

LIST OF POLICIES

16/00015/RREF: Erection of 3 dwellinghouses (in principle) at Bonjedward

PMD2: Quality Standards

Policy PMD2: Quality Standards

All new development will be expected to be of high quality in accordance with sustainability principles, designed to fit with Scottish Borders townscapes and to integrate with its landscape surroundings. The standards which will apply to all development are that:

Sustainability

- a) In terms of layout, orientation, construction and energy supply, the developer has demonstrated that appropriate measures have been taken to maximise the efficient use of energy and resources, including the use of renewable energy and resources such as District Heating Schemes and the incorporation of sustainable construction techniques in accordance with supplementary planning guidance,
- b) it provides digital connectivity and associated infrastructure,
- c) it provides for Sustainable Urban Drainage Systems in the context of overall provision of Green Infrastructure where appropriate and their after-care and maintenance,
- d) it encourages minimal water usage for new developments,
- e) it provides for appropriate internal and external provision for waste storage and presentation with, in all instances, separate provision for waste and recycling and, depending on the location, separate provision for composting facilities,
- f) it incorporates appropriate hard and soft landscape works, including structural or screen planting where necessary, to help integration with its surroundings and the wider environment and to meet open space requirements. In some cases agreements will be required to ensure that landscape works are undertaken at an early stage of development and that appropriate arrangements are put in place for long term landscape/open space maintenance,
- g) it considers, where appropriate, the long term adaptability of buildings and spaces.

Placemaking & Design

- h) It creates developments with a sense of place, based on a clear understanding of the context, designed in sympathy with Scottish Borders architectural styles; this need not exclude appropriate contemporary and/or innovative design,
- i) it is of a scale, massing, height and density appropriate to its surroundings and, where an extension or alteration, appropriate to the existing building,
- j) it is finished externally in materials, the colours and textures of which complement the highest quality of architecture in the locality and, where an extension or alteration, the existing building,
- k) it is compatible with, and respects the character of the surrounding area, neighbouring uses, and neighbouring built form,
- l) it can be satisfactorily accommodated within the site,

- m) it provides appropriate boundary treatments to ensure attractive edges to the development that will help integration with its surroundings,
- n) it incorporates, where appropriate, adequate safety and security measures, in accordance with current guidance on 'designing out crime'.

Accessibility

- o) Street layouts must be designed to properly connect and integrate with existing street patterns and be able to be easily extended in the future where appropriate in order to minimise the need for turning heads and isolated footpaths,
- p) it incorporates, where required, access for those with mobility difficulties,
- q) it ensures there is no adverse impact on road safety, including but not limited to the site access,
- r) it provides for linkages with adjoining built up areas including public transport connections and provision for buses, and new paths and cycleways, linking where possible to the existing path network; Travel Plans will be encouraged to support more sustainable travel patterns,
- s) it incorporates adequate access and turning space for vehicles including those used for waste collection purposes.

Green Space, Open Space & Biodiversity

- t) It provides meaningful open space that wherever possible, links to existing open spaces and that is in accordance with current Council standards pending preparation of an up-to-date open space strategy and local standards. In some cases a developer contribution to wider neighbourhood or settlement provision may be appropriate, supported by appropriate arrangements for maintenance,
- u) it retains physical or natural features or habitats which are important to the amenity or biodiversity of the area or makes provision for adequate mitigation or replacements.

Developers are required to provide design and access statements, design briefs and landscape plans as appropriate.

Key policies to which this policy should be cross-referenced:

This policy is relevant to most policies within the Plan.

The following Supplementary Planning Guidance may be relevant to this policy:

Designing out Crime in the Scottish Borders
Green Space
Landscape and Development
Placemaking and Design
Privacy and Sunlight Guide
Replacement Windows
Use of Timber in Sustainable Construction

The following proposed Supplementary Guidance may be relevant to this policy:

Greenspace
Landscape and Development
Placemaking and Design (incorporating Privacy and Sunlight)
Sustainable Urban Drainage
Use of Timber in Sustainable Construction
Waste Management

PMD4: Development Outwith Development Boundaries

Policy PMD4: Development Outwith Development Boundaries

Where Development Boundaries are defined on Proposals Maps, they indicate the extent to which towns and villages should be allowed to expand during the Local Plan period. Development should be contained within the Development Boundary and proposals for new development outwith this boundary, and not on allocated sites identified on the proposals maps, will normally be refused.

Exceptional approvals may be granted provided strong reasons can be given that:

- a) it is a job-generating development in the countryside that has an economic justification under Policy ED7 or HD2, OR
- b) it is an affordable housing development that can be justified under in terms of Policy HD1, OR
- c) there is a shortfall identified by Scottish Borders Council through the housing land audit with regard to the provision of an effective 5 year housing land supply, OR
- d) it is a development that it is considered would offer significant community benefits that outweigh the need to protect the Development Boundary.

AND the development of the site:

- a) represents a logical extension of the built-up area, and
- b) is of an appropriate scale in relation to the size of the settlement, and
- c) does not prejudice the character, visual cohesion or natural built up edge of the settlement, and
- d) does not cause a significant adverse effect on the landscape setting of the settlement or the natural heritage of the surrounding area.

The decision on whether to grant exceptional approvals will take account of:

- a) any indicators regarding restrictions on, or encouragement of, development in the longer term that may be set out in the settlement profile;
- b) the cumulative effect of any other developments outwith the Development Boundary within the current Local Plan period;
- c) the infrastructure and service capacity of the settlement.

Key policies to which this Policy should be cross-referenced:

Development in the Countryside policies ED7 and HD2
Environmental Promotion and Protection policies particularly EP1-EP5 and EP13.

The following Supplementary Planning Guidance may be relevant to this policy:

Biodiversity
Countryside Around Towns
Landscape and Development
Local Landscape Designations
New Housing in the Borders Countryside
Placemaking and Design

Biodiversity
Countryside Around Towns
Landscape and Development
New Housing in the Borders Countryside
Placemaking and Design
Trees and Development
Wind Energy

HD2: Housing in the Countryside

Policy HD2: Housing in the Countryside

The Council wishes to promote appropriate rural housing development:

- a) in village locations in preference to the open countryside where permission will only be granted in special circumstances on appropriate sites,
- b) associated with existing building groups where this does not adversely affect their character or that of the surrounding area, and
- c) in dispersed communities in the Southern Borders housing market area.

These general principles in addition to the requirement for suitable roads access will be the starting point for the consideration of applications for housing in the countryside, which will be supplemented by Supplementary Planning Guidance / Supplementary Guidance on New Housing in the Borders Countryside and on Placemaking and Design.

(A) Building Groups

Housing of up to a total of 2 additional dwellings or a 30% increase of the building group, whichever is the greater, associated with existing building groups may be approved provided that:

- a) the Council is satisfied that the site is well related to an existing group of at least three houses or building(s) currently in residential use or capable of conversion to residential use. Where conversion is required to establish a cohesive group of at least three houses, no additional housing will be approved until such conversion has been implemented,
- b) the cumulative impact of new development on the character of the building group, and on the landscape and amenity of the surrounding area will be taken into account when determining new applications. Additional development within a building group will be refused if, in conjunction with other developments in the area, it will cause unacceptable adverse impacts,
- c) any consents for new build granted under this part of this policy should not exceed two housing dwellings or a 30% increase in addition to the group during the Plan period. No further development above this threshold will be permitted.

In addition, where a proposal for new development is to be supported, the proposal should be of appropriate in scale, siting, design, access, and materials, and should be sympathetic to the character of the group.

The calculations on building group size are based on the existing number of housing units within the group as at the start of the Local Development Plan period. This will include those units under construction or nearing completion at that point.

(B) Dispersed Buildings Groups

In the Southern Housing Market area there are few building groups comprising 3 houses or more, and a more dispersed pattern is the norm. In this area a lower threshold may be appropriate, particularly where this would result in tangible community, economic or environmental benefits. In these cases the existence of a sense of place will be the primary consideration.

Housing of up to 2 additional dwellings associated with dispersed building groups that meet the above criteria may be approved provided that:

- a) the Council is satisfied that the site lies within a recognised dispersed community in the Southern Borders housing market area,
- b) any consents for new build granted under this part of this policy should not exceed two housing dwellings in addition to the group during the Plan period. No further development above this threshold will be permitted,
- c) the design of housing will be subject to the same considerations as other types of housing in the countryside proposals.

(C) Conversions of Buildings to a House

Development that is a change of use of a building to a house may be acceptable provided that:

- a) the Council is satisfied that the building has architectural or historic merit, is

- capable of conversion and is physically suited for residential use,
- b) the building stands substantially intact (normally at least to wallhead height) and the existing structure requires no significant demolition. A structural survey will be required where in the opinion of the Council it appears that the building may not be capable of conversion, and
 - c) the conversion and any proposed extension or alteration is in keeping with the scale and architectural character of the existing building.

(D) Restoration of Houses

The restoration of a house may also be acceptable provided that the walls of the former residential property stand substantially intact (normally at least to wallhead height). In addition:

- a) the siting and design reflects and respects the historical building pattern and the character of the landscape setting,
- b) any proposed extension or alteration should be in keeping with the scale, form and architectural character of the existing or original building, and
- c) significant alterations to the original character will only be considered where it can be demonstrated that these provide environmental benefits such as a positive contribution to the landscape and/or a more sustainable and energy efficient design.

(E) Replacement Dwellings

The proposed replacement of an existing house may be acceptable provided that:

- a) the siting and design of the new building reflects and respects the historical building pattern and the character of the landscape setting,
- b) the proposal is in keeping with the existing/original building in terms of its scales, extent, form and architectural character,
- c) significant alterations to the original character of the house will only be considered where it can be demonstrated that these provide environmental benefits such as a positive contribution to the landscape and /or a more sustainable and energy efficient design.

(F) Economic Requirement

Housing with a location essential for business needs may be acceptable if the Council is satisfied that:

- a) the housing development is a direct operational requirement of an agricultural, horticultural, forestry or other enterprise which is itself appropriate to the countryside, and it is for a worker predominantly employed in the enterprise and the presence of that worker on-site is essential to the efficient operation of the enterprise. Such development could include businesses that would cause disturbance or loss of amenity if located within an existing settlement, or
- b) it is for use of a person last employed in an agricultural, horticultural, forestry or other enterprise which is itself appropriate to the countryside, and also employed on the unit that is the subject of the application, and the development

- will release another house for continued use by an agricultural, horticultural, forestry or other enterprise which is itself appropriate to the countryside, and
- c) the housing development would help support a business that results in a clear social or environmental benefit to the area, including the retention or provision of employment or the provision of affordable or local needs housing, and
 - d) no appropriate site exists within a building group, and
 - e) there is no suitable existing house or other building capable of conversion for the required residential use.

The applicant and, where different, the landowner, may be required to enter into a Section 75 agreement with the planning authority to tie the proposed house or any existing house to the land and/or business for which it is justified and to restrict the occupancy of the house to a person solely or mainly employed, or last employed, in that specific business, and their dependants. A Business Plan, supported by referees or independent business adjudication, may be required in some cases.

In **ALL** instances in considering proposals relative to each of the policy sections above, there shall be compliance with the Council's Supplementary Planning Guidance where it meets the terms of this policy and development must not negatively impact on landscape and existing communities. The cumulative effect of applications under this policy will be taken into account when determining impact.

Key Policies to which this policy should be cross-referenced:

Policy PMD2 Quality Standards

Policy ED10 Protection of Agricultural Land and Carbon Rich Soils

Policy HD1 Affordable and Special Needs Housing

Policy EP6 Countryside Around Towns

Many of the Plan's environmental policies will be relevant particularly EP4 National Scenic Areas and EP5 Special Landscape Areas.

The following Supplementary Planning Guidance may be relevant to this policy:

Affordable Housing

Biodiversity

Countryside Around Towns

Green Space

Landscape and Development

Local Landscape Designations

New Housing in the Borders Countryside
Placemaking and Design
Use of Timber in Sustainable Construction

HD3: Protection of Residential Amenity

Policy HD3 – Protection of Residential Amenity

Development that is judged to have an adverse impact on the amenity of existing or proposed residential areas will not be permitted. To protect the amenity and character of these areas, any developments will be assessed against:

- a) the principle of the development, including where relevant, any open space that would be lost; and
- b) the details of the development itself particularly in terms of:
 - (i) the scale, form and type of development in terms of its fit within a residential area,
 - (ii) the impact of the proposed development on the existing and surrounding properties particularly in terms of overlooking, loss of privacy and sunlighting provisions. These considerations apply especially in relation to garden ground or ‘backland’ development,
 - (iii) the generation of traffic or noise,
 - (iv) the level of visual impact.

Key policies to which this Policy should be cross-referenced:

Policy PMD2 Quality Standards
Policy PMD5 Infill Development
Policy EP11 Protection of Greenspace
Environmental Promotion and Protection policies EP7-EP10

The following Supplementary Planning Guidance may be relevant to this policy:

Privacy and Sunlight Guide

The following proposed Supplementary Guidance may be relevant to this policy:

Placemaking and Design (incorporating Privacy and Sunlight)

EP7: Listed Buildings

Policy EP7: Listed Buildings

The Council will support development proposals that conserve, protect, and enhance

the character, integrity and setting of Listed Buildings.

Internal or external alterations and extensions to Listed Buildings, or new developments within their curtilage, must meet the following criteria:

- a) be of the highest quality,
- b) respect the original structure in terms of setting, scale, design and materials, whilst not inhibiting contemporary and/or innovative design;
- c) maintain, and should preferably enhance, the special architectural or historic quality of the building;
- d) demonstrate an understanding of the building's significance.

All applications for Listed Building Consent or applications affecting the setting of Listed Buildings will be required to be supported by Design Statements.

New development that adversely affects the setting of a Listed Building will not be permitted.

The demolition of a Listed Building will not be permitted unless there are overriding environmental, economic, social or practical reasons. It must be satisfactorily demonstrated that every effort has been made to continue the present use or to find a suitable new use.

The following Supplementary Planning Guidance may be relevant to this policy:

Replacement Windows

The following proposed Supplementary Guidance may be relevant to this policy:

Archaeology

EP8 Archaeology

Policy EP8: Archaeology

(A) National Archaeological Sites

Development proposals which would destroy or adversely affect the appearance, fabric or setting of Scheduled Ancient Monuments or other nationally important sites will not be permitted unless:

- a) the development offers substantial benefits, including those of a social or economic nature, that clearly outweigh the national value of the site, and
- b) there are no reasonable alternative means of meeting the development need.

(B) Battlefields

The Council may support development proposals within a battlefield on the Inventory of Historic Battlefields Register, or a regionally significant site, that seek to protect, conserve, and/or enhance the landscape characteristics or important features of the battlefield. Proposals will be assessed according to their sensitivity to the battlefield.

(C) Regional or Local Archaeological Assets

Development proposals which will adversely affect an archaeological asset of regional or local significance will only be permitted if it can be demonstrated that the benefits of the proposal will clearly outweigh the heritage value of the asset.

In all of the above cases, where development proposals impact on a Scheduled Ancient Monument, other nationally important sites, or any other archaeological or historical asset, developers may be required to carry out detailed investigations.

Any proposal that will adversely affect a historic environment asset or its appropriate setting must include a mitigation strategy acceptable to the Council.

The following proposed Supplementary Guidance may be relevant to this policy:

Archaeology

Policy EP10: Gardens and Designed Landscapes

The Council will support development that safeguards or enhances the landscape features, character or setting of:

- a) sites listed in the Inventory of Gardens and Designed Landscapes, or
- b) sites included in historic gardens and designed landscapes records.

All development should be carefully sited, be of the highest standards of design using appropriate finishing materials and planting, and be informed by and respectful of the historic landscape structure. Proposals that will result in an unacceptable adverse impact will be refused.

All applications affecting a Garden or Designed Landscape will be required to be supported by a Design Statement.

Key Policies to which this policy should be cross-referenced:

Historic Scotland's Scottish Historic Environment Policy

Managing Change in the Historic Environment guidance note series

EP13: Trees, Woodlands and Hedgerows**Policy EP13: Trees, Woodlands and Hedgerows**

The Council will refuse development that would cause the loss of or serious damage to the woodland resource unless the public benefits of the development clearly outweigh the loss of landscape, ecological, recreational, historical, or shelter value.

Any development that may impact on the woodland resource should:

- a) aim to minimise adverse impacts on the biodiversity value of the woodland resource, including its environmental quality, ecological status and viability; and
- b) ensure appropriate replacement planting, where there is an unavoidable loss of the woodland resource; and
- c) adhere to any planning agreement sought to enhance the woodland resource

IS2: Developer Contributions

Policy IS2: Developer Contributions

Where a site is otherwise acceptable in terms of planning policy, but cannot proceed due to deficiencies in infrastructure and services or to environmental impacts, any or all of which will be created or exacerbated as a result of the development, the Council will require developers to make a full or partial contribution towards the cost of addressing such deficiencies.

Contributions may be required for one or more of the following:

- a) treatment of surface or foul waste water in accordance with the Plan's policies on preferred methods (including SUDS maintenance);
- b) provision of schools, school extensions or associated facilities, all in accordance with current educational capacity estimates and schedule of contributions;
- c) off-site transport infrastructure including new roads or road improvements, Safer Routes to School, road safety measures, public car parking, cycle-ways, bridges and associated studies and other access routes, subsidy to public transport operators; all in accordance with the relevant standards and the provisions of any Travel Plan;
- d) leisure, sport, recreation, play areas and community facilities, either on-site or off-site;

- e) landscape, open space, allotment provision, trees and woodlands, including costs of future management and maintenance;
- f) protection, enhancement and promotion of environmental assets either on-site or off-site, having regard to the Local Biodiversity Action Plan and the Council's Supplementary Planning Guidance on Biodiversity, including compensation for any losses and/or alternative provision;
- g) provision of other facilities and equipment for the satisfactory completion of the development that may include: measures to minimise the risk of crime; provision for the storage, collection and recycling of waste, including communal facilities; provision of street furniture and digital connectivity with associated infrastructure.

Key Policies to which this policy should be cross-referenced:

 Policy PMD5 Infill Development
 Policy HD5 Care and Retirement Homes
 Infrastructure and Standards policies particularly IS4-IS7 and IS9

The following Supplementary Planning Guidance may be relevant to this policy:

Development Contributions

The following proposed Supplementary Guidance may be relevant to this policy:

Development Contributions

IS7: Parking Provision and Standards

Policy IS7 – Parking Provision and Standards

Development proposals should provide for car and cycle parking in accordance with approved standards.

Relaxation of technical standards will be considered where appropriate due to the nature of the development and/or if positive amenity gains can be demonstrated that do not compromise road safety.

In town centres where there appear to be parking difficulties, the Council will consider the desirability of seeking additional public parking provision, in the context of policies to promote the use of sustainable travel modes.
