

LIST OF POLICIES

Local Review Reference: 17/00001/RREF

Planning Application Reference: 16/01425/PPP

Development Proposal: Erection of dwellinghouse,

Location: Land East of Keleden, Ednam

Applicant: Mr & Mrs Brian Soar

POLICY HD3 – PROTECTION OF RESIDENTIAL AMENITY

Development that is judged to have an adverse impact on the amenity of existing or proposed residential areas will not be permitted. To protect the amenity and character of these areas, any developments will be assessed against:

- a) the principle of the development, including where relevant, any open space that would be lost; and
- b) the details of the development itself particularly in terms of:
 - (i) the scale, form and type of development in terms of its fit within a residential area,
 - (ii) the impact of the proposed development on the existing and surrounding properties particularly in terms of overlooking, loss of privacy and sunlighting provisions. These considerations apply especially in relation to garden ground or 'backland' development,
 - (iii) the generation of traffic or noise,
 - (iv) the level of visual impact.

POLICY PMD4: DEVELOPMENT OUTWITH DEVELOPMENT BOUNDARIES

Where Development Boundaries are defined on Proposals Maps, they indicate the extent to which towns and villages should be allowed to expand during the Local Plan period. Development should be contained within the Development Boundary and proposals for new development outwith this boundary, and not on allocated sites identified on the proposals maps, will normally be refused.

Exceptional approvals may be granted provided strong reasons can be given that:

- a) it is a job-generating development in the countryside that has an economic justification under Policy ED7 or HD2, OR
 - b) it is an affordable housing development that can be justified under in terms of Policy HD1,
- OR
- c) there is a shortfall identified by Scottish Borders Council through the housing land audit with regard to the provision of an effective 5 year housing land supply, OR
 - d) it is a development that it is considered would offer significant community benefits that outweigh the need to protect the Development Boundary.

AND the development of the site:

- a) represents a logical extension of the built-up area, and
- b) is of an appropriate scale in relation to the size of the settlement, and
- c) does not prejudice the character, visual cohesion or natural built up edge of the settlement, and
- d) does not cause a significant adverse effect on the landscape setting of the settlement or the natural heritage of the surrounding area.

The decision on whether to grant exceptional approvals will take account of:

- a) any indicators regarding restrictions on, or encouragement of, development in the longer term that may be set out in the settlement profile;
- b) the cumulative effect of any other developments outwith the Development Boundary within the current Local Plan period;
- c) the infrastructure and service capacity of the settlement.

POLICY ED10: PROTECTION OF PRIME QUALITY AGRICULTURAL LAND AND CARBON RICH SOILS

Development, except proposals for renewable energy development, which results in the permanent loss of prime quality agricultural land or significant carbon rich soil reserves, particularly peat, will not be permitted unless:

- a) the site is otherwise allocated within this local plan
- b) the development meets an established need and no other site is available
- c) the development is small scale and directly related to a rural business.

Proposals for renewable energy development, including proposals for wind energy development, will be permitted if they accord with the objectives and requirements of policy ED9 on renewable energy development.

POLICY HD2: HOUSING IN THE COUNTRYSIDE

The Council wishes to promote appropriate rural housing development:

- a) in village locations in preference to the open countryside where permission will only be granted in special circumstances on appropriate sites,
- b) associated with existing building groups where this does not adversely affect their character or that of the surrounding area, and
- c) in dispersed communities in the Southern Borders housing market area.

These general principles in addition to the requirement for suitable roads access will be the starting point for the consideration of applications for housing in the countryside, which will be supplemented by Supplementary Planning Guidance / Supplementary Guidance on New Housing in the Borders Countryside and on Placemaking and Design.

(A) BUILDING GROUPS

Housing of up to a total of 2 additional dwellings or a 30% increase of the building group, whichever is the greater, associated with existing building groups may be approved provided that:

- a) the Council is satisfied that the site is well related to an existing group of at least three houses or building(s) currently in residential use or capable of conversion to residential use. Where conversion is required to establish a cohesive group of at least three houses, no additional housing will be approved until such conversion has been implemented,
- b) the cumulative impact of new development on the character of the building group, and on the landscape and amenity of the surrounding area will be taken into account when determining new applications. Additional development within a building group will be refused if, in conjunction with other developments in the area, it will cause unacceptable adverse impacts,
- c) any consents for new build granted under this part of this policy should not exceed two housing dwellings or a 30% increase in addition to the group during the Plan period. No further development above this threshold will be permitted.

In addition, where a proposal for new development is to be supported, the proposal should be appropriate in scale, siting, design, access, and materials, and should be sympathetic to the character of the group.

The calculations on building group size are based on the existing number of housing units within the group as at the start of the Local Development Plan period. This will include those units under construction or nearing completion at that point.

(B) DISPERSED BUILDINGS GROUPS

In the Southern Housing Market area there are few building groups comprising 3 houses or more, and a more dispersed pattern is the norm. In this area a lower threshold may be appropriate, particularly where this would result in tangible community, economic or environmental benefits. In these cases the existence of a sense of place will be the primary consideration.

Housing of up to 2 additional dwellings associated with dispersed building groups that meet the above criteria may be approved provided that:

- a) the Council is satisfied that the site lies within a recognised dispersed community in the Southern Borders housing market area,
- b) any consents for new build granted under this part of this policy should not exceed two housing dwellings in addition to the group during the Plan period. No further development above this threshold will be permitted,
- c) the design of housing will be subject to the same considerations as other types of housing in the countryside proposals.

(C) CONVERSIONS OF BUILDINGS TO A HOUSE

Development that is a change of use of a building to a house may be acceptable provided that:

- a) the Council is satisfied that the building has architectural or historic merit, is capable of conversion and is physically suited for residential use,
- b) the building stands substantially intact (normally at least to wallhead height) and the existing structure requires no significant demolition. A structural survey will be required where in the opinion of the Council it appears that the building may not be capable of conversion, and
- c) the conversion and any proposed extension or alteration is in keeping with the scale and architectural character of the existing building.

(D) RESTORATION OF HOUSES

The restoration of a house may also be acceptable provided that the walls of the former residential property stand substantially intact (normally at least to wallhead height). In addition:

- a) the siting and design reflects and respects the historical building pattern and the character of the landscape setting,
- b) any proposed extension or alteration should be in keeping with the scale, form and architectural character of the existing or original building, and
- c) significant alterations to the original character will only be considered where it can be demonstrated that these provide environmental benefits such as a positive contribution to the landscape and/or a more sustainable and energy efficient design.

(E) REPLACEMENT DWELLINGS

The proposed replacement of an existing house may be acceptable provided that:

- a) the siting and design of the new building reflects and respects the historical building pattern and the character of the landscape setting,
- b) the proposal is in keeping with the existing/original building in terms of its scale, extent, form and architectural character,
- c) significant alterations to the original character of the house will only be considered where it can be demonstrated that these provide environmental benefits such as a positive contribution to the landscape and /or a more sustainable and energy efficient design.

(F) ECONOMIC REQUIREMENT

Housing with a location essential for business needs may be acceptable if the Council is satisfied that:

- a) the housing development is a direct operational requirement of an agricultural, horticultural, forestry or other enterprise which is itself appropriate to the countryside, and it is for a worker predominantly employed in the enterprise and the presence of that worker on-site is essential to the efficient operation of the enterprise. Such development could include businesses that would cause disturbance or loss of amenity if located within an existing settlement, or
- b) it is for use of a person last employed in an agricultural, horticultural, forestry or other enterprise which is itself appropriate to the countryside, and also employed on the unit that is the subject of the application, and the development will release another house for continued use by an agricultural, horticultural, forestry or other enterprise which is itself appropriate to the countryside, and
- c) the housing development would help support a business that results in a clear social or environmental benefit to the area, including the retention or provision of employment or the provision of affordable or local needs housing, and
- d) no appropriate site exists within a building group, and
- e) there is no suitable existing house or other building capable of conversion for the required residential use.

In ALL instances in considering proposals relative to each of the policy sections above, there shall be compliance with the Council's Supplementary Planning Guidance where it meets the terms of this policy and development must not negatively impact on landscape and existing communities. The cumulative effect of applications under this policy will be taken into account when determining impact.

POLICY IS2: DEVELOPER CONTRIBUTIONS

Where a site is otherwise acceptable in terms of planning policy, but cannot proceed due to deficiencies in infrastructure and services or to environmental impacts, any or all of which will be created or exacerbated as a result of the development, the Council will require developers to make a full or partial contribution towards the cost of addressing such deficiencies.

Contributions may be required for one or more of the following:

- a) treatment of surface or foul waste water in accordance with the Plan's policies on preferred methods (including SUDS maintenance);

- b) provision of schools, school extensions or associated facilities, all in accordance with current educational capacity estimates and schedule of contributions;
- c) off-site transport infrastructure including new roads or road improvements, Safer Routes to School, road safety measures, public car parking, cycle-ways, bridges and associated studies and other access routes, subsidy to public transport operators; all in accordance with the relevant standards and the provisions of any Travel Plan;
- d) leisure, sport, recreation, play areas and community facilities, either on-site or off-site;
- e) landscape, open space, allotment provision, trees and woodlands, including costs of future management and maintenance;
- f) protection, enhancement and promotion of environmental assets either on-site or off-site, having regard to the Local Biodiversity Action Plan and the Council's Supplementary Planning Guidance on Biodiversity, including compensation for any losses and/or alternative provision;
- g) provision of other facilities and equipment for the satisfactory completion of the development that may include: measures to minimise the risk of crime; provision for the storage, collection and recycling of waste, including communal facilities; provision of street furniture and digital connectivity with associated infrastructure.

Wherever possible, any requirement to provide developer contributions will be secured by planning condition. Where a legal agreement is necessary, the preference for using an agreement under other legislation, for example the 1973 Local Government (Scotland) Act and the 1984 Roads (Scotland) Act will be considered. A planning obligation will only be necessary where successors in title need to be bound by its terms. Where appropriate, the council will consider the economic viability of a proposed development, including possible payment options, such as staged or phased payments.

POLICY IS5: PROTECTION OF ACCESS ROUTES

Development that would have an adverse impact upon an access route available to the public will not be permitted unless a suitable diversion or appropriate alternative route, as agreed by the Council, can be provided by the developer.

POLICY IS7: PARKING PROVISION AND STANDARDS

Development proposals should provide for car and cycle parking in accordance with approved standards.

Relaxation of technical standards will be considered where appropriate due to the nature of the development and/or if positive amenity gains can be demonstrated that do not compromise road safety.

In town centres where there appear to be parking difficulties, the Council will consider the desirability of seeking additional public parking provision, in the context of policies to promote the use of sustainable travel modes.
