Development Proposal: Erection of dwellinghouse
Location: Land North east of The Cottage, Lauder Barns, Lauder
Applicant: Angela Fairbairn

SESPLAN 2013:

Policy 5 – Housing Land

The Strategic Development Plan identifies that, for the period from 2009 up to 2024, there is a requirement for sufficient housing land to be allocated so as to enable 107,545 houses to be built across the SESplan area, including on land which is currently committed for housing development. Of that total, the requirement for the period 2009 to 2019 is for 74,835 houses. Supplementary guidance will be prepared to provide detailed further information for Local Development Plans as to how much of that requirement should be met in each of those six areas, both in the period 2009 to 2019 and in the period 2019 to 2024.

The supplementary guidance will be based on an analysis of opportunities and of infrastructure and environmental capacities and constraints, and will be undertaken in consultation with the six constituent planning authorities.

Subject to any justifiable allowance for anticipated house completions from 'windfall' sites, and for demolitions of existing housing stock, Local Development Plans will allocate sufficient land which is capable of becoming effective and delivering the scale of the housing requirements for each period, which will be confirmed in the supplementary guidance. Where appropriate they will indicate the phasing and mix of uses to be permitted on any sites to be allocated for housing development.

Those existing housing sites which are assessed as being constrained, but also capable of delivering housing completions in the period 2024 to 2032, should be safeguarded for future housing development.

Consolidated Scottish Borders Local Plan 2011

POLICY D2 – HOUSING IN THE COUNTRYSIDE

The Council wishes to promote appropriate rural housing development:

1. in village locations in preference to the open countryside,
2. associated with existing building groups where this does not adversely affect their character or that of the surrounding area, and
3. in dispersed communities in the Southern Borders housing market area.

These general principles will be the starting point for the consideration of applications for housing in the countryside which will be supplemented by Supplementary Planning Policy Guidance on siting, design and interpretation.

POLICY D2 (A) BUILDING GROUPS

Housing of up to a total of 2 additional dwellings or a 30% increase of the building group, whichever is the greater, associated with existing building groups may be approved provided that:

1. The Council is satisfied that the site is well related to an existing group of at least three houses or building(s) currently in residential use or capable of conversion to residential use. Where conversion is required to establish a cohesive group of at least three houses, no additional housing will be approved until such conversion has been implemented,
2. Any consents for new build granted under this part of this policy should not exceed two housing dwellings or a 30% increase in addition to the group during the Plan period. No further development above this threshold will be permitted,
3. The cumulative impact of new development on the character of the building group, and on the landscape and amenity of the surrounding area will be taken into account when determining new applications. Additional development within a building group will be refused if, in conjunction with other developments in the area, it will cause unacceptable adverse impacts.

The calculations on building group size are based on the existing number of housing units within the group as at the start of the Local Plan period. This will include those units under construction or nearing completion at that point.

POLICY D2 (B) DISPERSED BUILDING GROUPS

In the Southern Housing Market area there are few building groups comprising 3 houses or more, and a more dispersed pattern is the norm. In this area a lower threshold may be appropriate, particularly where this would result in tangible community, economic or environmental benefits. In these cases the existence of a sense of place will be the primary consideration.

Housing of up to 2 additional dwellings associated with dispersed building groups acting as anchor points may be approved provided that:

1. The Council is satisfied that the site lies within a recognised dispersed community that functions effectively as an anchor point in the Southern Borders housing market area,
2. Any consents for new build granted under this part of this policy should not exceed two housing dwellings in addition to the group during the Plan period. No further development above this threshold will be permitted,
3. The design of housing will be subject to the same considerations as other types of housing in the countryside proposals.

POLICY D2 (C) CONVERSIONS

Development that is a change of use of a building to a house may be acceptable provided that:

1. the Council is satisfied that the building has architectural or historic merit or is physically suited for residential use,

2. the building stands substantially intact (normally at least to wallhead height) and the existing structure requires no significant demolition. A structural survey will be required where in the opinion of the Council it appears that the building may not be capable of conversion, and
3. the conversion and any proposed extension or alteration is in keeping with the scale and architectural character of the existing building.

POLICY D2 (D) REBUILDING

The proposed rebuilding or restoration of a house may be acceptable provided that either:

1. the existing building makes a positive contribution to the landscape,
2. the walls of the former residential property stand substantially intact (normally at least to wallhead height),
3. no significant demolition is required (a structural survey will be required where it is proposed to fully demolish the building, showing that it is incapable of being restored),
4. the restoration/rebuilding and any proposed extension or alteration is in keeping with the scale, form and architectural character of the existing or original building,
5. significant alterations to the original character will only be considered where it can be demonstrated that these provide environmental benefits such as a more sustainable and energy efficient design, or
6. there is evidence of the existence of the building in terms of criteria (a)-(c) immediately above, or, alternatively, sufficient documentary evidence exists relating to the siting and form of the previous house and this evidence is provided to the satisfaction of the Council, and
7. the siting and design of new buildings reflects and respects the historical building pattern and the character of the landscape setting, and
8. the extent of new building does not exceed what is to be replaced.

POLICY D2 (E) ECONOMIC REQUIREMENT

Housing with a location essential for business needs may be acceptable if the Council is satisfied that:

1. the housing development is a direct operational requirement of an agricultural, horticultural, forestry or other enterprise which is itself appropriate to the countryside, and it is for a worker predominantly employed in the enterprise and the presence of that worker on-site is essential to the efficient operation of the enterprise. Such development could include businesses that would cause disturbance or loss of amenity if located within an existing settlement, or
2. it is for use of a person last employed in an agricultural, horticultural, forestry or other enterprise which is itself appropriate to the countryside, and also employed on the unit that is the subject of the application, and the development will release another house for continued use by an agricultural, horticultural, forestry or other enterprise which is itself appropriate to the countryside, and

3. the housing development would help support a business that results in a clear social or environmental benefit to the area, including the retention or provision of employment or the provision of affordable or local needs housing, and
4. no appropriate site exists within a building group, and
5. there is no suitable existing house or other building capable of conversion for the required residential use.

The applicant and, where different, the landowner, may be required to enter into a Section 75 agreement with the planning authority to tie the proposed house or any existing house to the business for which it is justified and to restrict the occupancy of the house to a person solely or mainly employed, or last employed, in that specific business, and their dependants. A Business Plan, supported by referees or independent business adjudication, may be required in some cases.

In **ALL** instances in considering proposals relative to each of the policy sections above, there shall be compliance with the Council's Supplementary Planning Policy Guidance where it meets the terms of this policy and development must not negatively impact on landscape and existing communities. The cumulative effect of applications under this policy will be taken into account when determining impact.

POLICY G1 - QUALITY STANDARDS FOR NEW DEVELOPMENT

All new development will be expected to be of high quality in accordance with sustainability principles, designed to fit with Scottish Borders townscapes and to integrate with its landscape surroundings. The standards which will apply to all development are that:

1. It is compatible with, and respects the character of the surrounding area, neighbouring uses, and neighbouring built form,
2. it can be satisfactorily accommodated within the site,
3. it retains physical or natural features or habitats which are important to the amenity or biodiversity of the area or makes provision for adequate mitigation or replacements,
4. it creates developments with a sense of place, designed in sympathy with Scottish Borders architectural styles; this need not exclude appropriate contemporary and/or innovative design,
5. in terms of layout, orientation, construction and energy supply, the developer has demonstrated that appropriate measures have been taken to maximise the efficient use of energy and resources, including the use of renewable energy and resources and the incorporation of sustainable construction techniques in accordance with supplementary planning guidance referred to in Appendix D,
6. it incorporates appropriate hard and soft landscape works, including structural or screen planting where necessary, to help integration with its surroundings and the wider environment and to meet open space requirements. In some cases agreements will be required to ensure that landscape works are undertaken at an early stage of development and that appropriate arrangements are put in place for long term landscape/open space maintenance,
7. it provides open space that wherever possible, links to existing open spaces and that is in accordance with current Council standards pending preparation of an up-to-date open space strategy and local standards. In some cases a

- developer contribution to wider neighbourhood or settlement provision may be appropriate, supported by appropriate arrangements for maintenance,
8. it provides appropriate boundary treatments to ensure attractive edges to the development that will help integration with its surroundings,
 9. it provides for linkages with adjoining built up areas including public transport connections and provision for bus laybys, and new paths and cycleways, linking where possible to the existing path network; Green Travel Plans will be encouraged to support more sustainable travel patterns,
 10. it provides for Sustainable Urban Drainage Systems where appropriate and their after-care and maintenance,
 11. it provides for recycling, re-using and composting waste where appropriate,
 12. it is of a scale, massing, height and density appropriate to its surroundings and, where an extension or alteration, appropriate to the existing building,
 13. it is finished externally in materials, the colours and textures of which complement the highest quality of architecture in the locality and, where an extension or alteration, the existing building,
 14. it incorporates, where required, access for those with mobility difficulties,
 15. it incorporates, where appropriate, adequate safety and security measures, in accordance with current guidance on 'designing out crime'.

Developers may be required to provide design statements, design briefs or landscape plans as appropriate.

POLICY G5 – DEVELOPER CONTRIBUTIONS

Where a site is otherwise acceptable but cannot proceed due to deficiencies in infrastructure and services or to environmental impacts, any or all of which will be created or exacerbated as a result of the development, the Council will require developers to make a full or part contribution through S.75 or alternative Legal Agreements towards the cost of addressing such deficiencies.

Each application will be assessed to determine the appropriate level of contribution guided by: the requirements identified in the Council's Supplementary Planning Guidance on developer contributions; planning or development briefs; outputs from community or agency liaison; information in settlement profiles; other research and studies such as Transport Assessments; the cumulative impact of development in a locality; provisions of Circular 12/96 in respect of the relationship of the contribution in scale and kind to the development. Contributions will be required at the time that they become necessary to ensure timely provision of the improvement in question. The Council will pursue a pragmatic approach, taking account of the importance in securing necessary developments, and exceptional development costs that may arise. Contributions are intended to address matters resulting from new proposals, not existing deficiencies. In general, the Council does not intend to require contributions arising from the needs of affordable housing. Contributions towards maintenance will generally be commuted payments covering a 10 year period.

Contributions may be required for one or more of the following:

1. Treatment of surface or foul waste water in accordance with the Plan's policies on preferred methods (including SUDS maintenance);
2. Provision of schools, school extensions or associated facilities, all in accordance with current educational capacity estimates and schedule of contributions;

3. Off-site transport infrastructure including new roads or road improvements, Safer Routes to School, road safety measures, public car parking, cycle-ways and other access routes, subsidy to public transport operators; all in accordance with the Council's standards and the provisions of any Green Travel Plan;
4. Leisure, sport, recreation, play areas and community facilities, either on-site or off-site;
5. Landscape, open space, trees and woodlands, including costs of future management and maintenance;
6. Protection, enhancement and promotion of environmental assets either on-site or off-site, having regard to the Local Biodiversity Action Plan and the Council's Supplementary Planning Guidance on Biodiversity, including compensation for any losses and/or alternative provision;
7. Provision of other facilities and equipment for the satisfactory completion of the development that may include: measures to minimise the risk of crime; provision for the storage, collection and recycling of waste, including communal facilities; and provision of street furniture.

POLICY H2 – PROTECTION OF RESIDENTIAL AMENITY

Development that is judged to have an adverse impact on the amenity of existing or proposed residential areas will not be permitted. To protect the amenity and character of these areas, any developments will be assessed against:

1. The principle of the development, including where relevant, any open space that would be lost; and
2. The details of the development itself particularly in terms of:
 - (i) the scale, form and type of development in terms of its fit within a residential area,
 - (ii) the impact of the proposed development on the existing and surrounding properties particularly in terms of overlooking and loss of privacy. These considerations apply especially in relation to garden ground or 'backland' development,
 - (iii) the generation of traffic or noise,
 - (iv) the level of visual impact.

POLICY G6 – DEVELOPER CONTRIBUTIONS RELATED TO RAILWAY REINSTATEMENT

In accordance with the provisions of the Waverley Railway (Scotland) Act 2006, the Council will seek developer contributions towards the cost of providing the Waverley rail link from any developments that may be considered to benefit from, or be enhanced by, the reinstatement of the rail link. The postcodes affected and level of contribution sought will be in accordance with the Council decision of 5 October 2004 or from any subsequent Council decision during the Local Plan period.

POLICY INF6 – SUSTAINABLE URBAN DRAINAGE

1. Surface water management for new development, for both greenfield and brownfield sites, must comply with current best practice on Sustainable Urban Drainage Systems (SUDS) to the satisfaction of the Council, Scottish Environment Protection Agency, Scottish Natural Heritage and other interested parties.
2. Development will be refused unless surface water treatment is dealt with in a sustainable manner that avoids flooding, pollution, extensive canalisation and culverting of watercourses.
3. A drainage strategy should be submitted with planning applications to include treatment and flood attenuation measures and details for the long term maintenance of any necessary features.

POLICY INF5 – WASTE WATER TREATMENT STANDARDS

The Council's preferred method of dealing with waste water associated with new development will be, in order of priority:

1. direct connection to the public sewerage system, including pumping if necessary, or failing that:
2. negotiating developer contributions with Scottish Water to upgrade the existing sewerage network and/or increasing capacity at the waste water treatment works, or failing that:
3. agreement with Scottish Water to provide permanent or temporary alternatives to sewer connection including the possibility of stand alone treatment plants until sewer capacity becomes available, or, failing that:
4. for development in the countryside i.e. not within or immediately adjacent to publicly sewered areas, the use of private sewerage providing it can be demonstrated that this can be delivered without any negative impacts to public health, the environment or the quality of watercourses or groundwater.

In settlements served by the public foul sewer, permission for an individual private septic tank will normally be refused unless exceptional circumstances prevail and the conditions in criterion 4 can be satisfied,

Development will be refused if:

5. it will result in a proliferation of individual septic tanks or other private water treatment infrastructure within settlements,
6. it will overload existing mains infrastructure or it is impractical for the developer to provide for new infrastructure.

POLICY INF4 – PARKING PROVISIONS AND STANDARDS

Development proposals should provide for car and cycle parking in accordance with the Council's published adopted standards, or any subsequent standards which may subsequently be adopted by the Council (see Appendix D).

Relaxation of standards will be considered where the Council determines that a relaxation is required owing to the nature of the development and/or positive amenity gains can be demonstrated that do not compromise road safety.

In town centres where there appear to be parking difficulties, the Council will consider the desirability of additional public parking provision, in the context of policies to promote the use of sustainable travel modes.

POLICY NE4 – TREES, WOODLANDS AND HEDGEROWS

The Council supports the maintenance and management of trees, woodlands, including ancient woodlands and ancient woodland pastures, and hedgerows, (hereafter referred to as the 'woodland resource') and requires developers to incorporate, wherever feasible, the existing woodland resource into their schemes.

1. Development that would cause the loss of, or serious damage to the woodland resource, will be refused unless the public benefits of the development at the local level clearly outweigh the loss of landscape, ecological, recreational, historical or shelter value. Decision making will be informed by the Scottish Borders Woodland Strategy, expert advice from external agencies, the existing condition of the woodland resource and BS5837: Trees in Relation to Construction;
2. The siting and design of the development should aim to minimise adverse impacts on the biodiversity value of the woodland resource, including its environmental quality, ecological status and viability;
3. Where there is an unavoidable loss of the woodland resource, appropriate replacement planting will normally be a condition of planning permission. In some locations planning agreements will be sought to enhance the woodland resource;

Development proposals should demonstrate how the protection of the woodland resource will be carried out during construction, adopting British Standard 5837.

Proposed Local Development Plan 2016 (incorporating Reporter's changes accepted by Scottish Borders Council)

Policy HD2: Housing in the Countryside

The Council wishes to promote appropriate rural housing development:

- a) in village locations in preference to the open countryside where permission will only be granted in special circumstances on appropriate sites,
- b) associated with existing building groups where this does not adversely affect their character or that of the surrounding area, and
- c) in dispersed communities in the Southern Borders housing market area.

These general principles in addition to the requirement for suitable roads access will be the starting point for the consideration of applications for housing in the countryside, which will be supplemented by Supplementary Planning Guidance / Supplementary Guidance on New Housing in the Borders Countryside and on Placemaking and Design.

(A) Building Groups

Housing of up to a total of 2 additional dwellings or a 30% increase of the building group, whichever is the greater, associated with existing building groups may be approved provided that:

- a) the Council is satisfied that the site is well related to an existing group of at least three houses or building(s) currently in residential use or capable of conversion to residential use. Where conversion is required to establish a cohesive group of at least three houses, no additional housing will be approved until such conversion has been implemented,
- b) the cumulative impact of new development on the character of the building group, and on the landscape and amenity of the surrounding area will be taken into account when determining new applications. Additional development within a building group will be refused if, in conjunction with other developments in the area, it will cause unacceptable adverse impacts,
- c) any consents for new build granted under this part of this policy should not exceed two housing dwellings or a 30% increase in addition to the group during the Plan period. No further development above this threshold will be permitted.

In addition, where a proposal for new development is to be supported, the proposal should be appropriate in scale, siting, design, access, and materials, and should be sympathetic to the character of the group.

The calculations on building group size are based on the existing number of housing units within the group as at the start of the Local Development Plan period. This will include those units under construction or nearing completion at that point.

(B) Dispersed Buildings Groups

In the Southern Housing Market area there are few building groups comprising 3 houses or more, and a more dispersed pattern is the norm. In this area a lower threshold may be appropriate, particularly where this would result in tangible community, economic or environmental benefits. In these cases the existence of a sense of place will be the primary consideration.

Housing of up to 2 additional dwellings associated with dispersed building groups that meet the above criteria may be approved provided that:

- a) the Council is satisfied that the site lies within a recognised dispersed community in the Southern Borders housing market area,
- b) any consents for new build granted under this part of this policy should not exceed two housing dwellings in addition to the group during the Plan period. No further development above this threshold will be permitted,
- c) the design of housing will be subject to the same considerations as other types of housing in the countryside proposals.

(C) Conversions of Buildings to a House

Development that is a change of use of a building to a house may be acceptable provided that:

- a) the Council is satisfied that the building has architectural or historic merit, is capable of conversion and is physically suited for residential use,
- b) the building stands substantially intact (normally at least to wallhead height) and the existing structure requires no significant demolition. A structural survey will be required where in the opinion of the Council it appears that the building may not be capable of conversion, and
- c) the conversion and any proposed extension or alteration is in keeping with the scale and architectural character of the existing building.

(D) Restoration of Houses

The restoration of a house may also be acceptable provided that the walls of the former residential property stand substantially intact (normally at least to wallhead height). In addition:

- a) the siting and design reflects and respects the historical building pattern and the character of the landscape setting,
- b) any proposed extension or alteration should be in keeping with the scale, form and architectural character of the existing or original building, and
- c) significant alterations to the original character will only be considered where it can be demonstrated that these provide environmental benefits such as a positive contribution to the landscape and/or a more sustainable and energy efficient design.

(E) Replacement Dwellings

The proposed replacement of an existing house may be acceptable provided that:

- a) the siting and design of the new building reflects and respects the historical building pattern and the character of the landscape setting,
- b) the proposal is in keeping with the existing/original building in terms of its scales, extent, form and architectural character,
- c) significant alterations to the original character of the house will only be considered where it can be demonstrated that these provide environmental benefits such as a positive contribution to the landscape and /or a more sustainable and energy efficient design.

(F) Economic Requirement

Housing with a location essential for business needs may be acceptable if the Council is satisfied that:

- a) the housing development is a direct operational requirement of an agricultural, horticultural, forestry or other enterprise which is itself appropriate to the countryside, and it is for a worker predominantly employed in the enterprise and the presence of that worker on-site is essential to the efficient operation of the enterprise. Such development could include businesses that would cause disturbance or loss of amenity if located within an existing settlement, or
- b) it is for use of a person last employed in an agricultural, horticultural, forestry or other enterprise which is itself appropriate to the countryside, and also employed on the unit that is the subject of the application, and the development will release another house for continued use by an agricultural, horticultural, forestry or other enterprise which is itself appropriate to the countryside, and
- c) the housing development would help support a business that results in a clear social or environmental benefit to the area, including the retention or provision of employment or the provision of affordable or local needs housing, and
- d) no appropriate site exists within a building group, and
- e) there is no suitable existing house or other building capable of conversion for the required residential use.

In ALL instances in considering proposals relative to each of the policy sections above, there shall be compliance with the Council's Supplementary Planning Guidance where it meets the terms of this policy and development must not negatively impact on landscape and existing communities. The cumulative effect of applications under this policy will be taken into account when determining impact.

Policy PMD2: Quality Standards

All new development will be expected to be of high quality in accordance with sustainability principles, designed to fit with Scottish Borders townscapes and to integrate with its landscape surroundings. The standards which will apply to all development are that:

Sustainability

- a) In terms of layout, orientation, construction and energy supply, the developer has demonstrated that appropriate measures have been taken to maximise the efficient use of energy and resources, including the use of renewable energy and resources such as District Heating Schemes and the incorporation of sustainable construction techniques in accordance with supplementary planning guidance. Planning applications must demonstrate that the current carbon dioxide emissions reduction target has been met, with at least half of this target met through the use of low or zero carbon technology,
- b) it provides digital connectivity and associated infrastructure,
- c) it provides for Sustainable Urban Drainage Systems in the context of overall provision of Green Infrastructure where appropriate and their after-care and maintenance,
- d) it encourages minimal water usage for new developments,
- e) it provides for appropriate internal and external provision for waste storage and presentation with, in all instances, separate provision for waste and recycling and, depending on the location, separate provision for composting facilities,
- f) it incorporates appropriate hard and soft landscape works, including structural or screen planting where necessary, to help integration with its surroundings and the wider environment and to meet open space requirements. In some cases agreements will be required to ensure that landscape works are undertaken at an early stage of development and that appropriate arrangements are put in place for long term landscape/open space maintenance,
- g) it considers, where appropriate, the long term adaptability of buildings and spaces.

Placemaking & Design

- h) It creates developments with a sense of place, based on a clear understanding of the context, designed in sympathy with Scottish Borders architectural styles; this need not exclude appropriate contemporary and/or innovative design,
- i) it is of a scale, massing, height and density appropriate to its surroundings and, where an extension or alteration, appropriate to the existing building,
- j) it is finished externally in materials, the colours and textures of which complement the highest quality of architecture in the locality and, where an extension or alteration, the existing building,
- k) it is compatible with, and respects the character of the surrounding area, neighbouring uses, and neighbouring built form,
- l) it can be satisfactorily accommodated within the site,
- m) it provides appropriate boundary treatments to ensure attractive edges to the development that will help integration with its surroundings,
- n) it incorporates, where appropriate, adequate safety and security measures, in accordance with current guidance on 'designing out crime'.

Accessibility

- o) Street layouts must be designed to properly connect and integrate with existing street patterns and be able to be easily extended in the future where appropriate in order to minimise the need for turning heads and isolated footpaths,
- p) it incorporates, where required, access for those with mobility difficulties,
- q) it ensures there is no adverse impact on road safety, including but not limited to the site access,
- r) it provides for linkages with adjoining built up areas including public transport connections and provision for buses, and new paths and cycleways, linking where possible to the existing path network; Travel Plans will be encouraged to support more sustainable travel patterns,

s) it incorporates adequate access and turning space for vehicles including those used for waste collection purposes.

Greenspace, Open Space & Biodiversity

t) It provides meaningful open space that wherever possible, links to existing open spaces and that is in accordance with current Council standards pending preparation of an up-to-date open space strategy and local standards. In some cases a developer contribution to wider neighbourhood or settlement provision may be appropriate, supported by appropriate arrangements for maintenance,

u) it retains physical or natural features or habitats which are important to the amenity or biodiversity of the area or makes provision for adequate mitigation or replacements.

Developers are required to provide design and access statements, design briefs and landscape plans as appropriate.

Policy HD3 – Protection of Residential Amenity

Development that is judged to have an adverse impact on the amenity of existing or proposed residential areas will not be permitted. To protect the amenity and character of these areas, any developments will be assessed against:

- a) the principle of the development, including where relevant, any open space that would be lost; and
- b) the details of the development itself particularly in terms of:
 - (i) the scale, form and type of development in terms of its fit within a residential area,
 - (ii) the impact of the proposed development on the existing and surrounding properties particularly in terms of overlooking, loss of privacy and sunlighting provisions. These considerations apply especially in relation to garden ground or 'backland' development,
 - (iii) the generation of traffic or noise,
 - (iv) the level of visual impact.

Policy IS2: Developer Contributions

Where a site is otherwise acceptable in terms of planning policy, but cannot proceed due to deficiencies in infrastructure and services or to environmental impacts, any or all of which will be created or exacerbated as a result of the development, the Council will require developers to make a full or partial contribution towards the cost of addressing such deficiencies.

Contributions may be required for one or more of the following:

- a) treatment of surface or foul waste water in accordance with the Plan's policies on preferred methods (including SUDS maintenance);
- b) provision of schools, school extensions or associated facilities, all in accordance with current educational capacity estimates and schedule of contributions;
- c) off-site transport infrastructure including new roads or road improvements, Safer Routes to School, road safety measures, public car parking, cycle-ways, bridges and associated studies and other access routes, subsidy to public transport operators; all in accordance with the relevant standards and the provisions of any Travel Plan;
- d) leisure, sport, recreation, play areas and community facilities, either on-site or off-site;
- e) landscape, open space, allotment provision, trees and woodlands, including costs of future management and maintenance;

- f) protection, enhancement and promotion of environmental assets either on-site or off-site, having regard to the Local Biodiversity Action Plan and the Council's Supplementary Planning Guidance on Biodiversity, including compensation for any losses and/or alternative provision;
- g) provision of other facilities and equipment for the satisfactory completion of the development that may include: measures to minimise the risk of crime; provision for the storage, collection and recycling of waste, including communal facilities; provision of street furniture and digital connectivity with associated infrastructure.

Wherever possible, any requirement to provide developer contributions will be secured by planning condition. Where a legal agreement is necessary, the preference for using an agreement under other legislation, for example the 1973 Local Government (Scotland) Act and the 1984 Roads (Scotland) Act will be considered. A planning obligation will only be necessary where successors in title need to be bound by its terms. Where appropriate, the council will consider the economic viability of a proposed development, including possible payment options, such as staged or phased payments.

Policy IS3 - Developer Contributions related to the Borders Railway

In accordance with the provisions of the Waverley Railway (Scotland) Act 2006, the Council will seek developer contributions towards the cost of providing the Borders railway from any developments that may be considered to benefit from, or be enhanced by, the re-instatement of the rail link.

Policy IS7 – Parking Provision and Standards

Development proposals should provide for car and cycle parking in accordance with approved standards.

Relaxation of technical standards will be considered where appropriate due to the nature of the development and/or if positive amenity gains can be demonstrated that do not compromise road safety.

In town centres where there appear to be parking difficulties, the Council will consider the desirability of seeking additional public parking provision, in the context of policies to promote the use of sustainable travel modes.

Policy IS9 - Waste Water Treatment Standards and Sustainable Urban Drainage

Waste Water Treatment Standards

The Council's preferred method of dealing with waste water associated with new development will be, in order of priority:

- a) direct connection to the public sewerage system, including pumping if necessary, or failing that:
- b) negotiating developer contributions with Scottish Water to upgrade the existing sewerage network and/or increasing capacity at the waste water treatment works, or failing that:
- c) agreement with Scottish Water and SEPA where required to provide permanent or temporary alternatives to sewer connection including the possibility of stand alone treatment plants until sewer capacity becomes available, or, failing that:
- d) for development in the countryside i.e. not within or immediately adjacent to publicly sewered areas, the use of private sewerage treatment may be acceptable, providing it can

be demonstrated that this can be delivered without any negative impacts to public health, the environment or the quality of watercourses or groundwater.

In settlements served by the public foul sewer, permission for an individual private sewage treatment system will normally be refused unless exceptional circumstances prevail and the conditions in criteria d above can be satisfied,

Development will be refused if:

- a) it will result in a proliferation of individual septic tanks or other private water treatment infrastructure within settlements,
- b) it will overload existing mains infrastructure or it is impractical for the developer to provide for new infrastructure.

Sustainable Urban Drainage

Surface water management for new development, for both greenfield and brownfield sites, must comply with current best practice on sustainable urban drainage systems to the satisfaction of the council, Scottish Environment Protection Agency (where required), Scottish Natural Heritage and other interested parties where required. Development will be refused unless surface water treatment is dealt with in a sustainable manner that avoids flooding, pollution, extensive canalisation and culverting of watercourses. A drainage strategy should be submitted with planning applications to include treatment and flood attenuation measures and details for the long term maintenance of any necessary features.

Policy EP13: Trees, Woodlands and Hedgerows

The Council will refuse development that would cause the loss of or serious damage to the woodland resource unless the public benefits of the development clearly outweigh the loss of landscape, ecological, recreational, historical, or shelter value.

Any development that may impact on the woodland resource should:

- a) aim to minimise adverse impacts on the biodiversity value of the woodland resource, including its environmental quality, ecological status and viability; and
- b) where there is an unavoidable loss of the woodland resource, ensure appropriate replacement planting, where possible, within the area of the Scottish Borders; and
- c) adhere to any planning agreement sought to enhance the woodland resource
