Hi

I am writing in regards to this industrial planning being put forward for wood tree cutting etc.

It was refused before and now it's in for an appeal.

I would like to highlight the tourist attraction that will be damaged at the famous walkway there.

The road is very narrow and hardly two vehicles can pass each other safely never mind lorries loaded etc.

There are pedestrians waking and cyclists using the road who will be at danger by the use of large commercial vehicles going up and down.

Then the noise pollution for my self and the neighbours which will affect us adversely.

Lorries making noise and machinery etc. the place will be an eye sore with trees and muck everywhere.

I hope this application does not go any further and my concerns are picked up on.

This project should be in an industrial built area not between houses. Your neighbour should be a house/flats etc for residential use not commercial business and such at this large scale.

Kind Regards  
Atif Adeel
