

List of Policies

Local Review Reference: 20/00004/RREF

Planning Application Reference: 19/01784/FUL

Development Proposal: Part change of use from garage/storage and alterations to form workshop and storage for joinery business

Location: Buccleuch Hotel, Trinity Street, Hawick

Applicant: Mr Stephen Cranston

Scottish Borders Local Development Plan 2016

POLICY PMD1: SUSTAINABILITY

In determining planning applications and preparing development briefs, the Council will have regard to the following sustainability principles which underpin all the Plan's policies and which developers will be expected to incorporate into their developments:

- a) the long term sustainable use and management of land
- b) the preservation of air and water quality
- c) the protection of natural resources, landscapes, habitats, and species
- d) the protection of built and cultural resources
- e) the efficient use of energy and resources, particularly non-renewable resources
- f) the minimisation of waste, including waste water and encouragement to its sustainable management
- g) the encouragement of walking, cycling, and public transport in preference to the private car
- h) the minimisation of light pollution
- i) the protection of public health and safety
- j) the support to community services and facilities
- k) the provision of new jobs and support to the local economy
- l) the involvement of the local community in the design, management and improvement of their environment

POLICY PMD2: QUALITY STANDARDS

All new development will be expected to be of high quality in accordance with sustainability principles, designed to fit with Scottish Borders townscapes and to integrate with its landscape surroundings. The standards which will apply to all development are that:

Sustainability

- a) In terms of layout, orientation, construction and energy supply, the developer has demonstrated that appropriate measures have been taken to maximise the efficient use of energy and resources, including the use of renewable energy and resources such as District Heating Schemes and the incorporation of sustainable construction techniques in accordance with supplementary planning guidance. Planning applications must demonstrate that the current carbon dioxide emissions reduction target has been met, with at least half of this target met through the use of low or zero carbon technology,
- b) it provides digital connectivity and associated infrastructure,
- c) it provides for Sustainable Urban Drainage Systems in the context of overall provision of Green Infrastructure where appropriate and their after-care and maintenance,
- d) it encourages minimal water usage for new developments,
- e) it provides for appropriate internal and external provision for waste storage and presentation with, in all instances, separate provision for waste and recycling and, depending on the location, separate provision for composting facilities,

List of Policies

- f) it incorporates appropriate hard and soft landscape works, including structural or screen planting where necessary, to help integration with its surroundings and the wider environment and to meet open space requirements. In some cases agreements will be required to ensure that landscape works are undertaken at an early stage of development and that appropriate arrangements are put in place for long term landscape/open space maintenance,
- g) it considers, where appropriate, the long term adaptability of buildings and spaces.

Placemaking & Design

- h) It creates developments with a sense of place, based on a clear understanding of the context, designed in sympathy with Scottish Borders architectural styles; this need not exclude appropriate contemporary and/or innovative design,
- i) it is of a scale, massing, height and density appropriate to its surroundings and, where an extension or alteration, appropriate to the existing building,
- j) it is finished externally in materials, the colours and textures of which complement the highest quality of architecture in the locality and, where an extension or alteration, the existing building,
- k) it is compatible with, and respects the character of the surrounding area, neighbouring uses, and neighbouring built form,
- l) it can be satisfactorily accommodated within the site,
- m) it provides appropriate boundary treatments to ensure attractive edges to the development that will help integration with its surroundings,
- n) it incorporates, where appropriate, adequate safety and security measures, in accordance with current guidance on 'designing out crime'.

Accessibility

- o) Street layouts must be designed to properly connect and integrate with existing street patterns and be able to be easily extended in the future where appropriate in order to minimise the need for turning heads and isolated footpaths,
- p) it incorporates, where required, access for those with mobility difficulties,
- q) it ensures there is no adverse impact on road safety, including but not limited to the site access,
- r) it provides for linkages with adjoining built up areas including public transport connections and provision for buses, and new paths and cycleways, linking where possible to the existing path network; Travel Plans will be encouraged to support more sustainable travel patterns,
- s) it incorporates adequate access and turning space for vehicles including those used for waste collection purposes.

Greenspace, Open Space & Biodiversity

- t) It provides meaningful open space that wherever possible, links to existing open spaces and that is in accordance with current Council standards pending preparation of an up-to-date open space strategy and local standards. In some cases a developer contribution to wider neighbourhood or settlement provision may be appropriate, supported by appropriate arrangements for maintenance,
- u) it retains physical or natural features or habitats which are important to the amenity or biodiversity of the area or makes provision for adequate mitigation or replacements.

Developers are required to provide design and access statements, design briefs and landscape plans as appropriate.

POLICY PMD5: INFILL DEVELOPMENT

List of Policies

Development on non-allocated, infill or windfall, sites, including the re-use of buildings within Development Boundaries as shown on proposal maps will be approved where the following criteria are satisfied:

- a) where relevant, it does not conflict with the established land use of the area; and
- b) it does not detract from the character and amenity of the surrounding area; and
- c) the individual and cumulative effects of the development can be sustained by the social and economic infrastructure and it does not lead to over-development or 'town and village cramming'; and
- d) it respects the scale, form, design, materials and density in context of its surroundings; and
- e) adequate access and servicing can be achieved, particularly taking account of water and drainage and schools capacity; and
- f) it does not result in any significant loss of daylight, sunlight or privacy to adjoining properties as a result of overshadowing or overlooking.

All applications will be considered against the Council's Supplementary Planning Guidance on Placemaking and Design. Developers are required to provide design statements as appropriate.

POLICY ED2: EMPLOYMENT USES OUTWITH BUSINESS AND INDUSTRIAL AREAS

Within the defined Development Boundary there will be a general presumption against industrial or business uses outwith business and industrial land, mixed use or redevelopment sites (Policies ED1 and PMD3). Any proposal for such a use in such a location will be required to:

- a) justify the need for that location, and
- b) demonstrate significant economic and/or employment benefit, and
- c) demonstrate that it can co-exist satisfactorily with adjoining uses

POLICY ED3: TOWN CENTRES AND SHOPPING DEVELOPMENT

The Council will seek to develop and enhance the role of town centres. A network of centres and growth of the retail sector will be supported through directing development to the following district town centres:

Duns, Eyemouth, Galashiels, Hawick, Jedburgh, Kelso, Melrose, Peebles, Selkirk

To protect town centres, town centre locations will be preferred to edge-of-centre locations which, in turn, will be preferred to out-of-centre locations. An out-of-centre location will only be considered where there is no suitable site available in a town centre or edge-of-centre location.

The council will support a wide range of uses appropriate to a town centre. Proposals for shopping development and other town centre developments will generally be approved within defined district town centres provided that the character, vitality, viability, and mixed use nature of the town centre will be maintained and enhanced. For the avoidance of doubt, the council will apply the preferred order of locations set out above to appropriate uses generating significant footfall, including community and cultural facilities, offices, libraries, and education and healthcare facilities as well as retail and commercial leisure uses. It will also ensure that different uses are developed in the most appropriate locations.

Town centre enhancement, including the provision of new retail facilities and complementary non-retail uses, will be encouraged in centres both within the hierarchy and other centres which:

List of Policies

- a) are council priorities for area regeneration because of special economic difficulties and/or population decline,
- b) are subject to significant retail spending leakage,
- c) play an important role in areas planned for substantial development under the development strategy.

The council will have regard to the following considerations, where relevant, in assessing applications for out of centre development, including retail proposals:

- a) the individual or cumulative impact of the proposed development on the vitality and viability of existing town centres,
- b) the availability of a suitable town centre or edge of centre site,
- c) the ability of the proposal to meet deficiencies in shopping provision which cannot be met in town centre or edge of centre locations,
- d) the impact of the proposal on travel patterns and car usage,
- e) the accessibility of the site by a choice of means of transport,
- f) the preference for commercial centres in the preferred order of locations, including appropriate retail clusters and parks, over other out of centre locations,
- g) the extent to which a proposal would constitute appropriate small scale shopping provision designed to serve the needs of local rural communities,
- h) the location of the proposal. Sites will be located within existing settlements and, within them preference will be given to applications on vacant or derelict sites, or on sites deemed to be surplus to requirements.

The council will encourage the use of town centres during the evening provided residential amenity is protected. Any proposed development which would create an unacceptable adverse impact on the town centre will be refused.

POLICY HD3 : PROTECTION OF RESIDENTIAL AMENITY

Development that is judged to have an adverse impact on the amenity of existing or proposed residential areas will not be permitted. To protect the amenity and character of these areas, any developments will be assessed against:

- a) the principle of the development, including where relevant, any open space that would be lost; and
- b) the details of the development itself particularly in terms of:
 - (i) the scale, form and type of development in terms of its fit within a residential area,
 - (ii) the impact of the proposed development on the existing and surrounding properties particularly in terms of overlooking, loss of privacy and sunlighting provisions. These considerations apply especially in relation to garden ground or 'backland' development,
 - (iii) the generation of traffic or noise,
 - (iv) the level of visual impact.

POLICY EP1: INTERNATIONAL NATURE CONSERVATION SITES AND PROTECTED SPECIES

Development proposals which will have a likely significant effect on a designated or proposed Natura site, which includes all Ramsar sites, are only permissible where:

- a) an appropriate assessment has demonstrated that it will not adversely affect the integrity of the site, or
- b) there are no alternative solutions, and

List of Policies

- c) there are imperative reasons of overriding public interest including those of a social or economic nature

Where a development proposal is sited where there is the likely presence of an EPS, the planning authority must be satisfied that:

- a) there is no satisfactory alternative, and
- b) the development is required for preserving public health or public safety or for other imperative reasons of overriding public interest including those of a social or economic nature and beneficial consequences of primary importance to the environment, and
- c) the development is not detrimental to the maintenance of the population of a EPS at a favourable conservation status in its natural range.

POLICY EP2: NATIONAL NATURE CONSERVATION AND PROTECTED SPECIES

Development proposals which are likely to have a significant adverse effect, either directly or indirectly, on a Site of Special Scientific Interest or habitat directly supporting a nationally important species will not be permitted unless:

- a) the development will not adversely affect the integrity of the site, and
- b) the development offers substantial benefits of national importance, including those of a social or economic nature, that clearly outweigh the national nature conservation value of the site.

The developer will be required to detail mitigation, either on or off site, of any damage that may be caused by development permissible under the exception criteria.

POLICY EP16: AIR QUALITY

Development proposals that, individually or cumulatively, could adversely affect the quality of air in a locality to a level that could potentially harm human health and wellbeing or the integrity of the natural environment, must be accompanied by provisions that the Council is satisfied will minimise such impacts to an acceptable degree. Where it is considered appropriate the Council may request that an Air Quality Assessment is undertaken to assist determination of an application.

POLICY IS1: PUBLIC INFRASTRUCTURE AND LOCAL SERVICE PROVISION

The Council will encourage the retention of and improvements to public infrastructure and local services.

1. Development that might prejudice the future provision of those infrastructure and service improvements identified on the Proposals Maps will not be permitted.
2. Proposals that result in the loss of an existing public facility or local service may be supported if:
 - a) it can be adequately demonstrated that the existing facility or service is financially unviable, and
 - b) it can be demonstrated that all reasonable attempts have been made to sell the facility or service as a "viable concern", and
 - c) it can adequately be demonstrated that the loss of the facility or service will not have an adverse impact on the settlement, and

List of Policies

- d) the proposal will offer significant wider public and community benefits, and
- e) the proposal does not detract from the character and amenity of the surrounding area.

POLICY IS7: PARKING PROVISION AND STANDARDS

Development proposals should provide for car and cycle parking in accordance with approved standards.

Relaxation of technical standards will be considered where appropriate due to the nature of the development and/or if positive amenity gains can be demonstrated that do not compromise road safety.

In town centres where there appear to be parking difficulties, the Council will consider the desirability of seeking additional public parking provision, in the context of policies to promote the use of sustainable travel modes.
