

Greenlaw and Hume Community Council

Secretary Mrs Hazel Paxton

3 Cheviot View, Hume.

greenlawhumecc@outlook.com

4th June 2021.

Dear Sirs,

21/00726/PPP, Erection of dwelling house, Plot 5, Hume Bank, Hume Hall Holdings, Greenlaw.

Thank you for inviting the Community Council to comment on the above planning application.

This application was discussed at our recent meeting. Greenlaw and Hume Community Council wish to object to the planning application due to the following concerns;

- It would break into an undeveloped field which is prime agricultural land, therefore there would be a permanent loss of prime agricultural land.
- It would not relate well to the existing buildings.
- It will be in close proximity to a working farm.
- It does not meet an established need and is not directly related to any rural business.

Yours sincerely

Hazel Paxton

Dear Sir/Madam

SITE: Plot 5 Land South West Of Hume Bank, Hume Hall Holdings, Greenlaw
PLANNING REF: 21/00726/PPP
OUR REF: DSCAS-0039777-5YL
PROPOSAL: Erection of dwellinghouse

Please quote our reference in all future correspondence

Audit of Proposal

Scottish Water has no objection to this planning application; however, the applicant should be aware that this does not confirm that the proposed development can currently be serviced and would advise the following:

Water Capacity Assessment

Scottish Water has carried out a Capacity review and we can confirm the following:

- ▶ There is currently sufficient capacity in the Robertson Water Treatment Works to service your development. However, please note that further investigations may be required to be carried out once a formal application has been submitted to us.

Waste Water Capacity Assessment

- ▶ Unfortunately, according to our records there is no public Scottish Water, Waste Water infrastructure within the vicinity of this proposed development therefore we would advise applicant to investigate private treatment options

SW Public
General

To find out more about connecting your property to the water and waste water supply visit:

>>

So, how are we doing?
We'd love to know what we're doing well or could do better. We promise we're listening. [click here](#) to tell us...

Please Note

- ▶ The applicant should be aware that we are unable to reserve capacity at our water and/or waste water treatment works for their proposed development. Once a formal connection application is submitted to Scottish Water after full planning permission has been granted, we will review the availability of capacity at that time and advise the applicant accordingly.

Surface Water

For reasons of sustainability and to protect our customers from potential future sewer flooding, Scottish Water will not accept any surface water connections into our combined sewer system.

There may be limited exceptional circumstances where we would allow such a connection for brownfield sites only, however this will require significant justification from the customer taking account of various factors including legal, physical, and technical challenges.

In order to avoid costs and delays where a surface water discharge to our combined sewer system is anticipated, the developer should contact Scottish Water at the earliest opportunity with strong evidence to support the intended drainage plan prior to making a connection request. We will assess this evidence in a robust manner and provide a decision that reflects the best option from environmental and customer perspectives.

General notes:

- ▶ Scottish Water asset plans can be obtained from our appointed asset plan providers:
 - ▶ Site Investigation Services (UK) Ltd
 - ▶ Tel: 0333 123 1223
 - ▶ Email: sw@sisplan.co.uk
 - ▶ www.sisplan.co.uk
- ▶ Scottish Water's current minimum level of service for water pressure is 1.0 bar or 10m head at the customer's boundary internal outlet. Any property which cannot be adequately serviced from the available pressure may require private pumping arrangements to be installed, subject to compliance with Water Byelaws. If the developer wishes to enquire about Scottish Water's procedure for checking the water pressure in the area, then they should write to the Customer Connections department at the above address.
- ▶ If the connection to the public sewer and/or water main requires to be laid through land out-with public ownership, the developer must provide evidence of formal approval from the affected landowner(s) by way of a deed of servitude.
- ▶ Scottish Water may only vest new water or waste water infrastructure which is to be laid through land out with public ownership where a Deed of Servitude has been obtained in our favour by the developer.

- ▶ The developer should also be aware that Scottish Water requires land title to the area of land where a pumping station and/or SUDS proposed to vest in Scottish Water is constructed.
- ▶ Please find information on how to submit application to Scottish Water at [our Customer Portal](#).

Next Steps:

▶ All Proposed Developments

All proposed developments require to submit a Pre-Development Enquiry (PDE) Form to be submitted directly to Scottish Water via [our Customer Portal](#) prior to any formal Technical Application being submitted. This will allow us to fully appraise the proposals.

Where it is confirmed through the PDE process that mitigation works are necessary to support a development, the cost of these works is to be met by the developer, which Scottish Water can contribute towards through Reasonable Cost Contribution regulations.

▶ Non Domestic/Commercial Property:

Since the introduction of the Water Services (Scotland) Act 2005 in April 2008 the water industry in Scotland has opened to market competition for non-domestic customers. All Non-domestic Household customers now require a Licensed Provider to act on their behalf for new water and waste water connections. Further details can be obtained at www.scotlandontap.gov.uk

▶ Trade Effluent Discharge from Non Dom Property:

- ▶ Certain discharges from non-domestic premises may constitute a trade effluent in terms of the Sewerage (Scotland) Act 1968. Trade effluent arises from activities including; manufacturing, production and engineering; vehicle, plant and equipment washing, waste and leachate management. It covers both large and small premises, including activities such as car washing and laundrettes. Activities not covered include hotels, caravan sites or restaurants.
- ▶ If you are in any doubt as to whether the discharge from your premises is likely to be trade effluent, please contact us on 0800 778 0778 or email TEQ@scottishwater.co.uk using the subject "Is this Trade Effluent?". Discharges that are deemed to be trade effluent need to apply separately for permission to discharge to the sewerage system. The forms and application guidance notes can be found [here](#).
- ▶ Trade effluent must never be discharged into surface water drainage systems as these are solely for draining rainfall run off.
- ▶ For food services establishments, Scottish Water recommends a suitably sized grease trap is fitted within the food preparation areas, so the

development complies with Standard 3.7 a) of the Building Standards Technical Handbook and for best management and housekeeping practices to be followed which prevent food waste, fat oil and grease from being disposed into sinks and drains.

- ▶ The Waste (Scotland) Regulations which require all non-rural food businesses, producing more than 50kg of food waste per week, to segregate that waste for separate collection. The regulations also ban the use of food waste disposal units that dispose of food waste to the public sewer. Further information can be found at www.resourceefficientscotland.com

I trust the above is acceptable however if you require any further information regarding this matter please contact me on **0800 389 0379** or via the e-mail address below or at planningconsultations@scottishwater.co.uk.

Yours sincerely,

Angela Allison

<i>The following observations represent the comments of the consultee on the submitted application as they relate to the area of expertise of that consultee. A decision on the application can only be made after consideration of all relevant information, consultations and material considerations.</i>				
Background and Site description	This application is effectively the same as the applications submitted and subsequently refused in 2019.			
Key Issues (Bullet points)				
Assessment	<p>I will repeat my observations made on the application submitted in 2019.</p> <p>I have no objection in principle to this proposal. Access to the plot should be by way of a joint service layby with plot 4.</p> <p>The conditions and informative shown below must be included in any consent issued.</p>			
Recommendation	<input type="checkbox"/> Object	<input type="checkbox"/> Do not object	<input checked="" type="checkbox"/> Do not object, subject to conditions	<input type="checkbox"/> Further information required
Recommended Conditions	<p>The access to the site from the public road to be formed to a standard approved by the planning authority prior to occupation of the dwelling. Reason: To ensure appropriate provision for service vehicles.</p> <p>Two parking spaces, excluding any garages, and turning to be provided within the curtilage of the site prior to occupation and retained thereafter in perpetuity. Reason: To ensure the development is served by adequate parking at all times.</p>			
Recommended Informatives	All works within the public road and verge must be carried out by a contractor first approved by the Council.
