None applicable

## **Consolidated Scottish Borders Local Plan 2011**

### POLICY G1 - QUALITY STANDARDS FOR NEW DEVELOPMENT

All new development will be expected to be of high quality in accordance with sustainability principles, designed to fit with Scottish Borders townscapes and to integrate with its landscape surroundings. The standards which will apply to all development are that:

1. It is compatible with, and respects the character of the surrounding area, neighbouring uses, and neighbouring built form,
2. it can be satisfactorily accommodated within the site,
3. it retains physical or natural features or habitats which are important to the amenity or biodiversity of the area or makes provision for adequate mitigation or replacements,
4. it creates developments with a sense of place, designed in sympathy with Scottish Borders architectural styles; this need not exclude appropriate contemporary and/or innovative design,
5. in terms of layout, orientation, construction and energy supply, the developer has demonstrated that appropriate measures have been taken to maximise the efficient use of energy and resources, including the use of renewable energy and resources and the incorporation of sustainable construction techniques in accordance with supplementary planning guidance referred to in Appendix D,
6. it incorporates appropriate hard and soft landscape works, including structural or screen planting where necessary, to help integration with its surroundings and the wider environment and to meet open space requirements. In some cases agreements will be required to ensure that landscape works are undertaken at an early stage of development and that appropriate arrangements are put in place for long term landscape/open space maintenance,
7. it provides open space that wherever possible, links to existing open spaces and that is in accordance with current Council standards pending preparation of an up-to-date open space strategy and local standards. In some cases a developer contribution to wider neighbourhood or settlement provision may be appropriate, supported by appropriate arrangements for maintenance,
8. it provides appropriate boundary treatments to ensure attractive edges to the development that will help integration with its surroundings,
9. it provides for linkages with adjoining built up areas including public transport connections and provision for bus laybys, and new paths and cycleways, linking where possible to the existing path network; Green Travel Plans will be encouraged to support more sustainable travel patterns,
10. it provides for Sustainable Urban Drainage Systems where appropriate and their after-care and maintenance,
11. it provides for recycling, re-using and composting waste where appropriate,
12. it is of a scale, massing, height and density appropriate to its surroundings and, where an extension or alteration, appropriate to the existing building,

13. it is finished externally in materials, the colours and textures of which complement the highest quality of architecture in the locality and, where an extension or alteration, the existing building,
14. it incorporates, where required, access for those with mobility difficulties,
15. it incorporates, where appropriate, adequate safety and security measures, in accordance with current guidance on 'designing out crime'.

Developers may be required to provide design statements, design briefs or landscape plans as appropriate.

## POLICY G2 - CONTAMINATED LAND

Where development is proposed on land that is contaminated, or suspected of contamination, the developer will be required to:

1. Carry out any necessary site investigations and assessments to identify any actual or possible significant risk to public health or safety, or to the environment, including possible pollution of controlled waters that arise from the proposals;
2. consult with relevant agencies as part of their assessment, in particular the Scottish Environment Protection Agency in relation to impact on controlled waters and Scottish Natural Heritage and other relevant agencies in relation to other environmental risks; and
3. undertake effective remedial action to ensure the site is made suitable for any new use, in scale with planning permission given for that particular use.

## POLICY G5 – DEVELOPER CONTRIBUTIONS

Where a site is otherwise acceptable but cannot proceed due to deficiencies in infrastructure and services or to environmental impacts, any or all of which will be created or exacerbated as a result of the development, the Council will require developers to make a full or part contribution through S.75 or alternative Legal Agreements towards the cost of addressing such deficiencies.

Each application will be assessed to determine the appropriate level of contribution guided by: the requirements identified in the Council's Supplementary Planning Guidance on developer contributions; planning or development briefs; outputs from community or agency liaison; information in settlement profiles; other research and studies such as Transport Assessments; the cumulative impact of development in a locality; provisions of Circular 12/96 in respect of the relationship of the contribution in scale and kind to the development. Contributions will be required at the time that they become necessary to ensure timely provision of the improvement in question. The Council will pursue a pragmatic approach, taking account of the importance in securing necessary developments, and exceptional development costs that may arise. Contributions are intended to address matters resulting from new proposals, not existing deficiencies. In general, the Council does not intend to require contributions arising from the needs of affordable housing. Contributions towards maintenance will generally be commuted payments covering a 10 year period.

Contributions may be required for one or more of the following:

1. Treatment of surface or foul waste water in accordance with the Plan's policies on preferred methods (including SUDS maintenance);

2. Provision of schools, school extensions or associated facilities, all in accordance with current educational capacity estimates and schedule of contributions;
3. Off-site transport infrastructure including new roads or road improvements, Safer Routes to School, road safety measures, public car parking, cycle-ways and other access routes, subsidy to public transport operators; all in accordance with the Council's standards and the provisions of any Green Travel Plan;
4. Leisure, sport, recreation, play areas and community facilities, either on-site or off-site;
5. Landscape, open space, trees and woodlands, including costs of future management and maintenance;
6. Protection, enhancement and promotion of environmental assets either on-site or off-site, having regard to the Local Biodiversity Action Plan and the Council's Supplementary Planning Guidance on Biodiversity, including compensation for any losses and/or alternative provision;
7. Provision of other facilities and equipment for the satisfactory completion of the development that may include: measures to minimise the risk of crime; provision for the storage, collection and recycling of waste, including communal facilities; and provision of street furniture.

#### POLICY G6 – DEVELOPER CONTRIBUTIONS RELATED TO RAILWAY REINSTATEMENT

In accordance with the provisions of the Waverley Railway (Scotland) Act 2006, the Council will seek developer contributions towards the cost of providing the Waverley rail link from any developments that may be considered to benefit from, or be enhanced by, the reinstatement of the rail link. The postcodes affected and level of contribution sought will be in accordance with the Council decision of 5 October 2004 or from any subsequent Council decision during the Local Plan period.

#### POLICY G7 – INFILL DEVELOPMENT

Within Development Boundaries, as shown on Proposals Maps, development on non-allocated, infill or windfall, sites, including the re-use of buildings, will be approved if:

1. in the case of a gap site, it can be justified under Policies BE6 (Protection of Open Space), Policy NE3 (Local Biodiversity) and Policy Inf11 (Developments that Generate Travel Demand);
2. in the case of employment land the proposed new use can be justified under Policy ED1 to prevent the loss of employment land with prospects of future use;
3. in the case of garden ground or backland sites, it can be justified under Policy H2 to safeguard the amenity of residential areas;

In all cases, the following criteria will apply to proposed infill development:-

- i) where relevant, it does not conflict with the established land use of the area; and

- ii) it does not detract from the character and amenity of the surrounding area; and
- iii) the individual and cumulative effects of the development can be sustained by the social and economic infrastructure and it does not lead to over-development or ‘town and village cramming’; and
- iv) it respects the scale, form, design, materials and density of its surroundings; and
- v) adequate access and servicing can be achieved, particularly taking account of water and drainage and schools capacity; and
- vi) it does not result in any significant loss of daylight, sunlight or privacy to adjoining properties as a result of overshadowing or overlooking.

All applications will be considered against the Council’s Supplementary Planning Guidance on Placemaking and Design.

## POLICY H2 – PROTECTION OF RESIDENTIAL AMENITY

Development that is judged to have an adverse impact on the amenity of existing or proposed residential areas will not be permitted. To protect the amenity and character of these areas, any developments will be assessed against:

- 1 The principle of the development, including where relevant, any open space that would be lost; and
- 2 The details of the development itself particularly in terms of:
  - (i) the scale, form and type of development in terms of its fit within a residential area,
  - (ii) the impact of the proposed development on the existing and surrounding properties particularly in terms of overlooking and loss of privacy. These considerations apply especially in relation to garden ground or ‘backland’ development,
  - (iii) the generation of traffic or noise,
  - (iv) the level of visual impact.

## POLICY NE3 - LOCAL BIODIVERSITY

1. The Council will seek to safeguard the integrity of habitats both within and outwith settlements which are of importance for the maintenance and enhancement of local biodiversity. The rationale and detail for this is set out in the Supplementary Planning Guidance for Biodiversity.
2. Where development is proposed on a site for which there is evidence to suggest that a habitat or species of importance exists, the developer may be required, at their own expense, to undertake a survey of the site’s natural environment. Major developments, as defined by the categories of development identified in the Council’s biannual Scottish Government Planning Application Returns, may require an Ecological Impact Assessment.
3. Development that could impact on local biodiversity through impacts on habitats and species should
  - i) Be sited and designed to minimise adverse impacts on the biodiversity of the site, including its environmental quality, ecological status and viability,
  - ii) Aim to avoid the fragmentation or isolation of habitats,

- iii) Aim to enhance the biodiversity value of the site through the creation or restoration of habitats and wildlife corridors and provision for their long term management and maintenance.
4. Development that would have an unacceptable adverse effect on habitats or species of Conservation Concern as identified in the regional listings in the Local Biodiversity Action Plan (LBAP) will be refused unless it can be demonstrated that the public benefits of the development clearly outweigh the value of the habitat for biodiversity conservation.
5. Where the reasons in favour of development clearly outweigh the desirability of retaining particular habitat features, mitigation measures aimed at ensuring no net loss of LBAP habitats will be sought, including the creation of new habitats or the enhancement of existing habitats, in accordance with Policy G5 Developer Contributions and the associated Supplementary Planning Guidance.

#### POLICY INF6 – SUSTAINABLE URBAN DRAINAGE

1. Surface water management for new development, for both greenfield and brownfield sites, must comply with current best practice on Sustainable Urban Drainage Systems (SUDS) to the satisfaction of the Council, Scottish Environment Protection Agency, Scottish Natural Heritage and other interested parties.
2. Development will be refused unless surface water treatment is dealt with in a sustainable manner that avoids flooding, pollution, extensive canalisation and culverting of watercourses.
3. A drainage strategy should be submitted with planning applications to include treatment and flood attenuation measures and details for the long term maintenance of any necessary features.

#### POLICY INF5 – WASTE WATER TREATMENT STANDARDS

The Council's preferred method of dealing with waste water associated with new development will be, in order of priority:

1. direct connection to the public sewerage system, including pumping if necessary, or failing that:
2. negotiating developer contributions with Scottish Water to upgrade the existing sewerage network and/or increasing capacity at the waste water treatment works, or failing that:
3. agreement with Scottish Water to provide permanent or temporary alternatives to sewer connection including the possibility of stand alone treatment plants until sewer capacity becomes available, or, failing that:
4. for development in the countryside i.e. not within or immediately adjacent to publicly sewered areas, the use of private sewerage providing it can be demonstrated that this can be delivered without any negative impacts to public health, the environment or the quality of watercourses or groundwater.

In settlements served by the public foul sewer, permission for an individual private septic tank will normally be refused unless exceptional circumstances prevail and the conditions in criterion 4 can be satisfied,

Development will be refused if:

5. it will result in a proliferation of individual septic tanks or other private water treatment infrastructure within settlements,
6. it will overload existing mains infrastructure or it is impractical for the developer to provide for new infrastructure.

#### POLICY INF4 – PARKING PROVISIONS AND STANDARDS

Development proposals should provide for car and cycle parking in accordance with the Council's published adopted standards, or any subsequent standards which may subsequently be adopted by the Council (see Appendix D).

Relaxation of standards will be considered where the Council determines that a relaxation is required owing to the nature of the development and/or positive amenity gains can be demonstrated that do not compromise road safety.

In town centres where there appear to be parking difficulties, the Council will consider the desirability of additional public parking provision, in the context of policies to promote the use of sustainable travel modes.

#### **Proposed Local Development Plan 2016 (incorporating Reporter's changes accepted by Scottish Borders Council)**

##### Policy PMD2: Quality Standards

All new development will be expected to be of high quality in accordance with sustainability principles, designed to fit with Scottish Borders townscapes and to integrate with its landscape surroundings. The standards which will apply to all development are that:

##### Sustainability

- a) In terms of layout, orientation, construction and energy supply, the developer has demonstrated that appropriate measures have been taken to maximise the efficient use of energy and resources, including the use of renewable energy and resources such as District Heating Schemes and the incorporation of sustainable construction techniques in accordance with supplementary planning guidance. Planning applications must demonstrate that the current carbon dioxide emissions reduction target has been met, with at least half of this target met through the use of low or zero carbon technology,
- b) it provides digital connectivity and associated infrastructure,
- c) it provides for Sustainable Urban Drainage Systems in the context of overall provision of Green Infrastructure where appropriate and their after-care and maintenance,
- d) it encourages minimal water usage for new developments,
- e) it provides for appropriate internal and external provision for waste storage and presentation with, in all instances, separate provision for waste and recycling and, depending on the location, separate provision for composting facilities,
- f) it incorporates appropriate hard and soft landscape works, including structural or screen planting where necessary, to help integration with its surroundings and the wider environment and to meet open space requirements. In some cases agreements will be required to ensure that landscape works are undertaken at an early stage of development and that appropriate arrangements are put in place for long term landscape/open space maintenance,
- g) it considers, where appropriate, the long term adaptability of buildings and spaces.

##### Placemaking & Design

- h) It creates developments with a sense of place, based on a clear understanding of the context, designed in sympathy with Scottish Borders architectural styles; this need not exclude appropriate contemporary and/or innovative design,
- i) it is of a scale, massing, height and density appropriate to its surroundings and, where an extension or alteration, appropriate to the existing building,
- j) it is finished externally in materials, the colours and textures of which complement the highest quality of architecture in the locality and, where an extension or alteration, the existing building,
- k) it is compatible with, and respects the character of the surrounding area, neighbouring uses, and neighbouring built form,
- l) it can be satisfactorily accommodated within the site,
- m) it provides appropriate boundary treatments to ensure attractive edges to the development that will help integration with its surroundings,
- n) it incorporates, where appropriate, adequate safety and security measures, in accordance with current guidance on 'designing out crime'.

#### Accessibility

- o) Street layouts must be designed to properly connect and integrate with existing street patterns and be able to be easily extended in the future where appropriate in order to minimise the need for turning heads and isolated footpaths,
- p) it incorporates, where required, access for those with mobility difficulties,
- q) it ensures there is no adverse impact on road safety, including but not limited to the site access,
- r) it provides for linkages with adjoining built up areas including public transport connections and provision for buses, and new paths and cycleways, linking where possible to the existing path network; Travel Plans will be encouraged to support more sustainable travel patterns,
- s) it incorporates adequate access and turning space for vehicles including those used for waste collection purposes.

#### Greenspace, Open Space & Biodiversity

- t) It provides meaningful open space that wherever possible, links to existing open spaces and that is in accordance with current Council standards pending preparation of an up-to-date open space strategy and local standards. In some cases a developer contribution to wider neighbourhood or settlement provision may be appropriate, supported by appropriate arrangements for maintenance,
- u) it retains physical or natural features or habitats which are important to the amenity or biodiversity of the area or makes provision for adequate mitigation or replacements.

Developers are required to provide design and access statements, design briefs and landscape plans as appropriate.

#### Policy PMD5: Infill Development

Development on non-allocated, infill or windfall, sites, including the re-use of buildings within Development Boundaries as shown on proposal maps will be approved where the following criteria are satisfied:

- a) where relevant, it does not conflict with the established land use of the area; and
- b) it does not detract from the character and amenity of the surrounding area; and
- c) the individual and cumulative effects of the development can be sustained by the social and economic infrastructure and it does not lead to over-development or 'town and village cramming'; and
- d) it respects the scale, form, design, materials and density in context of its surroundings; and

- e) adequate access and servicing can be achieved, particularly taking account of water and drainage and schools capacity; and
- f) it does not result in any significant loss of daylight, sunlight or privacy to adjoining properties as a result of overshadowing or overlooking.

All applications will be considered against the Council's Supplementary Planning Guidance on Placemaking and Design. Developers are required to provide design statements as appropriate.

### Policy EP3: Local Biodiversity

Development that would have an unacceptable adverse effect on Borders Notable Species and Habitats of Conservation Concern will be refused unless it can be demonstrated that the public benefits of the development clearly outweigh the value of the habitat for biodiversity conservation.

Any development that could impact on local biodiversity through impacts on habitats and species should:

- a) aim to avoid fragmentation or isolation of habitats; and
- b) be sited and designed to minimise adverse impacts on the biodiversity of the site, including its environmental quality, ecological status and viability; and
- c) compensate to ensure no net loss of biodiversity through use of biodiversity offsets as appropriate; and
- d) aim to enhance the biodiversity value of the site, through use of an ecosystems approach, with the aim of creation or restoration of habitats and wildlife corridors and provision for their long-term management and maintenance

### Policy IS13: Contaminated Land

Where development is proposed on land that is contaminated, suspected of contamination, or unstable the developer will be required to:

- (a) carry out, in full consultation with, and to the satisfaction of Scottish Borders Council, appropriate phased site investigations and risk assessments; and
- (b) where necessary, and to the satisfaction of Scottish Borders Council design, implement, and validate appropriate remedial or mitigation measures to render the site suitable for its proposed use.

### Policy HD3 – Protection of Residential Amenity

Development that is judged to have an adverse impact on the amenity of existing or proposed residential areas will not be permitted. To protect the amenity and character of these areas, any developments will be assessed against:

- a) the principle of the development, including where relevant, any open space that would be lost; and
- b) the details of the development itself particularly in terms of:
  - (i) the scale, form and type of development in terms of its fit within a residential area,
  - (ii) the impact of the proposed development on the existing and surrounding properties particularly in terms of overlooking, loss of privacy and sunlighting provisions. These considerations apply especially in relation to garden ground or 'backland' development,
  - (iii) the generation of traffic or noise,

(iv) the level of visual impact.

### Policy IS2: Developer Contributions

Where a site is otherwise acceptable in terms of planning policy, but cannot proceed due to deficiencies in infrastructure and services or to environmental impacts, any or all of which will be created or exacerbated as a result of the development, the Council will require developers to make a full or partial contribution towards the cost of addressing such deficiencies.

Contributions may be required for one or more of the following:

- a) treatment of surface or foul waste water in accordance with the Plan's policies on preferred methods (including SUDS maintenance);
- b) provision of schools, school extensions or associated facilities, all in accordance with current educational capacity estimates and schedule of contributions;
- c) off-site transport infrastructure including new roads or road improvements, Safer Routes to School, road safety measures, public car parking, cycle-ways, bridges and associated studies and other access routes, subsidy to public transport operators; all in accordance with the relevant standards and the provisions of any Travel Plan;
- d) leisure, sport, recreation, play areas and community facilities, either on-site or off-site;
- e) landscape, open space, allotment provision, trees and woodlands, including costs of future management and maintenance;
- f) protection, enhancement and promotion of environmental assets either on-site or off-site, having regard to the Local Biodiversity Action Plan and the Council's Supplementary Planning Guidance on Biodiversity, including compensation for any losses and/or alternative provision;
- g) provision of other facilities and equipment for the satisfactory completion of the development that may include: measures to minimise the risk of crime; provision for the storage, collection and recycling of waste, including communal facilities; provision of street furniture and digital connectivity with associated infrastructure.

Wherever possible, any requirement to provide developer contributions will be secured by planning condition. Where a legal agreement is necessary, the preference for using an agreement under other legislation, for example the 1973 Local Government (Scotland) Act and the 1984 Roads (Scotland) Act will be considered. A planning obligation will only be necessary where successors in title need to be bound by its terms. Where appropriate, the council will consider the economic viability of a proposed development, including possible payment options, such as staged or phased payments.

### Policy IS3 - Developer Contributions related to the Borders Railway

In accordance with the provisions of the Waverley Railway (Scotland) Act 2006, the Council will seek developer contributions towards the cost of providing the Borders railway from any developments that may be considered to benefit from, or be enhanced by, the re-instatement of the rail link.

### Policy IS7 – Parking Provision and Standards

Development proposals should provide for car and cycle parking in accordance with approved standards.

Relaxation of technical standards will be considered where appropriate due to the nature of the development and/or if positive amenity gains can be demonstrated that do not compromise road safety.

In town centres where there appear to be parking difficulties, the Council will consider the desirability of seeking additional public parking provision, in the context of policies to promote the use of sustainable travel modes.

### Policy IS9 - Waste Water Treatment Standards and Sustainable Urban Drainage

#### Waste Water Treatment Standards

The Council's preferred method of dealing with waste water associated with new development will be, in order of priority:

- a) direct connection to the public sewerage system, including pumping if necessary, or failing that:
- b) negotiating developer contributions with Scottish Water to upgrade the existing sewerage network and/or increasing capacity at the waste water treatment works, or failing that:
- c) agreement with Scottish Water and SEPA where required to provide permanent or temporary alternatives to sewer connection including the possibility of stand alone treatment plants until sewer capacity becomes available, or, failing that:
- d) for development in the countryside i.e. not within or immediately adjacent to publicly sewered areas, the use of private sewerage treatment may be acceptable, providing it can be demonstrated that this can be delivered without any negative impacts to public health, the environment or the quality of watercourses or groundwater.

In settlements served by the public foul sewer, permission for an individual private sewage treatment system will normally be refused unless exceptional circumstances prevail and the conditions in criteria d above can be satisfied,

Development will be refused if:

- a) it will result in a proliferation of individual septic tanks or other private water treatment infrastructure within settlements,
- b) it will overload existing mains infrastructure or it is impractical for the developer to provide for new infrastructure.

#### Sustainable Urban Drainage

Surface water management for new development, for both greenfield and brownfield sites, must comply with current best practice on sustainable urban drainage systems to the satisfaction of the council, Scottish Environment Protection Agency (where required), Scottish Natural Heritage and other interested parties where required. Development will be refused unless surface water treatment is dealt with in a sustainable manner that avoids flooding, pollution, extensive canalisation and culverting of watercourses. A drainage strategy should be submitted with planning applications to include treatment and flood attenuation measures and details for the long term maintenance of any necessary features.
