Nicky Berry, Director of Nursing, Midwifery & Acute Services

Introduction

This document forms the Scottish Borders Health and Social Care Partnership overarching Winter Plan. The overall aim of the planning process is to ensure that the partnership prepares effectively for winter pressures so as to continue to deliver high quality care, as well as national and local targets.

A winter debrief event was held on 30th April 2019. The learning from last winter has been invaluable in shaping the Winter Plan for 2019/20 as well as its early planning and execution.

The delivery of the Winter Plan in the Scottish Borders is overseen by an Integrated Winter Planning Board, co-chaired by the Chief Officer for Health and Social Care and the Director of Nursing, Midwifery & Acute Services. The Board reports to both the Health Board and the Council, with regular updates to the Integrated Joint Board.

As with the plan for the Winter 2019/20, this year's plan is very much a joint plan across the Council, NHS and the IJB. With all services directed to reduce admissions, speed up hospital processes, reduce any delay in discharge and support care in the community to prevent a re-admission to acute.

Review of 2018/19

Analysis of data from previous years, along with the application of predictors, supported the development of a whole system bed model to meet the winter demand. Trajectories along with daily and weekly monitoring processes allowed the system to make early informed decisions. This had significant impact on our system and enabled us to protect the Medical Assessment and Surgical/Gynaecology Assessment areas on the whole. On the few occasions they were used, they were recovered quickly.

The review of last winter confirmed the effectiveness in last year's winter plan. NHS Borders achieved significantly better compliance with the 4 Hour Emergency Access Standard compared with the winter of 2017/18. There was a statistically significant reduction in the number of patients with a length of stay of over 28 days this winter compared with last winter.

The step-down facilities at Garden View, and Waverley Care home coupled with the introduction of Hospital to Home services further supported patient flow and reduced delayed discharges.

Development of improved patient pathways increased whole system capacity and capability through winter which has continued all year round to meet the needs of the local population.

The 2018/19 winter plan incorporated the decision to cancel non urgent and non cancer related elective surgery for the month of January 2019, creating additional capacity for orthopaedic trauma patients. This will form part of this year's winter plan.

The BGH General Medicine winter ward model will be created again this year to ensure sufficient inpatient acute hospital capacity is in place. Process changes developed last year to protect GP assessment areas will also form part of this year's plan.

The BGH Escalation policy was reviewed and updated prior to last winter. This supported improved patient flow and safety across the site. This policy is currently under review ahead of this winter to incorporate learning from last winter.

Summary of Winter Plan for 2019/20

Clinical engagement and integrated working has been at the heart of this year's winter planning process. The 2019/20 Winter Plan aims to achieve the following objectives:

- Weekend discharges will be increased to smooth flow across the seven days
- Capacity will be increased across Health & Social Care to meet increased demand
- Patient flow will be improved throughout the system
- Care will be enhanced in the community and fewer patients will be delayed
- Services will be safer
- Staff wellbeing will improve

The delivery of safe and effective care for people requiring the health and social care will be measured through delivery of:

- Emergency Access Standard
- Local and National Waiting Times Targets
 - Treatment Time Guarantee
 - 18 Weeks Referral to Treatment
 - Stage of Treatment
 - Cancer Waiting Times
 - Stroke Standards
- Number of delayed discharges
- Bed occupancy compared to target of 85%
- Maintained boarding levels

The plan seeks to ensure capacity is allocated appropriately to meet demand. Access to alternative care settings when acute care criteria is no longer met is a key focus for this year's plan. The planned extension of intermediate care in the community and development of community Health & Social Care Multi-Disciplinary Teams are critical components of the '19/20 Winter Plan. The new BGH Frailty model and seven day Margaret Kerr Hub both planned to open in January are innovative new developments within this year's plan that should help ensure more patients receive care in the right environment.

There is an ambition to protect the elective programme and this will be balanced against expected periods of high demand, only reducing elective admissions from the end of

December 2019 until end January 2020. A full day case elective programme will run throughout the winter season.

Appendix 1 provides the high-level activities that will contribute to creating the capacity within the whole system to meet local need during winter.

Financial Plan

Committed to delivering safe effective patient flow during 2019/20 winter, the total winter allocation has been enhanced locally by £0.8m from NHS Borders with a further 0.1m from the Scottish Government. The Council, through the IJB, continues to support the resource required for Garden View and Waverley step down facilities, collectively approximately £500k over the winter period. In addition the Social Work team based within the hospital has increased capacity aimed at reducing delays.

Below are the high level details of areas of additional capacity:

- Borders Emergency Care Service – increased staffing at weekends
- Increase ED staffing (medical and nursing)
- Staffing for surge capacity
- Weekend medical cover
- AHP staffing – extend
- Weekend pharmacy cover
- Weekend domestic and portering
- Contingency plan – additional surge

The Integration Joint Board has also approved funding of £1.4m for the continuation and expansion of the following Discharge Programme services until March 2020. These services will support the delivery of the Winter Plan by preventing admissions, reducing the length of people's stay in hospital and ensuring people are cared for in the most appropriate setting:

- Garden View - providing 15 step down beds
- Waverley Care Home - providing 16 step down and rehabilitation beds
- Hospital to Home - expanding rehabilitation and support in patient's homes to all localities.
- Matching Unit - ensuring care packages are matched with patient need in a timely manner

Weekend and Earlier in the Day Discharge

In addition to enhanced resource being allocated to weekends, there is also focussed improvement support to achieve earlier in the day discharge and an increase in weekend discharge. The well-established BGH Site and Capacity Team will work beside the weekend hospital social work team for the first time this year to ensure a joined up

approach to maintained flow into the community out of hours. Trajectories for weekend discharge rates, earlier discharge and average length of stay are in place and will be monitored weekly.

Reducing Delays

Waverley will continue to provide step down rehabilitation capacity with 16 beds open through the winter period. Garden View will operate 15 beds throughout winter to reduce patients delayed in the BGH and Community Hospitals. The START team and Matching Unit will continue to facilitate care in the community and timely discharge. A Discharge Hub model will be tested in partnership between NHS Borders and the START team through winter aiming to reduce the length of stay for patients discharge out of hospital to care. A new AWI policy will be released in early January that aims to improve flow for this patient group.

Admission Avoidance

Hospital to Home service now covers the whole of the Scottish Borders and will continue to provide a prevention of admission service and support discharge from the acute hospital. The increase in Allied Healthcare Professionals across all of the Scottish Borders will enable a Discharge to Assess model that is expected to be a critical component of this year's plan.

A Pulmonary Rehabilitation Programme is in the final stages of implementation with the aim to have the programme fully implemented by January 2020.

Scottish Borders Council and NHS Borders are working to develop an anticipatory care planning pack which will include the ReSPECT document (the emergency care and treatment summary) for Care Homes.

We aim to provide all patients discharged from the Acute hospital to 24 hour care (Community Hospitals, Care Homes and some sheltered accommodation) with a completed ReSPECT form.

We also provide familiarisation training and support to undertake the ReSPECT process with current residents. Of the 24 Care Homes in the Scottish Borders, around 17 are using the forms. In some of the Care Homes, the process is GP led and in others, it is MDT led including the Care Home staff.

Primary Care

The new GP Contract introduced in 2018 and agreed by Scottish Government and the BMA has at its core the requirement for the development and implementation of a Primary Care Improvement Plan (PCIP) the aim of which is to empower GPs to function as an expert medical generalists and to enable them to focus on undifferentiated presentations, complex care, quality and leadership as well as supporting them to engage more easily in strategic and planning processes. This refocusing of the GP role will require some tasks currently

carried out by GPs to be carried out by members of a wider primary care multi-disciplinary team – where it is safe, appropriate, and improves patient care.

The development of the PCIP is being taken forward through partnership working across the GP Sub Committee, the Health & Social Care Partnership and NHS Borders. The PCIP has 6 key priority areas which over a three year period will see the development of new roles and posts which will support the GPs to refocus as described above and will help to broaden the capacity of primary care. The six priorities in the PCIP are:

- Vaccination Services;
- Pharmacotherapy Services;
- Community Treatment and Care Services;
- Urgent Care Services;
- Additional Professional Roles (First Contact Physiotherapy Services, Community Mental Health Services);
- Community Link Worker Services.

Measurement and Monitoring

A project management approach is being applied to ensure full implementation of the winter plan to ensure risks are highlighted allowing mitigation plans to be put in place. The Whole System activity datasets developed last year will be used again this year to assess any fluctuations in how the system is managing so that timely action can be taken when patient flows slow.

Progress against the overall programme will be monitored through the Winter Planning Board, chaired by the Chief Officer on a bi-weekly basis.

Resilience

Business Continuity Plans are in place and a testing schedule developed.

Norovirus & Seasonal Flu

NHS Borders now conducts on-site Norovirus testing which reduces the turnaround time for test results. This supports improved infection control decision making which reduces risk of cross transmission and reduces unnecessary bed closures. Test results are entered into the Laboratory Information System and ICNet Infection Control software.

NHS Borders Laboratories have capability to conduct on-site flu testing in small numbers to support decision making and patient flow at peak times when there is excessive demand for single rooms.

Appendix 1

High Level Winter Plan 2019/20	September					October				November				December			
	W/C 2 nd	W/C 9 th	W/C 16 th	w/c 23 rd	w/c 30 th	W/C 7 th	W/C 14 th	W/C 21 st	w/c 28 th	W/C 4 th	W/C 11 th	w/c 18 th	w/c 25 th	W/C 2 nd	W/C 9 th	W/C 16 th	W/C 23 rd
Admission Avoidance																	
Creation of Frailty Model at Front Door																	
Hospital to Home Prevention of Admission Pilot in Central Borders																	
Emergency Department																	
Allocate capacity (medical and nurse staffing) to meet demand																	
Increase Rapid Assessment and Discharge to 7 day service																	
Reduce delays																	
Expand Garden View criteria to reduce delays																	
Maintain Garden View at 15 beds																	
Maintain Waverley at 16 beds																	
Release new AWI policy																	
Test Discharge Hub model																	
Enhance Hospital to Home																	
Implement Robust Discharge to Assess Service																	
Reduced Length of Stay - Acute																	
Increased medical cover at weekends and for surge capacity																	
Ensure Pharmacy and Physio access at the right time at weekends																	
Social Work access at weekends																	
Maintain "Hospital at Weekend"																	
Enhance DDD with the inclusion of criteria led discharge																	
Establish SCN Delayed Discharge meetings																	
Develop process for transfer of patients to Community Hospital at Weekends																	
Develop seven day Margaret Kerr Hub																	
Strengthen Health & Social Care locality working																	
Enhance multi-disciplinary decision-making and coordination																	
Patient Flow Management																	
Review Escalation Policy, implementing triggers																	
Develop Discharge Hub and implement STRATA																	
Review Boarding Policy																	
Better links between Site & Capacity Team with START Team at Weekend																	
Increase utilisation of Discharge Lounge																	
Safer Services																	
Protect Acute Assessment Unit																	
Protect Surgical Assessment Unit																	
Infection Control Plan																	
Severe Weather Plan																	
Staff Wellbeing																	
Wellness Wednesdays																	
Flu vaccination plan
