Development Proposal: Erection of decking and balustrade

Location: 12 Todlaw Way, Clovenfords

Applicant: Mr P Smillie

SESPLAN

None applicable.

Consolidated Borders Local Plan 2011:

POLICY G1 - QUALITY STANDARDS FOR NEW DEVELOPMENT

All new development will be expected to be of high quality in accordance with sustainability principles, designed to fit with Scottish Borders townscapes and to integrate with its landscape surroundings. The standards which will apply to all development are that:

1. It is compatible with, and respects the character of the surrounding area, neighbouring uses, and neighbouring built form,
2. it can be satisfactorily accommodated within the site,
3. it retains physical or natural features or habitats which are important to the amenity or biodiversity of the area or makes provision for adequate mitigation or replacements,
4. it creates developments with a sense of place, designed in sympathy with Scottish Borders architectural styles; this need not exclude appropriate contemporary and/or innovative design,
5. in terms of layout, orientation, construction and energy supply, the developer has demonstrated that appropriate measures have been taken to maximise the efficient use of energy and resources, including the use of renewable energy and resources and the incorporation of sustainable construction techniques in accordance with supplementary planning guidance referred to in Appendix D,
6. it incorporates appropriate hard and soft landscape works, including structural or screen planting where necessary, to help integration with its surroundings and the wider environment and to meet open space requirements. In some cases agreements will be required to ensure that landscape works are undertaken at an early stage of development and that appropriate arrangements are put in place for long term landscape/open space maintenance,
7. it provides open space that wherever possible, links to existing open spaces and that is in accordance with current Council standards pending preparation of an up-to-date open space strategy and local standards. In some cases a developer contribution to wider neighbourhood or settlement provision may be appropriate, supported by appropriate arrangements for maintenance,
8. it provides appropriate boundary treatments to ensure attractive edges to the development that will help integration with its surroundings,
9. it provides for linkages with adjoining built up areas including public transport connections and provision for bus laybys, and new paths and cycleways, linking where possible to the existing path network; Green Travel Plans will be encouraged to support more sustainable travel patterns,

10. it provides for Sustainable Urban Drainage Systems where appropriate and their after-care and maintenance,
11. it provides for recycling, re-using and composting waste where appropriate,
12. it is of a scale, massing, height and density appropriate to its surroundings and, where an extension or alteration, appropriate to the existing building,
13. it is finished externally in materials, the colours and textures of which complement the highest quality of architecture in the locality and, where an extension or alteration, the existing building,
14. it incorporates, where required, access for those with mobility difficulties,
15. it incorporates, where appropriate, adequate safety and security measures, in accordance with current guidance on 'designing out crime'.

Developers may be required to provide design statements, design briefs or landscape plans as appropriate.

POLICY H2 – PROTECTION OF RESIDENTIAL AMENITY

Development that is judged to have an adverse impact on the amenity of existing or proposed residential areas will not be permitted. To protect the amenity and character of these areas, any developments will be assessed against:

1. The principle of the development, including where relevant, any open space that would be lost; and
2. The details of the development itself particularly in terms of:
 - (i) the scale, form and type of development in terms of its fit within a residential area,
 - (ii) the impact of the proposed development on the existing and surrounding properties particularly in terms of overlooking and loss of privacy. These considerations apply especially in relation to garden ground or 'backland' development,
 - (iii) the generation of traffic or noise,
 - (iv) the level of visual impact.
