The only proposal for development which directly relates to this is a 2.5 ha site in Galashiels (BGALA006) which is absolutely trivial. So the MIR fails on this objective. (90)</p> <p>Whilst agreeing with the strategy to provide a generous supply of housing, although object to the suggestion that LDP2 will not require a significant</p>	<p>Disagreement noted.</p> <p>Economic development opportunities covers a range of matters and the current adopted LDP identifies a number of, for example, business, housing and town centre allocations and opportunities within the railway corridor.</p> <p>The LDP identifies a sufficient housing land supply and It is agreed there is developer and market</p>	<p>No further action</p> <p>No further action</p> <p>No further action</p>

		<p>number of new housing sites. The strategy to identify preferred housing sites on sites outwith strong market areas, and with potential constraints, is flawed given the potential risk to delivery. It is recommended increased provision in areas where people wish to live. The submitted site at Whitehaugh in Peebles should therefore be brought forward as an allocated site in LDP2. Whilst agreeing Peebles has a strong housing market it is disagreed a new bridge is required before further development can take place on the southern side of the River Tweed. (111, 114)</p> <p>I agree with some but the fundamentals of improving areas for business don't work without infrastructure. Housing can't just be added in such a way. We need more doctors surgeries, larger school and vastly improved roads (although not space to increase road capacity in most of Peebles). (200)</p> <p>This development has clearly not been thought through. By erecting 240 houses you will be increasing the population of Peebles by about 7 - 10 % depending how many families move in. Does the town have the capacity to take this extra capacity. In terms of Schools, (the high school is nearly full). Sewerage and general services and extra traffic as most of the people who live there will be working in Peebles or Edinburgh. Will the Glentress bikers take kindly to a big housing estate being built right next to them, has a survey been done there, it is the biggest tourist attraction and therefore a big money spinner for the town. There are other sites closer to Peebles that can</p>	<p>interest in Peebles. However, the Council will not support the inclusion of the Whitehaugh site in the LDP until a second bridge is built over the tweed. The site remains identified in the LDP as a potential longer term development to be formally allocated when the bridge is built.</p> <p>The Council will continue to liaise with Education, Roads Planning and the NHS with regards to potential new development sites.</p> <p>The Council has a statutory duty to allocate housing land for future demand and must give consideration as to ensuring such allocations are within areas with proven developer and market interest. The Council liaise with Education Dept and the NHS on potential sites across the Scottish Borders. No land at Eshiels for housing has been allocated within LDP2.</p>	<p>No further action. The Council will continue to liaise with Education, Roads Planning and the NHS with regards to potential new development sites</p> <p>No action required</p>
--	--	---	---	--

		<p>be used before Eshiels is considered surely. I do not agree with this development. (203)</p> <p>The aims of the LDP2 are hard to challenge in principle but the chosen housing proposals to satisfy expected demand seem excessively focussed on Peebles, rather than developing towns along the new Borders Railway. It is almost as if major housing developers have pushed for housebuilding where profit is maximised, without considering the capacity of existing infrastructure: health services, schools, commuter route congestion etc. (209)</p> <p>I don't agree with the aims. Building work areas will not improve employment and prosperity. Kings meadows industrial estate is an example. All full of little businesses that employ a few people. There is not a deficit of housing in the Peebles area. What you are hoping to supply is expensive housing for people out with the Borders to move to. There is no plans to improve transport. There is one bus and no train. There is no plans to build a bridge or any other road improvements. It will spoil tourism by taking away the one thing tourist came for - the beautiful unspoiled countryside. (235)</p> <p>No, I don't think it takes into account the key economic drivers for the local economy, namely tourism, nor the requirement for genuine low cost housing. The LDP2 seems to be driven by a desire to satisfy developers drive to higher profits rather than exercising any power to drive a broader vision. (239)</p>	<p>The Council must consider allocating housing where there is a known market and developer interest. Peebles is such a place amongst others across the Scottish Borders and the Council will consider such sites in consultation with relevant consultees including Education Dept and the NHS.</p> <p>Disagree. There is a requirement to find housing land where there is a demand. Not only does housing meet this demand to satisfy the wants and needs of a wide range of occupants, housing provides many economic benefits e.g. help sustain local shops / local businesses / social and leisure clubs. There are also significant benefits for local workmen in the trade which housebuilding offers.</p> <p>The LDP process seeks to address the balance of promoting economic development and housing need as well as considering environmental and tourism issues. There remains the requirement that developments must incorporate 25% affordable housing.</p>	<p>No action required</p> <p>No action required</p> <p>No action required</p>
--	--	---	---	---

		<p>Agree mostly. Feel SBC must take some steps to make sure that the infrastructure matches the increased population any development brings to the area before the development takes place. In the main the existing and anticipated economic growth is based on tourism which includes mountain biking, hill walking and other outdoor pursuits. How can building on the fields, and ruining the scenic/rural views in Eshiels, Cardrona and Innerleithen enhance the plan for rural development? This is counter to SBC policy ED7 of encouraging tourism. Take a more forward thinking and pro-active approach to environmentally sustainable housing design. How is SBC planning taking into account the change in age demographic? The population is set to increase by 1.5% over the next 10 year period...but the 65-74 and 75+ age groups is 6% and 31%. (207)</p> <p>I generally agree with the aims of growth and creation of sustainable communities and growing the Scottish Borders economy in a sustainable way. Clearly it is important to ensure that the infrastructure is in place in advance to meet an increased population ; How is the SBC planning to deal with the changing Borders demographic i.e. an ageing profile?; As a family we are considering the purchase of an electric car but need confidence that there will be sufficient electric-car charging points. We need a more pro-active approach to environmentally sustainable house design e.g. solar panels, heat pumps rather than fossil fuels etc. We are keen mountain bikers and the economic growth from tourism relating to mountain biking in the Tweed Valley and in particular around Glentress & Innerleithen is</p>	<p>The LDP process seeks to address the balance of promoting economic development and housing need as well as considering environmental and tourism issues. Policies within the LDP, notably policy HD5 – Care and Nursing Homes is supportive of care housing and lays down criteria tests for determining such applications, emphasising the amenity / facility / locational needs of residents. The delivery, financing etc of, for example, care / nursing homes facilities largely outwith the scope of the planning system.</p> <p>The Council has a statutory duty to identify sites within the LDP to satisfy housing need and demand. All proposed sites are subject to extensive consultation from a range of bodies and consideration must always be given to a range of policies including environmental and tourism matters. In the case of Tweeddale it is extremely difficult to find suitable housing land in Peebles (where there is a market interest) for a range of reasons thus the need to consider options further afield. Policies within the LDP, notably policy HD5 – Care and Nursing Homes is supportive of care</p>	<p>No action required</p> <p>No action required</p>
--	--	---	--	---

		<p>impressive. Housing and commercial development immediately surrounding Glentress should be considered carefully as we do not want biking tourists feeling they are no longer "in the countryside". Building on the open fields, and ruining the scenic vista's in Eshiels, Cardrona and Innerleithen would damage the rural development plan? It is counter to SBC policy ED7 of encouraging tourism. The SBC Spatial Strategy Staes "... success of outdoor recreational facilities at Glentress has helped tourism" and "The Scottish Borders has outstanding scenic qualities within its landscape and planning policy seeks to protect it." This doesn't seem to be the case! We don't want to kill the goose that lays the golden eggs! (216)</p> <p>I consider that the MIR affords too much emphasis to the rural growth areas, to the detriment of other areas in Scottish Borders, and to the detriment of</p>	<p>housing and lays down criteria tests for determining such applications, emphasising the amenity / facility / locational needs of residents. The delivery, financing etc of, for example, care / nursing homes facilities largely outwith the scope of the planning system. It should be noted that in relation to LDP policy ED7 Business, Tourism and Leisure Development in the Countryside, that policy aims to allow for appropriate employment generating development in the countryside whilst protecting the environment and to ensure that business, tourism and leisure related developments are appropriate to their location. It is not considered that any of the potential sites identified within the MIR is contrary to that policy. Appendix 3 of the LDP confirms the requirement for electric vehicle charging points. It is intended that the Council will produce Supplementary Planning Guidance through the period of the LDP to establish requirements for sustainable transport. The SPG is likely to cover a range of subjects taking on board the findings of the Council's 'Sustainable Development Committee'.</p> <p>The rural growth areas are the areas identified within the SDP for</p>	<p>No action required</p>
--	--	---	---	---------------------------

		<p>all of Scottish Borders. There is a need for much greater flexibility outwith rural growth areas. (264)</p> <p>It is increasingly evident in today's rapidly changing society and economy that the concept of sustainability, and the concomitant belief that sustainable locations and communities can only be achieved through centralisation, is already discredited and outmoded. This will become more evident through the plan period. A radically different interpretation is needed of what sustainability means in a planning context. (264)</p> <p>The concept of sustainability as advanced in strategic planning policies is already discredited. A different view is needed of what sustainability means in a planning context. The extent to which the planning system can control lifestyle changes which govern what is and what is not sustainable ought to be recognised. (265)</p>	<p>major strategic growth. However, this does not mean other areas should be ignored and the LDP continues to support development site opportunities outwith these areas where possible.</p> <p>It is considered the LDP adequately covers sustainability principles in line with national planning requirements. This is an ever changing and developing subject and the Council will continue to consider appropriate steps accordingly. The findings of the Councils Sustainable Development Committee will play a role in helping develop this matter.</p> <p>Comments noted. The planning system has a role to play promoting sustainability, although clearly the planning system alone cannot address the various parts of this extensive topic. It is considered the LDP adequately covers sustainability principles in line with national planning requirements. This is an ever changing and developing subject and the Council will continue to take appropriate steps accordingly. The findings of the Councils Sustainable Development Committee will play a role in helping develop this matter.</p>	<p>No further action, although the findings of the Sustainable Development Committee will develop a corporate approach to helping develop this matter further</p> <p>No further action, although the findings of the Sustainable Development Committee will develop a corporate approach to developing this matter further</p>
		<p>The Borders needs development but the strategy</p>	<p>The LDP identifies a number of</p>	<p>No action required</p>

		<p>to place the majority of it in Peebles is flawed and will put unacceptable pressure on local resources and infrastructure. I would suggest that the new railway link in Galashiels should be better utilised as that was the reason it was built, and appropriate development should take place there. The environment would of course need to be improved and the town made more attractive to encourage commuters to live there, but this can be done with sensible planning and budgeting. (271)</p> <p>The stated vision in part states that people should afford a home near where they work. This scale of this plan suggests economic development on a scale highly unlikely to be achieved in Borders. SME development in mixed usage developments will not bring the employment opportunities local to home for current population never mind the aspirations of addition 3800 households In the main the current and anticipated economic growth is rooted in tourism including mountain biking, how can building on the open fields, and ruining the scenic vista's in Eshiels, Cardrona and Innerleithen enhance the rural development plan. No mention in this document about the demographics shifts and aging populations needs, the current LDP states need for 50 extra supported housing units, no mention of a projection in this MIR. Environmentally sustainable housing designs should be a given in any new build wherever the location. (276)</p> <p>No I don't agree. The town (Peebles) is already bursting at the seams and everybody knows that. (285)</p>	<p>housing allocations across the Scottish Borders to meet housing need. Finding land in the Peebles area is challenging for a range of reasons and so the Main Issues Report identified a number of options to be considered – it is not that these options are all proposed for the LDP. All infrastructure and environmental issues are addressed as part of the consultation process.</p> <p>The Council has a statutory duty to promote economic development opportunities and identify and allocate the estimated required housing land supply. The process is carried out in consultation with a wide range of bodies and consideration is also given to any perceived impacts on the environment and tourism. The MIR makes clear reference to the changing demographics and the LDP gives support and promotion to care housing. The LDP supports and promotes environmentally sustainable housing designs.</p> <p>Any development in Peebles would be subject to the agreement of relevant consultees re infrastructure.</p>	<p>No action required</p> <p>No action required</p>
--	--	--	--	---

		<p>The MIR states that the LDP2 must incorporate a generous supply of housing land for a range of users (para 3.3). The built and natural heritage of the Borders must be protected and enhanced (para 3.6). We agree with this sentiment. We also agree that new developments should be located and designed in a manner which respects the character, appearance and amenity of the area (para3.6). The proposals as they affect Peebles and the surrounding area including Eshiels and Nether Horsburgh do not achieve this nor could any clever design achieve this. Para 3.7 discusses the need to reduce travel and greenhouse gas emissions, how these reductions can be achieved by locating large development well away from what infrastructure that exists is something of a mystery. (318)</p> <p>Whilst the aims of the LDP2 are to identify suitable sites for housing and economic use within the <u>whole</u> of Scottish Borders are perfectly reasonable, we are concerned at the disproportionate allocation of sites in and around Peebles. (318)</p> <p>With all that has been written in the SESPlan and in various SBC documents, the central Borders requires significant investment and regeneration, hence the development of the Borders railway and its vital connection to Edinburgh. It should therefore be fairly obvious that the majority of housing development should occur close to transport infrastructure. Peebles does not enjoy</p>	<p>Comments noted. The planning process must consider and balance a range of often conflicting duties. There is a market interest in housing within Peebles although finding sites within the town is a major challenge. Consequently the LDP and MIR looked further afield to identify sites to satisfy the required housing land supply needed. No housing land in Eshiels is proposed within the LDP.</p> <p>The LDP identifies a number of housing allocations across the Scottish Borders to meet housing need. Finding land in the Peebles area is challenging for a range of reasons and so the Main Issues Report identified a number of options to be considered – it is not that these options are all proposed for the LDP.</p> <p>The LDP will continue to seek land for development within the corridors of the Borders railway. However, that does not mean that other areas should be ignored and the Council has a duty to consider land allocations for development where there is a developer and market</p>	<p>No action required</p> <p>No action required</p> <p>No action required</p>
--	--	--	--	---

		<p>the level of connectivity that the central Borders has with Edinburgh. It should be very clear to planners that the only link between Peebles and Edinburgh is the A703 to Leadburn and then with a choice of two routes. This road is highly susceptible to adverse weather conditions and it is not uncommon for the town to be cut off in winter. Accidents can occur at any time resulting in road closure without any easy alternative routes available to commuters. To suggest that this route is a suitable main thoroughfare for the increased levels of traffic that such development will generate does not engender confidence in long term planning. We know that, currently, over 60% of the working population of the Peebles area works outwith the town; most of these people rely on cars as their main mode of transport, others rely upon the bus services. Without significant improvement in the roads infrastructure further development would be deleterious. (318)</p>	<p>interest. Peebles clearly is a town where such interest lies. Policy IS4 – Transport Development and Infrastructure makes reference to the Council’s commitment to upgrading a number of transport routes across the region including the A703.</p>	
Vision, Aims and Spatial Strategy: Question 1	Proposed alternative or additional aims	<p>The contributor wishes to see a more long-term thinking in the vision, aims and spatial strategy of the new LDP. The spatial strategy in the MIR identifies three growth areas but there seems to be little emphasis on any requirement to improve links between them. There is no mention of improved connectivity between the central hub and eastern and western links between them. The A72 between Peebles and the central Borders is a weak link in both directions. Further improvements would be welcome. (7)</p> <p>At present the MIR has the following aims: - growing our economy; planning for housing; town centres; rural environment; built and natural heritage; & sustainability and climate change. These are all strong aims to include in any plan,</p>	<p>Comments noted. Policy IS4 – Transport Development and Infrastructure identifies a number of proposed transport infrastructure improvements and links across the region including along the route of the A72. Work on the upgrading of Dirtpot corner at Cardrona has recently been completed.</p> <p>The Aims make reference to “maximise and promote the Scottish Borders tourism potential”. The promotion of tourism is a common theme throughout the LDP and</p>	<p>No action required</p> <p>No action required</p>

		<p>however I would suggest in addition we include: - Improve attraction of the Borders (tourism / accommodation); & enhance transport links. (24)</p> <p>Properties should be built on land that is already up for sale. (27)</p> <p>In para 3.2 should be amended to state “Improvements to the road network and public transport must continue to be supported. <i>in particular to ensure that the existing Borders railway and its future extension can make an increasing contribution to the growth of the economy and can encourage modal shift to reduce reliance on the private car</i>”. (45)</p> <p>The listed buildings of the Scottish Borders are one of its great assets. The existence of a listed building should not result in the sterilisation of any land within sight of it. Buildings erected in sight of a listed building must be designed to relate sympathetically to that building. Specifically, they should not usually be of more than 2 storeys, should be coloured to match the local stone and should usually be of traditional design. (93)</p> <p>The MIR/emerging LDP2 are considered in the context of “Infrastructure, Transport and Sustainability” in paragraphs 2.6-2.15. This summary omits reference to two industries of strategic significance to the Scottish Borders given its location: (i) the emerging offshore renewables industry; and (ii) coastal industry, ports and harbours. These omissions are reflected in the scarce reference to Eyemouth Harbour throughout</p>	<p>policy IS4 – Transport Development and Infrastructure makes reference to the Council’s commitment to upgrading transport routes across the region.</p> <p>Comments noted.</p> <p>Comments noted. The LDP encourages and identifies the economic development benefits of the railway. There also remains a requirement in the LDP to confirm the Council’s commitment to upgrade the road network.</p> <p>Comments noted, although proposals in the vicinity or in sight of a listed building will be dealt with on a case by case basis.</p> <p>Comments noted and it is agreed there are economic development opportunities within Eyemouth in respect of off shore wind farm production. This is referred to within the settlement profile of Eyemouth within volume 2 of the LDP. The Council continues to be very proactive in helping support</p>	<p>No action required</p> <p>No action required</p> <p>No action required</p> <p>No action required</p>
--	--	---	---	---

	<p>the MIR, references being limited to a single mention of the location in the context of the fisheries industry and tourism, which combined are only part of Eyemouth Harbour’s potential from economic development and economic growth perspectives. Reference to Eyemouth Harbour as a location of local and regional significance to a range of industries, potentially including the offshore renewables sector, is similarly absent.</p> <p>i. A new sentence should be inserted within existing paragraph 3.2, under the existing heading “Growing our economy”, as follows: “Further, the LDP2 should facilitate development associated with the growing offshore renewables industry, in particular that which is dependent upon the strategic significance of the Scottish Borders’ ports and harbours, and which contributes positively towards the economic development of such coastal locations.”</p> <p>ii. Amend the “Rural environment” heading to “Rural and coastal environment” and include within paragraph 3.5 the following sentence: “Reflecting the strategic significance of the Scottish Borders coastal towns, the LDP will support appropriate development in coastal locations including at and surrounding Eyemouth Harbour, which promotes economic development opportunities whilst continuing to safeguard the coastal environmental”;</p> <p>iii. At paragraph 3.8, under the “Growing economy” heading, include:</p> <ul style="list-style-type: none"> • “Promote economic development opportunities at ports, harbours and other coastal locations, including those related to the offshore renewables industry.” <p>iv. In the spatial strategy as it relates to the Berwickshire RGA, amend the penultimate</p>	<p>economic development across the Scottish Borders including opportunities within Eyemouth.</p>	
--	---	--	--

		<p>sentence in respect of Eyemouth Harbour to read: “It continues to function as a working fishing port with an important tourism role, with potential for growth and diversification linked to the offshore renewables industry, as well as other complementary industries. Such growth and diversification could benefit from the extant planning permission for a helicopter access facility adjacent to Eyemouth Harbour.” (109, 110)</p> <p>Text amendments are proposed which generally relate to the promotion of economic development opportunities at ports, harbours and other coastal locations, including those related to the offshore renewables industry. Specific reference to Eyemouth is given. (109, 110)</p> <p>Recommend that the expansion and improvement of green network opportunities and links is expanded to state blue/green networks opportunities. Blue/green networks are the integration of water and drainage management interventions to green networks in order to deliver benefits to the environmental status of existing and proposed sites and provide opportunities for place making and associated environmental and social benefits, including improved biodiversity, resilient to extreme weather events and improved health and wellbeing. (119)</p> <p>The LPD2 should build in a specific requirement</p>	<p>Comments noted and it is agreed there are economic development opportunities within Eyemouth in respect of off shore wind farm production. This is referred to within the settlement profile of Eyemouth within volume 2 of the LDP. The Council continues to be very proactive in helping support economic development across the Scottish Borders including opportunities within Eyemouth.</p> <p>Health and wellbeing, the promotion of walk and cycling routes, protection of the environment, continued emphasis on placemaking and design principles continue to be main themes throughout the LDP which are addressed within relevant policies.</p> <p>Policies EP1, EP2 and EP3 of the</p>	<p>No action required</p> <p>No action required</p> <p>No action required</p>
--	--	---	---	---

		<p>regarding preserving wildlife habitats, and preventing habitat pockets from become even more isolated. (146)</p> <p>I believe a key aim should be to have the necessary social and physical infrastructure in place before development starts - utilities, roads, schools and GP capacity. (150, 151)</p> <p>We welcome that you have identified protection and enhancement of the built heritage as a main aim of the emerging Local Development Plan 2. As the plan progresses, we encourage you to consider how the historic environment (designated and non-designated) can contribute positively to other aims such as good placemaking, regeneration, and attractive and sustainable communities. (164)</p> <p>I agree with the LDP in general terms and recognise why the plan is required. However, I have concerns that additional development such as housing will lead to an increase in local populations which will place unsustainable demands on local facilities, services and infrastructure. All too often development takes place which is not matched by necessary increases / improvements in service / infrastructural capacity - roads / footpaths, transport services, medical and other social / community services, car parking etc. Essentially, this additional provision should be in place before development takes place or should, at least, be simultaneous. (166)</p> <p>Broadly support aims. However, the area infrastructure must match the needs of the</p>	<p>LDP seek to ensure protection of a range of protected species and sites.</p> <p>It is confirmed a thorough consultation is carried out to ensure the necessary social and physical infrastructure as fully addressed.</p> <p>It is considered that within parts of the LDP and policy EP7 - Listed Buildings and EP9 - Conservation Areas the important role the built heritage has in contributing to a range of matters including good placemaking, regeneration, and attractive and sustainable communities.</p> <p>Consultations with relevant bodies are carried out for all development site options in order to ensure matters such as infrastructure, public facilities, educational requirements are correctly addressed.</p> <p>All site development options are fully consulted upon with a range of</p>	<p>No action required</p> <p>No action required</p> <p>No action required</p> <p>No action required</p>
--	--	--	--	---

		<p>increased population after development, BEFORE development takes place. The plan must take account of change in age demography. The population is to increase by 1.5% over the next 10 years, but the increase in 75-74 age groups will be 6%, and the over 75 by 31%. How is SBC planning for this. Current and estimated economic growth in the Borders relies heavily on tourism, including mountain biking. Building on open fields will surely ruin the scenic vista in Eshiels, Cardrona and Innerleithen, and will not enhance the rural development plan. (172)</p> <p>We agree with the aims. We would add the caveat that conservation and enhancement of our unique landscape and countryside should feature prominently in the achievement of those aims. (173)</p> <p>Agree on the whole. However, housing design needs to take into consideration new technology such as electrical car charging points, wind and solar. Building new houses beside growing tourist destinations such as Glentress will cause light pollution, and will have a negative impact on the customer experience of the tourist attraction. Any anticipated population growth due to housing must surely have to be planned for with adequate levels of investment in supporting infrastructure & services. (185)</p> <p>While appreciating the vision statement is taken from the SESPLAN it has to be said that it is very generic and could really apply to any rural area in the UK. The third aim under communities appears</p>	<p>bodies to identify and address and infrastructure issues. This is carried out at the outset. Any outstanding issues require to be agreed by the relevant body, e.g. Scottish water, SPA, Roads Planning before a scheme is implemented. LDP policy supports care homes provision although the planning system is not the main body to identify need and ensure adequate provision. Consideration to all proposals must include any perceived impacts on tourism.</p> <p>Comments noted. The Aims included reference to the need to “Protect and enhance the built and natural environment”.</p> <p>The LDP encourages incorporation of modern domestic sustainable technologies. The LDP does not propose any housing allocations in proximity to Glentress. All new housing allocations are subject to consultation and agreement with a number of relevant parties to ensure required infrastructure and servicing is put in place.</p> <p>It is considered the third aim reads correctly. The aims are high level and do not intend to cover in finite detail the very wide spectrum of</p>	<p>No action required</p> <p>No further action</p> <p>No action required</p>
--	--	---	---	--

	<p>to lack a verb? "Encourage" or "plan" might suit. The second point under growing economy refers to promoting economic development along the railway corridor - but surely we should be promoting appropriate development across the three rural growth areas (if not the whole region) - perhaps especially along the railway? While there is an ambition to promote economic development there is no reference to promoting social development eg healthy, dynamic, enterprising communities? We consider the stated aims to be reasonable but we see them as unambitious. For example, there is an urgent need to reduce waste and to increase recycling. The aim of "making provision for waste management" is too passive. Likewise, "improving connectivity" is very passive. The need is to do everything possible to ensure that 100% properties have access to superfast broadband within a reasonable timeframe. 3.7 makes the point that action is needed to address climate change and promote a low carbon economy but there is no aim referring to community-based renewable energy. Should we not be aspiring to seeing more communities producing more of their own energy to help meet Govt, National and International targets? The report implies that the opportunity for more local renewable energy is limited by grid capacity, but this need not be the case if smart grid technologies are adopted. Would it be possible to seek to ensure that all new housing is designed to require minimum heating and to generate as much renewable energy as possible (eg aligned to face south and incorporated solar panels). The same should of course apply to new public buildings such as the tapestry building and the proposed developments at Tweedbank. Adapting the right</p>	<p>subject matters which fall within the planning remit. It is considered the aims stated are satisfactory and how these will be achieved are stated within the Plan within the various relevant planning policies. The Council's Supplementary Guidance on Renewable Energy 2016 confirms support for a wide range of typology types. The Council encourages the incorporation of more energy efficient new housing, much of which is addressed via the Building Standards process.</p>	
--	---	--	--

		<p>design and technologies ought to be reducing the need for heating in new buildings to a minimum. (196)</p> <p>Aims identified are difficult to disagree with. However, the generality of language used is worrying as it allows for broad interpretations not necessarily properly quantified in the rest of the document. Are the aims hierarchical? ie 'Growing our Economy' preeminent? ' I would add:</p> <ol style="list-style-type: none"> 1. Integrity of approach - planning committee really looks at impact on their suggested areas for industrial and housing development in reality rather than as a box ticking exercise having 'talked to' eg transport, education. health who have no real idea of what is happening on the ground but rely on sets of statistics 2. Ensuring equality of impact of aims of LDP2 across the borders ie not being in the thrall of developers and going with what is best for them but unfair in particular areas either because they are ignoring any building or development for economic growth in some areas which would welcome and benefit whilst swamping other areas eg large number housing planning in a small number of places rather than an equitable divide 3. Effective joined up thinking ie working with a range of partners is not a stated aim although the inference is there and examples are mentioned throughout the document. What about , in addition, eg talking to Forestry Commission, Mountain Bike Centre etc looking at current planning eg 5 years against forward planning eg for 10 or 20 years eg railway corridor. (197) <p>There needs to be a more holistic approach which</p>	<p>It is considered consultations carried out are done so in a satisfactory and correct manner allowing consultees to formally object or raise issue if they have reasons to believe a proposal could not be supported. The LDP does strike the challenging balance between satisfying housing land requirements, identifying sites and giving consideration and protection to the environment.</p> <p>Consultations with relevant bodies</p>	<p>No action required</p> <p>No action required</p>
--	--	---	---	---

		<p>considers the bigger picture - particularly with regard to the infrastructure within the area - which frankly is currently underfunded and already wholly inadequate for the current population without the further development planned under the LDP2. I am also very concerned that the Borders countryside, which is revered as an area of natural beauty, could be ruined by some of the proposals outlined within this plan. There are a number of examples of rural areas which will be blighted by proposed mass development, thus threatening the visitor footfall in the future. (201)</p> <p>We generally agree with the main aims of LDP2. We suggest a couple of minor changes to help these align with detail presented in the MIR and its SEA:</p> <ul style="list-style-type: none"> • Change the Communities aim of “Encourage better connectivity by transport and improve digital networks” to “Encourage better connectivity by sustainable transport and improve digital networks”. We suggest this change as ‘transport’ could imply private and motorised vehicles only and therefore may not fully reflect the transport hierarchy. The MIR is clear that solutions including improved public transport and active travel will be sought and we consider that this amendment helps to highlight this. • The Sustainability aim to “Encourage better connectivity” could be expanded on. We are unclear on what this encompasses. • We recommend that the Sustainability aim of “Extend and improve green network opportunities and links” is amended to “Maintain, extend and improve green network opportunities and links”. The addition of maintain would more clearly highlight that there is a positive existing resource 	<p>ensure infrastructure issues are identified and addressed. There is a need to identify land for development to meet demand. It is not possible to achieve this without some impacts. Many potential sites have a number of constraints some of which cannot be overcome. Regardless of which sites are chosen it is most likely there will be neighbouring objections to them.</p> <p>Comments noted although it is considered the text referred to within the Aims is appropriate.</p>	<p>No action required</p>
--	--	--	--	---------------------------

		<p>in the Scottish Borders. (213)</p> <p>As far as the Built and Natural Heritage aim is concerned we would suggest that the way this is worded is not so much an aim, more a continuation of business as usual. In public service language an aim must seek to take us from where we are now to some better place, or a better position. To be part of a development plan this particular aim should therefore seek to develop and advance the protection and enhancement of our rich built and natural heritage. There are clearly several ways to do this but we would argue that the best way, the cheapest way for the Scottish Borders, the one which has most evidence to back up that claim, and the one with considerable popular support, is to have a significant part of the Scottish Borders designated as a National Park. (218)</p> <p>There is no mention in the vision about services and infrastructure in towns. In particular there is no vision about how health and social care services will be maintained never mind improved. (220)</p> <p>Agree with the main aims of the LDP2. There are a few areas which I would like to see more emphasis, focus, action and investment as detailed below:</p> <ul style="list-style-type: none"> * Education and schools: this is so important for our children's future and so many local schools seem to be struggling with underinvestment and overcrowding * Transport - major investment needs to be made 	<p>It is considered the aim with regards to the built and natural heritage is worded in a fair and sensible manner which is implemented well in practice. The Council will consider further the matter of a National Park within the Scottish Borders.</p> <p>The aims of the LDP seek to implement the vision and the aims make reference to required services and infrastructure to be carried out. How health and social care services are maintained is outwith the scope of the LDP</p> <p>Education Dept are consulted upon new development options in order that they can comment and take appropriate action if necessary if a school is reaching capacity. The Council continues to identify and implement schemes to upgrade its roads and the LDP continues to support the extension of the railway</p>	<p>No action required at this stage, although the Council will consider further the matter of a National Park within the Scottish Borders</p> <p>No action required</p> <p>No action required</p>
--	--	--	--	---

		<p>into our dilapidated road network and I would like to see ambitious plans to extend the Borders railway network throughout the region * Local jobs for young people - let's find a way to encourage larger employers to set up in the borders supported by better transport links, schools and infrastructure. (221)</p> <p>I believe that more needs to be done to regenerate a new sustainable industrial base in Peebles to ensure future prosperity for its residents without the need for them to travel to find work. I also firmly believe that more needs to be done to develop a sustainable travel corridor between Peebles and Edinburgh to assist commuters. It would only take 17 miles of railway to achieve this which is much less than was invested in the Borders Railway for far fewer daily commuters. It is estimated that around 6000 journeys are made each day by commuters to Edinburgh from Peebles and so a train service, preferable electrified using wind generated energy is the way to go. (222)</p> <p>Broadly support, but there seems to be little ambition in terms of developing the conservation of Borders landscapes in order to capitalise on initiatives based on the commercial value of this great asset. (234)</p> <p>At first sight the main aims may seem reasonable to think of strategic growth. However there are some apparent and pressing issues within the Peebles area. Any expansion of this local area will need more considered infrastructure - there seems to be an assumption that this is part of the</p>	<p>line from Tweedbank to Carlisle. The LDP can only do so much to encourage firms to set up within the Scottish Borders. It is hoped external funding from the likes of the new SOSEP can help set up serviced business land and buildings for firms to set up.</p> <p>The Council is well aware of the need to find business land in Peebles. However, due to a range of constraints this is extremely challenging and therefore the area of search has extended outwith the town. At present there are no plans to build a new railway line linking Edinburgh and Peebles.</p> <p>Comments noted.</p> <p>There is a statutory requirement to find housing land and consideration has to be given to where it is most effective and with market interest. Peebles is such an area and all proposed sites have been subject to</p>	<p>No current action required although future transport links will continue to be monitored</p> <p>No action required</p> <p>No action required</p>
--	--	--	--	---

		<p>Edinburgh plan but commuting to Edinburgh from Peebles is becoming increasingly complicated with the demands on road usage and volume of traffic. There is very little in the way of a direct train route that can mitigate against this. The main road to Edinburgh takes people to the Leadburn junction- fraught with accidents without any further increase in traffic which would come from more development in Peebles. I would ask the planners to consider the existing infrastructure requirements and explain how this could support an expansion of housing. Although I can see that Peebles could be attractive- lucrative even for housing developers, I would ask has money been a prime driver here in thinking of expanding developments rather than the community need? Has the community need for more housing been researched and thought through? There seems to be little in the way of a concrete data analysis. There are limited brown field development sites in Peebles - again this means expansion beyond the existing town centre with little. (243)</p> <p>It is important that local people directly benefit from efforts to improve sustainability. I note that recycling does not seem to be considered here. I agree that we need to reduce fuel poverty and support local householders. I am less convinced that there is a need for super sized wind turbines- we need to remember that there is a natural beauty in the Scottish Borders and tourists as well as local people enjoy this environment. The only reason that size have been mentioned is because of reduced profit margins to the businesses involved with them and their profit margins given reductions in subsidies. It would seem to me that there is little benefit in this for local communities.</p>	<p>extensive consultation and scrutiny by a range of bodies including ensuring infrastructure issues are addressed and will be satisfactory if and when development commences. There are currently no plans to form a railway link between Peebles and Edinburgh. The development of brownfield sites continue to be promoted in the LDP, although in many cases potential development costs, site clearance, contamination issues impact on delivery. Policy IS4 confirms the Council's commitment to upgrading the A72 and A703.</p> <p>Policy IS10 Waste Management Facilities confirms support and reference for the Zero Waste Plan which includes recycling targets. The Council has a duty to support renewable energy proposals including wind turbines where appropriate, although clearly consideration must continue to be given to any potential impacts on the landscape and environment.</p>	<p>No further action</p>
--	--	--	--	--------------------------

		<p>(243)</p> <p>Broadband requires to be upgraded in the Newcastleton area. (245)</p> <p>Agree with the aims but not the methods. (246)</p> <p>Build infrastructure before or at the same time as houses. (247)</p> <p>Agree but no more housing is needed in Peebles. (248)</p> <p>I understand that the possible is not always what ends up happening but I feel that the infrastructure in Peebles needs addressed before any more houses are built. The local Doctors surgery cannot cope with the amount of people in Peebles at the moment. Lack of Dental facilities (non-private). The schools – especially the High School - need upgraded/enlarged. The road system is failing. We need a new bridge. What we don't need are more private housing. We need social housing for the young (and not so young) people in Peebles so that they can continue to stay here. (250)</p>	<p>Comments noted.</p> <p>Comments noted.</p> <p>Agree. This practice will continue.</p> <p>There remains market interest in Peebles which the Council cannot ignore in preparing its LDP.</p> <p>The consultation on all potential development sites involves input from a range of bodies including Education, NHS, Scottish Water, SEPA and Roads Planning. The LDP supports provision of affordable housing.</p>	<p>The Council will continue to promote improved broadband across the region</p> <p>No action required</p> <p>The Council will continue to liaise with relevant parties to ensure adequate infrastructure provision for new developments</p> <p>No action required</p> <p>No action required</p>
--	--	--	--	--

	<p>No, I think the council should aim to reduce house building in order to protect the quality of life and character of our fantastic border towns. (251)</p>	<p>Comments noted, although the Council cannot ignore the fact it has a statutory duty to provide a generous supply of housing.</p>	<p>No action required</p>
	<p>Para 3.10 of the MIR highlights the main population areas and states that these are the primary areas for growth. These must be the focus of activity and provide the revenue source for ongoing development as opposed to development in Peebles, where any development would contradict the Authorities aim of a sustainable, environmentally protective plan by forcing the increased number of residents to use cars to drive to Edinburgh for employment. Development in Galashiels and Tweedbank would be supporting the Borders Railway and satisfy environmental and economic development in those areas. (252)</p>	<p>The LDP continues to support development in the Galashiels / Tweedbank corridor. However, it should not ignore other parts of the Scottish Borders particularly Peebles which is a recognised growth area, there is a market interest and housing development brings many economic benefits to the town.</p>	<p>No action required</p>
	<p>Renewable energy is an area that must be extended. Selkirk lost out to myopic planning and inadequate understanding of the need and was denied a huge community benefit from turbines on Common Good land. Selkirk community stood to gain £100 million + over a 25 year period. That opportunity has now passed. A little more realism is needed. (258)</p>	<p>Comments noted. The Council continues to liaise with the respondents working group to explore renewable energy opportunities on Common Good land.</p>	<p>No action required</p>
	<p>The failure to provide a bypass for Selkirk and the future damage to health of youngsters forced to inhale diesel exhaust on the way to school is wholly reprehensible. (258)</p>	<p>The Selkirk bypass is outwith the remit of the Council.</p>	<p>No action required</p>
	<p>In its turn, identification of the bypass route - already preserved for 80+ years - would free up land for housing/commerce and stimulate development in the town. (258)</p>	<p>Comments noted.</p>	<p>No action required</p>

		<p>If the council had had more foresight in 2006 when a wind farm was first proposed, many of today's problems would have been averted. The aims are fine. They simply do not sufficiently emphasise a route to success. (258)</p> <p>The vision focuses on economy and tourism as well as housing and development. There appears to be little analysis on what the current gaps are in the rural areas in terms of housing. My own opinions are that rural housing is already unaffordable for those living and growing up in these areas, more needs to be done to stop second homes and holiday homes pricing people out of the market. Similarly there is no focus on encouraging new entrants into farming, no farmers no farm diversification? Farm diversification itself is an issue as it seems to be as soon as you diversify you are penalised by tax or reduction in farm payments but your business would have to pay a lot to subsidise your farm and make a living! There is nothing in the report about responsible behaviour in the countryside and this is a failing of the report given that this is a significant issue in the other two Scottish national parks, and is already a problem in some places in the borders. (260)</p> <p>Support, but it must support a range of enterprises especially locally owned SME businesses. (272)</p> <p>Whilst it is difficult to disagree with these broad based aims without more detailed explanation what does it mean? For example reference to</p>	<p>Do not quite understand the comments. In terms of wind farms the respondent must be aware of the need to balance the support for renewable energy against the protection of the landscape and environment around Selkirk.</p> <p>LDP policies re Housing in the Countryside and Business, Tourism and Leisure Development in the Countryside confirm the Council's support to these matters where appropriate. In terms of farm diversification the latter policy appreciates potential Brexit issues for rural land owners and gives added weight to the economic development aspects of such proposals. Responsible behaviour in the countryside is outwith the remit of the LDP.</p> <p>Comments noted.</p> <p>Sustainability covers a wide range of matters and it is considered the LDP gives wide reference and</p>	<p>No action required</p> <p>No action required</p> <p>No action required</p> <p>No action required</p>
--	--	--	--	---

		<p>building sustainable communities should in my view include a concept of what sustainable means - this isn't just environmental sustainability so it is left dependent on definitions which are absent. (277)</p> <p>Support, however, with regards to Growing the Economy - promoting economic development opportunities along the railway corridor subject to - (a) this not being to the detriment of other parts of the SBC area (b) consideration is given to development of the Railway from St Boswells to Berwick upon Tweed (c) request that the former route is safeguarded for future development. (288)</p> <p>Mainly agree, but the area falls sort of many beautiful areas. (297)</p> <p>In theory I agree with the aims of the MIR but I completely disagree with the proposals put forward that focuses most of the potential mixed housing & employment sites/pure housing sites in the Tweeddale area. Given that there is regular reference to the success of the Borders Railway, desire to extend this south to Carlisle, and the mention of the Reston station, why does the MIR ignore these projects when to site additional housing along these transit routes would only make these projects more viable? (298)</p> <p>The aims of LDP2 are in the main fine but the Growing Economy aims should cover the whole of the Borders and not be confined to the railway corridor, indeed there is an argument that extra</p>	<p>support to these matters.</p> <p>Comments noted. The Borders Transport Corridors Study identifies a number of options. One of the aspirations was promotion of railway link from St Boswells to Berwickshire. LDP acknowledges this in para 2.13 of vol 1 although clearly further work is required to develop this. All former railway routes are safeguarded under policy EP12</p> <p>Comments noted.</p> <p>The LDP proposes development across the Scottish Borders and recognises the opportunities and benefits within the locations referred to. Peebles is a town with a proven market interest and the Council cannot disregard this in its efforts to identify effective development sites.</p> <p>The LDP identifies sites for development across the whole of the Scottish Borders and supports broadband</p>	<p>No action required at this point in time</p> <p>No action required</p> <p>No action required</p> <p>No action required</p>
--	--	--	--	---

		<p>resource should be available for areas outwith the railway corridor. The 5% not covered by superfast broadband rollout by the end of 2018 will undoubtedly be outside the railway corridor and it will therefore continue to be at a Disadvantage. (315)</p> <p>Two very important Aims that have not been included in the MIR. These are: 1: "Ensure that adequate service provision to support new development is in place prior to increasing demand for services by the building of new houses or business units." I see that as a fundamental of good planning. Failure to do so equates to an absence of planning. 2: "New housing provision must take account of the predicted change in the age demographic of the Scottish Borders (Table 2 in the MIR), by promoting land for a specialist development for the most senior age groups. This should be purpose built, in an attractive location, close to the railway and hospital." I believe that SBC are missing opportunities presented by the ageing population. I really believe that if SBC were to identify a suitable, attractive site for such a high quality development it could lead the way within Scotland for a revolution in how coping with an aging population is viewed and tackled. (90)</p> <p>The Scottish Government has also announced, as part of A Plan for Scotland: The Scottish Government's Programme For Scotland 2016-17, that it will bring forward a new Climate Change Bill, including an ambitious new 2020 target of reducing actual Scottish emissions by more than 50%. The proposed LDP2 and any supporting</p>	<p>The LDP makes regular references to the need for service provision/ infrastructure and a further aim was added which has been added making reference to infrastructure provision. Policies within the LDP, notably policy HD5 – Care and Nursing Homes is supportive of care housing and lays down criteria tests for determining such applications, emphasising the amenity / facility / locational needs of residents. The delivery, financing etc of, for example, care / nursing homes facilities largely outwith the scope of the planning system.</p> <p>The Council has set up a Sustainable Development Committee to ensure corporate approach to achieving Scottish Govt climate change targets. A Supplementary Planning Guidance on Sustainability and Climate</p>	<p>A further aim has been added requiring reference to the provision of adequate infrastructure</p> <p>A Supplementary Planning Guidance on Sustainability and Climate Change is proposed to be produced in due</p>
--	--	---	--	---

		<p>supplementary guidance should also make reference to this, and seek to promote and support the measures outlined to achieve Scottish Government's targets. There will clearly be a need to also support new renewable developments, including new onshore windfarm sites, if these targets are to be realised. (99)</p>	<p>Change is proposed be produced in due course to help identify and address how the planning process can help achieve the delivery of the targets. The LDP makes reference to this, including in Appendix 3.</p>	<p>course to help identify and address how the planning process can help achieve the delivery of the targets. The LDP makes reference to this</p>
Vision, Aims and Spatial Strategy: Question 1	General comments	<p>It is not necessary to suppress travel demand particularly when efforts are being made to grow the economy. The aim is to reduce travel "by car". The benefits of the Borders Railway should be exploited. (45)</p> <p>The economic development opportunities afforded by the Borders Railway should be reflected by the housing, economic development, sustainability and regeneration LDP policies. (45)</p> <p>Section 3.1 talks about the SES Proposed Strategic Development Plan and states that "This vision will guide the development of the policies and proposals in the Local Development Plan." It is therefore important and the following comments in italics are questions on specific parts of this section to which answers are requested. <i>"Sustainable growth has been achieved please provide details of the sustainable growth which has been achieved in the Borders; for example, through LDP1 by carefully managing those assets that provide the most benefits which assets are these in the Borders? When and where will they be specified for LDP2? and by making well designed, successful places where people can thrive. More people are able to afford a home in a</i></p>	<p>Comments noted. The LDP promotes public transport and the opportunities the Borders railway provides.</p> <p>The LDP promotes the opportunities the Borders railway provides including through a range of planning policies.</p> <p>Sustainable growth covers a multitude of subjects and there are no hard statistics available which it is believed the respondent is seeking which break down various benefits from e.g housing devs, business land implementation, Borders rail etc. The planning system has no control over where individuals decide to live and work, but by allocating and creating attractive and ready available business buildings and sites in the Scottish Borders is more likely to attract purchasers to live and work in a particular areas without the</p>	<p>No action required</p> <p>No action required</p>

		<p>place near where they work. <i>Does this mean that potential commuters from say Peebles to Edinburgh will be discouraged from moving to Peebles and encouraged to remain in Edinburgh?</i> A series of cross boundary transport projects have made travel by public transport easier and more people are cycling and walking to work. <i>For those living and working in the main Border towns, what plans are there to provide more public transport and cycling routes? For people living in Peebles (particularly commuters travelling to Edinburgh), what are the cross boundary transport projects which “have made travel by public transport easier”?</i> The economy continues to grow and the region remains an outstanding place to live, work and visit. Communities in the region are healthier and there is less inequality and deprivation”. (73)</p> <p>Under ‘Growing Economy’ the encouragement of high value-added employment is critical. I believe that not a single stock exchange listed company has its headquarters in our region. Why is this and what can be done about it. (96)</p> <p>SBC need to ensure adequate infrastructure (roads, health centres and GPs, primary and secondary school places, electric car charge points) are provided for before future development takes place. Greater emphasis needed on getting people out of their cars by providing adequate public transport, and cycle lanes independent of roads; A more proactive approach to house design e.g. insisting solar panels are placed on roofs of south facing new builds as a requirement. Such panels are NOT just 'eco-bling' but are an essential part of our sustainable lifestyle in the Borders and elsewhere; The opportunity to</p>	<p>need for longer distance travel. The LDP has no remit in ensuring the upgrading of public transport although it continues to identify and promote the role public transport has in sustainable travel. The Council continues to promote and implement new cycle routes such as Peebles – eastwards. New cycling and walkways are considered as part of new build planning applications.</p> <p>The LDP cannot resolve and control all private business aspirations. Many larger companies seek to be based where population densities and customers are closer at hand.</p> <p>In considering potential sites for development extensive consultations are carried out including the seeking of comments from Scottish Water, NHS, SEPA, Education and Roads Planning. The LDP promotes the use of sustainable building design and materials. The planning process must address a series of often conflicting roles e.g. identifying development sites / supporting rural economy / protecting the</p>	<p>No action required</p> <p>No action required</p>
--	--	--	--	---

		<p>maximise and promote tourism will be destroyed by insensitive urbanisation and ribbon development such as the proposed multi-use development in rural areas like Eshiels. (155)</p> <p>Broadly agree, but there seems to be little ambition to pro-actively develop Conservation of the Borders' landscapes and to promote initiatives based on the value of those assets. (160)</p> <p>Agree in general, but we have grave concerns over the proposed preferred development site in Innerleithen adjacent to the health centre (162)</p> <p>We agree that the Local Development Plan 2 should incorporate a generous supply of housing land for a range of users. We note the Council's reference to the "limited take up of allocated housing sites" and we would propose that there are other sites which would be more effective for delivery within the Scottish Borders, including our</p>	<p>environment and tourism. Appendix 3 of the LDP confirms the requirement for electric vehicle charging points for new developments. It is intended that the Council will produce Supplementary Planning Guidance through the period of the LDP to establish requirements for sustainable transport. The SPG is likely to cover a range of subjects taking on board the findings of the Council's 'Sustainable Development Committee'.</p> <p>The LDP has clear policies in place e.g the Environmental Protection and Promotion policies, but also lays down criteria tests for promoting development in the countryside, e.g HD2, ED7</p> <p>Concerns noted. However, it is considered the site in question is appropriate for development within the LDP.</p> <p>Comments noted. The Council welcomes the submission for any sites for consideration in the Plan. It is believed the site the respondent is referring to has previously been considered and excluded for</p>	<p>No action required</p> <p>The site in Innerleithen referred to is included in the LDP for mixed use development</p> <p>No action required</p>
--	--	--	--	--

		<p>client's site at Dingleton Mains, Melrose. This site is effective and can be delivered within the short term. (177)</p> <p>Rural environment – as stated in the MIR, Brexit can bring major challenges, but at the same time it provides an opportunity for integrated land management, and diversification should be encouraged as an opportunity. We would like to see the Council here taking the opportunity to encourage rural economy diversification beyond economic and social development, and also integrate environmental enhancement and protection into a diversification system. For example, integrating trees and woods into farming systems, as a way of diversification, can provide a range of benefits such as helping to absorb water and air pollution, prevent soil erosion and flooding, boost soil sustainability through support of microorganisms and addition of nutrients. They help with shelter for livestock, crop pollination, integrated pest management and product diversification. Therefore, WTS believes that trees should be part of a sustainable land management system and would like to see the LDP seeking to encourage tree planting in the rural environment. Built and natural heritage – we do not agree that 'landscape and biodiversity designations and opportunities must continue to be explored to capitalise on these assets in the interest of tourism and economic development.' Capitalising on natural assets goes beyond economic and social development; there is also an environmental aspect to this. Part of investing in natural capital should also be seen as enhancing and protecting the environment. The wording as written at the moment for this aim suggests that</p>	<p>inclusion.</p> <p>Policy ED7 supports rural business and diversification and gives added weight to the consideration of economic benefit matters. The Land Use Strategy promotes a wide range of rural actions and safeguards and is referred to within the LDP. The Council promotes a wide range of new woodland planting via the Scottish Borders Woodland Strategy and Woodland Creation Advice Note. As part of the Woodland Strategy the Council is currently taking part in a Regional Woodland Creation Pilot Scheme as referred in the introductory text to policy EP13. The aim of the project is to develop a new approach to forestry that seeks better integration of new woodland with farming and other land uses to maximise the benefits.</p>	<p>No action required</p>
--	--	---	---	---------------------------

		<p>the environmental aspect is not part of natural capital investment. Capitalising on these assets by protecting and enhancing them will benefit the natural environment, which in turn will benefit society through the “environmental services” that these ecosystems provide, such as flood prevention, healthy soils, carbon sinks and future sequestration, water and air quality, and renewable and sustainable resources. (199)</p> <p>We agree with the position of Scottish Borders Council (SBC) that LDP 2 must incorporate a generous supply of housing land for a range of users (MIR,3.3). We would encourage SBC to allocate within LDP 2 sites that are effective or with a high probability of becoming effective in the short to medium term. Sites granted permission in principle, such as AGREE009, should be prioritised for inclusion in LDP 2 to the exclusion of other sites that have been acknowledged as having no development interest. We also concur with the aim of SBC to promote development of brownfield sites. This aim aligns with Scottish Planning Policy, which stipulates that planning should direct the right development to the right place. Integral to this concept is the re-use and re-development of brownfield land before development takes place on greenfield sites. (219)</p> <p>At page 20, the MIR sets out that LDP2 must incorporate a generous supply of housing land, but it acknowledges that there has been a limited annual completion rate for mainstream housing and limited take up of allocated housing sites. This illustrates some of the endemic housing market failure issues with in the Scottish Borders and further underlines why sites such as Tweedbank,</p>	<p>Site ref AGREE009 has been allocated for housing development in the LDP. The LDP continues to support the development of brownfield sites.</p> <p>The site in Tweedbank referred to (assumed Lowood ref MTWEE002) is allocated in the LDP via the SG on Housing and has been signed off by Scottish Ministers. The site has a number of advantages over other sites considered for the LDP. For example, it is within a central</p>	<p>No action required. AGREE009 is included within the LDP</p> <p>No action required</p>
--	--	---	--	--

		<p>which clearly will have high abnormal costs to enable development, are likely to remain undeveloped and will not drive the sales values to deliver commercially viable development, high quality public realm and necessary environmental mitigation. (222)</p> <p>Support the aims, but it is another level of bureaucracy and cost for limited, if any, benefit. (241)</p> <p>In principle, yes. "LDP2 must continue to ensure new development is located and designed in a manner which respects the character, appearance and amenity of the area and that good placemaking and design principles continue to be implemented." The "Alternative Option: Eckford" which proposes 10 houses on site AECKF002 is very unlikely to fit this aim for various reasons. (244)</p> <p>Yes I agree with the main aims of the MIR: Growing our economy, planning for housing, dealing with changes to our town centres, improving communication within our rural communities, preserving our built and natural</p>	<p>location in a well established housing market area, the high quality surrounding landscape offers excellent development opportunity, it is located next to the Tweedbank railway terminal and is in keeping with the railway blueprint to promote economic development opportunities along the railway corridors. Extensive consultations in the preparation of an SPG to develop the site has identified mitigation measures to address all potential constraints. It is considered the site will be extremely attractive for a range of developers and house purchasers.</p> <p>Comments noted.</p> <p>Comments noted. The site at Eckford identified in the MIR has not been carried forward into the LDP.</p> <p>Comments noted.</p>	<p>No action required</p> <p>No action required</p> <p>No action required</p>
--	--	--	---	---

		<p>heritage, promoting sustainability and climate change. They are all very worthy aspirations with which no-one could disagree - it's how these aims are achieved that I take issue with. (261)</p> <p>The gap sites should be built on before any large development are considered. (275)</p> <p>The presentational approach of LDP2 within the MIR is much improved over the previous LDP although that in itself makes comparison difficult. I note particular reference to the following: 2.21 "The SESPlan confirms the success of the Borders Railway has provided an impetus to drive new development, regeneration, tourism and business opportunities into the heartlands of the Scottish Borders." 2.21 "the dualling of the A1 and local improvements to the A68 and A7 are being promoted to improve journey times" The MIR and Planning for housing specifically do not appear to target using the benefits of these major investments and improvements . 3.3 "It is not anticipated the LDP2 will require a significant number of new housing sites" Whilst a 'significant number ' is not defined the proposals include the use of Longer Term sites. Why should Longer Term sites be included given that a 'significant number ' is not anticipated. I also note in particular items referring to "the vicinity of Peebles": (277)</p> <p>Broadly agree. The forecast population 2017 to 2026 shows little change in total and therefore minimal requirement for house building, however there is a significant forecast shift in the age profile particularly in the over 75 age range and</p>	<p>The LDP allows infill development where appropriate.</p> <p>Comments noted. It is considered the LDP does identify opportunities and allocations on the back of the matters mentioned. Longer term sites are identified to give an indication how settlements may develop in the future. These are not formal allocations but can be brought forward should it be confirmed that there is a housing shortfall within the LDP period.</p> <p>Comments noted. The LDP gives protection to a wide range of green spaces and the Council promotes a wide range of new woodland planting via the Scottish Borders</p>	<p>No action required</p> <p>No action required</p> <p>No action required</p>
--	--	--	---	---

		<p>therefore feel that the plan should specifically address this shift. This could be through the development of independent living complexes where residents have individual accommodation but share some form of common facilities, laundry, entertainment and catering along with 24 hrs staffing support but are able to live independently if appropriate. Also feel that the protection of green spaces should be given a higher priority and would take this further with a commitment to increased planting particularly of native woodland. In respect of town centres there is recognition that shopping habits are changing as a result of the internet but this is a crucial period and the LDP needs to have some specific coverage of options and plans. I feel that this should include the potential development of residential accommodation close to existing town centres to create a population that can use the shops and associated establishments. This could also be supported by the shift away from out of town retail expansion and the LDP should seek to limit this to existing sites rather than develop new. (289)</p> <p>I agree with the aims of LDP2 in that the Scottish Borders must adapt to changes in the financial environment and needs to identify and focus on what the area has to offer and how these aims are best allocated with the whole borders area. I agree that there is an ongoing need for new and replacement housing but towns like Peebles do not have the infrastructure for any further development. The areas, in my opinion, that need financial and economic support are large towns like Galashiels and Hawick and smaller communities like Innerleithen and Walkerburn who have limited job prospects and need economic</p>	<p>Woodland Strategy and Woodland Creation Advice Note. As part of the Woodland Strategy the Council is currently taking part in a Regional Woodland Creation Pilot Scheme as referred in the introductory text to policy EP13. The aim of the project is to develop a new approach to forestry that seeks better integration of new woodland with farming and other land uses to maximise the benefits. The LDP allows a much greater range of uses within its town centres (see policies ED3 and ED4) and requires a sequential test to be carried out when considering out of town centre developments and the impacts they may have on town centres.</p> <p>The Council has considered a wide range of site options across the region and has carried out extensive consultations with a range of bodies to identify any potential issues to be addressed and mitigated against where required and possible. Consultations have included Scottish Water, SEPA, Education, Roads Planning and NHS. Peebles is a town with a well established housing market interest and demand and the Council cannot</p>	<p>No action required</p>
--	--	---	---	---------------------------

		<p>and social regeneration following the closure of Mills and other heavy industry. (292)</p> <p>As far as the Built and Natural Heritage aim is concerned I would suggest that this is not so much an aim, more a continuation of business as usual. An aim, in anyone's language, must seek to take us from where we are now to some better place, or a better position. To be part of a development plan this aim should therefore seek to develop, ie advance, the protection and enhancement of our rich built and natural heritage. There is one certain way in which to do this which has not yet been tried for the Scottish Borders. Designation of part of the local authority area as a National Park would achieve this and provide much-needed sustainable economic development on a scale beyond the reach of any of the other initiatives on the table at present (with the exception of the extension of the Borders railway to Carlisle which instead would complement a Borders National Park, as well as vice versa), very worthwhile as those other initiatives are. While National Park designation is not in the gift of the Council, it is something which the Council can promote and support, at no additional cost to its own budget. On Sustainability and Climate Change, I would point out that Scottish Borders Council has a duty to reflect UK Government</p>	<p>ignore this. Sites must be identified where there is such interest. If sites were allocated where there was no or limited interest then the development industry would understandably state such sites were not effective and the Council's claimed land supply was flawed. Substantial land is allocated in Galashiels, Hawick and Innerleithen.</p> <p>Policies within the Environmental Promotion and Protection section confirm the protection of the built and natural heritage. However, the planning system often has duties to address and promote conflicting issues and the national requirement to support wind farms must be weighed up against any adverse impact on the landscape and the environment. The Council consequently supports and rejects such proposals as they feel is appropriate. The matter of the support or otherwise of a national park within the Scottish Borders will be debated by the Council in due course. The Council supports a wide range of renewable energy types in appropriate locations.</p>	No action required
--	--	--	---	--------------------

		<p>policy in its development plan, where it refers to reserved matters. Energy is a matter reserved to the UK Government. In the House of Commons recently our MP John Lamont noted concerns over the number of large wind farms in the Scottish Borders, before seeking an assurance that ‘industrial’ onshore wind would not be promoted by the UK Government over other forms of renewable energy which have less impact on local communities. During Questions to the Secretary of State for Business, Energy and Industrial Strategy, Mr Lamont said: “I very much support renewable energy but many of my constituents in the Scottish Borders feel we have our fair share of onshore wind.” “So can the Minister assure me that nothing in Government policy will promote onshore wind farm development over other forms of renewable energy?” In response, Minister for Clean Energy, Claire Perry MP responded: “That is exactly the point of technology neutrality,” referring to the UK Government policy that as many forms of renewable energy as possible should be allowed to bid for Government support to avoid supporting one type of energy over another. It is suggested that the Sustainability and Climate Change aim should make reference to the UK Government’s policy of technology neutrality, in terms which show that SBC is not favouring one type of energy over another. (152)</p> <p>We are broadly supportive of the aims as described in the LDP2 MIR. We would suggest that the section on “Rural Environment” could be better phrased “Rural Development” especially given that in this context it is about digital connectivity and business diversification to</p>	<p>It is considered the reference to Rural Environment is an appropriate phrase. The LDP supports development across the Region not just the railway corridor and policy ED7 for example gives support to</p>	<p>No action required</p>
--	--	--	---	---------------------------

		<p>support the rural economy. SLE would also like to see the second bullet point under 3.8 “Growing Economy” refer to being flexible enough to promote appropriate economic development opportunities outwith the railway corridor as well. For example, agriculture, forestry or tourism businesses may be far removed from the railway but should not be restricted from growth because of the overarching strategy will only promote development opportunities within that corridor. (195)</p> <p>I agree with the main aim of the LDP2, though I believe a stronger focus should be given to high speed connectivity as this is the way of the future. No connectivity = no growth. (295)</p> <p>Galashiels and Melrose get priority over other areas and the Borders should be thought of as a whole. (297)</p> <p>The Selkirk CC acknowledges the adopted Strategic Plan in which Edinburgh provides the central focus for the overarching plan area. However, the CC has previously submitted its concerns regarding this document and regrets that the Scottish Borders (and parts of Fife) are seemingly disadvantaged as a result of this ‘strategy’. With regard to this Consultation for the MIR, the Community Council notes and agrees that this report should endeavour to identify and meet the economic, environmental and changing demographic challenges which currently face the Scottish Borders. In this context therefore, the Community Council seeks reassurance that the</p>	<p>rural business developments and tourism.</p> <p>Comments noted, although the Aims do make clear reference to encouraging better connectivity by transport and improve digital connectivity.</p> <p>It is considered the LDP identifies a range of opportunities and allocations across the Scottish Borders.</p> <p>The LDP continues to identify and support the Selkirk by pass although the final decision on its delivery is ouwith the Council’s control. The LDP also continues to support and promote the railway line extension south to Carlisle. Funding is clearly an issue re CPO of brownfield / derelict sites. Policy IS4 confirms the Council’s commitment to improvements to the A72. Further work requires to be done in relation to dark skies in terms of where and when it will be designated and what</p>	<p>No action required</p> <p>No action required</p> <p>No action required</p>
--	--	---	--	---

		<p>policy outlined in the proposed document will endorse the need for</p> <ul style="list-style-type: none"> • a future Selkirk By-pass to improve connectivity and that • inclusion of a potential rail extension south could provide both regional and national benefits. <p>These elements of a future central spatial strategy now need to be established as strategic policies with their alignments investigated and confirmed. This will then facilitate suitable planning policies to help achieve the longer term aims of the wider Development Plan and the next Local Development Plan (LDP2). It is suggested that other objectives contained in the future Plan should include</p> <ul style="list-style-type: none"> • A way to resolve the continuing difficulties related to derelict/ brown field sites which lie in private ownership – it is suggested that Compulsory Purchase Powers should be used ideally via Government assistance in negotiated low interest or zero loans • A72 road corridor requires radical improvement to assist development growth and associated communication links • Pursuance of a ‘Dark Sky’ initiative for the Borders. (305) <p>There are other parts of the Borders where development should and could be located, closer to the transport hubs which can carry commuters to Edinburgh. The role of the Council should be to ensure that the transport hubs are effective and that the public transport that services them is also effective. (318)</p>	<p>the implications and controls are from a planning point of view.</p> <p>Policy IS4 gives examples of the wide range of transport proposals and improvements to be carried out. Development opportunities and land allocations take on board these works.</p>	<p>No action required</p>
--	--	---	---	---------------------------

		<p>Transport Scotland (TS) has no significant concerns with the spatial strategy options and the potential for any cumulative impact on the strategic road network. The LDP does not appear to be allocating a significant amount of new development, although we understand the specific numbers are not yet available due to the delay in the publication of the SESplan SDP. TS note the proposal to de-allocate 95 units. (70)</p> <p>TS note the MIR states on page 17, paragraph 2.21 that “<i>local improvements to the A68 and A7 are being promoted to improve journey times</i>”. The Borders Transport Corridor STAG based appraisal is ongoing and includes options at this stage for safety measures and capacity enhancements on the A7 and A68 trunk roads and for the A1 dualling to be extended. These options will be taken forward and fully appraised in the Strategic Transport projects Review being undertaken by Transport Scotland. Any outcomes should be reflected within the plan and not pre-empted, however we understand the outcomes of the STPR review may not be available while the LDP is progressing towards Proposed Plan. Close working with Transport Scotland is therefore recommended and TS will endeavour to assist where possible. (70)</p> <p>TS will continue to engage as this appraisal progresses and with the Borderlands Initiative and the Edinburgh and Lothians City Regional Deal. (70)</p> <p>TS welcome the MIR stating there is a need to reduce travel and extend and improve green network opportunities and links. Sustainable,</p>	<p>Comments noted.</p> <p>Comments noted. Transport Scotland will be consulted on the proposed LDP and Transport Scotland’s assistance in working together is appreciated.</p> <p>Comments noted and appreciated.</p> <p>Support noted.</p>	<p>No action required</p> <p>No action required</p> <p>No action required</p> <p>No action required</p>
--	--	--	---	---

		active travel options should be an integral part of an LDP, as well as, encouraging better connectivity. (70)		
--	--	--	--	--

QUESTION 2

Do you agree with the preferred option to retain the existing 'Strategic High Amenity' site categorisation and amalgamate the remaining categories? Do you agree with any of the alternative options including to retain the current policy position? Or do you have another alternative option?

QUESTION 2

Do you agree with the preferred option to retain the existing ‘Strategic High Amenity’ site categorisation and amalgamate the remaining categories? Do you agree with any of the alternative options including to retain the current policy position? Or do you have another alternative option?

Main Issue	Sub Issue	Summary of Main Issues Raised	Proposed Response to Main Issues Raised	Recommendation
Growing our economy: Question 2	Background	Section 4.2 specifies “The proposed SESPlan seeks to ensure LDPs identify, safeguard and deliver a sufficient supply of employment land taking account of market demands and existing infrastructure.” Whilst the MIR puts forward proposals for the allocation of employment land, there is no assessment given of market demands and existing infrastructure. These need to be provided for review and comment prior to any commitment in LDP2 to earmark further employment land. (73)	Comments noted. The sites proposed for business and industrial allocations have come forward as a result of detailed discussions with the Economic Development Section of the Council. Furthermore, undertakes an annual Employment Land Audit which monitors the supply, take-up and status of business and industrial land within the Scottish Borders in accordance with Scottish Planning Policy. The audit assesses the range and choice of the sites which make up the supply. The audit also identifies the availability and constraints of sites and also monitors windfall employment developments.	No action required.
Growing our economy: Question 2	General	The safeguarding of business and industrial land should continue to be a priority for the LDP. It is vital that the LDP2 provides a healthy supply of readily available land for business and industrial use. (7)	Comments noted.	No action required.
Growing our economy: Question 2	General	As proposed, policy ED1 is capable of wide interpretation and has the potential to allow a range of uses on business and industrial sites, which could be detrimental to the aim of maintaining an effective supply of sites for business/industry. It is suggested that the	The Proposed Local Development Plan will present the wording of Policy ED1 which seeks to protect land for business and industrial purposes but also promote complimentary uses. It is	It is recommended that the Council agrees to carry the Preferred Option for Policy ED1: Business and

		preferred option for policy ED1 does not provide clear and robust guidance for future development on business/industrial sites, and could give cause to confusion for both applicants and the decision makers. Perhaps further consideration should be given to the wording of this policy. (7)	considered that the proposed wording addresses the concerns raised.	Industrial Land forward into the Proposed LDP.
Growing our economy: Question 2	Agree	The contributor agrees that this would seem a logical step and would simplify the system. The critical purpose of these sites must be in the creation of employment and inward investment to the region. (24)	Comments noted.	No action required.
Growing our economy: Question 2	Agree with preferred option	The contributor agrees although it is unclear which option he agrees with. (25)	Comments noted.	It is recommended that the Council agrees to carry the Preferred Option for Policy ED1: Business and Industrial Land forward into the Proposed LDP.
Growing our economy: Question 2	General	The contributor considers that building on farm land will deter future farming. (27)	It is not considered that the development of farm land indicated within the forthcoming Proposed LDP would be significant enough to deter future farming within the vicinity.	No action required.
Growing our economy: Question 2	Agree with preferred option	Welcome and support the MIR's recognition that there is a need for more flexibility within Policy ED1 sites to allow scope for a wider range of site options to be considered. This approach should be carried through to the Proposed Plan. (56)	Support for preferred option noted.	It is recommended that the Council agrees to carry the Preferred Option for Policy ED1: Business and Industrial Land forward into the Proposed LDP.
Growing our	Disagrees with	The contributor does not agree with the preferred	Comments noted.	It is recommended

economy: Question 2	preferred and alternative options	or alternative options. (95)		that the Council agrees to carry the Preferred Option for Policy ED1: Business and Industrial Land forward into the Proposed LDP.
Growing our economy: Question 2	General	Classes 4, 5 and 6 may involve 'bad neighbour' activities which are liable to generate noise, pollution, and heavy goods vehicle movements. They may also adversely affect income from tourism. These should only be permitted where they will not cause a nuisance to others, and where they are very close to trunk roads. This category should include such activities as high-volume battery egg production which seem closer to industrial activities than farming. (96)	'Bad neighbour development' now falls under Schedule 3 classes of development within the Development Management regulations. Any potential impacts upon neighbouring land uses will be given due consideration through the Development Management process in consultation with the Scottish Environment Protection Agency (SEPA) and the Council's Environmental Health Officers.	No action required.
Growing our economy: Question 2	Main Issues/ General/Aims	<p>The Eyemouth Harbour Trust (EHT) and Neart na Gaoithe Offshore Ind Ltd (NnGOWL) consider that the MIR fails to address the needs of emerging industries and the associated economic growth and development opportunities, for example the opportunities for coastal locations such as Eyemouth, associated with the emerging offshore renewables industry. (109, 110)</p> <p>The EHT recommends the inclusion of a new paragraph within the MIR sub-section (para 4.12 - 4.15), covering the promotion of economic development opportunities at ports, harbours and other coastal locations. In relation to the offshore renewables-related opportunities at Eyemouth Harbour, that paragraph should include the following sentence: "...Land at and surrounding</p>	<p>Comments noted. There are currently a mixture of uses at and around Eyemouth Harbour. There is also an allocated mixed use site within close proximity at Gunsreen (MEYEM001) as well as business and industrial sites within the town (BEYEM001 and zEL6). A Planning Brief was prepared for a significant part of Harbour Road in 2014, which seeks to guide future redevelopment.</p> <p>It is agreed that there has been a change in context at Eyemouth over recent years in that there is now the opportunity for the town to offer a</p>	It is recommended that the Council agrees to include the following wording within the Vision, Aims and Spatial Strategy section of the Proposed LDP in respect of the Eastern Spatial Strategy and also within the Eyemouth settlement profile: <i>'The coastal economy at</i>

		<p>Eyemouth Harbour should be promoted for a mix of employment generating uses, including complementary ancillary uses such as the approved helicopter access facility, which promote the potential role of Eyemouth Harbour in supporting the offshore renewables industry...”.</p> <p>Whilst reserving a position in respect of the identification of a preferred option, the contributors support the need for flexibility within allocations relating to strategically important economic development areas (such as the Gunsreen allocation near Eyemouth Harbour), particularly in relation to some forms of sui generis uses and/or uses complementary to wider Class 4/5/6 development. By contrast, the adoption of a sequential approach would not necessarily encourage complementary uses and could result in overly restrictive allocations which do not meet industry requirements. For example, recently approved helicopter access facility significantly complements Eyemouth’s wider offering as a potential O&M base for an offshore wind farm. It is unclear how such a new policy approach (i.e. including the sequential element) could facilitate such a sui generis use without an element of flexibility afforded by the policy designation and associated development brief. (109, 110)</p> <p>In paragraphs 3.2 and 3.5 of the MIR, there is no reference to significance of the Scottish Borders coastal economy. Indeed reference to the rural environment/rural economy can be found throughout the MIR, while reference to the coastal economy are absent, as is any reference to Eyemouth Harbour as a location of local and regional significance to a range of industries,</p>	<p>key location for emerging offshore renewable energy projects.</p> <p>It is agreed that the coastal economy is important to Eyemouth and that reference should be made to the aforesaid opportunities associated with the emerging offshore renewable industry. This should be incorporated within the Vision, Aims and Spatial Strategy section of the Proposed LDP in respect of the Eastern Spatial Strategy and also within Volume 1 and the Eyemouth settlement profile, as follows: <i>‘The coastal economy at Eyemouth is important to the local area. There has been a change in context at Eyemouth over recent years in that there is now the opportunity for the town to offer a key location for emerging offshore renewable energy projects’.</i></p> <p>The site referred to at Gunsreen is a mixed use site and would not therefore be assessed against Policy ED1: Business and Industrial Land.</p>	<p><i>Eyemouth is important to the local area. There has been a change in context at Eyemouth over recent years in that there is now the opportunity for the town to offer a key location for emerging offshore renewable energy projects’.</i></p>
--	--	---	--	---

		potentially including the offshore renewables sector. (110)		
Growing our economy: Question 2	General	Contributor agrees that industrial and business allocations should be safeguarded but objects to any amendments that prevent the support for mixed-use developments that incorporate both business (Class 4 Uses etc) and housing within the same site. Also disagree that a sequential test should be required. (111)	The Council continues to allocate sites for mixed use development. A sequential test is considered necessary in respect of the safeguarding of business and industrial sites in order to ensure there is not a dilution of these sites to other uses which could have been accommodated elsewhere in a settlement.	No action required.
Growing our economy: Question 2	General	SEPA have no comments to make in respect of the question specifically, however highlight that the preferred option must be cognisant of associated land use policy and guidance such as SBC Flood Risk policy and the SEPA Flood Risk and Land Use Vulnerability Guidance . The potential supporting uses to the high quality business uses outlined in the MIR such as childcare facilities may not be suitable in areas which have a level of flood risk compatible for commercial premises but not for most vulnerable uses. SEPA are happy to discuss specific sites in more detail in order to set out clear information with regards to potential supportive uses on site in order to provide clarity and certainty with regards to what we would accept on such sites. (119)	Comments noted. SEPA would be consulted during the process of any planning application(s) which are located within sites which are at flood risk.	Comments noted.
Growing our Economy: Question 2	General	The contributor questions if there is a requirement for these sites as there seems to be empty business premises as it is. (151)	Comments noted. The Council would agree that there are existing empty business premises in the Scottish Borders and would actively encourage their reuse. However, it must be acknowledged that in some cases businesses require purpose built buildings to suit the functionality of their operations and	No action required.

			it is not always viable to occupy buildings which are not fit for purpose.	
Growing our economy: Question 2	General	The plan should recognise the contribution which SMEs in the construction sector can make to the economy and to housing completions. The contributor has included a document entitled 'Small house builders and developers: Current challenges to growth' by the NHBC Foundation. (156)	Comments noted. From a planning allocation point of view, it is the principle of development that is assessed, not the scale of the housebuilder.	No action required.
Growing our economy: Question 2	Agree with preferred option	The contributor agrees with the preferred option to retain the existing Strategic High Amenity categorisation and amalgamate the remaining categories. (171, 230, 262, 263, 273, 290, 292, 294, 299)	Support for preferred option noted.	No action required.
Growing our economy: Question 2	Agree with preferred option	Scottish Land and Estates are of the view that the preferred option represents the most flexible alternative to the existing set up and therefore support this option if the current set up is to change. The contributors particularly welcome that for both the proposed use classes, other high quality complimentary commercial activity may be acceptable as well as non-industrial business / employment generating uses if they enhance the quality of the business park as an employment location. It is considered this is a sensible and pragmatic step. (195)	Support for preferred option noted.	No action required.
Growing our economy: Question 2	General	The Southern Uplands Partnership suggest that maximum flexibility would be beneficial. (196)	Comments noted. Maximum flexibility would enable the development of business and industrial sites for a multitude of uses. This would result in the dilution of business and industrial sites which must be safeguarded in order to facilitate employment opportunities, economic activity and	No action required.

			economic growth.	
Growing our economy: Question 2	General	The contributor considers that there seems to be a big master plan for the borders in general and notes that after all the investment in the railway line the bits around the railway will be better utilised. (203)	Comments noted. The Blueprint for the Border Railway seeks to ensure economic development opportunities are maximised along the railway corridor. The LDP must seek to identify and promote these opportunities by allocating land within the vicinity of the Railway.	No action required.
Growing our economy: Question 2	Agree with preferred option	The contributor agrees with the preferred option. The current four categories are difficult to differentiate and proving difficult to enforce at present. Businesses come and then develop and move on and successor occupants of specific premises may have different business vision and objectives. (206)	Comments and support for preferred option noted.	No action required.
Growing our economy: Question 2	Agree with alternative option 3	The contributor does not consider the argument for changing policy has been strongly made. (209)	Comments noted. However, Officers considered it necessary to review Policy ED1 due to some issues in practice.	No action required.
Growing our economy: Question 2	Agree with alternative option 1	The contributor supports Alternative Option 1 but notes that care would have to be taken to ensure that one use did not adversely affect an existing use. (214, 288, 315)	Comments and support for Alternative Option 1 noted.	No action required.
Growing our economy: Question 2	Background / Agree with alternative option 1 or 3	In respect of paras 4.8 and 4.15 in the MIR - in some instances where employment is required in a rural environment such as Greenlaw and to mitigate unnecessary commuting to a 'Strategic High Amenity' area the preference would be to retain the current policy position or the Alternative Option 1 which seems to allow a more diverse group of business type classes to sit side by side in an industrial site, recognising that any site within Greenlaw would not extend to a large business park. (215)	The Council has established through liaison with the Council's Economic Development Section that there is demand within Greenlaw for business and industrial land and has as a result proposed a 1.2ha site to the south of Edinburgh Road. It is considered that this site should be carried forward into the Proposed LDP. The contributor's comments in respect of the policy approach are noted. It is considered that the	No action required.

			preferred option, with the categorisation of the aforesaid site as a 'business and industrial category' would allow for class 4, 5 and 6 uses at this location.	
Growing our economy: Question 2	Agree with preferred option and alternative option 2	The contributor believes that it is vital to attract businesses to the Borders, rather than seeing an outflow of revenue/wealth north up to Edinburgh. As such, the contributor thinks it correct to identify "High Amenity Business" locations for Class 4 uses. It is also important to encourage industrial and storage distribution uses, albeit the latter provides fewer employment opportunities. Each major settlement in the Borders should have the potential to attract business and growth. Clearly, it is sensible for these to be focused in and around the infrastructure, including Tweedbank. Where possible these should be on brownfield rather than Greenfield sites. The contributor also considers option 2 to be sensible. (216)	Comments and support for the preferred and alternative option 2 noted. In this instance, the Council considers that the preferred option should be carried forward into the Proposed LDP. The Council would agree with the comments made in respect of business and industrial land across the Borders.	No action required.
Growing our economy: Question 2	General	The contributor believes quite simply that sites which have historically been used for industry should be retained as such, and new out of town sites developed where a top up is necessary. The contributor considers we have gone too far down the road of assuming every bit of spare ground can be used for housing development and this imbalance needs to be urgently addressed, otherwise our towns will become places to sleep and nothing else. (222)	Comments noted. It is not always possible for former business and industrial buildings to continue under their former uses. Older industrial buildings are not generally fit for purpose as the way businesses operate has changed over time. A number of former industrial buildings are listed buildings and allowing alternative uses does encourage their reuse and therefore their protection. Not all allocated sites are for residential development. The Plan allocates sites for business and industrial, mixed use, education and redevelopment purposes.	No action required.

Growing our economy: Question 2	General	The contributor requires clarification on the first sentence. (231)	The Council is unsure of the issue identified and consider the text referred to appropriate.	No action required.
Growing our economy: Question 2	General	The contributor does not think the urbanisation of Eshiels can be described as high amenity. The proposals for Eshiels appear to lead to a ribbon development linking Peebles to Cardrona. (23)	<p>The Main Issues Report (MIR) recognises that the built and natural heritage are major component parts of the attractiveness of the Scottish Borders which must be protected and enhanced. There are a large number of listed buildings, conservation areas, landscape and biodiversity designations and opportunities must continue to be explored to capitalise on these assets in the interests of tourism and economic development. It is acknowledged that the Plan must continue to ensure new development is located and designed in a manner which respects the character, appearance and amenity of the area and that good placemaking and design principles continue to be implemented.</p> <p>It is not considered that development at this location would result in ribbon development or coalescence of the settlements within the Tweed Valley.</p> <p>In light of the consultation responses received during the Main Issues Report public consultation and following further investigation on site MESH1001 as well as taking</p>	It is recommended that the Council agree not to allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced business site - BESH1001 at this location.

			into account the immediate need to identify land for employment use, it is recommended that a reduced site for employment only – site BSHI001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.	
Growing our economy: Question 2	General	The contributor would like to see more imagination used e.g. develop a brand new town in the Borders perhaps along the lines of Poundbury near Dorchester rather than tinkering with difficult bits of land in existing communities. (256)	Whilst new settlements offer positive opportunities for appropriate siting and design, infrastructure is often not readily available and cost prohibitive. It is accepted that this is an option which may have to be assessed in future Local Development Plans.	No action required.
Growing our economy: Question 2	General	The contributor states that while in an ideal world, scenic areas could be preserved against all-comer, it is Neanderthal in outlook to allow that to inhibit necessary development, which can be temporary and reversible, to dictate sterility of action. SBC should lead and not be spectators of the success of others. (258)	Comments noted. In assessing the suitability of sites for development, due consideration must be given to the landscape impact. Development must address the balance of economic development versus environmental protection.	No action required.
Growing our economy: Question 2	General	The contributor is of the view that the policy largely focuses on the railway and Tweedbank, and therefore commenting by the inherent use of	Policy ED1: Business and Industrial Land applies to all business development on business and	No action required.

		the railway. It would be good to see the strategy make business links between the towns and also schools and higher education to make the best use of business ideas from within the borders. The plan also focuses on industrial areas, it isn't clear where these should be, what is clear is that there should be a requirement to produce a business plan for any proposal outwith a specific area. (260)	industrial land across the Scottish Borders.	
Growing our economy: Question 2	General	The contributor notes that as well as sustainability, development should focus on the well-being economy so that local people are fit, healthy and able to work. (272)	Comments noted and agreed. This is an aspect that is now rightly being considered more through the preparation of Local Development Plans. Health and wellbeing is encouraged through, for example, the protection of greenspace, better connectivity and the extension and improvement of green network opportunities and links.	Comments noted and agreed.
Growing our economy: Question 2	Agree with alternative option 3	The contributor supports Alternative Option 3 with the retention of the current policy position, with no change to the employment land hierarchy and categorisation. (274, 276)	Support of alternative option 3 noted. However, it is considered the current policy has issues in practice and requires amending.	It is recommended that the Council agrees to carry the Preferred Option for Policy ED1: Business and Industrial Land forward into the Proposed LDP.
Growing our economy: Question 2	Agree with preferred option or alternative option 3	The contributor agrees with the Preferred Option or retaining the status quo (Alternative Option 3). (277)	Support of the preferred option 1 or alternative option 3 is noted. However, it is considered the current policy has issues in practice and requires amending.	It is recommended that the Council agrees to carry the Preferred Option for Policy ED1: Business and Industrial Land forward into the Proposed LDP.

Growing our economy: Question 2	General	The contributor believes that sites should be available to all use categories (with the possible exception of Class 1). This would allow the development of ancillary business around Class 4 users. A prime example of this is Cavalry Park in Peebles, which lay undeveloped for many years but is now home to many thriving businesses. (283)	Comments noted. It is proposed that Policy ED1 will rigorously safeguard high amenity business sites for Class 4 uses, however, the policy will recognise that there may be circumstances whereby, in the case of high amenity business sites, high quality commercial activity may be acceptable as well as non-industrial business / employment generating uses if it enhances the quality of the business park as an employment location.	It is recommended that the Council agrees to carry the Preferred Option for Policy ED1: Business and Industrial Land forward into the Proposed LDP.
Growing our economy: Question 2	General	The contributor is of the view that Newcastleton should be included as a rural development area. (287)	Comments noted. The boundaries of Rural Growth Areas are determined at a strategic plan level. The role of Newcastleton is, however, recognised within the Local Development Plan within the rural area it serves.	No action required.
Growing our economy: Question 2	Agree with alternative option 2	The contributor supports Alternative Option 2. (289)	Support of Alternative Option 2 is noted. However, it is considered the current policy has issues in practice and Option 1 is considered the most appropriate option.	It is recommended that the Council agrees to carry the Preferred Option for Policy ED1: Business and Industrial Land forward into the Proposed LDP.
Growing our economy: Question 2	General	Strategic High Amenity business requires high speed broadband connectivity, meaning gigabit and beyond, not 24 mbps. (295)	Comment noted. The Local Development Plan will continue to encourage and promote improved digital connectivity as a priority for the Council.	No action required.
Growing our economy:	General	The contributor considers that the whole of the Borders should be included. (297)	Unfortunately it is unclear what this comment refers to. The Local	No action required.

Question 2			Development Plan covers the whole of the Scottish Borders.	
Growing our economy: Question 2	General	Selkirk and District Community Council agree in principle although there are concerns about introducing a retail element into the options. Also, the potential involvement of leisure/hotel developments need careful consideration. (305)	Comments noted. The Council would agree that the degree of retail and leisure/hotel elements must be considered carefully. It is considered that the wording of Policy ED1: Protection of Business and Industrial Land enables these matters to be fully judged through the process of any planning application.	No action required.
Growing our economy: Question 2	Agree with preferred option	Crailing, Eckford and Nisbet Community Council agrees with the preferred option providing that the definition of 'high quality' business uses is robust for the first category, and the rationale/criteria for considering other complimentary commercial activity to be included in this, is carefully balanced. The Community Council notes an absence of reference and discussion as to how SBC will attract high quality business & investment to these up-rated sites? (312)	Support for the preferred option is noted. It is considered that the proposed wording for Policy ED1: Protection of Business and Industrial Land suitably addresses these comments. The Council promotes the safeguarding and provision of appropriate business and industrial land in order to attract business and investment to the area.	It is recommended that the Council agrees to carry the Preferred Option for Policy ED1: Business and Industrial Land forward into the Proposed LDP.
Growing our economy: Question 2	Agree alternative option 2	The Community Council of the Royal Burgh of Peebles and District agree with the retention of the various designations of sites. The CC does not believe however that there should be some flexibility allowed to ensure that we can maximise the potential to develop sites for employment use. This does mean that there has to be stringent rules and/or guidance in this regard and that Planning Officers will need to be robust in their interpretation of those rules. (318)	Support for alternative option 2 noted. It is considered that the proposed wording as stated in Option 1 for Policy ED1: Protection of Business and Industrial Land suitably addresses these comments.	It is recommended that the Council agrees to carry the Preferred Option for Policy ED1: Business and Industrial Land forward into the Proposed LDP.
Growing our economy: Question 2	Alternative option proposed	The contributor notes that it is welcomed that the Council recognise the need for flexibility within their areas traditionally zoned for use classes 4, 5	Comments noted. It is considered that the two categories proposed within Policy ED1 offer a degree of	It is recommended that the Council agrees to carry the

		<p>& 6. However, the contributor questions why this flexibility cannot be implemented with the existing categories remaining in place. With the preferred option, there is flexibility offered, but at the same time, the proposal appears restrictive for those Strategic High Amenity sites, focusing on Use Class 4 primarily. The contributor therefore proposes an alternative whereby the existing categories of business and industrial sites are maintained, but there is flexibility built in where the proposed uses are complimentary to the surrounding area. (321)</p>	<p>required flexibility. It is considered there are some practical issues in implementing the current 4 category approach.</p>	<p>Preferred Option for Policy ED1: Business and Industrial Land forward into the Proposed LDP.</p>
--	--	--	--	---

QUESTION 3

Do you think there are any settlements in which new or more business and industrial land should be allocated, and if so where?

QUESTION 3

Do you think there are any settlements in which new or more business and industrial land should be allocated, and if so where?

Main Issue	Sub Issue	Summary of Main Issues Raised	Proposed Response to Main Issues Raised	Recommendation
Growing our economy: Question 3	General	The main justification for the expenditure on the Borders Railway was the development of Galashiels, Tweedbank and other settlements along the route. However the main thrust of the new proposals for commercial development appears to be around Peebles and district. The contributors appreciate that people want to come to live in Peebles and developers certainly want to develop in Peebles rather than Galashiels. However the contributors contend that the Local Authority has a duty to direct development to where the infrastructure can support further growth i.e. Galashiels, Tweedbank, Hawick and Jedburgh. (23, 185, 229, 252, 261, 276)	Comments noted. It is agreed that there is a focus on maximising economic development opportunities along the railway corridor. This is set out in the Borders Railway 'Maximising the Impact: A Blueprint for the Future' (November 2014). It is also important, however, that there is generally a sufficient supply of business land across the Scottish Borders and a shortfall has been identified within the Peebles area.	No action required.
Growing our economy: Question 3	General	From the contributor's experience, there would appear to be a need for low cost business units in Galashiels. The availability of cheap serviced land with good access to roads is limited. (23)	Comments noted and agreed. It is agreed that there is a lack of suitable business and industrial land in Galashiels. The Council has identified potential business and industrial land at Winston Road in Galashiels. Furthermore, land within the site at Lowood, already a mixed use allocation within the Local Development Plan 2016, will incorporate a degree of business land to meet this shortfall.	No action required.
Growing our economy: Question 3	General	Strategically placed in the areas with the highest unemployment and deprivation. (25)	Comments noted. The sites allocated for business and industrial use are predominantly located within or adjacent to settlements	No action required.

			across the Borders where there is a recognised demand.	
Growing our economy: Question 3	General	Contributor disagrees. When you take away farming, what is left? We will have to import and with uncertainty related to Brexit, where will that lead us? (27)	It is not the intention of the Council to allow development to have a negative impact upon agricultural activities across the Scottish Borders. The LDP recognises potential impacts of Brexit and consequent issues for rural landowners and promotes diversification within Policy ED7 – Business, tourism and leisure development in the countryside gives added weight to economic benefits.	No action required.
Growing our economy: Question 3	General	A site should be identified adjacent to the railway (within the Galashiels/Tweedbank/Melrose area) where a retirement village for the ageing population could be established. This would also offer a significant economic and employment opportunity. As such it should be targeted to an area where more employment opportunities are required. (90)	The Council is currently in the process of investigating appropriate sites for a care home in the Central Borders and this site is being considered.	No action required.
Growing our economy: Question 3	General	The contributor does not agree that there are any settlements in which new or more business and industrial land should be allocated. (175)	Comments noted.	No action required.
Growing our economy: Question 3	General & BNEWT002 (Land North West of the Holmes Barns)	The contributor considers that there are further opportunities for business and industrial land and considers the subject site in Newtown St. Boswells to be one of them. (136)	This site was submitted for consideration during the MIR consultation. The site assessment concluded the following: <i>'Whilst the principle of business land at this location is considered to be acceptable, there is already a substantial area of land designated for business use within the Local</i>	It is recommended that the Council agrees not to allocate this site (BNEWT002) within the Proposed Local Development Plan.

			<p><i>Development Plan 2016 (BNEWT001) to the immediate north of the site. Furthermore, any development of this site would be limited by the area that would be required for the provision of a roundabout required as part of the Newtown St. Boswells Development Framework.</i></p> <p><i>The site is located within the Countryside Around Towns area as defined by Policy EP6. It is not however considered that the development of this site would have an unacceptable harm on the neighbouring settlements due to the proximity of existing sites earmarked for development.</i></p> <p><i>There is a high voltage electricity cable running across the site which would require to be relocated and it is understood there is waste material under the site which may make construction more expensive. These matters would require to be considered as part of any development.</i></p> <p><i>Due to the proximity of the site to existing residential properties and the potential conflict of uses, use classes 5 or 6 may be difficult to support from an Environmental Health point of view. There is no Waste Water Treatment Works to</i></p>	
--	--	--	---	--

			<p><i>serve any development at this location.</i></p> <p><i>It is considered that given the extensive existing business allocation at Tweed Horizons (BNEWT001) and the potential issue of any development on this site interfering with any future roundabout required as part of the Newtown St. Boswells Development Framework that this site is not currently appropriate for development. It is not considered that the submission has justified the need for business land at this location.'</i></p>	
Growing our economy: Question 3	General – Tweedbank	The contributor considers that many of our industrial estates, especially Tweedbank, are beautifully landscaped but could easily accommodate small clusters of small scale well designed studios with/without accommodation – all using existing infrastructure which is nowhere near running at full capacity. This might even encourage more people to do a weekly/weekdays commute out of Edinburgh. (137)	Comments noted. Supplementary Guidance and a Simplified Planning Zone is now in place for the existing business and industrial land at Tweedbank. This does identify small clusters of land which would be developable. There will be opportunities within the former Lowood Estate for small scale studios etc.	No action required.
Growing our economy: Question 3	General – Central Borders / Reston / Walkerburn / Innerleithen	The contributors consider that land should be allocated around the railway in the Central Borders and near the proposed railway station at Reston (150, 172, 276) . Also, at Walkerburn. (150, 172) and Innerleithen. (292)	Comments noted. It is agreed that there is a focus on maximising economic development opportunities along the railway corridor. This is set out in the Borders Railway 'Maximising the Impact: A Blueprint for the Future' (November 2014). It is also important, however, that there is a sufficient supply of business land	No action required.

			<p>across the Scottish Borders and a shortfall has been identified within the Peebles area. Business and Industrial sites are identified in Eshiels and Innerleithen. Redevelopment and mixed use sites are identified within Walkerburn and Reston.</p>	
<p>Growing our economy: Question 3</p>	<p>General - Walkerburn</p>	<p>The contributors state that new business and industrial land should be located in towns and communities where employment is low following the demise of traditional Border industries such as the woollen trade. An example of this is Walkerburn. (185, 223)</p>	<p>It is important that there is a sufficient supply of business land across the Scottish Borders and a shortfall has been identified within the Peebles area. Business and Industrial sites are identified in Eshiels and Innerleithen. A redevelopment site is identified in Walkerburn which could potentially be utilised for business/industrial purposes.</p>	<p>No action required.</p>
<p>Growing our economy: Question 3</p>	<p>General – Innerleithen and Walkerburn</p>	<p>The contributor states that business and industrial land should be aligned to the need for investment and economic growth rather than somewhat randomly allocated. In the Tweeddale area there is a need for small business and LBG investment in Innerleithen and Walkerburn rather than stretching the already fragile infrastructure in Peebles to the point where it is detrimental to local business. (239)</p>	<p>It is important that there is a sufficient supply of business and industrial land across the Scottish Borders and a shortfall has been identified within the Tweeddale area. Sites are allocated where there is an identified need through consultation with the Council's Economic Development section. The sites identified are considered to be suitable from an infrastructure point of view. A business and industrial site is identified in Innerleithen and there are opportunities at Caerlee Mill. A redevelopment site in Walkerburn could potentially accommodate business/industrial development.</p>	<p>No action required.</p>

Growing our economy: Question 3	General – Central Borders / Reston / Eddleston / Walkerburn	<ul style="list-style-type: none"> • Far greater emphasis should be made for industrial/business development around the new railway corridor. SBC needs to be really proactive at promoting this area. This really is where investment should be concentrated. Massive amounts of public money have been injected in the railway which seems to be acting as a new lifeline to Edinburgh. It is SBC's responsibility to capitalise on this investment by promoting commercial enterprises along this corridor; (155, 186, 188, 197, 207, 239, 241) • There is also a need for SBC to be far more proactive in promoting business and housing in the Reston area. If this is going to be promoted as a station on the East Coast route, people need houses to live in, and the area could become attractive for industry. Currently there are just 5 houses (AREST005) suggested at Reston; this is far too few. (155, 206) • There is a need to allocate business and industrial land in the Eddleston and Walkerburn areas too. Eddleston is close to Edinburgh but has good connection to Peebles and is on the bus route. Walkerburn is in vital need of investment and is not that far from Peebles which is desperately short of business development opportunities. (155, 206) 	<ul style="list-style-type: none"> • Comments noted. It is agreed that there is a focus on maximising economic development opportunities along the railway corridor. This is set out in the Borders Railway 'Maximising the Impact: A Blueprint for the Future' (November 2014). The LDP takes cognisance of this. • Comments noted. There is currently a substantial mixed use site allocated within Reston as well as both short term and longer term housing sites. It is considered these are sufficient to address any need as a result of the Reston railway station being reinstated. • The Economic Development section of SBC has been heavily involved in the allocation of business and industrial land through the preparation of this Proposed Plan. The need for business and industrial land in Eddleston has not arisen through discussions with the Council's Economic Development Section. A redevelopment site in Walkerburn could potentially accommodate business/industrial development. 	No action required.
Growing our	General	There are many towns and settlements within the	Comments noted. It is agreed that	No action required.

economy: Question 3		SBC area which are in need of regeneration and redevelopment - for example parts of Hawick, Galashiels and Walkerburn where there are redundant buildings which could be redeveloped before they deteriorate to an extent that they should be demolished. There appear to be brownfield sites which should be earmarked for development before greenfield sites are used. As a result of the obvious success of the Borders railway, the rail corridor should be an absolute priority for mutually supportive industrial, commercial and residential development. (166)	there is a focus on maximising economic development opportunities along the railway corridor. This is set out in the Borders Railway 'Maximising the Impact: A Blueprint for the Future' (November 2014). There are a number of sites allocated within the Proposed Plan for redevelopment. The Council encourages the redevelopment of brownfield sites for a variety of uses including housing, employment or retailing which will support the opportunity of bringing such land back into productive use and to enhance the surrounding environment. Caberston Farm/Old Mill is allocated for redevelopment in Walkerburn (zR200).	
Growing our economy: Question 3	General	The contributors do not believe there are any settlements in which new or more business and industrial land should be allocated. (179, 181, 192)	Comments noted.	No action required.
Growing our economy: Question 3	General	The contributors consider that there are enough areas which industry and businesses could use without building new. (189, 276)	Comments noted. The Council would encourage the use of brownfield land and has identified a number of brownfield redevelopment sites across the Scottish Borders which are derelict and relevant infill and redevelopment policies can support such proposals.	No action required.
Growing our economy: Question 3	General - Hawick	There is a great need for new/more business and industrial land in Hawick. (190, 290, 297)	The Council is proposing the allocation of a large high amenity business site at Burnfoot in Hawick (BHAWI004) as well as a business	No action required.

			and industrial site at Gala Law II (BHAWI003). These are over and above existing allocations at Burnfoot (BHAWI001) and Gala Law (zEL60 and BHAWI002).	
Growing our economy: Question 3	General	It would help to know if the mooted extension of the railway is likely to happen as planning could then really be fit for the 21 st century and allow forward thinking. (197)	Scottish Borders Council has campaigned for the reinstatement of the railway line between Tweedbank and Carlisle via Hawick. Most recently funding for a feasibility study to assess the implications of reinstating the railway line has been confirmed as part of the Heads of Terms of Agreement for the Borderlands Inclusive Growth Deal. The Council has unanimously supported a motion to reinstate the railway line on the original route and continues to support that outcome.	No action required.
Growing our economy: Question 3	General – Railway Corridor	There should be a focus on the areas in and around Galashiels or along the route of the new railway. The vast majority of people who will be housed in new development projects will likely be forced to work outside the area, most likely in Edinburgh, so maximum use should be made of the new railway service between Edinburgh and Tweedbank. (201, 229)	Comments noted and agreed. It is agreed that there is a focus on maximising economic development opportunities along the railway corridor and the LDP addresses this. This is set out in the Borders Railway 'Maximising the Impact: A Blueprint for the Future' (November 2014).	No action required.
Growing our economy: Question 3	General	The contributor notes that the investment in the railway line should be utilised and where there is more infrastructure capacity. (203)	Comments noted and agreed. It is agreed that there is a focus on maximising economic development opportunities along the railway corridor and the LDP addresses this and identifies the need to upgrade infrastructure where necessary. This is set out in the Borders Railway 'Maximising the Impact: A	No action required.

			Blueprint for the Future' (November 2014).	
Growing our economy: Question 3	General	In the event of a disastrous Brexit the pressures for repurposing current agricultural land may force change to the policies on business development / land allocation in rural areas. (206)	Comments noted. Whilst the outcome and any consequent impacts of Brexit remain uncertain, it is likely there will be changes to the rural economy and land uses. This may include the need for more farm diversification proposals and likely significant pressures for forestry planting. Consequently, within the decision making process the LDP gives more weight to any economic development benefits for new business, leisure and tourism developments in the countryside.	No action required.
Growing our economy: Question 3	General – Hawick	There are still several brownfield sites which have not been utilised in Hawick, namely zEL49, zEL62, zEL50, zEL60, zEL48 and MHAWI001 (from the existing Local Development Plan) many of which can be classified as derelict or vacant at present. (212)	Comments noted. There are a number of sites allocated within the Proposed Plan for redevelopment. The Council encourages the redevelopment of brownfield sites for a variety of uses including housing, employment or retailing which will support the opportunity of bringing such land back into productive use and to enhance the surrounding environment.	No action required.
Growing our economy: Question 3	General	Scottish Natural Heritage (SNH) would be happy to provide advice on natural heritage opportunities and constraints in new allocations if any are proposed by other stakeholders. (213)	Comments noted.	SBC will continue to consult SNH on proposals when required.
Growing our economy: Question 3	General - Greenlaw	As mentioned previously by the contributor regarding prospective developers of the Greenlaw Town Hall and the potential for them wanting to locate a small ceramics workshop and retail outlet in the village then industrial land would be	The Proposed Plan includes an allocation for business and industrial land in Greenlaw (BGREE005). This has been proposed in line with advice from the Council's Economic	No action required.

		required for this - possibly the current proposals for industrial land will be enough, but consideration could be given to utilising other areas of land with different planning designations. Note here there are several areas of land with potential to become housing although the completion rate of these areas of land indicates that an alternative use may encourage more constructive growth in the village. (215)	Development section who consider there is demand for business/industrial land within the village.	
Growing our economy: Question 3	General - Selkirk	There are many brownfield sites within our towns such as Selkirk with excess industrial land that could be allocated. (221, 289)	Comments noted. There are a number of sites allocated within the Proposed Plan for redevelopment. The Council encourages the redevelopment of brownfield sites for a variety of uses including housing, employment or retailing which will support the opportunity of bringing such land back into productive use and to enhance the surrounding environment.	No action required.
Growing our economy: Question 3	General – Peebles	Peebles would be an ideal location to locate spin-off service businesses serving the major population centres in Mid Lothian. (222)	Comments noted. This would be dictated primarily by the local market. Finding such land in Peebles is a challenge for a range of reasons.	No action required.
Growing our economy: Question 3	General – Galashiels	The contributor suggests using the former yard (assuming Burgh Yard). (229)	Burgh Yard in Galashiels is allocated for redevelopment within the current LDP and this will be carried forward into the Proposed Plan (zCR2).	No action required.
Growing our economy: Question 3	General – Bonchester Bridge, Denholm, Jedburgh	The contributor suggests Bonchester Bridge, Denholm and Jedburgh. (230)	Comments noted. Input has been sought from the Council's Economic Development Section who do not consider there to be demand within Bonchester Bridge and Denholm. There are a number of sites	No action required.

			allocated for business/industrial use in Jedburgh.	
Growing our economy: Question 3	General – Innerleithen	The contributor suggests looking for business land on the southern half of Traquair Road in the vicinity of the cemetery and Data Store facility, Innerleithen. (206)	Comments noted. The land in question has not been submitted through the Call for Sites process. It should also be noted that the land in question is subject to flood risk. The Council has, however, identified a site to the west of Innerleithen (MINNE003) which will incorporate an element of business/industrial land. There are other business sites already allocated in Innerleithen.	No action required.
Growing our economy: Question 3	General – Peebles	Contributor 236 states that there needs to be a Cavalry Park 2 though not necessarily conterminous. A site needs to be identified and the capital investment made by Council / Enterprise in purchase and site servicing and serviced plots sold to recover investment. It is 25 years since the bold decision was made on Cavalry Park. Contributor 283 states that they see no allocation of an addition business site is Peebles or Western Tweeddale as a whole. This is an absolute must otherwise the town will suffer further from the "commuter" factor - which cannot be good in terms of sustainability. (236, 283)	Comments noted. One of the main challenges of the LDP has been to find new land for business and industrial use in the vicinity of Peebles. There are significant constraints in identifying such land within this area. Due to the ongoing uncertainty as to when or indeed if a new bridge will be built, any proposals identified to the southern side of the town can only be longer term options. A 4.9 ha site has been identified for business land at Eshiels. Furthermore, Policy ED7 – Business, Tourism and Leisure Development in the Countryside allows for appropriate employment generating development in the countryside subject to standard criteria text.	It is recommended that the Council agrees to allocate site (BESHI001) within the Proposed Local Development Plan.
Growing our economy: Question 3	General – Peebles	The contributor considers that the old factory on March Street, Peebles should be allocated for job creation. (247)	It should be noted that the site suggested by the contributor is already allocated within the current LDP through the Supplementary	No action required.

			Guidance on Housing adopted in November 2017. The site, MPEEB007 March Street Mills is an allocated mixed use site. It is intended that the site will provide a mix of uses including housing, employment and potentially commercial and community. It is therefore recommended that no change is proposed in relation to this site.	
Growing our economy: Question 3	General – Peebles Area	Contributor 273 is of the view that the Peebles area already has capacity with Cavalry Park and the town centre. Contributor 285 states that Peebles should certainly not have any new or more business and industrial land. (273, 285)	Comments noted. Cavalry Park has now developed to capacity and there is a need for business/industrial land within the area to meet local demand. One of the main challenges of the LDP has been to find new land for business and industrial use in the vicinity of Peebles. Ensuring there is an appropriate level of business/industrial land is a vital necessity for any town in order to help meet demand, create jobs and help the economy. However, there are significant constraints in identifying such land within this area. Due to the ongoing uncertainty as to when or indeed if a new bridge will be built, any proposals identified to the southern side of the town can only be longer term options. A 4.9 ha site has been identified for business land at Eshiels.	No action required.
Growing our economy:	General – West Linton	The contributor considers that new business and industrial land should be identified given that the	Comments noted. It should be noted that the current Adopted Local	No further action required.

Question 3		potential site – BWEST003 in the MIR is no longer available. In addition it is considered that allocated site zEL18 should be enforced. There is a long waiting list of businesses waiting for premises but nothing is available. (214)	<p>Development Plan allocates one Business and Industrial site – site zEL18. Scottish Planning Policy states that “<i>Local development plans should allocate a range of sites for business, taking account of the current market demand; location, size, quality and infrastructure requirements</i>”. The continued allocation of the site is supported by the Council’s Economic Development section.</p> <p>In light of the consultation responses received during the Main Issues Report public consultation and following further consideration on the matter, primarily due to the change in ownership and the existence of an already allocated employment site (zEL18) it is now not considered appropriate to allocate site BWEST003 within the Proposed Plan</p>	
Growing our economy: Question 3	General – A7 / A68 / Tweeddale	Development should be focused on the A7 and A68 rather than taxing a transport network that is already creaking at the seams in the Peebles area. (239, 241)	It has proved difficult to identify land within the Peebles area for business/industrial use due to a range of constraints. A 4.9 ha site has been identified for business land at Eshiels.	No action required.
Growing our economy: Question 3	General	The contributor is unsure if all existing brownfield sites have been fully examined for possible development- could this be looked at again? Has there been any analysis of what businesses would be best placed in the Borders? Unless there is more information as to what businesses could be attracted and what size it is difficult to comment on	Brownfield sites have been assessed if they have been submitted for consideration by the land owner or where the Council has become aware of their availability. The LDP continues to support the redevelopment of	No action required.

		<p>their location. Do we have any projections of business need? The idea that a child care nursery might be sited within a business area to suit employees has limited value - comments such as that would indicate there has been limited research in the development of such a proposal. Families want childcare where they live and connect to - no one lives in a business park after working hours. (243)</p>	<p>brownfield sites. The Economic Development Section has been heavily engaged in the process of identifying land for business and industrial purposes where they are aware of established demand. The Council undertakes an Employment Land Audit annually in order to monitor the supply, take-up and status of business and industrial land in the Scottish Borders. Child care facilities within a business site can attract employees to an area who are in need for such a facility to enable them to be able to work.</p>	
<p>Growing our economy: Question 3</p>	<p>General – Selkirk</p>	<p>The contributor considers that the bypass is the key in Selkirk. (258)</p>	<p>Comments noted. The road capacity within the centre of the town poses particular difficulties for traffic movement and parking. The line of the proposed Selkirk bypass is protected by Policy IS4 – Transport Development and Infrastructure. This would provide the opportunity to further improve the town centre environment, enhance road linkages within the Central Borders and speed up journey times from Hawick northwards. Whilst the bypass is safeguarded, there is currently no Scottish Government commitment and further studies would be required to identify the exact line and establish community and environmental impacts. If the bypass is built in the future, there are areas adjacent to it which could</p>	<p>No action required.</p>

			be identified for potential longer term development.	
Growing our economy: Question 3	General	The contributor is of the view that it would make sense to focus on areas within walking / cycling distance of the train line followed by a focus on areas according to unemployment in those areas. (277)	Comments noted. It is agreed that there is a focus on maximising economic development opportunities along the railway corridor. This is set out in the Borders Railway 'Maximising the Impact: A Blueprint for the Future' (November 2014). The sites allocated for business and industrial use are predominantly located within or adjacent to settlements across the Borders and consideration is given to current and improved pedestrian and public transport provision.	No action required.
Growing our economy: Question 3	General	The contributor considers there is plenty of unused space already in the Borders. (281)	Comments noted. The Council seeks to identify redevelopment sites, where appropriate.	No action required.
Growing our economy: Question 3	General – Tweedbank / Galashiels / Stow	The Council's approach to supporting economic development along the Borders Railway corridor and in the settlements of Tweedbank and Galashiels in particular are welcomed by Network Rail. Not only is this the location of the densest population within the Council area, but the location to which the spatial strategy directs future growth. The improved rail connectivity provides opportunities for a range of employment uses, and measures to capitalise on this via tools such as the Simplified Planning Zone at Tweedbank and Masterplans at Galashiels and Tweedbank are supported. Whilst Network Rail recognise that existing sites are identified and available at Galashiels and Tweedbank, and this will form part of the remit of the Masterplans for both settlements, consideration could be made towards	Comments noted. It is difficult to provide further allocations within Galashiels and Stow due to a variety of constraints. One additional site has been identified in Galashiels for business and industrial purposes at Winston Road (BGALA006).	No action required.

		further at Galashiels and Stow to make the most of beneficial opportunities for the use of the Borders Railway and public transport towards the end of the plan period. (294)		
Growing our economy: Question 3	General – Selkirk	<p>Selkirk and District Community Council suggests there is sufficient short-term capacity within its area, especially if derelict and brownfield sites are able to be 'unlocked' and properly developed. However, the approval of a defined line for a bypass would provide additional (future) capacity with a unique opportunity for both residential and employment growth.</p> <p>Derelict and brownfield sites should provide redevelopment opportunities but there are clear dangers in privately owned land being left to visually decay and blight the local community. This stultifies growth and undermines the positive benefits of recent regeneration projects and investment into Selkirk (and other regeneration areas in the Borders)</p> <p>Current blighted sites include:</p> <ul style="list-style-type: none"> • former St Mary's Church site adjacent to A7 (suggest a design brief be prepared which retains the long outward view from the Market Place – as a community preference) • former Baptist church site (the Valley) • former Burgh School site - Chapel Street • former fish farm site (Philiphough Mill) - suggest a detailed brief be prepared • residual buildings/ sites (former Mill premises) in the Riverside area. (305) 	<p>Comments noted. The road capacity within the centre of the town poses particular difficulties for traffic movement and parking. The line of the proposed Selkirk bypass is protected by Policy IS4 – Transport Development and Infrastructure. This would provide the opportunity to further improve the town centre environment, enhance road linkages within the Central Borders and speed up journey times from Hawick northwards. Whilst the bypass is safeguarded, there is currently no Scottish Government commitment and further studies would be required to identify the exact line and establish community and environmental impacts. If the bypass is built in the future, there are areas adjacent to it which could be identified for potential longer term development.</p> <p>The plan identifies four sites for redevelopment in Selkirk, these include the former St Mary's Church site and the site at Chapel Street. The former fish farm site is proposed for residential development (ASELK040) and part of the Riverside area (Forest Mill) is</p>	No action required.

			identified for redevelopment. There are policies within the LDP which promote the redevelopment of brownfield sites.	
Growing our economy: Question 3	General	The contributor is of the view that if there are opportunities to develop new business, of a size and scale to suit, in farms and rural communities that are outwith the zoned industrial land this should be encouraged with the aim of bringing or securing employment in rural areas. (315)	Whilst the outcome and any consequent impacts of Brexit remain uncertain, it is be likely there will be changes to the rural economy and land uses. This may include the need for more farm diversification proposals and likely significant pressures for forestry planting. Consequently, within the decision making process Policy ED7 of the LDP gives more weight to any economic development benefits for new business, leisure and tourism developments in the countryside.	No action required.

QUESTION 4

Do you have any suggestions for a potential area of land to be allocated in the vicinity of Town Yetholm, Lauder and Kelso for business use, and if so where?

QUESTION 4

Do you have any suggestions for a potential area of land to be allocated in the vicinity of Town Yetholm, Lauder and Kelso for business use, and if so where?

Main Issue	Sub Issue	Summary of Main Issues Raised	Proposed Response to Main Issues Raised	Recommendation
Growing our economy: Question 4	General	Contributor does not suggest any sites as there are no transport links in these areas. These areas are used for farming. (27)	Comments noted. It is considered that these locations do have satisfactory transport links and following liaison with the Council's Economic Development Section, it has been established that there are demands for business/industrial land within these locations.	No action required.
Growing our economy: Question 4	Kelso	The contributors advise that any additional land for business use would be best located south of Kelso adjoining the industrial estate at Pinnaclehill Park. (174, 288, 289)	Comments noted and agreed. Having considered consultation responses received to the Main Issues Report and following liaison with the Economic Development Section, the Council proposes a High Amenity/Business and Industrial site to the south of Pinnaclehill (BKELS006).	Comments noted and agreed. It is recommended that the Council agrees to allocate site BKELS006 as a high amenity business site and business and industrial site.
Growing our economy: Question 4	Background / General - Lauder	The contributor states that paragraph 4.7 of the MIR refers to "a broad area of search to the west of the settlement" in reference to allocating land for business use in Lauder. At present the potential area encompassed by this broad area of search is not explicitly set out. The contributor's comments are therefore general and based on natural heritage assets that they are aware of in the general area west of Lauder. The Lauder Burn forms part of the River Tweed Special Area of Conservation (SAC). The broad area of search should be included in the Habitats Regulations Appraisal of the LDP and an appropriate caveat	Comments noted. Following further discussions with the Council's Economic Development section, it has been agreed that no further business and industrial land is required in Lauder within the period of this Plan. This will be reviewed during the process of the next Local Development Plan.	No action required.

		should be included for all allocations in this area to ensure that project level Habitats Regulations Appraisal is carried out if required. (213)		
Growing our economy: Question 4	Kelso / Town Yetholm	The contributor states that in the case of Town Yetholm, natural heritage assets include the River Tweed SAC and the Cheviot Foothills Special Landscape Area. The Pennine Way and St Cuthbert's Way long distance footpaths are also present to the east of the settlement. There are a number of designations around Kelso, including the River Tweed SAC and the Tweed Lowlands Special Landscape Area. The MIR does not set out where in Kelso or Town Yetholm that land may be allocated. (213)	Comments noted. Following the consultation period of the Main Issues Report, the Council has established a suitable site for the purposes of business/industrial use on land to the north west of Deanfield Place in Town Yetholm (BYETH001). Scottish Natural Heritage have been consulted through this process and have raised no objections to the proposed allocation.	It is recommended that the Council agrees to allocate site (BYETH001) as a high amenity business site and business and industrial site on land to the north west of Deanfield Place in Town Yetholm.
Growing our economy: Question 4	General	The contributor notes that you cannot just build business units without having a vision of what you want to put there. If you have lots of desperate businesses, you won't attract the ancillary services. As it is logistically difficult to manufacture there you would be better off trying to attract either small manufacturing, electronics and AI for example or some sort of services businesses. (203)	Comments noted. The sites allocated have been informed by input from the Council's Economic Development team who deal with enquiries from businesses on a regular basis and therefore have a grasp of demand in the area. Some business units would be built to the requirements of the end user.	No action required.
Growing our economy: Question 4	General	Scottish Natural Heritage (SNH) would advise that any allocation is informed by relevant environmental assessment and that once a preferred site is identified that a design led approach is adopted to the necessary site layout issues, sustainable transport and landscape design/placemaking issues. SNH would be happy to provide further advice on these matters when more detail on location(s) is available. (213)	Comments noted. All allocations are subject to the Strategic Environmental Assessment (SEA). Furthermore, site requirements stipulate any issues which require to be considered through any planning application. Furthermore, planning briefs are required where it is considered justified and beneficial. The Council will be happy to consult SNH on any relevant planning briefs.	No action required.

<p>Growing our economy: Question 4</p>	<p>General</p>	<p>The contributor is of the view that it would make sense to allocate land for business use in areas already containing businesses. (232)</p>	<p>Comments noted. Sites proposed for business and industrial use within the Proposed Plan are generally located within settlements where other businesses exist and where population and potential workforce are generally greater. However there remains a requirement to allocate some business use allocations in rural areas where a demand is identified.</p>	<p>No action required.</p>
<p>Growing our economy: Question 4</p>	<p>General</p>	<p>The contributor believes that it should be looked at more sensibly and sensitively and that it should include local people more effectively. (297)</p>	<p>The Council undertakes wide public consultation through the process of the preparation of the Local Development Plan and it is considered that there are opportunities for local people to engage in the process as various stages. The Council's Economic Development Section receive requests from parties seeking business land and premises and this helps gauge where new site allocations should be sought.</p>	<p>No action required.</p>

QUESTION 5

Have you any suggestions as to how allocated business and industrial land can be delivered more effectively?

QUESTION 5

Have you any suggestions as to how allocated business and industrial land can be delivered more effectively?

Main Issue	Sub Issue	Summary of Main Issues Raised	Proposed Response to Main Issues Raised	Recommendation
Growing our economy: Question 5	Galashiels	SBC is currently marketing the former yard in the centre of Galashiels at £1m. Why not clean up this polluted site and offer it for commercial use? (23)	The Local Development Plan 2016 identifies this site for redevelopment. A Planning Brief for the site notes that it would be suitable for a mixture of uses including office, hotel, retail, leisure, residential and non-residential institution. The site contains contamination from historical land uses and this would require to be surveyed at the development stage.	No action required.
Growing our economy: Question 5	General	Creating/promoting attractive environments with access to facilities (such as being able to get something to eat at lunch/break times, and somewhere to relax during these times). (24)	Comment noted and agreed. The Proposed Plan proposes amendments to Policy ED1: Protection of Business and Industrial Land whereby a more flexible approach is adopted in order to allow a range of uses within allocated sites, where these uses compliment the business/industrial site.	It is recommended the Council agrees to amend Policy ED1: Protection of Business and Industrial Land whereby a more flexible approach is adopted.
Growing our economy: Question 5	General – Galashiels / Selkirk / Hawick	The contributor considers that the industrial areas of Galashiels, Selkirk and Hawick should be expanded. (27)	It is difficult to provide further allocations within Galashiels and Stow due to a variety of constraints. One additional site has been identified in Galashiels for business and industrial purposes at Winston Road (BGALA006). There is an extensive area of business and industrial land at Selkirk Riverside. The Council is proposing the	It is recommended that the Council agrees to allocate land at Winston Road, Galashiels (BGALA006) for business and industrial purposes. Furthermore, it is recommended that

			allocation of a large high amenity business site at Burnfoot in Hawick (BHAWI004) as well as a business and industrial site at Gala Law II (BHAWI003). These are over and above existing allocations at Burnfoot (BHAWI001) and Gala Law (zEL60 and BHAWI002).	the Council agrees to allocate land to South of Burnhead (BHAWI004) and Gala Law II (BHAWI003) for business and industrial purposes.
Growing our economy: Question 5	General	The contributor suggests reducing rates in high streets to encourage more businesses to take up units. (147)	Comment noted. This is outwith the remit of planning control.	No action required.
Growing our economy: Question 5	General	The contributor would welcome requests from potential businesses. Land should be allocated appropriately if there are suitable sites depending upon demand. (151)	The Council's Economic Development section is engaged in the process of identifying sites and considering policies. Economic Development are engaged with potential users of business/industrial sites on a regular basis. The Plans and Research team undertake a Business and Industrial Land Audit annually. This monitors the take-up of sites and supply and enables the team to establish areas of demand.	No action required.
Growing our economy: Question 5	General	The contributor suggests cooperation between the Council, the proposed South of Scotland economic development agency, site owners, developers and potential investors. (166)	The Council's Economic Development section is engaged in the process of identifying sites and considering policies. The Council, including the Plans and Research Team, are happy to meet with any interested parties regarding the development of business land.	No action required.
Growing our economy: Question 5	General	The contributor suggests that units are prebuilt to make it easier for small businesses to move into (168)	Comments noted. This is often the case. However, care must be taken to ensure there is sufficient demand.	No action required.
Growing our economy:	Hawick	The contributor considers that old and historic buildings should be used for business in Hawick	There are a number of sites allocated within the Proposed Plan	No action required.

Question 5		and that there should be a greater focus on Hawick. (190)	for redevelopment in Hawick. The Council encourages the redevelopment of brownfield sites for a variety of uses including housing, employment or retailing which will support the opportunity of bringing such land back into productive use and to enhance the surrounding environment.	
Growing our economy: Question 5	Background / General	<p>Scottish Land and Estates (SLE) note that there are already significant actions being taken to support delivery of more business and industrial development as highlighted from paragraphs 4.1 to 4.11 of the MIR. SLE particularly welcomes recognition of the need to enable farm diversification and that more weight should be given to economic development benefits within planning policy for new businesses, leisure and tourism developments in the countryside. SLE consider the use of SPZs as a means of establishing more sites for delivery should be encouraged and SLE hold similar expectations that the Borderlands Initiative and the South of Scotland Enterprise will help to unlock commercial development land which can often be held up by infrastructure restrictions, particularly in rural areas. It is SLE's view that the proposal for policy ED1 will provide greater flexibility which may assist in bringing forward more sites for business and industrial use. SLE considers that there could be a more sophisticated approach to developer contributions protocol upfront. By setting out clear policies which incentivise business/industrial development upfront greater certainty is provided for everyone involved in the process, resulting in an increased likelihood of sites coming forward. As an organisation, SLE supports greater</p>	Comments and support noted. Developer contributions are requested where considered necessary and reasonable.	No action required.

		<p>collaborative working between public and private sectors to pool resources and deliver sites. Partners could pool land holdings, take shares in accordance with their share of land, borrow to finance the necessary infrastructure, and sell the land back to the shareholding members in pre-agreed proportions and locations at a value that would also take account of remaining obligations to be placed on developers. This would enable the funding debt to be repaid but leave landowners with incentives to carry out development in the plan. This approach shares development and financial risks for local authorities and landowners while helping to secure funding for infrastructure. SLE would like to see greater priority given to mixed-use development in housing allocations, for example, where one or two appropriate commercial units can be included as part of a wider housing development. This would help deliver much needed land for commercial use and amenity within new housing developments. (195)</p>		
Growing our economy: Question 5	General	<p>The contributor notes that if there is land adjacent to current usage e.g. industrial estates, or areas which are specialist in nature e.g. the craft cottages at Abbotsford - then surely that should be investigated. Tourism sites could host a small number of related industries or retail outlets in relevant places which could be beneficial to the attraction and minimise the visual downsides of industrial parks dotting the countryside whilst answering the need for economic development. Much of the land designated for industrial (and housing) development is agricultural. Is there scope for additional economic opportunities allied to existing farming development? (197)</p>	<p>Comments noted. Whilst the outcome and any consequent impacts of Brexit remain uncertain, it is likely there will be changes to the rural economy and land uses. This may include the need for more farm diversification proposals and likely significant pressures for forestry planting. Consequently, within the decision making process Policy ED7 of the LDP gives more weight to any economic development benefits for new business, leisure and tourism developments in the countryside. Such proposals can be supported</p>	No action required.

			without them being formally allocated in the LDP.	
Growing our economy: Question 5	General	Compulsory purchase – but this would need to be initiated by a relevant Economic Development body such as South of Scotland Enterprise who would then need to access Council compulsory purchase powers. (206)	Comments noted and agreed. Compulsory Purchase Orders are an option and have been used in some instances in the past.	No action required.
Growing our economy: Question 5	General - Hawick	The contributor considers that brownfield sites should be a priority for business and industrial development (251) . Rejuvenating many of the derelict buildings in Hawick should be made a priority, to improve the appearance and attractiveness of Hawick for both locals and tourists. Business and industrial land should not be situated at the town entrance as it reduces the town's attractiveness, and Hawick at present is working very hard to improve its attractiveness to visitors to increase tourism. This is something which is distinctly lacking in Hawick at present. Particularly in Hawick, there is a need to develop vacant and derelict land to enhance the attractiveness of Hawick centre, where the A7 runs through. Care should be taken to prevent historic sites from being affected. (212)	There are a number of sites allocated within the Proposed Plan for redevelopment. The Council encourages the redevelopment of brownfield sites for a variety of uses including housing, employment or retailing which will support the opportunity of bringing such land back into productive use and to enhance the surrounding environment. The Proposed Plan takes forward a new high amenity business site on land to the south of Burnhead (BHAWI004). Hawick has received recent positive economic investment and these projects will contribute to the overall regeneration of the town. The majority of the business and industrial allocations in Hawick are located on the approach into the town from the north. There are means however in ensuring development is appropriately sited, designed and landscaped to ensure there is no detrimental impact upon the character of the area/historic sites.	No action required.
Growing our economy:	General	Scottish Natural Heritage (SNH) highlight that the delivery of sites is complex and many aspects are	Comments noted. SBC will continue to consult SNH on	No action required.

Question 5		outwith their remit. SHN would however suggest that focussing effort and site design for business and industrial land on the unique natural assets of the Scottish Borders should be seen as part of the solution for effective delivery. Building brand identity and reflecting local sense of place, views and landscape character in well-designed business sites can speed up effective delivery for example. SNH are aware of various projects or initiatives that could feed into this thinking, including colour strategies for business / industrial buildings to both give projects unique identity and competitive advantage but also to reflect local landscape character. (213)	proposals when required.	
Growing our economy: Question 5	General	The contributor believes the Council must monitor requests for existing land effectively to ensure these are not being protected for other uses. (214)	The Plans and Research team undertake a Business and Industrial Land Audit annually. This monitors the take-up of sites and supply and enables the team to establish areas of demand. Consequently LDP Policy ED1 ensures appropriate uses within sites.	No action required.
Growing our economy: Question 5	General	The contributor notes that it is one thing allocating business and industrial land. However, if the development of this land is not viable, then SBC / Scottish Enterprise Borders / Business Gateway Scottish Borders need to intervene / assist. Developers and investors will only commit capital where they can see a sensible economic return. Subsidies, rental guarantees and grants should be considered in the usual way. (216)	Comments noted. These are matters which are considered by and dealt with by the bodies referred to.	No action required.
Growing our economy: Question 5	General	The contributor states "don't build houses everywhere". (222)	Scottish Planning Policy (SPP) requires Council's to identify a generous supply of land for housing within all housing market areas, across a range of tenures maintaining a 5 year supply of	No action required.

			effective housing at all times.	
Growing our economy: Question 5	General	The contributor notes with support from the Scottish Government. (230)	Comment noted.	No action required.
Growing our economy: Question 5	General	The contributor requires clarification on the use of the word 'delivered'. (231)	The question seeks thoughts on how business and industrial land can be provided/supplied/transferred more effectively including how funding can be sought.	No action required.
Growing our economy: Question 5	General	The Planning Bill has identified that the planning implementation on black and green infrastructure needs to be improved and that is a real challenge given the current set up. Sites for employment as opposed to mixed use needs to be backed up by resources and skills to address market failure. Planning as a facilitator. (236)	Comments noted. These comments are also relevant to the Economic Development team and the relevant agencies.	No action required.
Growing our economy: Question 5	General	The contributor suggests better local engagement. While the contributor really appreciates that the planning office are trying, and are stretched for resource, local advertising campaigns (fliers in supermarkets and local shops) and speaking to communities (churches, youth leaders, community leaders) is more likely to deliver suggestions of land that is supported by the community. (239)	Comments noted. Appendix 4 of the Proposed Plan details the publicity and consultation undertaken and Officers continue to be happy to discuss and consider suggested improvements to the consultation and engagement process.	No action required.
Growing our economy: Question 5	General	Industrial units should be on the edge of towns away from houses. (241)	Comment noted. The proximity of business and industrial land to residential properties is considered both during the process of the allocation of sites and planning applications.	No action required.
Growing our economy: Question 5	General	The contributor states that the Local Development Planning process should take into account the intention to create a Rural Economic Framework to mainstream rural development within the National Performance Framework, based on the	Whilst the outcome and any consequent impacts of Brexit remain uncertain, it is likely there will be changes to the rural economy and land uses. This may include the	It is recommended the Council agrees to amend Policy ED7: Business, Tourism and

		recommendations of the National Council of Rural Advisors. (https://www.gov.scot/publications/new-blueprint-scotlands-rural-economy-recommendations-scottish-ministers/). To achieve realistic growth in the rural economy may require a more sympathetic planning regime which can accommodate the digital and infrastructure needs and allow development including housing to happen, which is presently restricted by planning policy. (242)	need for more farm diversification proposals and likely significant pressures for forestry planting. Consequently, within the decision making process Policy ED7 of the LDP gives more weight to any economic development benefits for new business, leisure and tourism developments in the countryside. Policy ED7 can support rural developments on unallocated sites.	Leisure Development in the Countryside whereby more weight is given to the consideration of the economic benefits of any relevant planning application.
Growing our economy: Question 5	General – Galashiels / Hawick	An improved road and rail network within the Central Borders would help attract businesses to the parts of the region in need (e.g. Galashiels, Hawick). (261)	Comments noted. There is a focus on maximising economic development opportunities along the railway corridor. This is set out in the Borders Railway 'Maximising the Impact: A Blueprint for the Future' (November 2014). All potential development site options give consideration to accessibility.	No action required.
Growing our economy: Question 5	General	Where planning is granted for a change of use from a business class to residential there should be a requirement for further business land to be allocated for potential development otherwise more and more work will move out of the Borders. (277)	The Council must make a judgement as to whether or not the loss of business/industrial land is acceptable at that location. The Council carries out an annual Employment Land Audit to monitor business land need and allocates land in the LDP accordingly. It would be unreasonable to expect a developer to provide business/industrial land elsewhere given likely ownership constraints.	No action required.
Growing our economy: Question 5	General	The contributor believes the Council should consult with potential users. (280)	The Council's Economic Development section is engaged in the process of identifying sites and considering policies. Economic Development are engaged with	No action required.

			potential users of business/industrial sites on a regular basis.	
Growing our economy: Question 5	General	The contributor recommends that the Use Class restriction is reduced. (283)	Comment noted. The Proposed Plan proposes amendments to Policy ED1: Protection of Business and Industrial Land whereby a more flexible approach is adopted in order to allow a range of uses within allocated sites, where these uses compliment the business/industrial site.	It is recommended the Council agrees to amend Policy ED1: Protection of Business and Industrial Land whereby a more flexible approach is adopted.
Growing our economy: Question 5	General	The contributor advises that the process should be as simple and straightforward as possible. (288)	Comments noted.	No action required.
Growing our economy: Question 5	General	The contributor believes that the Strategic Development Plan is the correct vehicle, over time. (290)	Comments noted.	No action required.
Growing our economy: Question 5	General	The contributor believes that allowing redundant industrial sites for housing should be stopped. (292)	Comments noted. Any proposals for housing on business and industrial would be assessed against Policy ED1: Protection of Business and Industrial Land which requires a number of criterion to be met.	No action required.
Growing our economy: Question 5	General	With the proliferation of online business delivering goods and services, high quality and cost effective warehousing would seem a logical asset to acquire. Communications across the Borders are good with access to airports, road and rail links. Warehousing is required and land is at a premium further south. (295)	Comments noted. Policy ED1: Protection of Business and Industrial Land seeks to ensure that adequate supplies of business and industrial land are retained for business and industrial use. There are a number of business and industrial sites allocated within the Plan which permit Use Classes 4, 5 and 6 (storage and distribution).	No action required.
Growing our economy:	General	Local knowledge and local business directories should be utilised more effectively alongside more	Comments noted. The Economic Development team of the Council	No action required.

Question 5		consultation with the populations. (297)	monitor interest from local businesses. Appendix 4 of the Proposed Plan details the publicity and consultation undertaken.	
Growing our economy: Question 5	General – Selkirk	The Selkirk and District Community Council state that with regard to Selkirk, the establishment of an A7 by-pass route to the south east of the town would define an area for future town expansion and would allow both residential and employment opportunities. This would benefit both the town and Central Borders and help provide a wider environmental choice for growth and improved communication/access. (305)	Comments noted. The line of the proposed Selkirk bypass is protected by Policy IS4 – Transport Development and Infrastructure. This would provide the opportunity to further improve the town centre environment, enhance road linkages within the Central Borders and speed up journey times from Hawick northwards. Whilst the bypass is safeguarded, there is currently no Scottish Government commitment and further studies would be required to identify the exact line and establish community and environmental impacts. If the bypass is built in the future, there are areas adjacent to it which could be identified for potential longer term development. This is highlighted within the settlement profile for Selkirk within Volume 2 of the Proposed Plan.	No action required.
Growing our economy: Question 5	General	Infrastructure is paramount to encourage business development. Fast broadband for rural areas, good roads connecting to Edinburgh, Newcastle and Carlisle combined with a skilled workforce, reasonable rents and rates will encourage start-up companies and encourage inward investment. (315)	Comments noted and agreed.	No action required.
Growing our economy: Question 5	General	Planning Officers must ensure that when sites are allocated in the LDP2 that they are given their proper designation to preserve and enhance land	Comments noted and agreed.	No action required.

		that is currently occupied and available for employment use. (318)		
--	--	---	--	--

QUESTION 6

Do you agree with the preferred options for the provision of additional business and industrial land/ mixed use land in the LDP2? Do you agree with the alternative option for mixed use land? Or do you have other alternative options?

QUESTION 6

Do you agree with the preferred options for the provision of additional business and industrial land/ mixed use land in the LDP2? Do you agree with the alternative option for mixed use land? Or do you have other alternative options?

Main Issue	Sub Issue	Summary of Main Issues Raised	Proposed Response to Main Issues Raised	Recommendation
Duns	MDUNS005, South of Earlsmeadow, Phase 1	<p>SEPA state that there appears to be a marshy area in the northern corner of the site which may be drained to culverts under the site. Any such culverts should be removed as part of any development. Confirmation should be made that this is not a Groundwater Dependant Terrestrial Ecosystem. It is therefore recommended that a site requirement is attached requiring a feasibility study including a flood risk assessment to be undertaken prior to development to assess the potential for channel restoration.</p> <p>SEPA require an FRA which assesses the risk from the potentially culverted small watercourse which is identified as being located along the northern boundary. Recent studies have not identified the exact location of the culvert. We do not support development over culverts that are to remain active. We would note that the OS Map identifies this area as boggy which may constrain development. We also understand that land-raising done as part of the high school development may alter flooding and flow-paths. Review of the surface water 1 in 200 year flood map indicates that there may be flooding issues at this site or immediately adjacent. This should be investigated further and it is recommended that contact is made with the flood prevention officer.</p> <p>SEPA advise that there is a potential surface</p>	<p>Comments noted.</p> <p>The site was included within the MIR as an alternative option for mixed use development. However, the site has ultimately not been included within the Proposed LDP.</p> <p>It is noted that SEPA have requested that a feasibility study including a FRA is undertaken prior to development to assess the potential for channel restoration and the risk from the small watercourse. Although (MDUNS005) will not be taken forward, it forms part of the longer term site (SDUNS001) within the current LDP. (SDUNS001) will be retained for longer term mixed use development. It is therefore recommended that the site requirement for (SDUNS001) is updated to reflect the most up to date advice from SEPA, in respect of the potential for channel restoration and risk from the small watercourse.</p> <p>The comments in respect of foul drainage are noted. It is noted that</p>	<p>It is recommended that the Council agree not to allocate the site MDUNS005 within the Proposed LDP.</p> <p>It is recommended that the Council agree to update the existing site requirement attached to SDUNS001, to read; <i>'A feasibility study, including a Flood Risk Assessment will be required to assess the potential for channel restoration and the risk from the small watercourse, including mitigation where necessary'</i> and include reference to foul water disposal and SEPA permissions</p>

		<p>water hazard.</p> <p>Foul water must connect to the existing Scottish Water foul network however for a development of this scale it is likely that the foul network and STW will require upgrading. Scottish Water should confirm this. Depending on the use of the proposed units there may be a requirement for permissions to be sought for certain activities from SEPA. (119)</p>	<p>SEPA state foul water must connect to the existing Scottish Water foul network. Therefore, it is recommended that reference is made to foul water disposal within the introductory text to Volume 2 of the Proposed LDP. It is considered that the above satisfactorily addresses the comments raised by SEPA.</p> <p>Comments are noted in respect of any permissions which may be sought from SEPA.</p>	<p>within the introductory text to Volume 2 of the Proposed LDP.</p>
Duns	MDUNS005, South of Earlsmeadow, Phase 1	<p>The contributor states that the site is far too big a suggested development. (197)</p>	<p>Comments noted. The site in question is a longer term site and would be developed in phases.</p>	<p>It is recommended that the Council agree not to allocate the site MDUNS005 within the Proposed LDP.</p>
Greenlaw	BGREE005, Land South of Edinburgh Road	<p>SEPA advise that there is a potential surface water hazard on this site.</p> <p>SEPA advise that due to the steepness of the adjacent hill slopes, they recommend that consideration is given to surface water runoff to ensure the site is not at risk of flooding and nearby development and infrastructure are not at increased risk of flooding.</p> <p>SEPA advise that foul drainage from the site must be connected to the existing public foul sewer. Depending on the use of the proposed units, there may be a requirement for permissions to be</p>	<p>Comments noted.</p> <p>The site is currently allocated for mixed use development within the adopted LDP (MGREE001). The site (BGREE005) was included within the MIR as a preferred option for business & industrial development and has been included within the Proposed LDP.</p> <p>SEPA and Scottish Water were previously consulted at the 'Pre MIR' stage and their advice has been taken on board and</p>	<p>It is recommended that the Council agree to allocate the site BGREE005 within the Proposed LDP and include reference to foul water disposal and SEPA permissions within the introductory text to Volume 2 of the Proposed LDP.</p>

		sought for certain activities from SEPA. (119)	<p>incorporated within the following site requirements;</p> <ul style="list-style-type: none"> - <i>'Consideration must be given to surface water runoff and any flood risk'</i>; and - <i>'Early engagement with Scottish Water to ascertain whether a Drainage Impact Assessment and Water Impact Assessment are required, in respect of WWTW and WTW'</i>. <p>The comments in respect of foul drainage are noted. It is noted that SEPA state foul water must connect to the existing Scottish Water foul network. Therefore, it is recommended that reference is made to foul water disposal within the introductory text to Volume 2 of the Proposed LDP. It is considered that the above satisfactorily addresses the comments raised by SEPA.</p> <p>Comments are noted in respect of any permissions which may be sought from SEPA.</p>	
Greenlaw	BGREE005, Land South of Edinburgh Road	The contributor states that they are suspicious where no indication of site capacity given. (197)	Comments noted. The site (BGREE005) was included within the MIR as a preferred option for business & industrial development. There is no site capacity, given that there is no housing element proposed.	No action required.

<p>Westruther</p>	<p>BWESR001, Land South West of Mansefield House</p>	<p>SEPA state that there appears to be a drain partially culverted running along the northern boundary of the site. This should be protected and de-culverted if possible. It is therefore recommended that a site requirement is attached requiring a feasibility study including a flood risk assessment to be undertaken prior to development to assess the potential for channel restoration.</p> <p>SEPA require an FRA which assesses the risk from the small watercourse adjacent to the site. Site is relatively flat and hydrology would appear complicated at site. Consideration should be given to bridge and culvert structures which may exacerbate flood risk. Review of the surface water 1 in 200 year flood map indicates that there may be flooding issues within this site. This should be investigated further and it is recommended that contact is made with the flood prevention officer.</p> <p>There is a surface water hazard identified.</p> <p>Foul water must connect to the existing SW foul network. There appears to be a drain partially culverted running along the northern boundary of the site. This should be protected and de-culverted if possible. Depending on the use of the proposed units there may be a requirement for permissions to be sought for certain activities from SEPA. (119)</p>	<p>Comments noted. The site was included within the MIR as a preferred option for business & industrial development and is included within the Proposed LDP.</p> <p>SEPA were previously consulted at the 'Pre MIR' stage and their advice was taken on board and incorporated within the site requirements. Within the MIR, the following site requirement was attached in respect of flood risk; <i>'Flood Risk Assessment required to assess the risk from the small watercourse which is adjacent to the site'</i>.</p> <p>It is noted that SEPA have requested that a feasibility study including a FRA is undertaken, prior to development to assess the potential for channel restoration. It is therefore recommended that the existing site requirement is updated to reflect their advice.</p> <p>In respect of foul water comments, SEPA and Scottish Water were previously consulted at the 'Pre MIR' stage and their advice was taken on board and incorporated within the site requirements. Within the MIR, the following site requirement was attached in respect of the WWTW and WTW, <i>'Early engagement with Scottish Water, in</i></p>	<p>It is recommended that the Council agree to include the site BWESR001 within the Proposed LDP and include reference to foul water disposal and SEPA permissions within the introductory text to Volume 2 of the Proposed LDP.</p> <p>It is recommended that the Council agree to update the proposed site requirement to read as follows; <i>'A feasibility study, including a Flood Risk Assessment will be required to assess the potential for channel restoration and the risk from the small watercourse which is adjacent to the site'</i>.</p>
-------------------	--	--	---	--

			<p><i>respect of the WWTW and WTW</i>. It is noted that SEPA state foul water must connect to the existing Scottish Water foul network. Therefore, it is recommended that reference is made to foul water disposal within the introductory text to Volume 2 of the Proposed LDP. It is considered that the above satisfactorily addresses the comments raised by SEPA.</p> <p>Comments are noted in respect of any permissions which may be sought from SEPA.</p>	
--	--	--	---	--

QUESTION 6

Do you agree with the preferred options for the provision of additional business and industrial land/ mixed use land in the LDP2? Do you agree with the alternative option for mixed use land? Or do you have other alternative options?

Main Issue	Sub Issue	Summary of Main Issues Raised	Proposed Response to Main Issues Raised	Recommendation
Growing our economy: Question 6	MINNE003 Land West of Innerleithen	<p>The contributor objects to the inclusion of MINNE003 as a preferred mixed use site. (17, 67, 119, 162, 183, 206, 213, 225, 275)</p> <p>The contributor states that part of the site has been previously rejected for inclusion in the current Local Plan on the grounds that the site was inappropriate for major development. (67)</p> <p>The contributor feels that development of the site will have a detrimental impact on existing neighbouring residential streets. (275)</p> <p>The contributor highlights the Health & Safety concern regarding traffic flows through a quiet residential cul-de-sac at Tweed View onto the very busy A72 main arterial road, or through a quiet residential sector made up primarily of elderly residents within an affordable homes allocated area, onto Traquair Road. (67)</p> <p>The contributor states that additional traffic to the site due to mixed use allocation may cause an increase in traffic, noise and pollution, to the detriment of the existing community. (17)</p> <p>The contributor highlights that existing access to A72 from Tweed View is currently dangerous and sub-standard. An increase in traffic using this junction will make it even more. (67, 225, 275)</p>	<p>This response relates to all representation objections to site MINNE003.</p> <p>The Local Development Plan process is a constant process in that the Council is required to ensure a continual 5 year housing land supply and an up to date plan. Sites previously assessed as part of previous plans can come forward again as part of this process. Whilst development at this location has been discounted in the past, there was potential for the Health Centre to expand, which would have been supported by the Council. The inclusion of this site allows for the expansion of the health centre to take place.</p> <p>It should be noted that the Council are required to allocate sufficient land within the Central, Eastern and Western Strategic Development Areas. Scottish Planning Policy requires Local Development Plans to allocate a range of sites which are effective or expected to become effective in</p>	<p>It is recommended that the Council agree to allocate this site within the Proposed Local Development Plan.</p> <p>It is further recommended that the following site requirements are also added to the Plan in relation to site MINNE003:</p> <ul style="list-style-type: none"> • A Planning Brief in the form of Supplementary Planning Guidance to be produced for this site • A new vehicular access off the A72 Peebles Road will be required with connection to Angle Park • Pedestrian and

		<p>The contributor states that the existing narrow access cannot be made wider. (17)</p> <p>The contributor is concerned about the impact the allocation would have on the Health Centre. (17)</p> <p>The contributor raises concerns over the capacity of the existing Innerleithen health care centre and its ability to accommodate further patients as a result of this site allocation. (67, 225, 275)</p> <p>The contributor states that development of this site would have a detrimental impact on the views from the Health Centre. (67, 183)</p> <p>The contributor raises concerns about the impact development of the site may have on St Ronan's Primary School. (17, 225, 275)</p> <p>The contributor feels the proposal will breach the Scottish Government's "Designing Streets" guidelines as it would be mixing industrial and housing developments together. The contributor highlights how "Designing Streets" talks about the need for connectivity and safer layouts with an emphasis on visual quality. (67)</p> <p>The contributor strongly opposes the designation of mixed use without there being a change to the powers of the planning authority to force the inclusion of business developments. Housing developers are in practice not interested in this use of land and seem to go to a lot of trouble to work round the requirements. The contributor suggests the proposed site could be a very attractive site for just housing due to its south</p>	<p>the plan period to meet the housing land requirement of the strategic development plan up to year 10 from the expected year of adoption. They should provide for a minimum of 5 years effective land supply at all times. Failure to meet this requirement would result in a failure to provide a plan-led system. In the consideration of any site for inclusion in the Local Development Plan, a full site assessment is carried out and the views various internal and external consultees (such as Roads Planning, Education, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that assessment. In doing this a rigorous site assessment process is used to identify the best sites possible.</p> <p>Part of this site has been previously considered during the Local Plan Amendment process for housing – AINNE001. However it was not allocated due the fact that Innerleithen at that time had a number of housing sites allocated within the Plan which had not seen development commence, and other more suitable sites were identified in the Plan.</p> <p>In response to concern over time lapse of existing allocations not being developed, this site has been</p>	<p>cycle connectivity with Tweed View, Health Centre and the Multi Use Path will be required</p> <ul style="list-style-type: none"> • This is a mixed use site which will incorporate a mixture of uses including housing and employment. This will be established in more detail with a Planning Brief. A minimum of 1ha of high amenity business land to be provided in line with Policy ED1: Protection of Business and Industrial Land which may include Class 6 (Storage or distribution) uses
--	--	--	--	--

	<p>facing outlook and doubts it is appropriate for business. However there is a need for business sites in Innerleithen. (206)</p> <p>The contributor states they are not against sensible, sustainable and organic development based on proven need, however there is no evidence that there is need for new industry, housing and jobs in the Innerleithen area. (67)</p> <p>The contributor states there is no identified need for new housing in Innerleithen. (183, 225)</p> <p>The contributor suggests there are many gap sites in the area that should be filled before major development is undertaken. (275)</p> <p>The contributor states the proposed site is effectively the last bit of green space in the town that is on the level and easily accessible to all for walking. (17)</p> <p>The contributor fears the proposal will result in the loss of valued greenspace used by community for events throughout the year. (17, 67, 162)</p> <p>The contributor notes that rather than developing the entire field, any development should be kept small and in line, west of Tweed View and not in front of it. (67)</p> <p>The contributor states that the proposal will adversely affect the environment by increasing the number of boilers and volume of exhaust fumes from the additional vehicles the development will bring, which contradicts environmental policy for sustainability and traffic policy for efficient road</p>	<p>allocated as mixed use with the opportunity for much needed business land to come forward.</p> <p>Any issues raised relating to loss of privacy and protection of residential amenity and noise will be dealt with at planning application stage, with reference to policy HD3.</p> <p>In relation to comments regarding roads and access the Roads Planning section have been consulted and have stated that they can support this site: <i>"I have no objections to the allocation of this site for mixed use. There is ample opportunity for the easterly portion of the site to be well integrated with and connected to the surrounding street network i.e. Tweed View, St Ronan's Health Centre and Angle Park. The close proximity of the multi-use path to the south of the site offers a great opportunity to provide a pedestrian/cycle link to the site. I would not necessarily rule out direct access from the A72 into the site, however this would need to be carefully designed to ensure the appropriate gradients and visibility splays can be achieved. A strong street frontage would help have a positive impact on driver behaviour along this section of the A72. A Transport Assessment, or at least a</i></p>	
--	---	--	--

	<p>use. We need to encourage less travel for commutes not encourage more. (67)</p> <p>The contributor raises concerns as to whether the sewage system has capacity to cope with increased population. (225)</p> <p>The contributor states Innerleithen doesn't have a sewage works and so all this new effluent will have to be transported. Any upgrade to the system will cause major disruption to existing infrastructure. (67)</p> <p>The contributor notes the proposed site has been subject to flooding in previous years. (67, 225)</p> <p>The contributor states that there may be flooding issues within the site. Surface water runoff from the nearby hills may be an issue and may require mitigation measures during design stage. (119)</p> <p>The contributor notes that if the water table from the River Tweed were to rise further in the future it could impact any potential development on the site. Large-scale development on the narrow stretch of water could result in effluent or other chemical waste accidentally entering the river ecosystem. (67)</p> <p>The contributor highlights that site encompasses an historic Roman site which is of great significance to the area. (162, 183)</p> <p>The contributor states that the site is adjacent to the Tweed Valley Railway Path, a huge local asset with its scenic views and attraction to path users. Wider scenic views to the hills beyond will</p>	<p><i>Transport Statement, will be a prerequisite for development on this site to address matters of accessibility and sustainable transport."</i></p> <p>The Council have consulted with the NHS throughout the Local Development Plan process and will continue to do so. This then allows for them to plan according to their needs and demands. NHS Borders have stated that they will continue to engage with SBC colleagues to provide primary care and public health input to the wider planning process including the creation of the next Scottish Borders Council Local Development Plan early in its preparation cycle as part of a Health in All Policies approach.</p> <p>It should be noted that additional discussion has been carried out with the Education Officer who has stated that there is sufficient school capacity available to accommodate the new proposals contained within Proposed Local Development Plan.</p> <p>Comments relating to developers preferring to develop the site for housing, it should be noted that the MIR set out a number of site requirements that would be required to be met should that site come forward for development, these</p>	
--	---	--	--

		<p>lost forever should this site be developed when approaching Innerleithen from the west. (183)</p> <p>The contributor states that development on this site would be dominant in views towards the surrounding hills from the A72 both on arrival to and departure from Innerleithen. To minimise impacts on the attractive landscape setting of the village and the wider appreciation of the Tweed Valley Special Landscape Area, the contributor suggests part-allocation with the site boundary aligned to Tweed View to help reduce impacts by avoiding the introduction of development as a dominant element in open views. Key to reducing landscape impacts will be a high quality designed edge to any potential development, perhaps including tight co-ordination of building frontage, the consideration of views, avenue planting and a multi-user path set back from the road edge. Any proposed allocation of this site should secure links through the proposed site to connect with the Innerleithen-Peebles path. (213)</p>	<p>included a requirement for a Masterplan.</p> <p>It should be noted that the site is currently in agricultural use for grazing. It is not considered that the site will impact negatively on the green network around Innerleithen. The site can offer the potential for greater access to the adjacent multi-use path. There are two formally allocated greenspaces within Innerleithen, of which this site is not one of those safeguarded.</p> <p>In respect to comments regarding the use of the site for community events, it should be noted that the landowner is supportive of seeing development take place on the site. In addition, it is considered feasible that there may be the potential for such community events to take place elsewhere within the settlement.</p> <p>The Council has a statutory duty to identify sites within the Local Development Plan to satisfy housing need and demand. As noted above, all proposed sites are subject to extensive consultation from a range of bodies and consideration must always be given to a range of policies including environmental and roads planning matters. The Local Development Plan does strike the</p>	
--	--	--	--	--

			<p>challenging balance between satisfying housing land requirements, identifying sites and giving consideration and protection to the environment. In addition to Planning, it should be noted that all built development is required to meet the Building Standards Regulations, the purpose of which is to ensure buildings are safe, efficient and sustainable.</p> <p>Whilst access to sewage facilities may currently be an issue, upgrades can overcome that issue.</p> <p>SEPA have been consulted and have not objected to the allocation of the site however a Flood Risk Assessment would be required to assist in the design and layout of the proposed development.</p> <p>It is noted that an archaeology evaluation and associated mitigation would be required should the site be developed. Comments concerning archaeological presence on the extreme south east corner of this site have been noted and the Archaeology Officer who has no objections stated: <i>“The south-east corner of the area contains the known site of a formerly Scheduled Roman camp. This should be avoided for preservation in situ. The remainder of the site may contain</i></p>	
--	--	--	--	--

			<p><i>evidence for a Roman road. There is more generally archaeological potential given its topographic location. Evaluation will be required”.</i></p> <p>It is not considered that the entire site will be developed. The site requirements set out that landscape/structure planting will be required to assist in mitigating any visual impact of the site.</p> <p>It is noted that careful consideration will be required to achieve a scheme of structure planting that mitigates the visual impact of the development and assists in retaining existing views. This is an issue which would be dealt with at the planning application stage. It is noted that the Landscape Officer was consulted on this site, and had no objections, stated: <i>“The site is a large field to the south of A72 approaching Innerleithen from the west. The ground slopes steeply down from the A72 before levelling out in the south eastern part that borders the existing settlement boundary west of Buchan Place off Traquair Road. Careful consideration will be required to achieve a scheme of structure planting that mitigates the visual impact of the development when seen from the elevated A72 coming</i></p>	
--	--	--	--	--

			<p><i>into Innerleithen from the west, while maintaining views southward across the Tweed valley”.</i></p> <p>In light of the consultation responses received during the Main Issues Report public consultation and following further consideration the matter, it is recommended that site MINNE003 Land West of Innerleithen is allocated for housing within the Proposed Local Development Plan.</p>	
<p>Growing our economy: Question 6</p>	<p>MINNE003 Land West of Innerleithen</p>	<p>The contributor supports the allocation of MINNE003 as a preferred mixed use option. (91, 118 (2 of 2), 133, 283)</p> <p>The contributor states Innerleithen is an increasingly popular place in which to live, mainly due to its countryside setting, combined with recreational opportunities and excellent public transport links to both Edinburgh and the central Borders. It is important that land allocations are made in sustainable and sought after locations. The location of the site would allow a natural extension to the Innerleithen development boundary. The contributor suggests the site is capable of achieving significantly in excess of 50 units, even allowing for low density housing at the settlement edge, open space and robust structure planting in order to minimise impact upon the Tweed Valley SLA. (91)</p> <p>The contributor feels the site is more than capable of accommodating up to 125 dwellings as well as an extension to the Health Centre and some provision for business units. Scottish Water’s</p>	<p>Support and comments noted.</p> <p>In light of the consultation responses received during the Main Issues Report public consultation and following further consideration the matter, it is recommended that site MINNE003 Land West of Innerleithen is allocated for housing within the Proposed Local Development Plan.</p>	<p>It is recommended that the Council agree to allocate this site within the Proposed Local Development Plan.</p> <p>It is further recommended that the following site requirements are also added to the Plan in relation to site MINNE003:</p> <ul style="list-style-type: none"> • A Planning Brief in the form of Supplementary Planning Guidance to be produced for this site • A new vehicular access off the

		<p>Walkerburn waste water treatment works are understood to have sufficient capacity as have the water treatment works. Allocation of the site will make a positive contribution towards meeting the housing land requirement within the next Local Development Plan for Tweeddale. There is evidence of developer and consumer demand within Innerleithen. The site is in a highly accessible and sustainable location and it is capable of being delivered within the 5 year Local Development Plan lifespan. Mitigation of landscape impact and containment can be achieved through the Masterplan process. The site represents a natural extension to the development boundary and is one which will be contained between the A72, the railway cycle route and existing development to the west of Traquair Road. (118 (2 of 2))</p>		<p>A72 Peebles Road will be required with connection to Angle Park</p> <ul style="list-style-type: none"> • Pedestrian and cycle connectivity with Tweed View, Health Centre and the Multi Use Path will be required • This is a mixed use site which will incorporate a mixture of uses including housing and employment. This will be established in more detail with a Planning Brief. A minimum of 1ha of high amenity business land to be provided in line with Policy ED1: Protection of Business and Industrial Land which may include Class 6 (Storage or distribution)
--	--	---	--	---

				uses
Growing our economy: Question 6	Potential new sites, Innerleithen	The respondent has submitted three potential sites for development within the Innerleithen area. These are sites at Tweedbank Farm, Caddonbank Pool and Howford Crossing and Old Airstrip. (67)	The Council is not aware that the respondent has discussed these sites with the landowners. The Council has asked the respondent to submit more detailed plans showing the site boundaries in order that these sites can be properly consulted upon. However this information has not been forthcoming and consequently these sites cannot be considered for inclusion within the Proposed Plan at this point in time.	No further action.

QUESTION 6

Do you agree with the preferred options for the provision of additional business and industrial land/ mixed use land in the LDP2? Do you agree with the alternative option for mixed use land? Or do you have other alternative options?

Main Issue	Sub Issue	Summary of Main Issues Raised	Proposed Response to Main Issues Raised	Recommendation
Growing our economy: Question 6	General / Galashiels	The contributor contends that SBC should be proactive in developing the site in its possession in Galashiels instead of trying to market it for maximum profit. Set an example of creative urban development rather than leave it to developers to come forward with proposals which have already done much to spoil the centre of Galashiels. (23)	Comments noted. The marketing of any site is not a material planning consideration. It is assumed that these comments relate to Huddersfield Street/Hill Street (also known as Burgh Yard) site in Galashiels which is allocated for redevelopment and is currently being marketed by the Council (zCR2). A Planning Brief has been produced for the site to guide developers as it is located on one of the key approaches into Galashiels and its strategic prominence necessitates a high quality design incorporating sustainable development principles that achieve an appropriate form of buildings and spaces as well as an appropriate quality of design commensurate with its strategic town centre location.	No action required.
Growing our economy: Question 6	Agree	The contributor agrees although it is unclear which option he agrees with. (25)	Comments noted.	No action required.
Growing our economy: Question 6	Disagree	The contributor disagrees although it is unclear which option he/she disagrees with. Highlights that farming is important in this area. (27)	Comments noted.	No action required.
Growing our economy:	General	The contributor considers that mixed land use may be best. (151)	Comments noted. The Council does in some instances allocate	No action required.

Question 6			sites for mixed use development where considered appropriate.	
Growing our economy: Question 6	General	The contributor welcomes any effort to bring sustainable business, and therefore employment, to rural areas, provided it does not unduly damage the environment and natural heritage. (152)	Comments noted. Proposals for business development within rural areas are assessed against Policy ED7: Business, Tourism and Leisure Development in the Countryside which respect the amenity and character of the surrounding area and complies with the requirements of Policy PMD2: Quality Standards which requires that all development is expected to be of high quality in accordance with sustainability principles, designed to fit with Scottish Borders townscapes and to integrate with its landscape surroundings.	No action required.
Growing our economy: Question 6	General	The contributor believes business and housing should be separate. (168)	Comments noted. In some instances, a mixed use development is appropriate to an area depending upon the type of uses that already exist. In cases where businesses and residential properties within close proximity to each other, care is required to ensure a conflict of uses does not arise.	No action required.
Growing our economy: Question 6	Agree with preferred option	The contributor agrees with the preferred options for the provision of additional business and industrial land/mixed use land in the LDP2. (171, 263, 274, 312)	Support for preferred options noted.	No action required.
Growing our economy: Question 6	General	The Woodland Trust Scotland's (WTS) main concern is the impact on ancient woodland and ancient and veteran trees. The Trust cannot agree with many of the instances where it is required that boundary features should be retained 'where	Comments noted. Any potential impact upon ancient woodland and ancient and veteran trees would be considered during the process of a formal planning application in	No action required.

		possible' because in some instances the Trust have identified ancient woodland, and also there could be ancient or veteran trees present around the site boundary; such features are irreplaceable and should be protected from adverse impacts of development. Scottish Planning Policy (SPP) states that ancient woodland and trees should be protected. The Trust suggest that the wording 'where possible' is replaced with 'where appropriate'. In instances where ancient woodland, and/or veteran or ancient trees have been identified these features must be retained and protected from adverse impacts of development. In all instances where additional planting is required, WTS would like to see planting with native tree species, appropriate to the site conditions, and sourced and grown in the UK. (199)	consultation with the Council's Landscape Architect. The Council notes the statements contained within this response. It is considered, however, that the wording of the existing policy is robust and appropriate and does not therefore consider that the proposed wording change is necessary.	
Growing our economy: Question 6	General	The contributor doesn't disagree massively and states that the job situation is dire in the Borders. (203)	Comments noted. As at August 2019, the unemployment rate in the Scottish Borders, as measured by the Claimant Count, remained at 2.6 %.	No action required.
Growing our economy: Question 6	General	The contributor strongly opposes the designation of mixed use land without there being a change to the powers of the Planning Authority to force the inclusion of business development. The track record in Tweeddale of SBC getting sensible and relevant business development on mixed use sites is poor. The housing developers are in practice not interested in this use of land and seem to go to a lot of trouble to work round the requirements. (206)	Comments noted. The Council is aware of the need for business land within the Tweeddale area moving forward and will be stringent in its requirements for an element of business land within any mixed use development, as appropriate.	No action required.
Growing our economy: Question 6	General	The contributor questions why all the preferred and alternative options for mixed use land actually have codicils stating 'site must accommodate an element of business land' as if the designated	Comments noted. The Council has stipulated this need within the site requirements for a number of the proposed mixed use sites as the site	No action required.

		<p>areas are otherwise anticipating blanket residential development? This seems disingenuous. Mixed use designation sites that realistically will be almost entirely housing create heavy loads on schools, surgeries and road occupancy. What assessments of business/industrial land have been made to support the site designations? The contributor notes that unlike town centre occupation rates, there are no statistics for existing business/industrial land vacancy rates across the Borders. (209)</p>	<p>is considered to offer the opportunity to meet an established need for business land in that particular area and a mixture of uses, incorporating a business element, is considered to be appropriate.</p> <p>This stipulation is the result of detailed consultation with the Council's Economic Development Section who monitor the demand for business land within the Scottish Borders and have an understanding of where business land is required.</p> <p>Mixed use developments offer a number of benefits. They can help to produce more vibrant, adaptable and pleasant environments and achieve sustainable places that minimise travel and support local demand for goods/services in a walkable catchment.</p>	
<p>Growing our economy: Question 6</p>	<p>General</p>	<p>Scottish Natural Heritage (SNH) note that without changes to some allocation boundaries, selection of alternatives and the delivery of development frameworks and briefs, it may be difficult to achieve the place-making and natural heritage objectives set out in the MIR. In this regard SNH strongly recommend that the Proposed Plan should adopt a clear format to address these matters and to demonstrate how it will address the policy principles for the planning system as set out in Scottish Planning Policy. Given the brevity of the site requirements provided in the MIR, SNH suggest that one role for the Proposed Plan will be to clearly set out what will be required of</p>	<p>Comments noted. Due to resource implications it is not unfortunately possible for the Council to prepare a Development Brief for all sites allocated within the Local Development Plan. It is considered the site requirements identify the main issues/constraints to be addressed. These are not exhaustive and other matters would be addressed at the planning application stage.</p>	<p>No action required.</p>

		developers to ensure that their proposals secure and build on the assets of their locations. This could be achieved by including site development briefs for each of the allocations. SNH's comments on the preferred and alternative sites set out what these requirements may include in terms of natural heritage interests. (213)		
Growing our economy: Question 6	General	The contributor considers that mixed use land will prevent over-industrialisation. (222)	Comments noted. Mixed use developments offer a number of benefits. They can help to produce more vibrant, adaptable and pleasant environments and achieve sustainable places that minimise travel and support local demand for goods/services in a walkable catchment.	No action required.
Growing our economy: Question 6	General	The contributor requires clarification on what 'additional business and industrial land/mixed use land' means? (231)	'Additional business and industrial land/mixed use land' means land allocations over and above those allocated within the existing Local Development Plan 2016.	No action required.
Growing our economy: Question 6	General	If there is to be mixed use development, the contributor would like to see some real creativity and thought as to the visual environment for people - please engage some creative landscape architects to transform green spaces and lift spirits here and think about community engagement and what environments people want to live within. (243)	Comments noted. The importance of the quality of the environment is acknowledged by the Council. Any Planning Briefs for individual sites involve public engagement.	No action required.
Growing our economy: Question 6	General	The present plan would suburbanise the area. (247)	There is a statutory requirement for the Council to allocate land for development within the Local Development Plan. The sites brought forward as options have been assessed in detail to ensure they would not have a detrimental	No action required.

			impact upon the character of the area.	
Growing our economy: Question 6	General	The contributor is of the view that the provision of mixed use development reflects the poorest option of all with it being the least attractive and economically effective in all cases and should not be progressed. (252)	Comments noted. Elaboration of these views would have been useful. The sites being taken forward for mixed use development are considered to be appropriate in terms of the local context and need.	No action required.
Growing our economy: Question 6	General	The contributor is of the view that mixed use development is sensible. (258)	Comments noted. Mixed use developments offer a number of benefits. They can help to produce more vibrant, adaptable and pleasant environments and achieve sustainable places that minimise travel and support local demand for goods/services in a walkable catchment.	No action required.
Growing our economy: Question 6	General	The contributor notes that the transport infrastructure needs to be in place if businesses are to be encouraged to move into the area. (283)	Comments noted.	No action required.
Growing our economy: Question 6	General	The contributor does not agree with the provision of additional business / industrial land by a proportion of mixed use / housing development land being made available for commercial use. Use of existing brownfield sites and the extension of existing industrial land must be the priority. There are few scenarios when land previously highlighted for housing should be suitable for industrial development. A possible alternative would be to consider more residential development in town centres to support their redevelopment and then reclassify housing land as commercial but don't feel that housing and commercial on the same site is a valid option. (289)	The development of brownfield land and the extension of existing industrial land is encouraged as much as possible in line with national guidance. However, due to various constraints, this is not always possible. The Council identifies a number of redevelopment sites in town centres with a view to encouraging their reuse, for a variety of uses including commercial, residential and industrial. Regeneration is a reoccurring key theme through Scottish Planning Policy.	No action required.
Growing our	BHAWI003	SEPA advise that the site has a potential surface	Comments noted. The site	The site

economy: Question 6	(Gala Law II) Hawick	water hazard and water environment considerations. (119)	requirement should be amended in view of these comments.	requirement for the site which states 'Consideration is required to be given to surface water' should be replaced with 'Consideration is required to be given to surface water and water environment considerations'.
Growing our economy: Question 6	BHAWI003 (Gala Law II) Hawick	The Woodland Trust Scotland (WTS) welcome the requirement to protect and retain existing trees on site. Also the requirement to protect boundary features and mitigate for protected species such as bats, badgers and breeding birds. WTS suggest that surveys of trees and protected species should be required for this site. (199) .	Comments noted, any requisite surveys would be identified and undertaken at the planning application stage.	No action required.
Growing our economy: Question 6	BHAWI004 (Land to south of Burnhead) Hawick	SEPA advise that the site has a potential surface water hazard and water environment considerations. (119)	Comments noted. The site requirement should be amended in view of these comments to read: 'Surface water flooding issues and water environment considerations will require to be addressed'.	The site requirement for the site which states 'Surface water flooding issues would require to be addressed' should be replaced with 'Surface water flooding issues and water environment considerations will require to be addressed'.
Growing our economy: Question 6	BHAWI004 (Land to south of Burnhead)	The proposed site BHAW1004, is not a 'brownfield' site and its development would interfere with the B listed 'tower' of Burnhead.	Historic Environment Scotland has raised no comments in respect of any potential impact upon	It is recommended that the Council agree to allocate

	Hawick	<p>Burnhead House along with the adjoining 'Tower' have been in the Scott family since the 1400's and the current owner would like to ensure the historic setting of this locally important building is not lost. Developing the site at BHAWI004 would, in the contributor's opinion, adversely affect the setting of a Listed Building which is contrary to Policy EP7 of the current Local Development Plan relating to the protection of listed buildings. Additionally, Scottish Planning Policy (SPP) also notes "protecting, enhancing and promoting access to cultural heritage, including the historic environment" should be a guiding principle for policies and decisions. SPP also states that the planning system should: promote the care and protection of the designated and non-designated historic environment (including individual assets, related settings and the wider cultural landscape) and its contribution to sense of place, cultural identity, social well-being, economic growth, civic participation and lifelong learning. It goes on, with specific regard to listed buildings, to state "the layout, design, materials, scale, siting and use of any development which will affect a listed building or its setting should be appropriate to the character and appearance of the listed building". The contributor does not consider the allocation will fit all these requirements. Furthermore, the land in question is currently tenanted by a local farmer, removing this arable land would make economies of scale less possible (110 ha to 100ha = 10% area lost), which would in turn compromise their ability to care for the environment. At para 4.11, the Council's proposals rightly suggest more weight should be given to economic development benefits within planning policy within LDP2 for new businesses,</p>	<p>Burnhead. The Council's Heritage and Design Officer has noted that the site lies close to Burnhead Tower which is a category B listed tower house and advises that whilst the proposed development may have an impact on its setting, particularly if larger buildings are proposed, this can be addressed through mitigation.</p> <p>It is considered that appropriate structure planting along and within the north eastern boundary of the site would provide protection to the setting of Burnhead Tower. This is stipulated as a site requirement and would be further detailed through the process of a planning brief for the site.</p> <p>The site assessment concludes the following:</p> <p><i>'The Council's Economic Development Section has highlighted a need for sufficient employment land in Hawick. This is particularly pertinent at this time as funding is available in the forthcoming years from the South of Scotland Economic Partnership as a forerunner to a regional enterprise agency being launched in 2020. Economic Development identified this site as a possibility. Whilst there are concerns relating to the</i></p>	this site within the Proposed Local Development Plan.
--	--------	--	---	---

		<p>leisure and tourism in the countryside. This should not be at the expense of existing small-scale agricultural businesses which have been the bedrock of the region's economy for generations. Drainage from development would compromise the adjacent natural environment, namely the 'Glen' which is identified as a 'herb rich pasture'. Industrial/business development at the town entrance would not be attractive and the buildings would spoil the current fabulous view from the A7 on the approach to Hawick, of Ruberslaw and beyond. Prime arable ground should not be used for development. (212)</p>	<p><i>location of the site within the Teviot Valleys SLA, the site is only just within the boundary and it is not considered that the development of the site, with mitigation and high quality design, would have a detrimental impact upon the SLA. The following issues would require to be addressed during the process of any planning application:</i></p> <ul style="list-style-type: none"> • <i>A Planning Brief has been suggested by SNH.</i> • <i>Issues relating to surface water would require to be addressed.</i> • <i>Ecological impacts require to be considered with appropriate mitigation where appropriate.</i> • <i>Burnhead Tower, a category B listed building to the north of the site, must be safeguarded. Mitigation to safeguard the setting is required.</i> • <i>A Transport Statement is required.</i> • <i>Improved connectivity is required.</i> • <i>A Drainage Impact Assessment may be required.</i> • <i>Structure planting required along the boundaries of the site, particularly along and within the north eastern boundary.</i> <p>Although the quality of this land may be good for agricultural purposes, the site is not prime quality agricultural land. A Planning Brief</p>	
--	--	--	---	--

			would be undertaken for the site which would consider the design and siting of buildings in order to minimise visual impact.	
Growing our economy: Question 6	BHAWI004 (Land to south of Burnhead) Hawick	<p>SNH consider this is a prominent site that could have significant landscape and visual impacts with the potential for large or badly sited industrial units to sit awkwardly in the foreground of views of Rubers Law and the Southern Uplands, particularly in views approaching Hawick from the north on the A7. Adverse effects on landscape character could be exacerbated by the rolling nature of the site's topography which may provide difficulties for the siting of large buildings. Careful consideration of height and location of buildings would be required in order not to exacerbate adverse landscape effects. If allocated, SNH recommend that a strategic approach to development layout and landscape mitigation would be required. This should include its relationship with the adjacent preferred allocation at AHAWI027 and existing allocations BHAWI001 and BHAWI002 and should include requirements for:</p> <ul style="list-style-type: none"> • Green infrastructure connections through the site, including links to housing at Burnfoot and the existing path network to the east of Burnhead Road. • Suitable densities of development on less sensitive parts of the site, avoiding the most elevated part to the east of Boorvaw Road. • Close attention should be paid to the existing settlement edge and to maintaining key views from the A707 and the B6359. (213) 	<p>Refer to response above.</p> <p>It is proposed that a planning brief will be produced relating to BHAWI001, BHAWI002 and BHAWI004. A separate planning brief would be prepared for AHAWI027 although it couldn't be ruled out this this would be produced alongside the aforesaid business and industrial sites. The planning briefs would consider in more detail layout, design, densities, landscape mitigation etc.</p> <p>The comments relating to green infrastructure connections are noted and agreed. It is recommended that a site requirement is added in this respect. The comments related to densities and views would be explored in closer detail through the process of the aforesaid planning briefs.</p>	<p>It is recommended that the Council agree to allocate this site within the Proposed Local Development Plan.</p> <p>It is recommended that a further site requirement is added, as follows: <i>'Green infrastructure connections through the site, including links to housing at Burnfoot and the existing path network to the east of Burnhead Road'</i>.</p>
Growing our economy: Question 6	MSELK002 (Heather Mill), MSELK003	Request that MSELK002, MSELK003 and MSELK004 are allocated as mixed use development opportunities with a specific	MSELK002 is allocated within the Local Development Plan 2016 as a mixed use site and it is intended that	It is recommended that the Council agrees to continue

	<p>(Land west of Heather Mill), MSELK004 (Land and buildings at Whinfield Mill) Selkirk</p>	<p>redevelopment opportunity with scope for redevelopment for a range of mixed uses, including residential development. None of the existing mill buildings are in active use and have been vacant and derelict for a number of years. (56)</p>	<p>this allocation will continue into LDP2. In respect of MSELK003 the allocation of this site for mixed use purposes is not regarded as acceptable for the reasons concluded during the site assessment process as follows:</p> <p><i>'Although the site is currently allocated within the Local Development Plan 2016 as a business and industrial site, this is a local designation which gives a low level of protection for this particular use. It is accepted that this site may be acceptable for residential use in the future, there is currently however the potential for a conflict of uses due to the fact that the land to the immediate south can still be utilised for business/industrial purposes. This potential conflict has also been identified by the Roads Planning Team. SEPA has also raised concerns relating to residential development behind a flood scheme.'</i></p> <p>The site was re-submitted at the 'MIR Consultation' stage for further consideration. The agent submitted further information to support the allocation of this site for mixed use development and believes that any concerns regarding the compatibility of uses could be addressed through the preparation of a planning brief or</p>	<p>allocation MSELK002 into LDP2 and agree not to allocate sites MSELK003 and MSELK004 for mixed use purposes.</p>
--	---	--	--	--

			<p>technical reports (noise, air quality etc) at the planning application stage. Furthermore, the agent notes that the issues raised by SEPA can be addressed through further discussion with the Council in relation to the outcome of the Selkirk Flood Protection Scheme and the results of the final 'as built' model in order to determine the suitability of the sites in the Riverside area for further residential development. However, it is not considered that the information provided changes the earlier conclusion for the assessment of this site.</p> <p>In respect of MSELK004 the allocation of this site for mixed use purposes is not regarded as acceptable for the reasons concluded during the site assessment process as follows:</p> <p><i>'The site is designated as a district business and industrial site within the Local Development Plan 2016. Due to the existing character and nature of uses within the immediate vicinity of the site, it is not considered that a mixed use development would be acceptable at this location. The development of the site for mixed use purposes would lead to the loss of business/industrial land and raise a</i></p>

Furthermore, the agent notes that the issues raised by</p>	<p>agrees not to allocate this site for mixed use purposes and that it remains a business and industrial site as per LDP 2016.</p>
------------	--------------------------	--	---	--

			SEPA can be addressed through further discussion with the Council in relation to the outcome of the Selkirk Flood Protection Scheme and the results of the final 'as built' model in order to determine the suitability of the sites in the Riverside area for further residential development. However, it is not considered that the information provided changes the earlier conclusion for the assessment of this site.	
Growing our economy: Question 6	MSELK004 (Land and buildings at Whinfield Mill) Selkirk	The site is currently allocated partly under BSELK001 (Riverside 7) and zEL11 (Riverside 2) in Selkirk. This site would be subject to Policy ED1 which contains a general presumption in favour of business and industrial uses, but also allows scope for mixed uses. The contributor considers that the site has the potential to be redeveloped for a range of mixed uses including residential, nursing home, tourism, office, retail, leisure and commercial uses. The redevelopment of this site for a range of higher value land uses would contribute to the objectives of sustainable economic growth and would allow the redevelopment of currently vacant and derelict land for a high quality, sustainable development in an accessible and sustainable location. The recently completed Flood Protection Scheme has removed any flood risk at the site. The contributor would be agreeable to any requirement for a Planning Brief to be undertaken for the site. The contributor therefore requests that the site is allocated within the LDP2 as a mixed use development opportunity. (56)	The allocation of this site for mixed use purposes is not regarded as acceptable for the reasons concluded during the site assessment process as follows: <i>'The site is designated as a district business and industrial site within the Local Development Plan 2016. Due to the existing character and nature of uses within the immediate vicinity of the site, it is not considered that a mixed use development would be acceptable at this location. The development of the site for mixed use purposes would lead to the loss of business/industrial land and raise a potential conflict in uses at this location. SEPA has also raised concerns relating to residential development behind a flood scheme.'</i>	It is recommended that the Council agrees not to allocate this site for mixed use purposes and that it remains a business and industrial site as per LDP 2016.

			<p>The site was re-submitted at the 'MIR Consultation' stage for further consideration. The agent submitted further information to support the allocation of this site for mixed use development detailing that the site is not in any active business or industrial use and the prospect of securing such a use is very limited. The Agent argues that the site is located on the edge of the wider business area and is located adjacent to existing residential properties and that it also benefits from separate access points and has an outlook across the Etrick Water. The agent believes that any concerns regarding the compatibility of uses could be addressed through the preparation of a planning brief or technical reports (noise, air quality etc) at the planning application stage. However, it is not considered that the information provided changes the earlier conclusion for the assessment of this site.</p>	
<p>Growing our economy: Question 6</p>	<p>Disagree with preferred and alternative options</p>	<p>The contributor does not agree with the preferred or alternative options and suggests no alternative options. (95)</p>	<p>Comments noted.</p>	<p>No action required.</p>
<p>Growing our economy: Question 6</p>	<p>MGALA007 (Easter Langlee III) Galashiels</p>	<p>The contributor considers that this site should be carried forward to be allocated for housing and renewable energy purposes (mixed use). There is little to no renewable energy allocations within the LDP2 and thus one requires to be more proactive in meeting renewable energy national, strategic and local planning policy guidance. It should be</p>	<p>The site (MGALA007) was submitted as part of the 'MIR consultation' process. Following a full site assessment, it was concluded that the site should not be allocated for the following reasons:</p>	<p>It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.</p>

		<p>noted that the site plan submitted differs from that submitted at the Call for Sites stage in that the lower third of the site is now proposed for housing, rather than a renewable energy site as originally proposed. This proposal will therefore be assessed as a mixed use proposal under a new site code as the boundaries and uses proposed are different. (134)</p>	<p>The site is physically separated from the town by existing woodland. Impact on biodiversity is considered to be moderate due to scale but the following should be conserved: trees & hedges, adjacent woodland.</p> <p>There is considerable archaeology within the north east corner of the site which would require to be avoided. The site is identified as being constrained in the Landscape Capacity Study as it is in a valley which is detached from the settlement; it is separated by a lip of land from the Tweed valley; the proximity of the waste disposal site and the overhead lines which currently fragment the site with wayleaves. The development of this site would require significant improved road access which would require land outwith the control of the applicant but could be considered for longer term development purposes.</p> <p>The following would require detailed investigation: ROW to S, the potentially contaminated land of the waste disposal site to the east, the gas hazard pipelines and their protection zones, electricity pylons. It is not considered the site should be included within the MIR/LDP2.</p>	
Growing our	BGALA006	SEPA advise that this site is located immediately	Comments noted.	It is recommended

<p>economy: Question 6</p>	<p>(Land at Winston Road I) Galashiels</p>	<p>adjacent to the Gala STW (CAR and WML licence). Odour is likely to be problematic from the STW. This would be dealt with by SBC Environmental Health and not SEPA. A suitable buffer should be provided in line with SPP requirements between the licensed sites and the proposed development. This is likely to impact the developable area available. Care should be taken not to damage the river banking as part of any development. SEPA require a Flood Risk Assessment (FRA) which assesses the risk from the River Tweed. Consideration will need to be given to bridge and culvert structures within and adjacent to the site. Review of the surface water 1 in 200 year flood map indicates that there may be flooding issues within this site. This should be investigated further and it is recommended that contact is made with the flood prevention officer. SEPA advise that the site has a potential surface water hazard and water environment considerations. (119)</p>	<p>The site was included within the MIR as a preferred option for business and industrial development. SEPA were previously consulted at the 'Pre-MIR' stage and their advice was taken on board and incorporated within the site requirements. The following site requirement was attached in respect of odour: 'Odour from the nearby Sewage Treatment Works to be mitigated'. In view of these comments, it is considered that the site requirement should now read: 'Odour from the nearby Sewage Treatment Works to be mitigated <u>in discussion with the Council's Environmental Health Officer</u>'. SEPA's comments in respect of the need for care to be taken not to damage the river banking as part of any development should be added as an additional site requirement. The need for a Flood Risk Assessment is included as a site requirement. SEPA's comments in respect of bridge and culvert structures within and adjacent to the site should be added as an additional site requirement.</p>	<p>that the Council agrees to update the site requirement attached to (BGALA006) to read as follows: 'Odour from the nearby Sewage Treatment Works to be mitigated <u>in discussion with the Council's Environmental Health Officer</u>'. It is recommended that the Council agrees to add a further site requirement stating the following 'Care should be taken not to damage the river banking as part of any development' as well as 'Consideration must be given to bridge and culvert structures within and adjacent to the site'. No further action is required.</p>
--------------------------------	--	--	--	---

			SEPA's comments in respect of surface water and water environment considerations are suitably dealt with within the site requirements detailed at the MIR stage.	
Growing our economy: Question 6	General – Galashiels / Hawick / Walkerburn	Borders towns such as Galashiels, Hawick and Walkerburn would benefit from increased business areas to bring greater life and vitality to them and to help stem the loss of residents and to reinvigorate these areas. (149)	Comments noted. Consultation with the Economic Development Section of the Council influences the level of employment land allocated and its location within the Local Development Plan. There has been an identified need in the Central Borders which has resulted in the proposed allocation of sites in Galashiels and Hawick. There has been no identified need within Walkerburn although there is an established need in other areas of Tweeddale.	No action required.
Growing our economy: Question 6	BGALA006 (Land at Winston Road I) Galashiels	The contributor notes that this would appear to be a sensible use for the site. (197)	Support noted.	No action required.
Growing our economy: Question 6	BGALA006 (Land at Winston Road I) Galashiels	The Woodland Trust Scotland welcome the provision that potential impact on River Tweed Special Area of Conservation must be mitigated but recommend that the Council works in partnership/consults directly with the Tweed Forum to devise the best mitigation solutions. (199)	The Council would consult with the Scottish Environment Protection Agency (SEPA) as well as the River Tweed Commission and The Tweed Foundation where applicable. The River Tweed Commission is the organisation responsible for maintaining and protecting the population of native fish species. The Tweed Foundation promotes environmental protection and improvement by conserving and	No action required.

			enhancing all species of freshwater fish and their environments in the Tweed District.	
Growing our economy: Question 6	BGALA006 (Land at Winston Road I) Galashiels	SNH acknowledge that this site is for re-development of an abattoir and a former refuse tip. The proximity of the former refuse tip site (RGALA003) to the River Tweed SAC means that assessment and mitigation of impacts on the SAC will be required as part of the HRA of the plan. It is not clear what the site requirement “there is moderate biodiversity risk associated with the site which must be given due consideration” refers to. As related site requirements refer to potential for protected species to be present, the supplementary guidance should make clear the need for survey additional to requirements that are identified through the HRA. Further advice on habitats and species survey is available on SNH’s website. (213)	Comments noted. In respect of biodiversity risk, the site requirement within the MIR stated the following: ‘Assessment of ecology impacts and provision of mitigation, as appropriate. This is considered to be appropriate.	No action required.
Growing our economy: Question 6	General - Selkirk	The Selkirk and District Community Council suggests there is still a need to plan for future strategic needs and encourage a vision of future growth for Selkirk. For example, approval of a defined line for a by-pass would provide a new coherent town boundary to the east and allow appropriate zoning and development for the future. (305)	The Council supports the aspirations for a bypass around Selkirk on the A7, this is confirmed within Policy IS4: Transport Development and Infrastructure. This has not yet, however, been supported by the Scottish Government by means of funding. The Council considers it would be inappropriate to allocate sites for development to the east of the settlement which may in the future impinge upon and undermine any future options for a bypass at this location.	No action required.
Growing our economy: Question 6	General	Contributor 73 questions the need for additional employment land given that unemployment is already low and the working age population is	The allocation of land for business and industrial development is established through detailed liaison	No action required.

		<p>forecast to decline. Section 4.2 specifies “The proposed SESPlan seeks to ensure LDPs identify, safeguard and deliver a sufficient supply of employment land taking account of market demands and existing infrastructure.” Whilst the MIR puts forward proposals for the allocation of employment land, there is no assessment given of market demands and existing infrastructure. These need to be provided for review and comment prior to any commitment in LDP2 to earmark further employment land. (73)</p>	<p>with the Council’s Economic Development Section and is based upon demand assessment established through enquiries for business development. Furthermore, the Council undertakes an Employment Land Audit annually to monitor the take up and availability of business and industrial land across the Borders.</p>	
<p>Growing our economy: Question 6</p>	<p>General – Tweedbank/ Lowood</p>	<p>Section 4.3 of the MIR makes reference to the Blueprint for the Border Railway and acknowledges that a Masterplan has been prepared for Tweedbank including the Lowood Estate site (the focus of the contributor’s interest as part of the wider “Tweedbank Site”) to the north of Tweedbank Railway Station. It states “the Lowood site offers a range of uses and has excellent development opportunities given its attractive setting, its proximity to the railway station and its location within an area with a proven housing market demand”. There is then reference to the initial ideas that have been prepared through the Masterplan and that they will be “developed further and involve extensive public consultation”. The reference to the Tweedbank site with regard to “excellent development opportunities” and being in an area “with a proven housing market demand” is misleading. A Report submitted to the Council by Jones Lang LaSalle Ltd (JLL) in response to the Tweedbank Masterplan highlights the housing market value and demand constraints that are present. Moreover, to some extent, the Ryden report seems to indicate that the housing market at this location faces extremely challenging issues which</p>	<p>This site was formally allocated for mixed use development through the process of the Housing Supplementary Guidance as part of the Local Development Plan 2016. The principle of mixed use development at this location has therefore been established and is not now in question. The Council is in the process of preparing Supplementary Planning Guidance for the site, which will go through a process of public consultation. This is the avenue for commenting further on the development of this site. However, it must be accepted that the principle of development cannot now be questioned.</p>	<p>No action required.</p>

		are likely to be a serious barrier to future development especially when considered against the expected development costs and relatively low values driven by housing development at this location. The aforesaid JLL Report provides details which should be referred to with regard to the various constraints (in addition to the housing market issues) and two notable ones will be the need to be addressed adequately relate to protected habitats and the challenges with regard to the presence of functional flood plain. In addition, a fundamental point is the scale of development and its potential impact on the environment and how this is likely to be influenced by commercial viability matters. (92)		
Growing our economy: Question 6	General	The contributor states that market led developers prefer certainty and is not convinced that mixed use allocations deliver what is stated on the tin. (236)	Comments noted.	No action required.

QUESTION 6

Do you agree with the preferred options for the provision of additional business and industrial land/ mixed use land in the LDP2? Do you agree with the alternative option for mixed use land? Or do you have other alternative options?

Main Issue	Sub Issue	Summary of Main Issues Raised	Proposed Response to Main Issues Raised	Recommendation
Growing our economy: Question 6	Tweeddale Business and Industrial Land	There is a need to allocate business and industrial land in the Eddleston and Walkerburn areas too. Eddleston is close to Edinburgh but good connection to Peebles and is on the bus route. (155)	Comments noted. The council has identified that there is a shortage of business and industrial land in the Northern HMA. The SESplan requires strategic growth in the Scottish Borders to be directed to three Strategic Development Areas (SDA) in Berwickshire, central Borders, and western Borders. The western SDA covers Walkerburn but does not include Eddleston. As part of the Development Options Study carried out by LUC, areas were identified by the consultants in Eddleston that would be suitable for housing but no sites were identified for business and industrial land. Eddleston is constrained in places west of the A703 due to the Eddleston Water flood plain. Walkerburn does have a regeneration site allocated in the Local Development plan site zR200 which may be able to accommodate some business and industrial land. There is challenges to finding more land in Walkerburn mainly due to its topography to the North of the A72 there is steep topology and to the South of the A72 its constrained by	No further action required.

			<p>the road and the River Tweed and its flood plain.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation and following further investigation it is recommended that a site for employment – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>

QUESTION 6

Do you agree with the preferred options for the provision of additional business and industrial land/ mixed use land in the LDP2? Do you agree with the alternative option for mixed use land? Or do you have other alternative options?

Main Issue	Sub Issue	Summary of Main Issues Raised	Proposed Response to Main Issues Raised	Recommendation
Eshiels	MESH1001, Land at Eshiels I & MESH1002, Land at Eshiels II	The contributor makes reference to a separate representation made (91) which covers their objection concerns to the sites MESH1001 and MESH1002. All the points raised in submission (91) are covered below. (112)	Comments noted.	No further action required at this time.
Eshiels	MESH1001, Land at Eshiels I & MESH1002, Land at Eshiels II	<p>The contributor has submitted a separate representation on behalf of many members of the Eshiels Community who object to the preferred allocations (MESH1001 and MESH1002). These concerns are already included within this table, within the issues outlined below. These concerns include, lack of sewage, infrastructure, roads infrastructure and archaeological constraints.</p> <p>They raise landscape impact concerns, given the location in the Tweed Valley Special Landscape Area. Furthermore, landowner/developer willingness to progress with development within those significant sites does not appear to have begun meaningfully. The reliance on such a large allocation at Eshiels to deliver housing within the LDP timeframe when minimal investigation into deliverability and viability has been carried out would seem a risky strategy.</p> <p>The importance of landowner and developer willingness to engage in taking sites forward for</p>	See responses below relating to sites MESH1001 and MESH1002.	No further action required at this time.

		development is being acknowledged with allocations for 95 units in the current LDP being proposed for removal by the Council. The designation of large sites as 'preferred', when landowner/developer willingness is unknown may be regarded as premature. (317)		
Eshiels	MESHI001, Land at Eshiels I	The contributor confirms part ownership of (MESHI001) and supports the inclusion within the MIR. (21)	<p>Comments and support noted.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESHI001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase</p>	It is recommended that the Council agree not to allocate site MESHI001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.

			order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.	
Eshiels	MESHI001, Land at Eshiels I	The contributor supports the inclusion of this site. (283)	<p>Support noted.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESHI001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is</p>	It is recommended that the Council agree not to allocate site MESHI001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.

			<p>taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
Eshiels	MESH1001, Land at Eshiels I, Eshiels	<p><u>General:</u></p> <p>The contributor objects to the inclusion of (MESH1001) within the MIR. (189)</p> <p>The contributor states that the population density of the Eshiels development alone has 30% households per hectare. (276)</p> <p>Advises that 240 houses will swamp the existing community, linking Peebles to Cardrona, with a major loss of good quality agricultural land and jobs essential to the economy. (20)</p> <p>The contributor highlights that the supporting document makes reference to a sawmill at Eshiels, which has not existed for over 20 years. (150)</p> <p>There are inconsistencies between the proposals and existing SBC policies. (166)</p> <p>The contributor states that SBC should not try to</p>	<p>The SESPlan requires strategic growth in the Scottish Borders to be directed to three Strategic Development Areas (SDA), in the Central Borders, the Western Borders and the Eastern Borders.</p> <p>It should be noted that it is not intended that all of the sites identified within the Main Issues Report (MIR) for the Tweeddale Locality will be brought forward for development. The MIR in paragraph 3.3 notes that “<i>it is not anticipated the LDP2 will require a significant number of new housing sites</i>”. The purpose of the MIR was to identify a number of site options and present those to the public so that LDP2 could then be informed by their responses.</p> <p>It should also be noted that Scottish</p>	<p>It is recommended that the Council agree not to allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.</p>

		<p>concentrate so many new developments around Peebles. Instead it should be trying to grow the economy around the train corridor leading to Galashiels. (188)</p> <p>The contributor raises concerns that the three fields are in the middle of nowhere and were selected totally at random for no rhyme nor reason. (201)</p> <p>The contributor states that there are people out there who really care about the area. This is their past and their future, and this is something they are willing to fight for. (249)</p> <p>The contributor states that the suggestion of a mixed use conurbation in Eshiels is absurd. (276)</p> <p>The contributor states that instead of this site, new hamlets can be created or the land can be better used, with smaller expansion in more areas. (205)</p>	<p>Planning Policy requires Local Development Plans to allocate a range of sites which are effective or expected to become effective in the plan period to meet the housing land requirement of the strategic development plan up to year 10 from the expected year of adoption. They should provide for a minimum of 5 years effective land supply at all times. Failure to meet this requirement would result in a failure to provide a plan-led system.</p> <p>It should be noted that a Development Options Study was undertaken to identify and assess options for housing and employment land in the Western Strategic Development Area, centred on the central Tweeddale area. This was due to a number of physical and infrastructure constraints within the central Tweeddale area. The study identified a number of potential short and long term housing options as well as sites for business/industrial use. Site MESH1001 was one of the sites identified in that study.</p> <p>It should be noted that the site was identified as a Mixed Use site and the MIR set out a number of site requirements including that a Masterplan would be required in taking the site forward.</p>	
--	--	---	---	--

			<p>It should be noted that paragraph 40 of Scottish Planning Policy requires: <i>“spatial strategies within development plans to promote a sustainable pattern of development appropriate to the area. To do this decisions should be guided by the following policy principles: optimising the use of existing resource capacities, particularly by co-ordinating housing and business development with infrastructure investment including transport, education facilities...”</i>.</p> <p>In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that assessment. In doing this rigorous site assessment process, the best sites possible are identified. The site assessment also considers many issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape.</p> <p>It should be noted that whilst the site is currently in agricultural use, the land is not identified as Prime Quality Agricultural Land. The</p>	
--	--	--	---	--

			<p>identification of some greenfield / agricultural land is inevitable.</p> <p>In relation to the comment regarding to reference to a sawmill at Eshiels, it should be noted that this is an Ordinance Survey issue and is outwith the control of the Council. Updates on the Ordinance Survey base maps will be undertaken in due course.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is</p>	
--	--	--	--	--

			<p>taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
Eshiels	MESH1001, Land at Eshiels I, Eshiels	<p><u>Deliverability of the site:</u></p> <p>The contributor notes that given the major infrastructure investment required, this has the potential to affect deliverability of the site. Sewerage capacity continues to be a major factor in site deliverability in the Borders generally, it is considered to be premature to allocate such a large site without knowledge or capacity issues. Notes that a fundamental aspect of site deliverability is landowner and developer willingness and sites should only be allocated where there is such willingness to engage in taking forward the development process. There are no assurances regarding the deliverability within LDP2 timeframe as very little background research has been done, including establishing landowner willingness, as noted above and drainage/water supply capacities. (91)</p>	<p>Whilst access to sewage facilities may currently be an issue, upgrades can overcome that issue.</p> <p>A site is effective under the terms of the Planning Advice Note (PAN) 2/2010 if it can be developed within the programme period. The Council undertakes an annual Housing Land Audit that monitors the effectiveness of housing land. This will continue to be used to assess the appropriate allocations in the plan.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the</p>	<p>It is recommended that the Council agree not to allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.</p>

			<p>existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
Eshiels	MESH1001, Land at Eshiels I, Eshiels	<p><u>Commuter area:</u></p> <p>Concerns raised that the area will become a commuter area, to the detriment of those who already live there. The contributor states that if Edinburgh has a problem with the lack of affordable housing, it must address those needs</p>	<p>The 2001 Census, Travel to Work Data found that only 20% of Peebles resident employed adults worked in Edinburgh and of these 92% were car drivers or passengers, 6% used the bus and 2% used other transport means</p>	<p>It is recommended that the Council agree not to allocate site MESH1001 within the Proposed Local Development Plan,</p>

		<p>itself rather than export the issue to other areas. (108)</p> <p>Contributor raises concerns that residents would need to use their cars to access shops and services. They will just keep going to Edinburgh even in leisure time and not spend money in Peebles or contribute to the community. (141)</p>	<p>(including motorbikes).</p> <p>It should also be noted that the Council are required to identify a generous supply of land to meet identified housing need (including affordable housing) across the Strategic Development Areas. Failure to meet this requirement may result in development sites coming forward through the Development Management process and/or the Planning Appeals process.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is</p>	<p>but instead allocate a much reduced employment site - BESH1001 at this location.</p>
--	--	--	---	---

			recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.	
Eshiels	MESH1001, Land at Eshiels I, Eshiels	<p><u>Location:</u></p> <p>The contributor states that the location is not suitable for a public transport provision or ‘active travel’ perspective. Existing provision is unsatisfactory based even on current demand at Eshiels. (91)</p>	<p>It is noted that the site is within close proximity to Peebles, which is 2 miles to the west. However, the close proximity to Peebles, including the cycle path along the former railway line, provides access to a wider range of services, employment and public transport opportunities. Furthermore the Main Issues Report (MIR) notes that: <i>“Improvements to the road network and public transport must continue to be supported”</i>.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for</p>	It is recommended that the Council agree not to allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.

			<p>development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
Eshiels	MESH1001, Land at Eshiels I, Eshiels	<p><u>Coalescence:</u></p> <p>The contributor states that in the event that both (MESH1001 and MESH1002) are developed, there</p>	<p>Comments noted.</p> <p>It is acknowledged that the Main Issues Report (MIR) identified two sites for potential mixed use</p>	<p>It is recommended that the Council agree not to allocate site</p>

		<p>would be significant coalescence of development in this location on the north side of the River Tweed with consequent detrimental impact upon the SLA. (91)</p>	<p>development; however, it is not considered there would be evidence of coalescence.</p> <p>However, following the MIR public consultation, and as a result of further consideration on the matter, it is proposed that site MESH1002 will not be taken forward into the Proposed Local Development Plan as a mixed use site. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>In addition, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p>	<p>MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.</p>
--	--	---	---	--

			Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESHI001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.	
Eshiels	MESHI001, Land at Eshiels I, Eshiels	<p><u>Surrounding views/key receptors/setting:</u></p> <p>The contributors object to the inclusion of (MESHI001), including some of the following concerns; impact upon the surrounding views, peace and tranquillity of the area. (31, 33, 34, 37, 43, 64, 76, 83, 98, 140)</p> <p>The contributor raises concerns regarding the impact of the development upon the tranquillity of Peebles and the surrounding countryside. (205)</p> <p>Contributor objects to the inclusion of the site. As a local resident who moved from Edinburgh to live in a rural setting which is famous throughout the world, object to houses or communities to be built on their doorstep. (97)</p>	<p>It should be noted that it is not intended that all of the sites identified within the Main Issues Report (MIR) for the Tweeddale Locality will be brought forward for development.</p> <p>The MIR in paragraph 3.3 notes that <i>“it is not anticipated the LDP [Local Development Plan] 2 will require a significant number of new housing sites”</i>. The purpose of the MIR was to identify a number of site options and present those to the public so that LDP2 could then be informed by their responses. In addition, it should be noted that the Council are</p>	It is recommended that the Council agree not to allocate site MESHI001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESHI001 at this location.

		<p>Contributor states that the area between Eshiels and Cardrona is exceptionally beautiful. (167)</p> <p>The contributor raises concerns that the views from tourist cottage(s) will change drastically and objects to the development. (49, 96)</p> <p>Contributor raises concerns regarding the impact upon the views/landscape/scenery. (50, 52,53, 149, 202, 239, 243, 320, 233)</p> <p>The development would result in the loss of existing views from many of the current houses in Eshiels. (90)</p> <p>The contributor states that there would be an unacceptable landscape impact from key receptors along the A72 given the openness and topography of the site. (91)</p> <p>The development will have a huge impact on the scenic character of this beautiful part of the Tweed valley and approach to Glentress, identified as being a major tourist attraction. The creation of a separate development will blight the landscape for tourists, walkers and mountain bikers. (46)</p> <p>The contributor states that the cycle path allows access to the beautiful green area between Peebles and Cardrona and it should be retained. (249)</p> <p>The contributor states that the rural development plan talks of the importance of the open and sweeping scenic vistas. (276)</p>	<p>also required to allocate sufficient land within the Central, Eastern and Western Strategic Development Areas.</p> <p>Scottish Planning Policy requires LDP's to allocate a range of sites which are effective or expected to become effective in the plan period to meet the housing land requirement of the strategic development plan up to year 10 from the expected year of adoption. They should provide for a minimum of 5 years effective land supply at all times. Failure to meet this requirement would result in a failure to provide a plan-led system.</p> <p>In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that assessment. In doing this rigorous site assessment process, the best sites possible are identified. The site assessment also considers many issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape.</p>	
--	--	--	---	--

		<p>The contributor states that people enjoy the 'wilderness' experience and this must be valued. (243)</p> <p>The contributor raises concerns that the development will destroy their views from the garden and the approach to Glentress Forest and surrounding hills. (227)</p> <p>Contributor raises concerns regarding the visual impact of the development. (197)</p>	<p>In respect to comments regarding the potential impacts on tourism and on Glentress; it should be noted that VisitScotland and the Forestry Commission have been consulted regarding the potential allocation of this site within the Local Development Plan and neither have objected to its potential allocation.</p> <p>With regards to comments relating to landscape and that the site is located within the Tweed Valley Special Landscape Area, it should be noted that neither Scottish Natural Heritage or the Council's Landscape Section objected to the potential inclusion of the site within the Local Development Plan.</p> <p>It should be noted that the issue regarding loss of a view is not a material consideration in Planning.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment</p>	
--	--	---	---	--

			<p>Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
Eshiels	MESH1001, Land at Eshiels I, Eshiels	<p><u>Scale of the development/character of the area/SLA:</u></p> <p>The contributor states that the scale of the proposed development will blight the lives of the current Eshiels community. (46, 69)</p> <p>Contributor raises concerns regarding the number of houses suggested. They note that other rural sites within the plan have much lower densities. They suggest that a development of around 20</p>	<p>It should be noted that it is not intended that all of the sites identified within the Main Issues Report (MIR) for the Tweeddale Locality will be brought forward for development.</p> <p>The MIR in paragraph 3.3 notes that <i>“it is not anticipated the LDP [Local Development Plan] 2 will require a significant number of new housing</i></p>	<p>It is recommended that the Council agree not to allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this</p>

		<p>houses within Eshiels would be more appropriate. (300)</p> <p>The contributor highlights that Eshiels is not an existing settlement within the LDP and that housing/industrial premises would swamp Eshiels. (139)</p> <p>The contributor states that the development would have a negative impact upon the Tweed Valley. (188)</p> <p>The contributor states that having a huge development at the entrance to Peebles will take away from the appeal of Peebles. (186)</p> <p>The contributor raises concerns regarding the unique organic character and development pattern of Eshiels. Housing co-exists with small scale rural and agricultural enterprise, which makes it a very hospitable place where people enjoy living and working. Previous new buildings have been carefully integrated into the landscape and the existing settlement pattern, retained within the original field boundaries. (139)</p> <p>The contributor objects to the development of this site, raising concerns regarding the scale of the proposed development, as well as the location and the impact of which, will be too great upon the surrounding area. (51)</p> <p>The contributor states that the development would be out of scale/character for the area. (90, 98, 140, 142, 150, 158, 166, 178, 179, 180, 185, 188, 186, 194, 198, 201, 241, 268, 269, 276, 298, 207)</p>	<p><i>sites</i>". The purpose of the MIR was to identify a number of site options and present those to the public so that LDP2 could then be informed by their responses. In addition, it should be noted that the Council are also required to allocate sufficient land within the Central, Eastern and Western Strategic Development Areas.</p> <p>Scottish Planning Policy requires LDP's to allocate a range of sites which are effective or expected to become effective in the plan period to meet the housing land requirement of the strategic development plan up to year 10 from the expected year of adoption. They should provide for a minimum of 5 years effective land supply at all times. Failure to meet this requirement would result in a failure to provide a plan-led system.</p> <p>In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that assessment. In doing this rigorous site assessment process, the best sites possible are identified. The site assessment also considers many</p>	<p>location.</p>
--	--	--	---	------------------

		<p>The contributor states that the development would severely detract from the current atmosphere and attractiveness of the area. (149)</p> <p>The proposal for the two Eshiels sites exceeds the number of houses/businesses for the whole of the rest of the Borders and are completely out of proportion. The site is unwelcome urbanisation. (172)</p> <p>The site is out of character and contrary to Policy PMD4 and LDP2MIR para 3.6. (172, 185, 186, 198, 207, 216)</p> <p>The contributor states that the site is out of proportion. (216)</p> <p>The contributor states that the site is too compact for the proposed development and the scheme shows characteristic indications of overdevelopment. The layout and form is different from other dwellings in the immediate vicinity. Raises concerns that the proposed layout and design features are not informed by any analysis of what should fit respectfully within the local scene and with other sites in the area, merely by site restraints. Development proposals must demonstrate that they, and ancillary activities associated with them, will respect and enhance the character of the site, its context and surroundings in terms of its architectural approach. This poor design does not reflect this. (98)</p> <p>The contributor states that the development would destroy the character of the area. This would be an unwelcome urbanisation of the countryside</p>	<p>issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape.</p> <p>In respect to comments regarding to potential impacts on tourism and on Glentress; it should be noted that VisitScotland and the Forestry Commission have been consulted regarding the potential allocation of this site within the Local Development Plan and neither have objected to its potential allocation.</p> <p>Furthermore, it should be noted that the Council's Roads Planning Section and Network Manager have been consulted. It is noted that neither of these consultees objected to the potential allocation of the site.</p> <p>With regards to comments relating to landscape and that the site is located within the Tweed Valley Special Landscape Area, it should be noted that neither Scottish Natural Heritage nor the Council's Landscape Section objected to the potential inclusion of the site within the Local Development Plan.</p> <p>In respect to comments that the site would be contrary to LDP Policy PMD4 Development Outwith Development Boundaries, it should</p>	
--	--	---	---	--

		<p>which will contribute to destroying the uniqueness of the Scottish Borders countryside. (52)</p> <p>The contributor states that the scale of the development is incongruous with the existing settlement, the landscape setting and the SLA, resulting in a loss of openness, with detrimental impact upon the local landscape character. The contributor highlights that the site is very prominent in the landscape setting and specifically on the approaches to and from Peebles. The area is exposed and its development will have a material detrimental impact upon the setting of Eshiels and will appear incongruous within the wider landscape. It is not considered that development of the scale proposed at this location would be based upon a clear understanding of the context or the 'sense of place' of the existing settlement at Eshiels. (91)</p> <p>The contributor states that the site is located within the heart of the Tweed Valley SLA where management recommendation include taking great care with development on settlement edges. Development of either or both of the Eshiels sites would materially and detrimentally impact upon the SLA and the features for which the designation exists and may have a materially detrimental impact upon tourism. (91)</p> <p>The contributor states that Eshiels is a designated SLA and additional development as proposed will result in the urbanisation of an, essentially rural area. (166)</p> <p>The contributor raised concerns regarding the impact upon the Special Landscape Area. (172,</p>	<p>be noted that had the site been allocated, the site and Eshiels would be included within a new Development Boundary.</p> <p>In respect to comments regarding amenity, it should be noted that Policy HD3 Protection of Residential Amenity would be relevant in the consideration of any planning application on the site.</p> <p>In addition, it is noted that the MIR sets out a number of site requirements that include a requirement for a Masterplan in advance of taking site MESH1001 forward for development.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p>	
--	--	---	---	--

	<p>178, 179, 185, 186, 239, 207, 216)</p> <p>The contributor raises concerns that the site is within the Tweed Valley SLA and is therefore due to special protection from insensitive development such as those proposed. It is not of an appropriate scale, will have a major landscape impact, and will prejudice the character of the area. The proposed developments are not appropriate and counter to existing policies. It represents unwelcomed urbanisation of the countryside which will contribute to destroying the uniqueness of the Scottish Borders countryside and biodiversity. (155)</p> <p>The contributor states that the location of business or industrial land in close proximity to the A72 is likely to have a greater detrimental impact upon the landscape setting than housing of appropriate density, with any landscaping taking many years to mature as has been the case, and continues to be the case, at Cardrona. (91)</p> <p>The contributor states that this development would produce a highly visible development, visible from the road, and just as visible as the over development of the Kittlegairy estate. An almost continuous development along this road would be the result, spoiling the view for residents and visitors alike, and having an adverse effect on the whole valley. (108)</p> <p>The contributor states that the development would result in the loss of landscape characteristics evident within the Borders landscapes, including hardwood planting and shelter belts, as well as agricultural land. The Council should perhaps look</p>	<p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
--	--	---	--

	<p>at Eshiels and use it as a model for placemaking in other parts of the Borders. (139)</p> <p>The contributor objects to further proposals for more urban development in the Tweed Valley around Glentress. One of the great attractions of Glentress as a destination is that it feels like it is out in the country and the approach has an attractive ambience. (154)</p> <p>The contributor states that 240 units is wrong for a number of reasons in an area where there are currently only around 20 houses. (155)</p> <p>The contributor considers that the proposed development would result in the area becoming urbanised. (271)</p> <p>The contributor states that the intensity of development of housing and business premises on the two Eshiels sites is excessive and equates to more than is proposed for the 'preferred' sites in the remainder of the SBC area. (166)</p> <p>The contributor states that any developments should be appropriate to the immediate environment and therefore be only on a small scale (eg) small groups or individual properties in keeping with the surroundings. (201)</p> <p>The contributor states that making Eshiels a much bigger satellite of Peebles will destroy the countryside feel of the Western Borders. (223)</p> <p>The contributor states that they are a regular visitor to Glentress as a keen mountain biker and these proposals would badly effect the</p>		
--	--	--	--

		<p>surrounding area. (266)</p> <p>The contributor raises concerns that Eshiels is a small settlement located in the beautiful Tweed Valley with stunning views. There has been a settlement in the Eshiels area for well over 200 years. The current settlement is made up of mainly single housing ranging in age from Victorian to modern day. (292)</p> <p>The contributor states that the current approach to Glentress forest is in keeping with the surrounding countryside that attracts people to the area. Developing this area for housing will severely detract from its current atmosphere and attractiveness. (292)</p> <p>The contributor states that, if the development was implemented, it would transform the area from a rural environment to a more urban one potentially reducing the quality of life for the existing residents. (293)</p> <p>The contributor states that the development site is in a Special Landscape Area and development on the proposed scale would make a mockery of this designation. (298)</p> <p>The contributor raises concerns at the loss of the countryside. (268)</p> <p>The contributor raises concerns regarding the density and scale of the proposed development, stating that if it is anything like Cardrona, the number of houses will treble as is happening there. (257)</p>		
--	--	---	--	--

	<p>The contributor states that the proposed development seems at odds with the landscape/out of proportion. (239, 243)</p> <p>The contributor states that the urbanisation would be most unwelcome in this rural economy. (216)</p> <p>The contributor states that locating a big mixed use site so close to Glentress is crazy, it will detract from the wild natural beauty which is part of the attraction of the Seven Stanes Leisure Facility (into which millions is being poured). They state that an alternative would be to locate more business/industrial units why not use March Street Mills. (217)</p> <p>The contributor states that the area is of great beauty and this type of development would be out of scale to the existing settlement. (229)</p> <p>The contributor states that development of the proposed magnitude would ruin the approach to Glentress and Peebles. Peebles will be ruined and it will be just another struggling town. The uniqueness of Peebles and the surrounding countryside should not be spoilt for the sake of the greed of the developers. (233)</p> <p>The contributor raises concerns regarding the over development in the vicinity of Eshiels. (206)</p> <p>The contributor states that it is too big a development in a badly chosen location. The proposed mixed use sites would detract from the approach to Glentress and Peebles from the east, one of the delights of the eastern entrance are the open spaces, fields, woodland etc on the north</p>		
--	--	--	--

		<p>side of the road. (197)</p> <p>The contributor raises concerns regarding the number of units proposed, which would swamp the existing hamlet and cause logistical problems. (197)</p> <p>The contributor raises concerns regarding the impact upon the special scenic area, impact upon the character of the area and visual damage to the landscape. (197)</p> <p>Current policy EP5 helps to protect against inappropriate development in the Special Landscape Area. These proposals are inappropriate and should be rejected. (318)</p> <p>The contributor does not consider that the siting of industrial buildings alongside housing is appropriate. (149)</p>		
Eshiels	MESHI001, Land at Eshiels I, Eshiels	<p><u>Tourism:</u></p> <p>The contributor objects to the inclusion of (MESHI001) and the potential impact upon tourism. (37, 40, 48, 49, 50, 51, 53, 64, 83, 98, 140, 141, 142, 149, 178, 179, 186, 197, 202, 239, 241, 243, 257, 266, 268, 269, 300, 320, 271, 209, 227, 229, 233, 235)</p> <p>The contributor states that the area will become less attractive to walkers and cyclists. (188)</p> <p>The contributor raises concerns that such a development will make Glentress less appealing if it is surrounded by housing and business estate. (186)</p>	<p>The success of outdoor recreational facilities at Glentress has helped tourism in the area and helps the status of Peebles as a recognised buoyant town centre. Peebles remains a very attractive area for prospective house builders partly due to its proximity to Edinburgh.</p> <p>The Main Issues Report (MIR) recognises that the built and natural heritage are major component parts of the attractiveness of the Scottish Borders which must be protected and enhanced. There are a large number of listed buildings,</p>	<p>It is recommended that the Council agree not to allocate site MESHI001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH001 at this location.</p>

		<p>The contributor states that these areas of natural beauty are becoming less and less now and they are sure that the Scottish Tourist Board must have also made their concerns heard. (76)</p> <p>The contributor states the development of this site would have a detrimental effect on tourism and people's enjoyment of the Tweed Valley. (52, 69, 90, 139, 188)</p> <p>The contributor raises concerns that Glentress has an international reputation as a centre of excellence for mountain biking. (139)</p> <p>Whilst there may be benefits of having additional tenants in the area, the area is one of beauty where the contributor visits regularly and tourism is extremely important for the area. Mountain biking and outdoor pursuits in Glentress are a year round activity, generating income for the area. Building more houses would really take detriment and adversely affect tourism. (32)</p> <p>The contributor states that Glentress mountain biking is celebrated all over Britain for its spectacular biking in the heart of the Tweed Valley. Having a huge development would have a negative effect on families, mountain bikers and hikers visiting the area. (51)</p> <p>The contributor objects to the inclusion of the site, as any such development would be incompatible with the existence of the Tweed Valley Forest Park and the declared intention to developer tourism at Glentress, in the town of Peebles and in the Tweed Valley generally. (59)</p>	<p>conservation areas, landscape and biodiversity designations and opportunities must continue to be explored to capitalise on these assets in the interests of tourism and economic development. It is acknowledged that the Plan must continue to ensure new development is located and designed in a manner which respects the character, appearance and amenity of the area and that good placemaking and design principles continue to be implemented.</p> <p>It should be noted that Scottish Natural Heritage, VisitScotland and the Forestry Commission have all been consulted regarding the potential allocation of site MESH1001 within the Local Development Plan. However, none objected to its potential allocation.</p> <p>In addition, it is noted that the MIR sets out a number of site requirements that include a requirement for a Masterplan in advance of taking the site forward for development.</p> <p>It should also be noted that in relation to LDP policy ED7 Business, Tourism and Leisure Development in the Countryside, that policy aims to allow for</p>	
--	--	--	---	--

		<p>The proposal for these two sites will detract from the tourist potential of the area and hence its economic development by blighting the visual approach to Glentress and the views from within the forest outwards. Glentress is a highly successful tourist destination, for walkers and mountain bikers, also people visiting the immediate area. Tourists will be put off the area if it is part of an urban sprawl. There is an increasing number of other mountain biking areas with which Glentress is competing and the proposed development will only make it a less attractive option amongst these. (90)</p> <p>Further proposed development, particularly on the scale suggested for the Eshiels area near the entrance to Glentress, feels like further urbanisation of this beautiful location which will hugely detract from its attraction as a destination for visitors. (154)</p> <p>The contributor raises concerns that the development will remove a sense of countryside experience which will impact negatively on tourism. (155)</p> <p>The contributor states that the proposed uses are inconsistent with and are potentially damaging to the type and nature of tourism development taking place at Glentress and the expectations of the visitors who are and will be attracted to it. (166)</p> <p>The contributor states that the area provides a range of recreational activities; mountain biking, horse riding, golf, walking, cycling and fishing. The suggested development will destroy much of the</p>	<p>appropriate employment generating development in the countryside whilst protecting the environment and to ensure that business, tourism and leisure related developments are appropriate to their location. It is not considered that any of the potential sites identified within the MIR is contrary to that policy.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is</p>	
--	--	--	---	--

		<p>attraction of this area and undermine ongoing investment in the recreational facilities. (167)</p> <p>The contributor states that Glentress is used for walking, running and camping. The proposed dwellings will have a substantially negative impact on the attractiveness of Glentress as a tourist destination, and being able to deliver a positive experience for customers. (185)</p> <p>The contributor states that Eshiels is an area of natural beauty which attracts a huge number of visitors, particularly to Glentress. They raise concerns that the proposed large scale development would spoil the visitor experience to the area. (201)</p> <p>The contributor raises concerns regarding the impact of the development upon Glentress for biking. The development would take away the peacefulness. (205)</p> <p>The contributor raises concerns that development on this site would ruin the countryside of the area including Glentress which is one of the areas key tourism hotspots. (246)</p> <p>The contributor states that the urbanisation, apart from biodiversity impact, will change the experience for 300,000 visitors to Glentress alone never mind the other mountain bike trails. (276)</p> <p>The contributor states that Eshiels is the gateway to Glentress forest which is part of the world famous 7stanes bike parks which attracts over 300,000 visitors to the area annually. (292)</p>	<p>likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
--	--	--	--	--

	<p>The contributor raised concerns regarding the impact upon Glentress/Tweed Valley. (268, 269, 257, 271, 300)</p> <p>The contributor raises concerns that development on this scale and in this area would form a visual corridor which would have a significant impact on the landscape value for tourism, right next to one of the Scottish Borders biggest tourist attractions, Glentress Forest. (239)</p> <p>The contributor states that the development would have a detrimental economic impact on the Glentress area which is the main tourist destination (e.g) mountain biking, walking, Go Ape. This is counter to Policy ED7. (207)</p> <p>The contributor states that the development would have a massive hit on the economic development of the Glentress area as a draw for walking and mountain biking tourists. (216)</p> <p>The contributor states that any development in the immediate area of Glentress should be tourist related, rather than aimed at small businesses which should be located on brownfield sites. (216)</p> <p>The contributor states that these sites are in the open countryside and major development in this area will detract from the quality that the visitors value so much from visits to the Scottish Borders. (30)</p> <p>The contributor raises concerns that the site would be adjacent to the Forest Holidays development within Glentress, the proposal would blanket that area with development. (206)</p>		
--	--	--	--

		<p>The contributor states the impact on the surrounding recreational area of Glentress and surrounding countryside on outdoor activities will be adversely affected. This appears to be counter to Policy ED7. (198)</p> <p>Glentress Forest is one of the principal tourist attractions in this part of the Borders and has attracted considerable investment for leisure facilities including a holiday complex, outdoor tree activities as well as developing as a significant mountain biking centre. Any major development in this location begins to urbanise the countryside and detracts from what tourists and visitors are seeking, peace and tranquillity. Given that Peebles is becoming increasingly dependent upon tourists for its long term survival, any development that hinders its progress in this regard has to be challenged. (318)</p>		
Eshiels	MESH1001, Land at Eshiels I, Eshiels	<p><u>Land economics:</u></p> <p>Contributor raised concerns at the inclusion of (MESH1001), in respect of land economics. (24)</p>	<p>This site was identified through an independent study that was carried out by consultants to identify site options within the vicinity of Peebles. The study findings have informed the potential site options set out in the Main Issues Report (MIR).</p> <p>It should be noted that deliverability of the potential sites was considered, in terms of access and infrastructure constraints. Developer interests were contacted at two points in the study: initially to gather an understanding of the types of sites likely to be of interest; and later</p>	<p>It is recommended that the Council agree not to allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.</p>

			<p>to consider viability of the potential development sites.</p> <p>It is therefore not considered that there are issues relating to land economics that would prevent the site MESH1001 from coming forward.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council</p>	
--	--	--	---	--

			undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.	
Eshiels	MESHI001, Land at Eshiels I, Eshiels	<p><u>Traffic:</u></p> <p>The contributor raises concerns regarding the impact upon traffic and the A72/surrounding road networks/parking/potential for accidents. (20, 52, 69, 90, 108, 139, 141, 142, 145, 149, 155, 158, 166, 167, 172, 185, 186, 197, 198, 201, 202, 239, 241, 243, 269, 271, 276, 292, 293, 300, 207, 216, 229)</p> <p>Concerns that the development will create a lot of extra traffic as people will inevitable drive to Peebles for various services. (46)</p> <p>Concerns are raised that if business units were to be located at Eshiels this could increase the likelihood of large vehicles/lorries in the vicinity. (202)</p> <p>The contributor states that the proposal is neither rural or urban, as it is within the school catchment distance and yet the pupils have no bus available but have to walk along the side of an increasingly busy A72. The alternative is for parents to transport them to school by car, across the bridge thereby increasing further congestion in Peebles.</p>	<p>It should be noted that it is not intended to allocate all of the sites identified within the Main Issues Report within the Proposed Local Development Plan.</p> <p>Whilst the primary responsibility for operating the development planning system for the Scottish Borders lies with the Council, Circular 6/2013 Development Planning states that all interests should be engaged as early and as fully as possible. In addition that document also states “<i>key agencies are under a specific duty to co-operate in the preparation of development plans</i>”; this includes Scottish Natural Heritage, Scottish Environmental Protection Agency, Scottish Water and NHS (Health Board). The Council have consulted with all key agencies throughout the Local Development Plan process and will continue to do so. This then allows key agencies to plan according to their needs and</p>	<p>It is recommended that the Council agree not to allocate site MESHI001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.</p>

		<p>(271)</p> <p>The contributor states that the development will result in a considerable increase in traffic, as every house will have a minimum of 2 cars, every business will have at least 2 cars. The town could not cope with all the extra traffic. (235)</p> <p>The location is sufficiently remote from the town and its facilities that it will be inevitable that a development of the type proposed will have a significant impact upon road traffic. Given the need to use cars more to access shops, where will these extra cars park? Peebles is already running short of adequate parking facilities; there are very few, if any, sites that could be used for car parking. (318)</p> <p>The contributor states that increasing the settlement along the A72 risks an increase in the number of accidents, in particular cyclists coming off the hill routes quickly, straight onto the A72. (108)</p>	<p>demands also.</p> <p>In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that assessment. In doing this rigorous site assessment process, the best sites possible are identified. The site assessment also considers many issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape.</p> <p>Furthermore, it should be noted that the Council's Roads Planning Section and Network Manager have been consulted. It is noted that neither of these consultees objected to the potential allocation of the site MESH1001.</p> <p>In respect to comments regarding school transport, it should be noted that transport is provided to pupils who live over 2 miles from their catchment school in primary and to those who live over 3 miles away from their catchment school in secondary.</p>	
--	--	--	---	--

			<p>It should be noted that the site was identified as a Mixed Use site with housing. Furthermore the site requirements set out in the Main Issues Report stated that a Masterplan would be required in taking the site forward.</p> <p>In addition, it is not anticipated that any of the mixed use sites to be identified in the Main Issues Report would have a negative impact on Peebles.</p> <p>Whilst Eshiels may not have a pub or a shop, it has good access to employment and services, and there is the potential access to public transport to be improved on as Eshiels is located just off the A72. In addition, Eshiels is also located in close proximity to the Walkerburn to Peebles multi use path. It is also noted that a public footpath runs along the A72 into Peebles, although it is noted that this is on the southern side of the road. A site requirement also sets out a requirement for options for improvements to the existing public transport infrastructure will need to be explored, as well as the suitability of pedestrian provision on the A72.</p> <p>However, in light of the consultation responses received during the Main</p>	
--	--	--	---	--

			<p>Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
--	--	--	--	--

Eshiels	MESH1001, Land at Eshiels I, Eshiels	<p><u>Noise and air quality:</u></p> <p>The contributor raises concerns regarding noise and air quality, as a result of the development. (20)</p>	<p>In relation to comments regarding noise and air quality, these are detailed issues that would be considered at planning application stage. However, it should be noted that neither SEPA nor Environmental Health have objected to the site on the basis of noise or air quality.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is</p>	<p>It is recommended that the Council agree not to allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.</p>
---------	---	--	--	--

			likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.	
Eshiels	MESH1001, Land at Eshiels I, Eshiels	<p><u>Infrastructure/services:</u></p> <p>The contributors raise a number of concerns regarding the existing infrastructure and services/amenities in and around Peebles. These concerns include the capacity of existing; schools, roads (including parking), sewerage treatment, utility infrastructure and health centres which are already stretched and the requirement for an additional bridge over the River Tweed. More houses in Eshiels or Peebles should not be considered until these facilities are improved first. (20, 23, 69, 141, 145, 155, 166)</p> <p>This is an area of outstanding natural beauty and does not have the infrastructure or facilities to support such a large development. If housing is required then land should be sought with better transport links to local amenities. (38)</p> <p>Contributors raised issues regarding school transport and the distance school children will have to travel to school means that pupils do not qualify for a school bus. (46, 155, 172, 186, 198, 205, 207, 216, 239, 269)</p>	<p>It should be noted that it is not intended to allocate all of the sites identified within the Main Issues Report within the Proposed Local Development Plan.</p> <p>Whilst the primary responsibility for operating the development planning system for the Scottish Borders lies with the Council, Circular 6/2013 Development Planning states that all interests should be engaged as early and as fully as possible. In addition that document also states “<i>key agencies are under a specific duty to co-operate in the preparation of development plans</i>”; this includes Scottish Natural Heritage, Scottish Environmental Protection Agency, Scottish Water and NHS (Health Board). The Council have consulted with all key agencies throughout the Local Development Plan process and will continue to do so. This then allows key agencies to plan</p>	It is recommended that the Council agree not to allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.

		<p>Raised concerns regarding the current infrastructure provision (this includes reference to schools, health centres, roads, parking, fire/police/ambulance services, water, electricity, gas, and sewerage facilities). (53, 59, 83, 90, 139, 149, 179, 180, 194, 197, 201, 205, 252, 257, 292, 300, 209, 217, 229, 235)</p> <p>The contributor states that there would need to be local infrastructure improvements if the developments at Eshiels were to go ahead, including; road lay-out on the A72, new sewerage provision and new water pumping station to get the water up the hill. The developers should be responsible for funding these. (155)</p> <p>The contributor objects to the inclusion of the site and states that the site is not considered to be capable of being delivered within the LDP lifespan due to the significant infrastructure constraints which have not been sufficiently researched to date. These include; landowner willingness, sewerage capacity, water treatment capacity, archaeological constraints and roads infrastructure requirements. Other significant material infrastructure constraints include school capacities and healthcare facilities. (91)</p> <p>The contributor states that the existing access is not suitable. Major investment would be required to create a new 'through route' access within the sites and new junctions with the A72. The viability of the investment requirement is unknown, which could realistically affect deliverability. There is no direct and sustainable off-road link to Peebles. The walkway/cycleway is located to the south of</p>	<p>according to their needs and demands also.</p> <p>In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that assessment. In doing this rigorous site assessment process, the best sites possible are identified. The site assessment also considers many issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape.</p> <p>NHS Borders have stated that they will continue to engage with SBC colleagues to provide primary care and public health input to the wider planning process including the creation of the next Scottish Borders Council Local Development Plan early in its preparation cycle as part of a Health in All Policies approach.</p> <p>It should be noted that Scottish Water were consulted as part of the site assessment process undertaken for site MESH1001. In addition, whilst access to sewage facilities may currently be an issue,</p>	
--	--	--	---	--

	<p>the recycling centre with the nearest connection points onto the route being at some distance from the site and requiring crossing of the busy A72. Without a new safe off-site route to Peebles which is constructed to directly connect with the site, there would be an increased number of pedestrians which would have to use the existing pavements adjacent to the busy and fast road, this putting more pedestrian traffic at risk. Furthermore, as the site is over 3 miles away from the High School, children would not be entitled to a school bus pass. (91)</p> <p>Concerns are raised that the development will result in an increase in the population, which will put pressure on the existing infrastructure and services residents would require, including schools, doctors and social services. (108)</p> <p>Concerns are raised that future road expansion will take place along the old railway tracks, which are currently used for walking/cycling. (108)</p> <p>The contributor raises concerns regarding suitable footpaths between Eshiels and Peebles. Highlighting that there is currently a badly maintained narrow footpath. The old railway cycle path does not link Eshiels and Peebles directly. (139)</p> <p>The contributor raises concerns regarding the lack of a safe footpath between Eshiels and Peebles. (239)</p> <p>The contributor states that the majority of home owners within the new proposed dwellings will be commuters and this will have a substantial impact</p>	<p>upgrades can overcome that issue.</p> <p>Furthermore, it is noted that the Council's Education, Archaeology, and Roads Planning sections, as well as Historic Environment Scotland and Scottish Natural Heritage have been consulted. It is noted that none of these consultees objected to the potential allocation of the site MESH1002.</p> <p>In respect to comments regarding school transport, it should be noted that transport is provided to pupils who live over 2 miles from their catchment school in primary and to those who live over 3 miles away from their catchment school in secondary.</p> <p>It should be noted that the site was identified as a Mixed Use site with housing. Furthermore the site requirements set out in the Main Issues Report stated that a Masterplan would be required in taking site MESH1001 forward.</p> <p>In addition, it is not anticipated any of the mixed use sites to be identified in the Proposed Plan will have a negative impact on the economy of Peebles.</p> <p>Whilst Eshiels may not have a pub or a shop, it has good access to</p>	
--	--	---	--

		<p>on the quality of the roads between Eshiels and Edinburgh, as well as increasing car miles. (185)</p> <p>There needs to be significant investment in Peebles High School before any significant expansions to the local population can be considered. The contributor raised concerns regarding the capacity of Peebles High School. (185)</p> <p>Haylodge Health Centre is becoming more and more stretched, with growing waiting times for appointments. The contributor highlights that it would take 500 new houses to justify increasing the health centre budget to recruit 1 additional GP. The proposed dwellings would be completely irresponsible given this situation. (185)</p> <p>The contributor states that there is only 1 ambulance covering the area. (185)</p> <p>The contributor states that there will need to be massive changes to the roads, accesses, junctions etc in the immediate area of Eshiels to cope with the number of people requiring access to the A72 main road from the new development. This is already a very busy and highly dangerous road. (201)</p> <p>The contributor states that mixed use is not appropriate for the site, due to the narrow access roads. (273)</p> <p>The contributor states that commitment to extensive infrastructure improvements are required before any further significant development can take place. (269)</p>	<p>employment and services, and there is the potential access to public transport to be improved on as Eshiels is located just off the A72. In addition, Eshiels is also located in close proximity to the Walkerburn to Peebles multi use path. It is also noted that a public footpath runs along the A72 into Peebles, although it is noted that this is on the southern side of the road. A site requirement set out a requirement for options for improvements to the existing public transport infrastructure to be explored, as well as the suitability of pedestrian provision on the A72.</p> <p>The 2001 Census, Travel to Work Data found that only 20% of Peebles resident employed adults worked in Edinburgh and of these 92% were car drivers or passengers, 6% used the bus and 2% used other transport means (including motorbikes).</p> <p>This site was identified through an independent study that was carried out by consultants to identify site options within the vicinity of Peebles. The study findings have informed the potential site options set out in the Main Issues Report (MIR).</p> <p>It should be noted that deliverability</p>	
--	--	---	--	--

		<p>The contributor raises concerns regarding the car parking facilities within Peebles and that it cannot cope with the current population. (252)</p> <p>The contributor questions the expansion in infrastructure required. They question how this proposal will link to Peebles, as it is well outside and looks like a housing scheme, stuck in a random field. The Cardrona proposals also have a similar look about them and they wonder about the need for more community infrastructure on the Cardrona site. (243)</p> <p>The proposal would encourage a large amount of school car traffic. (241)</p> <p>The contributor raised concerns regarding the infrastructure requirements and physical ability to re-route the A72, drainage and re-location of existing septic tanks. (239)</p> <p>The contributor advises that measures to support sustainable transport in the form of safe cycling and walking to Peebles, along the A72 are considered through the site requirements and in association with (MESH1002). (213)</p> <p>The contributor states that there is insufficient road and water infrastructure. (235)</p> <p>The contributor raises concerns regarding infrastructure issues, including the A72 as a result of the development. As a result, there will be slowing of moving traffic and a knock on effect of not enough parking provision in Peebles. People may travel to Straiton with the consequent</p>	<p>of the potential sites was considered, in terms of access and infrastructure constraints. Developer interests were contacted at two points in the study: initially to gather an understanding of the types of sites likely to be of interest; and later to consider viability of the potential development sites.</p> <p>In relation to effectiveness, a site is effective under the terms of the Planning Advice Note (PAN) 2/2010 if it can be developed within the programme period. The Council undertakes an annual Housing Land Audit that monitors the effectiveness of housing land. This will continue to be used to assess the appropriate allocations in the plan.</p> <p>It is therefore not considered that there are issues relating to land economics that would prevent the site from coming forward.</p> <p>Comments regarding the measures to support sustainable transport in the form of safe cycling and walking to Peebles, along the A72 are considered through the site requirements set out in the Main Issues Report.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation,</p>	
--	--	--	---	--

		<p>negative effect to the vibrancy and economic health of Peebles. (197)</p> <p>The contributor states that Eshiels has no amenities and residents will go into Peebles and head to Edinburgh. (197)</p> <p>The contributor states that the location is not suitable for a public transport provision or 'active travel' perspective. Existing provision is unsatisfactory based even on current demand at Eshiels. (91)</p>	<p>including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
Eshiels	MESH1001,	<u>Ribbon development and green belt:</u>	It should be noted that it is not	It is recommended

	<p>Land at Eshiels I, Eshiels</p>	<p>The contributors raise concerns that development on this site would be ribbon development. (23, 139, 149, 150, 155, 172, 178, 179, 185, 186, 197, 198, 205, 241, 269, 276, 292, 207, 216, 229)</p> <p>The Borders is known for its vast and grass fields and rolling hills, by adding these houses, Peebles and Cardrona will be inadvertently forced together while simultaneously wiping away the grass fields that make the Borders so special. (180)</p> <p>The contributor states that building in Eshiels will connect the Borders corridor, with housing stretching from Peebles to Cardrona, spoiling much of the countryside and changing these areas from a peaceful small town to a disruptive large town. (205)</p> <p>The contributor states that in the event that both (MESH1001 and MESH1002) are developed, there would be significant coalescence of development in this location on the north side of the River Tweed with consequent detrimental impact upon the SLA. (91)</p>	<p>intended to allocate all of the sites identified within the Main Issues Report within the Proposed Local Development Plan.</p> <p>In the consideration of any site for inclusion in the Main Issues Report, a full site assessment was carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, and Scottish Natural Heritage) are incorporated into that assessment. This rigorous site assessment process then allows identification of the best sites possible.</p> <p>It is not considered that development at this location would result in ribbon development or coalescence of the settlements within the Tweed Valley.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible</p>	<p>that the Council agree not to allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.</p>
--	-----------------------------------	---	--	--

			<p>due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
Eshiels	MESH1001, Land at Eshiels I, Eshiels	<p><u>Health & wellbeing/amenity of existing residents:</u></p> <p>The contributor states that the development of (MESH1001) would impact upon the health and well being of the existing residents. (43)</p> <p>The development would have a negative effect on the amenity of the existing residents at Eshiels. These contributors include reference to; noise, light and dust pollution. (90, 95)</p>	<p>It should be noted that the site is located within the Strategic Green Network as set out in Local Development Plan policy EP12 Green Networks. The aim of Green Networks are to assist in supporting sustainable economic growth, tourism, recreation, the creation of an environment that promotes a healthier-living lifestyle, and the</p>	<p>It is recommended that the Council agree not to allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site -</p>

			<p>protection and enhancement of biodiversity, and have the potential to improve water quality, promote flood protection and reduce pollution.</p> <p>It is therefore not considered that development at this location would have a negative impact on the health and wellbeing of existing residents.</p> <p>In relation to comments regarding noise, light and dust pollution, these would be issues that would be considered at planning application stage.</p> <p>In respect to comments regarding amenity, it should be noted that Policy HD3 Protection of Residential Amenity would be relevant in the consideration of any planning application on site MESH1001.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible</p>	<p>BESH1001 at this location.</p>
--	--	--	---	-----------------------------------

			<p>due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
Eshiels	MESH1001, Land at Eshiels I, Eshiels	<p><u>Dark skies lost:</u></p> <p>The contributor states the development will result in the loss of Peebles dark sky. (51, 69, 90, 276)</p> <p>The contributors raise concerns regarding the impact of the development upon the Eshiels dark sky environment. (139, 149, 155, 186, 197, 292)</p>	<p>It should be noted that it is not intended that all of the sites identified within the Main Issues Report (MIR) for the Tweeddale Locality will be brought forward for development. The MIR in paragraph 3.3 notes that "<i>it is not anticipated the LDP2 will require a significant number of new housing sites</i>". The purpose of the MIR was to identify a</p>	<p>It is recommended that the Council agree not to allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site -</p>

			<p>number of site options and present those to the public so that LDP2 could then be informed by their responses.</p> <p>However the Council are aware that the lighting of roads, footpaths, domestic and commercial property should be an integral element of all new development proposals at the outset and not, as has sometimes been the case in the past, addressed as an afterthought. Furthermore it is possible to reduce many of the negative effects of lighting through careful design and planning, using lighting only where and when necessary, using an appropriate strength of light and adjusting light fittings to direct the light to where it is required. It is acknowledged that illumination should be appropriate to the surroundings and character of the area as a whole.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that</p>	<p>BESHI001 at this location.</p>
--	--	--	---	-----------------------------------

			<p>upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
Eshiels	MESH1001, Land at Eshiels I, Eshiels	<p><u>Loss of agricultural land:</u></p> <p>The contributor states that a great deal of agricultural land will be lost along with the rural jobs associated with the land. (69)</p> <p>The contributor states that the development would cause the destruction of ancient pastures. (108)</p>	<p>It should be noted that it is not intended that all of the sites identified within the Main Issues Report (MIR) for the Tweeddale Locality will be brought forward for development. The MIR in paragraph 3.3 notes that "<i>it is not anticipated the LDP2 will require a significant number of new housing sites</i>". The</p>	<p>It is recommended that the Council agree not to allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced</p>

		<p>The contributor states that the development would result in the loss of prime quality agricultural land. (30, 149, 166, 205, 292)</p> <p>The contributor raises concerns at the loss of good quality agricultural land and the impact on agricultural employment essential to the economy of the Scottish Borders. (155)</p> <p>The site will result in the removal of agricultural land counter to Policy ED10. (172, 185, 186, 198, 207, 216)</p> <p>Contributor raises concerns regarding the loss of green belts and agricultural land. (241)</p>	<p>purpose of the MIR was to identify a number of site options and present those to the public so that LDP2 could then be informed by their responses.</p> <p>In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that assessment. In doing this rigorous site assessment process, the best sites possible are identified.</p> <p>It should be noted that whilst the site is currently in agricultural use for grazing, the land is not identified as Prime Quality Agricultural Land. It is noted that the identification of some greenfield / agricultural land is inevitable.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that</p>	<p>employment site - BESH1001 at this location.</p>
--	--	--	--	---

			<p>upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
Eshiels	MESH1001, Land at Eshiels I, Eshiels	<p><u>Loss of existing community within Eshiels:</u></p> <p>The contributor states that the proposed development would mean the existing community would be lost. (69, 186)</p> <p>The contributor fears this small rural community may be permanently scarred by this proposal. (201)</p>	<p>It should be noted that it is not intended that all of the sites identified within the Main Issues Report (MIR) for the Tweeddale Locality will be brought forward for development. The MIR in paragraph 3.3 notes that "<i>it is not anticipated the LDP2 will require a significant number of new housing sites</i>". The</p>	<p>It is recommended that the Council agree not to allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced</p>

			<p>purpose of the MIR was to identify a number of site options and present those to the public so that LDP2 could then be informed by their responses.</p> <p>It is noted that the MIR sets out a number of site requirements that include a requirement for a Masterplan in advance of taking site MESH1001 forward for development.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is</p>	<p>employment site - BESH1001 at this location.</p>
--	--	--	---	---

			<p>taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
Eshiels	MESH1001, Land at Eshiels I, Eshiels	<p><u>Burn:</u></p> <p>The contributor raises concerns regarding the slippage of land adjacent to the burn which runs along the north side of the plateau fields in the valley, north of the River Tweed. The natural embankment (a significant length of where the western end of the new build is proposed), could disintegrate. (88)</p>	<p>It should be noted that the Scottish Environment Protection Agency (SEPA) were consulted as part of the site assessment process and as a result the following site requirement was included in the Main Issues Report for the site: “<i>A maintenance buffer strip of at least 6 metres must be provided between the watercourse and any built development. Additional water quality buffer strips may also be required</i>”.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the</p>	<p>It is recommended that the Council agree not to allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.</p>

			<p>existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
Eshiels	MESH1001, Land at Eshiels I, Eshiels	<p><u>Indicative site capacity:</u></p> <p>The contributor states that the indicative site capacity for this site and (MESH1002) is greater than the 'preferred sites' for the whole of the Borders. (90)</p>	<p>It is not intended to allocate all of the sites identified within the Main Issues Report within the Proposed Local Development Plan.</p> <p>The SESPlan requires strategic growth in the Scottish Borders to be</p>	<p>It is recommended that the Council agree not to allocate site MESH1001 within the Proposed Local Development Plan,</p>

			<p>directed to three Strategic Development Areas (SDA) in the Central Borders, the Western Borders and the Eastern Borders.</p> <p>It should also be noted that Scottish Planning Policy requires Local Development Plans to allocate a range of sites which are effective or expected to become effective in the plan period to meet the housing land requirement of the strategic development plan up to year 10 from the expected year of adoption. They should provide for a minimum of 5 years effective land supply at all times. Failure to meet this requirement would result in a failure to provide a plan-led system. In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that assessment. The site assessment also considers many issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape. In doing this rigorous site assessment process, the best sites possible are identified.</p>	<p>but instead allocate a much reduced employment site - BESH1001 at this location.</p>
--	--	--	---	---

			<p>It should be noted that a Development Options Study was undertaken to identify and assess options for housing and employment land in the Western Strategic Development Area, centred on the central Tweeddale area. This was due to a number of physical and infrastructure constraints within the central Tweeddale area. The study identified a number of potential short and long term housing options as well as sites for business/industrial use. Site MESH1001 was one of the sites identified in that study.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land</p>	
--	--	--	--	--

			for employment use, it is recommended that a reduced site at this location for employment only – site BESH001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.	
Eshiels	MESH001, Land at Eshiels I, Eshiels	<p><u>Flood risk:</u></p> <p>The contributor states that the development would increase flooding risk for the housing and fields below the road. (90, 235)</p> <p>The contributor states that the development may lead to flooding of areas to the south of the A72. (166)</p> <p>The contributor states that there was widespread flooding 2 years ago along the Tweed Valley, which demonstrated that the A72 is very vulnerable to flooding, for much of its length it is also at risk from erosion by the River Tweed. Putting further housing in an area where its vital routes are at risk, would be irresponsible. There are no alternative routes in the event of flooding. Building over agricultural land will prevent rainfall</p>	<p>It is not intended to allocate all of the sites identified within the Main Issues Report within the Proposed Local Development Plan.</p> <p>It should be noted that Scottish Environment Protection Agency (SEPA) and the Council's Flood and Coastal Management Team were consulted as part of the site assessment process undertaken for the site. Neither consultee have objected to the potential inclusion of the site within the Plan.</p> <p>In addition, the Main Issues Report included a site requirement for a Flood Risk Assessment to assess the risk from the Linn Burn and the</p>	It is recommended that the Council agree not to allocate site MESH001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH001 at this location.

	<p>moving slowly through the soil, run-off will be swifter and this will exacerbate flooding. (108)</p> <p>The contributor highlights that the main road and lower field at Eshiels are subject to flooding every time there is heavy rain. The building of new roads and new paved parking areas would add to this problem. (139)</p> <p>The contributor raises concerns there will be a significantly increased flood risk for the existing houses especially as the land does not drain well at present. Furthermore, likely to be increased risk to the A72 where there are frequent flooding issues. (150)</p> <p>The contributor states that although the 2 sites are not currently in the SEPA flood risk zone this will change drastically once the agricultural land is removed contributing to faster run-off, increasing the rate at which rainwater falling on the proposed new development reaches the Tweed. SEPA would need to investigate with revised models. (155)</p> <p>The contributor raises concerns regarding flood risk as a result of development on this site/surrounding area/roads. (172, 198, 205, 269)</p> <p>The contributor states that the land adjacent to the proposed dwellings is prone to flooding, and this has often encroached onto the A72 road. With rising water tables and wet weather, 26 hectares of tarmac'd land would need significant investment in drainage for the whole area. (185)</p> <p>The contributor states that significant flooding</p>	<p>small water course that flows adjacent to the site.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist</p>	
--	--	---	--

		<p>takes place most years on (MESH1001) site. Question whether the Council intend to stipulate that the houses and businesses are built on stilts. (298)</p> <p>The contributor states that the areas at the bottom of the fields act as flood plains at the moment with housing here the road and houses opposite will be subject to flooding. The road currently floods over the road when heavy rainfall. (241)</p> <p>The contributor raises concerns regarding the potential for flooding from the hills into the fields. (239)</p> <p>The contributor states that the development adjacent to the flood plain would increase the risk of flooding to homes/buildings/fields below the A72. (207)</p> <p>The contributor raises concerns regarding flood risk as a result of the development, for the houses and fields below the A72, due to 27 acres of developed/tarmacked land close to the floodplain. (216)</p>	<p>in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
Eshiels	MESH1001, Land at Eshiels I, Eshiels	<p><u>Sewerage disposal:</u></p> <p>The contributors raise concerns regarding the main sewage system, capacity and the fact that the site is downstream of the works. (90, 139)</p> <p>The contributor states that there is no public sewer at Eshiels. The level of investment which would be required in order to service both sites is currently unknown. (91)</p> <p>Contributor raises concerns regarding the</p>	<p>It should be noted that Scottish Water were consulted as part of the site assessment process undertaken for the site, and did not object to the potential allocation of the site. In addition, whilst access to sewage facilities may currently be an issue, upgrades can overcome that issue.</p> <p>However, in light of the consultation responses received during the Main</p>	<p>It is recommended that the Council agree not to allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.</p>

		<p>problems of sewerage disposal/treatment from the site. (172, 197, 198, 269, 293, 207, 216, 229, 235)</p> <p>The contributor advises that the proposed number of dwellings would have a detrimental impact on sewage processing at Eshiels Recycling Centre, along with the ability to process all waste from these dwellings. (185)</p> <p>Apart from some low level comment regarding WWTW and WTW, which are assumed to refer to waste water treatment and sewerage, there is little or no consideration as to how levels of waste and sewerage will be dealt with. This site is downstream of the existing sewerage facilities that serve Peebles. (318)</p> <p>Contributor raises concerns regarding septic tank waste and whether the existing treatment plant can cope with this amount of houses. (197)</p>	<p>Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
--	--	---	--	--

Eshiels	MESH1001, Land at Eshiels I, Eshiels	<p><u>Natural heritage/archaeology:</u></p> <p>The contributor states that the development would not protect or enhance the natural heritage of the area. (90)</p> <p>The contributor raises concerns regarding the impact that developing the site will have upon archaeological interest. A Roman settlement was once situated there and there are many artefacts which remain buried. If building works is carried out many of the remains will be destroyed. (194)</p> <p>The contributor states that there are archaeological/heritage constraints within part of the site. Installation/upgrading of infrastructure may detrimentally impact upon these interests. (91)</p> <p>The contributor states that development may cause damage to the historic sites, buildings and artefacts close to the access road. (108)</p> <p>The contributor states that this is an historic and close knit peaceful community, with its roots in post WW1 social change and history in arboriculture. Numerous artefacts alongside the roads and tracks would be at risk. (108)</p> <p>The contributor states that the allocation has the potential for direct and setting impacts on scheduled monument SM3667 Eshiels Roman Camp. They are content with the principle of development in this area and welcome the inclusion of mitigation requirements for an adequate buffer zone to protect the physical remains and setting of Eshiels Roman Camps, a</p>	<p>It should be noted that the Council's Ecology Officer and Heritage and Design Officer, as well as Scottish Natural Heritage (SNH) and Historic Environment Scotland (HES) were consulted as part of the site assessment process undertaken for the site. It is noted that none of these consultees objected to the potential allocation of site MESH1001.</p> <p>It should be noted that the site was identified as a Mixed Use site and the MIR set out a number of site requirements including that a Masterplan would be required in taking the site forward. In respect to that requirement, Historic Environment Scotland have recommended that early consultation is undertaken with them.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment</p>	<p>It is recommended that the Council agree not to allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.</p>
---------	---	---	---	--

		<p>suitable management regime for the section of the monument within or adjacent to the development area, and for any infrastructure upgrades to avoid impacts on the scheduled monument. They note that a masterplan would be required for these sites, and recommend early consultation with HES on the development of any masterplan that may emerge. (164)</p> <p>The contributor raises concerns that the development will disrupt the site of archaeological interest, the Roman marching camp that is situated on both sides of the A72. (167)</p> <p>The contributor raises concerns in respect of the archaeological impact of the new infrastructure on the local scheduled monuments. (239)</p>	<p>Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
Eshiels	MESH1001, Land at Eshiels I, Eshiels	<p><u>Greenhouse gas emission:</u></p> <p>The contributor advises that the development would not reduce the need to travel or greenhouse gas emissions. (90)</p>	<p>The SESPlan requires strategic growth in the Scottish Borders to be directed to three Strategic Development Areas (SDA) in the Central Borders, the Western Borders and the Eastern borders.</p> <p>It should also be noted that Scottish Planning Policy requires Local Development Plans to allocate a range of sites which are effective or</p>	<p>It is recommended that the Council agree not to allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this</p>

			<p>expected to become effective in the plan period to meet the housing land requirement of the strategic development plan up to year 10 from the expected year of adoption. They should provide for a minimum of 5 years effective land supply at all times. Failure to meet this requirement would result in a failure to provide a plan-led system. In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that assessment. The site assessment also considers many issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape. In doing this rigorous site assessment process, the best sites possible are identified.</p> <p>Whilst Eshiels may not have a pub or a shop, it has good access to employment and services, and there is the potential access to public transport to be improved on as Eshiels is located just off the A72. In addition, Eshiels is also located in close proximity to the Walkerburn to Peebles multi use path. It is also</p>	<p>location.</p>
--	--	--	---	------------------

			<p>noted that a public footpath runs along the A72 into Peebles, although it is noted that this is on the southern side of the road. A site requirement also sets out a requirement for options for improvements to the existing public transport infrastructure will need to be explored, as well as the suitability of pedestrian provision on the A72.</p> <p>In addition, the plan will continue to encourage and facilitate sustainable means of travel.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land</p>	
--	--	--	--	--

			for employment use, it is recommended that a reduced site at this location for employment only – site BESHI001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.	
Eshiels	MESHI001, Land at Eshiels I, Eshiels	<p><u>Biodiversity:</u></p> <p>The contributor advises that the site presents moderate biodiversity constraints including potential impact upon the River Tweed SAC/SSSI. (91)</p> <p>The contributor states that the proposal would have a reduction of biodiversity counter to Policy EP3. (172, 207)</p> <p>Contributors raise concerns including the following; impact upon local wildlife/ecology/biodiversity/TPO's (108, 140, 167, 179, 185, 202, 239, 241, 216)</p> <p>The contributor raises concerns in respect of the environmental impact upon biodiversity. (239)</p>	<p>It is should be noted that the Council's Ecology Officer as well as Scottish Natural Heritage (SNH) and Scottish Environment Protection Agency (SEPA) were consulted as part of the site assessment process undertaken for site MESHI001. It is noted that none of these consultees objected to the potential allocation of the site MESHI001.</p> <p>In addition, the Main Issues Report included a number of site requirements including "<i>Protect and enhance the existing boundary features, where possible</i>", "<i>Assessment of ecology impacts and provision of mitigation, as appropriate</i>"; and "<i>Mitigation to</i></p>	It is recommended that the Council agree not to allocate site MESHI001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH001 at this location.

		<p>The contributor raises concerns regarding the environmental impact from the development. (197)</p>	<p><i>ensure no significant effect on River Tweed SAC/SSSI</i>.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. 			in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.	
Eshiels	MESHI001, Land at Eshiels I, Eshiels	<p><u>Impact upon River Tweed SAC:</u></p> <p>The contributor states that the proposal would increase the risk of pollution to the River Tweed and its tributaries. (108)</p>	<p>It should be noted that the Council's Ecology Officer as well as Scottish Natural Heritage (SNH) and Scottish Environment Protection Agency (SEPA) were consulted as part of the site assessment process undertaken for the site. It is noted that none of these consultees objected to the potential allocation of the site MESHI001.</p> <p>In addition, the Main Issues Report included a number of site requirements including "Assessment of ecology impacts and provision of mitigation, as appropriate"; and "Mitigation to ensure no significant effect on River Tweed SAC/SSSI".</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment</p>	It is recommended that the Council agree not to allocate site MESHI001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH001 at this location.

			<p>Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
Eshiels	MESH1001, Land at Eshiels I, Eshiels	<p><u>Landscape (SNH):</u></p> <p>The contributor states that development of this site would lead to a significant change in the landscape character of the area, which is currently rural and with dispersed dwellings. They raise concerns that development has the potential to be detrimental to the landscape character and would lead to an isolated and low density development that is physically and perceptually detached from the town.</p>	<p>It is noted that the MIR sets out a number of site requirements that include a requirement for a Masterplan in advance of taking site MESH1001 forward for development.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are</p>	<p>It is recommended that the Council agree not to allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this</p>

		<p>The draft site requirements propose planting, landscaping and shelter belts will be required to provide mitigation and help integrate the site with its surroundings. At this location, they consider that such measures would change the character of this section of the Innerleithen Road, losing the sense of openness and views across this site towards Cardie Hill and Ven Law. The contributor considers that allocating this site is required, part allocation in the northern part of the proposed site around Eshiels steading should be considered. Development would form a less dominant feature and would be within an area where existing boundary features could be strengthened to further reduce impacts.</p> <p>Recommend that if the site is taken forward, that the placemaking aims for the site are clearly articulated in advance. They suggest that the design intentions for neighbourhood functions, the urban form, density of development and the approach to design led landscape mitigation, across this site and (MESH1002) should be clearly set out within the LDP. They advise that in order to produce a coherent approach to a new settlement pattern in this location, an integrated approach to urban form which considered views and design relationship/set back of development from the A72, will be required through a clearly communicated site development brief. (213)</p>	<p>unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	<p>location.</p>
Eshiels	MESH1001, Land at Eshiels I,	<p><u>Co-location issues:</u></p> <p>The contributor highlights that there may be co-</p>	<p>Comment noted. Co-location issues with the nearby Peebles waste water treatment</p>	<p>It is recommended that the Council agree not to</p>

	Eshiels	location issues, including odours, with the nearby Peebles waste water treatment works and the adjacent Eshiels recycling centre. (91)	<p>works and the adjacent Eshiels recycling centre would need to be investigated as part of any planning application.</p> <p>It should also be noted that as part of the site assessment undertaken for site MESH1001, SEPA have stated that there is unlikely to be an impact on the site from SEPA's perspective. Possible odour issues from the Sewage Treatment Works would be dealt with by Scottish Borders Council Environmental Health.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land</p>	allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.
--	---------	---	--	---

			for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.	
Eshiels	MESH1001, Land at Eshiels I, Eshiels	<p><u>Suggested limitations on construction works:</u></p> <p>The contributor suggests that the following limitations are put on any construction work;</p> <ul style="list-style-type: none"> - Sound barriers put in place between their property and the proposed construction works - Acceptable type and level of noise be decided upon, monitored and enforced by Environmental Health Officers on a regular basis - Environmental Health Officers to monitor the amount of light pollution on their property - Environmental Health officers to monitor the proposed construction site to ensure that the dust and smell levels - Request that vehicle movements on the small rural road be limited to specific traffic times and restricted number of vehicles that pass by 	<p>Building works by their very nature, generate noise and additional traffic etc. Planning permissions sometimes include conditions intended to minimise impacts, both during the construction phase and afterwards, during the life of the development. However, issues such as those raised would be dealt with at planning application stage if required.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following</p>	It is recommended that the Council agree not to allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.

		<p>at any given time</p> <ul style="list-style-type: none"> - Request restrictions on the working hours to set times of the day, as to minimise noise pollution during unsociable hours and that no construction works take place on the weekends. (95) 	<p>further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
Eshiels	MESH1001, Land at Eshiels I, Eshiels	<p><u>Access to an existing property:</u></p> <p>The contributor states that the proposed entry barrier/gate on the planning application will be situated directly in front of their property and it will</p>	<p>The Main Issues Report does not set out any access proposals in relation to the potential allocation of site MESH1E001. However, given the location of the contributor's</p>	<p>It is recommended that the Council agree not to allocate site MESH1001 within</p>

		<p>restrict visitors, traffic and movement to their house. Therefore, the contributor requests that the barriers are altered or moved further up the road running alongside their property and/or to install separate barriers at the entrance at the individual car parks so that movement to access their house is not restricted. (95)</p>	<p>property, it is not envisaged that any proposed access for site MESH1001 would impact on their property.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership)</p>	<p>the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.</p>

			<p>funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
Eshiels	MESHI001, Land at Eshiels I, Eshiels	<p><u>De-value existing properties:</u> The contributor states that the proposal will devalue existing properties. (98)</p>	<p>It should be noted that this is not a material planning consideration.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESHI001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council</p>	<p>It is recommended that the Council agree not to allocate site MESHI001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.</p>

			undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.	
Eshiels	MESHI001, Land at Eshiels I, Eshiels	<p><u>Design:</u></p> <p>The contributor states that any development must be designed to a high standard, avoid unacceptable impacts on amenity, and demonstrate social, economic and environmental sustainability. Permission should be refused for development of poor design that fails to take the opportunities available for improving the character and quality of an area and the way it functions.</p> <p>(98)</p>	<p>It should be noted that the Council has produced Supplementary Planning Guidance (SPG) on Placemaking and Design to encourage good design and sustainable development in the Borders. This SPG relates to all housing tenures including affordable housing.</p> <p>In addition, it is noted that the MIR sets out a number of site requirements that include a requirement for a Masterplan in advance of taking the site forward for development.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the</p>	It is recommended that the Council agree not to allocate site MESHI001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.

			<p>existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
Eshiels	MESH1001, Land at Eshiels I, Eshiels	<p><u>Carbon foot print/sustainability:</u></p> <p>The contributor states that an increase in the number of houses (and their occupants) will mean people doing more journeys to get to work, shops etc as there are no facilities close by. This is at odds with the reports stated aim to decrease the</p>	<p>It is not intended to allocate all of the sites identified within the Main Issues Report within the Proposed Local Development Plan.</p> <p>The SESPlan requires strategic growth in the Scottish Borders to be</p>	<p>It is recommended that the Council agree not to allocate site MESH1001 within the Proposed Local Development Plan,</p>

		<p>carbon footprint in the area. (108)</p> <p>The contributor raises concerns that the development will make each household less sustainable as more fossil-fuel miles have to be made to Peebles to shops and schools. (155)</p> <p>The contributor raises concerns regarding the additional carbon emissions, as most homeowners will be commuters. This is counter to the overall SBC objective to be more sustainable by reducing car miles. (172)</p> <p>The contributor states that with such a significant amount of housing proposed this is counter to the overall SBC objective to be more sustainable by reducing car miles, especially as most new home owners will be commuters. (186)</p> <p>The contributor raises concerns that the location of the site will mean the majority of housing if not all will be heavily reliant on private vehicles which does not make this proposal a more sustainable in accordance with LDP MIR para 2.15. (198)</p> <p>The contributor raises concerns that the focus of the LDP is targeting the wrong transport corridors and proposing a higher level of carbon emissions which is contrary to the council's objective of increased sustainability and reduced carbon road miles. (201)</p> <p>The contributor raises concerns that the development would add significantly to carbon emissions, as the majority of house owners will commute to work. This is counter to the overall SBC objective to be more sustainable by reducing</p>	<p>directed to three Strategic Development Areas (SDA) in the Central Borders, the Western Borders and the Eastern Borders.</p> <p>It should also be noted that Scottish Planning Policy requires Local Development Plans to allocate a range of sites which are effective or expected to become effective in the plan period to meet the housing land requirement of the strategic development plan up to year 10 from the expected year of adoption. They should provide for a minimum of 5 years effective land supply at all times. Failure to meet this requirement would result in a failure to provide a plan-led system. In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that assessment. The site assessment also considers many issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape. In doing this rigorous site assessment process, the best sites possible are identified.</p>	<p>but instead allocate a much reduced employment site - BESH1001 at this location.</p>
--	--	--	---	---

		<p>car miles. (292)</p> <p>The contributor states that residents will need to drive to work in Edinburgh, adding to the traffic congestion and pollution. (252)</p> <p>The contributor states that you will be adding to the carbon footprint as it will be family housing with more commuters where car is the only available transport. (241)</p> <p>The contributor raises concerns regarding the increased carbon emissions as a result of the development. (239, 229)</p> <p>The contributor raised concerns regarding the carbon emission increase, as most house owners will be commuters. This is in the opposition to the overall SBC objective to reduce car miles and increase sustainable lifestyles/living. LDP2 MIR para 2.15. (207)</p> <p>The contributor raises concerns that the proposal contradicts the promotion of sustainable travel principles in section 5.8. Development along the A72 will encourage more private car miles, where development along the Borders railway would increase returns on the public expenditure on that public transport. (209)</p> <p>The contributor raises concerns that more cars means more carbon emissions, which is against the SBC objective to be more sustainable by reducing car miles (LDP2 MIR Para.2.15) (216)</p> <p>The contributor raises concerns regarding the extended fossil fuel pollution as a result of the</p>	<p>In relation to the site assessment undertaken for the site, it should be noted that the Roads Planning Section have stated: "... <i>Options for improvements to the existing public transport infrastructure will need to be explored as will the suitability of pedestrian provision in the A72</i>".</p> <p>It is not considered that the majority of new residents that would live at Eshiels would be commuters travelling to Edinburgh. It should be noted that the 2001 Census, Travel to Work Data found that only 20% of Peebles resident employed adults worked in Edinburgh and of these 92% were car drivers or passengers, 6% used the bus and 2% used other transport means (including motorbikes).</p> <p>Whilst Eshiels may not have a pub or a shop, it has good access to employment and services, and there is the potential access to public transport to be improved on as Eshiels is located just off the A72. In addition, Eshiels is also located in close proximity to the Walkerburn to Peebles multi use path. It is also noted that a public footpath runs along the A72 into Peebles, although it is noted that this is on the southern side of the road. A site requirement also sets out a requirement for options for</p>	
--	--	--	---	--

		<p>development. (197)</p> <p>Concerns raised that the area will become a commuter area, to the detriment of those who already live there. The contributor states that if Edinburgh has a problem with the lack of affordable housing, it must address those needs itself rather than export the issue to other areas. (108)</p> <p>Contributor raises concerns that residents would need to use their cars to access shops and services. They will just keep going to Edinburgh even in leisure time and not spend money in Peebles or contribute to the community. (141)</p>	<p>improvements to the existing public transport infrastructure will need to be explored, as well as the suitability of pedestrian provision on the A72.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be</p>	
--	--	--	--	--

			envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.	
Eshiels	MESHI001, Land at Eshiels I, Eshiels	<p><u>Food security:</u></p> <p>The contributor raises concerns regarding food security. The need for a secure local food supply increases, and destroying good agricultural land by building on it is unwise. Land unsuitable for food production should be the land put forward for building, it may be more expensive for the developer, but then it would be even more expensive to try to produce essential food from unsuitable land. (108)</p>	<p>Comments noted.</p> <p>Whilst, brownfield land is the first consideration when identifying additional sites, as a result of limited land availability there is pressure on greenfield land for development, especially in areas where demand for housing is high. The Council therefore seeks to allocate brownfield sites as a redevelopment priority. The Main Issues Report identifies regeneration opportunities across the Borders which are suitable for a variety of uses including housing and employment.</p> <p>It should also be noted that whilst the site is currently in agricultural use, the land is not identified as Prime Quality Agricultural Land. It is considered that the identification of some greenfield / agricultural land is inevitable.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are</p>	It is recommended that the Council agree not to allocate site MESHI001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.

			<p>unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
Eshiels	MESH1001, Land at Eshiels I,	<p><u>Woodland:</u></p> <p>The contributor has identified ancient semi natural</p>	<p>Comments noted.</p> <p>However, it should be noted that the wooded area to the north-eastern</p>	<p>It is recommended that the Council agree not to</p>

	Eshiels	<p>woodland present at the north eastern boundary of the site. According to the Scottish Government's policy on woodland removal, there is a strong presumption against the removal of this type of woodland. According to SPP provisions, development which is likely to negatively impact this type of woodland should be located away from the area. Therefore they would like to see a requirement included which asks for a buffer area between the development boundary and the woodland. (199)</p> <p>They would also be able to support the requirement to protect and enhance boundary features, if the wording 'where possible' was removed. (199)</p> <p>They would like to see any additional planting on site to be specifically native tree planting with trees which have been sourced and grown within the UK. (199)</p>	<p>boundary of the site is not an Ancient Woodland. In addition, while the area referred to by the contributor is only slightly within the site boundary (as evident on the "Scotland's Environment" website), it is not considered that removal of all or even part of this woodland would be required in the development of site MESH1001.</p> <p>It should also be noted that the Main Issues Report sets out a number of site requirements that include a requirement for a Masterplan in advance of taking site MESH1001 forward for development. That document would be subject to public consultation and would also include greater detail as to the potential development of the site.</p> <p>In respect to the site requirement to protect and enhance boundary features, it is not considered appropriate to remove the wording "<i>where possible</i>". As it would be inevitable that some boundary features may require removal to gain vehicular/pedestrian access into the site.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are</p>	<p>allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.</p> <p>In respect to site BESH1001 it is noted that the following site requirements are recommended in relation to landscaping for inclusion within the Proposed Local Development Plan:</p> <ul style="list-style-type: none"> • "Protect and enhance the existing boundary features, where possible. Buffer areas for new and existing landscaping will be required • Planting, landscaping and shelterbelt required, to provide mitigation from

			<p>unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	<p>the impacts of development from sensitive receptors and to help integrate the site into the wider setting</p> <ul style="list-style-type: none"> • The long term maintenance of landscaped areas must be addressed”.
Eshiels	MESH1001, Land at Eshiels I,	<u>Disproportionate/alternative locations for development:</u>	It should be noted that it is not intended that all of the sites identified within the Main Issues	It is recommended that the Council agree not to

	Eshiels	<p>The contributor states that the scale of the proposed mixed use site is disproportionate to the developments proposed elsewhere in the Borders. (201)</p> <p>The contributor raises concerns regarding high number of houses proposed compared to other areas and proportion of the total number for the Borders. (241)</p> <p>The contributor states that the sites are looking to deliver the largest number of houses of the whole plan, in a hamlet that is not even identified as a settlement. The proposal is disproportionate to the size of the small settlement which currently exists. (239)</p> <p>The contributor states that the number of houses/businesses suggested for the Eshiels sites on its own is greater than the 'preferred sites' for the rest of the Scottish Borders, which is shocking and totally disproportionate. (207)</p> <p>The contributor states that the number of units (240) for 2 preferred sites at Eshiels is greater than for the whole of the rest of the Borders, which is out of proportion. (216)</p> <p>The contributor states that the proposal is disproportionate to the overall requirement (3,841). (197)</p> <p>The main settlements are the areas which should be developed Borders wide, developing very small settlements such as Eshiels will cause undue pressure on an already heavily laden services system. (179)</p>	<p>Report (MIR) for the Tweeddale Locality will be brought forward for development. The MIR in paragraph 3.3 notes that "<i>it is not anticipated the LDP2 will require a significant number of new housing sites</i>". The purpose of the MIR was to identify a number of site options and present those to the public so that LDP2 could then be informed by their responses.</p> <p>In addition, it should be noted that the Council are also required to allocate sufficient land within the Central, Eastern and Western Strategic Development Areas.</p> <p>Scottish Planning Policy requires LDP's to allocate a range of sites which are effective or expected to become effective in the plan period to meet the housing land requirement of the strategic development plan up to year 10 from the expected year of adoption. They should provide for a minimum of 5 years effective land supply at all times. Failure to meet this requirement would result in a failure to provide a plan-led system.</p> <p>This site was identified through an independent study that was carried out by consultants to identify site options within the vicinity of Peebles. The study findings have</p>	allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.
--	---------	--	--	---

		<p>The contributor states that the houses proposed would be disproportionate to the total number of proposed houses planned for the whole of the Borders. (185)</p>	<p>informed the potential site options set out in the Main Issues Report (MIR).</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership)</p>	
--	--	--	---	--

			<p>funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
Eshiels	MESH1001, Land at Eshiels I, Eshiels	<p><u>Existing business/industrial sites:</u></p> <p>The contributor states that there are a number of existing business units/industrial areas in the town of Peebles that are currently not at full capacity. If business units are at Eshiels it will take business away from the High Street which already has empty premises. (202)</p> <p>The contributor states that they are unaware of any businesses or industry being carried out at Eshiels. They are therefore confused as to why this has been designated as a mixed use development site. (269)</p> <p>The contributor states the businesses based in small units (.g) Calvary Park, whilst making a contribution, are a tiny %. Peebles has in essence become a distant suburb of Edinburgh. Trying to address/improve this by suggesting mixed use development and urbanisation in Eshiels is nonsensical. (207)</p>	<p>It is not intended to allocate all of the sites identified within the Main Issues Report within the Proposed Local Development Plan.</p> <p>It should be noted that the LDP process is advised by the Council's Economic Development section as to the requirement for additional land for Business and Industrial use. In addition, it should be noted that the Council through the Economic Development section and the Development Management section, receives regular enquiries from businesses to locate within the Western Strategic Development Area. Furthermore, the Council undertakes an Employment Land Audit annually to monitor the take up and availability of business and industrial land across the Borders.</p> <p>It should also be noted, that the Council have not received any acceptable alternative locations for Mixed Use/ Business and Industrial sites within the Western Strategic Development Area for inclusion in the LDP2 as part of the call for sites or through the Main Issues Report</p>	<p>It is recommended that the Council agree not to allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.</p>

			<p>public consultation process.</p> <p>In addition, it is not anticipated that any of the mixed use sites identified within the Main Issues Report would have a negative impact on the Peebles High street.</p> <p>It should be noted that as at March 2018, there were 343,535 Small and Medium-sized Enterprises (SMEs) operating in Scotland, providing an estimated 1.2 million jobs. SMEs accounted for 99.3% of all private sector enterprises, accounting for 54.9% of private sector employment and 41.5% of private sector turnover. (Scottish Government Website https://www2.gov.scot/Topics/Statistics/Browse/Business/Corporate/KeyFacts). This therefore, illustrates the importance that SME's make to the economy.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible</p>	
--	--	--	---	--

			<p>due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
Eshiels	MESH1001, Land at Eshiels I, Eshiels	<p><u>Amenity:</u></p> <p>They would lose their view and have no privacy as a result of the development. They do not feel that it would be a safe place to raise their family. They chose to live their because of it's rural, scenic and offers space for leisure. (202)</p> <p>The contributor raises concerns regarding the impact upon the amenity, including views, noise</p>	<p>In the event of that any planning application was submitted on site MESH1001, Policy HD3 Protection of Residential Amenity would be taken into account in its consideration.</p> <p>The Council is aware of the sensitive location and designations and notes within the site</p>	<p>It is recommended that the Council agree not to allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site -</p>

		<p>and lighting as a result of the development. (249)</p> <p>The contributor states that the volume proposed in Eshiels would be overbearing on the current properties. (276)</p> <p>The contributor raises concerns in respect of the destruction of the visual amenity. (209)</p>	<p>requirements for site MESH1001 in the Main Issues Report (MIR) that landscaping and screening would need to be carefully considered together with the site layout and design during the planning process to minimise any detrimental impacts on the landscape and views.</p> <p>In addition, it is noted that the MIR set out a number of other site requirements that included a requirement for a Masterplan in advance of taking the site forward for development.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land</p>	<p>BESH1001 at this location.</p>
--	--	--	---	-----------------------------------

			for employment use, it is recommended that a reduced site at this location for employment only – site BESH001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.	
Eshiels	MESH001, Land at Eshiels I, Eshiels	<p><u>Drainage:</u></p> <p>The contributor states that drainage on the Eshiels site from this proposed development may contribute negatively to the flow of the River Tweed. (276)</p> <p>Contributor raises concerns regarding the drainage from the site. (269, 293)</p> <p>Contributor states that there is no surface water or foul water drainage facilities. The existing capacity of the Scottish Water Sewerage Treatment Works at Eshiels is already being exceeded with limited opportunity for expansion. The option for 'reed bed' treatment and disposal into the River Tweed is not viable due to constraints from SEPA and loss of high value tourist salmon fishing and environmental damage. (252)</p>	As part of the site assessment process for the site, SEPA were consulted and stated that they required a Flood Risk Assessment to be undertaken to assess the risk from the Linn Burn and any small watercourses which flow through and adjacent to the site. The River Tweed may also require consideration. In addition, due to the steepness of the adjacent hill slopes, SEPA also recommended that consideration is given to surface water runoff to ensure the site is not at risk of flooding and nearby development and infrastructure are not at increased risk of flooding. It is noted that SEPA did not object to the potential	It is recommended that the Council agree not to allocate site MESH001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH001 at this location.

			<p>inclusion of the site within the Plan.</p> <p>In respect to Sewage facilities, whilst access to sewage facilities may currently be an issue, upgrades can overcome that issue.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice</p>	
--	--	--	---	--

			for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.	
Eshiels	MESHI001, Land at Eshiels I, Eshiels	<p><u>Siting of industrial buildings:</u></p> <p>The contributor states that they do not think that the siting of industrial units within a housing development is appropriate. (292)</p>	<p>It should be noted that site MESHI001 was identified as a Mixed Use site and not a Housing site. Furthermore the site requirements set out in the Main Issues Report stated that a Masterplan would be required in taking the site forward. The Masterplan would seek to address the concern raised by the contributor in relation to siting industrial buildings adjacent to residential use.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the</p>	It is recommended that the Council agree not to allocate site MESHI001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.

			<p>Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
Eshiels	MESH1001, Land at Eshiels I, Eshiels	<p><u>Lack of services within Eshiels:</u></p> <p>The contributor states that Eshiels currently has no pub or shop. Housing development should surely be focussed on places that can offer residents some local services. (300)</p>	<p>Whilst Eshiels may not have a pub or a shop, it has good access to employment and services, and there is the potential access to public transport to be improved on as Eshiels is located just off the A72. In addition, Eshiels is also located in close proximity to the Walkerburn to Peebles multi use path. It is also noted that a public footpath runs along the A72 into Peebles, although it is noted that this is on</p>	<p>It is recommended that the Council agree not to allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.</p>

			<p>the southern side of the road. A site requirement also sets out a requirement for options for improvements to the existing public transport infrastructure will need to be explored, as well as the suitability of pedestrian provision on the A72.</p> <p>In addition, it should be noted that the Council are also required to allocate sufficient land within the Central, Eastern and Western Strategic Development Areas.</p> <p>Scottish Planning Policy requires Local Development Plans to allocate a range of sites which are effective or expected to become effective in the plan period to meet the housing land requirement of the strategic development plan up to year 10 from the expected year of adoption. They should provide for a minimum of 5 years effective land supply at all times. Failure to meet this requirement would result in a failure to provide a plan-led system.</p> <p>Site MESH1001 was identified through an independent study that was carried out by consultants to identify site options within the vicinity of Peebles. The study findings have informed the potential site options set out in the Main Issues Report (MIR).</p>	
--	--	--	--	--

			<p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily</p>

--	--	--	---	--

			Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.	
Eshiels	MESHI001, Land at Eshiels I, Eshiels	<u>Broadband infrastructure:</u> The contributor raises concerns regarding the lack of suitable broadband infrastructure. (239)	The Scottish Borders has benefited from the Digital Scotland Superfast Broadband rollout which was programmed to connect 94.9% of premises to Fibre to the Cabinet Broadband by the end of 2018 (this includes the additional 'Gainshare' funding). The remaining gap in provision which comprises remoter rural areas and premises which suffer from 'long lines' will be addressed by the Scottish Government's R100 programme. It is critical that the region also maximises the provision of Full Fibre Connectivity to Businesses and the wider community. Mobile phone coverage is an important complement to the rollout of Superfast Broadband. Ongoing investments by Mobile Network Operators will result in significant improvements across the Scottish Borders. Efforts are being made to ensure that this coverage will be as comprehensive as possible and that the region will benefit from 5G coverage in the future.	No further action required.
Eshiels	MESHI001, Land at	<u>Existing use on the site:</u>	It should be noted that the Forestry Commission are a statutory	It is recommended that the Council

	Eshiels I, Eshiels	<p>The contributor raises concerns that Forestry Commission do not appear to have been consulted at the appropriate level as to the impact of the proposed development on the use of the new Forest Lodges, on major events where the Forestry Commission use these fields for additional parking, nor has it been considered the impact on parking more generally, in reduced appeal of Glentress generally if the development goes ahead, and more specifically the loss of revenue for the Forestry Commission of cars parking in the new development in preference to the paid car parks, nor any provision to mitigate the impact of this on the residents of the proposed developments. (239)</p>	<p>consultee in the Development Plan process and will continue to be involved.</p> <p>In respect to comments regarding to potential impacts on tourism and on Glentress; it should be noted that VisitScotland and the Forestry Commission have been consulted regarding the potential allocation of this site within the Local Development Plan and neither have objected to its potential allocation.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at</p>	<p>agree not to allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.</p>
--	-----------------------	--	---	---

			<p>this location for employment only – site BESHI001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
Eshiels	MESHI001, Land at Eshiels I, Eshiels	<p><u>Local economy:</u></p> <p>The contributor states that the development would damage the local economy and is counter to Policy ED7. They also raise concerns that it is likely new arrivals will be commuters to Edinburgh, with there being a lack of economic spending. (216)</p>	<p>It should also be noted that LDP policy ED7 Business, Tourism and Leisure Development in the Countryside aims to allow for appropriate employment generating development in the countryside whilst protecting the environment and to ensure that business, tourism and leisure related developments are appropriate to their location. It is not considered that any of the potential sites identified within the Main Issues Report is contrary to this policy.</p> <p>In addition, it should be noted that the 2001 Census, Travel to Work Data found that only 20% of Peebles resident employed adults worked in Edinburgh and of these 92% were car drivers or</p>	<p>It is recommended that the Council agree not to allocate site MESHI001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH001 at this location.</p>

			<p>passengers, 6% used the bus and 2% used other transport means (including motorbikes).</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership)</p>	
--	--	--	--	--

			<p>funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
Eshiels	MESHI001, Land at Eshiels I, Eshiels	<p><u>Housing tenure:</u></p> <p>The contributor states that the housing will be for the affluent people from outwith the Borders. A few 'affordable' houses thrown in will not solve housing problems for people who live here. (235)</p>	<p>It should be noted that Scottish Planning Policy (SPP) and the Strategic Development Plan (SDP) include an affordable housing benchmark figure of 25%. The benchmark was given detailed consideration as part of the Affordable Housing SPG and this confirmed a need for 25%.</p> <p>The SDP requires strategic growth in the Scottish Borders to be directed to three Strategic Development Areas (SDA) in the Central Borders, the Western Borders and the Eastern Borders.</p> <p>It should also be noted that SPP requires Local Development Plans to allocate a range of sites which are effective or expected to become effective in the plan period to meet the housing land requirement of the strategic development plan up to year 10 from the expected year of adoption. They should provide for a minimum of 5 years effective land supply at all times. Failure to meet this requirement would result in a failure to provide a plan-led system.</p>	<p>It is recommended that the Council agree not to allocate site MESHI001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESHI001 at this location.</p>

			<p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter</p>	
--	--	--	--	--

			planting will be required to be carried out at an early stage.	
Eshiels	MESH1001, Land at Eshiels I, Eshiels	<p><u>Light pollution:</u></p> <p>The contributor raises concerns regarding the introduction of light pollution for the first time, to the hamlet. (197)</p>	<p>In relation to comments regarding light pollution, this is a detailed issue that would be considered at planning application stage.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice</p>	It is recommended that the Council agree not to allocate site MESH1001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.

			for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.	
Eshiels	MESHI001, Land at Eshiels I, Eshiels	<p><u>Contrary to MIR statement:</u></p> <p>The contributor raises concerns that the proposal is contrary to the MIR statement, regarding the protection of the Scottish Borders Countryside and sustainable travel principles. (197)</p>	<p>It is acknowledged that paragraph 5.8 of the Main Issues Report (MIR) states: “<i>The Scottish Borders is an attractive area to live and work in and the Council continues to receive many applications for housing in the countryside. Whilst supporting such proposals which can help economic growth and local village services, this must be weighed up against matters such as the protection of the Scottish Borders countryside and sustainable travel principles. The Scottish Borders has outstanding scenic qualities within its landscape and planning policy seeks to protect it</i>”.</p> <p>However, Scottish Planning Policy (SPP) requires Local Development Plans to allocate a range of sites which are effective or expected to become effective in the plan period to meet the housing land requirement of the strategic development plan up to year 10 from the expected year of adoption. They should provide for a minimum</p>	It is recommended that the Council agree not to allocate site MESHI001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.

			<p>of 5 years effective land supply at all times. Failure to meet this requirement would result in a failure to provide a plan-led system. In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that assessment. In doing this rigorous site assessment process, the best sites possible are identified. The site assessment also considers many issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site</p>	
--	--	--	---	--

			<p>MESHI001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
Eshiels	MESHI001, Land at Eshiels I, Eshiels	<p><u>Settlement boundary:</u></p> <p>The contributor states could/should Eshiels seek to be a settlement boundary especially if the plan goes ahead? (276)</p>	<p>Comments noted.</p> <p>It should be noted that had either site MESHI001 or MESHI002 been allocated within the Proposed Local Development Plan (LDP) 2, then a new Development Boundary would have been drawn around Eshiels thereby giving Eshiels settlement status within the LDP.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation,</p>	<p>It is recommended that the Council agree not to allocate site MESHI001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH001 at this location.</p>

			<p>including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESH1001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
--	--	--	---	--

			Furthermore, given that it is recommended that only an employment allocation is proposed at Eshiels, it is not recommended that a new Development Boundary is drawn to form a formal settlement at this location. It is noted that a similar approach has already been taken elsewhere within the LDP at St Boswells for Charlesfield.	
Eshiels	MESHI001, Land at Eshiels I, Eshiels	SEPA state that in respect of co-location, Peebles STW (CAR) and Eshiels community recycling centre (WML) are located across the road and to the west of the site. These sites are however unlikely to have an impact on the site from SEPA's perspective. Possible odour issues from the STW would be dealt with by SBC Environmental Health.	<p>Comments noted. Co-location issues, if necessary would issues investigated as part of any planning application.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions of the Scheduled Monument on site MESHI001, it is now not intended to allocate the site within the Proposed Local Development Plan (LDP).</p> <p>Nevertheless, taking into account the immediate need to identify land for employment use, it is</p>	<p>It is recommended that the Council agree not to allocate site MESHI001 within the Proposed Local Development Plan, but instead allocate a much reduced employment site - BESH1001 at this location.</p> <p>Include the following site requirement within the Proposed Local Development Plan for site BESH1001: <i>"It appears that there may be a culverted watercourse at the southern end of the site, therefore a feasibility study will be required to</i></p>

		<p>There is a watercourse that runs through/adjacent to the site which should be protected and enhanced as part of any development. Therefore, a site requirement is needed to ensure that a maintenance buffer strip of at least 6 metres wide is provided between the watercourse and built development. Additional water quality buffer strips may be required.</p> <p>It appears that there may be a culverted watercourse at the southern end of the site. It is</p>	<p>recommended that a reduced site at this location for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p> <p>As a result of a reduced site now recommended at this location, many of the site requirements set out for MESH1001 are still relevant for site BESH1001.</p> <p>It is noted that the Main Issues Report already noted the site requirement for site MESH1001 regarding the need for a maintenance buffer strip of at least 6 metres wide is provided between the watercourse and built development and that additional water quality buffer strips may be required.</p> <p>Comment noted. It is proposed that a new site</p>	<p><i>investigate the potential for channel restoration</i>".</p> <p>In addition it is also proposed in relation to flood risk to include reference to the River Tweed: "... <i>The River Tweed may also require consideration. Consideration will need to be given to bridge and culvert structures within and adjacent to the site which may exacerbate flood risk</i>".</p>
--	--	---	---	--

		<p>therefore recommended that a site requirement is attached requiring a feasibility study including a flood risk assessment to be undertaken prior to development to assess the potential for channel restoration.</p> <p>SEPA require an FRA which assesses the risk from the Linn Burn and any small watercourses which flow through and adjacent to the site. The River Tweed may also require consideration. Consideration will need to be given to bridge and culvert structures within and adjacent to the site which may exacerbate flood risk. Due to the steepness of the adjacent hill slopes we would also recommend that consideration is given to surface water runoff to ensure the site is not at risk of flooding and nearby development and infrastructure are not at increased risk of flooding.</p> <p>There is a surface water hazard identified.</p> <p>There is no public foul sewer in the vicinity and if this site was to be developed this would be an opportunity to provide first time sewerage provision to Eshiels, picking up existing properties also. Any private sewerage provision would be likely to require to discharge to the River Tweed rather than the Linn Burn. The watercourse that runs through/adjacent to the site should be protected and enhanced as part of any development. It appears that there may be a culverted watercourse at the southern end of the site. Depending on the use of the proposed site, there may be a requirement for permission to be sought for certain activities from SEPA. (119)</p>	<p>requirement is included within the Proposed Local Development Plan regarding the need for a feasibility study.</p> <p>Comments noted. It is proposed that the first site requirement is amended to include, that the River Tweed may also require consideration.</p> <p>Comment noted.</p> <p>Comments noted. It is noted that reference to foul water disposal will be made within Volume 2 of the Proposed Local Development Plan.</p> <p>These issues would be addressed at planning application stage.</p>	
Eshiels	MESHI002, Land at	<u>General:</u>	The SESPlan requires strategic growth in the Scottish Borders to be	It is recommended that the Council

	Eshiels II, Eshiels	<p>The contributor objects to the inclusion of (MESH1002) within the MIR. (189)</p> <p>The contributor states that the population density of the Eshiels development alone has 30% households per hectare. (276)</p> <p>Advises that 240 houses will swamp the existing community, linking Peebles to Cardrona, with a major loss of good quality agricultural land and jobs essential to the economy. (20)</p> <p>The contributor highlights that the supporting document makes reference to a sawmill at Eshiels, which has not existed for over 20 years. (150)</p> <p>There are inconsistencies between the proposals and existing SBC policies. (166)</p> <p>The contributor states that SBC should not try to concentrate so many new developments around Peebles. Instead it should be trying to grow the economy around the train corridor leading to Galashiels. (188)</p> <p>The contributor raises concerns that the three fields are in the middle of nowhere and were selected totally at random for no rhyme nor reason. (201)</p> <p>The contributor states that there are people out there who really care about the area. This is their past and their future, and this is something they are willing to fight for. (249)</p> <p>The contributor states that the suggestion of a</p>	<p>directed to three Strategic Development Areas (SDA), in the Central Borders, the Western Borders and the Eastern Borders.</p> <p>It should be noted that it is not intended that all of the sites identified within the Main Issues Report (MIR) for the Tweeddale Locality will be brought forward for development. The MIR in paragraph 3.3 notes that “<i>it is not anticipated the LDP2 will require a significant number of new housing sites</i>”. The purpose of the MIR was to identify a number of site options and present those to the public so that the Local Development Plan (LDP) 2 could then be informed by their responses.</p> <p>It should also be noted that Scottish Planning Policy requires LDP’s to allocate a range of sites which are effective or expected to become effective in the plan period to meet the housing land requirement of the strategic development plan up to year 10 from the expected year of adoption. They should provide for a minimum of 5 years effective land supply at all times. Failure to meet this requirement would result in a failure to provide a plan-led system.</p> <p>This site was identified through an independent study that was carried</p>	agree not to allocate this site within the Proposed Local Development Plan.
--	---------------------	---	--	---

		<p>mixed use conurbation in Eshiels is absurd. (276)</p>	<p>out by consultants to identify site options within the vicinity of Peebles. The study findings have informed the potential site options set out in the Main Issues Report (MIR). It should be noted that the site was identified as a Mixed Use site and the Main Issues Report set out a number of site requirements including that a Masterplan would be required in taking the site forward.</p> <p>In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that assessment. In doing this rigorous site assessment process, the best sites possible are identified. The site assessment also considers many issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape.</p> <p>It should be noted that whilst the site is currently in agricultural use, the land is not identified as Prime Quality Agricultural Land. The identification of some greenfield / agricultural land is however</p>	
--	--	---	---	--

			<p>inevitable.</p> <p>In relation to the comment regarding to reference to a sawmill at Eshiels, it should be noted that this is an Ordinance Survey issue and is outwith the control of the Council. Updates on the Ordinance Survey base maps will be undertaken in due course.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify</p>	
--	--	--	---	--

			site MESH1002 within the Proposed LDP.	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Deliverability of the site:</u></p> <p>The contributor notes that given the major infrastructure investment required, this has the potential to affect deliverability of the site. Given sewerage capacity continues to be a major factor in site deliverability in the Borders generally, it is considered to be premature to allocate such a large site without knowledge or capacity issues. Notes that a fundamental aspect of site deliverability is landowner and developer willingness and sites should only be allocated where there is such willingness to engage in taking forward the development process. There are no assurances regarding the deliverability within LDP2 timeframe as very little background research has been done, including establishing landowner willingness, as noted above and drainage/water supply capacities (91)</p>	<p>Whilst access to sewage facilities may currently be an issue, upgrades can overcome that issue.</p> <p>A site is effective under the terms of the Planning Advice Note (PAN) 2/2010 if it can be developed within the programme period. The Council undertakes an annual Housing Land Audit that monitors the effectiveness of housing land. This will continue to be used to assess the appropriate allocations in the plan.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

			<p>Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Commuter area:</u></p> <p>Concerns raised that the area will become a commuter area, to the detriment of those who already live there. The contributor states that if Edinburgh has a problem with the lack of affordable housing, it must address those needs itself rather than export the issue to other areas. (108)</p> <p>Contributor raises concerns that residents would need to use their cars to access shops and services. They will just keep going to Edinburgh even in leisure time and not spend money in Peebles or contribute to the community. (141)</p>	<p>The 2001 Census, Travel to Work Data found that 20% of Peebles resident employed adults worked in Edinburgh and of these 92% were car drivers or passengers, 6% used the bus and 2% used other transport means (including motorbikes).</p> <p>It should also be noted that the Council are required to identify a generous supply of land to meet identified housing need (including affordable housing) across the Strategic Development Areas. Failure to meet this requirement may result in development sites coming forward through the Development Management process and/or the Planning Appeals process.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the</p>	<p>It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.</p>

			<p>existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Location:</u></p> <p>The contributor states that the location is not suitable for a public transport provision or 'active travel' perspective. Existing provision is unsatisfactory based even on current demand at Eshiels. (91)</p>	<p>It is noted that the site is within close proximity to Peebles, which is 2 miles to the west. However, the close proximity to Peebles, including the cycle path along the former railway line, provides access to a wider range of services, employment and public transport opportunities. Furthermore the Main Issues Report (MIR) notes that: <i>"Improvements to the road network and public transport must continue to be supported"</i>.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

			<p>landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Coalescence:</u></p> <p>The contributor states that in the event that both (MESH1001 and MESH1002) are developed, there would be significant coalescence of development in this location on the north side of the River Tweed with consequent detrimental impact upon the SLA. (91)</p>	<p>Comments noted.</p> <p>It is acknowledged that the Main Issues Report (MIR) identified two sites for potential mixed use development; however, it is not considered there would be evidence of coalescence.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

			<p>unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Surrounding views/key receptors/setting:</u></p> <p>The contributors object to the inclusion of (MESH1002), being regular visitors to the area, including some of the following concerns; impact upon the surrounding views, peace and tranquillity of the area. (31, 33, 34, 37, 43, 64, 76, 83, 98, 140)</p> <p>The contributor raises concerns regarding the impact of the development upon the tranquillity of Peebles and the surrounding countryside. (205)</p> <p>Contributor objects to the inclusion of the site. As</p>	<p>It should be noted that it is not intended that all of the sites identified within the Main Issues Report (MIR) for the Tweeddale Locality will be brought forward for development.</p> <p>The MIR in paragraph 3.3 notes that <i>"it is not anticipated the LDP [Local Development Plan] 2 will require a significant number of new housing sites"</i>. The purpose of the MIR was to identify a number of site options and present those to the public so</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

	<p>a local resident who moved from Edinburgh to live in a rural setting which is famous throughout the world, object to houses or communities to be built on their doorstep. (97)</p> <p>Contributor states that the area between Eshiels and Cardrona is exceptionally beautiful. (167)</p> <p>The contributor raises concerns that the views from the tourist cottage will change drastically and objects to the development. (49,96)</p> <p>The development would result in the loss of existing views from many of the current houses in Eshiels. (90)</p> <p>Contributor raises concerns regarding the impact upon the views/landscape/scenery. (50, 52, 53, 149, 202, 239, 243, 320, 233)</p> <p>The contributor states that there would be an unacceptable landscape impact from key receptors along the A72 given the openness and topography of the site. (91)</p> <p>The development will have a huge impact on the scenic character of this beautiful part of the Tweed valley and approach to Glentress, identified as being a major tourist attraction. The creation of a separate development will blight the landscape for tourists, walkers and mountain bikers. (46)</p> <p>The contributor states the impact on the surrounding recreational area of Glentress and surrounding countryside on outdoor activities will be adversely affected. This appears to be counter to Policy ED7. (198)</p>	<p>that LDP2 could then be informed by their responses. In addition, it should be noted that the Council are also required to allocate sufficient land within the Central, Eastern and Western Strategic Development Areas.</p> <p>Scottish Planning Policy requires LDP's to allocate a range of sites which are effective or expected to become effective in the plan period to meet the housing land requirement of the strategic development plan up to year 10 from the expected year of adoption. They should provide for a minimum of 5 years effective land supply at all times. Failure to meet this requirement would result in a failure to provide a plan-led system.</p> <p>In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that assessment. In doing this rigorous site assessment process, the best sites possible are identified. The site assessment also considers many issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such</p>

		<p>The contributor states that the cycle path allows access to the beautiful green area between Peebles and Cardrona and it should be retained. (249)</p> <p>The contributor states that the rural development plan talks of the importance of the open and sweeping scenic vistas. (276)</p> <p>The contributor states that people enjoy the 'wilderness' experience and this must be valued. (243)</p> <p>The contributor raises concerns that the development will destroy their views from the garden and the approach to Glentress Forest and surrounding hills. (227)</p> <p>Contributor raises concerns regarding the visual impact of the development. (197)</p>	<p>as archaeology, biodiversity, flood risk and landscape.</p> <p>In respect to comments regarding potential impacts on tourism and on Glentress; it should be noted that VisitScotland and the Forestry Commission have been consulted regarding the potential allocation of this site within the Local Development Plan; neither have objected to its potential allocation.</p> <p>With regards to comments relating to landscape and that the site is located within the Tweed Valley Special Landscape Area, it should be noted that neither Scottish Natural Heritage or the Council's Landscape Section objected to the potential inclusion of the site within the Local Development Plan.</p> <p>It should be noted that loss of a view is not a material consideration in Planning.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has</p>	
--	--	---	---	--

			<p>now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Scale of the development/character of the area/SLA:</u></p> <p>The contributor states that the scale of the proposed development will blight the lives of the current Eshiels community. (46, 69)</p> <p>Contributor raises concerns regarding the number of houses suggested. They note that other rural sites within the plan have much lower densities. They suggest that a development of around 20 houses within Eshiels would be more appropriate. (300)</p> <p>The contributor states that the development would have a negative impact upon the Tweed Valley. (188)</p> <p>The contributor highlights that Eshiels is not an</p>	<p>It should be noted that it is not intended that all of the sites identified within the Main Issues Report (MIR) for the Tweeddale Locality will be brought forward for development.</p> <p>The MIR in paragraph 3.3 notes that <i>"it is not anticipated the LDP [Local Development Plan] 2 will require a significant number of new housing sites"</i>. The purpose of the MIR was to identify a number of site options and present those to the public so that LDP2 could then be informed by their responses. In addition, it should be noted that the Council are also required to allocate sufficient land within the Central, Eastern and</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

	<p>existing settlement within the LDP and that housing/industrial premises would swamp Eshiels. (139)</p> <p>The contributor states that having a huge development at the entrance to Peebles will take away from the appeal of Peebles. (186)</p> <p>The contributor raises concerns regarding the unique organic character and development pattern of Eshiels. Housing co-exists with small scale rural and agricultural enterprise, which makes it a very hospitable place where people enjoy living and working. Previous new buildings have been carefully integrated into the landscape and the existing settlement pattern, retained within the original field boundaries. (139)</p> <p>The contributor objects to the development of this site, raising concerns regarding the scale of the proposed development, as well as the location and the impact of which, will be too great upon the surrounding area. (51)</p> <p>The contributor states that the development would be out of scale/character for the area. (90, 98, 140, 142, 150, 158, 166, 178, 179, 180, 185, 188, 186, 194, 198, 201, 241, 268, 269, 276, 298, 207)</p> <p>The contributor states that the development would severely detract from the current atmosphere and attractiveness of the area. (149)</p> <p>The proposal for the two Eshiels sites exceeds the number of houses/businesses for the whole of the rest of the Borders and are completely out of proportion. The site is unwelcome urbanisation.</p>	<p>Western Strategic Development Areas.</p> <p>Scottish Planning Policy requires LDP's to allocate a range of sites which are effective or expected to become effective in the plan period to meet the housing land requirement of the strategic development plan up to year 10 from the expected year of adoption. They should provide for a minimum of 5 years effective land supply at all times. Failure to meet this requirement would result in a failure to provide a plan-led system.</p> <p>In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that assessment. In doing this rigorous site assessment process, the best sites possible are identified. The site assessment also considers many issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape.</p> <p>In respect to comments regarding to potential impacts on tourism and on</p>	
--	---	--	--

	<p>(172)</p> <p>The site is out of character and contrary to Policy PMD4 and LDP2MIR para 3.6. (172, 185, 186, 198, 207, 216)</p> <p>The contributor states that the site is out of proportion. (216)</p> <p>The contributor states that the site is too compact for the proposed development and the scheme shows characteristic indications of overdevelopment. The layout and form is different from other dwellings in the immediate vicinity. Raises concerns that the proposed layout and design features are not informed by any analysis of what should fit respectfully within the local scene and with other sites in the area, merely by site restraints. Development proposals must demonstrate that they, and ancillary activities associated with them, will respect and enhance the character of the site, its context and surroundings in terms of its architectural approach. This poor design does not reflect this. (98)</p> <p>The contributor states that the development would destroy the character of the area. This would be an unwelcome urbanisation of the countryside which will contribute to destroying the uniqueness of the Scottish Borders countryside. (52)</p> <p>The contributor states that the scale of the development is incongruous with the existing settlement, the landscape setting and the SLA, resulting in a loss of openness, with detrimental impact upon the local landscape character. The</p>	<p>Glentress; it should be noted that VisitScotland and the Forestry Commission have been consulted regarding the potential allocation of this site within the Local Development Plan; neither have objected to its potential allocation.</p> <p>Furthermore, it should be noted that the Council's Roads Planning Section and Network Manager have been consulted. It is noted that neither of these consultees objected to the potential allocation of the site MESH1002.</p> <p>With regards to comments relating to landscape and that the site is located within the Tweed Valley Special Landscape Area, it should be noted that neither Scottish Natural Heritage or the Council's Landscape Section objected to the potential inclusion of the site within the Local Development Plan.</p> <p>In respect to comments that the site would be contrary to LDP Policy PMD4 Development Outwith Development Boundaries, it should be noted that should the site be allocated, the site and Eshiels would be included within a new Development Boundary.</p> <p>In respect to comments regarding amenity, it should be noted that</p>	
--	---	--	--

		<p>contributor highlights that the site is very prominent in the landscape setting and specifically on the approaches to and from Peebles. The area is exposed and its development will have a material detrimental impact upon the setting of Eshiels and will appear incongruous within the wider landscape. It is not considered that development of the scale proposed at this location would be based upon a clear understanding of the context or the 'sense of place' of the existing settlement at Eshiels. (91)</p> <p>The contributor states that Eshiels is a designated SLA and additional development as proposed will result in the urbanisation of an, essentially rural area. (166)</p> <p>The contributor raised concerns regarding the impact upon the Special Landscape Area. (172, 178, 179, 185, 186, 239, 207, 216)</p> <p>The contributor raises concerns that the site is within the Tweed Valley SLA and is therefore due to special protection from insensitive development such as those proposed. It is not of an appropriate scale, will have a major landscape impact, and will prejudice the character of the area. The proposed developments are not appropriate and counter to existing policies. It represents unwelcomed urbanisation of the countryside which will contribute to destroying the uniqueness of the Scottish Borders countryside and biodiversity. (155)</p> <p>The contributor states that the site is located within the heart of the Tweed Valley SLA where management recommendation include taking</p>	<p>Policy HD3 Protection of Residential Amenity would be relevant in the consideration of any planning application on the site.</p> <p>In addition, it is noted that the MIR sets out a number of site requirements that include a requirement for a Masterplan in advance of taking the site forward for development. As yet no layout for the site has been proposed.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p>	
--	--	---	---	--

		<p>great care with development on settlement edges. Development of either or both of the Eshiels sites would materially and detrimentally impact upon the SLA and the features for which the designation exists and may have a materially detrimental impact upon tourism. (91)</p> <p>The contributor states that the location of business or industrial land in close proximity to the A72 is likely to have a greater detrimental impact upon the landscape setting than housing of appropriate density, with any landscaping taking many years to mature as has been the case, and continues to be the case, at Cardrona. (91)</p> <p>The contributor states that this development would produce a highly visible development, visible from the road, and just as visible as the over development of the Kittlegairy estate. An almost continuous development along this road would be the result, spoiling the view for residents and visitors alike, and having an adverse effect on the whole valley. (108)</p> <p>The contributor states that the development would result in the loss of landscape characteristics evident within the Borders landscapes, including hardwood planting and shelter belts, as well as agricultural land. The Council should perhaps look at Eshiels and use it as a model for placemaking in other parts of the Borders. (139)</p> <p>The contributor objects to further proposals for more urban development in the Tweed Valley around Glentress. One of the great attractions of Glentress as a destination is that it feels like it is out in the country and the approach has an</p>	<p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
--	--	--	--	--

	<p>attractive ambience. (154)</p> <p>The contributor states that 240 units is wrong for a number of reasons in an area where there are currently only around 20 houses. (155)</p> <p>The contributor states that the intensity of development of housing and business premises on the two Eshiels sites is excessive and equates to more than is proposed for the 'preferred' sites in the remainder of the SBC area. (166)</p> <p>The contributor states that any developments should be appropriate to the immediate environment and therefore be only on a small scale (eg) small groups or individual properties in keeping with the surroundings. (201)</p> <p>The contributor states that making Eshiels a much bigger satellite of Peebles will destroy the countryside feel of the Western Borders. (223)</p> <p>The contributor states that they are a regular visitor to Glentress as a keen mountain biker and these proposals would badly effect the surrounding area. (266)</p> <p>The contributor raises concerns that Eshiels is a small settlement located in the beautiful Tweed Valley with stunning views. There has been a settlement in the Eshiels area for well over 200 years. The current settlement is made up of mainly single housing ranging in age from Victorian to modern day. (292)</p> <p>The contributor states that the current approach to Glentress forest is in keeping with the surrounding</p>		
--	--	--	--

		<p>countryside that attracts people to the area. Developing this area for housing will severely detract from its current atmosphere and attractiveness. (292)</p> <p>The contributor states that, if the development was implemented, it would transform the area from a rural environment to a more urban one potentially reducing the quality of life for the existing residents. (293)</p> <p>The contributor states that the development site is in a Special Landscape Area and development on the proposed scale would make a mockery of this designation. (298)</p> <p>The contributor considers that the proposed development would result in the area becoming urbanised. (271)</p> <p>The contributor raises concerns at the loss of the countryside. (268)</p> <p>The contributor raises concerns regarding the density and scale of the proposed development, stating that if it is anything like Cardrona, the number of houses will treble as is happening there. (257)</p> <p>The contributor states that the proposed development seems at odds with the landscape/out of proportion. (239, 243)</p> <p>The contributor states that the urbanisation would be most unwelcome in this rural economy. (216)</p> <p>The contributor states that locating a big mixed</p>		
--	--	---	--	--

	<p>use site so close to Glentress is crazy, it will detract from the wild natural beauty which is part of the attraction of the Seven Stanes Leisure Facility (into which millions is being poured). They state that an alternative would be to locate more business/industrial units why not use March Street Mills. (217)</p> <p>The contributor states that the area is of great beauty and this type of development would be out of scale to the existing settlement. (229)</p> <p>The contributor states that development of the proposed magnitude would ruin the approach to Glentress and Peebles. Peebles will be ruined and it will be just another struggling town. The uniqueness of Peebles and the surrounding countryside should not be spoilt for the sake of the greed of the developers. (233)</p> <p>The contributor raises concerns regarding the over development in the vicinity of Eshiels. (206)</p> <p>The contributor states that it is too big a development in a badly chosen location. The proposed mixed use sites would detract from the approach to Glentress and Peebles from the east, one of the delights of the eastern entrance are the open spaces, fields, woodland etc on the north side of the road. (197)</p> <p>The contributor raises concerns regarding the number of units proposed, which would swamp the existing hamlet and cause logistical problems. (197)</p> <p>The contributor raises concerns regarding the</p>		
--	--	--	--

		<p>impact upon the special scenic area, impact upon the character of the area and visual damage to the landscape. (197)</p> <p>Current policy EP5 helps to protect against inappropriate development in the Special Landscape Area. These proposals are inappropriate and should be rejected. (318)</p> <p>The contributor does not consider that the siting of industrial buildings alongside housing is appropriate. (149)</p>		
Eshiels	MESHI002, Land at Eshiels II, Eshiels	<p><u>Tourism:</u></p> <p>The contributor objects to the inclusion of (MESHI002) and the potential impact upon tourism. (37, 40, 48, 49, 50, 51, 53, 64, 83, 98, 140, 141, 142, 149, 178, 179, 186, 197, 202, 239, 241, 243, 257, 266, 268, 269, 300, 320, 271, 209, 227, 229, 233, 235)</p> <p>The contributor states that the area will become less attractive to walkers and cyclists. (188)</p> <p>The contributor raises concerns that such a development will make Glentress less appealing if it is surrounded by housing and business estate. (186)</p> <p>The contributor states that these areas of natural beauty are becoming less and less now and they are sure that the Scottish Tourist Board must have also made their concerns heard. (76)</p> <p>The contributor states the development of this site would have a detrimental effect on tourism and people's enjoyment of the Tweed Valley. (52, 69,</p>	<p>The success of outdoor recreational facilities at Glentress has helped tourism in the area and helps the status of Peebles as a recognised buoyant town centre. Peebles remains a very attractive area for prospective house builders partly due to its proximity to Edinburgh.</p> <p>The Main Issues Report (MIR) recognises that the built and natural heritage are major component parts of the attractiveness of the Scottish Borders which must be protected and enhanced. There are a large number of listed buildings, conservation areas, landscape and biodiversity designations and opportunities must continue to be explored to capitalise on these assets in the interests of tourism and economic development. It is acknowledged that the Plan must continue to ensure new development is located and</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

		<p>90, 139, 188)</p> <p>The contributor raises concerns that Glentress has an international reputation as a centre of excellence for mountain biking. (139)</p> <p>Whilst there may be benefits of having additional tenants in the area, the area is one of beauty where the contributor visits regularly and tourism is extremely important for the area. Mountain biking and outdoor pursuits in Glentress are a year round activity, generating income for the area. Building more houses would really take detriment and adversely affect tourism. (32)</p> <p>The contributor states that Glentress mountain biking is celebrated all over Britain for its spectacular biking in the heart of the Tweed Valley. Having a huge development would have a negative effect on families, mountain bikers and hikers visiting the area. (51)</p> <p>The contributor objects to the inclusion of the site, as any such development would be incompatible with the existence of the Tweed Valley Forest Park and the declared intention to develop tourism at Glentress, in the town of Peebles and in the Tweed Valley generally. (59)</p> <p>The proposal for these two sites will detract from the tourist potential of the area and hence its economic development by blighting the visual approach to Glentress and the views from within the forest outwards. Glentress is a highly successful tourist destination, for walkers and mountain bikers, also people visiting the immediate area. Tourists will be put off the area if</p>	<p>designed in a manner which respects the character, appearance and amenity of the area and that good placemaking and design principles continue to be implemented.</p> <p>It should be noted that Scottish Natural Heritage, VisitScotland and the Forestry Commission have all been consulted regarding the potential allocation of this site within the Local Development Plan. However, none objected to the potential allocation of this site.</p> <p>In addition, it is noted that the MIR sets out a number of site requirements that include a requirement for a Masterplan in advance of taking the site forward for development.</p> <p>It should also be noted that LDP policy ED7 Business, Tourism and Leisure Development in the Countryside aims to allow for appropriate employment generating development in the countryside whilst protecting the environment and to ensure that business, tourism and leisure related developments are appropriate to their location. It is not considered that any of the potential sites identified within the MIR are contrary to this policy.</p>	
--	--	---	---	--

		<p>it is part of an urban sprawl. There is an increasing number of other mountain biking areas with which Glentress is competing and the proposed development will only make it a less attractive option amongst these. (90)</p> <p>The contributor states that increasing the settlement along the A72 risks an increase in the number of accidents, in particular cyclists coming off the hill routes quickly, straight onto the A72. (108)</p> <p>Further proposed development, particularly on the scale suggested for the Eshiels area near the entrance to Glentress, feels like further urbanisation of this beautiful location which will hugely detract from its attraction as a destination for visitors. (154)</p> <p>The contributor raises concerns that the development will remove a sense of countryside experience which will impact negatively on tourism. (155)</p> <p>The contributor states that the proposed uses are inconsistent with and are potentially damaging to the type and nature of tourism development taking place at Glentress and the expectations of the visitors who are and will be attracted to it. (166)</p> <p>The contributor states that the area provides a range of recreational activities; mountain biking, horse riding, golf, walking, cycling and fishing. The suggested development will destroy much of the attraction of this area and undermine ongoing investment in the recreational facilities. (167)</p>	<p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
--	--	--	--	--

		<p>The contributor states that Glentress is used for walking, running and camping. The proposed dwellings will have a substantially negative impact on the attractiveness of Glentress as a tourist destination, and being able to deliver a positive experience for customers. (185)</p> <p>The contributor states that Eshiels is an area of natural beauty which attracts a huge number of visitors, particularly to Glentress. They raise concerns that the proposed large scale development would spoil the visitor experience to the area. (201)</p> <p>The contributor raises concerns regarding the impact of the development upon Glentress for biking. The development would take away the peacefulness. (205)</p> <p>The contributor raises concerns that development on this site would ruin the countryside of the area including Glentress which is one of the areas key tourism hotspots. (246)</p> <p>The contributor states that the urbanisation, apart from biodiversity impact, will change the experience for 300,000 visitors to Glentress alone never mind the other mountain bike trails. (276)</p> <p>The contributor states that Eshiels is the gateway to Glentress forest which is part of the world famous 7stanes bike parks which attracts over 300,000 visitors to the area annually. (292)</p> <p>The contributor raised concerns regarding the impact upon Glentress/Tweed Valley. (257, 268, 269, 271, 300)</p>		
--	--	---	--	--

		<p>The contributor raises concerns that development on this scale and in this area would form a visual corridor which would have a significant impact on the landscape value for tourism, right next to one of the Scottish Borders biggest tourist attractions, Glentress Forest. (239)</p> <p>The contributor states that the development would have a detrimental economic impact on the Glentress area which is the main tourist destination (e.g) mountain biking, walking, Go Ape. This is counter to Policy ED7. (207)</p> <p>The contributor states that the development would have a massive hit on the economic development of the Glentress area as a draw for walking and mountain biking tourists. (216)</p> <p>The contributor states that any development in the immediate area of Glentress should be tourist related, rather than aimed at small businesses which should be located on brownfield sites. (216)</p> <p>The contributor states that these sites are in the open countryside and major development in this area will detract from the quality that the visitors value so much from visits to the Scottish Borders. (30)</p> <p>The contributor raises concerns that the site would be adjacent to the Forest Holidays development within Glentress, the proposal would blanket that area with development. (206)</p> <p>Glentress Forest is one of the principal tourist attractions in this part of the Borders and has</p>		
--	--	--	--	--

		attracted considerable investment for leisure facilities including a holiday complex, outdoor tree activities as well as developing as a significant mountain biking centre. Any major development in this location begins to urbanise the countryside and detracts from what tourists and visitors are seeking, peace and tranquillity. Given that Peebles is becoming increasingly dependent upon tourists for its long term survival, any development that hinders its progress in this regard has to be challenged. (318)		
Eshiels	MESHI002, Land at Eshiels II, Eshiels	<u>Land economics:</u> Contributor raised concerns at the inclusion of (MESHI002), in respect of land economics. (24)	<p>This site was identified through an independent study that was carried out by consultants to identify site options within the vicinity of Peebles. The study findings have informed the potential site options set out in the Main Issues Report (MIR).</p> <p>It should be noted that deliverability of the potential sites was considered, in terms of access and infrastructure constraints. Developer interests were contacted at two points in the study: initially to gather an understanding of the types of sites likely to be of interest; and later to consider viability of the potential development sites.</p> <p>It is therefore not considered that there are issues relating to land economics that would prevent the site from coming forward.</p> <p>However, in light of the consultation</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

			<p>responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Traffic concerns:</u></p> <p>The contributor raises concerns regarding the impact upon traffic and the A72/surrounding road networks/parking/potential for accidents. (20, 52, 69, 90, 108, 139, 141, 142, 145, 149, 155, 158, 166, 167, 172, 185, 186, 197, 198, 201, 202, 239, 241, 243, 269, 271, 276, 292, 293, 300, 207, 216, 229)</p>	<p>It should be noted that it is not intended to allocate all of the sites identified within the Main Issues Report within the Proposed Local Development Plan.</p> <p>Whilst the primary responsibility for operating the development planning system for the Scottish Borders lies with the Council, Circular 6/2013</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

		<p>Concerns that the development will create a lot of extra traffic as people will inevitable drive to Peebles for various services. (46)</p> <p>Concerns are raised that if business units were to be located at Eshiels this could increase the likelihood of large vehicles/lorries in the vicinity. (202)</p> <p>The contributor states that the proposal is neither rural or urban, as it is within the school catchment distance and yet the pupils have no bus available but have to walk along the side of an increasingly busy A72. The alternative is for parents to transport them to school by car, across the bridge thereby increasing further congestion in Peebles. (271)</p> <p>The contributor states that the development will result in a considerable increase in traffic, as every house will have a minimum of 2 cars, every business will have at least 2 cars. The town could not cope with all the extra traffic. (235)</p> <p>The location is sufficiently remote from the town and its facilities that it will be inevitable that a development of the type proposed will have a significant impact upon road traffic. Given the need to use cars more to access shops, where will these extra cars park? Peebles is already running short of adequate parking facilities; there are very few, if any, sites that could be used for car parking. (318)</p>	<p>Development Planning states that all interests should be engaged as early and as fully as possible. In addition that document also states “<i>key agencies are under a specific duty to co-operate in the preparation of development plans</i>”; this includes Scottish Natural Heritage, Scottish Environmental Protection Agency, Scottish Water and NHS (Health Board). The Council have consulted with all key agencies throughout the Local Development Plan process and will continue to do so. This then allows key agencies to plan according to their needs and demands also.</p> <p>In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that assessment. In doing this rigorous site assessment process, the best sites possible are identified. The site assessment also considers many issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape.</p> <p>Furthermore, it should be noted that</p>	
--	--	---	---	--

			<p>the Council's Roads Planning Section and Network Manager have been consulted. It is noted that neither of these consultees objected to the potential allocation of the site MESH1002.</p> <p>In respect to comments regarding school transport, it should be noted that transport is provided to pupils who live over 2 miles from their catchment school in primary and to those who live over 3 miles away from their catchment school in secondary.</p> <p>It should be noted that the site was identified as a Mixed Use site with housing. Furthermore the site requirements set out in the Main Issues Report stated that a Masterplan would be required in taking the site forward. .</p> <p>In addition, it is not anticipated any of the mixed use sites to be identified in the Proposed Plan will have a negative impact on Peebles.</p> <p>Whilst Eshiels may not have a pub or a shop, it has good access to employment and services, and there is the potential access to public transport to be improved on as Eshiels is located just off the A72. In addition, Eshiels is also located in close proximity to the Walkerburn to</p>	
--	--	--	--	--

			<p>Peebles multi use path. It is also noted that a public footpath runs along the A72 into Peebles, although it is noted that this is on the southern side of the road. A site requirement also sets out a requirement for options for improvements to the existing public transport infrastructure will need to be explored, as well as the suitability of pedestrian provision on the A72.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p>	
--	--	--	--	--

			As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Noise and air quality:</u></p> <p>The contributor raises concerns regarding noise and air quality, as a result of the development. (20)</p>	<p>In relation to comments regarding noise and air quality, these are detailed issues that would be considered at planning application stage.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Infrastructure/services:</u></p> <p>The contributors raise a number of concerns regarding the existing infrastructure and services/amenities in and around Peebles. These concerns include the capacity of existing; schools, roads (including parking), sewerage treatment, utility infrastructure and health centres which are already stretched and the requirement for an additional bridge over the River Tweed. More houses in Eshiels or Peebles should not be considered until these facilities are improved first. (20, 23, 69, 141, 145, 155, 166)</p> <p>This is an area of outstanding natural beauty and does not have the infrastructure or facilities to support such a large development. If housing is required then land should be sought with better transport links to local amenities. (38)</p> <p>There are issues regarding school transport and the distance that school children will have to travel to school means that pupils do not qualify for a school bus. (46, 155, 172, 186, 198, 205, 207, 216, 239)</p> <p>Raised concerns regarding the current infrastructure provision (this includes reference to schools, health centres, roads, parking, fire/police/ambulance services, water, electricity, gas, and sewerage facilities). (53, 59, 83, 90, 139, 149, 179, 180, 194, 197, 201, 205, 252, 257, 292, 300, 209, 217, 229, 235)</p> <p>The contributor states that there would need to be local infrastructure improvements if the</p>	<p>LDP.</p> <p>It should be noted that it is not intended to allocate all of the sites identified within the Main Issues Report within the Proposed Local Development Plan.</p> <p>Whilst the primary responsibility for operating the development planning system for the Scottish Borders lies with the Council, Circular 6/2013 Development Planning states that all interests should be engaged as early and as fully as possible. In addition that document also states “<i>key agencies are under a specific duty to co-operate in the preparation of development plans</i>”; this includes Scottish Natural Heritage, Scottish Environmental Protection Agency, Scottish Water and NHS (Health Board). The Council have consulted with all key agencies throughout the Local Development Plan process and will continue to do so. This then allows key agencies to plan according to their needs and demands also.</p> <p>In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that</p>	<p>It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.</p>
---------	--	---	---	---

		<p>developments at Eshiels were to go ahead, including; road lay-out on the A72, new sewerage provision and new water pumping station to get the water up the hill. The developers should be responsible for funding these. (155)</p> <p>The contributor objects to the inclusion of the site and states that the site is not considered to be capable of being delivered within the LDP lifespan due to the significant infrastructure constraints which have not been sufficiently researched to date. These include; landowner willingness, sewerage capacity, water treatment capacity, archaeological constraints and roads infrastructure requirements. Other significant material infrastructure constraints include school capacities and healthcare facilities. (91)</p> <p>The contributor states that the existing access is not suitable. Major investment would be required to create a new 'through route' access within the sites and new junctions with the A72. The viability of the investment requirement is unknown, which could realistically affect deliverability. There is no direct and sustainable off-road link to Peebles. The walkway/cycleway is located to the south of the recycling centre with the nearest connection points onto the route being at some distance from the site and requiring crossing of the busy A72. Without a new safe off-site route to Peebles which is constructed to directly connect with the site, there would be an increased number of pedestrians which would have to use the existing pavements adjacent to the busy and fast road, this putting more pedestrian traffic at risk. Furthermore, as the site is over 3 miles away from the High School, children would not be entitled to</p>	<p>assessment. In doing this rigorous site assessment process, the best sites possible are identified. The site assessment also considers many issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape.</p> <p>NHS Borders have stated that they will continue to engage with SBC colleagues to provide primary care and public health input to the wider planning process including the creation of the next Scottish Borders Council Local Development Plan early in its preparation cycle as part of a Health in All Policies approach.</p> <p>It should be noted that Scottish Water were consulted as part of the site assessment process undertaken for the site. In addition, whilst access to sewage facilities may currently be an issue, upgrades can overcome that issue.</p> <p>Furthermore, it should be noted that the Council's Education, Archaeology, and Roads Planning sections, as well as Historic Environment Scotland and Scottish Natural Heritage have been consulted. It is noted that none of these consultees objected to the potential allocation of the site</p>	
--	--	--	---	--

	<p>a school bus pass. (91)</p> <p>Concerns are raised that the development will result in an increase in the population, which will put pressure on the existing infrastructure and services residents would require, including schools, doctors and social services. (108)</p> <p>Concerns are raised that future road expansion will take place along the old railway tracks, which are currently used for walking/cycling. (108)</p> <p>The contributor raises concerns regarding suitable footpaths between Eshiels and Peebles. Highlighting that there is currently a badly maintained narrow footpath. The old railway cycle path does not link Eshiels and Peebles directly. (139)</p> <p>The contributor raises concerns regarding the lack of a safe footpath between Eshiels and Peebles. (239)</p> <p>The contributor states that the majority of home owners within the new proposed dwellings will be commuters and this will have a substantial impact on the quality of the roads between Eshiels and Edinburgh, as well as increasing car miles. (185)</p> <p>There needs to be significant investment in Peebles High School before any significant expansions to the local population can be considered. The contributor raised concerns regarding the capacity of Peebles High School. (185)</p> <p>Haylodge Health Centre is becoming more and</p>	<p>MESHI002.</p> <p>In respect to comments regarding school transport, it should be noted that transport is provided to pupils who live over 2 miles from their catchment school in primary and to those who live over 3 miles away from their catchment school in secondary.</p> <p>It should be noted that the site was identified as a Mixed Use site with housing. Furthermore the site requirements set out in the Main Issues Report stated that a Masterplan would be required in taking the site forward. .</p> <p>In addition, it is not anticipated that any of the mixed use sites to be identified in the Proposed Plan will have a negative impact on the economy of Peebles.</p> <p>Whilst Eshiels may not have a pub or a shop, it has good access to employment and services, and there is the potential access to public transport to be improved on as Eshiels is located just off the A72. In addition, Eshiels is also located in close proximity to the Walkerburn to Peebles multi use path. It is also noted that a public footpath runs along the A72 into Peebles, although it is noted that this is on</p>	
--	--	--	--

		<p>more stretched, with growing waiting times for appointments. The contributor highlights that it would take 500 new houses to justify increasing the health centre budget to recruit 1 additional GP. The proposed dwellings would be completely irresponsible given this situation. (185)</p> <p>The contributor states that there is only 1 ambulance covering the area. (185)</p> <p>The contributor states that there will need to be massive changes to the roads, accesses, junctions etc in the immediate area of Eshiels to cope with the number of people requiring access to the A72 main road from the new development. This is already a very busy and highly dangerous road. (201)</p> <p>The contributor states that mixed use is not appropriate for the site, due to the narrow access roads. (273)</p> <p>The contributor raised concerns that there is no school bus in Eshiels. (269)</p> <p>The contributor states that commitment to extensive infrastructure improvements are required before any further significant development can take place. (269)</p> <p>The contributor raises concerns regarding the car parking facilities within Peebles and that it cannot cope with the current population. (252)</p> <p>The contributor questions the expansion in infrastructure required. They question how this proposal will link to Peebles, as it is well outside</p>	<p>the southern side of the road. A site requirement also sets out a requirement for options for improvements to the existing public transport infrastructure will need to be explored, as well as the suitability of pedestrian provision on the A72.</p> <p>The 2001 Census, Travel to Work Data found that only 20% of Peebles resident employed adults worked in Edinburgh and of these 92% were car drivers or passengers, 6% used the bus and 2% used other transport means (including motorbikes).</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that</p>	
--	--	---	--	--

		<p>and looks like a housing scheme, stuck in a random field. The Cardrona proposals also have a similar look about them and they wonder about the need for more community infrastructure on the Cardrona site. (243)</p> <p>The proposal would encourage a large amount of school car traffic. (241)</p> <p>The contributor raised concerns regarding the infrastructure requirements and physical ability to re-route the A72, drainage and re-location of existing septic tanks. (239)</p> <p>The contributor advises that measures to support sustainable transport in the form of safe cycling and walking to Peebles, along the A72 are considered through the site requirements and in association with (MESHI001). (213)</p> <p>The contributor states that there is insufficient road and water infrastructure. (235)</p> <p>The contributor raises concerns regarding infrastructure issues, including the A72 as a result of the development. As a result, there will be slowing of moving traffic and a knock on effect of not enough parking provision in Peebles. People may travel to Straiton with the consequent negative effect to the vibrancy and economic health of Peebles. (197)</p> <p>Contributor raises concerns regarding septic tank waste and whether the existing treatment plant can cope with this amount of houses. (197)</p> <p>The contributor states that Eshiels has no</p>	<p>there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESHI002 within the Proposed LDP.</p>	
--	--	--	--	--

		amenities and residents will go into Peebles and head to Edinburgh. (197)		
Eshiels	MESHI002, Land at Eshiels II, Eshiels	<p><u>Ribbon development and green belt:</u></p> <p>The contributors raise concerns that development on this site would be ribbon development. (23, 139, 149, 150, 155, 172, 178, 179, 185, 186, 197, 198, 205, 241, 269, 276, 292, 207, 216, 229)</p> <p>The Borders is known for its vast and grass fields and rolling hills, by adding these houses Peebles and Cardrona will be inadvertently forced together while simultaneously wiping away the grass fields that make the Borders so special. (180)</p> <p>The contributor states that building in Eshiels will connect the Borders corridor, with housing stretching from Peebles to Cardrona, spoiling much of the countryside and changing these areas from a peaceful small town to a disruptive large town. (205)</p>	<p>It should be noted that it is not intended to allocate all of the sites identified within the Main Issues Report within the Proposed Local Development Plan.</p> <p>In the consideration of any site for inclusion in the Main Issues Report, a full site assessment was carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, and Scottish Natural Heritage) are incorporated into that assessment. This rigorous site assessment process then allows identification of the best sites possible.</p> <p>It is not considered that development at this location will result in ribbon development or coalescence of the settlements within the Tweed Valley.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

			<p>existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Health & well-being/amenity of existing residents:</u></p> <p>The contributor states that the development of (MESH1002) would impact upon the health and well-being of the existing residents. (43)</p> <p>The development would have a negative effect on the amenity of the existing residents at Eshiels. These contributors include reference to; noise, light and dust pollution. (90,95)</p>	<p>It should be noted that the site is located within the Strategic Green Network as set out in Local Development Plan policy EP12 Green Networks. The aim of Green Networks are to assist in supporting sustainable economic growth, tourism, recreation, the creation of an environment that promotes a healthier-living lifestyle, and the protection and enhancement of biodiversity, and have the potential to improve water quality, promote flood protection and reduce pollution.</p> <p>It is therefore not considered that development at this location would</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

			<p>have a negative impact on the health and wellbeing of existing residents.</p> <p>In relation to comments regarding noise, light and dust pollution, these would be issues that would be considered at planning application stage.</p> <p>In respect to comments regarding amenity, it should be noted that Policy HD3 Protection of Residential Amenity would be relevant in the consideration of any planning application on the site.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate</p>	
--	--	--	--	--

			<p>sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Dark skies lost:</u></p> <p>The contributor states the development will result in the loss of Peebles dark sky. (51, 69, 90, 276)</p> <p>The contributors raise concerns regarding the impact of the development upon the Eshiels dark sky environment. (139, 149, 155, 186, 197, 292)</p>	<p>It should be noted that it is not intended that all of the sites identified within the Main Issues Report (MIR) for the Tweeddale Locality will be brought forward for development. The MIR in paragraph 3.3 notes that "<i>it is not anticipated the LDP2 will require a significant number of new housing sites</i>". The purpose of the MIR was to identify a number of site options and present those to the public so that LDP2 could then be informed by their responses.</p> <p>However the Council are aware that the lighting of roads, footpaths, domestic and commercial property should be an integral element of all development proposals at the outset and not, as has sometimes been the case in the past, addressed as an afterthought. Furthermore it is possible to reduce many of the negative effects of lighting through careful design and planning, using lighting only where and when necessary, using an appropriate strength of light and adjusting light</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

			<p>fittings to direct the light to where it is required. It is acknowledged that illumination should be appropriate to the surroundings and character of the area as a whole.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II,	<p><u>Loss of agricultural land:</u></p> <p>The contributor states that a great deal of</p>	It should be noted that it is not intended that all of the sites identified within the Main Issues	It is recommended that the Council agree not to

	Eshiels	<p>agricultural land will be lost along with the rural jobs associated with the land. (69)</p> <p>The contributor states that the development would cause the destruction of ancient pastures. (108)</p> <p>The contributor states that the development would result in the loss of prime quality agricultural land. (30, 149, 166, 205 292)</p> <p>The contributor raises concerns at the loss of good quality agricultural land and the impact on agricultural employment essential to the economy of the Scottish Borders. (155)</p> <p>The site will result in the removal of agricultural land counter to Policy ED10. (172, 185, 186, 198, 207, 216)</p> <p>Contributor raises concerns regarding the loss of green belts and agricultural land. (241)</p>	<p>Report (MIR) for the Tweeddale Locality will be brought forward for development. The MIR in paragraph 3.3 notes that “<i>it is not anticipated the LDP2 will require a significant number of new housing sites</i>”. The purpose of the MIR was to identify a number of site options and present those to the public so that LDP2 could then be informed by their responses.</p> <p>In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that assessment. In doing this rigorous site assessment process, the best sites possible are identified.</p> <p>It should be noted that whilst the site is currently in agricultural use for grazing, the land is not identified as Prime Quality Agricultural Land. The identification of some greenfield / agricultural land is inevitable.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for</p>	allocate this site within the Proposed Local Development Plan.
--	---------	--	--	--

			<p>development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Loss of existing community within Eshiels:</u></p> <p>The contributor states that the proposed development would mean the existing community would be lost. (69, 186)</p> <p>The contributor fears this small rural community may be permanently scarred by this proposal. (201)</p>	<p>It should be noted that it is not intended that all of the sites identified within the Main Issues Report (MIR) for the Tweeddale Locality will be brought forward for development. The MIR in paragraph 3.3 notes that "<i>it is not anticipated the LDP2 will require a significant number of new housing sites</i>". The purpose of the MIR was to identify a number of site options and present those to the public so that LDP2 could then be informed by their responses.</p>	<p>It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.</p>

			<p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Burn:</u></p> <p>The contributor raises concerns regarding the slippage of land adjacent to the burn which runs along the north side of the plateau fields in the valley, north of the River Tweed. The natural embankment (a significant length of where the western end of the new build is proposed), could disintegrate. (88)</p>	<p>It should be noted that the Scottish Environment Protection Agency (SEPA) were consulted as part of the site assessment process and as a result the following site requirement was included in the Main Issues Report for the site: "A <i>maintenance buffer strip of at least 6 metres must be provided between</i></p>	<p>It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.</p>

			<p><i>the watercourse and any built development. Additional water quality buffer strips may also be required</i>’.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland’s restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Indicative site capacity:</u></p> <p>The contributor states that the indicative site capacity for this site and (MESH1001) is greater</p>	It is not intended to allocate all of the sites identified within the Main Issues Report within the Proposed Local Development Plan.	It is recommended that the Council agree not to allocate this site

		<p>than the 'preferred sites' for the whole of the rest of the Borders. (90)</p>	<p>The SESPlan requires strategic growth in the Scottish Borders to be directed to three Strategic Development Areas (SDA) in the Central Borders, the Western Borders and the Eastern Borders.</p> <p>It should also be noted that Scottish Planning Policy requires Local Development Plans to allocate a range of sites which are effective or expected to become effective in the plan period to meet the housing land requirement of the strategic development plan up to year 10 from the expected year of adoption. They should provide for a minimum of 5 years effective land supply at all times. Failure to meet this requirement would result in a failure to provide a plan-led system. In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that assessment. The site assessment also considers many issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape. In doing this</p>	<p>within the Proposed Local Development Plan.</p>
--	--	---	---	--

			<p>rigorous site assessment process, the best sites possible are identified.</p> <p>It should be noted that a Development Options Study was undertaken to identify and assess options for housing and employment land in the Western Strategic Development Area, centred on the central Tweeddale area. This was due to a number of physical and infrastructure constraints within the central Tweeddale area. The study identified a number of potential short and long term housing options as well as sites for business/industrial use. Site MESH1002 was one of the sites identified in that study.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for</p>	
--	--	--	--	--

			<p>mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Flood risk:</u></p> <p>The contributor states that the development would increase flooding risk for the housing and fields below the road. (90, 235)</p> <p>The contributor states that the development may lead to flooding of areas to the south of the A72. (166)</p> <p>The contributor states that a section of this site at the south side, appear to lie within an area of flood risk presented by the River Tweed. There is genuine risk of increased risk of surface water flooding once the development has taken place. (91)</p> <p>The contributor states that there was widespread flooding 2 years ago along the Tweed Valley, which demonstrated that the A72 is very vulnerable to flooding, for much of its length it is also at risk from erosion by the River Tweed. Putting further housing in an area where its vital routes are at risk, would be irresponsible. There are no alternative routes in the event of flooding. Building over agricultural land will prevent rainfall moving slowly through the soil, run-off will be</p>	<p>It is should be noted that Scottish Environment Protection Agency (SEPA) and the Council's Flood and Coastal Management Team were consulted as part of the site assessment process undertaken for the site.</p> <p>In addition, the Main Issues Report included a site requirement for a Flood Risk Assessment to assess the risk from the Linn Burn, Eshiels Burn and the small water course that flows adjacent to the site.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

		<p>swifter and this will exacerbate flooding. (108)</p> <p>The contributor highlights that the main road and lower field at Eshiels are subject to flooding every time there is heavy rain. The building of new roads and new paved parking areas would add to this problem. (139)</p> <p>The contributor raises concerns there will be a significantly increased flood risk for the existing houses especially as the land does not drain well at present. Furthermore, likely to be increased risk to the A72 where there are frequent flooding issues. (150)</p> <p>The contributor states that although the 2 sites are not currently in the SEPA flood risk zone this will change drastically once the agricultural land is removed contributing to faster run-off, increasing the rate at which rainwater falling on the proposed new development reaches the Tweed. SEPA would need to investigate with revised models. (155)</p> <p>The contributor raises concerns regarding flood risk as a result of development on this site/surrounding area/roads. (172, 198, 205, 269)</p> <p>The contributor states that the land adjacent to the proposed dwellings is prone to flooding, and this has often encroached onto the A72 road. With rising water tables and wet weather, 26 hectares of tarmac'd land would need significant investment in drainage for the whole area. (185)</p> <p>The contributor states that the areas at the bottom of the fields act as flood plains at the moment with</p>	<p>due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
--	--	--	---	--

		<p>housing here the road and houses opposite will be subject to flooding. The road currently floods over the road when heavy rainfall. (241)</p> <p>The contributor raises concerns regarding the potential for flooding from the hills into the fields. (239)</p> <p>The contributor states that the development adjacent to the flood plain would increase the risk of flooding to homes/buildings/fields below the A72. (207)</p> <p>The contributor raises concerns regarding flood risk as a result of the development, for the houses and fields below the A72, due to 27 acres of developed/tarmacked land close to the floodplain. (216)</p>		
Eshiels	MESHI002, Land at Eshiels II, Eshiels	<p><u>Sewerage disposal:</u></p> <p>The contributors raise concerns regarding the main sewage system, capacity and the fact that the site is downstream of the works. (90, 139)</p> <p>The contributor states that there is no public sewer at Eshiels. The level of investment which would be required in order to service both sites is currently unknown. (91)</p> <p>Contributor raises concerns regarding the problems of sewerage disposal/treatment from the site. (172, 197, 198, 269, 293, 207, 216, 229, 235)</p> <p>The contributor advises that the proposed number of dwellings would have a detrimental impact on sewage processing at Eshiels Recycling Centre, along with the ability to process all waste from</p>	<p>It should be noted that Scottish Water were consulted as part of the site assessment process undertaken for the site. In addition, whilst access to sewage facilities may currently be an issue, upgrades can overcome that issue.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that</p>	<p>It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.</p>

		<p>these dwellings. (185)</p> <p>Apart from some low level comment regarding WWTW and WTW, which are assumed to refer to waste water treatment and sewerage, there is little or no consideration as to how levels of waste and sewerage will be dealt with. This site is downstream of the existing sewerage facilities that serve Peebles. (318)</p>	<p>upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Natural heritage/archaeology:</u></p> <p>The contributor states that the development would not protect or enhance the natural heritage of the area. (90)</p> <p>The contributor raises concerns regarding the impact that developing the site will have upon archaeological interest. A Roman settlement was once situated there and there are many artifacts which remain buried. If building works is carried out many of the remains will be destroyed. (194)</p> <p>The contributor states that there is a tree preservation order to the west of the site boundary. (91)</p> <p>The contributor states that there are archaeological/heritage constraints within part of the site. Installation/upgrading of infrastructure</p>	<p>It is should be noted that the Council's Ecology Officer and Heritage and Design Officer, as well as Scottish Natural Heritage (SNH) and Historic Environment Scotland (HES) were consulted as part of the site assessment process undertaken for the site. It is noted that none of the consultees objected to the potential allocation of the site MESH1002.</p>	<p>It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.</p>

		<p>may detrimentally impact upon these interests. (91)</p> <p>The contributor states that development may cause damage to the historic sites, buildings and artefacts close to the access road. (108)</p> <p>The contributor states that this is an historic and close knit peaceful community, with its roots in post WW1 social change and history in arboriculture. Numerous artefacts alongside the roads and tracks would be at risk. (108)</p> <p>The contributor raises concerns that the development will disrupt the site of archaeological interest, the Roman marching camp that is situated on both sides of the A72. (167)</p> <p>The contributor raises concerns in respect of the archaeological impact of the new infrastructure on the local scheduled monuments. (239)</p> <p>The contributor states that the allocation has the potential for direct and setting impacts on scheduled monument SM3667 Eshiels Roman Camp. They are content with the principle of development in this area and welcome the inclusion of mitigation requirements for an adequate buffer zone to protect the physical remains and setting of Eshiels Roman Camps, a suitable management regime for the section of the monument within or adjacent to the development area, and for any infrastructure upgrades to avoid impacts on the scheduled monument. They note that a masterplan would be required for these sites, and recommend early consultation with HES on the development of any masterplan that may</p>	<p>Comments noted.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment</p>	
--	--	--	--	--

		emerge. (164)	<p>Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Greenhouse gas emissions:</u></p> <p>The contributor advises that the development would not reduce the need to travel or greenhouse gas emissions. (90)</p>	<p>The SESPlan requires strategic growth in the Scottish Borders to be directed to three Strategic Development Areas (SDA) in the Central Borders, the Western Borders and the Eastern Borders.</p> <p>It should also be noted that Scottish Planning Policy requires Local Development Plans to allocate a range of sites which are effective or expected to become effective in the plan period to meet the housing land requirement of the strategic development plan up to year 10 from the expected year of adoption. They should provide for a minimum of 5 years effective land supply at all times. Failure to meet this requirement would result in a failure to provide a plan-led system. In the consideration of any site for</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

			<p>inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that assessment. The site assessment also considers many issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape. In doing this rigorous site assessment process, the best sites possible are identified.</p> <p>Whilst Eshiels may not have a pub or a shop, it has good access to employment and services, and there is the potential access to public transport to be improved on as Eshiels is located just off the A72. In addition, Eshiels is also located in close proximity to the Walkerburn to Peebles multi use path. It is also noted that a public footpath runs along the A72 into Peebles, although it is noted that this is on the southern side of the road. A site requirement also sets out a requirement for options for improvements to the existing public transport infrastructure will need to be explored, as well as the suitability of pedestrian provision on the A72.</p>	
--	--	--	--	--

			<p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Biodiversity:</u></p> <p>The contributor advises that the site presents moderate biodiversity constraints including potential impact upon the River Tweed SAC/SSSI. (91)</p> <p>The contributor states that the proposal would</p>	<p>It should be noted that the Council's Ecology Officer and Scottish Natural Heritage (SNH) were consulted as part of the site assessment process undertaken for the site. It is noted that neither the Ecology Officer nor SNH objected to the potential allocation of the site</p>	<p>It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.</p>

		<p>have a reduction of biodiversity counter to Policy EP3. (172, 207)</p> <p>Contributors raise concerns including the following; impact upon local wildlife/ecology/biodiversity/TPO's (108, 140, 167, 179, 185, 202, 239, 241, 216)</p> <p>The contributor raises concerns in respect of the environmental impact upon biodiversity. (239)</p> <p>The contributor raises concerns regarding the environmental impact from the development. (197)</p>	<p>MESHI002.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESHI002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESHI002 within the Proposed LDP.</p>	
Eshiels	MESHI002, Land at Eshiels II, Eshiels	<p><u>Impact upon River Tweed SAC:</u></p> <p>The contributor states that the proposal would increase the risk of pollution to the River Tweed and its tributaries. (108)</p>	<p>It should be noted that the Main Issues Report included a site requirement for a Flood Risk Assessment to assess the risk from the Linn Burn, Eshiels Burn and the small water course that flows adjacent to the site.</p>	<p>It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.</p>

			<p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Landscape (SNH):</u></p> <p>The contributor states that this site shares many of the characteristics of (MESH1001), although the degree of set-back from the A72 offers somewhat greater potential to integrate this site with its surroundings and the local landscape character than the current boundary of (MESH1001).</p>	<p>Comments noted.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

		<p>If allocated, a strong approach to place-making should be adopted in order to ensure local identity and appropriate facilities are delivered, including green infrastructure.</p> <p>As with (MESH1001), the contributor strongly advises that if this site is to be allocated, in full or part, that the placemaking aims for the site are clearly articulated in advance. They suggest that in combination with the neighbouring site (MESH1001), the design intention for neighbourhood functions, the urban form, the density of development and the approach to design led landscape mitigation, across both sites should be clearly set out in the LDP. They advise that in order to produce a coherent approach to a new settlement pattern in this location, an integrated approach to urban form which considers views and design relationship/set back of development from the A72, will be required through a clearly communicated site development brief. (213)</p>	<p>further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Co-location issues:</u></p> <p>The contributor highlights that there may be co-location issues, including odours, with the nearby Peebles waste water treatment works and the adjacent Eshiels recycling centre. (91)</p>	<p>Comments noted.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

			<p>Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Core path:</u></p> <p>The contributor states that the proposed allocation to the west (MESH1002) has a core path running through it. (91)</p>	<p>Comment noted.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. 			<p>Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Lack of vision for the site:</u></p> <p>The contributor states that there appears to be a conflict within the Council as to the most suitable use for the site (MESH1002). The Landscape Officer states that the site would be best suited to housing, while the Economic Development states that the site would be more appropriate for commercial/tourism based mixed use development. It is of a concern that there is not a shared vision for the sites at this stage. (91)</p>	<p>In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that assessment. The site assessment also considers many issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape.</p> <p>In undertaking this process it should be noted that each consultee responds in relation to their area of interest/expertise. This can result in different views/opinions on a same site. However, it is the role of planning to ensure that all of these views are considered and weighed up in coming to any final decision. .</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some</p>	<p>It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.</p>

			<p>landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Suggested limitations on construction works:</u></p> <p>The contributor suggests that the following limitations are put on any construction work;</p> <ul style="list-style-type: none"> - Sound barriers put in place between their property and the proposed construction works - Acceptable type and level of noise be decided upon, monitored and enforced by Environmental Health Officers on a regular basis - Environmental Health Officers to monitor the amount of light pollution on their property 	<p>Building works by their very nature, generate noise and additional traffic etc. Planning permissions sometimes include conditions intended to minimise impacts, both during the construction phase and afterwards, during the life of the development. However, issues such as those raised would be dealt with at planning application stage.</p> <p>However, in light of the consultation responses received during the Main</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

		<ul style="list-style-type: none"> - Environmental Health officers to monitor the proposed construction site to ensure that the dust and smell levels - Request that vehicle movements on the small rural road be limited to specific traffic times and restricted number of vehicles that pass by at any given time - Request restrictions on the working hours to set times of the day, as to minimise noise pollution during unsociable hours and that no construction works take place on the weekends. (95) 	<p>Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Access to an existing property:</u></p> <p>The contributor states that the proposed entry barrier/gate on the planning application will be situated directly in front of their property and it will restrict visitors, traffic and movement to their house. Therefore, the contributor requests that the barriers are altered or moved further up the road running alongside their property and/or to install separate barriers at the entrance at the individual car parks so that movement to access their house</p>	<p>In light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that</p>	<p>It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.</p>

		is not restricted. (95)	<p>upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>De-value existing properties:</u></p> <p>The contributor states that the proposal will devalue existing properties. (98)</p>	<p>It should be noted that this is not a material planning consideration.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

			<p>Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Design:</u></p> <p>The contributor states that any development must be designed to a high standard, avoid unacceptable impacts on amenity, and demonstrate social, economic and environmental sustainability. Permission should be refused for development of poor design that fails to take the opportunities available for improving the character and quality of an area and the way it functions.</p> <p>(98)</p>	<p>It should be noted that the Council has produced Supplementary Planning Guidance (SPG) on Placemaking and Design to encourage good design and sustainable development in the Borders. This SPG relates to all housing tenures including affordable housing.</p> <p>In addition, it is noted that the MIR sets out a number of site requirements that include a requirement for a Masterplan in advance of taking the site forward for development.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

			<p>existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Carbon foot print/sustainability:</u></p> <p>The contributor states that an increase in the number of houses (and their occupants) will mean people doing more journeys to get to work, shops etc as there are no facilities close by. This is at odds with the reports stated aim to decrease the carbon footprint in the area. (108)</p> <p>The contributor raises concerns that the development will make each household less sustainable as more fossil-fuel miles have to be made to Peebles to shops and schools. (155)</p> <p>The contributor raises concerns regarding the additional carbon emissions, as most homeowners will be commuters. This is counter to the overall SBC objective to be more sustainable</p>	<p>It is not intended to allocate all of the sites identified within the Main Issues Report within the Proposed Local Development Plan.</p> <p>The SESPlan requires strategic growth in the Scottish Borders to be directed to three Strategic Development Areas (SDA) in the Central Borders, the Western Borders and the Eastern Borders.</p> <p>It should also be noted that Scottish Planning Policy requires Local Development Plans to allocate a range of sites which are effective or expected to become effective in the plan period to meet the housing land</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

		<p>by reducing car miles. (172)</p> <p>The contributor states that with such a significant amount of housing proposed this is counter to the overall SBC objective to be more sustainable by reducing car miles, especially as most new home owners will be commuters. (186)</p> <p>The contributor raises concerns that the location of the site will mean the majority of housing if not all will be heavily reliant on private vehicles which does not make this proposal a more sustainable in accordance with LDP MIR para 2.15. (198)</p> <p>The contributor raises concerns that the focus of the LDP is targeting the wrong transport corridors and proposing a higher level of carbon emissions which is contrary to the council's objective of increased sustainability and reduced carbon road miles. (201)</p> <p>The contributor raises concerns that the development would add significantly to carbon emissions, as the majority of house owners will commute to work. This is counter to the overall SBC objective to be more sustainable by reducing car miles. (292)</p> <p>The contributor states that residents will need to drive to work in Edinburgh, adding to the traffic congestion and pollution. (252)</p> <p>The contributor states that you will be adding to the carbon footprint as it will be family housing with more commuters where car is the only available transport. (241)</p>	<p>requirement of the strategic development plan up to year 10 from the expected year of adoption. They should provide for a minimum of 5 years effective land supply at all times. Failure to meet this requirement would result in a failure to provide a plan-led system. In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that assessment. The site assessment also considers many issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape. In doing this rigorous site assessment process, the best sites possible are identified.</p> <p>In relation to the site assessment undertaken for the site, it should be noted that the Roads Planning Section have stated: <i>"...Pedestrian/cycle links with the Glentress Centre will be required and the merits of vehicular connectivity can be considered as part of the Transport Assessment. ... Options for improvements to the existing public transport</i></p>	
--	--	---	--	--

		<p>The contributor raises concerns regarding the increased carbon emissions as a result of the development. (239, 229)</p> <p>The contributor raised concerns regarding the carbon emission increase, as most house owners will be commuters. This is in the opposition to the overall SBC objective to reduce car miles and increase sustainable lifestyles/living. LDP2 MIR para 2.15. (207)</p> <p>The contributor raises concerns that the proposal contradicts the promotion of sustainable travel principles in section 5.8. Development along the A72 will encourage more private car miles, where development along the Borders railway would increase returns on the public expenditure on that public transport. (209)</p> <p>The contributor raises concerns that more cars means more carbon emissions, which is against the SBC objective to be more sustainable by reducing car miles (LDP2 MIR Para.2.15) (216)</p> <p>The contributor raises concerns regarding the extended fossil fuel pollution as a result of the development. (197)</p>	<p><i>infrastructure will need to be explored as will the suitability of pedestrian provision in the A72”.</i></p> <p>It is not considered that the majority of new residents that would live at Eshiels would be commuters travelling to Edinburgh. It should be noted that the 2001 Census, Travel to Work Data found that only 20% of Peebles resident employed adults worked in Edinburgh and of these 92% were car drivers or passengers, 6% used the bus and 2% used other transport means (including motorbikes).</p> <p>Whilst Eshiels may not have a pub or a shop, it has good access to employment and services, and there is the potential access to public transport to be improved on as Eshiels is located just off the A72. In addition, Eshiels is also located in close proximity to the Walkerburn to Peebles multi use path. It is also noted that a public footpath runs along the A72 into Peebles, although it is noted that this is on the southern side of the road. A site requirement also sets out that a requirement for options for improvements to the existing public transport infrastructure will need to be explored, as well as the suitability of pedestrian provision on the A72.</p>	
--	--	---	---	--

			<p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Food security:</u></p> <p>The contributor raises concerns regarding food security. The need for a secure local food supply increases, and destroying good agricultural land by building on it is unwise. Land unsuitable for food production should be the land put forward for building, it may be more expensive for the</p>	<p>Comments noted.</p> <p>Whilst, brownfield land is the first consideration when identifying additional sites, as a result of limited land availability there is pressure on greenfield land for development, especially in areas where demand for housing is high. The Council</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

		<p>developer, but then it would be even more expensive to try to produce essential food from unsuitable land. (108)</p>	<p>therefore seeks to allocate brownfield sites as a redevelopment priority. The MIR identifies regeneration opportunities across the Borders which are suitable for a variety of uses including housing and employment. Therefore the identification of current agricultural land is inevitable.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed</p>	
--	--	--	---	--

Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Disproportionate/alternative locations for development:</u></p> <p>The contributor states that the scale of the proposed mixed use site is disproportionate to the developments proposed elsewhere in the Borders. (201)</p> <p>The contributor raises concerns regarding high number of houses proposed compared to other areas and proportion of the total number for the Borders. (241)</p> <p>The contributor states that the sites are looking to deliver the largest number of houses of the whole plan, in a hamlet that is not even identified as a settlement. The proposal is disproportionate to the size of the small settlement which currently exists. (239)</p> <p>The contributor states that the number of houses/businesses suggested for the Eshiels sites on its own is greater than the 'preferred sites' for the rest of the Scottish Borders, which is shocking and totally disproportionate. (207)</p> <p>The contributor states that the number of units (240) for 2 preferred sites at Eshiels is greater than for the whole of the rest of the Borders, which is out of proportion. (216)</p> <p>The contributor states that the proposal is disproportionate to the overall requirement (3841). (197)</p> <p>The main settlements are the areas which should</p>	<p>LDP.</p> <p>It should be noted that it is not intended that all of the sites identified within the Main Issues Report (MIR) for the Tweeddale Locality will be brought forward for development. The MIR in paragraph 3.3 notes that "<i>it is not anticipated the LDP2 will require a significant number of new housing sites</i>". The purpose of the MIR was to identify a number of site options and present those to the public so that LDP2 could then be informed by their responses.</p> <p>In addition, it should be noted that the Council are also required to allocate sufficient land within the Central, Eastern and Western Strategic Development Areas.</p> <p>Scottish Planning Policy requires LDP's to allocate a range of sites which are effective or expected to become effective in the plan period to meet the housing land requirement of the strategic development plan up to year 10 from the expected year of adoption. They should provide for a minimum of 5 years effective land supply at all times. Failure to meet this requirement would result in a failure to provide a plan-led system.</p> <p>However, in light of the consultation</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.
---------	--	--	--	--

		<p>be developed Borders wide, developing very small settlements such as Eshiels will cause undue pressure on an already heavily laden services system. (179)</p> <p>The contributor states that the houses proposed would be disproportionate to the total number of proposed houses planned for the whole of the Borders. (185)</p>	<p>responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Existing business/industrial sites:</u></p> <p>The contributor states that there are a number of existing business units/industrial areas in the town of Peebles that are currently not at full capacity. If business units are at Eshiels it will take business away from the High Street which already has empty premises. (202)</p> <p>The contributor states that they are unaware of</p>	<p>It should be noted that the LDP process is advised by the Council's Economic Development section as to the requirement for additional land for Business and Industrial use. In addition, it should be noted that the Council through the Economic Development section and the Development Management section, receives regular enquiries from</p>	<p>It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.</p>

		<p>any businesses or industry being carried out at Eshiels. They are therefore confused as to why this has been designated as a mixed use development site. (269)</p> <p>The contributor states the businesses based in small units (.g) Calvary Park, whilst making a contribution, are a tiny %. Peebles has in essence become a distant suburb of Edinburgh. Trying to address/improve this by suggesting mixed use development and urbanisation in Eshiels is nonsensical. (207)</p>	<p>businesses to locate within the Western Strategic Development Area. Furthermore, the Council undertakes an Employment Land Audit annually to monitor the take up and availability of business and industrial land across the Borders.</p> <p>It should also be noted, that the Council have not received any acceptable alternative locations for Mixed Use/ Business and Industrial sites within the Western Strategic Development Area for inclusion in the LDP2 as part of the call for sites or public consultation process.</p> <p>In addition, it is not anticipated that any of the mixed use sites to be identified in the Proposed Plan will have a negative impact on the Peebles High street.</p> <p>It should be noted that as at March 2018, there were 343,535 Small and Medium-sized Enterprises (SMEs) operating in Scotland, providing an estimated 1.2 million jobs. SMEs accounted for 99.3% of all private sector enterprises, accounting for 54.9% of private sector employment and 41.5% of private sector turnover. (Scottish Government Website https://www2.gov.scot/Topics/Statistics/Browse/Business/Corporate/KeyFacts). This therefore, illustrates the</p>	
--	--	--	--	--

			<p>importance that SME's make to the economy.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Amenity:</u></p> <p>They would lose their view and have no privacy as a result of the development. They do not feel that it would be a safe place to raise their family. They chose to live there because of its rural, scenic and</p>	<p>It should be noted that Policy HD3 Protection of Residential Amenity would be relevant. In relation to the issues raised, these would be dealt with at planning application stage.</p>	<p>It is recommended that the Council agree not to allocate this site within the Proposed Local</p>

		<p>offers space for leisure. (202)</p> <p>The contributor raises concerns regarding the impact upon the amenity, including views, noise and lighting as a result of the development. (249)</p> <p>The contributor states that the volume proposed in Eshiels would be overbearing on the current properties. (276)</p> <p>The contributor raises concerns in respect of the destruction of the visual amenity. (209)</p>	<p>The Council is aware of the sensitive location and designations. Landscaping and screening would need to be carefully considered together with the site layout and design during the planning application process to minimise any detrimental impacts on the landscape and views.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed</p>	<p>Development Plan.</p>
--	--	--	--	--------------------------

Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Drainage:</u></p> <p>The contributor states that drainage on the Eshiels site from this proposed development may contribute negatively to the flow of the River Tweed. (276)</p> <p>Contributor raises concerns regarding the drainage from the site. (269, 293)</p> <p>Contributor states that there is no surface water or foul water drainage facilities. The existing capacity of the Scottish Water Sewerage Treatment Works at Eshiels is already being exceeded with limited opportunity for expansion. The option for 'reed bed' treatment and disposal into the River Tweed is not viable due to constraints from SEPA and loss of high value tourist salmon fishing and environmental damage. (252)</p>	<p>LDP.</p> <p>As part of the site assessment process for the site, SEPA were consulted and state that they require a Flood Risk Assessment to be undertaken to assess the risk from the Linn Burn, Eshiels Burn and small watercourses which flow through and adjacent to the site. In addition, due to the steepness of the adjacent hill slopes, SEPA also recommended that consideration is given to surface water runoff to ensure the site is not at risk of flooding and nearby development and infrastructure are not at increased risk of flooding. It is noted that SEPA did not object to the potential inclusion of the site within the Plan.</p> <p>In respect to sewage facilities, whilst access to sewage facilities may currently be an issue, upgrades can overcome that issue.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.
---------	--	--	---	--

			<p>upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Alternative sites/proposals:</u></p> <p>The contributor states that instead of this site, new hamlets can be created or the land can be better used, with smaller expansion in more areas. (205)</p>	<p>It should be noted that a Development Options Study was undertaken to identify and assess options for housing and employment land in the Western Strategic Development Area. This was due to a number of physical and infrastructure constraints within the central Tweeddale area. The study identified a number of potential short and long term housing options as well as sites for business/industrial use. Site MESH1002 was one of the sites identified in that study.</p> <p>Paragraph 40 of Scottish Planning Policy requires: "<i>spatial strategies within development plans to promote a sustainable pattern of development appropriate to the</i></p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

			<p><i>area. To do this decisions should be guided by the following policy principles: optimising the use of existing resource capacities, particularly by co-ordinating housing and business development with infrastructure investment including transport, education facilities...”.</i></p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland’s restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
--	--	--	---	--

Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Existing use of this site:</u></p> <p>The contributor disagrees with the inclusion of this site within the MIR. The southern part of the site is owned and used by the Forestry Commission as overflow parking for major events. The loss of this area would result in the loss of events and the knock of loss of income to the local economy, and more importantly, loss of reputation of Tweed Valley as the Mountain Biking capital of Scotland. (283)</p> <p>The contributor raises concerns that Forestry Commission do not appear to have been consulted at the appropriate level as to the impact of the proposed development on the use of the new Forest Lodges, on major events where the Forestry Commission use these fields for additional parking, nor has it been considered the impact on parking more generally, in reduced appeal of Glentress generally if the development goes ahead, and more specifically the loss of revenue for the Forestry Commission of cars parking in the new development in preference to the paid car parks, nor any provision to mitigate the impact of this on the residents of the proposed developments. (239)</p>	<p>It should be noted that the Forestry Commission are a statutory consultee in the Development Plan process and will continue to be involved. It is also noted that the Council did not receive any objection to the inclusion of site MESH1002 within the Main Issues Report (MIR) from the Forestry Commission.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.
---------	--	--	--	--

			site MESH1002 within the Proposed LDP.	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Siting of industrial buildings:</u></p> <p>The contributor states that they do not think that the siting of industrial units within a housing development is appropriate. (292)</p>	<p>It should be noted that the site was identified as a Mixed Use site and not a Housing site. Furthermore the site requirements set out in the Main Issues Report stated that a Masterplan would be required in taking the site forward. The Masterplan would have sought to address the concern raised by the contributor in relation to siting industrial buildings adjacent to residential use.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

			<p>Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Lack of services within Eshiels:</u></p> <p>The contributor states that Eshiels currently has no pub or shop. Housing development should surely be focussed on places that can offer residents some local services. (300)</p>	<p>Whilst Eshiels may not have a pub or a shop, it has good access to employment and services, and there is the potential access to public transport to be improved on as Eshiels is located just off the A72. In addition, Eshiels is also located in close proximity to the Walkerburn to Peebles multi use path. It is also noted that a public footpath runs along the A72 into Peebles, although it is noted that this is on the southern side of the road. A site requirement also sets out a requirement for options for improvements to the existing public transport infrastructure will need to be explored, as well as the suitability of pedestrian provision on the A72.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

			<p>now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Lack of benefit to Peebles High Street:</u></p> <p>The contributor states that the majority of householders will have to commute to work by car to work in Edinburgh, there is likely to be little benefit to the Local High Street in Peebles, as most commuters will shop in larger centres, such as Straiton. (269)</p>	<p>It is not considered that the majority of the new residents would be commuters to Edinburgh. It should be noted that the 2001 Census, Travel to Work Data found that only 20% of Peebles resident employed adults worked in Edinburgh. In addition, it is considered that Eshiels has good access to services and facilities at Peebles, including close proximity to the Walkerburn to Peebles multi use path. It is therefore considered that it would be likely that any potential development at this location would benefit Peebles High street.</p> <p>However, in light of the consultation responses received during the Main</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

			<p>Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Incorrect maps:</u></p> <p>The contributor states that there is no existing/operational sawmill as shown on the maps. (269)</p>	This is an Ordinance Survey issue and outwith the control of the Council. Updates on the Ordinance Survey base maps will be undertaken in due course.	No further action required.
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Link road to fields to north of MESH1002:</u></p> <p>The contributor states, in respect of (MESH1002), that consideration should be made to requiring a link road to the fields to the immediate north with a view to future expansion of housing at Eshiels.</p>	In light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for	It is recommended that the Council agree not to allocate this site within the Proposed Local

		Without such a link, these fields will be effectively cut off, the existing access road to there is steep, single track and incorporates several sharp bends, with little likely scope for upgrading. No other readily apparent route to these fields exists without going via (MESH1002). (267)	development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area. As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.	Development Plan.
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<u>Proposed use for the site:</u> The contributor cannot conceive how any business use land could be profitably operated in the site, even assuming both are approved. The community size is too small to sustain any retail operation, and proximity to Peebles would further reduce that. Catering facilities in Peebles have been criticised in recent years as being oversupplied, so it is difficult to conceive any catering at Eshiels would be able to compare. That only leaves light industrial, however the contributor would contend that an expansion of Cavalry Park would be far more in keeping, and far more likely to be commercially viable. (267)	Following assessment of the site, it was considered that the area could be suitable for commercial mixed use development given its location close to Peebles, and the A72. It is noted that promoting mixed use sites is in line with national policy and gives an opportunity to create more sustainable areas with residential and non-retail employment activities. In addition it is noted that the Main Issues Report did not set out the	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

			<p>exact use for employment and mixed use sites to give the market the flexibility to satisfy demand in different sectors.</p> <p>It should be noted, that a part of the Longer Term Mixed Use site within Peebles, site SPEEB005 has been identified as having potential to come forward in the short term to accommodate business and industrial use; however, the Economic Development Section of the Council are of the view that additional land for business and industrial use needs to be identified through the Local Development Plan process.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for</p>	
--	--	--	--	--

			<p>mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Pressure from developers:</u></p> <p>The contributor states that the impression they get, is that the developers are pushing for more housing in the Peebles area. (257)</p>	<p>Historically Peebles has a vibrant market for housing development and the development industry will continue to seek further land in this area to meet demand.</p> <p>It should be noted that it is not intended that all of the sites identified within the Main Issues Report (MIR) for the Tweeddale Locality will be brought forward for development. The MIR in paragraph 3.3 notes that "<i>it is not anticipated the LDP2 will require a significant number of new housing sites</i>". The purpose of the MIR was to identify a number of site options and present those to the public so that LDP2 could then be informed by their responses.</p> <p>In addition, it should be noted that the Council are also required to allocate sufficient land within the Central, Eastern and Western Strategic Development Areas. Scottish Planning Policy requires</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

			<p>LDP's to allocate a range of sites which are effective or expected to become effective in the plan period to meet the housing land requirement of the strategic development plan up to year 10 from the expected year of adoption. They should provide for a minimum of 5 years effective land supply at all times. Failure to meet this requirement would result in a failure to provide a plan-led system.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p>	
--	--	--	---	--

			As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Does not align with overall aims of strategy:</u></p> <p>The contributor states that the development of this site does not align with the overall aims of the development strategy because the aims set out by the Council regarding sustainability and climate change seek to increase commercial woodlands whereas development of these sites would reduce this aspect. (252)</p>	<p>It should that site MESH1002 currently does not take the form of a woodland area.</p> <p>The SESPlan requires strategic growth in the Scottish Borders to be directed to three Strategic Development Areas (SDA) in the Central Borders, the Western Borders and the Eastern Borders.</p> <p>It should also be noted that Scottish Planning Policy requires Local Development Plans to allocate a range of sites which are effective or expected to become effective in the plan period to meet the housing land requirement of the strategic development plan up to year 10 from the expected year of adoption. They should provide for a minimum of 5 years effective land supply at all times. Failure to meet this requirement would result in a failure to provide a plan-led system. In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

			<p>assessment. In doing this rigorous site assessment process, the best sites possible are identified. The site assessment also considers many issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. --	--	--	--	--

Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Broadband infrastructure:</u></p> <p>The contributor raises concerns regarding the lack of suitable broadband infrastructure. (239)</p>	<p>LDP.</p> <p>The Scottish Borders is benefiting from the Digital Scotland Superfast Broadband rollout which is programmed to connect 94.9% of premises to Fibre to the Cabinet Broadband by the end of 2018 (this includes the additional 'Gainshare' funding). The remaining gap in provision which comprises remoter rural areas and premises which suffer from 'long lines' will be addressed by the Scottish Government's R100 programme. It is critical that the region also maximises the provision of Full Fibre Connectivity to Businesses and the wider community. Mobile phone coverage is an important complement to the rollout of Superfast Broadband. Ongoing investments by Mobile Network Operators will result in significant improvements across the Scottish Borders. Efforts are being made to ensure that this coverage will be as comprehensive as possible and that the region will benefit from 5G coverage in the future.</p>	No further action required.
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Local economy:</u></p> <p>The contributor states that the development would damage the local economy and is counter to Policy ED7. They also raise concerns that it is likely new arrivals will be commuters to Edinburgh, with there being a lack of economic spending. (216)</p>	<p>It should also be noted that LDP policy ED7 Business, Tourism and Leisure Development in the Countryside aims to allow for appropriate employment generating development in the countryside whilst protecting the environment and to ensure that business, tourism</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

			<p>and leisure related developments are appropriate to their location. It is not considered that any of the potential sites identified within the MIR is contrary to this policy.</p> <p>The 2001 Census, Travel to Work Data found that 20% of Peebles resident employed adults worked in Edinburgh and of these 92% were car drivers or passengers, 6% used the bus and 2% used other transport means (including motorbikes).</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p>	
--	--	--	---	--

			As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Housing tenure:</u></p> <p>The contributor states that the housing will be for the affluent people from outwith the Borders. A few 'affordable' houses thrown in will not solve housing problems for people who live here. (235)</p>	<p>It should be noted that Scottish Planning Policy (SPP) and the SDP include an affordable housing benchmark figure of 25%. The benchmark was given detailed consideration as part of the Affordable Housing SPG and this confirmed a need for 25%.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

			As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Light pollution:</u></p> <p>The contributor raises concerns regarding the introduction of light pollution for the first time, to the hamlet. (197)</p>	<p>In relation to comments regarding light pollution, this is a detailed issue that would be considered at planning application stage.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan

Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Contrary to MIR statement:</u></p> <p>The contributor raises concerns that the proposal is contrary to the MIR statement, regarding the protection of the Scottish Borders Countryside and sustainable travel principles. (197)</p>	<p>LDP.</p> <p>It is acknowledged that paragraph 5.8 of the Main Issues Report (MIR) states: “<i>The Scottish Borders is an attractive area to live and work in and the Council continues to receive many applications for housing in the countryside. Whilst supporting such proposals which can help economic growth and local village services, this must be weighed up against matters such as the protection of the Scottish Borders countryside and sustainable travel principles. The Scottish Borders has outstanding scenic qualities within its landscape and planning policy seeks to protect it</i>”.</p> <p>However, Scottish Planning Policy requires LDP’s to allocate a range of sites which are effective or expected to become effective in the plan period to meet the housing land requirement of the strategic development plan up to year 10 from the expected year of adoption. They should provide for a minimum of 5 years effective land supply at all times. Failure to meet this requirement would result in a failure to provide a plan-led system. In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.
---------	--	--	--	--

			<p>Planning, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that assessment. In doing this rigorous site assessment process, the best sites possible are identified. The site assessment also considers many issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p>	
--	--	--	---	--

			As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.	
Eshiels	MESH1002, Land at Eshiels II, Eshiels	<p><u>Contrary to Council's vision:</u></p> <p>The contributor states that the proposed sites do not align with the Council's vision to ensure the economic development opportunities of the Borders Railway corridor are maximised hence they contradict that vision and should be removed. (252)</p>	<p>The SESPlan requires strategic growth in the Scottish Borders to be directed to three Strategic Development Areas (SDA) in the Central Borders, the Western Borders and the Eastern Borders.</p> <p>It should also be noted that Scottish Planning Policy requires Local Development Plans to allocate a range of sites which are effective or expected to become effective in the plan period to meet the housing land requirement of the strategic development plan up to year 10 from the expected year of adoption. They should provide for a minimum of 5 years effective land supply at all times. Failure to meet this requirement would result in a failure to provide a plan-led system. In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that assessment. In doing this rigorous site assessment process, the best sites possible are identified. The site assessment also considers many</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan

			<p>issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
Eshiels	MESH1002, Land at Eshiels II,	<p><u>Settlement boundary:</u></p> <p>The contributor states could/should Eshiels seek</p>	<p>Comments noted.</p> <p>It should be noted that had either site MESH1001 or MESH1002 been</p>	It is recommended that the Council agree not to

	Eshiels	to be a settlement boundary especially if the plan goes ahead? (276)	<p>allocated within the Proposed Local Development Plan (LDP) 2, then a new Development Boundary would have been drawn around Eshiels thereby giving Eshiels settlement status within the LDP.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation and following further investigation on site MESH1001 as well as taking into account the immediate need to identify land for employment use, it is recommended that a reduced site for employment only – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p> <p>Furthermore, given that it is recommended that only an employment allocation is proposed at Eshiels, it is not recommended that a new Development Boundary</p>	allocate site MESH1002 within the Proposed Local Development Plan.
--	---------	---	--	--

			is drawn to form a formal settlement at this location. It is noted that a similar approach has already been taken elsewhere within the LDP at St Boswells for Charlesfield.	
Eshiels	MESHI002, Land at Eshiels II, Eshiels	<p>SEPA state in respect of co-location, that Peebles STW (CAR) and Eshiels community recycling centre (WML) are located across the road and to the west of the site. These sites are however unlikely to have an impact on the site from SEPA's perspective. Possible odour issues from the STW would be dealt with by SBC Env health.</p> <p>There is a watercourse that runs through/adjacent to the site which should be protected and enhanced as part of any development. Therefore, a site requirement is needed to ensure that a maintenance buffer strip of at least 6 metres wide is provided between the watercourse and built development. Additional water quality buffer strips may be required.</p> <p>SEPA require an FRA which assesses the risk from the Linn Burn, Eshiels Burn and small watercourses which flow through and adjacent to the site. Consideration will need to be given to bridge and culvert structures within and adjacent to the site which may exacerbate flood risk as well as any transfer of water between catchments. Due to the steepness of the adjacent hill slopes we would also recommend that consideration is given to surface water runoff to ensure the site is not at risk of flooding and nearby development and infrastructure are not at increased risk of flooding. Site may be constrained due to flood risk.</p>	<p>Comments noted.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESHI002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESHI002 within the Proposed LDP.</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

		<p>SEPA identify a potential surface water hazard.</p> <p>There is no public sewer in the vicinity and if this site was to be developed, this would be an opportunity to provide first time sewerage provision to Eshiels, picking up existing properties also. Any private sewage provision would be likely to require to discharge to the River Tweed rather than the Linn Burn. The watercourse that runs through/adjacent to the site should be protected and enhanced as part of any development. It appears that there may be a culverted watercourse at the southern end of the site. Depending on the use of the proposed site, there may be a requirement for permission to be sought for certain activities from SEPA. (119)</p>		
Eshiels	MESHI002 Land at Eshiels II	<p>The contributor confirms that they own the northern field within site (MESHI002) and support the inclusion of the site within the MIR.</p> <p>Considers that access would be better achieved via the entrance to Glentress, then left through their small car park and into the field which the Forestry Commission now own, to the south of their field. There is already a gate, as they use the field for over spill car parking on event days.</p> <p>The entrance to Glentress has already been widened, although there is scope for more, and there is a filter lane on the main road for those crossing the traffic. (19)</p>	<p>Support noted.</p> <p>In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees including Roads Planning and their comments are incorporated into that assessment.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation, including responses from some landowners stating that they are unwilling to release their land for development; as well as following further investigation on the site in relation to the need to upgrade the existing Eshiels road, of which it has now been established that upgrading of the road is not possible</p>	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.

			<p>due to the Historic Environment Scotland's restrictions around the adjacent Scheduled Monument, it is now not intended to allocate site MESH1002 within the Proposed Local Development Plan (LDP) for mixed use. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area.</p> <p>As a result of the above, it is considered inappropriate to identify site MESH1002 within the Proposed LDP.</p>	
--	--	--	---	--

QUESTION 6

Do you agree with the preferred options for the provision of additional business and industrial land/ mixed use land in the LDP2? Do you agree with the alternative option for mixed use land? Or do you have other alternative options?

Main Issue	Sub Issue	Summary of Main Issues Raised	Proposed Response to Main Issues Raised	Recommendation
Growing our economy: Question 6	Tweeddale Mixed Use Sites	There are no alternative sites identified. The sites identified are broadly suitable for high quality business development, but sites described as mixed use seem to be scheduled largely for housing. Also the proportions of those sites not designated for housing must be protected against housing development in perpetuity (96)	<p>It is not intended to allocate all of the sites identified within the Main Issues Report (MIR) within the Proposed Local Development Plan (LDP).</p> <p>It is noted that no alternative sites were identified within the MIR for Mixed Use, the purpose of this was to allow the community to give their views on where they would prefer development to take place. As noted within the MIR (para 4.5), a main challenge in the LDP process is to find new employment land for business and industrial use in the vicinity of Peebles. There are significant constraints in identifying both employment and housing land in this area, largely due to traffic congestion issues, the need for a new bridge to allow the town's development to the south of the River Tweed, flood risk areas and topographical constraints. Peebles remains a highly attractive town for prospective development and the LDP2 needs to consider options for both short and longer term purposes. Due to the ongoing</p>	It is recommended that the Council agree to allocate employment site - BESH1001 at Eshiels.

			<p>uncertainty as to when or indeed if a new bridge will be built, any proposals identified to the southern side of the town can only be longer term options. An independent study was carried out by consultants to identify site options within the vicinity of Peebles. The study findings have informed the potential site options set out in the MIR. It should be noted that for sites SCARD002 (Land at Nether Horsburgh), MESH1001 (land at Eshiels I) and MESH1002 (land at Eshiels II) were identified as potential options for mixed use, a site requirement for a Masterplan is set out within the site requirements for these sites.</p> <p>However, in light of the consultation responses received during the MIR public consultation and following further consideration on the options included within the MIR, it is recommended that a reduced site for employment – site BESH1001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist</p>	
--	--	--	--	--

			in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.	
Growing our economy: Question 6	Tweeddale Additional Allocations	<p>Contributor 145 states that they do not agree with the allocation of land at Eshiels, Cardrona and Peebles. The local communities transport and utility infrastructure are unable to cope with current demand. Additional business and industrial allocations will exacerbate these capacity issues including additional traffic joining the already heavily used A72 increasing the likelihood of traffic accidents.</p> <p>Contributor 154 states that they object to further proposals for more urban development in the Tweed Valley around Glentress. The approach from the south has already been spoiled by the new housing and an unattractive hotel - both of which are completely out of character for their setting.</p> <p>Contributor 193 states that they disagree with the additional allocations as the area is a Special Landscape Area, the proposed development is out of scale and out of character, and it will impact on the areas potential for tourism as well as ruin local biodiversity.</p> <p>Contributor 276 states that with regard to the preferred options at Peebles and Eshiels, the contributor does not agree with them as whilst more housing is planned for Peebles in current plan never mind this MIR, the lack of suitable industrial sites for business development mean no improvement in local employment. SME's</p>	<p>It should be noted that it is not intended that all of the sites identified within the Main Issues Report (MIR) for the Tweeddale Locality will be brought forward for development. The MIR in paragraph 3.3 notes that "<i>it is not anticipated the LDP2 will require a significant number of new housing sites</i>". The purpose of the MIR was to identify a number of site options and present those to the public so that LDP2 could then be informed by their responses.</p> <p>In addition, it should be noted that the Council are also required to allocate sufficient land within the Central, Eastern and Western Strategic Development Areas. Scottish Planning Policy requires LDP's to allocate a range of sites which are effective or expected to become effective in the plan period to meet the housing land requirement of the strategic development plan up to year 10 from the expected year of adoption. They should provide for a minimum of 5 years effective land supply at all times. Failure to meet this requirement would result in a failure</p>	No further action required.

		<p>springing up in small units like at Calvary park whilst they make a contribution, numerically they are insignificant. The contributor considers that the area has become a dormitory suburb of Edinburgh. Trying to ameliorate this now by suggesting a mixed use conurbation in Eshiels is absurd. The urbanisation, apart from biodiversity impact, will change the experience for 300,000 visitors to Glentress alone never mind the other mountain bike trails. The plan talks of the importance of the open and sweeping scenic vistas. The developments take the form of ribbon development which is prohibited. With regards to Eshiels there will also be an issue in relation to drainage from the proposed development which may contribute negatively to the flow of the Tweed.</p> <p>(145, 154, 193, 276)</p>	<p>to provide a plan-led system.</p> <p>In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, Scottish Natural Heritage, SEPA, and NHS) are incorporated into that assessment. In doing this rigorous site assessment process, the best sites possible are identified. The site assessment also considers many issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape.</p> <p>It should be noted that VisitScotland and the Forestry Commission have also been consulted regarding the potential site allocations contained within the MIR and neither have objected.</p> <p>It is not considered that any of the proposed sites would result in ribbon development within the Tweed Valley.</p>	
Growing our economy: Question 6	Tweeddale Mixed Use sites	The contributor states that in relation to land for employment use, the SESplan seeks to ensure that there is a sufficient supply of land for employment use; the SESplan also goes on to state that the sufficiency of land supply would take	Whilst the primary responsibility for operating the development planning system for the Scottish Borders lies with the Council, Circular 6/2013 Development Planning states that	No further action required.

		<p>account of market demand and infrastructure. Apart from some quite perfunctory comment regarding each specific site, there is no separate assessment of demand nor of existing infrastructure if each of these sites were to be included within the LDP and subsequently developed.</p> <p>In addition, the contributor states that with regards to Peebles and the surrounding area, they do not agree with the preferred options discussed. (318)</p>	<p>all interests should be engaged as early and as fully as possible. In addition that document also states “<i>key agencies are under a specific duty to co-operate in the preparation of development plans</i>”; this includes Scottish Natural Heritage, Scottish Environmental Protection Agency, Scottish Water and NHS (Health Board). The Council have consulted with all key agencies throughout the Local Development Plan process and will continue to do so. This then allows key agencies to plan according to their needs and demands also.</p> <p>It should be noted that the Local Development Plan (LDP) process is advised by the Council’s Economic Development section as to the requirement for additional land for Business and Industrial use. In addition, it should be noted that the Council through the Economic Development section and the Development Management section, receives regular enquiries from businesses to locate within the Western Strategic Development Area. Furthermore, the Council undertakes an Employment Land Audit annually to monitor the take up and availability of business and industrial land across the Borders.</p> <p>It should also be noted, that the</p>	
--	--	---	---	--

			Council have not received any acceptable alternative locations for Mixed Use/ Business and Industrial sites within the Western Strategic Development Area for inclusion in the LDP2 as part of the call for sites or public consultation process on the Main Issues Report.	
Growing our economy: Question 6	SCARD002 Land at Nether Horsburgh, Cardrona	The contributor states that the identification of site SCARD002 seems a surprising choice for economic land allocation, and they cannot see the logic other than it is adjacent the road. (24)	As noted within the Main Issues Report (MIR) (para 4.5), a main challenge in the Local Development Plan (LDP) process is to find new employment land for business and industrial use in the vicinity of Peebles. There are significant constraints in identifying both employment and housing land in this area, largely due to traffic congestion issues, the need for a new bridge to allow the town's development to the south of the River Tweed, flood risk areas and topographical constraints. Peebles remains a highly attractive town for prospective development and the LDP2 needs to consider options for both short and longer term purposes. Due to the ongoing uncertainty as to when or indeed if a new bridge will be built, any proposals identified to the southern side of Peebles can only be longer term options. An independent study was carried out by consultants to identify site options within the vicinity of Peebles. The study findings have informed the potential	It is recommended that the Council agree to identify site SCARD002 as a potential Longer Term Mixed Use site within the Proposed LDP.

			<p>site options set out in the MIR. It should be noted that for sites SCARD002 (Land at Nether Horsburgh), MESH1001 (land at Eshiels I) and MESH1002 (land at Eshiels II) were identified as potential options for mixed use, a site requirement for Masterplan was set out within the site requirements for these sites.</p> <p>In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that assessment. In doing this rigorous site assessment process, the best sites possible are identified.</p> <p>In light of the consultation responses received during the MIR public consultation and following further consideration the matter, it is recommended that site SCARD002 Land at Nether Horsburgh, is identified for potential Longer Term Mixed Use within the Proposed Local Development Plan.</p>	
Growing our economy: Question 6	SCARD002 Land at Nether Horsburgh, Cardrona	Contributor 30 considers that this long term proposal will damage the setting of the existing village of Cardrona which is now fitting well into the landscape. It is considered that the proposal will add almost 200 additional houses to the	It should be noted that site SCARD002 was identified as a potential longer term mixed use site within the Main Issues Report (MIR) and not a site to be allocated in the	It is recommended that the Council agree to identify site SCARD002 as a potential Longer

		<p>village and these new residents will surely need to shop in Peebles. It is considered illogical and appalling to consider re-routing the A72 through the site.</p> <p>Contributor 159 states that the identification of this site does not take into account the applications for houses on the south side of the A72 - 14/00666/FUL and 18/01289/FUL. They consider that it seems daft to re-route the A72 through the proposed development. In addition, Cardrona is a dormitory housing estate rather than a village with a community spirit. It has a shop/cafe of sorts (currently threatened by the houses being built cheek-by-jowl beside it), a limited village hall and that's it. Several people there would rather be in Peebles where the facilities are. When creating new housing areas please ensure they have appropriate facilities.</p> <p>Contributor 206 states that this site epitomizes the problem with mixed use. There is still a site behind Horsbrugh Cottages on the access to the MacDonald Hotel that is designated for business use and never developed. Why do we need more designation in SCARD002? If this is designated for mixed use without powers of compel the business developments then it will just end up as housing.</p> <p>Contributor 243 states that there will be increased traffic on the adjacent main road exacerbated by this proposal which will impact on safety for all people using the area. The contributor also questions the need for more community infrastructure.</p>	<p>short term. In addition, the MIR set out a number of site requirements that would be required to be met should that site come forward for development, these included a requirement for a Masterplan.</p> <p>It should be noted that a Development Options Study was undertaken to identify and assess options for housing and employment land in the Western Strategic Development Area, centred on the central Tweeddale area. This was due to a number of physical and infrastructure constraints within the central Tweeddale area. The study identified a number of potential short and long term housing options as well as sites for business/industrial use. Site SCARD002 was one of the sites identified in that study.</p> <p>In the consideration of any site for inclusion in the Local Development Plan (LDP), a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, Scottish Natural Heritage, and NHS) are incorporated into that assessment. In doing this rigorous site assessment process, the best sites possible are identified. The site assessment also considers many</p>	<p>Term Mixed Use site within the Proposed LDP.</p>
--	--	--	--	---

		<p>Contributor 249 states that the people of Cardrona do not want to live in a town, they chose a village. Don't force a town on them.</p> <p>Contributor 276 states that this site will result in an increased volume of traffic on an already busy road.</p> <p>Contributor 283 states that they disagree with the identification of this site. While this may have the advantage of being a large flat site it is highly visible. It is also home to the Peebles Agricultural Show and the contributor understands that there are further plans for the landowners (Forestry Commission) to expand its use for events. Consequently this site is invaluable as a major event arena for the area.</p> <p>Contributor 308 states that this site is considerably more visible from the A72 than their proposed site - ACARD002 West of B7062. (30, 159, 206, 243, 249, 276, 308)</p>	<p>issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape.</p> <p>In respect to comments regarding how the new development will fit into the landscape, it is noted that a requirement has been set out for a masterplan to be produced, in addition the Landscape Section have stated that: <i>"If a Masterplanning exercise can demonstrate that this site on the north side of the A72 can successfully be connected to the Cardrona settlement to the south of the A72 and the Tweed, and that a scheme of mitigation planting would avoid diminishing the quality of this part of the Tweed valley SLA, this site has potential as a mixed use development. The re-alignment of A72 might help to create a development more unified with the existing settlement to the south"</i>.</p> <p>In respect to comments regarding traffic, the Roads Planning Section have stated that: <i>"This site has previously been considered for mixed use development. The difficulty of developing this site is the fact that the A72 runs along the southern boundary of this site with Cardrona being located on the</i></p>

			<p><i>opposite side of the main arterial route linking the Central Borders with the west and beyond. Any allocation of this site would have to include fundamental changes to drastically change the characteristics of the A72 through this area. The idea would be to make the A72 more of a high street rather than bypassing or dividing Cardrona. By creating a high street with dual frontage, this would allow a reduction in the traffic speed limit and help integrate both sides of the A72 into one settlement. A Transport Assessment will be required for this level of development. Master planning of the site would also be required to ensure phasing of the development is carried out in a satisfactory manner. For a development of this scale, consideration should be given to the appropriate infrastructure and amenities required to serve this site and the existing settlement profile of Cardrona, such as retail opportunities and possibly a new school. In summary, developing this site is possible but will require careful planning and a significant investment in infrastructure to create a cohesive and safe residential environment which can sustain this level of development".</i></p> <p>In respect to comments regarding</p>	
--	--	--	--	--

			<p>the use of the site for the Agricultural Show, it should be noted that the Forestry Commission, who own the land, are a statutory consultee in the Development Plan process and will continue to be involved. It is also noted that the Council did not receive any objection to the inclusion of site SCARD002 within the Main Issues Report (MIR) from the Forestry Commission. In addition, the Peebles Show has been located at this location for under 10 years and was previously held in Peebles. It is therefore feasible that it may be located elsewhere in the future.</p> <p>Following consideration of the consultation responses received during the MIR public consultation, it is recommended that site SCARD002 is identified within the Proposed LDP as a potential Longer Term Mixed Use site.</p> <p>As a result of the above, it is considered appropriate to identify site SCARD002 within the Proposed LDP as a potential Longer Term Mixed Use site.</p>	
<p>Growing our economy: Question 6</p>	<p>SCARD002 Land at Nether Horsburgh, Cardrona</p>	<p>The contributor states that this development will destroy good agricultural land and create in effect a new settlement separated by a road or the Tweed. This creation of a separate development will create a lot of extra traffic as people will inevitably drive to Peebles for various services.</p>	<p>It should be noted that site SCARD002 was identified as a potential longer term mixed use site within the Main Issues Report (MIR) and not a site to be allocated in the short term. In addition, the MIR set</p>	<p>It is recommended that the Council agree to identify site SCARD002 as a potential Longer Term Mixed Use</p>

		<p>The idea of routing the busy (and busier if the developments occur) through the new developments will not only slow traffic travelling through this area down, but be hazardous to the locals too. In addition there is a long history of developers paying lip service to sustainable drainage systems as they try to pack as many houses as possible onto the land. (46)</p>	<p>out a number of site requirements that would be required to be met should that site come forward for development, these included a requirement for a Masterplan. In addition, there is also a site requirement for the use of SUDS at the construction phase in order that the risk of pollution during construction to the water environment is minimised.</p> <p>It should be noted that whilst the site is currently in agricultural use, the land is not identified as Prime Quality Agricultural Land. The identification of some greenfield / agricultural land is inevitable.</p> <p>In the consideration of any site for inclusion in the Local Development Plan (LDP), a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, Scottish Natural Heritage, and NHS) are incorporated into that assessment. 			SCARD002 is identified within the Proposed Local Development Plan as a potential Longer Term Mixed Use site. As a result of the above, it is considered appropriate to identify site SCARD002 within the Proposed LDP as a potential Longer Term Mixed Use site.	
Growing our economy: Question 6	SCARD002 Land at Nether Horsburgh, Cardrona	The contributor states that development of this site would cause the destruction of ancient pasture; increases the risk of pollution to the River Tweed and its tributary; will affect local wildlife and tourism; it may cause damage to the historic sites including a history of arboriculture, buildings and artefacts close to the access road. In addition, development at this location would be highly visible and result in spoiling the view for visitors and tourists alike. The increase in population will result in further stretching existing services and facilities. The area does not need and should not be forced to have an increase in population. The proposal will result in making the area a commuter area with no facilities nearby, increasing our carbon footprint. The A72 is already busy and fast, it is frequently closed due to accidents, and is narrow in places, causing bottlenecks and risking lives if emergency services need to get through. Further development along the A72 will result in increasing the number of accidents particularly with cyclists. There is no alternative route. It is also vulnerable to flooding and risk of erosion by the Tweed, development on agricultural land will exacerbate flooding. The creation of Cardrona village has resulted in a village with little community spirit, and is a dormitory village with few facilities, enlarging it will exacerbate its existing problems. The development on	It should be noted that site SCARD002 was identified as a potential longer term mixed use site within the Main Issues Report (MIR) and not a site to be allocated in the short term. In addition, the MIR set out a number of site requirements that would be required to be met should that site come forward for development, these included a requirement for a Masterplan. The SESPlan requires strategic growth in the Scottish Borders to be directed to three Strategic Development Areas (SDA) in the Central Borders, the Western Borders and the Eastern Borders. It should also be noted that Scottish Planning Policy requires Local Development Plans (LDP) to allocate a range of sites which are effective or expected to become effective in the plan period to meet the housing land requirement of the strategic development plan up to year 10 from the expected year of adoption. They should provide for a	It is recommended that the Council agree to identify site SCARD002 as a potential Longer Term Mixed Use site within the Proposed LDP.

		<p>agricultural land used for food production is unwise and may impact on food security. (108 (1 of 2))</p>	<p>minimum of 5 years effective land supply at all times. Failure to meet this requirement would result in a failure to provide a plan-led system.</p> <p>Whilst, brownfield land is the first consideration when identifying additional sites, as a result of limited land availability there is pressure on greenfield land for development, especially in areas where demand for housing is high. The Council therefore seeks to allocate brownfield sites as a redevelopment priority. The MIR identifies regeneration opportunities across the Borders which are suitable for a variety of uses including housing and employment.</p> <p>It should also be noted that whilst the site is currently in agricultural use, the land is not identified as Prime Quality Agricultural Land. It is therefore considered that the identification of some greenfield / agricultural land is inevitable.</p> <p>In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, Scottish Natural Heritage, and NHS) are incorporated into that</p>	
--	--	--	---	--

			<p>assessment. In doing this rigorous site assessment process, the best sites possible are identified. The site assessment also considers many issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape.</p> <p>With regards to comments relating to landscape, natural heritage, and the River Tweed, it should be noted that Scottish Natural Heritage did not object to the potential inclusion of the site within the Local Development Plan. It is also noted that, SEPA, VisitScotland, nor Historic Environment Scotland objected to the potential inclusion of site SCARD002 within the Plan.</p> <p>In respect to comments regarding how the new development will fit into the landscape and the existing settlement, it is noted that a requirement has been set out for a masterplan to be produced, in addition the Landscape Section have stated that: <i>“If a Masterplanning exercise can demonstrate that this site on the north side of the A72 can successfully be connected to the Cardrona settlement to the south of the A72 and the Tweed, and that a scheme of mitigation planting would</i></p>

		<p>inappropriate development and that potential maintenance and enhancement are provided for; clearly the proposals for this development are utterly inappropriate. It would be wrong to consider that the social or economic benefits outweigh the need to protect this special environment. It is noted that there is the possibility of re-routing the A72 through this site. This idea seems to come from the consultation report by LUC on behalf of SBC. This report suggests that the A72 could be re-routed and combined with a new High Street or village centre serving Cardrona. This suggestion is ridiculous and the prospect of diverting the A72 equally ridiculous; the contributor states that they do not need a new town at Nether Horsburgh. Over the past few years this site has been used by the Peebles Agricultural Society as the site for the annual agricultural show. The site is ideally located for such use and has gone from strength to strength since established there. As is well known locally, there are no other suitable sites for holding such an important show or any other show of the size and nature of this one. Officers should be aware that such shows are at the centre of rural life and essential for the local economy. If Peebles is to retain its character as a rural town then it needs the proper space to hold events of this nature. It is quite conceivable that this site could be made more permanent and used to facilitate a variety of shows and events much in the same way that the Springwood Showground in Kelso has been developed to host many different types of events.</p> <p>(318)</p>	<p>development, these included a requirement for a Masterplan.</p> <p>The SESPlan requires strategic growth in the Scottish Borders to be directed to three Strategic Development Areas (SDA) in the Central Borders, the Western Borders and the Eastern Borders.</p> <p>In the consideration of any site for inclusion in the Local Development Plan (LDP), a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, Scottish Natural Heritage, and NHS) are incorporated into that assessment. 			<p><i>environment which can sustain this level of development”.</i></p> <p>In respect to comments regarding the use of the site for the Agricultural Show, it should be noted that the Forestry Commission, who own the land, are a statutory consultee in the Development Plan process and will continue to be involved. It is also noted that the Council did not receive any objection to the inclusion of site SCARD002 within the MIR from the Forestry Commission. In addition, the Peebles Show has been located at this location for under 10 years and was previously held in Peebles. It is therefore feasible that it may be located elsewhere in the future.</p> <p>Following consideration of the consultation responses received during the MIR public consultation, it is recommended that site SCARD002 is identified within the Proposed Local Development Plan as a potential Longer Term Mixed Use site. As a result of the above, it is considered appropriate to identify site SCARD002 within the Proposed LDP as a potential Longer Term Mixed Use site.</p>	
Growing our economy: Question 6	SCARD002 Land at Nether Horsburgh, Cardrona	The contributor states that the allocation of land to the north of Cardrona has not fully proven to be in line within the associated SEA criterion or be deliverable in the short to medium term. It is noted	It should be noted that site SCARD002 was identified as a potential longer term mixed use site within the Main Issues Report (MIR)	It is recommended that the Council agree to identify site SCARD002 as

		<p>that SNH considers the site to be exposed in the landscape and with no strong relations to the existing village. It is believed that the development of this site would have a far more significant impact on the Landscape than the contributors promoted site - ACARD003. (117)</p>	<p>and not a site to be allocated in the short term. In addition, the MIR set out a number of site requirements that would be required to be met should that site come forward for development, these included a requirement for a Masterplan.</p> <p>It is noted that the contributors site, ACARD003 is a housing site and does not offer the benefit of allowing for other uses to be introduced.</p> <p>In the consideration of any site for inclusion in the Local Development Plan (LDP), a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, Scottish Natural Heritage, and NHS) are incorporated into that assessment. In doing this rigorous site assessment process, the best sites possible are identified. The site assessment also considers many issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape.</p> <p>It should be noted that neither Scottish Natural Heritage nor the Council's Landscape Section objected to the potential inclusion of</p>	<p>a potential Longer Term Mixed Use site within the Proposed LDP.</p>
--	--	---	--	--

			<p>the site within the LDP.</p> <p>In respect to comments regarding how the new development will fit into the landscape and the existing settlement, it is noted that a requirement has been set out for a masterplan to be produced, in addition the Landscape Section have stated that: <i>“If a Masterplanning exercise can demonstrate that this site on the north side of the A72 can successfully be connected to the Cardrona settlement to the south of the A72 and the Tweed, and that a scheme of mitigation planting would avoid diminishing the quality of this part of the Tweed valley SLA, this site has potential as a mixed use development. The re-alignment of A72 might help to create a development more unified with the existing settlement to the south”</i>.</p> <p>Following consideration of the consultation responses received during the MIR public consultation, it is recommended that site SCARD002 is identified within the Proposed Local Development Plan as a potential Longer Term Mixed Use site. As a result of the above, it is considered appropriate to identify site SCARD002 within the Proposed LDP as a potential Longer Term Mixed Use site.</p>	
--	--	--	--	--

<p>Growing our economy: Question 6</p>	<p>SCARD002 Land at Nether Horsburgh, Cardrona</p>	<p>The contributor recommends that a developer requirement is attached to the site to ensure that a maintenance buffer strip of at least 6 metres wide is provided between the watercourse and built development. Additional water quality buffer strips may be recommended in addition to the maintenance buffer strip depending upon specific water quality pressures. The small watercourses running through/alongside the development should be safeguarded and enhanced as part of any development.</p> <p>The contributor supports the development requirement for a Flood Risk Assessment (FRA) to be undertaken prior to development occurring on the site. The contributor states that a FRA which assesses the risk from the small watercourses which flow through and adjacent to the site as well as the River Tweed. Consideration will need to be given to bridge and culvert structures within and adjacent to the site which may exacerbate flood risk. Review of the surface water 1 in 200 year flood map indicates that there may be flooding issues within this site. This should be investigated further and it is recommended that contact is made with the flood prevention officer. Site may be constrained due to flood risk.</p> <p>The contributor states that the site has the potential for surface water flood risk and therefore recommends that this issue is taken forward through discussion with the flood prevention and roads department colleagues and Scottish Water, where relevant. It is noted that additional site specific information may only serve to identify that development at the site would be contrary to the</p>	<p>It is noted that a site requirement for a maintenance buffer, and water quality buffer strips have already been included. However, It is recommended that the following additional text is also included within the first site requirement: <i>“The small watercourses running through/alongside the development should be safeguarded and enhanced as part of any development”</i>.</p> <p>Support and comments noted.</p>	<p>It is recommended that the Council agree to identify site SCARD002 as a potential Longer Term Mixed Use site within the Proposed LDP.</p> <p>It is also recommended that the first site requirement is amended to include: <i>“The small watercourses running through/alongside the development should be safeguarded and enhanced as part of any development”</i>.</p> <p>In addition it is also recommended that the following additional site requirements are also included: <i>“The use of SUDS at the construction phase in order that the risk of pollution during construction</i></p>
--	--	---	--	---

		<p>SPP and the principles of sustainable flood management.</p> <p>All new developments should manage surface water through the use of Sustainable Urban Drainage Systems (SUDS). The contributor recommends that this requirement includes the use of SUDS at the construction phase in order that the risk of pollution during construction to the water environment is minimised.</p> <p>Foul drainage should be connected to the SW foul network at Cardrona sewage treatment works (the site is outwith the currently sewered area). Options for private drainage on site do not appear to be feasible. The small watercourses running through/alongside the development should be safeguarded and enhanced as part of any development. Depending on the use of any proposed units there may be a requirement for permissions to be sought for certain activities from SEPA. (119)</p>	<p>Comments noted.</p> <p>It is recommended that the following additional site requirements are included within the Proposed Plan:</p> <ul style="list-style-type: none"> • The use of SUDS at the construction phase in order that the risk of pollution during construction to the water environment is minimised • Foul drainage should be connected to the Scottish Water foul network at Cardrona sewage treatment works (the site is outwith the currently sewered area) <p>It is also noted that reference to foul water disposal will be made within the introductory section of Volume 2 of the Proposed Local Development Plan.</p>	<p><i>to the water environment is minimised” and “Foul drainage should be connected to the Scottish Water foul network at Cardrona sewage treatment works (the site is outwith the currently sewered area)”.</i></p> <p>It is also noted that reference to foul water disposal will be made within the introductory section of Volume 2 of the Proposed Local Development Plan.</p>
<p>Growing our economy: Question 6</p>	<p>SCARD002 Land at Nether Horsburgh, Cardrona</p>	<p>The contributor states that the allocation of this site has the potential for setting impacts on scheduled monument - Nether Horsburgh Castle. They consider that there is potential for development of this site, and welcome that the SEA sets out adherence to LDP policy EP8 as a mitigation measure, and that this has been brought forward to the site requirements, but recommend that specific reference to the scheduled monument is included here. They also note that there may be consideration of re-routing the A72 through the site, and would expect any such proposal to be considered in terms of Policy</p>	<p>Comments noted.</p> <p>It should be noted that site SCARD002 was identified as a potential longer term mixed use site within the Main Issues Report (MIR) and not a site to be allocated in the short term. In addition, the MIR set out a number of site requirements that would be required to be met should that site come forward for development, these included a requirement for a Masterplan. Following consideration of the</p>	<p>It is recommended that the Council agree to identify site SCARD002 as a potential Longer Term Mixed Use site within the Proposed LDP.</p> <p>It is also recommended that the following additional site</p>

		<p>EP8 and national policy on scheduled monuments. Furthermore they note that a masterplan would be required for the site, and recommend early consultation with Historic Environment Scotland on the development of any masterplan that may emerge. (164)</p>	<p>contributors comments, it is now also proposed to include the following additional site requirement:</p> <ul style="list-style-type: none"> The design and layout of the proposed development will require to take into account any potential for setting impacts on the Nether Horsburgh Castle Scheduled Monument. <p>Following consideration of the consultation responses received during the MIR public consultation, it is recommended that site SCARD002 is identified within the Proposed Local Development Plan (LDP) as a potential Longer Term Mixed Use site. As a result of the above, it is considered appropriate to identify site SCARD002 within the Proposed LDP as a potential Longer Term Mixed Use site and include the above additional site requirement.</p>	<p>requirement is also included in the Proposed Plan:</p> <ul style="list-style-type: none"> The design and layout of the proposed development will require to take into account any potential for setting impacts on the Nether Horsburgh Castle Scheduled Monument.
<p>Growing our economy: Question 6</p>	<p>SCARD002 Land at Nether Horsburgh, Cardrona</p>	<p>The contributor states that the site lies outwith the current settlement boundary as shown in the LDP and is within a Special Landscape Area. Due to its physical separation there is little relationship of this site to Cardrona or to Peebles and it appears likely that development here would essentially involve the creation of another standalone housing area. Due to the prominence and location of this site we advise there is a high potential for adverse landscape and visual impacts within the SLA, even with mitigation. The overall assessment in Appendix 10 of the Housing SG was that the site is unacceptable due to high potential for adverse</p>	<p>It should be noted that site SCARD002 was identified as a potential longer term mixed use site within the Main Issues Report (MIR) and not a site to be allocated in the short term. In addition, the MIR set out a number of site requirements that would be required to be met should that site come forward for development, these included a requirement for a Masterplan.</p> <p>It should also be noted that Scottish</p>	<p>It is recommended that the Council agree to identify site SCARD002 as a potential Longer Term Mixed Use site within the Proposed LDP.</p>

		<p>landscape and visual impacts and the need for a solution to access issues. The MIR proposes that the A72 could be re-routed through the site, with SEA site assessments noting that this section should function as a street.</p> <p>The contributor states that they are not aware that effective mitigation has been identified to address landscape impacts and maintain our previous advice regarding the physical separation of this allocation and its potential landscape and visual impacts. They consider that there are other allocations in the Tweeddale Locality that could supply required housing numbers and which would not have adverse landscape and visual impacts. If this site was to be safeguarded as a long term option the contributor states that they would strongly advocate that the placemaking issues are addressed in advance, with clear site briefing required to mitigate landscape impacts and successfully integrate development within the context of the A72 trunk road. (213)</p>	<p>Planning Policy requires Local Development Plans (LDP) to allocate a range of sites which are effective or expected to become effective in the plan period to meet the housing land requirement of the strategic development plan up to year 10 from the expected year of adoption. They should provide for a minimum of 5 years effective land supply at all times. Failure to meet this requirement would result in a failure to provide a plan-led system.</p> <p>It should be noted that a Development Options Study was undertaken to identify and assess options for housing and employment land in the Western Strategic Development Area, centred on the central Tweeddale area. This was due to a number of physical and infrastructure constraints within the central Tweeddale area. The study identified a number of potential short and long term housing options as well as sites for business/industrial use. Site SCARD002 was one of the sites identified in that study. The study findings have informed the potential site options set out in the MIR.</p> <p>In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and</p>	
--	--	--	--	--

			<p>external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, Scottish Natural Heritage, and NHS) are incorporated into that assessment. In doing this rigorous site assessment process, the best sites possible are identified. The site assessment also considers many issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape.</p> <p>In respect to comments regarding how the new development will fit into the landscape and the existing settlement, it is noted that a requirement has been set out for a masterplan to be produced, in addition the Landscape Section have stated that: <i>“If a Masterplanning exercise can demonstrate that this site on the north side of the A72 can successfully be connected to the Cardrona settlement to the south of the A72 and the Tweed, and that a scheme of mitigation planting would avoid diminishing the quality of this part of the Tweed valley SLA, this site has potential as a mixed use development. The re-alignment of A72 might help to create a development more unified with the existing settlement to the south”</i>.</p>	
--	--	--	---	--

			Following consideration of the consultation responses received during the MIR public consultation, it is recommended that site SCARD002 is identified within the Proposed Local Development Plan as a potential Longer Term Mixed Use site. As a result of the above, it is considered appropriate to identify site SCARD002 within the Proposed LDP as a potential Longer Term Mixed Use site.	
Growing our economy: Question 6	Potential for Business within Glentress Tourist Asset	Tourism sites such as Glentress could host a small number of related industries or retail outlets which could be beneficial to the attraction and minimise the visual downsides of industrial parks dotting the countryside whilst answering the need for economic development. (197)	The Glentress Masterplan for this area takes this into account and requires any such application to submit a retail/commercial justification report.	No further action required.
Growing our economy: Question 6	MLAMA001 Lamancha Mixed Use, Lamancha	The contributor seeks the allocation of site MLAMA001 for business or housing. (75)	It is noted that the Lamancha is not a recognised settlement within the Local Development Plan. In considering this site, the site assessment found that Lamancha has limited access to public transport and services; in addition, the Contaminated Land Officer has indicated that the site is a brownfield site and may present development constraints. Furthermore, the Roads Planning section are unable to support the full extent of the site for mixed use however, they may be able to support a reduced site for business and industrial use. It should also be noted that, development at this location can be	It is recommended that the Council agree to not allocate this site within the Proposed Local Development Plan.

			<p>considered through the submission of a planning application.</p> <p>The Council have a supportive policy for this type of development in terms of Policy ED7 'Business, Tourism and Leisure Development in the Countryside'. Therefore, it is considered that this proposal can be considered against that policy as well as other appropriate policies through the Development Management process should a planning application be submitted.</p> <p>Policy ED7 aims to allow for appropriate employment generating development in the countryside whilst protecting the environment and ensuring that developments are appropriate to their location.</p>	
<p>Growing our economy: Question 6</p>	<p>MLAUD002 Stow Road Mixed Use, Lauder</p>	<p>The contributor seeks the allocation of site MLAUD002 for industrial, residential or retail. At present the site is classified as agriculture use however, due to the fact that Lauder is expanding and encroaching towards the site, it is considered that the current use may not be appropriate. (304)</p>	<p>The site was submitted as part of the Main Issues Report public consultation.</p> <p>Following a full site assessment it is considered that site MLAUD002 is not appropriate for allocation. The site is located to the south-west of the Allanbank estate wall which forms a strong physical separation with the settlement, and although there are mature trees along the north boundary with Stow Road which assist in screening site, the site sits outwith Development Boundary and is also located within the outer zone of a hazard pipeline.</p>	<p>It is recommended that the Council does not identify site MLAUD002 as a mixed use site in the Proposed Local Development Plan.</p>

			<p>In addition to the above, it is noted that Lauder is located outwith any of the Strategic Development Areas, and it is considered that the settlement has already a sufficient housing land supply with two allocated housing sites - sites ALAUD001 and ELA12B with a combined indicative capacity of 130 units.</p> <p>In conclusion, for the reasons above, the proposed mixed use site will not be included within the Proposed Plan.</p>	
<p>Growing our economy: Question 6</p>	<p>MLAUD003 Whitlaw Road Mixed Use, Lauder</p>	<p>The contributor seeks the allocation of site MLAUD003 for industrial, residential or retail. At present the site is classified as agriculture use however, due to the fact that Lauder is expanding and encroaching towards the site, it is considered that the current use may not be appropriate. (304)</p>	<p>The site was submitted as part of the Main Issues Report public consultation.</p> <p>Following a full site assessment it is considered that site MLAUD003 is not appropriate for allocation. Economic Development do not support a mixed use proposal on this site, especially if this includes a housing element. They do not consider it is appropriate for housing development to be accessed through the estate if possible, as there are other more appropriate sites available. They advise that the current zoning should be protected.</p> <p>As noted above, the site is a safeguarded business and industrial site, under Policy ED1. Policy ED1 aims to ensure that adequate</p>	<p>It is recommended that the Council does not identify site MLAUD003 as a mixed use site in the Proposed Local Development Plan.</p>

			<p>supplies of business and industrial land are retained and not diluted by the proliferation of other uses. Policy ED1 states that development other than Classes 4, 5 and 6, may be accepted on district business and industrial sites, in order, where appropriate, allow a more mixed use area. This is subject to assessment against criteria contained within Policy ED1. Therefore, the current Policy ED1 allows, in certain cases, a mix of uses within district sites. However, it should be noted that this excludes retail proposals. It is considered that there is existing flexibility within Policy ED1 to allow for such alternative, mixed use proposals to be considered, albeit with the exception of retail. Furthermore, business and industrial land is increasingly challenging to find within settlements and a mixed use allocation would result in the loss of part of the safeguarded allocation (zEL61). It is further noted that a housing development would likely result in a conflict of land uses, being located within an established industrial estate.</p> <p>In addition to the above, it is noted that Lauder is located outwith any of the Strategic Development Areas, and it is considered that the settlement has already a sufficient</p>	
--	--	--	---	--

			<p>housing land supply with two allocated housing sites - sites ALAUD001 and ELA12B with a combined indicative capacity of 130 units.</p> <p>In conclusion, for the reasons above, the proposed mixed use site will not be included within the Proposed Plan. However, it is proposed to retain the site as a safeguarded business and industrial site. This would allow alternative, mixed use proposals to be assessed against the Policy ED1.</p>	
Growing our economy: Question 6	MOXTO001 Oxton South West, Oxton	<p>The contributor considers that this site has the potential for a new school, village hub including a shop and housing in the future. The southern part of the site has been supported by the majority of the community. There is a will that if Oxton and Channelkirk is to expand and develop to this extent that they should facilitate, support and pursue the following:</p> <ul style="list-style-type: none"> • School/Hall/Shop – (Can we consider and re-look at a ‘Hub’ accommodating these within one facility?) • We must use the opportunity to secure developer contributions to go into a pool to help protect the school in the future by way of upgrading existing or providing a deposit towards a new one • Utilities – Gas and Broadband can we negotiate with suppliers’ new opportunities (Would the utilities cope with the increased demand this volume of housing and people would place on them?) 	<p>The site was submitted as part of the Main Issues Report public consultation.</p> <p>Following a full site assessment it is considered that site MOXTO001 is not appropriate for allocation. This is a large site which is being proposed as a mixed use site to potentially incorporate housing, a school and community facilities. The Roads Planning Team are not supportive of the site unless solutions can be found to overcome the issues they have identified. The main issues that the Roads Planning Team have identified are:</p> <p><i>“There is a difference in level between this site and the public road (Main Street), but a main access into the site should be</i></p>	It is recommended that the Council does not identify site MOXTO001 as a mixed use site in the Proposed Local Development Plan.

		<ul style="list-style-type: none">• Roads & Paths - must be reviewed and developed to incorporate the future development and enhance the existing paths, pavements, roads and lighting. <p>(328)</p>	<p><i>achievable at the south westerly end of the road frontage close to the existing track. There is potential for direct access from the existing public road (Main Street) to individual dwellings if the accesses can be dug in at suitable gradients. For good street connectivity, a secondary access will be required onto The Loan and I have concerns over this prospect.</i></p> <p><i>The Loan leading to the site often has extensive lengths of parking on the street which forces single file traffic over significant lengths all the way from the junction with the Main Street/Station Road and round the horizontal curve in the road. This already causes issues with traffic flow. A solution to this would be fundamental to gaining my support for the development of this site. One solution would be to widen the carriageway on the west side of the initial length of The Loan to facilitate on-street parking and two-way traffic flow past the parked cars. This would require a retaining structure, would impact on an embankment and hedging adjacent to the road and would appear to affect third party land.</i></p> <p><i>Furthermore, junction visibility where The Loan joins Main Street/Station Road is restricted due</i></p>	
--	--	---	---	--

			<p><i>to the close proximity of the corner building on the east side combined with the alignment of the Main Street/Station Road. There are no obvious solutions to these concerns and additional traffic would exacerbate the situation. That said, the visibility restrictions appear to control traffic speeds to acceptable levels for the situation. ...”</i></p> <p>In addition, there is a hazard pipeline running through the site and a Health and Safety Executive (HSE) PADHI+ assessment has been carried out via the HSE website for the north-western part of the site). The outcome of this stated: HSE's Advice: Advise Against. The assessment indicates that the risk of harm to people at the proposed development site is such that HSE's advice is that there are sufficient reasons on safety grounds, for advising against the granting of planning permission in this case.</p> <p>In conclusion, due to the reasons mentioned above it is not considered appropriate to include this site within the Proposed Plan.</p>	
<p>Growing our economy: Question 6</p>	<p>General - Peebles</p>	<p>Contributor 73 states that given the constraints around the requirement for a new bridge, LDP2 should not include any sites south of the River Tweed at Peebles for either housing or business and industry.</p>	<p>It should be noted that the Main Issues Report (MIR) did not identify any new short term proposals for development south of the River Tweed at Peebles. However two potential longer term sites were</p>	<p>It is recommended that the Council agree to allocate employment site - BESH1001 within the Proposed Local</p>

		<p>Contributor 155 states that in areas such as Peebles where the infrastructure is creaking, development of business units should be promoted strongly elsewhere.</p> <p>Contributor 197 states that assuming that infrastructure, roads etc allow, then additional development next to eg Cavalry Park in Peebles for a limited number of units would minimise impact elsewhere. (73, 155, 197,)</p>	<p>identified, site SPEEB008 Land West of Edderston Ridge (longer term mixed use) and site SPEEB009 East of Cademuir Hill (longer term housing). The MIR identified a potential new housing site to the north of the River Tweed, site APEEB056 Land South of Chapelhill Farm.</p> <p>It should be noted that the Local Development Plan Review is undertaken in consultation with both internal and external consultees such as Roads Planning, Economic Development, NHS, Scottish Water and SEPA. In addition, Scottish Planning Policy requires that a range and choice of sites are identified. In doing this rigorous site assessment process, the best sites possible are identified.</p> <p>It is acknowledged that there is a shortage of employment land within the Peebles Area. It should be noted, that a part of the Longer Term Mixed Use site within Peebles, site SPEEB005 has been identified as having potential to come forward in the short term to accommodate business and industrial use.</p> <p>However, in light of the consultation responses received during the Main Issues Report public consultation and following further investigation, it</p>	Development Plan.
--	--	---	---	-------------------

			<p>is recommended that a site for employment at Eshiels – site BSHI001 Land at Eshiels, is taken forward into the Proposed Local Development Plan. This is likely to involve the Council undertaking a compulsory purchase order as is often common practice for such allocations, and it would be envisaged that SOSEP (South of Scotland Economic Partnership) funding would be available to assist in the delivery of the site. Clearly in order for the site to be satisfactorily developed substantial perimeter planting will be required to be carried out at an early stage.</p>	
<p>Growing our economy: Question 6</p>	<p>Safeguarding sites for Employment and Economic Purposes - Peebles</p>	<p>The contributor states that there are various business sites within Peebles that are located in areas of 'white land' within the LDP settlement map. This allows owners of these sites to make an application for housing development rather than preserve the site for employment / business use. To prevent the future loss of such sites, it is considered that these sites should be identified and safeguarded within LDP2. Whilst the following list is not exhaustive, it is considered that the following sites should be included: Crossburn Caravan Park, Edinburgh Road Harrison's Garage, Edinburgh Road Holland and Sherry, Dean Park Sainsbury's, Northgate Tesco, Dovecote Road Garage, St Andrew's Road Haylodge Hospital, Neidpath Road Dagleish Garage, Old Town Hydro Hotel, Innerleithen Road</p>	<p>It is noted that no consultation has been undertaken with the landowners / lessees of the areas listed within the contributor's submission proposed for safeguarding. In addition, any potential planning application may be considered against Local Development Plan (LDP) Policy ED5: Regeneration. The aim of that policy is to encourage the redevelopment of such areas of land for a variety of uses including housing, employment or retailing which will support the opportunity of bringing such land back into productive use and to enhance the surrounding environment.</p> <p>It should also be noted that where a</p>	<p>No further action required.</p>

		<p>The Park Hotel, Eastgate Tontine Hotel, High Street Harbro, South Parks Southpark Garage, South Park Tweeddale Motors, Innerleithen Road Travis Perkins and other units, Dovecote Road Garages at George Street and North Place Brown Bros Garage, Edinburgh Road George Tait's Yard, George Street The remainder of Rosetta Caravan Park, Rosetta Road Peebles Auction House, Old Church Road Various units in Cavalry Park, Kingsmeadows Road. (318)</p>	<p>business closes, or ceases to trade, the Planning Authority cannot expect the landowner to retain an employment / business use onsite particularly if it is unviable to do so. Furthermore, as a settlement develops, the character of an area may change, and it may not be appropriate or possible for traditional uses to remain.</p> <p>In addition, if one of the businesses identified wished to relocate/relocate to expand, the approach suggested by the Community Council is that this could not happen until another business took over the premises. Such interest may well be very limited, over an excessive period of time, and effectively this would be a major embargo on the expansion/development opportunities for the listed businesses.</p> <p>In respect to Harbro and South Park Garage at South Parks, and the various units at Cavalry Park identified within the contributor's submission, it is noted that both South Park and Cavalry Park are already safeguarded sites within the LDP.</p>	
<p>Growing our economy: Question 6</p>	<p>SPEEB005 Peebles East (South of the River)</p>	<p>The contributor objects to the preferred options for housing and mixed-use sites within/around Peebles. Specifically, that the site has not been identified as a preferred mixed use site.</p>	<p>Comments noted. It should be noted that site MPEEB004 is part of the potential longer term mixed use site</p>	<p>It is recommended that the Council retains site SPEEB005 as a</p>

	<p>(Sites MPEEB004 and MPEEB008 also referenced in submission), Peebles</p>	<p>The contributor also states that the current arrangement in the MIR could effectively result in the removal of their site's safeguarded status as a potential longer term mixed-use site within the LDP1.</p> <p>It is considered that solutions exist to the technical constraints outlined by SBC and therefore the site should be considered effective now, and ready to come forward for development within the lifetime of LDP2. In addition there is no requirement for a new bridge, and that development at this location will not have a major impact on biodiversity. In relation to flood risk it is considered that a flood mitigation solution is feasible and workable. In respect to landscape, it is considered that the proposed development of the site would not result in adverse impacts to the surrounding landscape character.</p> <p>It is noted that there is currently a live planning application on the site.</p> <p>The contributor has submitted an Indicative Masterplan for the site, Flood Risk Assessment and Flood Mitigation Strategy, a Transport Technical Note and an Ecological Technical Response.</p> <p>The contributor states that the site is being promoted by AWG and Taylor Wimpey, with the latter having a proven track record of delivering, and selling housing in Peebles and that this should be recognised. In addition the contributor recommends that the Council should increase the provision of housing sites on effective land, and where developers have identified as a place where people want to live and where they wish to build such as this site.</p> <p>The contributor state that they agree with SBC's position that the site could be allocated for mixed</p>	<p>SPEEB005 as identified within the Local Development Plan 2016. The Main Issues Report did not propose to remove site SPEEB005 from the Plan.</p> <p>It is also noted that a planning application for the site has been submitted (17/00606/PPP) and that application was refused planning permission.</p> <p>The current Adopted Local Development Plan (LDP) sets out a number of site requirements for site SPEEB005, it is considered that those requirements will also be incorporated into the new Proposed Plan. It is considered that the site requirements set out are necessary to ensure that the development of the site is appropriate. This includes a site requirement for a new bridge over the River Tweed. It is the opinion of the Roads Planning section that a new bridge over the River Tweed is necessary in order for this site to come forward. However, it is considered that the site has the potential to assist in providing an element of Business and Industrial land during the lifetime of the LDP and therefore the site requirements for the site state that: "<i>There is currently a shortfall of good quality business and industrial land in Peebles. This is a mixed use site and employment land could come forward early to meet this</i></p>	<p>potential longer term mixed use site in the Proposed Local Development Plan.</p> <p>It is further recommended that the Council retain the option to release land at this location for Business and Industrial Use during the lifetime of the Local Development Plan 2.</p>
--	---	---	---	---

		<p>use development. The Indicative Masterplan outlines that alongside residential development, land of a sizable area (over 1ha) has been safeguarded for the purposes of employment uses within a dedicated business/employment centre. The principle of residential development on the site has already been established through its inclusion as a 'safeguarded' longer-term mixed use site within the adopted LDP1. In addition, the contributor states that there are clear constraints in bringing forward the preferred sites identified in Peebles and therefore this site should come forward. (111)</p>	<p><i>shortfall</i>. In relation to the contributors other comments, it is considered that there are other more appropriate sites available within the Western Strategic Development Area. As a result of the above, it is considered inappropriate to allocate site SPEEB005 (MPEEB004 or MPEEB008) within the Proposed LDP.</p>	
<p>Growing our economy: Question 6</p>	<p>SPEEB008 Land West of Edderston Ridge, Peebles</p>	<p>The contributors support the inclusion of SPEEB008 for Longer Term Mixed Use.</p> <p>Contributor 101 also states that they have the ability through further planting and the pattern of development to shape this edge to Peebles, providing a significant area of land for future phased development alongside a long-term defensible boundary to the town. In addition they state that they acknowledge that certainty is required with regards to the requirement for and delivery of a new crossing over the River Tweed and are willing to work with the Scottish Borders Council in better understanding this requirement and helping with its delivery if at all possible. The contributor also states that they own further land to the west and south of this site and so can provide additional or alternative sites for the provision of new homes and business land.</p> <p>Contributor 309 states that they have no objection to the land being included in the next LDP. (6 (1 of 2), 101, 309)</p>	<p>Support noted and comments noted. However, following the Main Issues Report public consultation, and as a result of further consideration on the matter, it is proposed that this site SPEEB008 will not be taken forward into the Proposed Local Development Plan as a potential longer term mixed use site. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area. It is also noted that the Plan already identifies three potential longer term sites within Peebles and it is intended that those sites - SPEEB003, SPEEB004 and SPEEB005 will be retained within the Plan.</p> <p>As a result of the above, it is considered inappropriate to identify site SPEEB008 within the Proposed LDP. However, it is acknowledged</p>	<p>It is recommended that the Council does not identify site SPEEB008 as a potential longer term mixed use site in the Proposed Local Development Plan.</p>

			<p>that the site could be considered again for inclusion in a future LDP.</p> <p>In respect to the potential new bridge over the River Tweed at Peebles, the most recent traffic count on behalf of the Council for Tweed Bridge was undertaken in November 2018 and through this it was demonstrated that the bridge is getting close to capacity. It is the Council's opinion that Tweed Bridge does not have the capacity to serve any new development in the town, over and above the sites allocated in the plan, with the exception of small infill proposals and other low traffic generating proposals which will be considered on a case by case basis. Longer term development in the town will be required to contribute towards a second river crossing based on projected costs. At this point in time there is no definitive date as to when the new bridge might be constructed and a feasibility study must be prepared in advance. In this interim period development sites need to contribute towards improving traffic management in and around the town centre and/or towards the funding of transport appraisal work for the town.</p>	
Growing our economy: Question 6	SPEEB008 Land West of Edderston	The contributor objects to the inclusion of site SPEEB008 for Longer Term Mixed Use primarily due to the lack of capacity for additional traffic to	Comments noted. However, following the Main Issues Report public consultation, and as a	It is recommended that the Council does not identify

	Ridge, Peebles	<p>negotiate Caledonian Road and South Parks Road as recognised by the Council, additional development if it came forward would result in exacerbating the existing situation leading to further congestion and a corresponding increase in risk to pedestrians, cyclists and other road users. It is noted that even if a new bridge did come forward, it would not impact in any way positively or negatively on the Caledonian Road or South Parks road situation. This would result in impacting on existing residents as well as on the Fire and Ambulance stations due to delay caused by congestion. The contributor states that there has been no Transport Assessment undertaken for any of the sites or one produced to consider the implications of joint developments. It is noted that existing historical documentation from 2012, 2013 and 2014 consider that further development in South Parks be stopped due to restrictions imposed by the nature of Caledonian Road. The contributor has noted the current position of the roads leading to the site. (25 (1 of 2))</p>	<p>result of further consideration on the matter, it is proposed that this site SPEEB008 will not be taken forward into the Proposed Local Development Plan (LDP) as a potential longer term mixed use site. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area. It is also noted that the Plan already identifies three potential longer term sites within Peebles and it is intended that those sites - SPEEB003, SPEEB004 and SPEEB005 will be retained within the Plan.</p> <p>As a result of the above, it is considered inappropriate to identify site SPEEB008 within the Proposed LDP.</p> <p>In relation to comments regarding roads, the Roads Planning Section have stated that: "... <i>The problem with Caledonian Road is parking in the carriageway, forcing single file traffic, and the issue with South Parks is the tortuous nature of the initial length of the road off the mini roundabout. That said, there may be scope for tackling some of the capacity issues and one benefit of this land is its relative close proximity to the town centre. This favours well from a sustainable transport point of view. If this area is</i></p>	site SPEEB008 as a potential longer term mixed use site in the Proposed Local Development Plan.
--	-------------------	--	--	---

			<p><i>to be developed for mixed use development it should be dependent on measures being taken to improve the capacity of the roads leading to the site. The extent of the site suitable for development, possibly not all of it, will be dependent on the extent of off-site improvements and the findings of a Transport Assessment. Development will have to integrate and connect with the existing housing land to the east by way of access linkage with South Parks, Edderston Ridge/Edderston Ridge Park and Edderston Road. This will help with dispersion of traffic. ...”</i></p>	
<p>Growing our economy: Question 6</p>	<p>SPEEB008 Land West of Edderston Ridge, Peebles</p>	<p>The contributors state that the traffic on the narrow Caledonain Road that is already predicted to be busy with the south parks and the Tweedbridge Court developments. The Caledonian Road cannot possibly take the traffic that would be generated by 200/288 additional houses. Furthermore if the site to the west of Harbro is developed for housing it would amount to some additional 150 houses allowing for the woodland planting therefore totalling 350 houses. A second bridge is not going to help this situation. The site is also located on the edge of the National Scenic Area and is also part of the Special Landscape Area. Therefore the scale of the proposed development would detract from and diminish these areas. It also eats up yet more agricultural land, and will impact on the beautiful countryside. In addition there is a long history of developers paying lip service to sustainable drainage systems</p>	<p>Comments noted. It should be noted that site SPEEB008 was identified as a potential longer term mixed use site within the Main Issues Report (MIR) and not a site to be allocated in the short term. In addition, the MIR set out a number of site requirements that would be required to be met should that site come forward for development, these included a requirement for a Masterplan.</p> <p>In respect to comments regarding the surrounding road network, the Roads Planning Section have stated that: “... <i>The extent of the site suitable for development, possibly not all of it, will be dependent on the extent of off-site improvements and</i></p>	<p>It is recommended that the Council does not identify site SPEEB008 as a potential longer term mixed use site in the Proposed Local Development Plan.</p>

		<p>as they try to pack as many houses as possible onto the land.</p> <p>Contributor 111 and 114 states that there are clear constraints that would compromise the effectiveness and delivery of this site, namely the issues around landscape, roads and the River Tweed SSSI/SAC (although they state that this is presumably manageable).</p> <p>Contributor 127 states that the site has its challenges which cannot be seen to be overcome during the plan period. These will ultimately render the site ineffective.</p> <p>Contributor 181 states that they do not agree with such a large area of land allocated for housing at the South Park site as this entails residents driving over Tweed Bridge to access amenities and main routes to Edinburgh and Galashiels.</p> <p>Contributor 206 states that albeit longer term, this site epitomizes the problem of mixed use. There is a site already identified for business use at South Parks on the west of the current business estate. But whilst it is apparently offered for sale this has not been taken up (perhaps because business use is of little commercial interest). The Northern section of SPEEB008 - adjacent to the current South Parks business site - should be designated for business use only. SBC will need to solve the roads problem in respect of commercial/industrial vehicles getting along Caledonian Road. The larger Southern section of SPEEB008 adjacent to Edderston Road and Edderston Ridge could be designated for housing only if at all. The contributor questions the reasoning for further</p>	<p><i>the findings of a Transport Assessment. Development will have to integrate and connect with the existing housing land to the east by way of access linkage with South Parks, Edderston Ridge/Edderston Ridge Park and Edderston Road. This will help with dispersion of traffic. ..."</i></p> <p>In respect to comments regarding the Tweed Bridge, the most recent traffic count on behalf of the Council for Tweed Bridge was undertaken in November 2018 and through this it was demonstrated that the bridge is getting close to capacity. It is the Council's opinion that Tweed Bridge does not have the capacity to serve any new development in the town, over and above the sites allocated in the plan, with the exception of small infill proposals and other low traffic generating proposals which will be considered on a case by case basis. Longer term development in the town will be required to contribute towards a second river crossing based on projected costs. At this point in time there is no definitive date as to when the new bridge might be constructed and a feasibility study must be prepared in advance.</p> <p>In the consideration of any site for inclusion in the Local Development</p>	
--	--	--	---	--

		<p>housing development.</p> <p>Contributor 270 states that they do not agree with the identification of this site. The access road is unsuitable for more traffic and the local schools, doctors and dentist are already under too much pressure.</p> <p>The contributor states that mixed use is not appropriate for the site, due to the narrow access roads.</p> <p>(30, 46,111, 114, 127 (1 of 3), 181, 206, 222, 270, 273)</p>	<p>Plan, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that assessment. In doing this rigorous site assessment process, the best sites possible are identified. The site assessment also considers many issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape.</p> <p>However, following the MIR public consultation, and as a result of further consideration on the matter, it is proposed that this site SPEEB008 will not be taken forward into the Proposed Local Development Plan as a potential longer term mixed use site. --	--	--	---	--

			considered inappropriate to identify site SPEEB008 within the Proposed LDP.	
Growing our economy: Question 6	SPEEB008 Land West of Edderston Ridge, Peebles	<p>The contributor objects to the identification of site SPEEB008 within the MIR. They state that there are issues with Caledonian Road and that it does not meet current standards for the existing number of houses that it serves or for the proposed sites within the current LDP that are subject to planning application i.e. South Parks and Tweedbridge Court.</p> <p>Uses associated with the industrial estate have also resulted in impacting on Caledonian Road and on South Parks, and there appears to be no restrictions on the businesses that can be introduced at the industrial estate.</p> <p>The Tweed Bridge has exceeded its capacity at AM and PM times. There have been numerous statements made that the south side of the Tweed could not be developed, development still occurs. The contributor also raises issue with a number of the proposed site requirements set out in the MIR, in that the MIR states that the site should respect the existing built form and landscape design; that the new development must integrate and connect with the existing housing to the east, the contributor states that this is not possible; the requirement for a Transport Assessment does not give any confidence as SBC Roads Planning have displayed a lack of impartiality; a second river crossing will not alleviate the bottleneck of Caledonian Road. Caledonian Road does not comply with minimum requirements for visibility and design of footpaths and cannot be modified. It is considered that the proposed development that is estimated to be in the range of 450 units will gridlock the existing roads. (80)</p>	Refer to response above relating to site SPEEB008.	It is recommended that the Council does not identify site SPEEB008 as a potential longer term mixed use site in the Proposed Local Development Plan.

<p>Growing our economy: Question 6</p>	<p>SPEEB008 Land West of Edderston Ridge, Peebles</p>	<p>The contributor states that development of this site would cause the destruction of ancient pasture; increases the risk of pollution to the River Tweed and its tributary; will affect local wildlife and tourism; building has already taken place in the area, which will speed run-off during heavy rain, putting the area downstream at higher risk of flooding. Traffic from the proposed development will have to access the area via a junction that is already difficult and dangerous, and have to use a bridge that is already vulnerable. This area already sees frequent traffic jams – as the emergency services also need to use this road makes this area highly unsuitable for further development. The topography of Peebles and its environs mean the town and its transport links are very vulnerable. The B7062 is not suitable for large vehicles and in places is barely wide enough for two cars. The A703 is still only a double track road that can be very fast and as the main route out of the Borders is very busy. The A72 is already busy and fast, it is frequently closed due to accidents, is narrow in places, causing bottlenecks and risking lives if emergency services need to get through. There is no alternative route. It is also vulnerable to flooding and risk of erosion by the Tweed, and development on agricultural land will exacerbate flooding. With the rise in the number of users on the A72 there will be an increase in the number of accidents particularly with cyclists. With the increase in population in the area, it will result in further stretching existing services and facilities including education. The proposal will also result in an increase in the number of houses, businesses and their occupants doing more journeys to get to work, shops, etc as there are</p>	<p>Comments noted. However, following the Main Issues Report public consultation, and as a result of further consideration on the matter, it is proposed that this site SPEEB008 will not be taken forward into the Proposed Local Development Plan (LDP) as a potential longer term mixed use site. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area. It is also noted that the Plan already identifies three potential longer term sites within Peebles and it is intended that those sites - SPEEB003, SPEEB004 and SPEEB005 will be retained within the Plan. As a result of the above, it is considered inappropriate to identify site SPEEB008 within the Proposed LDP. In the consideration of any site for inclusion in the LDP, a full site assessment is carried out and the views of various internal and external consultees (such as Roads Planning, Economic Development, Landscape, Scottish Water, SEPA, and NHS) are incorporated into that assessment. In doing this rigorous site assessment process, the best sites possible are identified. The site assessment also considers many</p>	<p>It is recommended that the Council does not identify site SPEEB008 as a potential longer term mixed use site in the Proposed Local Development Plan.</p>
--	---	---	--	---

		<p>limited facilities in the area thereby increasing our carbon footprint. The development on agricultural land used for food production is unwise and may impact on food security. (108 (2 of 2))</p>	<p>issues in relation to transport and water/sewage infrastructure, as well as other environmental issues such as archaeology, biodiversity, flood risk and landscape.</p> <p>In respect to comments regarding the surrounding road network, the Roads Planning Section have stated that: <i>“... The extent of the site suitable for development, possibly not all of it, will be dependent on the extent of off-site improvements and the findings of a Transport Assessment. Development will have to integrate and connect with the existing housing land to the east by way of access linkage with South Parks, Edderston Ridge/Edderston Ridge Park and Edderston Road. This will help with dispersion of traffic. ...”</i> In addition, the Roads Planning Section have not objected to the identification of the site as a potential longer term development site.</p> <p>With regards to comments relating to landscape, natural heritage, and the River Tweed, it should be noted that Scottish Natural Heritage did not object to the potential inclusion of the site within the LDP. Furthermore it is also noted that SEPA also, did not object to the potential inclusion of the site within the Plan.</p>	
--	--	---	--	--

<p>Growing our economy: Question 6</p>	<p>SPEEB008 Land West of Edderston Ridge, Peebles</p>	<p>The contributor states that this site of 19.5HA is earmarked for mixed use in the long term and is shown to be a preferred site. Site capacity is to be allocated but it would not be unreasonable given the size of it to assume that the housing capacity will be well in excess of 200 houses. The Caledonian Road, which is the only access to both of these sites, is unsuitable to sustain the level of traffic envisaged. It is impossible to imagine that this old Victorian street, could sustain the level of traffic for the existing application let alone the numbers likely to be proposed for this new site. There have been calls for a full and truly independent traffic survey to be conducted on this street to establish accurate levels of capacity and sustainability. The lack of capacity for this busy road has been acknowledged in a number of documents including Reporters Reports. This site is located on the edge of a National Scenic Area and is part of the Special Landscape Area. The scale of the proposed development would detract from and diminish these areas. This site is utterly unsuitable for the type of development proposed and should be rejected. (318)</p>	<p>Comments noted. However, following the Main Issues Report public consultation, and as a result of further consideration on the matter, it is proposed that this site SPEEB008 will not be taken forward into the Proposed Local Development Plan (LDP) as a potential longer term mixed use site. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area. It is also noted that the Plan already identifies three potential longer term sites within Peebles and it is intended that those sites - SPEEB003, SPEEB004 and SPEEB005 will be retained within the Plan. As a result of the above, it is considered inappropriate to identify site SPEEB008 within the Proposed LDP.</p> <p>In respect to comments regarding the surrounding road network, the Roads Planning Section have stated that: "... <i>The extent of the site suitable for development, possibly not all of it, will be dependent on the extent of off-site improvements and the findings of a Transport Assessment. 		<p>the site. Consideration will need to be given to bridge and culvert structures within and adjacent to the site. The applicant would need to be mindful of the FPS to ensure there is no increase in risk elsewhere. There have been discussions regarding additional flood prevention works here which may restrict development. Due to steep topography through the allocation site, consideration should be given to surface runoff issues to ensure adequate mitigation is implemented. Site will need careful design to ensure there is no increase in flood risk elsewhere and proposed housing is not affected by surface runoff. Review of the surface water 1 in 200 year flood map indicates that there may be flooding issues within this site. This should be investigated further as and it is recommended that contact is made with the flood prevention officer. Discussions should also take place with the flood prevention officer regarding the additional flood protection works that are considered in the future to ensure a holistic approach.</p> <p>All new developments should manage surface water through the use of Sustainable Urban Drainage Systems (SUDS). The contributor recommends that this requirement includes the use of SUDS at the construction phase in order that the risk of pollution during construction to the water environment is minimised.</p> <p>Foul drainage from the development must be connected to the existing SW foul sewer network. The burns running through/adjacent of the site must be protected and enhanced as part of any development. Depending on the use of the proposed units there may be a requirement for</p>	<p>Peebles and it is intended that those sites - SPEEB003, SPEEB004 and SPEEB005 will be retained within the Plan.</p> <p>As a result of the above, it is considered inappropriate to identify site SPEEB008 within the Proposed LDP.</p>	
--	--	---	---	--

		permissions to be sought for certain activities from SEPA. (119)		
Growing our economy: Question 6	SPEEB008 Land West of Edderston Ridge, Peebles	The contributor notes that the site requirements for development of this site include a new river crossing. Development of proposals for a new crossing should avoid negative effects on the setting of the category 'A' listed Neidpath Castle. Early consultation with Historic Environment Scotland is advised if impacts on the setting of Neidpath Castle are likely. (164)	<p>Comments noted.</p> <p>However, following the Main Issues Report public consultation, and as a result of further consideration on the matter, it is proposed that this site SPEEB008 will not be taken forward into the Proposed Local Development Plan (LDP) as a potential longer term mixed use site. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area. It is also noted that the Plan already identifies three potential longer term sites within Peebles and it is intended that those sites - SPEEB003, SPEEB004 and SPEEB005 will be retained within the Plan.</p> <p>As a result of the above, it is considered inappropriate to identify site SPEEB008 within the Proposed LDP.</p> <p>In respect to the potential new bridge over the River Tweed at Peebles, whilst no decision has been made as to when or even where the new bridge will be constructed, it is anticipated that any new crossing will be located to the east of the existing bridge in the town, therefore there would be minimal impact on the setting of the</p>	It is recommended that the Council does not identify site SPEEB008 as a potential longer term mixed use site in the Proposed Local Development Plan.

			category 'A' listed Neidpath Castle.	
Growing our economy: Question 6	SPEEB008 Land West of Edderston Ridge, Peebles	<p>The contributor states that this site is partly within the Upper Tweeddale National Scenic Area (NSA). While this presents challenges, in this specific context we consider that potential impacts could be addressed in site requirements. The western part of the site, which is within the NSA, benefits from existing strong boundaries created by drystone dykes, hedges and individual trees. These features should be retained and form a key part of the structure/layout of development throughout this site, maintaining the quality of place within and adjacent to the NSA. They therefore recommend that the site requirement is amended from "Protect existing boundary features, where possible" to "Protect and integrate existing boundary features within the overall placemaking approach". The MIR site requirements state that a masterplan is to be prepared. In addition to the retention of boundary features the contributor recommends that the masterplan should be directed to include:</p> <ul style="list-style-type: none"> • Green networks through the site which integrate SUDS and active travel infrastructure, this should include providing links through the site to the nearby school. • Recreational links, for example to Manor Sware viewpoint and the River Tweed should be retained or re-established in appropriate form. <p>In addition, site requirements in the LDP should clearly set out a requirement for Habitats Regulations Appraisal at application stage due to the site's proximity to the River Tweed SAC. (213)</p>	<p>Comments noted.</p> <p>However, following the Main Issues Report public consultation, and as a result of further consideration on the matter, it is proposed that this site SPEEB008 will not be taken forward into the Proposed Local Development Plan (LDP) as a potential longer term mixed use site. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area. It is also noted that the Plan already identifies three potential longer term sites within Peebles and it is intended that those sites - SPEEB003, SPEEB004 and SPEEB005 will be retained within the Plan.</p> <p>As a result of the above, it is considered inappropriate to identify site SPEEB008 within the Proposed LDP.</p>	It is recommended that the Council does not identify site SPEEB008 as a potential longer term mixed use site in the Proposed Local Development Plan
Growing our economy: Question 6	SPEEB008 Land West of Edderston Ridge,	<p>The contributor recommends that the Council works in partnership with the Tweed Forum to devise the best mitigation solutions regarding their concerns to trees. (199)</p>	<p>Comments noted.</p> <p>However, following the Main Issues Report public consultation, and as a result of further consideration on the</p>	It is recommended that the Council does not identify site SPEEB008 as

	Peebles		<p>matter, it is proposed that this site SPEEB008 will not be taken forward into the Proposed Local Development Plan (LDP) as a potential longer term mixed use site. It is considered that there are other more appropriate sites that can be allocated within the Proposed Plan within the Western Strategic Development Area. It is also noted that the Plan already identifies three potential longer term sites within Peebles and it is intended that those sites - SPEEB003, SPEEB004 and SPEEB005 will be retained within the Plan.</p> <p>As a result of the above, it is considered inappropriate to identify site SPEEB008 within the Proposed LDP.</p>	a potential longer term mixed use site in the Proposed Local Development Plan.
Growing our economy: Question 6	Business and Industry - Walkerburn	The contributor states that there is a need to allocate business and industrial land at Walkerburn. The settlement is in vital need of investment and is not that far from Peebles which is desperately short of business development opportunities. (155)	It is noted that the settlement of Walkerburn benefits from a Redevelopment allocation, site zR200 Caberston Farm/Old Mill Site. It should be noted that that allocation allows for a variety of uses including housing, employment or retailing to potentially come forward onsite subject to the processing of a relevant planning application. This allocation not only promotes the opportunity of bringing such land back into productive use but will also support the enhancement of the area.	No further action required.
Growing our economy:	Business and Industry - West	The contributor considers that there is a definite requirement for Business and Industry land in	Comments noted. It is noted that the potential areas	It is recommended that the Council

Question 6	Linton	West Linton for small business premises as well as offices. Premises for small contractors where they can obtain a small unit which provides an office space, secure storage space and secure lock fast premises for their van are also required. An area around Broomlee Camo on Station Road or along Boggsbank Road may be suitable, although it is noted that there are issues regarding the weight restriction on the bridge. (1 (3 of 3))	identified for Business and Industrial Use are located outwith the Development Boundary and as such could be considered under Local Development Plan Policy ED7 Business, Tourism and Leisure Development in the Countryside. In addition, it should be noted that the current Adopted Local Development Plan allocates one Business and Industrial site – site zEL18 at West Linton. Scottish Planning Policy states that “ <i>Local development plans should allocate a range of sites for business, taking account of the current market demand; location, size, quality and infrastructure requirements</i> ”. The continued allocation of the site is supported by the Council’s Economic Development section.	can consider this proposal through the Development Management Process.
Growing our economy: Question 6	BWEST003 Deanfoot Road North, West Linton	The contributor objects to the allocation of this site BWEST003 Deanfoot Road North for Business and Industrial use. Whilst it is acknowledged that there had been discussions with the previous land owner, the site is now under new ownership. It is now intended that the land will be farmed and this site forms the main access onto the land. As a result the contributor states that they do not support the allocation of this site. (302)	Comments noted. In light of the consultation responses received during the Main Issues Report public consultation and following further consideration on the matter, primarily due to the change in ownership and the existence of an already allocated employment site (zEL18) it is now not considered appropriate to allocate site BWEST003 within the Proposed Plan.	It is recommended that the Council agree to not allocate this site within the Proposed Local Development Plan.
Growing our economy:	Business and Industry,	The contributor states that the only thing that is good is the lack of industrial units in West Linton	It should be noted that the current Adopted Local Development Plan	It is recommended that the Council

Question 6	West Linton	<p>which stops the final death knell of the village. The contributor also states that they are not sure that West Linton needs this type of development - it's a village, and despite there being some vocal lobbying for business units, the need is not there. (240)</p>	<p>allocates one Business and Industrial site – site zEL18. Scottish Planning Policy states that “<i>Local development plans should allocate a range of sites for business, taking account of the current market demand; location, size, quality and infrastructure requirements</i>”. The continued allocation of the site is supported by the Council’s Economic Development section.</p>	<p>agree to retain site zEL18 as an allocated employment site within the Proposed Local Development Plan.</p>
Growing our economy: Question 6	BWEST003 Deanfoot Road North, West Linton	<p>The contributor recommends that a developer requirement is attached to the site to ensure that a maintenance buffer strip of at least 6 metres wide is provided between the watercourse and built development. Additional water quality buffer strips may be recommended in addition to the maintenance buffer strip depending upon specific water quality pressures. There is a burn running through the site which should be protected and enhanced as part of any development. There should be no culverting for land gain. The contributor supports the development requirement for a Flood Risk Assessment (FRA) to be undertaken prior to development occurring on the site. The contributor states that a FRA which assesses the risk from the small watercourse (potentially called The Dean) which flows through the site. Consideration should be given to bridge and culvert structures which may exacerbate flood risk. Review of the surface water 1 in 200 year flood map and nearby steep topography indicates that there may be flooding issues within this site. This should be investigated further and it is recommended that contact is made with the flood prevention officer. Site will need careful design to ensure there is no increase</p>	<p>Comments noted.</p> <p>In light of the consultation responses received during the Main Issues Report public consultation and following further consideration on the matter, primarily due to the change in ownership and the existence of an already allocated employment site (zEL18) it is now not considered appropriate to allocate site BWEST003 within the Proposed Plan.</p>	<p>It is recommended that the Council agree to not allocate this site within the Proposed Local Development Plan.</p>

		<p>in flood risk elsewhere and proposed housing is not affected by surface runoff.</p> <p>The contributor states that the site has the potential for surface water flood risk and therefore recommends that this issue is taken forward through discussion with the flood prevention and roads department colleagues and Scottish Water, where relevant. It is noted that additional site specific information may only serve to identify that development at the site would be contrary to the SPP and the principles of sustainable flood management.</p> <p>All new developments should manage surface water through the use of Sustainable Urban Drainage Systems (SUDS). The contributor recommends that this requirement includes the use of SUDS at the construction phase in order that the risk of pollution during construction to the water environment is minimised.</p> <p>Foul must be connected to SW foul network. SW should confirm any capacity issues. There is a burn running through the site which should be protected and enhanced as part of any development. There may be a requirement for enhanced SUDS for any industrial uses.</p> <p>Depending on the use of the proposed units there may be a requirement for permissions to be sought for certain activities from SEPA. (119)</p>

QUESTION 7

Do you agree with the preferred options for additional housing sites? Do you agree with the alternative options? Do you have other alternative options?

QUESTION 7

Do you agree with the preferred options for additional housing sites? Do you agree with the alternative options? Do you have other alternative options?

Main Issue	Sub Issue	Summary of Main Issues Raised	Proposed Response to Main Issues Raised	Recommendation
Ancrum	AANCR002, Dick's Croft II	<p>The contributor states that Ancrum STW is just to the south of the development. This is not expected to cause any particular issues although any odours would be dealt with by Scottish Borders Council Environmental Health. Due to steep topography adjacent/ through the allocation site, consideration should be given to surface runoff issues to ensure adequate mitigation is implemented. Site will need careful design to ensure there is no increase in flood risk elsewhere and the proposed development is not affected by surface runoff. The contributor also states that wastewater must connect to the existing Scottish Water foul network. It is likely that for a development of this size and upgrade may be required to the existing STW. This should be confirmed by Scottish Water. The contributor also advises that the site has a potential surface water hazard and water environment considerations.</p> <p>(119)</p> <p>The contributor considers the site should be taken forward as a preferred site not an alternative site.</p> <p>(122, 174)</p> <p>The contributor notes that whilst designated as an 'alternative' site within the MIR it is, within the 'overall assessment' deemed to be 'acceptable'. The contributor states the site will sustain local facilities, is not at flood risk, is next to existing built</p>	<p>This site was identified within the Main Issues Report as an 'alternative' site however it was acknowledged that there is a cumulative impact issue associated with the site given the location of the site immediately adjacent to a recent development in the village, at Myrescroft. The site assessment concludes the following:</p> <p><i>'Overall the site is assessed as acceptable however it should be noted the site is within a Special Landscape Area and careful consideration must be given to boundary treatments, the landscape and visual impact mitigation as well as the site design. Due to recent development within Ancrum consideration should be given to the scale of the proposal and its effect on the size of the settlement and the character of the village and it's Conservation Area. Allocation of this site would increase pressure on services since the previous housing allocation has only recently been completed and further discussions would need to be held with Scottish</i></p>	<p>It is recommended that the Council agrees not to allocate this site (AANCR002) within the Proposed Local Development Plan.</p>

		<p>form and roads and is therefore close to existing infrastructure and utilities. The contributor also states there is interest being shown from housebuilders and there is also further interest from a local Registered Social Landlord for the provision of at least 12 affordable units on site. The contributor states that Ancrum is a very popular place to live; however, there is no land for housing allocated within the current LDP period. It is important that land allocations are made in sustainable and sought after locations to live. The contributor has also submitted an indicative site layout alongside their submission. (122)</p> <p>The contributor welcomes that the protection of existing trees is listed as a site requirement. A tree survey should also be required to help assess the trees. In addition we recommend the use of the Ancient Tree Inventory or a tree survey to assess if any trees are ancient or veteran and therefore should be protected from adverse impacts of development. Any additional tree planting should be with native species, sourced and grown in the UK. (199)</p> <p>The contributor states the site lies outwith the current settlement boundary as shown in the LDP and is within a Special Landscape Area. If you are minded to support development of this site during the current plan period, further detailed assessment will be required. Given the site's location within a Special Landscape Area we recommend that this site is subject to a development brief which should set out the approach to placemaking and the measures necessary to integrate development within its wider landscape setting. (213)</p>	<p><i>Water in relation to wastewater treatment as the development is required to connect to the existing Scottish Water foul network.</i></p> <p><i>Structure planting to the south and west would be required to reduce visual impact from the countryside and create an edge to the settlement. Existing hedgerows would need to be retained or improved where possible. Mitigation measures are required to prevent any impact on the River Tweed SAC. Mitigation measures are also required in relation to the impact of surface water runoff from nearby hills and this should be considered during the design stage.</i></p> <p><i>Vehicular access is acceptable from all existing roads adjacent to the site and a strong street frontage onto these roads is recommended. A pedestrian linkage to the footpath along the north western edge of the new Myrescroft development should also be incorporated into any proposal. It is also important that there is connectivity from the site to the village centre for both pedestrians and cyclists.</i></p> <p><i>The development at Myrescroft to the north east of this site confirmed that there was a healthy market for house purchasers within Ancrum.</i></p>	
--	--	--	--	--

			<p><i>Consequently this proposal could be considered to be effective and there is an interested developer associated with the site. However care must be taken to ensure any new development does not saturate the village within a relatively short period of time.</i></p> <p><i>Scottish Water has confirmed that there is sufficient capacity. SG assessment raises the possibility that land will be required to safeguard for education provision, implying an education capacity problem.</i></p> <p><i>The site was included within the Main Issues Report as an 'alternative' option for inclusion within the Proposed LDP, given the issue of cumulative impact on the character of the village. Consequently there were not considered to be any insurmountable reasons nor constraints to prevent it being included. However, in deciding which of the many MIR sites were ultimately included within the proposed LDP consideration was given to a range of factors. These included, for example, the housing land requirement based on the proposed SDP2 which was informed by HNDA2, any developer interest in the site, provision of local facilities /</i></p>	
--	--	--	---	--

			<i>services, comparison with other submitted sites. Ultimately it was considered that there were more appropriate sites considered within the MIR to contribute towards the housing land requirement and the site was not included. At this point in time the village should be given time to adapt to the relatively recent large scale development of Myrescroft, however, it is acknowledged that the site could be considered again for inclusion in a future LDP.'</i>	
Darnick	ADARN005 (Land South of Darnlee)	The contributor considers the proposed house numbers to be too high/dense for this 0.8ha site, especially as it would be very visible on entering the village and appear incongruous next to the parkland surroundings of Darnlee. A more tree-scaped development of five houses could be more acceptable. (60)	Comments noted. The site capacity is an indicative figure at this stage. The number of properties would be properly assessed and determined during the process of any future planning applications for the site. Landscaping would also be considered in more detail at the planning application stage.	No action required.
Darnick	ADARN005 (Land South of Darnlee)	SEPA has advised that the site has water environment considerations. (119)	Comments noted. It is recommended that the following is added as a new bullet point to the site requirements: 'The site has water environment considerations'.	It is recommended that the Council agrees to add the following additional site requirement attached to (ADARN005) to read as follows: 'The site has water environment considerations'.
Darnick	ADARN005 (Land south of Darnlee)	The contributor is opposed to ten units here, in this highly visible location at the edge of the settlement as it is too great a number to fit into the	Comments noted. The site capacity is an indicative figure at this stage. The number of properties would be	It is recommended that the Council agrees to allocate

		parkland setting. Perhaps half that number of different, individually designed houses each with well screened garden ground would fit more appropriately and acceptably here. Tree planting should be a requirement. If the ground is privately owned, not by a developer, perhaps the plots could be sold off individually, to prevent the character of the development from looking like an estate plonked on the landscape. Was this not part of a historic battlefield site? (143)	properly assessed and determined during the process of any future planning applications for the site. Landscaping would also be considered in more detail at the planning application stage. It is not within the control of the Council to dictate how the plots are sold/developed. The site is located within the historic battlefield (Inventory Battlefield of Darnick). There is a site requirement which advises any developer of the site that the special qualities and setting of this must be safeguarded and that appropriate mitigation is likely.	this site (ADARN005) within the Proposed Local Development Plan.
Darnick	ADARN005 (Land South of Darnlee)	Melrose and District Community Council support the preferred option of Darnlee in Darnick provided it allows for road and junction improvements in Broomilees. (153)	Comments noted. Road improvement works are stipulated as a site requirement for this site.	It is recommended that the Council agrees to allocate this site (ADARN005) within the Proposed Local Development Plan.
Darnick	ADARN005 (Land South of Darnlee)	Contributors do not agree with this proposed site for the following reasons: <ul style="list-style-type: none"> • Setting of the listed building of Darnlee is totally compromised. • Visual amenity and character of the entrance to the village would be severely degraded. The whole character of the area will be changed. • 10 houses plus auxiliary parking constitutes a severe over-development of a restricted 0.8 ha site. A perfect example of over-development and visual degradation is what the Council has allowed to happen on the site of Darnick Green at the south-east end of Darnick adjacent to 	Comments noted. Each bullet point is responded to as follows: <ul style="list-style-type: none"> • It is considered that the site can be developed sensitively without having a detrimental impact upon the setting of the listed building, Darnlee. • It is acknowledged that the site is prominent within the Conservation village of Darnick. The site is currently private grazing land and does not form any open recreational space. It 	It is recommended that the Council agrees to allocate this site (ADARN005) within the Proposed Local Development Plan.

		<p>Chiefswood Road - houses jammed in 'cheek-by-jowl' and abutting closely on the road adjacent to the site.</p> <ul style="list-style-type: none"> • 10 houses of the high value likely to be proposed by developers at Darnlee will undoubtedly generate 20 plus cars. These will exacerbate problems on a road system already hazardous - viz. junction on to B6394 with the opposite developments of Abbotsford Terrace and Heiton Park. Any access onto Broomilees Road is a total nonsense. Zero traffic will not head west along single-track roads towards Abbotsford. It will all arrive at the junction with Abbotsford Road where there are even more hazardous site-lines to both south and north due to a combination of bends in the road and parked cars. The site should be removed permanently from the plan as it is an unsuitable site for building, totally overshadowing what is, in effect, a medieval village. (153) 	<p>is considered that a sensitively designed development would be appropriate at this location without having a detrimental impact upon the character of the village. A Planning Brief would be prepared in order to inform development at this location.</p> <ul style="list-style-type: none"> • The site capacity is an indicative figure at this stage. The number of properties would be properly assessed and determined during the process of any future planning applications for the site. • The Council's Roads Officer has raised no objections to the development of this site in principle. Further discussions in respect of the vehicular access requirements would be required and a Transport Statement would require to be submitted as part of any future planning application. 	
Darnick	ADARN005 (Land south of Darnlee)	<p>The Woodland Trust Scotland (WTS) note that the western part of the site is allocated on an area of woodland. Currently this area is not listed on the AWI or on the NWSS, WTS note that some of the trees on the western and southern boundaries appear on historic OS six-inch maps and therefore are worthy of further study to determine whether they could be ancient or veteran trees. A tree survey should be listed as a site requirement and WTS recommend that the ATI or a tree survey is also used to determine the ancient or veteran character of the trees. Alternatively the site boundary can be reviewed to exclude the area of</p>	<p>Comments noted. It is agreed that a site requirement should be added stating the need for a tree survey to be undertaken to determine the ancient or veteran character of the trees within the site. A site requirement already requires that existing trees are retained and protected, it is considered that this should be amended to read: 'A tree survey to be undertaken of existing trees within the site to determine the ancient or veteran character of the</p>	<p>It is recommended that the existing site requirement stating '<i>Retain and protect the existing boundary features and trees, where possible</i>' should be amended to read: '<i>A tree survey to be undertaken of existing trees within the site to</i></p>

		woodland on the western side. (199)	<i>trees.. Retain and protect the existing boundary features and trees, where possible'</i>	<i>determine the ancient or veteran character of the trees. Retain and protect the existing boundary features and trees, where possible'.</i>
Darnick	ADARN005 (Land south of Darnlee)	SNH note that the majority of the site lies within the Eildon & Leaderfoot Hills NSA. The site also forms an important context for, and a gateway to, Darnick. Its location within the NSA means that a high standard design will be required. Given the site's sensitive location, its mature trees and boundary features, SNH consider that a more specific set of site requirements should be drafted for this site in the form of a site development brief. This is in order to mitigate adverse impacts on the NSA and to ensure the delivery of a high standard of development, including materials, siting and design. Without the benefit of further verification from a site visit, at this stage SNH suggest that specific advice is needed to secure the retention of important trees and boundary within an overall placemaking and site design approach. For example, "Retain and protect the existing boundary features and trees, where possible" should be altered to "Retain and protect the existing boundary features and trees, integrating them appropriately within an overall layout which demonstrates a co-ordinated approach to placemaking". (213)	Comments noted. The site requirements for the site stipulate that a Planning Brief will be prepared for this site which will include the principles of 'Designing Streets'. It is considered that a re-wording of the site requirement relating to existing boundary trees is not necessary as this will be explored further as part of a Planning Brief and planning application. It is expected that a tree survey would be required at the planning application stage. The site requirements include the need for a high standard of design in view of the location of the site within the NSA.	It is recommended that the Council agrees to allocate this site (ADARN005) within the Proposed Local Development Plan.
Denholm	ADENH006 (Land south east of Thorncroft)	SEPA require a Flood Risk Assessment (FRA) which assesses the risk from the small watercourses which flow along the boundary of the site. These watercourses then enter a Flood Protection Scheme which will require careful	Comments noted. The site was identified within the Main Issues Report as a preferred option for development and the site is considered appropriate for	It is recommended that the Council agrees not to allocate this site (ADENH006) within

		<p>consideration to ensure there is no increase in flood risk due to site development. The study undertaken by JBA indicates that part of the site is at risk of flooding but it does not appear to have fully modelled the adjacent watercourse. Consideration will need to be given to any culverts/ bridges which may exacerbate flood risk. Site may be constrained due to flood risk. Due to steep topography through the allocation site, consideration should be given to surface runoff issues to ensure adequate mitigation is implemented. Site will need careful design to ensure there is no increase in flood risk elsewhere and proposed housing is not affected by surface runoff. The site has a potential surface water hazard and water environment considerations. Foul water must connect to the existing SW foul network. Opportunities should be taken to protect and enhance the watercourse which runs along the site boundary. (119)</p>	<p>residential development in principle. However, it must be acknowledged that there has been low take up of development land within the village in recent years, with two sites already allocated within the village (RD4B and ADENH001) with a total indicative capacity of 50 units, which remain undeveloped.</p> <p>In deciding which of the many MIR sites were ultimately included within the Proposed LDP consideration was given to a range of factors. These included, for example, the housing land requirement based on the proposed SDP2 which was informed by HNDA2, any developer interest in the site, provision of local facilities / services, comparison with other submitted sites. Ultimately it was considered that there were more appropriate sites considered within the MIR to contribute towards the housing land requirement and the site was not included. It is acknowledged that the site could be considered again for inclusion in a future LDP.</p> <p>It must be noted, however, that the site in question is located within the settlement boundary and could therefore be developed, through the process of a planning application.</p> <p>Should this site be taken forward a</p>	<p>the Proposed Local Development Plan.</p>
--	--	--	---	---

			<p>site requirement is included which would require that a Flood Risk Assessment is undertaken. Further site requirements could be added requiring that a potential surface water hazard and water environment considerations are taken account of. Furthermore, standard wording is contained within the introductory pages to Volume 2 of the Proposed LDP2 advising of the need for foul water connecting into the Scottish Water foul network. The second site requirement already requires that the existing boundary features are retained, this would include the watercourse, the wording could also require that this is enhanced.</p>	
Denholm	ADENH006 (Land south east of Thorncroft)	<p>The contributor supports the draft allocation. All the site requirements specified in the preferred option are capable of being met. This land is free from constraints and the adjacent property has been acquired to provide sightlines for a new access to the A698 road. The owners allowed Eildon Housing to construct both surface water and foul sewers across their site, and these were upgraded in capacity to allow this system to accept flows from the proposed development. Connection points to these public sewers can be made from within the draft allocated site. The site lies within the development boundary of Denholm and is, in part, a brownfield site. Public transport is available immediately adjacent. (224)</p>	<p>Comments noted. The site was identified within the Main Issues Report as a preferred option for development and the site is considered appropriate for residential development in principle. However, it must be acknowledged that there has been low take up of development land within the village in recent years, with two sites already allocated within the village (RD4B and ADENH001) with a total indicative capacity of 50 units, which remain undeveloped.</p> <p>In deciding which of the many MIR sites were ultimately included within the Proposed LDP consideration</p>	<p>It is recommended that the Council agrees not to allocate this site (ADENH006) within the Proposed Local Development Plan.</p>

			<p>was given to a range of factors. These included, for example, the housing land requirement based on the proposed SDP2 which was informed by HNDA2, any developer interest in the site, provision of local facilities / services, comparison with other submitted sites. Ultimately it was considered that there were more appropriate sites considered within the MIR to contribute towards the housing land requirement and the site was not included. It is acknowledged that the site could be considered again for inclusion in a future LDP.</p> <p>It must be noted, however, that the site in question is located within the settlement boundary and could therefore be developed, through the process of a planning application.</p>	
Galashiels	(AGALA029) Netherbarns	<p>The contributor, acting on behalf of M&J Ballantyne Ltd, note that the 2017 Housing Land Audit highlights a lack of new sites within Galashiels, with capacity for only 32 dwellings having been added within the past 5 years.</p> <p>In addition to this within the Main Issues Report there are still no preferred residential housing sites for Galashiels, with Netherbarns only being listed as an 'alternative'.</p> <p>Galashiels is the Borders major commercial centre as well as educational centre being home to Heriot-Watt University's School of Textiles and Design and the main campus of Borders College.</p>	<p>There are a wide range of issues which have been raised regarding the identification of this site (Netherbarns, AGALA029) within the MIR. This response is a generic response to what are considered to be the main points raised.</p> <p><u>Background</u> It is acknowledged that the site has a history and has previously been omitted from the LDP by Reporters from the Scottish Government. However, it is not uncommon for submissions to be made again for</p>	It is recommended that the Council agrees to allocate this site (AGALA029) within the Proposed Local Development Plan.

		<p>In addition, Galashiels train station gets to Edinburgh in 50 minutes making it a popular location for commuters. Indeed, the Proposed Strategic Development Plan confirms (Para 3.31) that <i>“In Galashiels, Tweedbank and neighbouring communities, the Borders Rail line provides further opportunities to connect and grow communities.”</i></p> <p>On this basis it follows that Galashiels should be a target for new housing development, in close proximity to services, transport modes and an expanding employment base.</p> <p>Currently within the Scottish Borders there is an overreliance on a historical and ineffective housing land supply to meet the Council’s housing land requirements. In addition, whilst the contributor appreciates the integration of new sites through the Main Issues Report and through the Housing Supplementary Guidance do not provide a range and choice of viable land for housing in locations where the market wants to deliver, and most importantly do not provide development opportunities for Galashiels.</p> <p>Netherbarns represents an effective site which is free from constraints and would be delivered in the early years of the 5 year-plan period. The site is in the sole ownership of the contributor’s client, a local builder that has a proven and ongoing track record of delivering family homes within the Scottish Borders.</p> <p>Previously concerns have been largely about impacts on Abbotsford but through a previously provided Heritage Statement, with sympathetically</p>	<p>sites that have been dismissed previously. What needs to be considered is whether there are any new material considerations and amendments to the proposal which have not previously been tabled which could justify the site being included within the LDP.</p> <p><u>Planning History – Timeline</u></p> <ul style="list-style-type: none"> • A full planning application was submitted under an interim housing policy for the development of 79 dwellinghouses on the site (04/00706/FUL). The application was approved by the Planning Committee. However, ultimately it was refused by Scottish Ministers after they had called it in. • The aforesaid call-in coincided with the process of determining the Local Plan 2008. The site had been identified for housing in both the consultative draft and the finalised version of the Plan. Ultimately the Reporter dismissed the site for the following reason: “Development would be undesirable because of the potential risk of damage to a very important landscape, historic and cultural interests, and to the contribution of tourism to the Borders economy”. Consequently the site was excluded from the adopted Local Plan 2008. • During the processing of the Local Plan Amendment shortly afterwards, 	
--	--	---	--	--

		<p>designed planting it has been established that these concerns have been addressed through mitigation.</p> <p>In addition, Netherbarns is surrounded on three sides by development, presenting an opportunity for appropriate rounding off of the settlement boundary and providing a medium capacity site for Galashiels which is currently not available elsewhere within the town. Given the support shown by the Council and the consultees the site should be presented as a new allocation for residential development within the proposed Local Development Plan.</p> <p>In support, the contributor has submitted plans detailing the evolution of the proposal and a proposed site plan along with a Heritage Statement, Landscape and Visual Assessment and updated Landscape Photography which have been submitted previously. Information included within these statements includes the following points:</p> <ul style="list-style-type: none"> • In respect of site context, a timeline of the key stages of the promotion of the site is included. The contributor notes that the timeline shows that the site's allocation for residential development has continuously been supported by officers and members of the Council with various iterations of development proposals being considered through successive development plans. Throughout this process the proposals have changed in response to comments made by DPEA Reporters, Council Officers' assessments and past objectors. The efforts made by the owners to address any 	<p>the land owners again submitted the site for inclusion within the Plan proposing some 85 houses. At the time it was considered there were more suitable sites in Galashiels for housing (e.g. Easter Langlee, Coopersknowes, Winston Road) and the Council did not support the proposal. Ultimately the Scottish Government Reporters agreed with the Council's position and rejected the inclusion of the site, also making reference again to the potential impact upon Abbotsford House.</p> <ul style="list-style-type: none"> • The landowner had discussions with Historic Scotland in respect of their concerns regarding the impact development of the site would have on Abbotsford House and its setting. The landowners provided further proposed landscaping and layout plans and as a result of this Historic Scotland withdrew their objection to the development. • In the preparation of the Local Development Plan 2016, a number of housing sites were considered to satisfy an identified need within the Central Borders/Galashiels area. Finding suitable land for housing in Galashiels was problematic given various constraints. In respect of the Netherbarns site it was considered that given Historic Scotland had withdrawn their objection, the landowners had submitted further mitigation details 	
--	--	---	--	--

		<p>negative impacts upon Abbotsford and respond to any perceived shortcomings of the site are evident.</p> <ul style="list-style-type: none"> • In respect of effectiveness and delivery, the owner proposes a programme of advance planting to strengthen the established landscape framework and introduce significant areas of new landscape features. Details of this planting strategy are contained in the submitted Landscape and Visual Appraisal, which shows the existing landscape and the extent of proposed new planting. • The site would be developed over a 24-month period post-grant of planning permission. Assuming 12-24 months to achieve the necessary consents, the site could be delivered in full within the first 5 years of the plan period. • In respect of accessibility, the site is within walking and cycling distance to the wide range of shops and services within Galashiels town centre which supports sustainable methods of transportation. Vehicular access is available via an existing road junction. • In respect of Heritage, Design and Visual impact, Abbotsford House and the protection of it and its grounds has been a repeated consideration in assessments of the Netherbarns site. Concerns over setting of the listed asset have already seen the proposals reduced from 91 dwellings to approx. 45 with carefully considered planting and design parameters set in a bid to be sensitive to the surrounding area. The Heritage Assessment has been informed by the Landscape and Visual Assessment (LVA) and confirms that, 	<p>and the site capacity was reduced considerably to 45 units which addressed identified constraints, the site was identified by the Council as a preferred housing site within the Main Issues Report 2012. The site was removed from the Local Development Plan by the Reporter through the Examination, stating the following reasons: "All-in-all, despite the lack of a formal objection by Historic Scotland, I concur with the conclusions reached at the previous local plan inquiry. It appears to me that cultural and landscape considerations combine to provide an asset which should remain free of the impact of the suggested allocation and any subsequent development of Netherbarns. I do not accept that the woodland screening would adequately mitigate the adverse impacts of the allocation on the setting of the house or the designed landscape. Additionally, the re-opening of the railway link to Galashiels is likely to increase the volume of visitors to Abbotsford, therefore further strengthening the need to protect the heritage of the vicinity. On this basis, I conclude the allocation, including the somewhat obscure reference to educational facilities, should be removed from the proposed plan".</p>	
--	--	---	--	--

		<p>while the introduction of further housing will result in a very slight change to part of the setting of Abbotsford, the resultant situation will be characteristically similar to the existing and, overall, the nature of change to the setting will be neutral. No harm would be caused to the special interest of the Category A listed Abbotsford House or the values of the Designed Landscape. The Landscape and Visual Appraisal shows that glimpsed views could potentially be eliminated by year 15 through sensitive materials and established landscaping. During the summer, the new houses will be entirely screened by the existing trees along the bank of the river and those within the parkland on the Abbotsford side. Throughout these months, there will be no change to the setting of Abbotsford. Whilst there would be a minor change to the setting of the listed Netherbarns and Kingsknowes through the development of the site for residential use, it would not affect the special interest of the listed buildings. This reflects that the historic and architectural interest of the farm and Kingsknowes lies predominantly in the building fabric and also the scale of change in the surrounding area, including the construction of the A7 and the development of the bungalow and housing estate. The special interest of the heritage assets would be preserved. The LVA provides guidance on design matters including a high-level masterplan for the site. The lower levels of the site which are more sensitive to the view from Abbotsford House will be free from residential development and will provide open space for the new homes. Development would be</p>	<p><u>New site submission</u> The site was again submitted for inclusion in the Council's Main Issues Report. The new plans took on board the Reporter's reasoning for refusal. The site was identified within the Council's Main Issues Report 2018 as an alternative site for housing for 45 units. Had it not been for the history associated with the site, it is highlighted that Officers would have identified the site as a preferred option.</p> <p>Consideration must be given as to any proposed new mitigation matters which have been submitted as part of the proposal. The developer has submitted a site plan along with a Heritage Statement, Landscape and Visual Assessment and updated Landscape Photography. The plans confirm further screening of the site would be carried out. These proposals also confirm the site will not be visible from Abbotsford House during the Summer months and in the Winter months (when Abbotsford House is closed to the public) photomontages have shown that only fleeting views of very small parts of the site could be seen, but proposed housing would not be located within these visible locations. Development has been shown to be restricted to the</p>	
--	--	--	--	--

		<p>focussed on the north western and western portions of the site where existing and enhanced screening will mitigate views into the site.</p> <ul style="list-style-type: none"> • In respect of landscape and visual appraisal, the LVA proposes reinforcement of the woodland belt along the southern boundary as recommended by Scottish Borders Council, and the inclusion of a notable proportion of evergreen tree species, combined with the promotion of further tree cover to proposed street frontages and to the northern boundary, which will create tiered year-round screening of the proposed development. The proposals would complement the Abbotsford Landscape Management Plan (ALMP) which proposes felling and restocking of parts of the mature tree belt beyond the south-eastern side of the site. This process would temporarily open up views both into the site and beyond to existing properties at Netherbank. The proposed planting detailed in the LVA will mitigate this effect to the benefit of views from Abbotsford. • It is submitted that the impact of new properties within the site can be adequately mitigated and that betterment can be achieved when considering longer views from Abbotsford toward Netherbarns through additional screening. (129) 	<p>extreme north western and western parts of the site, set between an existing tree belt to the north and south. The large eastern part of the site is not now proposed for development as this is considered to be the part of the site that may be visible, albeit extremely marginally, from Abbotsford House. Furthermore, a Design Code has been submitted which confirms that external materials would be sympathetic in colour with a palette to include earthy shades.</p> <p><u>Contribution to Housing Land Supply</u></p> <p>It is acknowledged that there is a requirement to identify housing land within Galashiels as part of the Railway Blueprint, which seeks to capitalise upon economic opportunities within the Borders Railway corridor. An estimate of the timescale for delivery of housing projects has been continually difficult due to the economic downturn in the housing market and a drop in housing development nationally. The programming of sites within the Housing Land Audit can only be a reasonable expression of what can be developed within the time periods and there is a significant degree of uncertainty beyond years 2 and 3.</p>	
--	--	---	--	--

			<p>It has been increasingly difficult in recent years to identify any additional housing land within Galashiels. The submission confirms that the proposed site is presented by an active local housebuilder who envisages that the site could be delivered within the Plan period.</p> <p>The allocation of this site would contribute to the 5-year effective housing land supply within Galashiels, which at the moment is heavily reliant on the development of one site at Easter Langlee. The allocation of this site would provide additional choice within the Galashiels housing market area. It would also meet the requirements set out within the Borders Railway Blueprint and would contribute towards the wider regeneration of the town.</p> <p><u>Main Issues Report - Representations</u> Moving on to specific points of objection, the following responses are provided:</p> <p><u>Impacts upon Category A Listed Abbotsford House</u> The existing residential development of Netherbank, which is in an elevated position to the north of the Netherbarns site, across</p>	
--	--	--	--	--

			<p>the A7, can already be viewed from Abbotsford House. Likewise, existing houses to the south of Abbotsview Drive, which adjoin the site, are visible. The Council is unaware of any evidence at all that views of these properties have had any adverse impact whatsoever on any tourism matters related to the House. In light of this, it is not considered that the proposed new amended site layout, set behind well-established and new proposed woodland, would prevent visitors from coming to Abbotsford.</p> <p>The house builder has confirmed that 'the lower levels of the site which are more sensitive to the view from Abbotsford House will be free from residential development and will provide open space for the new homes. Development would be focussed on the north western and western portions of the site where existing and enhanced screening will mitigate views into the site'. Officers remain of the strong opinion that when viewing the parts of the site now proposed for development from Abbotsford House and its gardens, the site is extremely well screened by mature trees during the Summer months when the house is open to the public. The House is closed from November to March and during these Winter months, when</p>	
--	--	--	--	--

			<p>trees lose their foliage, there is still strong screening. The house builder has confirmed that further planting would alleviate any fleeting glimpses into the site. Elected Members visited the site to view the plans proposed, the site characteristics and significantly any impacts from Abbotsford House and its grounds. Members will have formed their opinions how significant, or otherwise, any impacts might be and will take this on board in deciding whether or not the site should be included within the Proposed LDP.</p> <p>As part of the MIR consultation, Historic Environment Scotland (HES) has raised no objections to the principle of development at this location on the basis that a masterplan will be prepared which will ensure that the detail of scale and detailed views analysis, amongst other matters, can be considered.</p> <p><u>Impacts on the Designed Landscape</u></p> <p>The site is located outwith the Abbotsford Inventory Garden and Designed Landscape and is clearly separated from it by existing trees. There are a significant number of long established properties within Kingsknowes/Tweedbank located</p>	
--	--	--	--	--

			<p>close to and in clear view of the boundary of the Garden and Designed Landscape and it is not considered that they have a detrimental impact upon it. The site is extremely well screened around the perimeter and has other existing and proposed trees within the site which would further screen it from the Designed Landscape.</p> <p><u>Light/Sound/Visual Intrusion and Amenity Issues</u></p> <p>In recent times Abbotsford has expanded with a new visitor centre and hold weddings within the grounds. The Council is not aware that this has caused disruption to Abbotsford House. It is not considered that the development of the Netherbarns site would compromise users or visitors to Abbotsford given the considerable distance and screening between them. It is not considered that residential properties at this location would result in a loss of amenity at Abbotsford House. There are already existing residencies in proximity to the Netherbarns site and the Council is unaware of any issues these cause in respect of having a detrimental impact on Abbotsford House and any visitors to it.</p> <p><u>Clearance of TPOd trees</u></p>	
--	--	--	--	--

			<p>Officers are aware that Abbotsford House wish to undertake some maintenance work on trees on the north side of the River Tweed located between the site and Abbotsford House. These trees are prominent and are protected by a Tree Preservation Order. Any works to these mature trees would require the consent of the Council. This has not been applied for and would have to be considered very carefully by the Council. Whilst some maintenance work could be agreed, the removal of these mature and prominent trees would be a major issue. There are other trees outwith the ownership of Abbotsford House which offer significant screening as well as extra planting proposed within the development site by the developers.</p> <p><u>Impacts on tourism</u> It is not considered that development on the opposite side of the River Tweed, which is substantially screened by existing woodland, would deter visitors from Abbotsford House. Concerns have been raised regarding the impact upon the Woodland Management and new path network on the Abbotsford Trust land. Throughout the Scottish Borders there are numerous woodland management schemes/woodland walks but none</p>	
--	--	--	---	--

			<p>of this work should in any way be considered to prevent opportunities for development in the vicinity. It is not considered the Netherbarns development, as now proposed, will have any bearing at all in terms of public usage and enjoyment of the Trust land path network.</p> <p><u>Countryside Around Towns Policy</u> The site is located within the Countryside Around Towns area as defined by Policy EP6 which in essence seeks to prevent coalescence between existing settlements. It is not however considered that the development of this site would have an unacceptable harm on the settlements due to the location of the site adjacent to existing developments and being within a natural setting amongst well-established perimeter planting. The policy does not prevent the consideration of the allocation of new sites within the LDP if considered necessary and appropriate.</p> <p><u>Public Consultation</u> In advance of the publication of the Main Issues Report (MIR), the Council held a number of Pre-MIR consultation events. During the event at the Galashiels Transport Interchange, on 27 September</p>	
--	--	--	--	--

			<p>2017, there was discussion on the possibility of the Netherbarns site being released for housing. It was generally agreed that it is a suitable and desirable location for housing in Galashiels, this is confirmed in the meeting minutes.</p> <p><u>Conclusions</u> Finding new sites for development in the Galashiels area is extremely challenging, largely due to topography, road infrastructure and flooding issues. Solely because a site has previously been refused planning consent or has been rejected for inclusion within an LDP are not reasons for again automatically opposing such amended proposals. What is important is that the amended proposals are fully scrutinised and critically, in this instance, are viewed from Abbotsford House and the land in front of it. It is insufficient just to say Abbotsford House is a sensitive building and therefore no other buildings in the wider area should be permitted. When the plans are viewed from Abbotsford, it is clear in when the House is open to the public that the proposed location of the houses will not be seen, indeed it is extremely difficult to even gauge their positions from the House given the extreme foliage.</p>	
--	--	--	---	--

			<p>Officers remain of the strong opinion that given the new proposals, this site is extremely well-screened from a wide range of viewpoints and is a natural extension of the Galashiels settlement boundary which has a very strong boundary tree belt. It is important to note that at the closest point the new plans confirm a distance of at least 370m between development and Abbotsford House. This is a considerable and significant distance. Any impacts on Abbotsford House and the Designed Landscape will be extremely minimal, significantly less than any impacts existing buildings have.</p> <p>The submission has been made by a well-known and reputable local building firm and strong weight should be given to the fact that this is an effective site within an area where finding effective sites is extremely difficult. The builders have confirmed that works would commence within 24 months of allocation. It is considered that there are many buildings which immediately adjoin or are clearly visible from the Designed Garden. It is considered the proposed location of the houses on the Netherbarns site will have significantly less impact, if any impact at all on the Designed Landscape. It is should be noted</p>	
--	--	--	---	--

			<p>that the modern visitor centre at Abbotsford has been built within the Designed Landscape.</p> <p>Existing residential properties at Netherbank and the southern part of Abbotsview Drive are visible with fleeting glimpses from Abbotsford House. There is no doubt one of the reasons these houses can be viewed in the winter time is due to their light external finishes which make such properties more prominent. The Council is unaware there is any evidence at all that any existing houses which can be viewed from the House have had any adverse impacts at all to visitors to the House. Taking all matters into consideration, it is considered that views from the House to the new proposed houses will be negligible and there are no grounds to oppose the site being included within the Proposed LDP.</p>	
Galashiels	(AGALA029) Netherbarns	<p>The Abbotsford Trust objects to the development of the Netherbarns site because the associated light, sound and visual intrusions will impact adversely on its heritage assets, historic setting and cultural landscape of Sir Walter Scott and the Scottish Borders. The Main Issues Report (MIR) puts forward a commentary which suggests that these adverse impacts can be mitigated by screening of the site by trees.</p> <p>The Abbotsford Trust strongly opposes the assumption that screening with trees will reduce</p>	See above.	It is recommended that the Council agrees to allocate this site (AGALA029) within the Proposed Local Development Plan.

	<p>the impact of the Netherbarns site: it believes that an adequate level of tree screening – one which protects the setting of Abbotsford from any new development – is unachievable on this site.</p> <p>Furthermore:</p> <ol style="list-style-type: none">1. The Historic Settings paper by the developer makes inaccurate and uninformed assumptions thereby misinforming the whole proposal and the MIR. The most damaging claim is that the boundary of the designed landscape is the River Tweed. It is not – the boundary is the northern edge of the Trust owned trees on the northern bank of the River Tweed, which reaches to the roadside. Therefore at places the designated designed landscape is contiguous with the development site.2. It is important to point out that the majority of the current screening is actually provided by tree regeneration on the disused railway, and that this land is neither owned nor managed by the Netherbarns site nor the Abbotsford Trust, and therefore cannot be considered as playing a role in the screening of the site.3. The additional screening by trees on the site is presented by the developer without any reference to the layout of the houses themselves. This is misleading as the screen and its position in relation to the houses is central to the consultation.4. The overall design and detail as found in the 'Design Code' document and the 'Design Response' document uses a language which is open to 'interpretation' and is not illustrated by relevant visual examples.5. The proposal is for 45 houses to be placed on		
--	--	--	--

		<p>only half the site. This allows for a potential doubling of the number of houses in the future. The fact that the developer submission is only for half the site is not made clear in the MIR.</p> <p><u>A. Screening of the site by trees</u> The current fragility and narrowness of The Abbotsford Trust's woodland on the bank of the Tweed does not provide an adequate screen now, and it is one which is deteriorating year on year. Photos showing the deterioration of the screen where fallen trees have left gaps are submitted.</p> <p>The Trust state that there are real challenges as to how to sustain continuous woodland cover on this banking. The Trust are of the view that the woodland screening in the visual analysis supplied by the developer in the Landscape and Visual Appraisal (Brindley Assoc. July 2017) is misleading and is presented without an explanation. It relies on the screening provided by trees in the area of the disused railway line between the Abbotsford Trust boundary and the Netherbarns site, and therefore should not be considered a part of the woodland screening which mitigates the development of Netherbarns as it is neither under the management nor influence of either owner. In contrast, Abbotsford's screening is very weak, providing very thin cover compared to the trees beyond the road. Photos are submitted showing the weakness of the screen.</p> <p>The new tree screens on the Netherbarns site itself are totally inadequate for the height, quantity, density, arrangement and type of housing proposed, and will not screen most of the</p>		
--	--	--	--	--

		<p>details laid out in the Design Code supplied by the developer.</p> <p>The new tree screens proposed will in themselves damage the historic setting of Abbotsford, as their character and makeup is at odds with the designed landscape, and they will never provide enough screening to mitigate the adverse effects of the proposed development, even if greatly increased:</p> <ul style="list-style-type: none"> • They are too linear, too narrow, with too many straight lines. • They contain an inappropriate mix of trees for the character of the setting. • They are inappropriate to Scott's woodland compartments which have sinuous outlines, cover 50% of the ground, and are almost wholly deciduous. • At best the proposed linear plantings might thinly grow to become incongruous in the designed landscape setting of Abbotsford and indeed in the field patterns of the Tweed valley generally, and provide little screening. • At worst they will fail to establish and have no role in screening parts of the new development. • Strips of trees, or even small clumps, cannot be managed over time for continuous cover woodland. <p>The reality of global warming is now upon us and needs to form part of the discussion for LDP2 and its use of trees as a mitigating factor.</p> <p>The MIR uses an argument that the Abbotsford</p>		
--	--	---	--	--

		<p>Trust is not active in winter so the lack of a screen in winter does not matter:</p> <ul style="list-style-type: none">• It is inappropriate for the MIR consultation to assume that the Abbotsford Trust will not be undertaking core activities to draw visitors to the site in the winter or in darkness in the future, indeed, quite the opposite is true• The designed landscape at Abbotsford is open to the public 24/7• What are the precedents for protecting the setting of a schedule A historic site in some seasons and at some times of the day, but not others?• The submission by the developer fails to consider the setting of Abbotsford and the wider cultural landscape, and only considers the impact of the Netherbarns development via views from Abbotsford House. <p>In conclusion, the Abbotsford Trust objects to the inclusion of the Netherbarns site in the LDP2 due to the use of screening by trees being presented as the key mitigating factor. Tree screening does not and cannot in the future limit the intrusion of lights, sound and the adverse visual effects of a development on the individual assets (house, gardens and estate and all its associated built and designed features), the historic setting of Abbotsford, and on the wider cultural landscape.</p> <p><u>B. Environment of Abbotsford has become a major public amenity</u> There has been a material change at Abbotsford since the Netherbarns site was dismissed from the</p>		
--	--	--	--	--

		<p>LDP1, in the form of an extensive programme of woodland management in the designed landscape, which concluded in 2018. The result of this has been to open up a new path network throughout the site which affords new views through the woodland, across the Tweed, and to the landscape beyond, e.g. the Netherbarns site. This has come about through a combination of funding and private donors who recognise the extraordinary importance of the Trust owned land alongside the River Tweed for its biodiversity, its public amenity, and its historic significance. In addition, the restoration of the picturesque landscape from the house down to the River Tweed has created a new woodland planting which will frame views from the North Terrace and main rooms of the house down to the Tweed and directly across to Netherbarns, reflecting closely the original intent of Sir Walter Scott to create a natural looking wooded landscape with widespread grassy 'parks'.</p> <p>As a result of these changes Abbotsford now attracts a greatly increased number of walkers.</p> <p><u>C. Scott's ideas on landscape and place were made manifest at Abbotsford and were central to the development of the cultural movement of Romanticism</u></p> <ol style="list-style-type: none"> 1. The landscape, garden and house are as much a part of Walter Scott's artistic output as his novels, but they are unique and fragile. Scott recognised that 'his oaks would outlive his laurels', e.g. that the landscape would be more precious and loved in the future than his books. 		
--	--	---	--	--

		<ol style="list-style-type: none">2. Scott designed Abbotsford as a wrap around, immersive, world-within-a-world which displays all the core tenets of the Romantic movement.3. He created a place for people to experience, to dwell in, and to discover, relying on the stimulation of sight, sound, and scent to lead one into the wonders of nature.4. Abbotsford was designed as a place of stories where people can find the roots of their cultural identity – from the Abbots Ford to Rhymers Glen to Turnagain.5. At Abbotsford, Scott created a naturalistic landscape which was his inspiration and he wrote about the way in which the green space, with its sensory quietude, gave him a sense of wellbeing and an ‘elasticity’ of mind essential for his creativity. <p>The adverse impacts of the Netherbarns development will change the way in which nature is experienced at Abbotsford and will change Scott’s legacy forever. The Abbotsford Trust is currently exploring the profound impact that Abbotsford as a place can have on people in its ‘Learning in a Heritage Landscape’ project, which aims to help disadvantaged young people find a sense of self and the skills with which to propel themselves into a fulfilling future. The reduction in the quality of the historic setting of Abbotsford through the development of Netherbarns will undermine these aims to continue Scott’s legacy of encouraging healthy, elastic, creative minds.</p> <p>Abbotsford still evokes much of the atmosphere which Scott intended through his designs. Abbotsford is a rare and precious place which</p>		
--	--	---	--	--

	<p>engenders in people peace, tranquillity, a sense of belonging, and a broader perspective on life: it needs to be protected.</p> <p>Since the woodland restoration, Abbotsford has become an important community asset for Galashiels, Tweedbank and beyond. This is clearly evidenced in the huge uplift in numbers of walkers using the new path network and in fact that over 1000 people visited Abbotsford on the recent open day in December 2018. The community clearly welcomes Abbotsford's efforts to show its relevance to their everyday lives, embracing the opportunities this extraordinary place affords.</p> <p><u>D. Development will compromise approaches to Abbotsford by foot</u></p> <p>The approaches to Abbotsford on foot are becoming increasingly well used by first time visitors to the site. However, there are regular comments made to the reception staff that the walk from Tweedbank Station to Abbotsford is disappointingly suburban in character. As a result, walkers are directed back to the station on the stretch of the Borders Abbey Way which runs along by the River Tweed to Lowood Bridge. The designed landscape at Abbotsford is crossed by two increasingly important long-distance walking routes – the Borders Abbey Way and the Southern Upland Way. In the case of the latter, the walker will have to negotiate the western boundary of the Netherbarns housing development to get to the River Tweed. The Borders Abbey Way takes two routes which afford views across Abbotsford directly into the site at</p>		
--	--	--	--

		<p>Netherbarns, where on a good day the south sloping site is lit up by sun from morning to early evening. Other walks from vantage points on the wider estate pick up on the same view into Netherbarns.</p> <p><u>E. Why the topography of the Netherbarns site is so detrimental to Abbotsford</u></p> <p>The Abbotsford Trust is very familiar with the site at Netherbarns. Its topography slopes down towards Abbotsford from the A7, thus increasing the visual impact of every single unit which might be built.</p> <ul style="list-style-type: none">• Each house will be partially visible from Abbotsford because of this slope.• The topography of the slope and banking is mirrored on both sides of the Tweed. Thus, the windows of the houses at the lowest level of Netherbarns will be eyeball to eyeball with Abbotsford's windows.• The rest of the development will have the effect of bearing down on the historic setting.• Garden 'enhancements' are likely on a southerly facing sloping plot, including terracing, decks, paths, conservatories, ramps and steps and associated lighting and furniture. All would increase the visual and sound intrusion of the basic development at Abbotsford.• Reflections from glazing creating a daytime reminder of the suburban intrusion of a new development which can be seen through trees in summer or winter. The site faces south east and therefore all windows will reflect back towards Abbotsford. The likelihood of this will		
--	--	---	--	--

		<p>be increased by new extensions, conservatories, greenhouses and solar panels and parked cars.</p> <ul style="list-style-type: none">• Noise intrusion on the setting of Abbotsford. It is not decreased by a woodland screen and is amplified by water, e.g. the River Tweed. Even though it cannot be seen, noise will gather force depending on the number of housing units built.• Lighting intrusion on the setting of Abbotsford will come from many sources associated with development – car headlights, street lighting, porches, undraped windows but also security lighting to the back and front of properties. All lighting is visible through trees, whether in summer or winter. <p>Furthermore, these intrusions will adversely affect Abbotsford in the following ways:</p> <ol style="list-style-type: none">1. Seriously damage the integrity of Abbotsford’s setting, which will damage tourism in the Borders, with a long term adverse effect on bringing wealth and business to the area. It is the Borders’ most outstanding and internationally important tourist attraction.2. Undermine Abbotsford’s fundraising abilities to protect and conserve the legacy of Scott, and thus adversely affect its importance to the Borders’ tourism and economic wealth.3. Impact on Abbotsford as an amenity for the local community. Recent grants have developed the estate for access, biodiversity, and to conserve its designed landscape. Currently Abbotsford’s ‘Learning in the Historic Landscape’ project focuses on employability and skills for young people.		
--	--	---	--	--

		<p>4. Adversely affect tourism and jobs in the Borders – Abbotsford is a key employer in the Central Borders and employs 38 staff, supported by over 100 volunteers, many of whom are volunteering as a springboard into employment.</p> <p>5. Undermine the previous significant public investment in Abbotsford (£1.5 million by SBC itself) as a tourist destination with its new Visitor Centre and restoration of house. The gothic Pavilion in the walled garden is attracting further investment to restore it by 2020, complementing the new ‘all access’ garden paths as a place for shelter and repose.</p> <p>6. Critically weaken future plans for Abbotsford to be recognised as a World Heritage site.</p> <p>Abbotsford is one of Scotland’s most important cultural assets and should not be diminished by a development of houses at Netherbarns, which will impact on Abbotsford’s house, gardens and designed landscape. It would be ironic if, as we approach Scott’s 250th anniversary and with the eyes of the nation upon us, diggers were to greet visitors across the Tweed. (310)</p>		
Galashiels	(AGALA029) Netherbarns	<p>The contributor does not believe the developer’s proposed improvements amount to more than tinkering with the deeply flawed proposal (same number of houses) which was dismissed outright in 2014. It is therefore astonishing that planners have allowed their interest in the site to be re-awakened, especially when a much lesser scheme of twelve houses maximum was dismissed at the same time.</p> <p>If the present proposals are allowed then future</p>	See above.	It is recommended that the Council agrees to allocate this site (AGALA029) within the Proposed Local Development Plan.

		<p>generations will question how a civilized country could ever have allowed a suburban development to be built, as I once heard it described, “smack in the face of a national treasure.” Forty-five houses, or even half the number, would inevitably constitute a suburban development which could not but damage the setting and experience of Abbotsford.</p> <p>Even if partially screened, the development of forty-five houses at Netherbarns would give the overall impression of a suburban development. As well as the actual buildings; vehicles and roads, street lights, noise and light would all be much more noticeable than the existing field, unavoidably adding to the suburban effect. To quote again from Reporter Richard Hickman’s 2007 findings, “... <i>this is a particularly sensitive landscape, where even a very minor intrusion of alien elements is likely to mar the perceived experience of visitors, many of whom will have travelled a great distance to visit Abbotsford, with correspondingly high expectations.</i>”</p> <p>The contributor does not accept planner’s view that material changes would allow the development of forty-five houses at Netherbarns without significant adverse effect on Abbotsford and its designed landscape. On the contrary, given the uncertain state of the major tree screen along the riverside, and the new breadth of visitors’ experience at Abbotsford, the contributor now believes that such development is potentially more damaging than ever, and the contributor strongly objects to it.</p> <p>The contributor therefore respectfully requests</p>		
--	--	--	--	--

	<p>that the current proposal be removed from the draft plan. The contributor would not object to development at Netherbarns if it were restricted to the alternative proposal set out below:</p> <p>By contrast with the proposed allocation of forty-five units, a modest level of development, made up of a few houses and some really worthwhile areas of new woodland could give the overall impression, not of a partially screened suburban development, but of a handful of houses in a wooded landscape. This is a crucial distinction which the contributor believes should govern any future plans for development of the site. This approach could minimise damaging impacts on Abbotsford, and, if the woodland is properly planned, mitigate the negative impact of existing development nearby. The contributor is mindful that in 2014 Reporter Richard Dent rejected a similar proposal with a maximum of twelve houses. Clearly the number would depend on various factors, including house type. Given the topography of Netherbarns, it would be much easier, both in terms of groundworks and of visual impact, to accommodate low buildings of shallow depth, perhaps of cottage style (not bungalows).</p> <p>The Countryside Around Towns policy (CAT) is about preventing inappropriate creep of development into the countryside. While the CAT policy itself may be up for amendment as part of the Local Plan process, development at Netherbarns would be completely at odds with the intentions of the policy.</p> <p>The contributor is strongly of the view that the development of the site would be undesirable</p>		
--	--	--	--

		because of the potential risk of damage to very important landscape, historic, and cultural interests, and to the contribution of tourism to the Borders economy. (313)		
Galashiels	AGALA029 (Netherbarns)	<p>The contributors object to this site for housing development. The contributor concurs with the submission made by The Chair of the Board of Trustees of The Abbotsford Trust and would add the following:</p> <ul style="list-style-type: none"> Abbotsford is a unique and historic literary house and as such attracts visitors from all around the world. In addition to their wish to visit the house built by Scotland's greatest-ever writer, what attracts them is the overall environment and ambience of the estate and the landscape and its sense of peace and tranquillity. What they experience is, of course, what Scott intended - a sanctuary for a writer, a place to reflect on history and philosophy. This has always been felt within the confines of the walled gardens, the surrounding woodlands, and the aspect to the north of the house, facing as it does, the Tweed and the Border hills and meadows beyond. With the recent development of the pathways and woodland towards the river, this aspect of visiting Abbotsford has been enhanced - it is greatly appreciated both by visitors and locals as an area of outstanding beauty and tranquillity. There is no doubt that a housing development at Netherbarns, being directly across the river, and in full view of Abbotsford, would seriously diminish the peace and enjoyment for many. (39) Over the past year the contributor has contributed to a new development at 	See above.	It is recommended that the Council agrees to allocate this site (AGALA029) within the Proposed Local Development Plan.

		<p>Abbotsford - tours around the gardens, not primarily to talk about horticultural matters, but to describe the vision behind Scott's plans and layout. An important component of the tour is to conduct visitors to the north terrace (i.e. facing the Tweed). For Scott, this was a Picturesque Landscape (Picturesque: an aesthetic ideal pioneered in 1782 by William Gilpin, combining the beautiful and sublime in landscape) and he developed that area having been influenced by that artistic movement. That is another reason why a housing development right in the middle of it is inappropriate. But more than that, Scott suffered bouts of depression and found succour in contemplating landscape in general, and his Picturesque Landscape in particular. Abbotsford has already discussed (with Visit Scotland for instance) promoting that aspect; that is, its attraction to visitors in general, and to special groups in particular. The special groups would include visits from residents of care homes, individuals with learning difficulties and so on. This is the concept of "nature as nurse", or "the therapeutic landscape", increasingly important in the non-pharmaceutical treatment of mental disorders. It is stressed that this initiative would be seriously hampered with the development at Netherbarns. (39)</p> <p>The contributor is a retired Family Doctor with a particular interest in mental health therapies. That experience leads the contributor to believe that Abbotsford has a pioneering role to play in the Scottish Borders in what is described above. The preservation of the pastoral environment in and around Abbotsford is of crucial importance –</p>		
--	--	---	--	--

		<p>housing development at Netherbarns would be highly detrimental. (39)</p> <p>Oppose any development at this location, it would seriously impact upon Abbotsford – one of the major tourist attractions in the Borders. (58)</p> <p>Contributor is strongly opposed to this site for the following reasons:</p> <ul style="list-style-type: none"> • The issue cannot be reduced to being just about the views, seasonal or otherwise, from Abbotsford House. Protecting the setting of Abbotsford is about more than just hiding a housing estate behind curtains of tree planting along the south-eastern boundary of the site. (60, 120, 121) • The setting would still be shamefully compromised – for visitors, including those heading for the Eildon and Leaderfoot National Scenic Area, arriving along the A7 from the Selkirk direction; from the historic designed landscape and its footpaths, now enjoyed all year round by increasing numbers of walkers and visitors to Abbotsford and from the surrounding hills. (60, 68, 120, 121) • The contributor is exasperated that the Council and the Developer/Owners are once again pursuing the idea of suburban development at Netherbarns – which has four times in the last twelve years been found against at Public Inquiry/Local Plan Examination. (60, 120, 121) • It is inappropriate for Galashiels to spread further over the Kingsknowes ‘shoulder’ into land associated with the Area of Great Landscape Value and further upstream in relation the Tweed, which is not the natural 		
--	--	---	--	--

		<p>water valley of the town. (60, 120, 121)</p> <ul style="list-style-type: none"> • A housing estate would be inappropriate in character and scale, however, a small, landscaped build of just several houses with associated features, such as orchards, woodland or stables, would provide a softening of the town's present hard edge at Kingsknowes – and an appropriate, irrevocable transition between town and countryside. (60, 120, 121) • The contributor believes that the conclusions of the last public inquiry remain definitive: “Despite the lack of a formal objection by Historic Scotland, I concur with the conclusions reached at the previous local plan inquiry. It appears to me that cultural and landscape considerations combine to provide an asset which should remain free of the impact of the suggested allocation and any subsequent development of Netherbarns. I do not accept that the woodland screening would adequately mitigate the adverse impacts of the allocation on the setting of the house or the designed landscape. Additionally, the re-opening of the railway link to Galashiels is likely to increase the volume of visitors to Abbotsford, therefore further strengthening the need to protect the heritage of the vicinity.” (60, 120, 121) • The contributor (Save Scott's Countryside) has plans for a nationwide competition for a masterplan for Netherbarns to be launched in the event that the site is allocated for modest development as outlined above. The aim would be to find a resolution to the long-running Netherbarns saga, enabling some 		
--	--	--	--	--

		<p>development on the site while providing substantial areas of tree-planting to ensure minimum negative impact on Abbotsford House and its Designated Landscape. The competition would be open to all those involved in both architecture and in landscape, whether at professional or student level. The organisers would wish to work with SBC and others to ensure that the maximum amount of relevant material is available to contestants. The contributor would wish to work closely with Abbotsford so that contestants may be further informed about Abbotsford and allowed access as appropriate. The competition would be designed to highlight Scott's importance as a pioneer in landscape design. To be absolutely clear, this competition would only be launched in the event of Netherbarns being allocated for modest development. (60)</p> <ul style="list-style-type: none"> • Development on the site would be contrary to: <p>Scottish Planning Policy 2014, Policy Principle 137 – 'The planning system should promote the care and protection of the designated and non-designated historic environment (including individual assets, related settings and the wider cultural landscape) and its contribution to sense of place, cultural identity, social well-being, economic growth, civic participation and lifelong learning'. (68)</p> <p>Managing Change in the Historic Environment: Designed Landscapes 2016 – Inventory sites often have a planned relationship with landscape features beyond their boundaries, and these surroundings may contribute to the way they are experienced, understood and</p>		
--	--	--	--	--

		<p>appreciated. Land outwith the boundary may provide a backdrop to a mansion house or terminate a vista. This ‘borrowed’ land may therefore impact on the site’s setting – for example, if it would affect a deliberately planned outward view. Proposals should be carefully designed and located to minimise any such impacts’. (68)</p> <p>Scottish Borders Local Development Plan 2016, Policy EP10 Gardens and Designed Landscapes (nb the submission refers to LDP 2015 Policy BE3 in error) – ‘Development will be refused where it has an unacceptable adverse impact on the landscape features, character or setting of 1. Sites listed in the Inventory of Gardens and Designed Landscapes.(68)</p> <ul style="list-style-type: none"> • In 2017 The Abbotsford Estate Conservation Management Plan was commissioned from Peter McGowan Associates which clearly states that ‘The view from the North Terrace, and from the North rooms of the house and from the haugh and riverside, continue to be unspoilt by development.... The view of the Netherbarns’ bank and hillside is an outstandingly important part of the setting of Abbotsford and needs to be protected from intrusive development.’ (68) • Whilst it is stated in the Main Issues Report that one of the requirements for development will be ‘Reinforcement ... to the existing planting along the south eastern boundary of the site to further protect the setting of Abbotsford House’ this will not offer sufficient 		
--	--	---	--	--

		protection, given that the existing planting is deciduous, offering little screening over the winter months. Furthermore, the screening effect is likely to be reduced as the mature trees are lost to old age, or as a result of climate change. Further thinning of the screen will occur in the medium to long term if, as has been proposed, the Borders Railway is extended beyond Tweedbank towards Carlisle. (68)		
Galashiels	AGALA029 (Netherbarns)	Contributor objects strongly to the proposed allocation (alternative). This is an area in full view of Abbotsford, the Eildon & Leaderfoot National Scenic Area, the Designed Landscape around Abbotsford and the many footpaths enjoyed by walkers to Abbotsford and the surrounding area. The Public Inquiry in 2015 concluded that the cultural and landscape considerations were an asset to the locality and should remain free of impact from development at Netherbarns. Nothing has changed since then and this area should be left for the enjoyment of locals and visitors. It's the beauty and heritage of the area that attracts visitors. This is an important aspect of the economy of the Borders and should not be destroyed. (47, 54, 66)	See above.	It is recommended that the Council agrees to allocate this site (AGALA029) within the Proposed Local Development Plan.
Galashiels	AGALA029 (Netherbarns)	Contributor strongly objects to any allocation of the site. Any development of this site would be very undesirable because of potential risk of damage to a very important landscape, historic and cultural interests and the contribution of tourism to the borders. Abbotsford House is one of our national treasures, and is a real success story in Galashiels. Any development here does not outweigh the value of our Scottish Heritage. Development would be clearly visible from the house and new associated paths, which are very	See above.	It is recommended that the Council agrees to allocate this site (AGALA029) within the Proposed Local Development Plan.

		popular with locals and visitors to the borders. Noise and litter from any educational establishment would be detrimental to this particular area. Health and safety issues from major road congestion caused by any development should be avoided at all costs. This greenfield site is a major part in our jewel in the crown in the Scottish Borders. It is these things that make us different and more attractive from other areas, please do not spoil this when there are other options. (78)		
Galashiels	AGALA029 (Netherbarns)	Object to the proposed allocation on the following grounds: <ul style="list-style-type: none"> • Abbotsford is an internationally important tourist attraction. • The integrity of the setting of Abbotsford would be compromised by a view of houses. • There would be a risk to tourism if this were to happen. • Abbotsford's fundraising abilities - to conserve Scott's legacy - would be undermined. • If tourism were affected, there would be a knock-on effect on jobs. • Abbotsford's aspirations to be recognised as a World Heritage Site would be weakened. • Alternative sites with less detrimental immediate environment impact should be considered. (84) 	See above.	It is recommended that the Council agrees to allocate this site (AGALA029) within the Proposed Local Development Plan.
Galashiels	AGALA029 (Netherbarns)	Objects to the proposal to build houses and possibly a primary school on this site. Looking back over The Southern Reporter and Border Telegraph from as recent as 2015, the contributor thought this had been vetoed after the Scottish Government Inquiry, until 2024 or 2027 at the earliest? To propose to build that amount of houses and a	See above.	It is recommended that the Council agrees to allocate this site (AGALA029) within the Proposed Local Development Plan.

		<p>school next to "The Tweed Conservation Area" and overlooking Abbotsford, the number one tourist attraction in the Borders does not seem right.</p> <p>Surely the school, which the contributor assumes is to replace St Peters, should be part of the campus for a new Galashiels Academy. Also, the main road is heavily congested at the moment and couldn't handle the increased car and pedestrian traffic, apart from being too far out of town to safely walk to.</p> <p>Abbotsford is a world famous tourist attraction, which has had £15 million spent on the house, visitor centre and surrounding paths. From Abbotsford you can see right into the Netherbarns field even in the Summer when the trees are in full leaf. Imagine the view only yards away if there are 45 stark white houses and a school to look onto with the resultant constant noise, traffic, smells and litter. (Remember how the view from the Eildons was spoiled by the big white houses at Dingleton, or take a walk round Gala Academy and Policies to see the litter and constant noise and traffic. What is now a popular, tranquil walk along the river via the new Abbotsford paths will become a cacophony of noise and visual pollution. Planting along the site boundary will take years to establish itself and will not alleviate the problem as from Abbotsford and the high paths you are looking down right into the site.</p> <p>Finally, with the establishment of the new railway and the coming of the Tapestry, the aim of making Galashiels, Abbotsford and Melrose the growing tourist heart of the Borders will be destroyed if the jewel in the crown is to be blighted by a view of urban sprawl over what used to be attractive Greenbelt. Thanks for passing on my concerns</p>		
--	--	---	--	--

		about the urbanisation of our wonderful Borderlands. (85)		
Galashiels	AGALA029 (Netherbarns)	SEPA require a Flood Risk Assessment (FRA) which assesses the risk from the River Tweed. Review of the surface water 1 in 200 year flood map and steep topography nearby indicates that there may be flooding issues within this site. This should be investigated further and it is recommended that contact is made with the flood prevention officer. Site will need careful design to ensure there is no increase in flood risk elsewhere and proposed housing is not affected by surface runoff as properties/ infrastructure upslope have been affected by flooding. The site has a potential surface water hazard and water environment considerations. (119)	See above.	It is recommended that the Council agrees to allocate this site (AGALA029) within the Proposed Local Development Plan.
Galashiels	AGALA029 (Netherbarns)	The contributor fully supports opposition and the previous public enquiry conclusion (Richard Dent 2015) in their opposition to the housing proposal. It is almost unthinkable that such a crass proposal could be made to spoil what is for Scotland and the Borders a gem of such beauty. (135)	See above.	It is recommended that the Council agrees to allocate this site (AGALA029) within the Proposed Local Development Plan.
Galashiels	AGALA029 (Netherbarns)	As a friend of Abbotsford, the contributor feels that nothing should be built that alters the view across from the river, the view Sir Walter Scott would know. There is a lot of space in the Borders. It should be possible to build new housing without encroaching in any way on Abbotsford as it has remained since Scott's time. The contributor opposes any changes to the Abbotsford view. (148)	See above.	It is recommended that the Council agrees to allocate this site (AGALA029) within the Proposed Local Development Plan.
Galashiels	AGALA029 (Netherbarns)	The contributor considers that the proposal to build 45 houses on 7.3 HA at Netherbarns opposite to Abbotsford House is ridiculous. Abbotsford is the most successful tourist attraction	See above.	It is recommended that the Council agrees to allocate this site

		<p>in the Borders - a real success story - why is the Council threatening to spoil the tourist experience of this wonderful house and its gardens by building modern houses immediately opposite on the banks of the Tweed? The renovation of Abbotsford has involved the expenditure of millions of pounds. The whole project has involved the dedication of many experts and the commitment and time of large numbers of enthusiastic volunteers. When visitors are being conducted through the house, one of the high points of the tour is the view out of the bow window of the dining room looking across the Tweed because, just before his death, Scott had his bed moved into the dining room so that he could see and hear his beloved Tweed river. This was the last view he looked at. It will be extremely disappointing for visitors to look across the river at a suburban sprawl. What the thousands of visitors to Abbotsford want to see is the view that Scott saw that was such an inspiration to his writing. It is impossible to hide 45 houses simply by 'reinforcing existing planting' along the south-eastern boundary of the site. The River Tweed Special Area of Conservation deals not only with wildlife but must also encompass landscape interests. The Scottish Planning Policy document (23 June 2014) Policy Principal 29 clearly states that there is a duty - 'protecting, enhancing and promoting access to natural heritage including green infrastructure, landscape and the wider environment'. Also avoiding over-development and protecting the amenity of new and existing development. No housing developments must ever be permitted to destroy this national and international treasure that is Abbotsford House. A permanent moratorium on any future building on</p>		<p>(AGALA029) within the Proposed Local Development Plan.</p>
--	--	--	--	---

		<p>this site should be placed on this site. (153)</p>		
Galashiels	AGALA029 (Netherbarns)	<p>It is the contributor's opinion that developing on the land at Netherbarns would damage the historical integrity of one of the region's (and indeed the nation's) most important heritage assets, and one that will become hugely important for the Scottish Borders economy in the years of major Walter Scott anniversaries coming up in the near future. Abbotsford was created by one of the world's literary superstars in order to enjoy the views of his beloved River Tweed - this is its entire reason for existence. Having seen some of the amazing family archives held at the house, I know that the family have been fighting tirelessly to try and preserve this crucial view from destruction and compromise for well over one hundred years. They did this because the estate was always intended to be free to access and enjoy for the local community as a green and pleasant space to escape to. Now that Scott's estate is in the hands of a local charity growing in momentum and ambition as the years go by, the prospect of developing on the adjacent land seems sure to curtail their future success and opportunities across the board. With many tourists, particularly those who are coming from overseas, using Abbotsford as their gateway to the Borders, to jeopardise the appeal of this site seems ludicrous. It undermines past investment in the place, it puts local jobs at risk, and it risks damaging a community engagement programme that is doing wonderful and transformational things for the disadvantaged people of the local area. The contributor hopes that an alternative site can be found so that we can preserve what is best about the Borders (its historic estates, vistas and unique character), whilst addressing the very real housing</p>	See above.	<p>It is recommended that the Council agrees to allocate this site (AGALA029) within the Proposed Local Development Plan.</p>

		shortage. (163)		
Galashiels	AGALA029 (Netherbarns)	Historic Environment Scotland (HES) advise that development of this site has potential for negative effects on the setting of A listed Abbotsford House (LB15104) and the Abbotsford House designed landscape (GDL00001). Whilst HES consider it possible to mitigate effects to an acceptable level for our statutory interests, HES welcome that this is an alternative, rather than preferred, option. In the event that this option is brought forward to the Proposed Plan, HES accept the principle of development for up to 45 units, subject to the robust application of the site requirements and development of a site masterplan. HES would expect the masterplanning process to consider how various factors including building scale, location within the landscape, layout, materials, character, number and type of housing units can mitigate potential effects, and to provide a framework for detailed proposals which comply with local and national historic environment policy. HES's views on a masterplan, and any application for this site, will be dependent on the level to which potential effects have been mitigated. HES would expect HES to have early involvement and consultation in the masterplanning process. (164)	See above.	It is recommended that the Council agrees to allocate this site (AGALA029) within the Proposed Local Development Plan.
Galashiels	AGALA029 (Netherbarns)	The contributor objects to this site being included as an 'alternative site'. This site has been rejected four times in the last 12 years at public Inquiries and local plan examinations. Considering the effect on Abbotsford the Reporter at the last inquiry stated 'It appears to me that cultural and landscape considerations combine to provide an asset which should remain free of the impact of the suggested allocation and any subsequent development of Netherbarns. The contributor does not accept that the woodland screening would	See above.	It is recommended that the Council agrees to allocate this site (AGALA029) within the Proposed Local Development Plan.

		adequately mitigate the adverse impacts of the allocation on the setting of the house or the designed landscape.' This site is also outwith what people consider to be walking distance of schools, shops or either railway station. Building on this site would be contrary to the aims expressed at para 3.6 and 3.7 of the MIR. (187)		
Galashiels	AGALA029 (Netherbarns)	The Southern Uplands Partnership are aware that the Netherbarns site faced strong opposition when it was suggested last time, and are surprised that it is being put forward again. It would be interesting to know what has changed in the meantime. It could be argued that Abbotsford is now attracting significantly more visitors and playing an even more important role in the local economy - so there is even more reason not to threaten it with this development site. (196)	See above.	It is recommended that the Council agrees to allocate this site (AGALA029) within the Proposed Local Development Plan.
Galashiels	AGALA029 (Netherbarns)	The inclusion of this site given the repeated proposals and appeals and dismissal and arguments and debates that have resulted in it being deleted from previous plans seems to be a perverse and indeed provocative proposal. It should be deleted. (206)	See above.	It is recommended that the Council agrees to allocate this site (AGALA029) within the Proposed Local Development Plan.
Galashiels	AGALA029 (Netherbarns)	SNH's previous advice on this site was that it "lies outwith the current settlement boundary as shown in the LDP. SNH understand that the site was included as an allocation in the Proposed Plan but, in their report of examination, the Reporter recommended its deletion. This recommendation was based partly on landscape impacts. SNH are not aware of a potential solution that should change that decision." SNH do not consider that this situation has changed and consider that this site should not be allocated due to the previously identified landscape impacts. (213)	See above.	It is recommended that the Council agrees to allocate this site (AGALA029) within the Proposed Local Development Plan.

Galashiels	AGALA029 (Netherbarns)	The contributor disagrees with the option to develop this site for housing because of the visual impact that it will have when viewed from Abbotsford House. The land is very sloped and the suggestion that it can be screened by trees is unrealistic. Abbotsford House itself is elevated above the river and the proposed development on Netherbarns will be detrimental to the image that visitors will take from visiting Abbotsford. The Abbotsford Trust has invested hugely in the House and grounds and the status of Abbotsford as a major tourist attraction could be affected. The contributor would prefer to see more brownfield sites being developed rather than greenfield sites. (228)	See above.	It is recommended that the Council agrees to allocate this site (AGALA029) within the Proposed Local Development Plan.
Galashiels	AGALA029 (Netherbarns)	The Selkirk and District Community Council regrets the spread of urbanisation into this open environment which overlooks the River Tweed/Abbotsford House and policies. (305)	See above.	It is recommended that the Council agrees to allocate this site (AGALA029) within the Proposed Local Development Plan.
Galashiels	AGALA029 (Netherbarns)	The contributor is opposed to this proposal for 45 units here. The site has been rejected at public inquiries several times already, for reasons that are well-documented and these have not changed. Naturally the owner/builder/developer wants a return on their investment, and it is a strange irony that the name Ballantyne should still be causing grief to the heritage that Sir Walter Scott has left to us, and which enriches our lives and which through tourism and visitors to Abbotsford, brings a much needed boost to the economy of the whole region. It would be a most regrettable mistake to risk in any way, the integrity of the setting of Scott's wonderful estate and legacy. How would a modern housing estate look	See above.	It is recommended that the Council agrees to allocate this site (AGALA029) within the Proposed Local Development Plan.

		<p>plonked in front of any of the other big historic Borders houses, visible from the road? Planning permission for that would not be acceptable - neither should it be for Abbotsford.</p> <p>Galashiels has many spaces closer to the centre of town that could provide land for development - in particular for affordable housing units which are in such high demand (vis the number of applications for the proposed new development in Newtown St Boswells, as revealed by Eildon Housing Association, which outnumbered several times over the number of units planned). Incentives from the Council to owners of these brownfield town centre sites could result in enabling housing development within walking distances of services and facilities without compromising sensitive landscapes. The Council should be in no rush to allow development of this ultra-sensitive site at Netherbarns, for the economic gain of a developer, when to do so puts key assets in jeopardy and does not meet the needs of sectors of the housing market that are currently not well catered for.</p> <p>Sufficient overdevelopment so close to the River Tweed and far from the town centre has already been permitted - wrongly, in my opinion. Furthermore, this site, located adjacent to busy junctions and carriageways is not likely to promote cycling and walking into town which is a requirement for new sites. On the contrary, development at this location is only going to increase the number of car journeys made by residents and service vehicles, and add to traffic congestion and pressures on parking availability in town.</p>		
--	--	--	--	--

		<p>Most of the building (apart from the estates around the Kingsknowes Hotel) on this side of the Tweed consists of large individual houses surrounded by lots of land. It would be marginally more acceptable to allow for a similar scale of development on this site, rather than a suburban style of development which, when looking towards the direction of Selkirk, is not in character with its surroundings.</p> <p>If push comes to shove over this site, a limited number of plots could be sold off with strict conditions attached to encourage the creation of small holdings - stables, orchards, woodlands and other features - which would preserve and if done correctly, enhance the rural character of the setting.</p> <p>Siting and setting of developments are valid planning matters and must be respected. (143)</p>		
Galashiels	AGALA038 (Easter Langlee Mains II)	<p>The contributor objects to the exclusion of this site from the MIR. The contributor believes that the site could provide a valuable contribution to the housing needs of Galashiels for the next 15 years.</p> <p>The contributor considers that the site has a few issues to overcome prior to development but none of these are insurmountable. The principle obstacles are;</p> <ul style="list-style-type: none"> • The presence of significant electricity and gas transmission plant; • The traffic capacity of the existing Langshaw Road (C77); • Potential noise from waste transfer/aggregate crushing and sorting 	<p>The site (AGALA038) was previously considered at the 'Pre MIR' stage and was not included within the MIR. The site assessment concluded the following:</p> <p><i>'This site is located outwith the settlement boundary and is separated from nearby housing by a mature shelter belt. The site is constrained by the detachment from Galashiels, compounded by distance from the town centre and the barrier created by the 'lip' of land which separates the area from the</i></p>	<p>It is recommended that the Council agrees not to allocate this site (AGALA038) within the Proposed Local Development Plan.</p>

		<p>plant; and</p> <ul style="list-style-type: none"> • Potential smell and gas ingress from former landfill. <p>The site has some very distinct advantages; namely;</p> <ul style="list-style-type: none"> • It is available now; • It is a well contained site due to topography and vegetation; • It is low value agricultural land; • It has no outstanding landscape or recreational value; • It is close to the settlement boundary with existing access and achievable new access links; and • It is a large site capable of contributing significantly to fulfilling the authorities' housing requirements. <p>All of the concerns expressed in the Main Issues Report for AGALA038 can be overcome, or in some cases are not issues that should lead to a conclusion of rejection.</p> <p>The site can play a very important role, in the very least for longer term housing provision, and it would be unfortunate not to recognise the potential that this site has. The site is being put forward by the land owner and the land is available as soon as the reconfiguration of power lines can be agreed.</p> <p>At present very little new housing provision has been catered for in the Galashiels area by LDP2. It is only a matter of time before the area's potential is fully realised, following the success of the Borders Railway, now entering its fourth year.</p>	<p><i>Tweed Valley. The site has good access to services and facilities and is served by an acceptable level of public transport including the proposed Borders Railway. The potential impact on biodiversity is minor. The section of the Langshaw road adjacent to the site will require upgrading, in terms of carriageway widening and extending the footway and lighting infrastructure out from the town, and the northern part of the road may require realignment in order to facilitate safe access to it. A major hazard pipeline runs through the site and the Easter Langlee landfill site is located immediately to the east of the site. It is considered that other, more appropriate sites are available within the housing market area to meet the shortfall. This site would not represent a logical extension of the built up area as it would extend the settlement beyond an existing mature shelter belt to the north of Coopersknowe. This would prejudice the character and natural built up edge of the settlement to the detriment of the landscape setting. Furthermore, the proximity of the site to the existing landfill site would be contrary to prevailing national policy leading to unacceptable adverse impacts on the residential amenity of the proposed dwellings as result of noise and odour nuisance from the</i></p>	
--	--	--	---	--

		<p>Galashiels lies at the heart of the Borders, and was historically the centre of the 'Tweed' industry. It is a university town, home to Heriot Watt University's School of Textiles and Design. It has a vital transport interchange on the Borders Railway. The current LDP2 has only allocated 45 units to the town. While it is appreciated that there are large allocations from previous LDP and SG, there needs to be greater supply of land for housing that is ready to be developed within a five year period, and certainly with a view to the next 10 years.</p> <p>Housing in the Galashiels area is far more likely to lead to greater inward investment to the region and towards the betterment of the central Scottish Borders. Increasing housing in Peebles, for example, is more likely to create commuter housing for people working in Edinburgh due to its greater proximity to the capital. The benefits to the region will therefore be significantly diluted. Far greater benefit will be realised by strengthening Central Borders towns, and more importantly, it is towns like Galashiels and Hawick that require to be driven harder in order to improve their vitality and economic self-sufficiency, which in turn will draw investment down the A7 corridor.</p> <p>Also, and very important to the consideration of the site, the applicant is very keen to maximise the level of low cost and social housing within the site, well above the 25% policy requirement.</p> <p>Finally, a degree of mixed development could be considered if this were to help further mitigate any issues related to the neighbouring uses to the east of the C77. (24)</p>	<p><i>adjacent landfill site.</i></p> <p><i>The southern part of this site was considered for housing as part of the Local Development Plan Examination (LDP 2016), the Reporter made the following comments in relation to housing site (AGALA030): "Approaching the site from the north, the land to the west of the road has a pleasant countryside appearance and the crest of the hill provides a distinct entrance to Galashiels. The construction of the houses, as proposed, would have a marked visual impact and severely detract from the local importance of this land within the landscape setting of the town. Whilst the proposed community allotments would be unlikely to have a significant impact, the construction of even a small number of houses at this location would not be acceptable in either visual or landscape character terms. Irrespective of the location of the site within the landscape, the proximity of the Easter Langlee landfill operation is a practical concern. The distance between the proposed residential development and the landfill site would be less than 100 metres. Noting the guidance in Scottish Planning Policy I agree with the council that this would not be acceptable".</i></p>	
--	--	--	---	--

			<p>Since the aforesaid proposals were considered, it is now established that the landfill site will be capped in the near future. Despite this, the Waste Manager of SBC would remain concerned by any proposed housing within close proximity of the landfill site due to potential leakage. The additional overriding issue with any development of this site is that Langshaw Road would require significant upgrading involving land outwith the control of the applicant.</p> <p>For the aforesaid reasons, the site should not be included within the Proposed LDP for housing.</p>	
Galashiels	AGALA040 (Land to North of Wood Street)	<p>Network Rail (NR) submit this new site for consideration. The site is owned by NR and is partly located within the settlement boundary of Galashiels adjacent to the railway. NR note that the site is currently wooded and there is an existing path on the site. NR are of the view that the site could form a comprehensive form of development with frontage units, an access road and strategic boundary landscaping subject to development boundaries being reconsidered as proposed. (294)</p>	<p>The site assessment concluded the following:</p> <p>There are a number of constraints identified with the development of this site, which are highlighted below:</p> <ul style="list-style-type: none"> • There is high impact biodiversity risk associated with the site given the mature broad-leaved woodland part of which is Ancient woodland. • The site is encroaches into mature woodland. The existing mature woodland acts as a mature and well established boundary to the settlement at this location. The removal of mature 	<p>It is recommended that the Council agrees not to allocate this site (AGALA038) within the Proposed Local Development Plan.</p>

			<p>trees in order to facilitate development is not encouraged.</p> <ul style="list-style-type: none"> • Wood Street is characterised by properties extending along the street frontage. Any development at this location would constitute backland development, out of character with adjacent properties. • The Roads Officer objects to the proposal. The site is unacceptable for reasons of topography, interference with multi-use path, insufficient visibility at access, little integration with street. <p>For the aforesaid reasons, it is not considered that this site is suitable for housing development.</p>	
Galashiels	BGALA006 (Land at Winston Road I)	<p>The contributor believes that this site should be allocated for housing within the LDP2 for the following reasons:</p> <ul style="list-style-type: none"> • It is deliverable within the Local Plan lifespan. The developer owns the land and has the finances and resources to bring forward the development within the plan period. The demolition process has already taken place and an application will be submitted in the near future. There has also been interest shown by a housing association. • 71 units can be delivered outside the overhead power line zone. However the aim is to decommission these pylons and relay underground in order to get a maximum developable area. 	<p>The site (AGALA039) was previously considered at the 'Pre MIR' stage and was not included within the MIR for residential development but for business and industrial land. The site assessment for residential development at this location concluded the following:</p> <p><i>'The location of the site is acceptable in principle for residential development. However, a key issue is potential conflict with adjacent uses. These include the substation site (noise, vibration, overhead lines), sewage works (odours),</i></p>	<p>It is recommended that the Council agrees not to allocate this site (BGALA006) for residential development within the Proposed Local Development Plan. It is recommended that the Council agrees to allocate this site for business and industrial land.</p>

		<ul style="list-style-type: none"> • It is in a sustainable location: highly accessible to Galashiels town centre, bus services and Tweedbank Train Station. • It is a brownfield site and relates well to the existing built up area, with existing residential properties to the west and next to MGALA003, a mixed use development opportunity. • It has very easy access to utilities/ infrastructure. • The site is not at risk of flooding from the River Tweed. • Affordable housing will be provided on part if not all of the site in accordance with Policy HD1. • There are no issues with access to the site. • The site is considered acceptable in principle for residential development. <p>The contributor stresses that it is highly important to allocate housing in the Scottish Borders where there is a strong demand to live and especially on vacant brownfield land within settlement boundaries. (131)</p>	<p><i>railway line (noise/vibration) and an exclusion zone with gas pipeline running within the eastern boundary of the site. A Flood Risk Assessment would be required by SEPA. There is moderate biodiversity risk. Assessment and mitigation of impact on SAC required. Capacity of the site would depend upon the wayleaves required for OH powerlines and this may take out parts of the site. Environmentally there are few limits although existing trees within the site on the south and near eastern side should be retained to provide setting and minimise impacts on River Tweed adjoining. A Transport Assessment would be required. Contamination would require to be investigated and mitigated. It is considered that for the aforesaid conflicts, this is not a desirable location for residential development.'</i></p> <p>For the aforesaid reasons, the site should not be included within the Proposed LDP for housing. The site is, however, considered to be appropriate for business and industrial development.</p>	
Galashiels	General	A significant investment in Borders Railway has taken place yet apparently there is no significant land to allocate or left to develop in Galashiels. Is this not an incredible oversight and lack of long term planning that should have been highlighted	Disagree. Whilst finding land in the railway corridor is challenging, the Proposed LDP takes forward a number of allocated sites around the town including recent new	No action required.

		before locating the railway in Galashiels? (80, 233, 271, 227)	allocations for housing/business at Lowood and housing at Netherbarns.	
Gattonside	AGATT013 (Gattonside Meadow/ Castlefield)	<p>The contributor seeks to include housing land at Gattonside Mains as an alternative option. The contributor contends that the proposal will meet the aims and objectives of the development plan by:</p> <ul style="list-style-type: none"> • Ensuring sufficient new housing land is available allowing for a phased approach to the release of housing land; • Meeting the economic prosperity and environmental quality strategic objectives; • Locating development which minimises the number and length of car journeys by providing new homes adjacent to a transport corridor; • The contribution to the strategy and policies of the Development Plan and other national and local policy objectives; • Delivering a proposal within a 5 year timeframe, or within such timeframe that it helps reduce the pressure on the planning authority to deliver it's already allocated sites; • The provision of choice across the housing market area; • The design, quality and density of development that can be achieved; • The proposal will not have a significant adverse effect on any natural or built heritage interests or any national or international environmental designations; • The proposal can support the existing services in the village; • The proposals can contribute to the facilitation of improved facilities in the village 	<p>The site (AGATT013) was previously considered at the 'Pre MIR' stage and was not included within the MIR. The site assessment concluded the following:</p> <p><i>'The site was identified as constrained in the Development and Landscape Capacity Study for the following reasons: development across the undulating slopes is constrained by the more complex topography and often steep slopes which would require earthworks; the area is highly open and relatively exposed because of the broadly convex curvature of the hill flank; the slopes are very visible, particularly from the south and the Eildon Hills, from where they contribute to the scenic quality of the National Scenic Area; the fields are a valuable agricultural resource. There are also considerable access issues to be addressed and resolved.</i></p> <p><i>It should also be noted that this site formed part of the 2006 Local Plan Inquiry and the Local Development Plan 2016 Examination for 150 units. The Reporter of the LDP Examination agreed with the</i></p>	It is recommended that the Council agrees not to allocate this site (AGATT013) within the Proposed Local Development Plan.

		<p>and in neighbouring villages; and</p> <ul style="list-style-type: none"> • There are no other significant environmental dis-benefits or risks, for example flooding. <p>There is a clear requirement for the Local Development Plan to identify further housing land supply in the Central Borders Housing Market Area, and within the area identified as rest of central housing market area. Allocation of the subject site will help to meet the 5 year housing land supply shortfall. Accordingly, it is requested that the site should be included in the list of allocated sites within the LDP. (176)</p>	<p><i>findings of the previous Reporter who noted that, "in view of its elevated position and slope, development would be prominent when viewed from the immediate vicinity and in more distant views from the south, including the Eildon Hills. Development of this greenfield site would also have an adverse effect on the rural setting of this part of Gattonside. I am not satisfied that development at a low density would satisfactorily resolve those matters. That is a consideration to which I must attach great weight given the likely impact on the Eildon and Leaderfoot National Scenic Area". This position remains unchanged and therefore it is not considered appropriate to allocate this site for housing.</i></p> <p><i>The site is located within the CAT policy area which aims to ensure the high quality living environment is protected and to prevent piecemeal development, which would detract from the area's environment. The scale of the development within this elevated and prominent position would not adhere to the requirements of the CAT policy.</i></p> <p><i>The issues raised by the Council's Roads Planning Team appear to be insurmountable given the land requirements are outwith the</i></p>	
--	--	---	---	--

			<p><i>ownership of the applicant.'</i></p> <p>For the aforesaid reasons, the site should not be included within the Proposed LDP for residential development.</p>	
Gattonside	SBGAT002 (Development Boundary Amendment)	<p>Contributor objects that the site is not currently within the development boundary of Gattonside. The existing development boundary follows the west side of the existing Fauhope driveway running roughly north to south, before returning west and then north around the north west most section of Fauhope House's garden boundary.</p> <p>The land adjacent to the site is under a Tree Preservation Order. The proposed site has a few small fruit trees remaining centrally and has some larger hardwoods around the boundary edge. The contributor is of the view that the centre of the site would lend itself to the development of a single dwelling without impacting on any of the mature trees or the surrounding environment.</p> <p>The proposed site, whilst separate and classed as countryside around town, would probably be of unique new-build design but would still assimilate with the Monkswood development to its south and west because of the layout relationship and its position to the west of the existing Fauhope House driveway. Whilst the proposed site would be accessed from the driveway serving Fauhope House, the connectivity and grouping of the proposed site with the existing Monkswood site would not be lost because of this. It is the driveway that forms the separation of any future or existing development or building group. Land previously within the garden bounds of Fauhope</p>	<p>The settlement boundary amendment assessment concluded the following:</p> <p>The proposed development boundary amendment was submitted as part of the MIR Consultation stage. The site forms part of the garden ground associated with Fauhope House, which lies to the east of the site. The land owner indicates within their submission that the site would lend itself to the development of a single house. Goatbrae Plantation lies to the north and there is extensive tree planting to the north east of this site, which forms a backdrop to the existing recent housing at Monkswood.</p> <p>An amendment to the village Development Boundary to the west of SBGAT002 was considered for the LDP 2016 (SBGAT001). This was considered to be a natural infill of the then existing Development Boundary between allocated housing land and a tree belt on the eastern side. It was considered the previous amendment in the LDP</p>	It is recommended that the Council agrees not to amend the settlement boundary of Gattonside at this location within the Proposed Local Development Plan.

		<p>(west of the driveway) has now been developed and is part of the Monkswood site and whilst it is accessed from the Monkswood site, the contributor sees no reason why the proposed site could not be adopted on the same principle given the relationship of the site. This potentially would require the existing development boundary to be moved to the east side of the Fauhope driveway so that access is taken from within the development boundary. Moving the development boundary to the east side of the driveway does not risk further development other than that proposed above.</p> <p>Gattonside has adequate zoned land at St Aidans but it is not clear whether this will be developed in the short term. Zoned land which isn't developed in the short to medium term does not achieve the Scottish Government or Scottish Borders Council targets for new housing. The proposed site above is deliverable, small scale and has minimum impact on its surrounds and should be supported. (316)</p>	<p>2016 was an appropriate edge to this part of Gattonside.</p> <p>This proposed amendment to the development boundary would effectively break into the existing garden ground association with Fauhope House, leaving the existing house outwith the development boundary and part of the garden ground within the development boundary. The amendment would extend the existing settlement boundary beyond existing mature trees which currently form an appropriate edge to the village. The current development boundary follows the line of the garden ground and is considered to reflect the existing development line. There are a number of constraints, which are outlined below;</p> <ul style="list-style-type: none"> - Site is located within MOD safeguarded area; - Moderate biodiversity risk, given the broad leaved woodland; - Potential for bat roosts, badger and breeding birds; - Compensatory planting would be required for the loss of any trees; - Located within the CAT policy area; - Site is located within the National Scenic Area, 'Eildon and Leaderfoot'; and - Site must allow links from houses 	
--	--	--	---	--

			<p>to the south and west of the site, to the path network on the east of the site.</p> <p>Although the proposal is for a development boundary amendment, the site is currently garden ground associated with Fauhope House, therefore this would allow proposals to essentially be assessed against the infill policy (Policy PMD5: Infill Development). The land owner has made it clear within their submission that the intention is for a single house within this site. It is not considered appropriate to expand a development boundary merely in order to provide infill opportunities within the settlement itself, without a formal allocation. Furthermore, it is not the purpose of the Local Development Plan to identify and allocate single plots for development, only sites with a capacity of five or more units will be allocated.</p> <p>It is not considered that there is any reasoning why part of the garden ground associated with Fauhope House should be included within the development boundary, other than the fact that it would allow the site to be assessed against Policy PMD5 for a single house.</p> <p>In conclusion, taking the above into</p>	
--	--	--	---	--

			consideration, the development boundary amendment will not be included within the Proposed Plan.	
Hawick	AHAWI027 (Burnfoot Phase 1)	SEPA note that there appears to be a marsh/wetland at the southern end of the site which should be protected/enhanced. Historic maps show a watercourse flowing through the middle of the site which may now be culverted. SEPA require a Flood Risk Assessment which assesses the risk from this culverted watercourse. Buildings must not be constructed over an existing drain (including a field drain) that is to remain active. Review of the surface water 1 in 200 year flood map shows that there may be flooding issues at this site. This should be investigated further and it is recommended that contact is made with the flood prevention officer. Due to the steepness of the adjacent hill slopes, SEPA would also recommend that consideration is given to surface water runoff to ensure the site is not at risk of flooding and nearby development and infrastructure are not at increased risk of flooding. The site has a potential surface water hazard and water environment considerations. (119)	<p>The site (AHAWI027) was previously considered at the 'Pre MIR' stage and was included within the MIR. The site assessment concluded the following:</p> <p><i>'This site is currently identified as having longer term housing potential in the LDP. Although the site sits outwith the Hawick LDP boundary it is effectively encircled by the town on all sides, including to the north-east of the site, which is allocated for employment use.</i></p> <p><i>The site's relationship with Hawick is acceptable, but careful consideration of the NE boundary and connectivity and boundary treatment between the sites is required. Accessibility within the town, and to neighbouring towns is good.</i></p> <p><i>In landscape terms, the site is acceptable but not all will be developable. Protection of views and attention to the site's boundary to the NE will be required. Up to half the site could need to be given over to landscaping or SUDS, or lost due to being steeply sloping ground on the periphery of the site. Although the LDP longer term site</i></p>	It is recommended that the Council agrees to allocate this site (AHAWI027) within the Proposed Local Development Plan and agrees to incorporate the site requirements highlighted by SEPA.

			<p><i>has a capacity of 100 units this does not account for these constraints. In practice the site capacity is around 60 units.</i></p> <p><i>A Flood Risk Assessment is required in order to assess the risk from a watercourse which is understood to run through the site and may be culverted. Consideration should be given to the potential for surface water runoff in the south of the site, as per SEPA's 1 in 200 year surface water flood risk mapping.</i></p> <p><i>There are no significant biodiversity issues, but mitigation for protected species would be required and may be necessary. There is potential for on-site play provision. Archaeology evaluation/mitigation required.</i></p> <p><i>In summary, there are no constraints to development and the site should be included within the MIR.'</i></p> <p>It is recommended that the Council agrees to allocate this site within the Proposed Local Development Plan. The comments made by SEPA in respect of the need for a Flood Risk Assessment and potential issues relating to surface water hazard and water environment considerations have been added as site</p>

--	--	--	---	--

			<ul style="list-style-type: none"> • Comments noted. • Comments noted. • This sites is an extremely small element of agricultural land across the Scottish Borders and is considered to offer an appropriate location for development given its proximity to existing development within the area. <p>It is recommended that the Council agrees to allocate this site within the Proposed Local Development Plan.</p>	
Hawick	AHAWI027 (Burnfoot – Phase 1)	The Southern Uplands Partnership note that at least one site identified for development (Hawick) includes "wetland". This would suggest that such areas are likely to be of at least some ecological value and therefore worthy of careful survey before decisions are made. Such wet ground is unlikely to be ideal for development. (196)	Comments noted. The Council's Ecology Officer, Scottish Natural Heritage and the Scottish Environment Protection Agency have been consulted and have raised no objections to the development of this site in principle. The site is considered to have low impact risk upon biodiversity. A site requirement notes the need to enhance the biodiversity value of the site through the creation of restoration of habitats and wildlife corridors and should take cognisance of the sloping nature of the site. Furthermore, an assessment of ecology impacts and the provision of mitigation would be required, as appropriate.	It is recommended that the Council agrees to allocate this site (AHAWI027) within the Proposed Local Development Plan.
Hawick	AHAWI027 (Burnfoot – Phase 1)	SNH welcome the intention to prepare a site development brief for this proposed allocation. As recommended for BHAWI004, SNH consider that	Comments noted. It might be that the Planning Briefs for both sites can be prepared in tandem, taking	It is recommended that the Council agrees to allocate

		<p>a co-ordination between sites will be needed in order to maximise benefits for placemaking and landscape mitigation/ green infrastructure connections. Close attention should be paid to the settlement edge and to maintaining key views and the character of the approach to Hawick on the A7. Site requirements should include:</p> <ul style="list-style-type: none"> • Green infrastructure connections through the site, including links to housing at Burnfoot and the existing path network to the east of Burnhead Road. • Establish SUDS as part of green network in south-western corner of the site. • Close attention should be paid to the existing settlement edge and to maintaining key views from the A7 and the B6359. (213) 	account of the settlement edge and key views at this location.	this site (AHAWI027) within the Proposed Local Development Plan.
Hawick	AHAWI027 (Burnfoot – Phase 1)	<p>Selkirk and District Community Council is of the view that this is a very open, highly visible/overlooked area and the local environment needs to be protected and enhanced in this particular ‘gateway’ location. However, this comment applies to all such proposals which introduce development at prominent sites or at the approaches to existing settlements. (305)</p>	<p>Comments noted. The site assessment concluded the following in respect of landscape/visual impact:</p> <p><i>‘The site’s relationship with Hawick is acceptable, but careful consideration of that NE boundary and connectivity and boundary treatment between the sites is required. Accessibility within the town, and to neighbouring towns is good.</i></p> <p><i>In landscape terms, the site is acceptable but not all will be developable. Protection of views and attention to the site’s boundary to the NE will be required. Up to half the site could need to be given</i></p>	It is recommended that the Council agrees to allocate this site (AHAWI027) within the Proposed Local Development Plan.

			<p><i>over to landscaping or SUDS, or lost due to being steeply sloping ground on the periphery of the site. Although the LDP longer term site has a capacity of 100 units this does not account for these constraints. In practice the site capacity is around 60 units.'</i></p>	
Melrose	AMELR008 (Land at Dingleton Mains)	<p>The contributor proposes that this site is effective and can be delivered within the short term for the following reasons:</p> <ul style="list-style-type: none"> • Melrose is located within the Central Borders Strategic Development Area (SDA) which is one of the four SDAs that SESplan states that development will be focused on within the Midlothian / Borders Sub Regional Area, and which is further articulated within the emerging SDP. Policy 5 Housing Land articulates that the Development Plan shall maintain a sufficient supply of housing land throughout the Plan period. • The site is 3.2 hectares and is located adjacent to the site allocation of EM4B within the Scottish Borders Local Development Plan 2016. The Dingleton Mains site forms an appropriate extension of this site (known as The Croft which was formerly allocated for 50 units) and offers the opportunity to meet the Council's original aspiration for 50 new homes in the area. The site can be considered to be a logical extension to the settlement boundary of Melrose. • The site is well contained by roads and existing landscape. The topography of the site allows for development that would not significantly impact upon the surrounding 	<p>The site (AMELR008) was previously considered at the 'Pre MIR' stage and was not included within the MIR. The site assessment concluded the following:</p> <p><i>'This site was the subject of an objection at the 2006 Local Plan Inquiry and was considered as part of the Local Plan Amendment process. The site is identified as constrained within the Landscape Capacity Study (March 2007). The Reporters assessment at the Inquiry was that the site should not be developed because it would have an adverse impact on the National Scenic Area. This site is unacceptable because the site would have an adverse impact on the landscape of the National Scenic Area and the setting of the settlement.</i></p> <p><i>The site is located within the CAT policy area which aims to ensure the high quality living environment is protected and to prevent piecemeal</i></p>	<p>It is recommended that the Council agrees not to allocate this site (AMELR008) within the Proposed Local Development Plan.</p>

		<p>landscape and would not be readily visible from Dingleton Road. The site is not dissimilar to The Croft site.</p> <ul style="list-style-type: none"> The site is in close proximity to Melrose and offers convenient and sustainable access to local services. The site represents an opportunity for modest expansion of Melrose within clearly defensible boundaries. <p>It is therefore submitted that the site should be allocated for residential development within the forthcoming Scottish Borders LDP2. (177)</p>	<p><i>development, which would detract from the area's environment. The scale of the development at this location would not adhere to the requirements of the CAT policy.'</i></p> <p>It is recommended that the Council agrees not to allocate this site within the Proposed Local Development Plan.</p>	
Melrose	AMELR012 (Bleachfield)	<p>The contributor contends that the site should be allocated for 40 houses and a care home within the LDP2 for the following reasons:</p> <ul style="list-style-type: none"> It is deliverable in full within the Local Development Plan lifespan. It is not within an area of Flood Risk. It is in a sustainable location highly accessible to Melrose town centre, bus services and Tweedbank Train Station. It is next to current built form and thus easy access to utilities/infrastructure and a natural low lying extension. It will in no way lead to urban coalescence with Darnick. A clear defensible boundary will be provided around the site and beyond this adequate greenfield spacing will remain. It will not have a significant visual impact due to its low lying nature and neighbouring built form sitting at a higher level. There is no allocation within this area of Melrose despite it being in high demand for new homes. <p>The contributor stresses the importance of allocating housing in the Scottish Borders where there is a strong demand to live and notes there is</p>	<p>The site (AMELR012) was previously considered at the 'Pre MIR' stage and was not included within the MIR. The site assessment concluded the following:</p> <p><i>'The site is located within one of the most sensitive parts of the CAT policy area, where coalescence between Darnick and Melrose is of key concern. The proposal cannot be considered further due to the unacceptable harm to the distinct identities of these settlements the proposed development would result in. Furthermore, development at this location would have a detrimental impact upon the setting and sense of arrival to Melrose; an unacceptable impact upon the Eildon and Leaderfoot National Scenic Area; a detrimental impact upon the character of the Melrose Conservation Area; and a potential adverse impact upon the special</i></p>	<p>It is recommended that the Council agrees not to allocate this site (AMELR012) within the Proposed Local Development Plan.</p>

		a clear demand for homes in Melrose. (130)	<p><i>qualities of the Eildon & Leaderfoot Hills NSA. In summary, it is not considered that this site is acceptable for development.'</i></p> <p>It is recommended that the Council agrees not to allocate this site within the Proposed Local Development Plan.</p>	
Melrose	AMELR013 (Harmony Hall Gardens)	<p>The contributor considers this would represent the loss of a valued community resource and attractive open space within the town. The contributor considers it is difficult to believe that developers could deliver housing without significant loss of trees and damage to the southern stone wall, even if (only) building five houses. Buildings higher than single storey would indeed need to be excluded or would be intrusive on the setting of Harmony Hall as seen from the road that runs in front of Melrose Abbey. The proposed house numbers would only make a small contribution in the town of Melrose, where there are unbuilt allocations on the Dingleton site (EM32B) and other potential brownfield sites in Melrose, currently owned by a local developer at West Grove and Priorwood House. (60)</p>	<p>The site (AMELR013) was identified within the Main Issues Report as an 'alternative' option. The site assessment concluded the following:</p> <p>There are clearly sensitive issues which require to be addressed such as the location of the site within the Conservation Area and its proximity to listed buildings. The eastern third of the site is within the Melrose Abbey Scheduled Monument Area and would be excluded from development. Furthermore, archaeological remains are likely within the remainder of the site which would require investigation. It is likely an acceptable access on the western part of the site could be formed with minimal disturbance to the existing walls. It is considered that the development of this sensitive site would be acceptable in principle subject to the following:</p> <ul style="list-style-type: none"> • A Flood Risk Assessment is required which should take 	<p>It is recommended that the Council agrees to allocate this site (AMELR013) within the Proposed Local Development Plan.</p>

			<p>cognisance of a mill lade which previously flowed along the northern boundary and the River Tweed.</p> <ul style="list-style-type: none">• Retain and protect the existing boundary features and trees, where possible• Assessment of ecology impacts and provision of mitigation, as appropriate• Mitigation required to ensure no significant adverse effects upon integrity of River Tweed Special Area of Conservation• Archaeological assessment (including archaeological evaluation) is required, with any associated mitigation as identified• Development must respect the setting of the Scheduled Monument. No development within the Melrose Abbey Scheduled Monument (SM90124) would be permitted• The design and layout of the site should take account of the Conservation Area, the setting of the Scheduled Monuments and trees on/adjacent to the site• Access to the site should be in a location which results in the least disruption to the existing stone wall along the southern boundary of the site. A Transport Statement would be required• Existing trees/hedging within and	
--	--	--	---	--

			<p>on the boundaries of the site must be retained and protected</p> <ul style="list-style-type: none"> In order to safeguard the character of the Conservation Area and adjacent listed buildings, dwellinghouses should be restricted to single storey. 	
Melrose	AMELR013 (Harmony Hall Gardens)	Melrose and District Community Council are less supportive (in comparison to their support for ADARN005) for this site, the main concerns being loss of greenspace and road safety on St. Mary's Road. (82)	See above.	It is recommended that the Council agrees to allocate this site (AMELR013) within the Proposed Local Development Plan.
Melrose	AMELR013 (Harmony Hall Gardens)	SEPA note that a Flood Risk Assessment is required and that there are water environment considerations. (119)	Comments noted. It is recommended that the following is added as a new bullet point to the site requirements: 'The site has water environment considerations'.	It is recommended that the Council agrees to add the following site requirement attached to (AMELR013) to read as follows: 'The site has water environment considerations'
Melrose	AMELR013 (Harmony Hall Gardens)	Historic Environment Scotland (HES) advise that the development of this site, which is partially within partially within SM90124 Melrose Abbey, has the potential for significant negative effects on the historic environment. In view of this, HES welcome that this is an alternative, rather than a preferred, option. However, HES consider that the proposed site requirements should be sufficient to mitigate the potential negative effects on the scheduled monument, and its setting, to an acceptable level for their statutory interests. In the event that this option is carried forward to the	Comments noted. It is recommended that the following is added to the sixth site requirement: 'Early engagement with Historic Environment Scotland is required'.	It is recommended that the Council agrees to allocate this site (AMELR013) within the Proposed Local Development Plan and that the following is added to the sixth site requirement: ' Early engagement with

		Proposed Plan, HES would expect early engagement on any detailed proposals for this site. (164)		Historic Environment Scotland is required'.
