

Local Review Body – List of Policies

Local Review Reference: 19/00020/RREF

Planning Application Reference: 18/01654/FUL

Development Proposal: Erection of dwellinghouse

Location: Land North-East of The Rest, Murrayfield, St Abbs

Applicant: Mr & Mrs Peter Gibson

Scottish Borders Local Development Plan 2016

POLICY PMD1: SUSTAINABILITY

In determining planning applications and preparing development briefs, the Council will have regard to the following sustainability principles which underpin all the Plan's policies and which developers will be expected to incorporate into their developments:

- a) the long term sustainable use and management of land
- b) the preservation of air and water quality
- c) the protection of natural resources, landscapes, habitats, and species
- d) the protection of built and cultural resources
- e) the efficient use of energy and resources, particularly non-renewable resources
- f) the minimisation of waste, including waste water and encouragement to its sustainable management
- g) the encouragement of walking, cycling, and public transport in preference to the private car
- h) the minimisation of light pollution
- i) the protection of public health and safety
- j) the support to community services and facilities
- k) the provision of new jobs and support to the local economy
- l) the involvement of the local community in the design, management and improvement of their environment

POLICY PMD2: QUALITY STANDARDS

All new development will be expected to be of high quality in accordance with sustainability principles, designed to fit with Scottish Borders townscapes and to integrate with its landscape surroundings. The standards which will apply to all development are that:

Sustainability

- a) In terms of layout, orientation, construction and energy supply, the developer has demonstrated that appropriate measures have been taken to maximise the efficient use of energy and resources, including the use of renewable energy and resources such as District Heating Schemes and the incorporation of sustainable construction techniques in accordance with supplementary planning guidance. Planning applications must demonstrate that the current carbon dioxide emissions reduction target has been met, with at least half of this target met through the use of low or zero carbon technology,
- b) it provides digital connectivity and associated infrastructure,
- c) it provides for Sustainable Urban Drainage Systems in the context of overall provision of Green Infrastructure where appropriate and their after-care and maintenance,
- d) it encourages minimal water usage for new developments,
- e) it provides for appropriate internal and external provision for waste storage and presentation with, in all instances, separate provision for waste and recycling and, depending on the location, separate provision for composting facilities,
- f) it incorporates appropriate hard and soft landscape works, including structural or screen planting where necessary, to help integration with its surroundings and the

Local Review Body – List of Policies

wider environment and to meet open space requirements. In some cases agreements will be required to ensure that landscape works are undertaken at an early stage of development and that appropriate arrangements are put in place for long term landscape/open space maintenance,

- g) it considers, where appropriate, the long term adaptability of buildings and spaces.

Placemaking & Design

- h) It creates developments with a sense of place, based on a clear understanding of the context, designed in sympathy with Scottish Borders architectural styles; this need not exclude appropriate contemporary and/or innovative design,
- i) it is of a scale, massing, height and density appropriate to its surroundings and, where an extension or alteration, appropriate to the existing building,
- j) it is finished externally in materials, the colours and textures of which complement the highest quality of architecture in the locality and, where an extension or alteration, the existing building,
- k) it is compatible with, and respects the character of the surrounding area, neighbouring uses, and neighbouring built form,
- l) it can be satisfactorily accommodated within the site,
- m) it provides appropriate boundary treatments to ensure attractive edges to the development that will help integration with its surroundings,
- n) it incorporates, where appropriate, adequate safety and security measures, in accordance with current guidance on 'designing out crime'.

Accessibility

- o) Street layouts must be designed to properly connect and integrate with existing street patterns and be able to be easily extended in the future where appropriate in order to minimise the need for turning heads and isolated footpaths,
- p) it incorporates, where required, access for those with mobility difficulties,
- q) it ensures there is no adverse impact on road safety, including but not limited to the site access,
- r) it provides for linkages with adjoining built up areas including public transport connections and provision for buses, and new paths and cycleways, linking where possible to the existing path network; Travel Plans will be encouraged to support more sustainable travel patterns,
- s) it incorporates adequate access and turning space for vehicles including those used for waste collection purposes.

Greenspace, Open Space & Biodiversity

- t) It provides meaningful open space that wherever possible, links to existing open spaces and that is in accordance with current Council standards pending preparation of an up-to-date open space strategy and local standards. In some cases a developer contribution to wider neighbourhood or settlement provision may be appropriate, supported by appropriate arrangements for maintenance,
- u) it retains physical or natural features or habitats which are important to the amenity or biodiversity of the area or makes provision for adequate mitigation or replacements.

Developers are required to provide design and access statements, design briefs and landscape plans as appropriate.

POLICY PMD5: INFILL DEVELOPMENT

Development on non-allocated, infill or windfall, sites, including the re-use of buildings within Development Boundaries as shown on proposal maps will be approved where the following criteria are satisfied:

- a) where relevant, it does not conflict with the established land use of the area; and

Local Review Body – List of Policies

- b) it does not detract from the character and amenity of the surrounding area; and
- c) the individual and cumulative effects of the development can be sustained by the social and economic infrastructure and it does not lead to over-development or ‘town and village cramming’; and
- d) it respects the scale, form, design, materials and density in context of its surroundings; and
- e) adequate access and servicing can be achieved, particularly taking account of water and drainage and schools capacity; and
- f) it does not result in any significant loss of daylight, sunlight or privacy to adjoining properties as a result of overshadowing or overlooking.

All applications will be considered against the Council’s Supplementary Planning Guidance on Placemaking and Design. Developers are required to provide design statements as appropriate.

POLICY HD3 : PROTECTION OF RESIDENTIAL AMENITY

Development that is judged to have an adverse impact on the amenity of existing or proposed residential areas will not be permitted. To protect the amenity and character of these areas, any developments will be assessed against:

- a) the principle of the development, including where relevant, any open space that would be lost; and
- b) the details of the development itself particularly in terms of:
 - (i) the scale, form and type of development in terms of its fit within a residential area,
 - (ii) the impact of the proposed development on the existing and surrounding properties particularly in terms of overlooking, loss of privacy and sunlighting provisions. These considerations apply especially in relation to garden ground or ‘backland’ development,
 - (iii) the generation of traffic or noise,
 - (iv) the level of visual impact.

POLICY EP1: INTERNATIONAL NATURE CONSERVATION SITES AND PROTECTED SPECIES

Development proposals which will have a likely significant effect on a designated or proposed Natura site, which includes all Ramsar sites, are only permissible where:

- a) an appropriate assessment has demonstrated that it will not adversely affect the integrity of the site, or
- b) there are no alternative solutions, and
- c) there are imperative reasons of overriding public interest including those of a social or economic nature

Where a development proposal is sited where there is the likely presence of an EPS, the planning authority must be satisfied that:

- a) there is no satisfactory alternative, and
- b) the development is required for preserving public health or public safety or for other imperative reasons of overriding public interest including those of a social or economic nature and beneficial consequences of primary importance to the environment, and
- c) the development is not detrimental to the maintenance of the population of a EPS at a favourable conservation status in its natural range.

POLICY EP2: NATIONAL NATURE CONSERVATION AND PROTECTED SPECIES

Local Review Body – List of Policies

Development proposals which are likely to have a significant adverse effect, either directly or indirectly, on a Site of Special Scientific Interest or habitat directly supporting a nationally important species will not be permitted unless:

- a) the development will not adversely affect the integrity of the site, and
- b) the development offers substantial benefits of national importance, including those of a social or economic nature, that clearly outweigh the national nature conservation value of the site.

The developer will be required to detail mitigation, either on or off site, of any damage that may be caused by development permissible under the exception criteria.

POLICY EP3: LOCAL BIODIVERSITY

Development that would have an unacceptable adverse effect on Borders Notable Species and Habitats of Conservation Concern will be refused unless it can be demonstrated that the public benefits of the development clearly outweigh the value of the habitat for biodiversity conservation.

Any development that could impact on local biodiversity through impacts on habitats and species should:

- a) aim to avoid fragmentation or isolation of habitats; and
- b) be sited and designed to minimise adverse impacts on the biodiversity of the site, including its environmental quality, ecological status and viability; and
- c) compensate to ensure no net loss of biodiversity through use of biodiversity offsets as appropriate; and
- d) aim to enhance the biodiversity value of the site, through use of an ecosystems approach, with the aim of creation or restoration of habitats and wildlife corridors and provision for their long-term management and maintenance.

POLICY EP5: SPECIAL LANDSCAPE AREAS

In assessing proposals for development that may affect Special Landscape Areas, the Council will seek to safeguard landscape quality and will have particular regard to the landscape impact of the proposed development, including the visual impact. Proposals that have a significant adverse impact will only be permitted where the landscape impact is clearly outweighed by social or economic benefits of national or local importance.

POLICY EP7: LISTED BUILDINGS

The Council will support development proposals that conserve, protect, and enhance the character, integrity and setting of Listed Buildings.

Internal or external alterations and extensions to Listed Buildings, or new developments within their curtilage, must meet the following criteria:

- a) be of the highest quality,
- b) respect the original structure in terms of setting, scale, design and materials, whilst not inhibiting contemporary and/or innovative design;
- c) maintain, and should preferably enhance, the special architectural or historic quality of the building;
- d) demonstrate an understanding of the building's significance.

All applications for Listed Building Consent or applications affecting the setting of Listed Buildings will be required to be supported by Design Statements.

Local Review Body – List of Policies

New development that adversely affects the setting of a Listed Building will not be permitted.

The demolition of a Listed Building will not be permitted unless there are overriding environmental, economic, social or practical reasons. It must be satisfactorily demonstrated that every effort has been made to continue the present use or to find a suitable new use.

POLICY EP8: ARCHAEOLOGY

(A) NATIONAL ARCHAEOLOGICAL SITES

Development proposals which would destroy or adversely affect the appearance, fabric or setting of Scheduled Monuments or other nationally important sites will not be permitted unless:

- a) the development offers substantial benefits, including those of a social or economic nature, that clearly outweigh the national value of the site, and
- b) there are no reasonable alternative means of meeting the development need.

(B) BATTLEFIELDS

The Council may support development proposals within a battlefield on the Inventory of Historic Battlefields Register, or a regionally significant site, that seek to protect, conserve, and/or enhance the landscape characteristics or important features of the battlefield. Proposals will be assessed according to their sensitivity to the battlefield.

(C) REGIONAL OR LOCAL ARCHAEOLOGICAL ASSETS

Development proposals which will adversely affect an archaeological asset of regional or local significance will only be permitted if it can be demonstrated that the benefits of the proposal will clearly outweigh the heritage value of the asset.

In all of the above cases, where development proposals impact on a Scheduled Monument, other nationally important sites, or any other archaeological or historical asset, developers may be required to carry out detailed investigations.

Any proposal that will adversely affect a historic environment asset or its appropriate setting must include a mitigation strategy acceptable to the Council.

POLICY EP9: CONSERVATION AREAS

The Council will support development proposals within or adjacent to a Conservation Area which are located and designed to preserve or enhance the special architectural or historic character and appearance of the Conservation Area. This should accord with the scale, proportions, alignment, density, materials, and boundary treatment of nearby buildings, open spaces, vistas, gardens and landscapes.

The Council may require applications for full, as opposed to Planning Permission in Principle Consent.

Conservation Area Consent, which is required for the demolition of an unlisted building within a Conservation Area, will only be considered in the context of appropriate proposals for redevelopment and will only be permitted where:

- a) the building is incapable of reasonably beneficial use by virtue of its location, physical form or state of disrepair, and
- b) the structural condition of the building is such that it can not be adapted to accommodate alterations or extensions without material loss to its character, and

Local Review Body – List of Policies

c) the proposal will preserve or enhance the Conservation Area, either individually or as part of the townscape.

In cases a) to c) above, demolition will not be permitted to proceed until acceptable alternative treatment of the site has been approved and a contract for the replacement building or for an alternative means of treating the cleared site has been agreed.

Design Statements will be required for all applications for alterations, extensions, or for demolition and replacement which should explain and illustrate the design principles and design concepts of the proposals.

POLICY EP11: PROTECTION OF GREENSPACE

(A) KEY GREENSPACES

Key Greenspaces as identified on Proposal Maps will be protected from development that will result in their loss. Development that protects and enhances the quality of Key Greenspaces will be supported.

(B) OTHER GREENSPACES

Greenspace within the Development Boundary of settlements will be protected from development where this can be justified by reference to any of the following:

- a) the environmental, social or economic value of the greenspace;
- b) the role that the greenspace plays in defining the landscape and townscape structure and identity of the settlement;
- c) the function that the greenspace serves.

In both cases development that would result in the loss of greenspace, including outdoor sports facilities, will only be permitted if it can be satisfactorily demonstrated that, based on consultation with user groups and advice from relevant agencies:

- d) there is social, economic and community justification for the loss of the open space;
- or
- e) the need for the development is judged to outweigh the need to retain the open space; and
- f) where appropriate, comparable open space or enhancement of existing open space may be provided and/or paid for by the developer at an alternative location within or immediately adjacent to the settlement where this will provide adequate and acceptable replacement for the open space lost as a result of the development. In some cases, recreational provision in the form of indoor sports facilities may be a suitable alternative provided it is equally accessible and is judged to compensate fully for the loss of the open space resource.

Development that would result in the loss of functional open space where a quantifiable demand can be demonstrated must in addition be justified by reference to:

- g) the levels of existing provision and predicted requirements for the settlement;
- h) the extent to which current or predicted future demand can be met on a reduced area.

POLICY EP13: TREES, WOODLANDS AND HEDGEROWS

The Council will refuse development that would cause the loss of or serious damage to the woodland resource unless the public benefits of the development clearly outweigh the loss of landscape, ecological, recreational, historical, or shelter value.

Local Review Body – List of Policies

Any development that may impact on the woodland resource should:

- a) aim to minimise adverse impacts on the biodiversity value of the woodland resource, including its environmental quality, ecological status and viability; and
- b) where there is an unavoidable loss of the woodland resource, ensure appropriate replacement planting, where possible, within the area of the Scottish Borders; and
- c) adhere to any planning agreement sought to enhance the woodland resource.

POLICY EP14: COASTLINE

Development proposals at a coastal location will only be permitted where:

- a) the proposal is located within the Burnmouth, Eyemouth and St Abbs settlement boundary; or
- b) the proposal is appropriate under Local Development Plan policies; or
- c) the development requires a coastal location; and
- d) the benefits of the proposal clearly outweigh any damage to the landscape character or to the nature conservation value of the site as assessed under other relevant Local Development Plan policies.

POLICY IS2: DEVELOPER CONTRIBUTIONS

Where a site is otherwise acceptable in terms of planning policy, but cannot proceed due to deficiencies in infrastructure and services or to environmental impacts, any or all of which will be created or exacerbated as a result of the development, the Council will require developers to make a full or partial contribution towards the cost of addressing such deficiencies.

Contributions may be required for one or more of the following:

- a) treatment of surface or foul waste water in accordance with the Plan's policies on preferred methods (including SUDS maintenance);
- b) provision of schools, school extensions or associated facilities, all in accordance with current educational capacity estimates and schedule of contributions;
- c) off-site transport infrastructure including new roads or road improvements, Safer Routes to School, road safety measures, public car parking, cycle-ways, bridges and associated studies and other access routes, subsidy to public transport operators; all in accordance with the relevant standards and the provisions of any Travel Plan;
- d) leisure, sport, recreation, play areas and community facilities, either on-site or off-site;
- e) landscape, open space, allotment provision, trees and woodlands, including costs of future management and maintenance;
- f) protection, enhancement and promotion of environmental assets either on-site or off-site, having regard to the Local Biodiversity Action Plan and the Council's Supplementary Planning Guidance on Biodiversity, including compensation for any losses and/or alternative provision;
- g) provision of other facilities and equipment for the satisfactory completion of the development that may include: measures to minimise the risk of crime; provision for the storage, collection and recycling of waste, including communal facilities; provision of street furniture and digital connectivity with associated infrastructure.

Wherever possible, any requirement to provide developer contributions will be secured by planning condition. Where a legal agreement is necessary, the preference for using an agreement under other legislation, for example the 1973 Local Government (Scotland) Act

Local Review Body – List of Policies

and the 1984 Roads (Scotland) Act will be considered. A planning obligation will only be necessary where successors in title need to be bound by its terms. Where appropriate, the council will consider the economic viability of a proposed development, including possible payment options, such as staged or phased payments.

POLICY IS5: PROTECTION OF ACCESS ROUTES

Development that would have an adverse impact upon an access route available to the public will not be permitted unless a suitable diversion or appropriate alternative route, as agreed by the Council, can be provided by the developer.

POLICY IS7: PARKING PROVISION AND STANDARDS

Development proposals should provide for car and cycle parking in accordance with approved standards.

Relaxation of technical standards will be considered where appropriate due to the nature of the development and/or if positive amenity gains can be demonstrated that do not compromise road safety.

In town centres where there appear to be parking difficulties, the Council will consider the desirability of seeking additional public parking provision, in the context of policies to promote the use of sustainable travel modes.

POLICY IS9: WASTE WATER TREATMENT STANDARDS AND SUSTAINABLE URBAN DRAINAGE

WASTE WATER TREATMENT STANDARDS

The Council's preferred method of dealing with waste water associated with new development will be, in order of priority:

- a) direct connection to the public sewerage system, including pumping if necessary, or failing that:
- b) negotiating developer contributions with Scottish Water to upgrade the existing sewerage network and/or increasing capacity at the waste water treatment works, or failing that:
- c) agreement with Scottish Water and SEPA where required to provide permanent or temporary alternatives to sewer connection including the possibility of stand alone treatment plants until sewer capacity becomes available, or, failing that:
- d) for development in the countryside i.e. not within or immediately adjacent to publicly sewered areas, the use of private sewerage treatment may be acceptable, providing it can be demonstrated that this can be delivered without any negative impacts to public health, the environment or the quality of watercourses or groundwater.

In settlements served by the public foul sewer, permission for an individual private sewage treatment system will normally be refused unless exceptional circumstances prevail and the conditions in criteria (d) above can be satisfied.

Development will be refused if:

- a) it will result in a proliferation of individual septic tanks or other private water treatment infrastructure within settlements,
- b) it will overload existing mains infrastructure or it is impractical for the developer to provide for new infrastructure.

SUSTAINABLE URBAN DRAINAGE

Local Review Body – List of Policies

Surface water management for new development, for both greenfield and brownfield sites, must comply with current best practice on sustainable urban drainage systems to the satisfaction of the council, Scottish Environment Protection Agency (where required), Scottish Natural Heritage and other interested parties where required. Development will be refused unless surface water treatment is dealt with in a sustainable manner that avoids flooding, pollution, extensive canalisation and culverting of watercourses. A drainage strategy should be submitted with planning applications to include treatment and flood attenuation measures and details for the long term maintenance of any necessary features.

POLICY IS13 CONTAMINATED LAND

Where development is proposed on land that is contaminated, suspected of contamination, or unstable the developer will be required to:

- a) carry out, in full consultation with, and to the satisfaction of Scottish Borders Council, appropriate phased site investigations and risk assessments; and
- b) where necessary, and to the satisfaction of Scottish Borders Council design, implement, and validate appropriate remedial or mitigation measures to render the site suitable for its proposed use.
