REASON FOR DECISION

The design, scale and materials of the shed extension and the means of access are considered acceptable in terms of the existing buildings and location and would comply with development plan policies relating to these matters

SCHEDULE OF CONDITIONS

- 1 The development hereby permitted shall be begun before the expiration of three years from the date of this permission.
Reason: To comply with Section 58 of the Town and Country Planning (Scotland) Act 1997, as amended by the Planning etc. (Scotland) Act 2006.
- 2 The development hereby permitted shall not be carried out otherwise than in complete accordance with the plans and specifications approved by the Planning Authority.
Reason: To ensure that the development is carried out in accordance with the approved details.

FOR THE INFORMATION OF THE APPLICANT

It should be noted that:

Agricultural developments should be located and designed in accordance with The Control of Pollution (Silage, Slurry and Agricultural Fuel Oil) (Scotland) Regulations 2003 (as amended) and the Water Environment (Controlled Activities) (Scotland) Regulations 2005 (as amended). Applicants should be directed to www.sepa.org.uk/land/agriculture/agricultural_regulation.aspx to ensure their development complies with these Regulations. In order to comply with these Regulations it is important to ensure that any surface water associated with yard areas is conserved on the farm for disposal, and any part of any slurry storage system is located at least 50m from any potable water supply and 10m from any surface water or wetland.

Uncontaminated surface water, including roof water, should be disposed of by the use of SUDS in accordance with General Binding Rules 10 and 11 of CAR. These measures could be incorporated through the development of an infiltration system, such as a filter trench or soakaway at the site. You can find further guidance on how to comply with the above Regulations in the Code of good agricultural practice at www.scotland.gov.uk/Resource/Doc/37428/0014235.pdf and in the PEPPAA Code of Good Practice at <http://www.scotland.gov.uk/Publications/2005/03/20613/51366> which provides practical advice on minimising pollution.

N.B: This permission does not include any consent, approval or licence necessary for the proposed development under the building regulations or any other statutory enactment and the development should not be commenced until all consents are obtained.

Notice of Initiation of Development

Section 27 of the Town and Country Planning (Scotland) Act (as amended) requires that any person who has been granted planning permission (including planning permission in principle) and intends to start development must, once they have decided the date they will start work on the development, inform the planning authority of that date as soon as is practicable. A form is enclosed with this decision notice for this purpose.

Notice of Completion of Development

Section 27B requires that any person who completes a development for which planning permission (including planning permission in principle) has been given must, as soon as practicable after doing so, give notice of completion to the planning authority.

When planning permission is granted for phased development then under section 27B(2) the permission is to be granted subject to a condition that as soon as practicable after each phase, other than the last, is completed, the person carrying out the development is to give notice of that completion to the planning authority.

In advance of carrying out any works it is recommended that you contact Utility Bodies whose equipment or apparatus may be affected by any works you undertake. Contacts include:
